So that what your Honor has before you today is the special master said, first, he was bound by your Honor's order; he said, secondly, independently of that, as a matter of his discretion, based on his knowledge of this case over all these months, he would deny this if he were to exercise any discretion, and I think he was entirely sound.

I think this is a matter in which your Honor [10] should give his discretion great weight.

As to the history of the problem before your Honor today, we served and filed with the Court—I don't know whether the Court has had a chance to read it—a brief memorandum just setting forth the chronology of this particular matter. Your Honor will find that this has a long history, going back to March of this year. It is evident, I submit from that history, that for a period of over four months the Hughes Tool Company has been stalling on this question, and what they now would have your Honor do is give them another two months. If they are permitted to do this, the interrogatories will be completely meaningless and so will the answers because Hughes has known, I am sure, since March that the interrogatories was a problem that they were going to face.

I find, looking at this chronology, and I think the Court will agree with this thought, that from March right on there has been a calculated program here of delay. It is characterized by letters to the Court, by letters to the special master, by statements of misunderstanding by Mr. Davis and the like, knowing full well that he was under an order by the special master months ago to get this information up. Now his response to that is a very flat statement

by him to the special master, [11] "I have taken no action" after these months, after the series of orders by the special master and the Court. It seems to me that counsel should not be permitted just to say, "I have taken no action." I don't think there is any showing, may it please the Court, of any basis on which they should have any extension of time. I don't think the rules were made to be set aside by counsel's whim, and that is what we are confronted with here.

If this were the first time the interrogatories question was up, I would feel rather differently, but the matter has been very much before the Hughes Tool Company and the Court and the special master since March. I don't think there is any showing of any reason why they should be given additional time.

The Court: I handed down my opinion July 12th. You will have to start with July 12th. Now, it is true, since you have had a broad interrogatory which has been sustained, that nothwithstanding vacation plans of counsel, certainly vacation plans of employees who are employed have been advanced, and you may be met with an argument that these people are away and are not available. Now they can't be held at fault for that. They can't force their officers and employees to hang around while they make up the answers to interrogatories.

[12] Mr. Sonnett: They knew back in the spring, long before vacation time, about this.

The Court: They didn't know until I ruled upon it.

Mr. Sonnett: They knew they were under an order by the special master.

The Court: From which an appeal was taken tardily, but it was taken.

Mr. Sonnett: Yes, and they knew and their employees knew. Now Mr. Davis has solved that problem in the course of colloquy at one point when he indicated it might be difficult to get hold of some of them, but I think the Court will be very much interested, and I know I will be, if it develops, for example, that Nadine Henley has been sent to Europe for three months. I think if we find we are being diddled, and I think that is what Mr. Davis has been doing with us, by moving out of range people who can give the answers, I think the Court will take as dim a view as I do of that.

The Court: There is nothing to prevent them from writing letters to wherever he is and getting answers by correspondence.

Mr. Sonnett: Exactly, your Honor. I think they can give us an answer to this in fifteen minutes.

[13] The Court: I also have to take into consideration the broadness of the interrogatories and the ability of the defendant to answer it properly.

Mr. Sonnett: I think if they were trying to make any kind of good-faith compliance here, in fifteen minutes by a phone call they can tell us where Mr. Hughes is, we would serve him with a subpoena returnable on a set date or such other date as may be fixed, and the whole problem would be laid to rest.

The Court: They may tell you now that Mr. Hughes is at some address in Los Angeles and by the time you get around there he is in Las Vegas at some famous address or in Houston, Texas or somewhere else. I don't think it is that easy. They could give you the Beverly Hills Hotel, I suppose, which is a commonly known address of Mr. Hughes. The Wall Street Journal carries it, The New York

Times carries it. I assume everybody else knows about it, and I assume you have not been able to find him at the Beverly Hills Hotel.

Mr. Sonnett: We certainly have not. We have tried.

In the event that your Honor should feel that they should be given a little more time, I have prepared several supplemental interrogatories, and if your Honor [14] were disposed to allow another ten days or two weeks, whatever you think is reasonable, I would not seriously object, provided as a condition you require them to answer the supplemental interrogatories.

The Court: Let me hear them.

Mr. Sonnett: May I hand them up, your Honor? They are very simple.

The Court: Does Miss Lea have a copy?

Miss Lea: No, I do not.

Mr. Sonnett: I am about to give them to her.

May I say, your Honor, on the matter of the supplemental interrogatories that there are basically three, and what they are concerned with is as follows:

Interrogatory 1 of the supplemental interrogatories is designed to carry back the informational period to January 1, 1962. The reason for that is that because of the delays of the Hughes Tool Company since March, the answers to the interrogatories which we will get, particularly if they get any further extension of time, may well be meaningless because the people who will have the information will suddenly be unavailable, and it seems to me that carrying it back to January 1st does not impose any great burden.

[15] The second interrogatory is related solely to the question of communications with Mr. Hughes since January

1, 1962, on the subject of his whereabouts or on the subject of these interrogatories, again a date prior to the first time Hughes Tool Company was ordered by anybody to answer these interrogatories or that the subject of the interrogatories came up.

Mr. Hughes, of course, knew in January 1962 that we were looking for him. There is no question about that. But he didn't know then that we were going to follow the interrogatory course when our private efforts proved unsuccessful.

The third interrogatory merely seeks to discover whether anybody who did know as of that time has had a change in status so that they are no longer employees within the scope of the order, that they have suddenly acquired some title of consultant or something else.

I might say on that point, your Honor, that we will probably be back to you some day with real problems about this business of consultants. At least Mr. Maheu, who is a private detective working for the Hughes Tool Company, really isn't that at all; he is some kind of a consultant. I simply mention that because I see problems of that kind coming up, and I think that if there has been [16] a change of status of any of these people since the 1st of January, your Honor should require them to tell us about that as a condition to giving them another ten days or two weeks, should your Honor think that be reasonable.

The Court: The time, I assume, has expired for the answers to the interrogatories.

Mr. Sonnett: I am sorry, Judge.

The Court: I assume that the time in those twenty days from July 12th—

Mr. Sonnett: The 15th, sir. It would be up tomorrow, the 27th.

Miss Lea: Excuse me, your Honor, I think it is fifteen days from July 23rd or 24th, which is the date of your Honor's decision denying our application for clarification and modification of the July 12th order. I don't see how the time could be held to be running during the time the application was held pending before the Court.

The Court: I think I should have decided that by saying "Motion for reargument denied." Then your time runs from the original date, but I didn't.

Well, let us assume it is fifteen days from the 23rd—

Miss Lea: May I be heard in reply to some of the [17] things Mr. Sonnett has said?

The Court: We only have a question of fixing the date. Do you want to keep the record straight?

Miss Lea: Yes.

The Court: Go ahead.

Miss Lea: I don't want them to go unanswered. There is no right in TWA's demanding as an exercise of the Court's discretion that the Tool Company answer further interrogatories which Mr. Sonnett has just handed us in the courtroom.

Secondly, I don't know why or what kind of justification Mr. Sonnett can possibly believe he has for saying that Mr. Davis has been diddling. I don't know what the word means, but it is not something to which I would agree.

The Court: It is a derivation of "doodle".

Mr. Sonnett: Mr. Davis is an expert.

Miss Lea: I think it most unfortunate that counsel should make statements on the record indicating that he thinks other counsel is diddling or behaving in some other fashion in derogation of their rights or of their obligation to the Court, without having any basis for that. I think

it is a most unfortunate and most serious statement which he has made in that respect.

[18] As to the special master's decision and the burden which may be imposed upon the Tool Company, the statements we have in our moving affidavit amply cover that. I think the reasons stated for the enlargement of the time are valid, and we should get an extension until at least September 25th.

Mr. Sonnett: May I say, your Honor, that in my opinion Mr. Davis has been trying to diddle us here.

The Court: Do you want to define the word "diddle," so Miss Lea will understand what you are talking about?

Mr. Sonnett: I will be happy to. I think diddling, at which Mr. Davis is an expert, is a purported compliance with the Court's order, but with tongue-in-cheek, with every intention to avoid them and escape their impact, and that is exactly what this record shows.

Now I am not alone in this conviction, your Honor, because your Honor will note from the record that the special master, fully familiar with this, denied the application as a matter of his own discretion, with the expectation that the Hughes Tool Company would have to answer these interrogatories by tomorrow, the 27th. Now he has watched Mr. Davis work intimately for some months, so that, I am sorry to say, my opinion of Mr. Davis's [19] tactics, I think, is shared by the special master and that accounted for his decision.

Miss Lea: Now that I know what diddling means, I certainly don't agree with it, any more than I did before, nor with any of the remarks of Mr. Sonnett. I think the basis of the special master's decision appears in the transcript, which we have annexed to the affidavit filed with

your Honor and I think our justification for believing that he was in error on that also appears there.

I have nothing more to say about it.

The Court: In the first place, Mr. Sonnett, I will not entertain this application for supplemental interrogatories served this moment upon the defendant. You may wish to submit them at some future date, but I won't entertain them at this time.

I will fix the date as August 27th for compliance.

Miss Lea: The 27th, your Honor?

The Court: August 27th. That is a Monday.

(Hearing concluded.)

IN THE UNITED STATES DISTRICT COURT

SOUTHERN DISTRICT OF NEW YORK

61 Civ. 2324

TRANS WORLD AIRLINES, INC., Plaintiff,

—against—

HOWARD R. HUGHES, HUGHES TOOL COMPANY, and RAYMOND M. HOLLIDAY, Defendants,

—and—

THE EQUITABLE LIFE ASSURANCE SOCIETY OF THE UNITED STATES, METROPOLITAN LIFE INSURANCE COMPANY, IRVING TRUST COMPANY, ERNEST R. BREECH, DILLON, READ & CO., INC., BEN-FLEMING SESSEL, JAMES F. OATES, JR., HARRY C. HAGERTY and CHARLES C. TILLINGHAST, JR., Additional Defendants on Counterclaims.

AFFIDAVIT—Dated August 28, 1962

State of New York,
County of New York, ss.:

Robert G. Zeller, being duly sworn, deposes and says:

1. I am a member of the firm Cahill, Gordon, Reindel & Ohl, attorneys for the plaintiff, Trans World Airlines, Inc., ("TWA"), and am familiar with all prior proceedings had herein. I make this affidavit in support of plaintiff's motion for relief pursuant to Rule 37(d) of the Federal Rules of Civil Procedure.

2. By orders of this Court dated July 12, 1962, and July 26, 1962, the defendant, Hughes Tool Company [fol. 1495] ("Toolco"), was directed to answer on or before August 27, 1962, certain interrogatories propounded by plaintiff on May 2, 1962, pursuant to Rule 33 of the Federal Rules of Civil Procedure.

3. Subsequent to the issuance of such orders but prior to August 27, 1962, certain correspondence was had between and among counsel for TWA, counsel for Toolco and the Court, copies of which correspondence are annexed hereto as Exhibit A (letter dated August 1, 1962 from Chester C. Davis, Esq. to John F. Sonnett, Esq.); Exhibit B (letter dated August 1, 1962 from Mr. Davis to Hon. Charles M. Metzner, U.S.D.J.); Exhibit C (letter dated August 2, 1962 from Robert G. Zeller, Esq. to Judge Metzner); Exhibit D (letter dated August 20, 1962 from Mr. Zeller to Judge Metzner); Exhibit E (letter dated August 21, 1962 from Judge Metzner to Mr. Davis); Exhibit F (letter dated August 21, 1962 from Mrs. Lola Lea to Mr. Zeller); Exhibit G (letter dated August 22, 1962 from Mr. Zeller to Mrs. Lea); Exhibit H (letter dated August 24, 1962 from Mrs. Lea to Mr. Zeller); and Exhibit I (letter dated August 24, 1962 from Mr. Zeller to Mrs. Lea).

4. When no answers to the interrogatories had been served by the close of business on August 27, 1962, I asked Mr. Chester C. Davis, counsel for Toolco, when I could expect to be served with answers to the interrogatories. Mr. Davis advised me that Toolco did not intend to answer such interrogatories.

5. On August 28, 1962, I received a letter from counsel for Toolco, a copy of which is annexed hereto as Exhibit [fol. 1496] J (letter dated August 27, 1962 from Mrs. Lea to Mr. Zeller); and on that same day sent to counsel for Toolco an answering letter, a copy of which is annexed hereto as Exhibit K (letter dated August 28, 1962 from Mr. Zeller to Mrs. Lea).

Robert G. Zeller

Subscribed and sworn to before me this 28th day of August, 1962.

Thomas J. Cerna, Notary Public, State of New York, No. 41-0607760, Qualified in Queens County. Certificate filed in New York County, Term Expires March 30, 1963.

Dear Judge Metzner:

In connection with the interrogatories served by TWA on the Hughes Tool Company for the purpose of locating Howard R. Hughes in order to serve him with a witness subpoena to appear on deposition, there is enclosed a copy of a letter to Mr. Sonnett advising him that I am authorized to accept service of such process on behalf of Mr. Hughes.

Counsel for TWA has been questioning my authority to accept service on behalf of Mr. Hughes and has been insisting that I obtain written confirmation thereof. I am, therefore, enclosing a photocopy of such written authorization which I heretofore requested, and which I recently received.

It is respectfully requested that the enclosed photocopy of the authority which I received from Mr. Hughes be kept confidential and not be made a part of the record.

Very truly yours,

EXHIBIT C TO AFFIDAVIT

August 2, 1962

Re: *TWA* v. *Hughes Tool Company, et al.*

Dear Judge Metzner:

In Mr. Sonnett's absence, I received this morning from counsel for Toolco a copy of a letter dated August 1, 1962 written to you, together with a letter of the same date to Mr. Sonnett advising him that Toolco's counsel was now authorized, presumably by Mr. Hughes, to accept service of process on behalf of Mr. Hughes for his appearance as a witness on deposition in this case. Although Toolco's counsel, Mr. Davis, apparently sent to you a copy of written confirmation of his authorization, no copy of the written confirmation was sent to us.

I called Mr. Davis' office and in his absence spoke to Mr. Maxwell Cox to request a copy of that confirmation. I told Mr. Cox that I had noted Mr. Davis' desire that the confirmation be kept confidential and offered to treat our copy of such confirmation as a confidential document under the terms of the Special Master's order of March 21, 1962 relating to confidential documents. Mr. Cox advised me that he was unable to permit me either to look at the authorization or to furnish me a copy of it.

As Mr. Sonnett pointed out in the argument before the Special Master on July 31, 1962, the crux of this matter is that any authorization by Mr. Hughes to counsel must be irrevocable or it is apt to prove meaningless.

[fol. 1500] It was for this reason that we prepared the proposed stipulation and form of order which was submitted to Toolco's counsel on July 31, 1962, but which Toolco's counsel refused to consider. I understand that that proposed stipulation and form of order have been transmitted to you along with the transcript of the argument on

that day. Under the circumstances, our position must remain as stated at that time.

Very truly yours,
Robert G. Zeller

August 20, 1962

Re: *TWA* v. *Hughes*

Dear Judge Metzner:

Last week we learned from what we consider a reliable source that Howard R. Hughes was at the Beverly Hills Hotel in Los Angeles, California. On Friday, August 17th, attempts to serve Mr. Hughes with a subpoena duces tecum under Rule 45 F.R.C.P. were made both by private process servers and by the United States Marshal. These attempts were unsuccessful. We were advised by the Marshal that he was referred to the Hughes Tool Company office at 7000 Romaine Street, Los Angeles, California and was told by that office that service of such process could be made only on Mr. Davis of New York.

Affidavit of Zeller, August 28, 1962

We expect to try again to serve Mr. Hughes when we receive on Monday, August 27th, the answers of Hughes Tool Company to our interrogatory as to Mr. Hughes' whereabouts.

Very truly yours,
Robert G. Zeller

Re: *TWA* v. *Hughes*

Dear Miss Lea:

This will acknowledge receipt of your letter of August 21st. For the reasons stated in my letter of August 2nd to Judge Metzner, and stated earlier at the hearing before the Special Master on July 31st, we do not believe that our client's interest would be adequately protected by relying upon service of the Hughes subpoena on Mr. Davis in the absence of irrevocable authority from Mr. Hughes along the lines of that proposed in our draft stipulation. So far as we are aware, that irrevocable authority has not been granted.

We therefore await with great interest the service on August 27th of Toolco's answers to our Interrogatory as to Mr. Hughes' whereabouts.

Very truly yours,

BY HAND

August 24, 1962

Re: *TWA* vs. *Hughes Tool Company, et al.*

Robert G. Zeller, Esq.
Cahill, Gordon, Reindel & Ohl
80 Pine Street
New York 5, N. Y.

Dear Mr. Zeller:

Referring to the letter of Judge Metzner dated August 21, 1962, there is enclosed a copy of the written authority from Mr. Hughes to Mr. Davis which is being filed with the Court today. I understand from your letter of August 2, 1962 to Judge Metzner that you agree to treat the authorization as a confidential document under the terms of the Special Master's order of March 21, 1962 relating to confidential documents.

Your letter dated August 22, 1962 points out that you do not believe that your client's interest would be adequately protected by a service on Mr. Davis because you do not know whether the authority of Mr. Davis is irrevocable.

Affidavit of Zeller, August 28, 1962

May I suggest that the problem would be solved if you were to serve Mr. Davis promptly and before any question as to revocability could arise.

I assure you again that Mr. Davis will accept service of whatever subpoena you have obtained whenever you care [fol. 1506] to submit same to this office. If you prefer to have Mr. Davis personally available at that time, please so advise.

Very truly yours,

/s/ Lola S. Lea

August 24, 1962

Re: *TWA* v. *Hughes Tool Company, et al*

Dear Mrs. Lea:

This will acknowledge receipt of your letter of August 24, 1962 and the copy of what you say is the written authority from Mr. Hughes to Mr. Davis. We offered to treat this document as a confidential one under the terms of the Special Master's Order of March 21, 1962 relating to confidential documents, and will do so. Now that I have seen the document, however, I must say I am unable to see why anyone could possibly be interested in having treated it as a confidential document.

I am glad to have your assurance that Mr. Davis will accept service of the subpoena upon Mr. Hughes which we have obtained, and to have your suggestion that we serve Mr. Davis promptly in order to avoid any question of revocation. In view of the contents of the document trans-

mitted with your letter, however, I can see that many questions other than revocation might be raised.

We therefore continue to feel as we have in the past that our client's interest would be better protected by service of process upon Mr. Hughes personally than upon Mr. Davis as Mr. Hughes' agent to receive service. We will continue to await Toolco's answers on August 27th to our Interrogatory as to Mr. Hughes' whereabouts.

Very truly yours,

Robert G. Zeller

Re: *TWA vs. Hughes Tool Company, et al.*

Robert G. Zeller, Esq.
Cahill, Gordon, Reindel & Ohl
80 Pine Street
New York 5, N. Y.

Dear Mr. Zeller:

Referring to your letter of August 24, 1962 and your telephone conversation of this afternoon with Mr. Davis, this is to confirm that Toolco understands that it has complied with the order of the Special Master, affirmed, except as modified, by the order of the Court dated July 12, 1962 as amended by order dated July 26, 1962. As you will recall,

said order required Toolco to answer certain interrogatories in the event that Mr. Hughes failed to furnish written authorization to accept service of a deposition subpoena.

The authority of Mr. Davis to accept service on behalf of Mr. Hughes having been confirmed in writing and filed with the Court and the Special Master, we do not understand what proper interest of your client remains in seeking answers to interrogatories as to the whereabouts of Mr. Hughes.

[fol. 1509] As previously indicated, Mr. Davis is available to you at your convenience.

Very truly yours,

/s/ Lola S. Lea

August 28, 1962

Re: *TWA* v. *Hughes Tool Company, et al.*

Dear Mrs. Lea:

This is to acknowledge receipt of your letter of August 27th.

The order to which you refer was *not* a conditional order. The order directed Toolco to answer TWA's interrogatory as to Mr. Hughes' whereabouts on or before August 27, 1962.

Affidavit of Zeller, August 28, 1962

As counsel for TWA, we were willing to agree, subject to Judge Metzner's approval, that it would not be necessary for Toolco to answer the interrogatory if Mr. Davis received written authorization from Mr. Hughes which, in our opinion, was sufficient to make the personal service of a subpoena upon Mr. Davis the legal equivalent of personal service upon Mr. Hughes. No such adequate authorization has ever been given to Mr. Davis, and we have never consented to any departure from the express and precise terms of the order entered on July 26, 1962, compliance with which was again directed in Judge Metzner's letter of August 21, 1962. Moreover, at no time has it been possible for you to be under any reasonable misapprehension that we considered the photocopy of a piece of paper finally transmitted with your letter of August 24, 1962 to be an adequate authorization.

[fol. 1511] It is plain that Toolco has deliberately defied the Court's order. We will serve upon you later today a motion for the granting of appropriate relief.

IN THE UNITED STATES DISTRICT COURT

SOUTHERN DISTRICT OF NEW YORK

61 Civ. 2324

TRANS WORLD AIRLINES, INC., Plaintiff,

—against—

HOWARD R. HUGHES, HUGHES TOOL COMPANY and RAYMOND M. HOLLIDAY, Defendants,

—and—

THE EQUITABLE LIFE ASSURANCE SOCIETY OF THE UNITED STATES, et al., Additional Defendants on Counterclaims.

MEMORANDUM REVIEWING THE HISTORY OF TWA'S APPLICATION FOR PERMISSION TO PROPOUND AN INTERROGATORY TO HUGHES TOOL COMPANY CONCERNING THE LOCATION OF HOWARD R. HUGHES—Filed August 30, 1962

This memorandum contains a chronological review of the proceedings in the above-entitled action relating to the application of Trans World Airlines, Inc. (herein TWA) to propound an interrogatory to the Hughes Tool Company (herein Toolco) concerning the location of Howard R. Hughes (herein Hughes) and is filed in support of TWA's [fol. 1516] motion for relief pursuant to Rule 37(d) of the Federal Rules of Civil Procedure.

The following is a list of dates along with a description of the activity on that date:

Date	*Description of Activity*
March 22, 1962	Direction of the Special Master permitting the submission of briefs on April 2, 1962 concerning the authority of the

Memorandum

	Court to obtain from Toolco or anyone else information as to the location of Hughes in order to permit service of process upon him. (Tr. 3626-3627)
April 2, 1962	Memorandum filed on behalf of TWA in response to the request of the Special Master noted above.
April 3, 1962	Date of letter of Toolco counsel to Special Master suggesting that no proper application had been made for the serving of an interrogatory by TWA.
April 4, 1962	Date of letter of TWA counsel to Special Master citing his request as noted above that such memoranda be submitted, and requesting that, if the prior proceedings were not sufficient, the letter should be considered as an application and the giving of due notice.
April 17, 1962	Date of hearing and decision of Special Master granting TWA the right to propound an interrogatory to Toolco concerning the location of Hughes. (Tr. 4401)
April 27, 1962	Last day on which Toolco had right to appeal from the Special Master's decision granting TWA the right to propound the interrogatory.

[fol. 1517]

April 27, 1962	Date of letter of Toolco counsel to the Special Master stating that Toolco was "not in a position at this time to seek review" of the Special Master's decision to serve the limited interrogatory and stating that it was Toolco's understanding that it would have a right to object to the form and substance of any interrogatory after it had been served.

Memorandum

April 30, 1962	Date of letter of the Special Master to Toolco counsel in answer to Toolco's letter of April 27, 1962, stating that TWA was authorized to serve an interrogatory forthwith and allowing Toolco two days after the service of such interrogatory within which to file any objections.
May 2, 1962	TWA interrogatory served on Toolco, requiring an answer by May 17, 1962.
May 11, 1962	Date of notice of Toolco's motion and objections before the Special Master to the TWA interrogatory, objecting both to the form of the interrogatory and also to TWA being allowed to serve such interrogatory at all.
May 17, 1962	Date of memorandum of TWA in opposition to Toolco's objections.
May 28, 1962	Date of memorandum of Toolco in support of its objections.
June 4, 1962	Hearing and second order of the Special Master, directing that the interrogatory should be answered on June 20, 1962. (Tr. 4472-4473)
June 7, 1962	Notice of Motion of Toolco for review and reversal of Special Master's order overruling Toolco's objections to the interrogatory. This "Notice" did not specify a day certain for the return date, and Toolco appears to have made no attempt to arrange for such date.
[fol. 1518]	
June 11, 1962	Date of letter of Toolco counsel to the Special Master attempting reargument of the Special Master's ruling granting TWA the right to propound the interrogatory.

Memorandum

June 14, 1962	Date of letter of Special Master answering Toolco counsel's letter of June 11, 1962, rejecting the attempt to reargue the Special Master's order, and distinguishing the authorities cited in the Toolco letter.
June 22, 1962	Date of letter from counsel for TWA to Judge Metzner requesting that Toolco's motion for review be denied without further hearing or alternatively requesting an early hearing.
July 10, 1962	Date of memorandum of Toolco in support of its motion for review and reversal of the Special Master's order overruling its objections to the interrogatory.
July 12, 1962	Date of TWA memorandum in opposition to the Toolco motion regarding the interrogatory.
	Date of hearing before Judge Metzner and pre-trial order granting TWA the right to propound an interrogatory to Toolco concerning the location of Hughes.
July 13, 1962	Date of letter from counsel for TWA to counsel for Toolco specifying July 27, 1962 as date by which responses to interrogatory were to be made, computed according to pre-trial order of July 12, 1962.
July 18, 1962	Date of notice of motion and memorandum by Toolco for an order by Judge Metzner clarifying or modifying the pre-trial order dated July 12, 1962 regarding the interrogatory. This "notice" did not specify a day certain for the return date, and Toolco appears to have made no attempt to arrange for such a date.

Memorandum

[fol. 1519]

July 20, 1962 — Date of memorandum of TWA regarding the attempt of Toolco to avoid answering the interrogatory on the location of Hughes.

July 23, 1962 — The following statement was made on the record by Toolco's counsel regarding the efforts which he had made to comply with the outstanding orders of the Court concerning answering the TWA interrogatory:

> "In other words, I have taken no action. I am not in a position to take any action in transmitting these interrogatories to the Tool Company for an appropriate time until I am in a position to say this is what you are supposed to answer." (Tr. 5828)

Oral application by Toolco counsel before the Special Master for an order extending its time to answer the interrogatory beyond July 27, 1962. (Tr. 5828 *et seq.*)

Date of decision of Judge Metzner denying the Toolco motion to modify or clarify the interrogatory.

July 24, 1962 — Argument on the part of Toolco counsel before the Special Master in support of its oral application for an extension of time to answer the interrogatory and decision of Special Master denying the application on the basis that the Special Master has no power to modify the Court's orders and, if he did have power, he would refuse the extension, in the exercise of his discretion. (Tr. 6128 *et seq.*)

Memorandum

July 26, 1962	Application by Toolco for an order enlarging the time within which it could answer the interrogatories to September 25, 1962.
	Order of Court extending Toolco's time to answer interogatories to August 27, 1962.
[fol. 1520]	
July 27, 1962	Statement by counsel for Toolco that he had received authorization to accept service of subpoena on behalf of Howard R. Hughes (Tr. 6457 *et seq.*)
July 31, 1962	TWA offered Toolco proposed stipulation providing for personal service upon Chester C. Davis of subpoena directed to Howard R. Hughes in lieu of receiving answers to interrogatories. This stipulation was rejected by Toolco, Toolco's counsel stating that he wanted instead to leave the matter as it had been left by Judge Metzner's order. (Tr. 6714; Exhibit L annexed hereto).
	TWA stated its intention to proceed therefore in accordance with the Court's schedule (Tr. 6718-6719; Exhibit M annexed hereto), and the Special Master determined that there would be no modification by him of the Court's order (Tr. 6723; Exhibit N annexed hereto).
August 1, 1962	Letter from Mr. Davis to Mr. Sonnett stating that Mr. Davis was authorized to accept service of a subpoena on behalf of Howard R. Hughes.
	Letter from counsel for Toolco to Judge Metzner enclosing a photocopy of purported written authorization to accept service on behalf of Howard R. Hughes.

Memorandum

August 2, 1962	Letter from counsel for TWA to Judge Metzner stating that TWA had not received a copy of the purported authorization.
August 20, 1962	Letter from counsel for TWA to Judge Metzner advising the Court that TWA had been unsuccessful in its attempts to serve a subpoena on Howard R. Hughes on August 17, 1962 and advising the Court that such attempts would be renewed after receipt of answers to the interrogatories.
[fol. 1521]	
August 21, 1962	Court advised Toolco by letter that it was returning "what you say is a written authorization from Mr. Hughes" and that it expected compliance with its order of July 26, 1962.
	Letter from counsel for Toolco again stating that Mr. Davis was authorized to accept service of a subpoena on behalf of Mr. Hughes.
August 22, 1962	Letter from counsel for TWA to counsel for Toolco stating belief that TWA's interest would not adequately be protected by service upon Mr. Davis and advising that TWA awaited service of answers to its interrogatories.
August 24, 1962	Letter from counsel for Toolco to counsel for TWA containing photocopy of purported authorization and requesting it be kept confidential.
	Letter from counsel for TWA to counsel for Toolco stating that TWA intended to await Toolco's answers to interrogatories after considering purported authorization.

Memorandum

August 27, 1962 — Counsel for Toolco, Chester C. Davis, told counsel for TWA that he had no intention of answering the interrogatories.

Date of letter from Mr. Davis' associate counsel, Mrs. Lola Lea, confirming Toolco's intention not to answer interrogatories.

Respectfully submitted,

Cahill, Gordon, Reindel & Ohl, Attorneys for Plaintiff, Trans World Airlines, Inc., Office and P. O. Address: 80 Pine Street, New York 5, New York.

Of Counsel: John F. Sonnett, Dudley B. Tenney, Robert G. Zeller.

August 30, 1962.

Transcript of Pretrial Hearing, September 6, 1962

[Doc. 355]

[CAPTION] 61 Civ. 2324

Before: Hon. CHARLES M. METZNER, *District Judge.*
New York, September 6, 1962, 11:30 a.m.

[APPEARANCES]

. . . . . .

[3] The Court: You may proceed, Mr. Sonnett.

Mr. Sonnett: May it please the Court, we have served with our motion a memorandum which sets forth the chronology of our efforts to obtain some disclosure of information as to the whereabouts of Howard Hughes, and I don't propose to burden the Court with a recital of that chronology except to point out that we started in March of this year and we are still at it.

I will have a reply affidavit in a moment to serve which I think contains some exceedingly significant information. Before coming to that, may I say to the Court that I believe on the basis of the record to date, and in light of your Honor's letter to counsel, in which you stated when returned a photocopy of the alleged authority that you would expect compliance with the Court's order so that the interrogatories will be answered on the 27th of August, but I think your Honor made crystal clear, if there was any doubt about it, and there wasn't, that Hughes Tool Company was to supply this information.

Instead of doing that, the Hughes Tool Company elected to disregard the Court's two prior [4] orders and the Court's letter. Now it seems to me that the attitude

demonstrated by the Hughes Tool Company is in such willful and deliberate disregard of specific unambiguous directions by the Court that the contempt shown to the orders of the Court is more grievous than that shown in the Friedman case in which Judge Sugarman granted a default judgment in excess of 12 million dollars.

In that situation—I don't know whether your Honor has had a chance to see the text of the memorandum opinion, may I hand it up? Unfortunately I only have one copy.

The Court: Has it been published?

Mr. Sonnett: No, sir.

The Court: I will get a copy from Judge Sugarman. What is the title?

Mr. Sonnett: Friedman v. United States Trunk Company, 62 Civil 73, and the memorandum is dated August 16, 1962.

In that situation, where a defendant ignored a notice to take depositions, ignored a motion for a default and simply did not appear, Judge Sugarman, having found that there was a deliberate refusal to [5] pay any attention to the Court's orders, had no difficulty in awarding a default judgment in excess of 12 million dollars.

The record in this situation, I submit, is much more serious because here there is a crystal clear proof of specific notice contained in a direction by the Special Master to the effect that he would not interfere in the slightest with this Court's order by reason of any alleged authority that Mr. Davis had to accept process.

The direction of this Court in its two orders and in the letter most recently sent it, I think, open to no misunderstanding.

I think that the conduct, therefore, of Hughes Tool Company can only be characterized for what it was, a

deliberate, willful intention to refuse to comply with the directions of the Court.

I might rest at that point, your Honor, but something has come to my attention in point of fact only definitely yesterday and last night. It has led to the necessity to file reply affidavits which contain very grievous charges against the Hughes Tool Company.

I would like to hand the affidavit up and to serve it now. I regret that I could not do it [6] sooner. In point of fact, my affidavit was just finalized and signed this morning. If your Honor would wish to read the affidavit, it would be a lot easier than my recital of it.

The first five paragraphs is set forth substantially what I have already said. The new material is contained in paragraph 6.

After very careful and thorough consideration of the gravity of the charges made in this affidavit, I felt impelled to make the charges there contained—

The Court: They are serious charges.

Mr. Sonnett: The serious charge is that the Hughes Tool Company deliberately submitted to this Court, in an attempt to defraud the Court and mislead it, a forged document.

Your Honor will note that annexed to my affidavit is an affidavit by a leading examiner of questioned documents, Mr. Charles Andrew Appel, Jr.

Mr. Appel's qualifications cannot be gainsaid. For many years he was a special agent of the FBI in charge of document work and since his retirement from the FBI he has been engaged in a great number of cases of major significance.

I had Mr. Appel come up because I was con [7] cerned when I saw this alleged authorization, and I had him

come to New York and he did yesterday morning. We spent the entire day on this matter.

Your Honor will find he set forth in detail his reasons in the exhibits annexed for the conclusion that Howard R. Hughes did not make the signature contained on the so-called authorization represented to this Court to be an authorization to accept service of process.

I would like to make it clear that I have no information, nor do I personally believe, that Mr. Davis had any knowledge of this. However, I represent to your Honor that on the record before you it is beyond doubt that somebody in the Hughes Tool Company wilfully, knowingly, purposefully, in order to mislead counsel for TWA and this Court, submitted a forged document.

I think on that ground alone your Honor should strike the answer and give us a default judgment.

If your Honor has the slightest doubt about it, I am prepared to call Mr. Appel to the stand right now. He is here for cross-examination. I think your Honor should direct, if you have the slightest [8] doubt—and this record admits of no doubt—that everyone connected with the Hughes Tool Company who had any connection with the forged authorization be called before this Court to testify under oath forthwith.

The Court: Mr. Sonnett, obviously your opponent has just been served with this document three minutes ago and should be afforded an opportunity to answer the serious charges contained in your affidavit. I will give the attorney for the Hughes Tool Company one week to submit affidavits in refutation of these charges.

Aside from this charge, Mrs. Lea, the charge that the signature of Howard Hughes to the purported author-

ization for Mr. Davis to accept service in this proceeding is forged, have you anything else to say regarding the motion of Mr. Sonnett to strike your answer?

Mrs. Lea: In the first instance I would like to point out, as your Honor is aware, that I have just been served with this piece of paper. I think the charges are undoubtedly ridiculous and completely without foundation. I appreciate your Honor's indulgence in giving us time to formally make any [9] statement with respect to those charges. I wish, however, to point out that the written authorization was merely confirmation of authority which had been received, and I am not quite sure that this affects the problem whatsoever.

As a matter of fact, at this posture of the proceedings I don't think we any longer have a problem. The problem has been mooted for the reason that the United States Marshal for the Southern District of California has indicated this morning that he served Mr. Hughes by delivering a copy of the subpoena to Mr. Davis who was authorized to accept that subpoena on Mr. Hughes' behalf. The return has been filed and is in the office of the clerk.

As far as I can determine, at this point there is no question of service open for decision.

The Court: Was the service made on the exhibition by Mr. Davis of the authorization that you have filed in this court?

Mrs. Lea: I believe the service was made upon a delivery to the United States Marshal of an affidavit by Mr. Davis, indicating he was in fact authorized to accept service, and it was on the basis of Mr. Davis' affidavit that—

Transcript of Pretrial Hearing, September 6, 1962

[10] The Court: It seems we are having a lot of last minute developments today, first a charge of forgery and then a statement that Mr. Hughes was actually served.

Do you know of any service by the United States Marshal for the Southern District of California, Mr. Sonnett?

Mr. Sonnett: In the light of the unsatisfactory state of the record, we did make an effort several weeks ago to serve Mr. Hughes in Beverly Hills. We made that effort with private investigators and with the United States Marshal. The effort was unsuccessful.

Thereafter, I am told—I was not here—that Mr. Davis represented that he was going to be here in court today to deal with this matter. Apparently what he saw fit to do was to go out and try to blunt the point of this motion and to frustrate it by going to the Marshal and saying, "Look here, I am authorized to take it for Mr. Hughes."

I regard what Mr. Davis has done, and I think the Court should, as a nullity.

Moreover, I think that in the light of the very well founded charge that a fraud was attempted [11] to be worked on this Court that all matters should be held in abeyance until the Court determines whether to call witnesses in here under cross-examination to find out how widespread the scheme was. All I can say is that one of the leading document examiners in the United States tells me and tells the Court under oath, and he is here for cross-examination and will be at any time if anybody wants him, that the signature on that authorization is not the signature of Howard R. Hughes.

I don't know what kind of games Mr. Hughes or the Hughes Tool Company thinks they can play with the Court of the United States. I for one do not think they can

play that kind of game. I don't know if your Honor wishes me to have Mr. Appel available for cross-examination today or a week from now, but he will be available at any time.

The Court: I will deal with the allegation of forgery separate and apart from the problem of the authorization, its legal effect and whether service was actually made on Mr. Hughes today.

So, Mr. Appel, if necessary, will be called at some time in the future after I have received the answering affidavits of the defendant Hughes Tool [12] Company to the charges contained in your reply affidavit which they were just notified of this morning. At that time we can take care of that problem.

When is the return date of the subpoena that was served this morning, Mr. Sonnett?

Mr. Sonnett: If it was served, my understanding of what Mrs. Lea said is that the service was on Mr. Davis as the alleged agent of Mr. Hughes. If that constitutes service, which I doubt in these circumstances, the return date of the subpoena would be September 24th.

The Court: If Mr. Hughes appears on September 24th, then hasn't all of this been moot?

Mr. Sonnett: If there was, as I believe, fraud on the Court, the question of the punishment the Court wishes to impose for what I regard as contempt, if Mr. Appel is right somebody ought to be punished for attempting to misrepresent this document to this Court.

The Court: I have never relied on that document, and that is why I returned it twice, the two times that it was submitted to me, first on a confidential off-the-record basis and then in [13] conjunction with an affidavit to seal it.

My letter clearly indicated that I wanted nothing to do with that document. You could file it if you wanted to, but I was not going by any action on my part to indicate that I accepted that document or rejected it. It was a question which would have to be presented in the normal fashion.

My letter indicated that any further negotiations between Mr. Davis and you be had directly with you, and the Court was not going to be part of it.

Mr. Sonnett: Yes.

The Court: That was the reason for it. I did not know what that document meant, whether it had any meaning at all. It was on a blank piece of paper without a date, without an address, without any mention of this case, so until you two were willing to present it to the Court in a more formal fashion, I was refusing to have anything to do with it.

The first step was taken, I think, last Friday when the attorney for the defendant did serve me with a copy and did file it in this court.

Mr. Sonnett: When we then had a chance to [14] analyze that document for the first time, we found all of the defects you pointed out but we found one more, it was not only a nullity legally but it was a fraud.

The Court: I am not saying it was a nullity legally. I purposely refused to touch the piece of paper because I did not want to have any action taken by me as any indication that I was passing upon the legal effect of the document.

Mr. Sonnett: Exactly. You then said to counsel for Hughes Tool Company that they would be expected to answer.

The Court: They did not work out anything with you, that is why I added the last sentence that they carry out further conversations with you.

Mr. Sonnett: Nothing was done except to refuse to comply with the orders of the Court.

The Court: We have two problems.

Is Mr. Hughes going to appear on September 24th? By doing that, I suppose he would validate whatever affidavit Mr. Davis gave to the United States Marshal today to justify acceptance of service of the subpoena on his part.

The other problem is the document that has [15] been filed in this court which you claim is a forgery.

So we will have to let both of them stand in abeyance. The first one until September 24th and the second one to the filing by the attorney for the Hughes Tool Company on a week from today an answer to the charges contained in your reply affidavit that you served on defense counsel ten or fifteen minutes ago.

If you want additional time after receipt of that answer to file a reply, you may have it.

Mr. Sonnett: I would like to have three days after the receipt of the affidavit within which to file any further affidavits or to seek leave of the Court to examine under oath those who participated in what I regard as a deliberate attempt to commit a fraud on this Court.

The Court: All right.

Mrs. Lea: May I clarify several things on the record.

First, the reference by Mr. Sonnett to Mr. Davis' intention or representation to be here today. He was intending to, but it was only late yesterday afternoon that we were informed by counsel for the [16] Hughes Tool Company in California that the Marshal then had in his hands a

subpoena to serve on Mr. Davis for accepting service for Mr. Hughes. He did not learn until close to six o'clock that was in fact the case, and he made himself at that time available, assuming in so doing that he [be] would doing exactly that which TWA had been seeking or at least which it claimed to have been seeking, and which was to see to it that service was in fact effected.

With respect to the date of September 24th, I would like to point out to your Honor that the notice of taking deposition does mention the 24th day of September, and then goes on to say, as indeed I believe it must under the order of your Honor as well as the order of the Special Master, or such other time or place as may be fixed by order of the Court or by agreement.

Mr. Hughes is not scheduled to be reached for deposition until some time after the Tool Company has had an opportunity to complete the discovery in which it is now engaged.

I doubt now merely by filing a new notice and making a whole lot of unfounded charges that TWA could conceivably be permitted to interrupt that [17] schedule or interrupt the Hughes Tool Company's discovery in that fashion.

The Court: How is the deposition of Mr. Tillinghast proceeding?

Mrs. Lea: The deposition of Mr. Tillinghast has been completed. The Hughes Tool Company is now deposing the next TWA witness who is Mr. Leslie. Because of the problem of personal privilege of Mr. Leslie, we are going to be examining Mr. Rummel next week.

We are proceeding with the depositions fixed in your Honor's schedule as rapidly as we can. We are in the midst of our discovery.

The Court: How long is that going to last? I had the impression once you got through with Mr. Tillinghast that you would move quite rapidly.

Mrs. Lea: We will certainly do our best to be as expeditious as we can. How long it will take, I cannot tell you, I just do not know.

The Court: I think, Mr. Sonnett, you may be advised to make an application to the Special Master, if you think it is necessary and proper, that the completion of the examination by the Hughes Tool Company by TWA may be suspended in order to proceed [18] with Mr. Hughes on September 24th.

Mr. Sonnett: Yes, your Honor.

The Court: Frankly, I am very much interested to see if Mr. Hughes is going to show up in view of all the charges thrown back and forth here.

Apply to the Special Master. If the Hughes Tool Company is dissatisfied with the ruling of the Special Master, they may appeal this ruling to me.

Mr. Sonnett: Yes, sir, we shall do so promptly.

The Court: You may have until September 17th to file a reply to Mrs. Lea's affidavit which is due September 13th.

Mr. Sonnett: I trust the affidavits to be submitted on behalf of the Hughes Tool Company will be affidavits by those people who participated in the preparation of the document, not hearsay by counsel, we have had too much of that.

The Court: We will judge the affidavits when they are submitted.

Mr. Sonnett: Yes, your Honor.

(Adjourned sine die.)

Affidavit of John F. Sonnett, September 14, 1962

[1765]

[CAPTION]

STATE OF NEW YORK }
COUNTY OF NEW YORK } ss.:

JOHN F. SONNETT, being duly sworn, deposes and says:

1. I am a member of the firm of Cahill, Gordon, Reindel & Ohl, counsel for Trans World Airlines, Inc. ("TWA"), and I am familiar with the proceedings had in this matter.

2. This affidavit and the accompanying exhibits are submitted in support of the motion of TWA for an order:

(a) that TWA may commence taking the deposition of Howard R. Hughes in New York on September 24, 1962 [1766] and continue such deposition from day to day until completed,

(b) directing that defendant Hughes Tool Company ("Toolco") produce Hughes at that time and place for the purposes of such deposition, and

(c) suspending the taking of depositions by Toolco from September 24, 1962 until the deposition of Hughes is completed,

and in reply to so much of the affidavit of Chester C. Davis sworn to September 13, 1962 (hereinafter the "Davis Affidavit") as purports to discuss the foregoing motion.

Affidavit of John F. Sonnett, September 14, 1962

3. The basis for TWA's request that it be permitted to go forward with the deposition of Hughes commencing September 24 has been made a matter of record in numerous prior proceedings before the Special Master and before the Court. Particularly pertinent is the hearing before the Court on September 6, 1962 on TWA's motion for the entry of a default judgment against Toolco based on Toolco's deliberate and wilful failure to answer interrogatories as to Hughes' whereabouts, and the proceedings in connection with TWA's earlier motion for an order that Rule 4 of the new Civil Rules of this Court should be applied in this case. TWA believes that the Court, on the entire record to date, has concluded that TWA should proceed with the depo- [1767] sition of Mr. Hughes on the 24th, and accordingly that no useful purpose would be served by repetition of the points which TWA has previously made.

4. A substantial part of the Davis Affidavit is devoted to an expression of Mr. Davis' views as to the merits of the present action. See, e.g., pages 4-6, 12-23. This is apparently set forth in the hope that it will lead the Special Master not only to postpone beyond September 24 the taking of Hughes' deposition, but, as well, to decide that the taking of that deposition or indeed any depositions by TWA could serve no useful purpose and therefore should not be allowed to transpire. The implied suggestion that an anti-trust plaintiff should be denied the right to develop its case through depositions of the adverse party's witnesses is patently absurd. Hence Mr. Davis' attempt to confuse the issue by fragmentary, incomplete and inaccurate discussion of the merits of this litigation should be ignored.

5. This affidavit is therefore concerned primarily with so much of TWA's pending motion as seeks an order directing Toolco to produce Hughes here in New York for his deposition. On September 6, 1962, counsel for Toolco (Mrs. Lea), in the argument on TWA's motion for the entry of a default judgment, advised the Court that the United States Marshal for the Southern District of California on that same day had served Mr. Hughes with a subpoena to testify as a witness in this case by delivering a copy of a subpoena to [1768] Mr. Chester Davis in Los Angeles who was authorized to accept that subpoena on Mr. Hughes' behalf.

6. The subpoena referred to was a subpoena issued by the United States District Court for the Southern District of California on August 17, 1962. At our request, a member of the firm of Gibson, Dunn & Crutcher, a law firm in Los Angeles which has acted for us in connection with this case, and which had assisted us in our unsuccessful efforts to serve Mr. Hughes personally at the Beverly Hills Hotel on August 17, 1962, ascertained from the local United States Marshal's office the circumstances of the service of that subpoena upon Mr. Chester Davis, as counsel for Hughes, on September 6. As is shown by the memorandum by the Gibson, Dunn partner, a copy of which is attached as Exhibit A, it is apparent that this service was an eleventh hour device contrived to avoid the consequences of Toolco's wilful refusal to comply with the Court's order directing Toolco to answer interrogatories as to Hughes' whereabouts.

7. The subpoena in question directs Hughes to appear and testify on September 24 at the Federal Court House in

Los Angeles. It was made returnable there to comply with the provisions of Rule 45, FRCP.

8. In addition, however, the record in this matter establishes that Howard R. Hughes throughout has been and is at least the "managing agent" of Hughes Tool Company.

[1769] 9. Before discussing some of the matters showing that Hughes has been and is at least a managing agent of Toolco, it should be pointed out that Judge Metzner ruled on September 6, 1962 that the question whether effective service had been made upon Hughes was to be dealt with separately from the question whether a fraud had been sought to be perpetrated on the court through submission of an "authorization" purporting to bear Howard R. Hughes' signature which did not in fact bear Howard R. Hughes' signature (Tr. 11-12, 14-15). The first question, the Court pointed out, could best be answered by whether Mr. Hughes showed up in response to the subpoena on September 24th. It was in this connection that he suggested the filing of TWA's instant motion. Despite Judge Metzner's ruling that the two questions are to be treated separately, the Davis Affidavit lumps both matters together. The equivocal and evasive way in which the forgery is sought to be dealt with in the Davis Affidavit accordingly is the subject of a separate affidavit by me to be filed directly with the Court on September 17th as directed. A copy is hereto annexed as Exhibit B.

10. Some of the evidence in this matter which establishes that Hughes was and is at least the managing agent of Hughes Tool Company, is hereinafter discussed. It consists of:

Affidavit of John F. Sonnett, September 14, 1962

A. Sworn statements of Holliday in CAB proceedings relative to Northeast Airlines;

[1770] B. Communications which passed through the Hughes Communications Center at Romaine Street in Los Angeles in 1961, and which communications were produced to the CAB; and

C. Various documents produced in this case from the Communications Center at Romaine Street.

SWORN STATEMENTS OF HOLLIDAY IN THE CAB PROCEEDINGS

11. From April 2d until approximately April 20, 1962, the Civil Aeronautics Board conducted hearings in Washington, D. C. in the matter of the "Toolco-Northeast Control Case", Docket No. 11620. In those hearings Toolco sought approval of certain transactions which would place it in control of Northeast Airlines. Mr. Raymond M. Holliday, a defendant in this proceeding, was called as a witness on behalf of Toolco.

12. In his written direct testimony Mr. Holliday stated "I am executive vice president, secretary and the chief financial officer of Hughes Tool Company". (Direct testimony of Raymond M. Holliday). In addition, Mr. Holliday stated that he was a member of the Board of Directors and of the Executive Committee of Toolco (Tr. 781) and,

"Q. Am I to understand that you control the Tool company?

"A. No, I don't control the Tool company, no. It is controlled by a stockholder, Mr. Hughes." (Tr. 784).

Affidavit of John F. Sonnett, September 14, 1962

[1771] 13. The hearing before the Civil Aeronautics Board established that the decision to acquire control of Northeast Airlines was made personally by Mr. Hughes, and that the decision was made in 1961.

> "Q. Let me ask you this, Mr. Holliday. I believe you previously testified that the policy determinations by the Tool company to acquire Northeast were made by Mr. Hughes sometime in October of 1961?
>
> "A. I don't think I said the precise time. It was in the early fall or middle summer. I don't think I testified to the time." (Tr. 1107).

Mr. Holliday then stated:

> "A. Maybe this would clear this up. I remember when Mr. Stretch—well, he talked with Mr. Davis about this. Mr. Davis said is this something we can do or the Tool company can do without consulting Mr. Hughes? I said it is something I don't think the Tool company would do without consulting Mr. Hughes, and he was later consulted." (Tr. 1108)

14. The transcript of that hearing also shows that Toolco finally agreed to pay Atlas $5,000,000 for its position in Northeast. On that subject the following took place during Mr. Holliday's cross-examination:

> "A. . . . We reported the $5 million figure to Mr. Hughes, however.
>
> "Q. Who reported that? Was that you?
>
> "A. I believe it was Mr. Davis and Mr. Cook, I don't know which one.

"Q. Mr. Hughes said that was all right?

"A. I don't know whether he said it is all right. He certainly did not veto it. If he had vetoed it we would not have had the agreement." (Tr. 1206).

[1772] DOCUMENTS PRODUCED TO THE CAB.

15. The CAB hearing established that during 1961 scores of communications concerning the Northeast merger flowed through the Toolco message center at 7000 Romaine Street, Los Angeles, California, to Mr. Hughes from Messrs. Davis and Cook or from Mr. Hughes to Messrs. Davis and Cook. Copies of several of these documents are attached hereto as Exhibit C. In this connection it is interesting to note that Mr. Davis was retained as Toolco's counsel directly by Mr. Hughes and not by the officers of Toolco (Tr. 1107). One of the communications between Toolco's counsel and Mr. Hughes was read in part into the CAB record by Mr. Cook during an executive session of the hearing, the transcript of which was later made public by the Civil Aeronautics Board. The text as read by Mr. Cook follows next and amply demonstrates that Mr. Hughes personally makes the important decisions for Toolco:

"MR. COOK: [Reading from Memo to Hughes] In my view it is impossible to apply to the situation the ordinary business standards for investment. Independently of other objectives, it is obvious that you would not invest funds in a bankruptcy enterprise.

"In an informal and confidential conference which we had with Bill Forrester, he pointed out in his opinion you can probably do better to pick

up the Airline in a Chapter 10 Bankruptcy where you would not be saddled with completed capitalization and threat of trade creditors. Forrester would even say that in the Florida Route Case Northeast would be stronger in a Chapter 10 Bankruptcy than under Hughes control.

"Nevertheless we are quite aware you do have other important objectives which we are not free to discuss with Forrester such as the following:

[1773] "(a), exploiting the CAB proceedings to restore public favor to you and to the Tool Company. To some extent this is already being achieved,

"(b), avoiding the possible adverse publicity of a Northeast lawsuit against the Tool Company in the event of a chapter 10 receivership,

"(c), protecting the favorable possibility of employing a Northeast package as frankly inflated piece of contribution with which to effectuate a TWA settlement,

"(d), the matter of finding a home for four 880's,

"(e), protecting or restoring value to the Tool Company's $9½ million investment in Northeast."

(Tr. Executive Sessions 234-235)

VARIOUS DOCUMENTS PRODUCED IN THIS CASE.

16. Documents produced in this litigation by Toolco likewise contain cogent evidence that Hughes was and is, by any test, at least a managing agent of Toolco. Particularly instructive are the so-called "call sheets" of Raymond

Holliday and other documents during the year 1960 and 1961. Copies of various of these are annexed as Exhibit D. Even the most casual perusal of the instructions transmitted by Hughes shows that Mr. Hughes is not merely consulted and advised as to Toolco developments but is in fact the one who makes the decisions and advises his subordinates of them.

[1774] 17. An interesting illustration of the absolute personal control which Hughes habitually exercises over Hughes Tool Company, and which he sought to exercise over TWA, is to be found in the call sheet appearing as the first document in Exhibit D annexed, a message from Hughes to William A. Forrester, Jr. It will be noted that Hughes instructed his communicator on October 28, 1960 to call Mr. Forrester

> ". . . and tell him that for his information that Charlie Thomas negotiated and developed the deal with Dillon Read financing plan without my authority or encouragement from me; he forced it down my throat then at a Board meeting at which time he created a coalition of my directors and turned them against me and faced me with a mass resignation of all but one of the TWA directors. I have never liked this plan; I have never been in favor of this plan; I have fought it from the very beginning and I am still fighting it and I assure you that if it is employed it will be over my dead body and if you would like to come up with any suggestions of an alternative plan or any way whatsoever by which I can avoid being forced into the Dillon Read program, I would be most grateful. It is very flattering for you to say that you don't think I have ever

been forced to do anything and maybe there was a time when this might have been a fairly accurate statement, but I assure you it is not true today and has not been true concerning this Dillon Read program from its inception. I have fought it hammer and tong from the very first day that I ever heard of it."

18. As an illustration of the continued exercise of Hughes' absolute authority, despite his alleged resignation as president of Toolco, Mr. Holliday's call sheet for February 20, 1961, contained in Exhibit D, reveals long and detailed instructions from Hughes to Holliday regarding the handling of [1775] Toolco's Convair 990 order. Clearly these are the directions of one who is called upon to make the final decisions as to company affairs.

19. Buried in the text of the February 20th call sheet is the following illuminating statement by Hughes:

> "However I obtain TWA's acceptance to this is my own problem; most likely HTCO will control TWA when the matter comes up."

20. Although the above quoted testimony before the CAB and the document appended hereto by no means contain all of the evidence demonstrating that Hughes is Toolco's managing agent, they are sufficient to establish that fact beyond doubt. They show that Howard R. Hughes exercises absolute domination and control of all major decisions by Toolco in the field of commercial aviation. They compel agreement with the observation by the CAB's hearing examiner in the Toolco-Northeast control case that:

Affidavit of John F. Sonnett, September 14, 1962

". . . I think that we should quit kidding ourselves to believe that Toolco is some other entity besides Howard Hughes." (Tr. 1085).

(Sworn to by John F. Sonnett on September 14, 1962.)

EXHIBIT C TO AFFIDAVIT

MEMO NO. 673—September 11, 1961—11 A.M.

TO: HRH

FROM: Chester C. Davis

SUBJECT: Atlas-NEAL

Stretch and Austin will see the Chairman of the CAB about 4:30 P.M. this afternoon NYC time for a preliminary discussion. They anticipate that he will want to know whether a deal has in fact been traded or at least whether the parties are so close that a deal is certain if we get necessary indications from CAB. The banks are also inquiring as to whether the parties are close to a deal. Stretch is pressing me for an indication. I have indicated that his proposal is in the ballpark but I have not yet indicated the area or range which we would be willing to pay if everything else is satisfactory.

I do not need to commit myself now on an exact price. I have in mind also the possibility of trading price against time for payment which would give us an opportunity to realize full value for TWA's securities that might be used. I do not need to know, however, the area or range of price which would be satisfactory to you. There is no normal standard for placing a value on the interest of Atlas in NEAL. CAB may also inquire as to our attitude toward a possible merger of NEAL into TWA.

[fol. 1779] I should talk to you as soon as possible. In any event, I urgently need a message from you as to the price area in which I may commit. I should have this message this evening at the latest because I expect to be in Washington tomorrow morning.

OPERATING MEMORANDUM 724

SEPTEMBER 17

10:00 P.M.

TO: HRH

FROM: RAC

SUBJECT: B of A Conversations

Carver referred the Northeast matter to Gordon who, after a conference with others in the bank, announced the following position for the bank with respect to your proposed transactions:

a. The bank does not want to dictate to HRH what business decisions he should make.

b. While therefore they cannot "sanction" the transaction, they will make certain comments.

c. They feel that unless H receives indications from the CAB that he can rely on, he will be a "damn fool" to go through with the deal.

d. (Blocked out)

[Handwritten notation—Relevance TR 228]

e. HRH should not make a deal which impairs his ability to solve the Convair problem, although Gordon recognizes that it is possible that by the end of the year the HTC may become a creditor rather than a debtor.

f. HRH should not make a deal for Northeast that would impair his chances of making a settlement with TWA; that is, he should not commit subordinated debentures of TWA in amounts to prevent their use as a part of the TWA settlement.

[fol. 1781]

g. This acquiescence by the B of A in the Northeast transaction should not be construed as either a release

of cash collateral or a commitment for additional loans but should not be considered as a turn-down.

In my opinion HRH does not need to go back to B of A to make this deal provided that he is prepared to meet the B of A's specified conditions, (Blocked out)

MEMORANDUM TO: HRH

FROM: CCD and RAC

RE: NORTHEAST

1. Stretch advises that the Chairman of the CAB will call some time tomorrow to arrange for an immediate meeting with us as representatives of Toolco for the purpose of discussing the procedures which we should consider following in light of our intentions and in view of the rapidly worsening situation at Northeast. Stretch says that the Chairman will also indicate to us that the Board is not prejudiced against the Tool Company. Stretch also says that he will be at the end of his rope by the end of the week.

2. It is increasingly clear that Northeast can be effectively helped only if Toolco is prepared to assure the overdue trade accounts that they will be paid. Shell has already insisted upon such an assurance to cover future deliveries. Vickers understandably is unwilling to give up any collateral position except as part of a program indicating that Northeast can be kept out of bankruptcy—in other words that there is a program for taking care of the trade creditors.

3. From our point of view, the giving of so-called limited assistance is likely to become unrealistic. This amount will keep increasing, particularly if an overall program reassuring the trade creditors is not developed and publicly

[fol. 1783] presented. It seems to us, therefore, that in order to keep the situation under control it is necessary to consider making a deal with Atlas giving us the right to acquire their position and which would form the basis for an application to CAB for their approval as to our acquisition of control. Pending CAB approval, we probably could limit the amount of financial assistance and reasonably expect the trade creditors, particularly the more important ones, to await CAB action. The application filed with CAB, however, would have to contain in effect a commitment on the part of the Tool Company assuring the payment of trade creditors upon CAB approval of our acquisition of control.

4. It is important that we have an opportunity to discuss this Northeast situation with you before we are invited by the Chairman to see him.

-end-

OPERATING MEMORANDUM NO. 738

TO: RAYMOND COOK

FROM: HRH

SUBJECT: NORTHEAST NEGOTIATIONS

Tell Cook that this thing is beginning to look completely okay to me; that there are a few items in both the memorandum and the application which I want to discuss with him before it is filed. That I will call him tomorrow without fail and discuss these matters or send him a message setting them forth. I will try to do this in time for the corrections to be made and the document to be filed tomorrow but I think that is expecting too much. I think a more realistic schedule would be the filing with the CAB on Thursday. That, however, tomorrow I will review with him fully all

of these items to which I refer. I don't think these are going to give us any trouble because they are simply items which I feel must be corrected from our standpoint but nothing which I believe will cause any displeasure with Atlas or the Board.

(Blocked out)

[Handwritten Notation—Relevance Tr 147]

In other words, go ahead with the program that he has outlined to me but with the limitation that no documents will be executed or promised to be executed until I give him further approval. This is not to be construed as meaning I wont grant approval perhaps even tomorrow, but tonight I want it understood that I have not approved any documents to be executed or promised to be executed, and

Memo #1015—December 13, 1961—10:30 pm

To: HRH

From: Raymond Cook

Subject: Northeast

Referring to your memorandum of December 12 (yesterday morning), we believe that it is essential that we immediately tie up Northeast with an option from Atlas along the lines of our last message so that we may control the situation. This will not prevent you from making a different and better deal along the line of a firm commitment to buy out Atlas for cash as you are now contemplating. If we do not act by tomorrow (Thursday) and tie up the situation we are afraid we will loose our bargaining position with Atlas and loose face with the CAB and publicly.

8:00 AM

OPERATING MEMORANDUM 1016

TO: RAYMOND COOK

FROM: HRH

SUBJECT: NE-ATLAS

Raymond:

I am sure you believe sincerely in the fairness of what you propose, but when you say we can take an option at one price and then go ahead and negotiate and possibly close a firm deal at a much lower basis without the acquisition of the option having hurts us, I just do not believe that you yourself believe this.

As you know, this entire affair is being played out in five scenes and three acts in front of the CAB.

Now if we take an option at the figure you are discussing and then try to negotiate at a lower figure, the CAB will say we led Atlas down the garden path and encouragd them (by taking the option) to think we were seriously interested at the higher figure.

Please make the following firm offers for immediate acceptance:

$3,500,000 cash for Atlas' interest in NE—no strings no conditions, no option—naturally this would assure Atlas that we have made a firm decision to save NE from bankruptcy and therefore the major asset to be derived out of the deal by Atlas would be the virtual assurance that NE will be put back into healthy financial condition and converted into a profitable enterprise for the benefit of all the NE stockholders.

[fol. 1789] I think the absolute all-out horror-filled tragedy of Atlas permitting NE to go bankrupt to the financial

destruction of the stockholders is something so serious to Atlas that it would destroy public confidence in Atlas as a sound investment trust and make it impossible for all practical purposes for Atlas to continue in business.

I would expect an immediate liquidation of the company.

So this deal, in my judgement, should be viewed, not so much on how little or how much it brings in, in the form of purchase price now, but in terms of how much a skillfully managed Atlas Corporation can make for its stockholders through the coming years as opposed to how little the stockholders will realize out of an immediate forced liquidation on terms far from ideal.

I can argue the merit of this proposal, both practically and morally, going back to the fact that Odlum moved into my remnant RKO Company which consisted of nothing but a nice fat bank account of $24,000,000 plus and while hiding and concealing the fact from me, secretly acquired over 1,000,000 shares and took control of the company.

He then guided events into a merger between RKO and Atlas so my Atlas stock cost me $6,000,000 and any depreciation since then was solely due to the management of Atlas which I never interfered with in any slightest way at Mr. Odlum's request.

(The above is with respect to my alternate offer which is immediate firm (no option) exchange of my stock plus $1,000,000 cash for Atlas holdings in NE.)

[fol. 1790] So, according to my calculations, this offer would mean the Atlas holdings in NE, a bankrupt company by everyone's admission, would cost me:

Atlas stock	$ 6,000,000
Cash	1,000,000
HTCO advances to NE	10,200,000 plus
A.....	
Total	$17,200,000 plus

and this is only the beginning.

Exhibit C

Heaven knows how much we will have to put into NE to save it, but a conservative guess would be $20,000,000. Our money, not bank loans which would be on top of this.

And all of this ignores completely the very large amount of money it cost us in our G.D. transactions to arrange and make available those six 880's which everyone now complains about as being too late, but they didn't think they were worthless when we gave them to NE and when NE could not get a single jet from anybody else for love or money here or abroad. Not a jet to be had from anybody, and NE was so desperate that when Odlum first came to me he was ready to settle for one airplane diverted to NE from our deliveries in January or February. So we gave him 6 and on the best lease anybody ever got—so good Naish got fired for it—and now they are complaining that the planes were late.

Anyway our costs in connection with that deal—which were very, very heavy—are ignored in the computation I have submitted above.

[fol. 1791] If anyone wants to argue that my stock in Atlas is not worth $6,000,000 today, there is one pretty good answer to that. Atlas management had full control of my $6,000,000 plus and if it is not worth $6,000,000 today, the responsibility lies only one place—Atlas—and it is from this same Atlas that we are contemplating buying NE, so I think due adjustment is owing to us.

The same answer applies if anyone wants to argue that our $10,200,000 investment in NE is not worth that amount today.

I agree it is not worth that amount—it is not worth anything and neither is the Atlas indebtedness in NE which we are getting ready to buy.

Also, here again, any depreciation in the $10,200,000 is Atlas' doing—we advanced the money at Atlas' urgent plea and again at Atlas' request we have kept hands off 100 percent and Atlas has managed NE without any interference from us, so any loss in the $10,200,000 is Atlas' responsibility—and it is with this same Atlas that we are

dealing and we are entitled to proper adjustment and credit.

We want Stretch as a part of this deal.

Just one thing:
The basis for the two proposals:

$3,500,000 is a 50 percent markdown for cash—all cash now—no options—no notes—no TWA debentures—no Atlas stock.

The other proposal is based upon the following:

$7,000,000 is taken from the figures comprising the variable [fol. 1792] option which starts at $7,500,000 in April 1962 and slides up to $9,500,000 by April 1963. If you extrapolate this to the advanced date of December 1964, you come up with a figure of about $7,000,000.

If my stock is valued at my cost of $6,000,000 plus and you add the $1,000,000 cash which I am offering you come up with $7,000,000 plus.

I am sure they will argue that my Atlas stock is not worth $6,000,000. The answer to that is that it was not only worth $6,000,000 plus in a bank in cash and correction: sentence should read: The answer to that is that it was not only worth $6,000,000 it consisted of $6,000,000 plus in a bank in cash and no liabilities. If Atlas, under their sole uninterfered with arbitrary management—with no obstruction or interference from me—operating in accordance with their own judgement, lost a part of my $6,000,000 then I don't see why I should be penalized for it in this deal.

However, apart from all of the above, there is no reason why my price which I am tendering, consisting of my Atlas stock plus $1,000,000, there is no reason why this must be worth $7,000,000 because I assure the Atlas holdings in NE are not worth $7,000,000—not be a long way.

HOLLIDAY, RAYMOND

Wed., 1/25/61

8:45 p.m. I am going to go on to sleep now and regarding the two matters he is handling in NYC—the meeting of the trustees and the Board of Direc-

tors meeting—try to make those meetings as late as they can possibly be made in the morning.

9:00 p.m. Advised.

Fri., 1/27/61

9:00 a.m. I want to be sure that you are standing by at a telephone. I want you throughout the day in your office. I want you to be able to clear your office and to talk privately at any time.

9:30 a.m. Advised.

Sun., 1/29/61

9:30 p.m. Vic Leslie says that Counsel for TWA has advised him that TWA cannot accept #9. That they must insist on 26 and 30. They cannot accept it because it would take 90 days to deliver #9, whereas 26 and 30 each would be delivered within about 4 weeks from the time that Convair is given the go ahead.

Mon., 1/30/61

2:30 p.m. Regarding the $5 million—we will be obligated to pay provided we do not make an amendment to the contract increasing the number of aircraft from Convair.

By letter to Hughes Tool to my attention, Convair has advised that "delivery positions for the 7 additional 600 aircraft cannot be held beyond Feb. 1, 1961 without a definitive purchase agreement."

They point out that "these delivery positions have been held since July, 1960, and have now reached a point in manufacture when very substantial orders must be placed for parts and material. It is imperative that an amendment to the present contract increasing the number from 6 to 13 aircraft be executed prior to Feb. 1, 1961. If this is not done we shall have no alternative

but to bill Hughes Tool for the cost pursuant to the letter agreement and to cancel these delivery positions."

201108

[fol. 1796]

HTC ROMAINE

498

HOLLIDAY, RAYMOND

Wed., 2/1/61

3:00 p.m. HTCo has on order 10 CJ 805 engines which TWA state are surplus to their needs even assuming that they might receive all 24 880's. Storage charges on these engines are being billed by GE but no arrangement for the payment of any storage charges has been made.

Bob Rummel advises that GE would cancel the order for these 10 engines without any cost to HTCo and give us the right to order additional engines if a need should arise in Sep. or Oct. at the price HTCo is now obligated to pay. This is notwithstanding that the price will increase immediately by approximately $14,000 per engine. A cancellation of these—$1-1/2 million obligation—would not only relieve us of the present obligation but would improve our balance sheet.

Cancel: per delivery

Tue., 2/7/61

3:30 p.m. The contract change order we sent out for the 7 600's is being returned by Convair today as not acceptable. Also, they are putting a registered letter in the mail to us today rescinding forthwith the contract for the 7 22-M's.

Thu., 2/9/61

3:00 p.m. A. 880-M Recisions: Written notice was received today from Convair rescinding the 880-M

contract. No mention was made of cancellation damages, although Naish has orally stated there would be none claimed. It is the opinion of Cook and Holliday that without express agreement from Convair, HTCo will remain contingently liable for whatever damages Convair may suffer from HTCo breach. Accordingly they recommend that HTCo promptly send Convair a written agreement acknowledgment of the recision notice and expressly incorporate Naish's oral waiver of damage claims.

B. Purchase Agreement for 7 Additional CV 600 Aircraft.

1. This morning Cook talked to Loomis, Gullendar and Naish in San Diego concerning primarily the necessity for a conclusion of the contract on 7 additional CV600 aircraft. (Naish regarded the 880-M problem as having already been solved.)

2. Gullendar and Naish want Cook and Holliday to come to San Diego Monday, Feb. 13, to negotiate to a conclusion a firm definitive agreement on the 7 additional aircraft.

3. The contract from which HTCo is expected to execute with respect to these additional aircraft, calls for a "down payment" of approximately $5,800,000 and progress payments aggregating another $4,300,000 commencing on June 1, 1961. Naish says that Convair may accept a promissory note for 60 days, but no longer.

4. Any solution which can likely be negotiated with Convair will require banking support and should be coordinated with the Bank of America.

5. Cook and Holliday recommend that prior to Monday, perhaps, Friday afternoon or Saturday morning, they be authorized to negotiate with the Bank of America on the following basis:

Exhibit D

[fol. 1797]

HOLLIDAY, R.

Thu., 2/9/61 (Continued)

(a) The 880-M contract is irrevocably rescinded without penalty on Hughes Tool Co.

(b) Hughes Tool Co. will continue to offer TWA at least 2 of the remaining 880's until its new Board and President have had a reasonable opportunity to consider and accept.

(c) The $3,108,000 of down payment which so far remains applied to the 880 contract will be re-applied as a partial payment on the 600 contract.

(d) Convair will extend to Hughes Tool Co. credit for not less than 60 days for the deficiency of down payment on the 7 additional aircraft of approximately $2,700,000 and for the current deficiency of progress payment on the first 6 aircraft of approximately $2,600,000.

(e) The Bank of America would give general approval, though not a binding commitment for its financing of the final two 880's.

(f) Hughes Tool Co. agrees to obtain either a disposition of, or a mutually agreeable financing of the entire fleet of 600's prior to the date of the next progress payment due there on May 1, 1961.

(g) Negotiations with TWA and its investment bankers will be promptly commenced for a public offering of TWA subordinated debentures.

6. Naish says that no action can be expected out of TWA on either the additional 880's or on

the seven 880M's until some time in March, when at the earliest TWA will have its new Board and President.

7. In the absence of contrary instructions Cook and Holliday plan to arrive in Los Angeles Friday morning.

INFO Omit. They talked.

INFO Mon., 2/13/61

See message posted to Raymond Cook at 10:00 a.m. this date.

Thu., 2/16/61

6:20 p.m. (Per RC) Have received a telegram this morning addressed to Howard R. Hughes, 2200 Gulf Building, Houston, Texas as follows: "On January 6, 1961 we duly demanded that you pay the whole amount due and payable on the $10,664,659.39 note outstanding under your special loan agreement with us which has been past due since October 31 of last year. We have had no response from you and we hereby renew such demand and insist that the note be paid in full not later than February 24, 1961. If the note is not paid in full by that date we intend to avail ourselves of the remedies provided for in the loan agreement and to proceed promptly against you and against the stock of the Hughes Tool Company and other securities held by us as collateral for the loan. Signed, Irving Trust Company, Robert A. Kerr, Vice President." Need to talk to HRH re above. (above message should have been in red)

[fol. 1798]

HTC ROMAINE

498

HOLLIDAY, RAYMOND

Mon., 2/20/61

3:30 p.m. Regarding GE engines—have been advised by GE that if HTCo wants to cancel the ten excess CJ805's it must do so by Monday 2/20.

4:00 p.m. Advised.

7:30 p.m. Cancel the engines provided we have the privilege to reinstate.

Regarding the Convair negotiations: I urge as follows: Regarding the claim that I would take AAL specs for the model 600's—this is true as to the original specs and at no time have I indicated any hesitation or uncertainty concerning the acceptance of the original AAL specs. At no time did I say that HTCO would take any subsequent change orders placed by AAL without approval of same first.

Convair's argument "why obtain TWA's opinion regarding 3% of the airplanes when TWA will not accept the other 97% is completely improper for the following reasons:

It is not up to Convair to decide whether TWA will accept the so-called 97% of the airplanes. This has never been a matter for discussion. However I obtain TWA's acceptance to this is my own problem; most likely HTCO will control TWA when that matter comes up.

In any event, it is not Convair's worry; the 97% is HTCO's problem.

Now, regarding the 3%; Convair is mistaken in saying it is HTCO's fault that this matter was not resolved because HTCO failed to give deci-

sions; this is an invalid and improper decision which Convair is seeking to take; for this reason we do not want these 3% of changes. We have a signed specification and that specification is the airplane we want. Failure by HTCO to accept changes ordered by AAL simply means by omission that HYCO has elected to take the airplanes without any changes and contractually unless you and R. Cook have permitted a default by failure to make payments, Convair is ~~not~~ obligated to give us the airplane in accordance with the original specifications.

If Convair says HTCO has failed to give a decision with respect to the change orders the answer is simply we failed to order the changes when offered and therefore I say again we elected not to take the changes and this is the way we want the airplane. Convair has no right whatsoever to bill HTCO for the 70 thousand dollars. HTCO demands the airplanes according to the original specifications and does not want any of the changes.

At no time have we agreed to take blanket changes by AAL or any of them for that matter and I do not want them. In other words, Convair wants an answer regarding the change orders and here it is: The answer is *no* regarding all change orders regarding the original specs. Quite obviously Convair wants HTCO to accept these change orders in the interest of saving Convair money which naturally results from making the HTCO plans identical with the AAL planes. If Convair went ahead and put some of these changes into the HTCO planes it was done not because Convair thought we wanted them and not because Convair was uncertain as to whether we wanted them but simply because

Exhibit D

[fol. 1799]

HTC ROMAINE

498

HOLLIDAY, RAYMOND

Mon., 2/20/61 (continued)

Convair wanted to put them into the planes and charge us for them for the simple reason that this would save Convair a great deal of money over the other route, namely, to build the planes in accordance with the contract.

I want you to recite all of the above to Convair in detail and I want you to say in spite of my feelings that this is a very bad deal for HTCO and that it is costing HTCO approximately a million dollars for changes which I do not want in the airplane. Nonetheless, in the interest of getting the entire matter resolved HTCO is willing to do the following:

Give Convair promissory notes as negotiated by you; make no other changes whatsoever in any of the contracts except the one which Convair has requested concerning the 70 thousand dollars of change orders. HTCO will accept that provision exactly as it presently exists as a result of your negotiation with Convair. There are to be, however, absolutely no other changes at this time. This means the contracts will remain as presently drafted concerning delivery. Convair and HTCO to have the following oral understanding: (Not intended to be legally binding but hoped to be morally effective) A statement of intentions that Convair recognize and negotiate and that with respect to items which may be mutually agreed deleted Convair will be reasonable in the pricing. HTCO will arrange for contract administration concerning all aircraft on order in a manner in keeping with Convair's desires either by Bew or someone else (if it is

not to be Bew HTCO will make every effort to find someone acceptable to Convair and will submit his name to Convair for discussion prior to assigning him to the position).

Regarding deliveries—HTCO recognizes that present schedule is unrealistic and will sit down with Convair without delay to review proposed new scheduling taking in every way a reasonable viewpoint provided the relative slippage between AAL and TWA is as Convair represents, not disadvantageous to TWA in relation to AAL as compared to their relative position prior to slippage.

In regard to deliveries, you might point out HTCO has had long experience with Boeing, Lockheed and Martin in purchasing transport; aircraft; is well aware they rarely come out on time and that you cannot get blood out of a rock so that if the deliveries have slipped then they have slipped and there is nothing we can do about it. You might point out HTCO has never sought to cancel any one of its numerous contracts with airplane manufacturers for reasons of retarded delivery and from the best of my knowledge has never sought to cancel any airplane contract for any other reason. The best evidence of this is the fact that Convair has released us from all liability under the 22M's and we still do not want to cancel this contract and are fighting to avert its cancellation.

Regarding the informal understanding—regarding the four additional 880's; I say that HTCO desires that the contract for these airplanes remains undisturbed. HTCO will notify Convair promptly of the disposition of the airplanes. HTCO has offered the four airplanes to TWA. If TWA does not take them HTCO will notify Convair promptly of what is desired to be done with these airplanes. In any event, in accord-

ance with Convair's last proposal HTCO does not make any commitment at this time to Convair in any way affecting these airplanes either for cancellation or otherwise and they are not

HOLLIDAY, RAYMOND

Mon., 2/20/61 (continued)

allocated to TWA; nor are any other unallocated airplanes to be allocated to TWA until TWA makes at least a satisfactory oral agreement with HTCO with respect to these four additional airplanes.

Regarding the 22M's HTCO is aware that Convair contends that Convair is no longer obligated contractually to HTCO with respect to these airplanes. HTCO does not consent to or acquiesce to this position by Convair but at the same time Convair does not change the documents to be signed at this time or desire anything toward reinstatement of the 22M contract.

However, HTCO will appreciate very much indeed Convair withholding for as many days as is humanly possible any action toward destruction of these aircraft—or commitment to anyone else concerning them as HTCO is making an immediate all-out effort for TWA to accept these aircraft; taking all measures toward this objective and HTCO has confidence in this respect in spite of Convair's apparent receipt of information tending to indicate that TWA is not interested in these airplanes. In addition to this HTCO is approaching certain bankers immediately as to the possibility of obtaining financing for the purchase of these aircraft independent of any possible disposition to TWA. HTCO is determined to purchase these aircraft; does not

want them destroyed or disposed of to others under any circumstances. HTCO will make a most determined effort to satisfy Convair immediately of HTCO's determination and financial ability to accept and pay for the aircrafts promptly *fulfilling* its obligation in regard to these airplanes without delay.

In summary, you could point out to Convair that the settlement HTCO is proposing would give Convair everything that Convair wants in regard to revised specs and *an* additional $70 thousand dollars added to the price of each model 600 airplane and would put HTCO completely at the mercy of Convair in regard to any adjustment of this matter. I consider this concession completely and utterly unfair but I am proposing it as an indication that we want to give and take and we are therefore placing ourselves at Convair's mercy in respect to the adjustment of this matter if Convair should ever decide in Convair's own arbitrary judgment to condescend to make any judgment.

Also, it should be noted that with respect to the seven 22M's, which we so urgently want, again we would be completely at Convair's mercy in regard to any hope of obtaining these airplanes inasmuch as under the proposal I am making no new papers would be signed concerning these aircraft and therefore Convair's present written notice of cancellation would stand unchanged and in full effect.

Make full use of and emphasize most strongly with respect to the two points below: (a) the revised specs and $70 thousand of additional price; (b) cancellation of the seven 22M's to HTCO—we would be completely at the mercy of Convair in any possible discussion concerning a judgment or disposition of these matters.

Italicized words typewritten interlineation.

Exhibit D

Then point out to what extent it may seem advisable that in return for HTCO placing itself completely at Convair's mercy in respect to the above points, it seems little enough that Convair trust HTCO to sit down immediately

HOLLIDAY, RAYMOND

Thu., 3/2/61

4:00 a.m. Please take all preparatory steps necessary to be in a position to tender to the Bank of America on Friday a mortgage on the real estate we discussed. I hope to persuade the bank to accept a general description of the property in general language which will not require the taking of an inventory. Please do not actually make presentation to the bank until I communicate further with you, but please make all necessary preparations in order that we will be in a position to make this tender by Friday afternoon at the latest, as this is the deadline imposed by the bank. Many thanks, Howard.

4:15 a.m. Ans: Advised.

Fri., 3/3/61

6:00 p.m. We met with B of A this morning and they are satisfied to take the property as collateral provided the right to egress and ingress can be worked out.

We agreed that it was not the intention of you to deny the right to egress or ingress and are now developing a method by which this can be done, to wit: A mortgage on the road way with an easement back to HTCo.

With this one change the bank is completely satisfied and the paper work is being completed to

provide for the mortgages which will probably be signed on Monday. In other words, unless some further question arises from B of A the matter with them is now settled until the time, or until April 20, when it will become necessary to renew the note on some long term basis.

The following TWX was sent to HTCo in Houston: "Model 880 aircraft manufacturing statements #26 and #20, were initially tendered to the HTCo on Aug. 12, and Oct. 18, 1960 respectively and upon your failure to accept delivery, were stored. Convair hereby notifies you that said aircraft #26 and #30 are being prepared for 43-tender to the HTCo for inspection and acceptance on March 8 and March 15, 1961 respectively, pursuant to an agreement between Mr. Hughes and Mr. Loomis on Feb. 15, 1961.

"You are requested to advise the undersigned immediately if the HTCo or TWA as assignee of HTCo will, after inspection, accept the aircraft on the date indicated. In connection with the foregoing, your attention is invited to the provisions of Article #2A5 of the purchase agreement between HTCo and Convair dated Sep. 10, 1956, signed, Convair by D. H. Diggs for C. L. Meador."

I received in my office in Houston a letter from Convair dated Feb. 27, 1961, asking for prompt designation of a representative to provide administration of the 600 contract pursuant to the negotiations conducted in firming up the seven follow-on 600's.

Have met with Bautzer and am going to meet again in just a short time.

HRH Advised.

5:15 p.m. OK on Bank of America. Please proceed to work it out accordingly. Regarding the ingress and egress, please be most careful on the paper work on this.

Regarding the two communications from Convair, do not do anything regarding these things until further instructions from me. I will get word back to you by Mon. morning what to do apropos these two messages delivered me from Convair. Please do not give them any response orally or otherwise. If they press you futher for an answer, tell them they will hear back from us on Mon.

11:30 p.m. Advised—call cancelled.

Sun., 3/5/61

12:00 a.m. Please call Cook and say that I want both of you to leave Houston Sunday evening at the very latest. You and Cook are to come out together. I will talk to you when you get to L.A.

Tue., 3/7/61

10:00 p.m. You are to come alone to Odlum's ranch tomorrow. Just you are to come out and follow all the instructions as given before concerning the meeting at the Odlum ranch tomorrow afternoon.

Wed., 3/8/61

3:45 a.m. Send a telegram or however it should be done to Convair by 7:00 a.m. from Houston; to be sent by Chuck Price in the usual way. The authoriza-

tion should apply to #26 only not #30 or any of the others. From a practical standpoint the result should be that #26 be delivered to TWA without any delay whatsoever. I want the designation to be carried out from a legal, practical, mechanical and documentation standpoint. The same identical way we have done the others, unless there was a defect in the documentation on the prior occasions which was disadvantageous to us, in which case, of course, I want any such defects not to be repeated on this occasion.

4:45 a.m. Ans: Advised.

3:45 a.m. Please tell Odlum when you first see him that I appreciate very much indeed the message he was kind enough to send me last night, and please tell him further that I have complied with and carried out his recommendation precisely and exactly in every detail. Also, please tell him that I appreciate very deeply his courtesy, concerning your meeting today and also the meeting he had with Greg Bautzer last night, both upon such short notice.

HTC ROMAINE

498

HOLLIDAY, RAYMOND

Mon., 4/18/61

1:15 p.m. Regarding copy of the letter of over-subscription of debentures, please notify the people at CPW&W that we do not consent. Until further communications you must consider that this is disapproved. However, we will consider the matter and communicate again with them. Meantime, the matter is not approved.

What is the latest date on which action can be taken on this matter? Is the failure to respond reason for them to believe that the matter was approved? I want your and/or Bautzer's opinion on this. Is failure to reply construed as consent?

The date on this letter was April 12; why wasn't I notified sooner?

2:45 p.m. Ans: I will advise them directly and also get answer to the questions you mention and let you know forthwith—possibly late this evening or first thing tomorrow morning.

Wed., 4/19/61

2:30 p.m. For practical purposes we have until April 26, the day before the board meeting and stockholders meeting on April 27, because this is a matter that should be approved by the Board of Directors. Technically and legally, it could probably be approved at some date after the Board meeting and could be approved by the Executive Committee any time within one week prior to the offering, which could carry it into sometime in May, but the answer should be given for all practical purposes by April 26. It is something the company would want to approve rather than the Executive Committee. The reason the letter was not brought to your attention before was that copies were sent to me both in Houston and NYC and it just happened that I wasn't in either place.

Thu., 4/20/61

10:00 a.m. Where do we stand on the four airplanes for TWA?

12:15 p.m. Ans: I had lunch with Leslie and he said that if we wanted to make them an offer we should do so because it would have to be appraised by the Board of Directors and it would have to be before the Board meeting because at that time they would probably want to commit for some Boeings.

I don't have any new information than what I gave to Bautzer, and I know he talked to you

since that time. The last thing we had was the letter Leslie sent to me and following that I had lunch with him. Leslie said they would like to have the planes but we will have to make them an offer. I did not give an offer because I felt we had a deal all along. He did reiterate, however, that they are not going to try to buy them at a distressed price.

To: HRH

From: Raymond Holliday

The first thing that came up at the board meeting today was the approval of the minutes. I explained that I had just received the minutes; that while they might have been mailed that I hadn't received them and consequently I would abstain from voting.

Next was the approval of the Executive Committee Meetings and I had glanced at these, and the minutes of June 29, that was the authorization for the filing of the law suit. I stated that I questioned the authority of the Executive Committee to authorize the filing of the law suit because as I remembered the resolution hiring the law firm that came out of the board of directors meeting that a report was to be made back to the board by the Cahill firm. It was explained to me that there was a report made to the board but that it was oral; that a report also was made to the Executive Com-

mittee on June 29 and at that time the Executive Committee authorized Tillinghast to file the law suit whenever he felt it was the necessary thing to do in his judgment. So I questioned the authority of the Executive Committee and wanted the record to show that. At that time Slack suggested that the board should at that time ratify the action of the Executive Committee. The vote was taken and I cast the only "no" vote.

Nothing else came up for some time except the approval of the 1961 financing for the Boeing purchase. When that came down for vote I pointed out that nothing had been said yet on the part of HTCo. making a settlement which would permit this and there was a considerable amount of discussion. Mr. McCone and Mr. Hood raised some questions about it which were going into the merits of it, as to whether or not it was something that could be afforded, whether they needed the planes, and some very searching questions.

I pointed out that there were some discussions going on at that time in which the financing was an ingredient and if the board could not withhold the matter for a vote at a later time I would abstain from voting. McCone also abstained because he thought it was being acted upon too quickly.

Tillinghast made a report of his conversations with Bautzer and after he made his report I pointed out that Bautzer was authorized to make the representations he made. At that point Breech suggested that since I was also a defendant in the suit that possibly it might embarrass me and I might retire from the meeting for 15 minutes, which I did. There was no further discussion of this, and nothing also came up at the meeting that was of any particular significance. There was a lot of talk about why the company was losing money but nothing else came up for action or to be voted upon that was anything except routine.

I made a complete report of the meeting to Bautzer.

OPERATING MEMORANDUM

Subject: TWA Subordinated Debentures, etc.

Date 5/11/61 - 5:00 AM

From: HH to R. Holliday

Please move ahead with all possible speed on the program to sell and pay to the HTC the proceeds thereof the entire $111 million plus of TWA's subordinated bonds. Please consider this authority to do everything necessary to proceed with this program without delay. The directives concerning the secrecy which I gave you before may be violated as required, but no more and no sooner than necessary. Bear in mind that any market is supply and demand, and if word of availability of this enormous quantity of bonds should suddenly become known up and down the street, it might raise hell with the price. Please work in close contact with Bill Forrester (or whatever other investment brokers you decide to use). But remember, this is a tricky program and one which will require the maximum skill and attention of the very best investment brokerage brains every single minute of every day as to every single detail.

This is a big assignment I am giving you, Raymond, and if you carry it out to my expectation, the rewards and results to you will be very substantial. I would like to have before me the plan of how this program is to be carried out, but you can dictate this in the evenings when it will not interfere with your work, and I do not want to delay or hold up any slightest detail of this program waiting for me to read these plans, and I do not want you to wait one minute for any further authority or comunication from me.

•••

Regarding the warrant or right to purchase TWA stock which will be attached to the debentures, as I stated in my last message, we would like to retain as many of these warrants as possible, but if the debentures simply cannot be sold without the warrants attached, even at a reduced price

(reduced by not too much more than the value of the warrant), then in that event, we will simply have to let the warrants go along with the debentures. The sale of the debentures is the primary objective and has priority over any other consideration, such as retention of the warrants.

• • •

Regarding Convair, I see no reason for you to go to San Diego. I feel confident if you call on the telephone immediately to Meador or Loomis and give them full information concerning the subordinated debenture offering, but not including, of course, our recent decision to liquidate the $70 million plus of debentures originally intended to be held by HTC, but pointing out that beyond any doubt this offering will bring the HTC around $20-30 million, and state to Meador or Loomis that they have the HTC's promise to start making payments to Convair in whatever amount Convair requires the very first day that we commence receiving funds from the sale of these debentures. I fully believe that if we lay this on the line, openly and honestly with Convair, so that they know there is some money

[fol. 1815] forthcoming just over the horizon, I believe they will be willing to wait until we receive some of these funds, provided it does not take too long. Anyway, you can do all this on the phone and tell Meador and Loomis that you are busily engaged in this debenture program and that a trip to San Diego will only delay it, and if you point out that you probably should go immediately to New York in connection with this very matter, and if you offer to come to San Diego if they desire following this trip to New York, by which time you will have perhaps more accurate dates available, I am sure you can obtain their acceptance to this program. Anyway, please try immediately.

• • •

Regarding the letter requested by TWA concerning the forthcoming offering of debentures, copy of which has been sent to me (HRH): Please ask Bautzer and Cook each by telephone for any changes (if any) they recommend in respect to this document. Try to persuade Cook to give you his advice. Tell him I am contacting Bob Campbell right away regarding the fees.

Exhibit D

But in any event, I want this letter executed and delivered in the quickest possible time. If it is impossible to obtain Cook's comments, go ahead without them. Give Bautzer a very quick opportunity to seek counsel within his firm as some of these men might be very valuable in studying and revising this letter. In any event, I want the letter executed as quickly as possible, still to comply with the requests contained herein. Then I want it sent to New York air express, picked up at the airport and shot into Leslie by the quickest possible method of conveyance. Call Leslie immediately and say that the letter will be executed today and will be sent today and will be in their hands by tomorrow morning at the latest. Make a second call to Leslie after the letter has been executed and sent. Could be Reed if this is the man to be assured. HRH wants Leslie or Reed or both to be called and say that they letter will be executed today and will be received by them no later than tomorrow morning. HRH wants the second call to either or both of these, saying the letter has been executed and has been sent and is en route. If the letter is already in the mail, please phone them and tell them. Holliday is to decide whether it will be Leslie or Reed or both.

HTC ROMAINE
520

OPERATING MEMORANDUM

Subject Aircraft #26 and #30 Date March 9, 1961
4:50 p.m.

To: HRH

From: Raymond Holliday

1. Odlum recommends that HRH designate both #26 and #30, but in the event HRH will not do this, he recommends that an agreement be sought with TWA whereunder the designation of #26 be rescinded and #30 designated in lieu of #26 in order to give TWA the earliest possible deliveries.

2. Odlum advises HRH that HRH will make a serious mistake if he seeks to obtain an indemnity or waiver, either oral or written, in respect of the TWA law suit by using the last 20 TWA planes as a "quid pro quo" for such an indemnity or waiver.

3. Odlum states that it is his view that the TWA board of directors cannot recall the resolution ordering the investigation and that the best course of action to pursue is to offer the trustees and TWA some "sweetener" such as an option on the four 880s and some financing assistance and endeavor to have the investigation sufficiently thorough to prevent a derivitive suit, but cursory enough so that only a small amount of money would be involved. He states this type of suit can be compromised and settled by agreement of the parties, whereas a derivitive suit settlement would require the approval of a federal court, and further that compromise and settlement of this type of suit would provide insulation against the derivitive suit.

4. Holliday recommends that HRH call Odlum since our meeting of yesterday and discuss the over-all problem.

Exhibit D

5. Holliday also recommends that HRH consider the recommendation be made to Bautzer regarding Holcomb. Yesterday Holcomb stated to Montrose that he considered Slack's speech and conduct trecherous and unforgivable and that he was so damned mad he had to bite his tongue while Slack had the floor.

6. Holliday can perhaps give HRH more background information in this regard in a telephone conversation.

HUGHES TOOL COMPANY
3000 Romain Boulevard
Los Angeles, California

Attention: Mr. Howard Hughes
President

Gentlemen:

In past conversations and correspondence with your corporate management, we have endeavored to determine your intentions regarding purchase of spare equipment to support your order for thirteen Convair 990s and four remaining Convair 880s. Although thoroughly sympathetic and cooperative, your management have not been in a position at any time during the past year to commit to purchase of any engines, reversers or suppressors.

After rechecking with your management and General Dynamics and carefully reviewing various means of maintaining inventory of these items without excessive cost, we have determined that it is necessary to reallocate these items to spare parts and firm orders.

We regret this action will result in virtually no spare equipment being available at the time the aircraft are

ready for delivery. However, we thought it best to advise you.

Very truly yours,

/s/ R. L. STODDARD
R. L. Stoddard, Manager
Commercial Contracts

Transmitted to HRH in Memorandum No. 644.

(Letterhead of Atlas Corporation, New York 5, N. Y.)

AIR MAIL September 6, 1961

Re NORTHEAST AIRLINES, INC.

Mr. Howard R. Hughes,
7000 Romaine Street,
Los Angeles 38, California

Dear Mr. Hughes:

Since last writing to you on August 28, 1961 concerning Northeast Airlines, Inc., the following has developed:

(1) The insurance underwriters have advised us that the hull and liability coverage of Northeast will be cancelled on September 15th unless advance premiums aggregating about $530,000 are paid prior to that time.

(2) The secured creditors are temporarily foregoing payments of interest as well as principal, but have asked for another meeting in the middle of this month to review the situation. In other words, the secured creditors are not committed beyond September 15th and have advised Northeast that they expect some definitive proposal from Northeast concerning the cash situation as a condition of their continued forebearance.

The overdue trade debt of Northeast Airlines at the present time is about 4½ million dollars. On the basis

of past experience, October and November are the poorest months in the Florida air traffic market. It was with these facts in mind that I indicated in my letter to you of August 17th that 4 or 5 million dollars would be required to carry Northeast through until the beginning of the winter season, after which substantial profits can reasonably be expected. However, with the cooperation of the secured creditors, and assuming the trade debt can be held in line by substantial payments thereon, it is my belief—and that of Northeast's Treasurer—that $3,000,000 might be sufficient for this purpose.

350001

HTC ROMAINE

[fol. 1821] After discussing the matter with Mr. Holliday, I conferred with one of the senior officers of Manufacturers Trust Company as to whether Manufacturers Trust Company would be willing, assuming Hughes Tool Company desired so to do, to guarantee a loan of approximately 3 million dollars from the Trust Company to Northeast Airlines. I was advised today by the Trust Company that as a matter of principle it would be happy to do business with the Tool Company along the lines suggested, provided, of course, that sufficient financial data concerning the earnings, assets and liabilities of the Tool Company were made available to justify a normal commercial loan.

Since my last letter to you I have also been informed from sources in which I have complete confidence that the CAB would approve a transaction of the character above mentioned. As a matter of fact, Mr. Hughes, I have been informed from the same source that it appears quite likely that as an alternative to the collapse of Northeast Airlines, the Board would entertain favorably a proposal whereby the Hughes Tool Company acquired outright control of Northeast Airlines through purchase of the Atlas interests in the airline on condition, of course, that the Tool Company would provide Northeast Airlines with the necessary working capital to assure its financial integrity. Atlas Corporation would be willing to entertain such a proposal from you on fair terms as the best and the quickest means

of resolving a complicated and difficult situation for all concerned. It could well be that if this matter were presented soon enough, the question of the Atlas-Hughes Voting Trust could be resolved expeditiously and in a way which would terminate that problem favorably from a public standpoint.

I hope that you have had an opportunity to read the material I enclosed with my letter to you of August 28th because I believe this shows pretty conclusively that Northeast's future is assured if the immediate financial problems can be resolved.

Unfortunately, time is extremely critical. The insurance premiums are due eight days from today. Even if you were to provide a solution to the problem, it would still be necessary to present the matter to the CAB.

Since the Tool Company and yourself together have the largest stake in the Northeast/Atlas situation, bankruptcy or receivership of Northeast would probably have a greater impact on you—both directly and collaterally as it might affect your other interests—than on anyone else. On the positive side, it is my sincere belief that prompt and appropriate steps by the Tool Company could form the basis of a successful and rewarding venture.

Kindest regards.

Sincerely,

/s/ David Stretch

[fol. 1822] August 17, 1961

TO: MR. BILL GAY, ET AL.

In view of the critical and urgent nature of the attached letter to Mr. Hughes, I would appreciate your bringing this to his attention at the earliest possible time.

D. A. Stretch

Exhibit D

[fol. 1823]

(Letterhead of Atlas Corporation, New York 5, N. Y.)

AIR MAIL August 17, 1961

CONFIDENTIAL

Re Northeast Airlines, Inc.

Mr. Howard R. Hughes,
7000 Romaine Street,
Los Angeles, 38, California

Dear Mr. Hughes:

A copy of the TWA complaint in the New York Federal Court action was recently forwarded to me by Mr. Tillinghast. Since the conspiracy charges involving Atlas are prejudicial to the interests of both Atlas and Northeast Airlines and, as you well know, are completely without foundation, I called Mr. Tillinghast to request a meeting with him and Mr. Breech. The meeting was held at the New York office of TWA on August 15th and was attended by James Austin and myself for Northeast and by Messrs. Breech, Tillinghast, Leslie and Cocke for TWA.

At the meeting, I endeavoured to outline briefly facts which negated the existence of the alleged conspiracy. It quickly developed, however, that the TWA people were not interested in that discussion, Tillinghast saying that "this matter was in the hands of Counsel".

The meeting then proceeded to a discussion of merger of Northeast and TWA. Messrs. Breech and Tillinghast made it clear they were not interested. The stated reasons included the following:

(1) That TWA's cash position was not good and was likely to get worse.

(2) That under existing circumstances neither the TWA Board nor the banks or insurance companies could be expected to approve a merger which involved further problems.

Exhibit D

(3) That the principal officers of TWA were heavily involved in TWA's existing problems, including particularly the Hughes litigation, so that they had no time to devote to the matter of merger with Northeast.

568
HTC ROMAINE

[fol. 1824] (4) That merger negotiations would be difficult so long as Atlas and Northeast were involved in litigation with TWA.

As you know, Atlas and Northeast formally indicated a willingness to merge Northeast into TWA in June, 1960. For a period of over nine months thereafter, Northeast kept its offer open without any action on the part of the TWA Board. During this period, Northeast did not feel it was in a position to discuss merger with any other airline.

As I believe you are aware, Northeast's present financial condition is very critical and Atlas is not in a position to provide additional funds. In view of this and of the action of the TWA people, the possible alternatives open to Atlas, would seem to be:

(1) To sell its Northeast holdings to a third party on the best terms possible, or

(2) To negotiate a merger of Northeast with another carrier and as part thereof arrange for interim assistance.

I know of no prospective buyer of Atlas' holdings in Northeast. With respect to the second alternative I have had conversations with executives of several airlines since the CAB entered its order combining a merger investigation with the route case. Merger with one or two of these would not be likely to receive CAB approval, but one or two others would, I think, be feasible from the Board's point of view. Whether any of these would be in a position to help Northeast in the interim is, however, very doubtful.

In view of your substantial investment in both Atlas and Northeast, and your understanding of the airline in-

dustry in general and the Northeast potential in particular, I hope, Mr. Hughes, that you will agree it is in your interest to assist Northeast in this critical period. The figures indicate that something between $4,000,000 and $5,000,000 will be required to carry Northeast until the commencement of the winter season. With these additional funds and the earnings from the Florida business next winter, Northeast should thus be able to operate successfully through the period of the CAB hearings. I recognize that a further loan would no doubt require CAB approval but in view of the serious problems facing Northeast, I believe the Board would permit the loan to be made. Short of such help it appears that Northeast will not be able to meet its payroll after another thirty days. Obviously the consequences of bankruptcy or receivership of Northeast would be catastrophic both to it and to Atlas.

Despite Northeast's present condition, its growth in the
567
[fol. 1825] first six months of 1961 has been by far the largest of any carrier in the industry and it has now surpassed National Airlines in many of the markets to Florida. Information concerning Northeast's recent operations and its future prospects are set out in a memorandum dated July 17, 1961 from Mr. Lane (Northeast's Financial Vice President) to me, copies of which I delivered to Mr. Chester Davis at the end of July with the request that he forward a copy to you.

Kindest regards.

Sincerely,

/s/ David Stretch

OPERATING MEMORANDUM

Date May 8, 1961 (10:50 a.m.)

Subject: Four 880 documents. Opinion on the decision on the fabrics on the 13 600's.

To: Loomis, Robert (Per BG)

From: HRH

1. Bill Gay is to call Loomis and tell him that the documents on the four 880's are in the state of being completed in New York and will be sent out here as soon as the attorneys have finished with them. At the close of business last weekend they had finished them with the exception of 1-2 yet to be completed.

2. HRH wants Bill to ask Loomis if, in his opinion the colors and fabrics to be decided upon may conform to the American specifications in as much as American has put a lot of time, study and research into this problem. They no doubt have an intelligent answer to these problems and a very good set of specifications. This is not to be taken in any way as an indication that we have any thought of offering any of our planes to American because we definitely have no such intentions. The suggestion regarding the choice of materials is made only because it seems to me that since Burk probably will not come to San Diego and we are choosing another man, it seems to me that by all odds the quickest way to get all of these open issues resolved in a hurry is to simply follow American specifications in each instance. I would like until tomorrow morning before such a decision is made. In the meantime, I would like to know Loomis' reaction to this suggestion and I would like to know what he thinks American's reaction will be but I do not want the matter discussed with or made known to American yet.

Exhibit D

[fol. 1827] #71
CAB

HTC ROMAINE

520

OPERATING MEMORANDUM

Date 4-27-61 4:00 P.M.

Subject: Convair Contract

To: HRH from BG

Loomis reiterated that the offer he made on 4-1 in which he agreed to return the money that HTC put up as down payment on the 4 airplanes and absolve HTC of any further consequences as far as Convair is concerned, is still good. He said, however, that Convair does not have a buyer for the planes, and it would be their intention to offer them, and they are obligated, he considered, to offer them first to TWA, and that Convair would offer them to TWA at the same price that HTC had paid for them.

Regarding Bruce Burk and a contract representative for the 13—600's, Loomis said these decisions became more urgent every day and do affect both costs and delivery dates of the airplanes. He said that a decision must be made by tomorrow on the colors and fabrics for the interiors, and if HTC did not make the decision, it would be necessary for Loomis to make the decision himself in order for Convair to comply with the terms of the contract. He would like very much to be able to discuss the interior decision, plus the other decisions that are urgent, with you or, if you cannot, with your representative who you would have empowered to make the decision.

No. 13.

520

OPERATING MEMORANDUM

Date 3/9/61 6:00 a.m.

Subject: Aircraft #26 and #30.

To: Bill Gay

From: HRH.

Call Loomis and Bew this morning. Call Loomis at 6:50 a.m. and call Bew at 7:30 a.m. Give them the following message. The agreement HRH made with Loomis concerning indemnifying him with respect to the two airplanes absolutely holds good, that we have sent them a telegram (Assuming it was a telegram. It may have been a TWX) designating #26. We did this because we thought it was the first to come through, #26 on the eighth and #30 on the fifteenth. So we went ahead and gave the designation on #26.

We are in some negotiations with Mr. Breech and it would be very disadvantageous for us if we were forced to give the designation for #30 in addition right now. The rest of the week might see the end of these negotiations and we might be quite happy to give the designation on #30 in addition to #26.

Tell Loomis it is definitely our intention to resolve our negotiations with Breech prior to the time for delivery of the second of these two airplanes. We dont want to hold it up one minute. We, therefore, would appreciate it very much if Mr. Loomis would proceed with the completion and acceptance procedures with respect to both airplanes without delay. Relying upon the promise HRH gave to him in HRH's conversation with him about the 15th of February. Having the designation in writing for one of the two airplanes and being assured with respect to the other that we will, by the time it is ready, do one of the following two things: (a) designate it in writing for TWA, (b) take delivery for it and pay for it in cash.

With this understanding we would like to delay as long as possible the time when we must either designate the second

airplane or take delivery of it, yet, not in any way to retard the work, either on the ground or in the air which is being carried on with respect to either airplane and not to retard in any way the actual completion or delivery of either airplane. If, in order to accomplish this, it would be helpful for us to send Convair a telegram (it should be by the same means of communication as was used when we designated #26 yesterday) it would say "with respect to our telegram of 3/8/61 whereby reference is made therein to aircraft serial number 26, approval is hereby granted at your option for the substitution of aircraft serial number 30 in lieu of aircraft serial number 26".

With this thought Convair could go ahead and make delivery of whichever plane is completed first and thereby we could delay until the time when the second airplane is completed and ready for delivery, the designation with respect to that airplane. All of this would possible only

301385

[fol. 1829] if Mr. Loomis is willing to cooperate fully. Also you should call Bew and obtain his cooperation on this same program. I think Bill should tell both Loomis and Bew that we are not asking them to deceive anybody or conceal any information from anyone that is entitled to have it but, on the other hand, since we do not contemplate that this entire situation will continue more than probably the balance of this week and the week-end, the less said to anybody else, particularly TWA personnel, the happier weekend it will be for all of us.

If Loomis wants this message then whoever drafted the language of the telegram designating #26 yesterday should draft this message (HRH assumes it might have been Cook but Holliday dictated it to RC). The message should be brief and say in substance exactly what HRH has indicated above unless there are legal reasons for using additional language. Do not make any explanation in the message. If sent to Loomis by Chuck Price and if Loomis wants the message then it should be sent from Houston by Chuck Price. It is OK to identify the telegram by serial number or whatever way they might want to identify it but make sure it says the same thing and that it is for our benefit.

Henley

Transcript of Proceedings Before Special Master J. Lee Rankin, September 15, 1962

[Doc. 226]

[CAPTION] 61 Civ. 2324

[APPEARANCES]

• • • • •

[58] Mr. Davis: I don't know whether this will help to a better understanding of the way in which Mr. Hughes operates. I vividly recall the entire conversation, actually, that I had with Mr. Hughes as a result of this forgery contention. I remember his saying to me "What are they claiming I used a machine to sign my name and once in a while change it?"

I do know—I am not disclosing any particular trade secret—that the Hughes Tool Company has been [59] developing what I understand is a very interesting machine to in effect do the work of draftsmen and mechanical things.

Somebody puts in something, and this thing goes on and apparently saves a fantastic number of man-hours.

We know, it is not a matter of record, but I think enough has been indicated on the record and disclosed that Mr. Hughes does very little writing.

I have explained why the acknowledgment that was made was made as it was—because it was not physically possible to have Mr. Hughes refer to the document itself, as the California form normally contemplates.

So far as having another affidavit by Mr. Hughes, all that would have meant is that someone would have claimed "Sure there is another piece of paper by Mr. Hughes, but that is still a forgery."

Transcript of Proceedings Before Special Master J. Lee Rankin, September 15, 1962

It seems to me that the most effective way of putting an end to that was by having someone who knew Mr. Hughes say that it was not.

References to the memorandum, or whatever it is, annexed as part of Mr. Sonnett's current affidavit relating to what Mr. Hughes said or didn't say, [60] relating to this last financing, is to me quite understandable.

There is no question he resisted the insistence of the lending institutions to this voting trust, and that is a matter which is involved in this lawsuit as to the propriety of the existence—but for the purpose of this discussion we may assume that everything described in that memorandum in fact took place, and was not just a relatively normal reaction of an individual. How does that relate to a violation of the antitrust laws?

It was Mr. Hughes who made decisions, and not the corporate officers of TWA. Let us assume that. The question is somebody had to make decisions as to which aircraft is to be acquired and how it is to be financed. That is an internal corporate matter which is not within the ken of the jurisdiction of this Court.

• • • • •

[98] The Special Master: Do any other counsel wish to be heard?

Gentlemen, I am ready to rule on this matter. I have given careful consideration to all of the showings that the parties have made, the arguments, and for myself I am satisfied that there was authority for the service of the subpoena.

That the subpoena is binding upon Mr. Hughes, and as I construe the subpoena, it is binding upon Mr. Hughes to

appear on September 24, 1962, or in the alternative, as fixed by the Court at any other time that the Court lawfully orders Mr. Hughes to appear [99] in the courthouse at Los Angeles.

I feel that there is such a close connection between Mr. Hughes, as evidenced by some of the documents that I have seen, and the fact that he is the sole owner of the Hughes Tool Company, that the Hughes Tool Company is responsible for Mr. Hughes with regard to this subpoena, and its validity and whether it is an authorized act, and I advise and instruct counsel for the Hughes Tool Company to write Mr. Hughes and inform him about my construction of this subpoena, and that I will consider it an express waiver if he fails to communicate with the Court promptly and advise of any other construction of the subpoena, either as to its validity or when he should be required to appear, and if at any future time in this case Mr. Hughes should claim that the service of such subpoena was not authorized, not a valid instrument, not binding as I am construing it, I shall entertain a motion to strike the answer of the Hughes Tool Company and enter judgment against it in this proceeding.

It is very difficult for me to try to do equity to all the parties in this proceeding. Everyone claims he wants to be first.

I recognize what the Court has said about the [100] plaintiff TWA, and I am most anxious that it not be forgotten in all this dispute in our efforts to try to develop the facts in this proceeding.

For myself I think there have been conscientious efforts on the part of all counsel to try to forward these depositions in the proceedings to date.

Transcript of Proceedings Before Special Master J. Lee Rankin, September 15, 1962

I have been giving considerable study to the various seminars that have been held regarding this type of case, and the recommendations by courts and counsel concerning such matters, to try to find out ideas or suggestions that I might contribute to more quickly advancing this cause, and try to reduce or end the very large expense that I recognize is going on, as well as to try to see that justice is done in this case.

I feel there is an affirmative burden and duty upon the Court, and therefore upon the Special Master, to act, to try to help to reduce the extent and cost of discovery where it can be done, and to advance as rapidly as possible, even as complicated a case as this is, to the point when it can be tried and disposed of for all the parties.

I know this is not a problem that I have peculiarly had myself, because several counsel have [101] mentioned this around the time as bothering them—whether or not other procedures could be used that might help to advance this cause, and reduce its protracted nature.

I had thought that before we completed the testimony of Mr. Tillinghast, I would be informed about the ultimate facts that the plaintiff was relying upon to support the various allegations of its complaint, which are largely conclusions of law, but do conform to the requirements of the federal rules concerning such complaints.

I did not think that with the chief executive officer of the plaintiff being deposed, we would reach a point at the conclusion where I would not know the ultimate facts upon which the plaintiff was relying to establish those various allegations insofar as they had a bearing upon a violation of the antitrust laws.

But I did find that I was in that position. I think that has an important bearing upon what is equitable in asking testimony of principal witnesses of the defendant in this case, and when that should be required.

I therefore deny the application of the plaintiff, and each paragraph of it, because I have given [102] particular study about this matter, and what I could do to try to help to advance these proceedings, and regardless of whether on appeal my decision is upheld or reversed, and regardless of what conclusion I shall arrive at today, I want to suggest some action that I think should be taken in this proceeding.

For some time I have been thinking about our progress with this case, and I believe we are reaching a point where it will be expedited by Rule 16 and other procedures, under the rules, which I shall refer to hereafter.

I consider that we may profitably continue with the deposition of Mr. Rummel this next week, but at the close of our session on September 21st, I shall interrupt the sessions for the taking of depositions under Judge Metzner's prior order in this proceeding, of July 21st, as I recall it, until October 1, 1962, at 10:00 a.m.

I invite any and all counsel during the week of September 24th to apply to Judge Metzner for a pre-trial conference, and ask that he enter a pre-trial order in this case covering in his judgment and discretion the following:

1. Either that he hold hearings, and as a [103] result thereof enter a pre-trial order defining and limiting the legal and factual issues in this case as to the complaint and answer, or in the alternative, that he authorize and direct the Special Master to make a full and complete inquiry with

regard to such issues, and report to the Court with recommendations for the form and terms of such an order and the grounds and basis for any such recommendations.

2. That if the Court appoints and directs the Special Master to recommend such an order, that in addition to the authority granted to the Special Master under prior orders, he be authorized and directed to make the following inquiries of the plaintiff and the defendants regarding the complaint and answer, and concerning the counterclaims and answers to the counterclaims at some later date, but prior to the time depositions in defense of prosecution of the counterclaims are begun.

a. A statement by counsel for plaintiff, either orally or in writing at the option of the Special Master, of each and all ultimate facts and the witness or witnesses who they expect to testify thereto, as to each paragraph of the complaint.

b. Agreements or disagreements by defendants [104] with each of such claimed ultimate facts.

c. The same procedure to be followed as to each paragraph of the answer and later, as indicated, as to the counterclaims and the answers thereto.

d. Any proposed findings of fact that the Special Master may require from the parties, and comments on opposing parties findings.

e. Exploration in detail as to the extent that the facts may be stipulated by the parties and admissions of fact that can be obtained and the agreement to such stipula-

tions in writing and the definition of the precise areas of factual dispute.

f. Periodic reports to the Court by the Special Master of the progress being made with such responsibilities.

g. A right of review by the Court as to all recommendations of the Special Master and also as to any definitive orders or rulings under such a direction or by application of any of the Federal Rules by the Special Master.

h. Depositions to be interrupted pending completion of such authorized action and then resumed in accordance with the Court's prior orders after the pre-trial order is entered.

[105] Should no counsel make such an application, as suggested, to the Court by the close of the day on September 26, 1962, the Special Master shall approach Judge Metzner and request that he take such proposed action in order that this case be properly expedited.

Mr. Sonnett: May I inquire as to a point of clarification, Mr. Rankin? In that portion of your ruling where you found that there was authorization to accept the subpoena returnable the 24th, and that it was a valid service, am I correct in my assumption that you are not ruling upon the matter whether there was a forgery of the authorization, but rather that you base your ruling on other grounds in the record?

The Special Master: I am not making that ruling, because I feel that is before the Court, otherwise I would.

Mr. Sonnett: That is the point I wanted to clear on the record.

Transcript of Proceedings Before Special Master J. Lee Rankin, September 15, 1962

The Special Master: Are there any inquiries thus far?

Mr. Davis: Off the record.

(Discussion off the record.)

Mr. Sonnett: Further by way of clarification, and my own understanding, Mr. Rankin, I take it from [106] your ruling that you have not directed any alteration in the date of September 24th under the subpoena?

The Special Master: I meant to rule on that, that Mr. Hughes would not be required to appear on the 24th, but he would have to be held in readiness to appear whenever the Court would order him, should Judge Metzner order him to appear on the 24th, despite my ruling, or at any later date in the proper order as the Court may determine that he should be reached—either the Special Master or the Court.

In that regard, following the order of Judge Metzner of July 21st, but I read into that order a further position of Judge Metzner that should these depositions at any time be considered to be not progressing in such a way that they should be interrupted in order to permit TWA to proceed with its depositions, that power is inherent in the Special Master and the Court, and is expressly reserved.

• • • • •

[181] The Special Master: I will incorporate in my direction to counsel for the Hughes Tool Company the order that if Mr. Hughes does not accept the interpretation I place upon the subpoena, and the authority for service of that subpoena, and the requirement to produce documents under it, that he so inform the Special Master by Friday of next week.

Transcript of Proceedings Before Special Master J. Lee Rankin, September 15, 1962

I am imposing that responsibility for giving that notice upon counsel for the Hughes Tool Company, because I am piercing the corporate veil as to the Hughes Tool Company, and I am bringing what I hope is clear notice of very substantial sanctions, not against Mr. Hughes, but against the Hughes Tool Company, in case there should be at some later date a claim of lack of [182] authorization or failure to respond to the subpoena because of any such claims, either as to personal appearance when the Court would order, or as to the production of documents.

I am not directing that counsel obtain an answer from Mr. Hughes. If I don't receive one by Friday of next week, I have told you plainly, I hope, the construction I am placing upon the action in the failure to receive any, and the sanctions that are indicated as far as the Tool Company is concerned.

I do ask you to bear with me in giving that notice to Mr. Hughes, so there will be no question about his opportunity in view of his interests, both personally and in the Tool Company, to take exception to the interpretation placed by the Special Master on this matter, if he sees fit to do so.

[fol. 2011] [File endorsement omitted]

IN THE UNITED STATES DISTRICT COURT

SOUTHERN DISTRICT OF NEW YORK

61 Civ. 2324

TRANS WORLD AIRLINES, INC., Plaintiff,

vs.

HOWARD R. HUGHES, HUGHES TOOL COMPANY and RAYMOND M. HOLLIDAY, Defendants.

Before: Hon. Charles M. Metzner, District Judge.

Transcript of Proceedings—September 19, 1962

[fol. 2012] APPEARANCES:

Mr. Davis, Mrs. Lea, Mr. Cook, Mr. Cox, Mr. Sonnett, Mr. Bromley, Mr. Stewart, Mr. Kaminer, Mr. Hupper, Mr. Barr, Mr. Bradner, Mr. West, Mr. Harrell, Mr. Tenney.

The Court: Mr. Sonnett.

Mr. Sonnett: May it please the Court, if the Court doesn't hear me I wish to be advised that I practically lost my voice. I will do my best.

The basic position which I would like to advance to the Court today is that on the basis of the entire record to date the Court should direct that TWA may proceed with the deposition of Howard R. Hughes Monday in Los Angeles pursuant to the subpoena issued from that court and that should be done whether or not the depositions cur-[fol. 2013] rently being taken here continue or are suspended.

The special master has ruled, as your Honor has noted from the record, I am sure, that Hughes is bound personally by the adoption, authorization, ratification or whatever

it was that he did in respect of a personal appearance at some time. The question of the forgery we believe to be perpetrated and the attempted fraud on the court expressly has not been passed upon by the master, that being before your Honor.

The reasons why we think that TWA should be permitted to go forward now in respect of the Hughes deposition are that the depositions have been in progress since early this year. We have had a total, I believe, of nine pre-trial conferences with your Honor. This will be the tenth, according to my count, since this case was assigned to your Honor for all purposes.

Without attempting to review the prior history of any of those which your Honor certainly has clearly in mind, it was clear beyond any doubt in July at a hearing before you, as you observed at the time, your Honor, that Mr. Hughes [fol. 2014] was obviously ducking service. It was also represented at that time that Mr. Hughes was not represented by any counsel in this case and that is still the state of the record.

The statement was made before the special master at page 179 of Saturday's transcript, in which Mr. Davis stated, "I am not appearing as counsel for Mr. Hughes. Mr. Hughes personally is not subject to the jurisdiction of this court. I did state on the record before Judge Metzner that I have and am giving advice to Mr. Hughes with respect to him individually and like all counsel act as counsel for clients to the extent to which they consult me."

Your Honor will note the following discussion and at the bottom of page 180 Mr. Davis says, "I am not appearing in this action on behalf of Mr. Hughes."

What Mr. Rankin did rule on Saturday, as I understand his ruling, was that Hughes Tool Company would be required to produce Mr. Hughes at least as a managing agent at some date to be determined.

The Court: I don't gather that, Mr. Sonnett. Point to the record where Mr. Rankin found that Mr. Hughes should be produced as a managing agent.

Mr. Sonnett: At page 99 of the transcript—commencing at page 98, at the bottom:

Transcript of Pretrial Hearing, September 19, 1962

[fol. 2015] "The Special Master: That the subpoena is binding upon Mr. Hughes and as I construe the subpoena it is binding on Mr. Hughes to appear on September 24, 1962, or in the alternative as fixed by the court at any other time that the court lawfully orders Mr. Hughes to appear in the courthouse at Los Angeles. I feel that there is such a close connection between Mr. Hughes as evidenced by some of the documents that I have seen and the fact that he is a sole owner of Hughes Tool Company, that the Hughes Tool Company is responsible for Mr. Hughes with regard to this subpoena and its validity and whether it is authorized to act, and I advise and instruct counsel for Hughes Tool Company to write Mr. Hughes and inform him about my construction of this subpoena and that I will consider it an express waiver if he fails to communicate with the court promptly and advise of any other construction of the subpoena either as to its validity or when he should be required to appear and if at any future time in the case Mr. Hughes should claim the service of the subpoena is not authorized and not a valid instrument, not binding as I am construing it, I shall entertain a [fol. 2016] motion to strike the answer of Hughes Tool Company and enter a judgment against it in this proceeding."

In another place in the record, your Honor—I shall try to put my hand on it—the Special Master stated in substance that he was piercing the corporate veil in this connection.

The Court: I had a feeling from reading the record that the Special Master was not meeting your point on a request that he rule specifically that Mr. Hughes was a managing agent. I think you have to interpret that language rather than saying that language is a holding. He did duck your direct question and I don't consider that an answer, some forty pages later to be an answer.

Mr. Sonnett: I had in mind 181 of the transcript, in which the Special Master continued as follows:

"I will incorporate in my direction to counsel for Hughes Tool Company the order that if Mr. Hughes

does not accept the interpretation that I make as to the authority of the service of that subpoena and the requirement to produce documents under it, that he so inform the Special Master by Friday of next week. [fol. 2017] I am imposing this responsibility and giving notice to counsel for Hughes Tool Company because I am piercing the corporate veil as to Hughes Tool Company, applying what I hope is clear notice of every substantial sanctions, not against Mr. Hughes but against the Hughes Tool Company in case there should be at some later date a failure to respond to the subpoena."

Now, since your Honor has put it so clearly, I agree, I must say, that I think that what the Special Master said on this point does require some construction and I think probably that his language is a holding that Mr. Hughes is at least a managing agent of Hughes Tool Company in the sense that he ruled. But certainly he did not explicitly so state.

In any event, your Honor, in the light of the record before you, it seems to me evident that with all of the history of the efforts to find Mr. Hughes and serve him personally, with the, I believe, deliberate effort to conceal his whereabouts so that we couldn't serve him, with what I believe to be a deliberate campaign to frustrate the orders of the court in that regard which are clear and explicit, with what I still believe is established beyond doubt as a forgery and fraudulent authorization—and I would like to [fol. 2018] come to the attempted answer to that in a moment —and with the acceptance on September 6th without reservation of a subpoena calling for his appearance, that rather unusual procedure being acceptable to the marshal in California because he was supplied with the affidavit by Mr. Davis which said, "I have been authorized in writing by Howard R. Hughes to accept service on his behalf of a subpoena for his appearance as a witness on deposition in the above-entitled action."

It seems to me that in any event the action which was taken by Mr. Davis on September 6th and the action which is alleged to have been taken by Mr. Hughes on Septembe

11th, the so-called acknowedgment by the notary, perhaps as a matter of contract law, constitutes a ratification, and perhaps in that connection it may be binding. I don't know.

I do know that during the period from September 6th when Mr. Davis was out there for the purpose of attempting to render moot our application to strike their answer for failure to answer the interrogatories, there was ample time then to have submitted to Mr. Hughes the form, for example, of authorization that we had initially proposed which was clear, explicit, contemplated a proper form of [fol. 2019] acknowledgement and actual execution by Mr. Hughes, and so on.

Therefore I think, your Honor, that the present state of the record is unsatisfactory in the sense that putting aside for the moment the question of the date when Mr. Hughes appears or is supposed to appear, I am not clear what kind of a procedural morass we may get into if he doesn't show up.

I am not clear whether and just what would be involved in the Special Master's suggestion at that time that he would strike the answer of Hughes Tool Company and presumably direct the default judgment in our favor.

The Master apparently is proceeding on the assumption that he need not reach the question of the power of the court over the individual to require his appearance like any other individual under penalty of a citation for contempt, one of the powers the court has with respect to any individual who disobeys a judicial process.

I do think that your Honor's observation on September 6th was a correct one. The best proof of the pudding is in the eating. The best solution to this and the safest in order to avoid creating a situation of great ambiguity, is to see [fol. 2020] whether or not he will show up as directed on the 24th or whatever date your Honor directs he shall show up.

I think that that is the only way we can all be sure of the record, and if there should ever be need to apply sanctions the court is in a position to apply them.

On the question of the time as to when he should appear, in the original order which your Honor signed back in February it was contemplated that the entire deposition as

scheduled would be completed by now. I represent to your Honor that with diligence on the part of examining counsel it could have been.

I think that your Honor will find that in examining the record here there has been an illustration of delay, stalling tactics, in the depositions, and as recently, I might add, as last Thursday, we are in the process of having the second witness, Mr. Leslie, who has been on three days, and I think we barely scratched the surface, and for reasons of business convenience we agreed to have Rommel go in.

An examination of the Rommel record, I think, will satisfy your Honor that the examination has been conducted in such a way as to make it interminable if allowed to pro-
[fol. 2021] ceed. In point of fact, whenever the witness, despite Mr. Davis' best efforts to avoid this result, gets into something of real substance in the case, Mr. Davis backs away from it. Then when the Special Master seeks to have him deal with this, Mr. Davis asserts, and I believe correctly on this point, that if you please, he will conduct this the way he wants to whether the parties like it, or, indeed, even the court likes it.

That reference I have at hand here and if your Honor will take the time to note just what is happening in these depositions in an effort to delay and stall this matter, the witness Rommel, when asked a question by Mr. Davis as to whether the witness Rommel had ever been directed not to have contact with plane manufacturers he said yes. He said that it happened by personal direction of Howard Hughes to him in respect of Douglas Airplane, Electra Aircraft and Convair 990.

The minute Mr. Davis started to receive that answer he backed away from it and sought to avoid the subject and protest was made; there was a wrangle and more of the colloquy that fills up this record, so many pages of it, and Mr. Davis then announced to the Special Master that he
[fol. 2022] was going to do this his own way.

He stated at page 271 of the transcript, amongst other things, "Whether I do it"—that is, conduct the examination —"in a manner which is satisfactory or pleasing to either Mr. Williams or other counsel here or may I suggest even to the court, at this stage of the proceedings, I am entitled

to my discovery proceeding as I think is best designed to develop the facts in a manner which I can understand."

Now, the Tillinghast deposition dragged out interminably. When it is realized that Mr. Tillinghast was president of TWA for only a few short months when this case was filed, and when it is recognized how many, many weeks were taken on this deposition, it seems to me that it is a clear case there of delay beyond all reasonable bounds.

Your Honor will recall that in an effort to deal with that we had some pre-trial conferences and we urged that the only sure cure for this was a program of alternating or concurrent depositions. Your Honor directed at one point Mr. Davis should suspend his efforts to examine in either of the so-called counterclaim and get the case moving forward, and several times we have stated that we wished that the case would progress more rapidly, and indeed it [fol. 2023] should because the financial problems continue and the problem of a trial date is a very important matter to this airline.

At this rate, if we were just to forecast the rate of progress based on what happened to date in the deposition program, Mr. Davis would be at this for another year or two beyond a doubt.

I think that when the Hughes Tool Company initially represented that a deposition program, by the submission of dates they contemplated a couple of weeks for witnesses and so on, and it was possible that they were perhaps a little optimistic.

On the other hand, what they have done far exceeds any representation that they ever made to the court in any way about the length of time they would need.

I think that the needs of TWA to prepare its discovery, particularly in respect to Howard R. Hughes, is acute. Hughes, as your Honor will see from the record before you, is the one man who knows the whole story.

Annexed to our papers are extracts from his call messages, his directions to people as to how to do this and how to do that, both before and after December of 1960, that [fol. 2024] same exercise of absence of dominion and control in respect of aircraft that characterized the situation for years.

He is the one who knows best the extent to which the motivations for what we think are plain violations of law, were tax motivations. I think that when we take his deposition we could decide at the end of that whether TWA is going to need another twelve witnesses or another two witnesses or maybe no witnesses before it would be ready to ask your Honor to fix a trial date.

We have had Noah Dearick, for many years the chief lieutenant of Mr. Hughes. Dearick is around seventy. I don't know how much longer—nobody knows how much longer Mr. Dearick is going to be around.

Take Mr. Hughes himself. I know nothing about this man's health except what I read in the public press, but I think that the failure to have his evidence as a matter of record for use in this case would be a tragedy.

So, your Honor, it seems to me that consistent with the history of the case, the amount of time that you have allowed them, the approach by Rule 4 of concurrent depositions, the fact that they can do concurrent depositions—[fol. 2025] they have very distinguished counsel in addition to Mr. Davis—they have Mr. Cook recently take a deposition—it seems to me that the only way to really move the case along is a program of concurrent depositions.

I therefore strongly urge your Honor to consider that and to direct it before the evidence escapes us for all time, perhaps: To get it reduced to question-and-answer form under oath.

I don't believe that on the forgery aspect, unless your Honor has any question, that I need to go beyond what is in my reply affidavit which I filed with the court Monday.

I submit to your Honor that nowhere has anyone asserted yet, hearsay or otherwise, that Howard Hughes personally signed the document which is said to be an authorization.

The Court: How do you interpret those words that were used in Anderson's affidavit of acknowledgement, in which he says, "Said Howard R. Hughes further acknowledged to me that he confirms such authorization to Mr. Davis in a writing to me as follows:"?

Mr. Sonnett: I interpret that with particular reference to the background which resulted in document of so-called [fol. 2026] acknowledgement coming into being, your Honor

will find the Davis affidavit, Mr. Davis asked California counsel to get the California statutory form of acknowledgement of Mr. Hughes and have him execute it.

He went out there and there was a formal acknowledgement, but it is not the statutory form. There is a big difference. The California statutory form requires an oath as to personal execution of the document. That is conspicuously missing. All that we have here is that having been caught at it Mr. Hughes is willing to, by this acknowledgement procedure, try to make it look good and adopt it.

The Court: Suppose he did adopt it. You say that this doesn't even go that far?

Mr. Sonnett: I would be prepared, your Honor, to concede that if in fact he appeared before a notary public and if in fact he made the oath which it is stated he made, if that be the fact, that probably is some kind of a ratification under some principles of contract law. But I know of no way that the process of the United States District Court can be treated in that fashion.

In the first place, as your Honor well knows, the rule in [fol. 2027] respect of service of subpoenaes, requires personal service. Therefore my initial suggestion, when much was sought to be made out of a desire to avoid embarrassing Mr. Hughes, my initial suggestion was that of his intermediates, Mr. Glen or anybody serve him personally with the subpoena and make an affidavit of service, and I would take that. They didn't see fit to do that.

That is the very first thing I suggested, trying to avoid any embarrassment. I am not interested in embarrassing this man.

The Court: You are getting away from my question. If you were in negotiation with Mr. Bormley who represented a client on the other side looking toward the settlement of a lawsuit and you wrote a letter to Judge Bromley stating that my client has confirmed to me in writing the following settlement, what do you think Judge Bromley would think if he received such a communication? Wouldn't he think that your client signed such a document?

Mr. Sonnett: I think if those were all the facts he might well, but that is not our case. If your Honor will go back briefly on the chronology, what we find on July 12th, you

[fol. 2028] directed that interrogatories be answered. You observed, and entirely correctly, at that time that it appeared that Mr. Hughes was ducking service, and he was.

Then we find that we were back again before your Honor on July 26th in connection with an extension of time being sought by the Hughes Tool Company to answer the interrogatories.

Meanwhile apparently Mr. Davis has sent out to Mr. Hughes a form of authorization designed by Mr. Davis but never shown to us that was dated in late June. Mr. Hughes had, according to Mr. Davis—he got that form and that form was the one that tried to import into the authorization a condition that Mr. Hughes after all would be willing to appear or accept service to appear provided he was guaranteed in fact his turn at bat wouldn't come for a year while Mr. Davis took a lot of depositions. However, Mr. Hughes did not sign the Davis form.

Whoever prepared it, and I don't know who did, and whoever signed it, and I don't know, except I know it wasn't Mr. Hughes, they got a little bit of a form without a date on it, and at some point that little bit of a form was the one sent to your Honor and your Honor returned it because your Honor had questions about it, and when you returned [fol. 2029] it with a letter to counsel you stated that you expected that counsel would comply with the court's order to answer the interrogatories on August 27th.

Now, what happened? There wasn't any effort to comply with the court's order whatsoever. Instead, after we moved to strike the answer for wilful default—and I think it was wilful and aggravating—Mr. Davis hopped on a plane and rushed out there with the idea of having the deputy marshal at 7:15 a.m., California time, accept these representations so Mr. Davis can accept the subpoena and then report to you that our motion was moot because there was service?

Why the 7:15? Well, of course that strategy was that we were before your Honor at eleven-thirty that day.

The Court: You didn't state it correctly. 7:15 is 10:15 here, fifteen minutes before you walked into the courtroom.

Mr. Sonnett: Yes, your Honor, but I think Mr. Davis had a little bit of time to palaver with the marshal before the marshal agreed to accept the affidavit.

I have the return and the affidavit, a certified copy, and [fol. 2030] that is the strategy. The strategy was not to answer the interrogatories which you had twice directed be answered and then, B, to ram down the court's throat and ours the form of authorization unsatisfactory certainly to us and presumably to the court as to form.

And then counsel making that good by getting the marshal to take it and at no time between September 6th and September 11th when this so-called acknowledgement was done —at no time did Mr. Davis get a-hold of Mr. Hughes while he was in Los Angeles and ever say, "Look here, this thing is getting difficult. Sign this form and acknowledge it in regular statutory form and swear that you signed it."

He didn't do that.

What happened was after we found the forgery he decided this is serious enough for him to consent to notice it and he would therefore go through some ceremonial before a notary public and we still don't have his signature on anything. I submit to your Honor that it was a calculated program of frustration in regard to the orders of the court. I don't think that Mr. Hughes or anybody else ought to be allowed to do this, and I think that that is [fol. 2031] exactly what was done.

The Court: That still doesn't mean, by the use of the words "confirmed in writing" that Mr. Hughes is not saying that he signed that document, and I could also point out, Mr. Sonnett, when you related the background leading up to this, that you left out a preface which is that the Special Master said that there were alternative roads to follow, either Mr. Davis was to produce an authorization for him to accept service of a witness subpoena or he would direct that Hughes Tool Company answer certain interrogatories.

We have reached the point when that authorization was not forthcoming. We then had the motion before the Special Master for interrogatories and, as I recall, an appeal was taken by Mr. Davis from the Special Master's ruling on interrogatories.

So I was proceeding on the same basis the Special Master was, that these interrogatories would be answered by the date fixed unless an authorization was produced. So with

that background, then you can go into what you have already said.

Mr. Sonnett: There is one additional element, your Honor, and that is at the beginning of this I raised the question of the uncertainty we might get into by any such [fol. 2032] procedures as those being discussed and the net of it all was the Special Master's direction that any authorization would be personally signed by Howard R. Hughes.

The Court: Mr. Hughes says, confirms that he made such authorization.

Mr. Sonnett: But it came only after proof of forgery and while that may have been enough to bind him in some—

The Court: Do you come forward with proof that a signature is actually your signature unless it has been challenged? Don't you sign things and everybody assumes it is your signature?

Mr. Sonnett: That proof has not been submitted to your Honor.

The Court: We come back to what the words mean, this acknowledgement that Mr. Hughes confirmed in writing. I assume if you used such language as I indicated before in the supposition, you and Judge Bromley were negotiating a settlement of a case in which you were adversary counsel, that if you wrote to Judge Bromley: "I have in my hand the proposal for settlement of the case confirmed in writing by my client," that Judge Bromley and you would understand [fol. 2033] that to mean that your client had signed such a document. I think that is the common understanding of those words, certainly in the legal profession.

Mr. Sonnett: It is not an understanding of an acknowledgement required, nor the words of acknowledgement required by statute.

The Court: You are going to the question that Mr. Davis represented that he was being extra careful in making sure that they comply with the California statute when in fact they did not. That is something different. We are talking about the common understanding of the words "confirmed in writing," which is what this notary public says that Howard Hughes told him.

Mr. Sonnett: Then I think the words are not quite that clear. There is ambiguity and I think that the record establishes that this piece of paper wasn't drafted by Mr. Hughes. It was drafted by California counsel, who are familiar with the California form, and therefore knew this was a departure from the California form.

The Court: I understand that, Mr. Sonnett. Let us go on to something else.

Mr. Sonnett: I just want to make the point that the [fol. 2034] acknowledgement says that Mr. Hughes further acknowledged to me that he had confirmed such authorization to Mr. Davis in a writing, reading as follows. It doesn't say that it was a writing by him. It would have been very simple to say in a writing which I signed. It doesn't say that. It doesn't say that at all and I think this ambiguity in this is deliberate.

The Court: I will ask that question of Mr. Davis when he gets up.

Mr. Sonnett: So much on the forgery side, and what I regard, your Honor, as a wilful attempt to obstruct the orders of the court.

I think, however, regardless of that, and if the question had never arisen, I think the necessity for TWA to commence its discovery is real and acute.

The Court: What about the suggestion of the Special Master on page 102 of the transcript regarding a Rule 16 definition of issues at this time?

Mr. Sonnett: I think that the suggestion is an excellent one at the right time. I think at this time it would be idiotic.

The Court: Why?

Mr. Sonnett: Because it is impossible, your Honor, it [fol. 2035] seems to me; when we look at the pleadings you will see every allegation of consequence in this complaint substantively is denied by Hughes Tool Company. Any attempt to limit issues is going to produce only weeks and weeks of interminable conversation instead of discovery.

In the second place, I know who some of our witnesses are. I don't know how many there will be. I don't know how many more I am going to need. It may be that after the deposition of Howard Hughes I will put down Hughes will be our witness on ninety-nine per cent of the complaint.

The Court: Aren't you in a position to formulate the ultimate facts for a pre-trial order as contemplated?

Mr. Sonnett: I think we can formulate as far as they can meaningfully at this stage of the case by the denials of the allegations in the complaint. These are allegations are factual, but the issues are clearly drawn there. The question of how much, if any, of those defendants would be willing to stipulate is something that will lead us down the garden path for many, many months.

I am prepared and will be prepared happily to join in [fol. 2036] a pre-trial application, a hearing by your Honor or the Special Master after we have had some discovery. I don't know how much discovery we are going to need. Maybe Mr. Hughes will be enough, maybe he won't be. I can't tell.

I can't emphasize too strongly that he is the one human being that the record plainly demonstrates who does know the whole story. He is the one who pulled the strings.

That is all I have.

The Court: Mr. Davis.

Mr. Davis: Your Honor, I understand that at the request of Mr. Sonnett a transcript of the proceedings before the Special Master was sent to you. Since these arguments are fairly voluminous and a burden on the Court, I have an extract which contains merely the decisions of the Special Master, and if it would assist the Court, I have—

The Court: I have it.

Mr. Davis: What has been going on in this case since this complaint was filed under seal is best described by the remarks of Judge Dawson apparently in a situation which I would have recognized as this one, although it is not [fol. 2037] identified. I found it in the 1958 Stanford University—a statement by Judge Dawson:

> "When the complaint was filed the plaintiffs served notices for the taking of depositions of numerous officers of numerous defendants and for the discovery of books and records of the defendants. There was no way to determine the proper scope of depositions as to respective defendants or how much of the discovery

sought was for legitimate trial purposes or how much was merely for the purpose of making life miserable for the defendants in order to coerce a settlement. To allow such a complaint to stand would have added to the delay and congestion of the court by requiring continuous hearings on the scope of depositions and the proper limitation on discovery. The obvious thing to do was to require the plaintiffs to clarify the issues by stating specifically the nature of the complaint of each plaintiff against each defendant."

Let me say, your Honor, that just as soon as I find the time and certainly before next week, we do intend to submit to your Honor an application in accordance with the suggestion of the Special Master.

[fol. 2038] Now first let me address myself to the constant efforts which have been made by the plaintiff TWA through its counsel to set aside or frustrate the decisions of this court with respect to the priority which was granted to the defendants in effect first by Judge Murphy and denying their application, and specifically by Judge Herlands, more specifically by your Honor when you had occasion to reconsider the matter after we filed our answer and counterclaims and when at the same time you also granted partial discovery relief to the plaintiffs by requiring the defendants to produce all documents in their possession relating to or as called for by the various schedules.

If there have been nine or ten meetings with your Honor in this case—and I don't know how many we have had—I believe that all of them were related to an effort made by the plaintiff to take the deposition of Mr. Hughes out of turn.

The situation in this case—and frankly the basis of the arguments which we had occasion to present before—we never had an opportunity to present fully to your Honor because it was always a decided question, we have a rather unusual situation here.

First of all, the jurisdiction of this court over the subject [fol. 2039] matter of the action is dependent upon the existence of facts tending to indicate that there is a question

to be decided, as to whether or not the conduct of the defendant was in violation of the anti-trust laws.

That is the only basis for the jurisdiction of this court over the subject matter.

The complaint complies with the concept of noticed pleadings and does assert violation of the anti-trust laws—There is no question about that—by conclusions of law, by reference to the statute and by statements that you can find in decided cases but wholly unrelated to identifying the specific count, the occasions, the events, the manner how the defendants are supposed to have violated the anti-trust laws.

In most anti-trust cases, even noticed pleadings do give the defendants some idea as to what it is about, what the plaintiff is complaining about, the distribution system that the defendant has, the acquisition of a competitor and without perhaps knowing all the evidentiary details to support the complaint, in a normal anti-trust action the defendant does know or should know if he is honest, what this is all about.

[fol. 2040] In this situation when TWA is suing its seventy-eight per cent stockholder to require divestiture by the stockholder, we find it more complicated by the fact that the very acquisition was approved by the CAB not only once but—

The Court: Mr. Davis, I hate to interrupt you but you have given me that four times now. I know it by heart.

The question is whether Mr. Hughes should be deposed on September 24th or not.

Mr. Davis: In that connection we come to the conclusion, unusual as it may seem, that notwithstanding the lengthy deposition of Mr. Tillinghast when he was given repeated opportunities to describe or identify what it is the plaintiff claims took place, the conduct which is alleged to have occurred in violation of the anti-trust laws and outside the scope of the CAB authority, not only was I unable to find out what that was but I refer you to the statement made by the Special Master who listened and supervised the deposition of Mr. Tillinghast, to the conclusion of the Special Master which you find at page 101, where Mr. Rankin said:

Transcript of Pretrial Hearing, September 19, 1962

"I had thought before we completed the testimony of [fol. 2041] Mr. Tillinghast I would be informed about the ultimate facts that the plaintiff was relying upon to support the various allegations of his complaint which are largely conclusions of law but do conform to the requirement of the Federal Rules concerning such complaints. I did not think that with the chief executive officer of the plaintiff being deposed we would reach a point at the conclusion where I would not know the ultimate facts upon which the plaintiff was relying to establish those various allegations in so far as they had a bearing upon the violation of the anti-trust laws but I did find that I was in that position."

And that is the position of the defendant, and quite apart from any obligation that the Court may have to satisfy itself in some manner that it has probable jurisdiction over the subject matter of this action I humbly state that any principle of justice requires that a defendant be aware, be informed in some way as to what it is he is being charged with before he is required to testify.

The position and efforts that the tool company has been making ever since the complaint was filed have been to [fol. 2042] dismiss because the facts do not exist which support the jurisdiction of this court.

What has been developing is that Mr. Hughes, because of a deep personal interest in aviation and because through the tool company he was a seventy-eight per cent stockholder of TWA, he did take an active part or interest in the specifications of the aircraft being acquired, the type of aircraft to be acquired. Whether or not decisions by TWA with respect to the acquisition of aircraft or its financing should be made by a corporate officer or by a seventy-eight per cent stockholder may be a question that could be raised in some forum which has jurisdiction over those kind of actions, not here.

The Court: We have it here in a diversity action of minority stockholders.

Mr. Davis: There are none here.

The Court: It could happen.

Mr. Davis: I meant in this action, if these are the facts they are talking about.

In spite of the portions that Mr. Sonnett referred to in the record, Mr. Rommel has testified quite clearly that Mr. Hughes actively promoted competition amongst these vari- [fol. 2043] ous manufacturers. This blind answer that I got, which I have been exploring ever since, was that it is true as Mr. Rommel eventually testified to without any prompting on my part, that Mr. Hughes, who was anxious to get as much of a competitive jump against his competitors in the airline industry, when they were working on developments or the possibility of procuring advanced aircraft, he wanted secrecy maintained and then he did not want anyone to even discuss anything with a particular manufacturer.

But the record is replete with evidence that Mr. Hughes and the tool company throughout this entire period first of all was promoting competition amongst the manufacturers, doing everything that he could to maintain a competitive position of TWA.

However that may be, my position basically is that until such time as we do find out what the nature of the claim is which is being asserted by the plaintiff, and how the exemption under the Federal Aviation Act is not applicable, we are not ready to be disposed irrespective of any other consideration.

I am not going to refer, because I am sure that your Honor is more familiar than I am with the deep thought and study which has been given in various seminars by [fol. 2044] judges of this district as well as elsewhere, that it is desirable in the so-called big case that that be done, that plaintiff when they applied to Judge Ryan for assignment of this case to your Honor—

[fol. 2045] The Court: You agree with them, don't you?

Mr. Davis: No, your Honor. I think the case will be disposed of very quickly.

The Court: It seems that anybody who would enter a counterclaim for $365,000,000 must think it is a big case.

Mr. Davis: At that time we didn't have an answer in. In those seminars it is perfectly clear that the consensus of opinion of all concerned is that under noticed pleadings,

even before discovery proceedings of any kind are to be entered into it ought to be developed what the contentions of the parties are. Judge Ryan tried that but counsel for plaintiff in one way or another avoided the opportunity. When he tried that, I believe that is my affidavit, I do recall qute clearly Judge Ryan suggesting to counsel for plaintiff to prepare some kind of statement, he suggested the same thing to me.

Of course I said I can't prepare a statement as to what our position is, what facts we claim until I understand the claim. Otherwise it is going to be an exercise of how much imagination I am capable of.

[fol. 2046] Well, we never succeeded in that matter. I thought at one time that through my motion to dismiss if there had been a requirement that answering affidavits be filed, and whether or not the matter came on for decision, that would force at least some kind of an issue.

The Court: Under our rules, under a motion to dismiss if affidavits are used the Court may consider that as a motion for summary judgment under Rule 56 and require the other side to answer. But as I pointed out to you at this stage of the game this Court guided by the Court of Appeals, thought that motions of this type should not be granted in this type of case at this stage.

Mr. Davis: That is correct, your Honor. Every once in a while we have a situation which I honestly believe exists here that this complaint was drawn without anybody having any facts whatsoever.

I think quite frankly I originally started out with the thought if I depose Mr. Tillinghast, even though had not lived through the period when this alleged misconduct took place, but he was chief executive officer, he decided to file [fol. 2047] the complaint, that the very least we would get out of him is a description or identification of contentions and that is where both I and the Special Master have been disappointed.

Therefore, I quite concur with the views expressed by the Special Master since that has happened, the desirable thing to do now, although I must say parenthetically if I had a little more time to complete the deposition of Mr. Rommel, I don't believe I will be able to complete it in two more

days, I only had about six days, I think I could affirmatively establish facts that negate the possible existence of a violation of the antitrust laws but admittedly it is doing it the hard way.

The Court: Let me ask you this question, Mr. Davis:

You set up a schedule which I think was originally submitted either to Judge Murphy or Judge Herlands before the case was submitted to me for all purposes. You have indicated subsequently before me that that was merely a tentative list and by the date set forth in that list you didn't intend to tie yourself down as to the number of days it would be necessary to take for each witness.

[fol. 2048] Now, if it was even a tentative list as to Mr. Tillinghast it was so tentative as to be practically nonexistent, it meant nothing.

You have now completed Mr. Tillinghast and as I understand you have Leslie and Rommel in some stages of examination.

How many more people do you have and how many more days are you going to need to complete that deposition?

Mr. Davis: Your Honor, may I respectfully refresh your recollection a little more accurately than the way I understand your statement to be?

This schedule so-called was nothing but a tabulation of notices for the taking of depositions which I had made.

The Court: Mr. Davis, I will accept whatever corrections you want to make about my recollection. I want to know about the future.

Mr. Davis: Then let me also say I have not finished with Mr. Tillinghast, I stopped because I was directed by the Court to stop.

The Court: You are finished with Mr. Tillinghast as far as his deposition on your part is concerned. You may be [fol. 2049] able to come back after the plaintiff has had an opportunity for a deposition but as far as your deposition is concerned of the plaintiff, you are finished with Mr. Tillinghast.

Now, I want to know how many more days do you need for the other persons who were noticed?

Mr. Davis: Well, your Honor, without any knowledge of what the answers are that I am going to get it is difficult

to estimate the amount of time except it will be considerable.

The Court: What do you mean by considerable?

Mr. Davis: Let me put it this way, I don't know what the issue is yet.

The Court: You know what questions you are going to ask.

Mr. Davis: I do not.

The Court: You haven't got a general area of inquiry before you go into your deposition?

Mr. Davis: If I could do it from 1939 to date and cover all conceivable events which might have occurred, which have a bearing on the alleged violation of the antitrust laws, it is going to take a long time.

If, however, we do proceed with the suggestion of Mr. Rankin about compelling the plaintiff to identify what it [fol. 2050] is that they claim took place and more particularly who do they know who has any information with respect to what they claim took place, then I assure your Honor I will be able to dispose of those witnesses, to establish the full facts in a very short period of time.

I could then be asked I think, fairly asked the question how long do I expect to take to examine such persons in those areas. It may be that a lot of people that I have noticed are not necessary. The problem that we have, your Honor, is simply of trying to find out what it is—the only person who knows is the plaintiff—I don't know what it is they claim we have done in derogation of CAB orders. I don't know what they claim that we have done or what course of conduct we engaged in.

In one of the allegations of the complaint they said we boycotted some manufacturers. I asked that question of Mr. Leslie, if he ever heard of that.

"No, I never heard of it."

I examined Mr. Rommel and find that the TWA, the defendant dealt with every conceivable manufacturer of aircraft in the United States and abroad. So I don't know what the boycott contention is.

[fol. 2051] I think the solution suggested by Mr. Rankin is the only one, that is recognized by every seminar that I am familiar with and what he is in effect saying now, that

we finished with Mr. Tillinghast, we haven't found out what plaintiff is claiming as result of that examination, strange as that may seem to be, and I gave the man every opportunity to tell me whatever he knew or heard of. That is the man who had access to all the officers of TWA. If he doesn't know and won't make the effort to try to find out, who is going to tell me what it is they claim?

Counsel is supposed to make an investigation but I can't examine them under the attorney-client privilege.

Mr. Rankin says in fact if we don't do it he will, let us require the plaintiff to identify what it is they claim. Then several things will happen.

First of all, you will be able to determine whether or not there is a basis for the Court assuming jurisdiction over the subject matter. I don't think that is conferred merely by the filing of a piece of paper. But it is questioned and it seems to me we will have that much more.

Then it seems to me we will now have an identify of [fol. 2052] what area needs to be explored. At that time I will be in a position to answer your question as to how many witnesses I need and if any and how much time.

My strong belief is when plaintiff is forced to do that, there ain't going to be any more lawsuit because there are no facts that he can state and identify.

The Court: You may be able to get past a motion for a dismissal in this court and still not have a lawsuit.

Mr. Davis: I have a counterclaim.

The Court: We haven't reached your $365 million claim. We are dealing with the small $150 million problem now.

In other words, you tell me as of now you have no way of knowing how many more days you will have to conduct your depositions?

Mr. Davis: I cannot make an intelligent estimate that would be informative to the Court absent a disclosure by TWA of the facts or ultimate facts or circumstances or events which they claim constitute a violation of the antitrust laws; that is correct, your Honor.

[fol. 2053] The only information I got out of Mr. Tillinghast was that as to what he claims was a willful and malicious conduct, he referred documents and that issue is ready to be decided by the Court.

The Court: Don't sit down, I am not finished. On pages 99 and 181, the Special Master directed you to advise Mr. Hughes of certain facts. Have you done that?

Mr. Davis: Yes, your Honor. I wrote a letter on Monday and enclosed the pages of the decision of the Special Master and particularly called attention to the fact that if anyone had or if he had any different interpretation he was to advise the Court by Friday.

The Court: I understand if he doesn't so advise the Court, if he doesn't show up there there will be a default entered against Hughes Tool Company. You sent him certain pages. Did you send him page 99 and 181?

Mr. Davis: Maybe I misunderstood the statement. There is no default on Friday.

The Court: On page 99 and 181 the Special Master indicated certain action that you should take with regard to notifying Mr. Hughes, the Special Master's views regard-
[fol. 2054] ing the subpoena.

Mr. Davis: That has been forwarded to Mr. Hughes.

The Court: And that if Mr. Hughes fails to advise the Special Master or the Court by this Friday that he so understands that there will be a waiver, right?

Mr. Davis: That is right.

The Court: And a default judgment would be entered against the Tool Company for $150 million.

Mr. Davis: Not unless he failed to appear when called. That is the only thing I was misunderstanding, I thought you were saying that there would be a default judgment this Friday.

The Court: Now let us get to the forgery question.

Tell me, Mr. Davis, if Mr. Hughes left his home and had gone out before a notary public and took the time to go through this acknowledgment, wouldn't it have taken less time on his part merely to have signed an affidavit to those facts before the notary public and have furnished another sample of his signature for the Court to peruse in connection with this signature affixed to the authorization?

[fol. 2055] Mr. Davis: Let me explain the problem.

The Court: Excuse me just so that the reporter has my sentence.

And to be used to refute the affidavit of Mr. Appel attached to Mr. Sonnett's affidavit submitted to the Court on September 6?

Mr. Davis: The answer is this, your Honor:

When Mr. Hughes called me on Monday at my request he asked me if I wanted him to—what he was going to do was write a letter in his own handwriting and put a half dozen samples of his signatures for all to look at, what do they think I use a machine to sign with or something of the sort. I told him no, I was afraid if he did that all I would be doing would be raising another issue of fact as to whether the second signature was a forgery or not a forgery.

The Court: What did you gain by a notary public's acknowledgment as opposed to an affidavit sworn to before such a notary public?

Mr. Davis: The process I went through was simply this, I wanted to have—let me first say this:

As Mr. Sonnett keeps on saying, trying to keep on the facts, it is a ratification rather than the very document [fol. 2056] which I filed in this court, that is authentic. As far as that issue, there is no question of getting a new authorization, this was my problem of having an acknowledgment with respect to the piece of paper which I had filed. That piece of paper was in my possession, not in California; it was here.

When I was in California to accept service, I came right back because of things I had to do here. When I discussed with California counsel the problem of having an acknowledgment of his signature on a piece of paper that was not physically there for the affiant to say "Yes, this is it."

If we assume contrary to fact that the paper was actually a forgery, how could Mr. Hughes know about it? If you assume Mr. Hughes could know about it it precludes the concept of forgery.

What I told California counsel was to prepare something conforming as closely as possible to the statutory form of acknowledgment in California and to refer to and identify the piece of paper which I received, sign the piece of paper, it could not be there and the man in the usual form says, "I acknowledge the signature on this piece of paper as mine." [fol. 2057] That is what took place.

It seems to me what took place is as clearcut—not a ratification, your Honor, but a confirmation that the authorization that I received was an authorization by Mr. Hughes from Mr. Hughes and that is the only question that was ever before the Court because as the record is quite clear the Special Master did give an alternative which was that either the Tool Company was to answer interrogatories or there be filed by the time those interrogatories were to be answered a writing by Mr. Hughes.

Now, either the writing that I furnished was a writing by Mr. Hughes and before the interrogatories were required to be answered or I got an authorization subsequent to that date.

So far as I was technically concerned, I am not interested in new authority, a new signature. The one important thing was whether or not the paper I received was in fact a paper from Mr. Hughes confirming in writing the authority I asked for. There was no question in my mind, I knew Mr. Hughes was aware of the writing he was receiving because we exchanged communications with respect to it.

The Court: Your affidavit says you spoke to him on [fol. 2058] September 11.

Mr. Davis: Prior to that time, your Honor. My affidavit was prior.

The Court: Did you speak to Mr. Hughes prior to September 11?

Mr. Davis: I did not have a telephone conversation with Mr. Hughes but I was exchanging communications with Mr. Hughes.

The Court: You mean by the central office?

Mr. Davis: Not through that central office, through someone.

The Court: You have no direct telephone conversation at all?

Mr. Davis: That is right but from questions being asked and his wanting to know why it had to be in writing, I knew Mr. Hughes, through the channel I was using to communicate with him ever since I have been in the case, he was aware of my request of why I needed the confirmation

in writing. There is no question about it that this was an authorization by Mr. Hughes, a confirmation in writing. I am not interested in what means he uses to sign or who he uses to sign. I am only interested in something which is binding on Mr. Hughes.

[fol. 2059] The Court: But you have a little problem too, Mr. Davis. You were faced long before this with claims by counsel that they didn't trust Mr. Hughes and therefore wanted it in writing. And I think the Special Master adopted that viewpoint when he gave you the choice of answering interrogatories or producing a writing. So you knew that you had a person for whom you were going to represent to the Court that you were authorized to accept service for; whom neither your adversary nor the Special Master had much faith and that is why they were calling for a written authorization signed by Mr. Hughes.

When you filed with the Court a document purporting to be that and a handwriting expert comes forth and says that is not his signature, aren't you in a peculiar position?

Mr. Davis: I don't think so unless my client fooled me but he didn't. The reference I have in mind—

The Court: But didn't you understand, Mr. Davis, that after the event, after you became advised that neither the Special Master nor your adversary trusted Mr. Hughes, that when you did produce a document which was then [fol. 2060] attacked, as being a forgery, this was again saying you can't trust Mr. Hughes and shouldn't you then have gotten an affidavit sworn by Mr. Hughes before a notary public so that you would have then had a document which was complied with, whether the original authorization had been acknowledged before a notary public, in an independent swearing?

Mr. Davis: If I followed the Court's suggestion I would be technically in default because I received another piece of paper, whether it was an authorization or confirmation, I would have received something past the due date for answering the interrogatories.

The Court: You know, Mr. Davis, that the Court would not have entered a default judgment for $150 million on that basis.

Mr. Davis: I am confident of that but at the same time I am trying to avoid unnecessary arguments by my friends representing TWA.

But, your Honor, there is something you implied in the way you were putting the matter which is not my understanding of what was the rationale with respect to the requirement by the Special Master. Page 45 of the transcript—

[fol. 2061] The Court: You mean Saturday's transcript?

Mr. Davis: Saturday. Where the interpretation or substantially the same language was used at the time the actual requirement was made, page 45, line 7—look at line 4. When I ask someone for written evidence of something it is for the purpose of making it clear there is no misunderstanding as to the nature or scope of the authority. If we are goint to start, and I don't believe that this is really the kind of game—how do you identify anybody as anybody, by footprints, thumbprints?

The Court: In writing, handwriting experts have accepted methods of determining whether the purported signature of Mr. Hughes is in fact that of Mr. Hughes.

My only point to you, Mr. Davis, that is in view of the background that neither the Special Master nor your adversary had much faith in Mr. Hughes personally, and because they also wanted to protect you against what he may do and that certainly is implicit in what the Special Master said on page 45, he asked for written evidence,—nobody has in these proceedings and even in your absence on September 6th has said you are not involved in this personally [fol. 2062] but when that evidence is produced and is attacked as being a forgery, with an affidavit from a person who appears to be reputable and I must admit he hasn't been subject to cross-examination, but his qualifications seem quite clear, aren't you then in a position not to furnish this Court with an acknowledgment by a third person which in fact doesn't comply with the California statute because the California statute says acknowledge that he executed the same.

Those words are not in the acknowledgment, Mr. Davis. Shouldn't you then have prepared, not you, I assume Cali-

fornia counsel, shouldn't you have prepared for Mr. Hughes' signature an affidavit just as I assume was prepared for the notary public, the form of the acknowledgment? And since you had to bring Mr. Hughes from wherever he was to this notary public, or maybe the notary public was taken to Mr. Hughes, Mr. Hughes merely had to sign a piece of paper, not even tell a story to the notary public and the time involved would be shorter than was involved in telling the story to a notary public who then had to sign an affidavit? Wouldn't we then have had another signature of Mr. Hughes but this time sworn to before a notary public [fol. 2063] which could have been a perfect refutation of what a handwriting expert may have said in a counterveiling affidavit to me?

Mr. Davis: May I suggest what we would then be discussing, Mr. Sonnet would be standing there and making exactly the same argument and now he says all that proves, your Honor, is that the same person who forged the first letter forged the second and we would have to have a trial at that time and bring in all these notary publics and bring Mr. Hughes.

If I were to produce a man walking into the courtroom and say this is Mr. Hughes he would say prove it.

Let me address myself to what seems to me is the only way to solve these questions of forgery and the question of authorization. There is no issue of fact as to how a thing gets signed. Whether or not a writing is in fact an authorized writing—a man may put an X even though he is capable of writing—the law is perfectly clear as I understand it. The only issue as far as I am concerned that ever existed was either this subpoena—and I don't want any side trials, I want to try this TWA case—and to my mind the only thing needed was an acknowledgment that the [fol. 2064] authority that I received was confirmed in writing, the writing was evidence of the nature and scope of the authority so there could be no question as to what it is.

The purpose of any writing is not to chase over the countryside to determine whether a man can forge his own signature.

The Court: There was an alternative route that would have been much more effective from your point of vie

If you take the trouble of getting an acknowledgment why not get an affidavit?

Mr. Davis: The only problem, I wanted an acknowledgment that the paper which I had here in New York was the one. Let me point out one other thing because I don't think it would be fair to finish without me making this much of an observation. This relates to these efforts to take the deposition of Mr. Hughes next Monday or any time.

TWA has served many notices of deposition for the taking of the deposition of Mr. Hughes. They first took the position he was a managing agent of the Tool Company and the Tool Company could be required to produce him, the notice itself said that.

Then they figured out a better way of annoying and [fol. 2065] harrassing Mr. Hughes and the Tool Company to coerce some kind of settlement without ever disclosing the merits of the lawsuit and they had a big hullabaloo about wanting to locate Mr. Hughes.

Everybody knows there are a lot of people trying to locate Mr. Hughes and a lot of people who would like to coerce some money out of either Mr. Hughes or the Tool Company because of the publicity or notariety that comes when they raise a claim. We know that, we read the newspapers. So then they asked for interrogatories to be answered by the Tool Company, interrupting our discovery proceedings in a technical sense for that purpose and persuaded the Special Master that they needed answers to those interrogatories and publicly disclosing where Mr. Hughes was so they would be able to serve him.

Of course, as a managing agent they didn't need that but no, they need him as a witness. I believe I mentioned that one of the arguments before your Honor we would hear he was a managing agent but that was dropped.

At the time they applied for answers to these interrogatories, your Honor, what did they say to the Special Master? This is not an effort to change the priority for the [fol. 2066] taking of depositions established by this Court. That is the representation that they made.

Now, they want interrogatories answered. In order to induce the Special Master to grant the interrogatories it is

true first they suggested anyone else could serve Mr. Hughes but finally, no, Mr. Davis will accept service, it will be satisfactory to us if he is authorized.

Now, I got authority to accept service on his behalf—that is not enough. They want to protect me. It has to be confirmed in writing. I obtained that writing, to be sure the writing I would have preferred would not be as broad.

The Court: The problem was couldn't they even slap you with a summons?

Mr. Davis: Then the reason is perfectly apparent for the trip to California. First they said it is revocable, there was an objection. Did they ever before September 6th question it? No, that came as a surprise here. The only thing that I did was when they served me with another notice for the taking of deposition on August 17 and a subpoena out of the California court, I thought that this [fol. 2067] was a game where they were going to take the position how can we arrange to serve Mr. Davis with a subpoena out in a California court because it requires a person to be in California.

I have been trying to make arrangements to accept service in New York, whatever requirements for doing this be but the Cahill firm wouldn't talk to me. All they would say is that this is not a satisfactory authorization. Why, I don't know.

Apparently if you look at this affidavit filed they had this application for the pilot's license since February of last year. Now they are trying to say which is the forgery. My answer, your Honor, is nothing is a forgery if it is done with the authorization of the person. I am saying to you, sir, the law is perfectly clear, there is no basis or justification to even say forgery unless you believe it is not an authorized act.

I believe the law to be if I asked Mr. Cook right here to sign my name to a letter as is sometimes done—

The Court: How about a check?

Mr. Davis: And as to a check it is not a forgery. Now, [fol. 2068] when all this takes place, what do we find? That appears to be now a reason or justification for saying to you we must have Mr. Hughes.

The Court: I believe I made it clear as to the September 6th hearing these were separate and independent issues and one would have no bearing on the other.

Mr. Davis: I merely refer back to the remarks of Judge Dawson when we have a complaint which does not disclose the facts or allegations. It was filed under seal in order to compel a settlement they are not entitled to. We want to discover the facts and justification for this complaint so our rights can be properly represented.

The Court: Judge Bromley, do you wish to say anything?

Mr. Bromley: With your Honor's permission, my position relates to the additional defendants Metropolitan and Equitable and their respective individuals is that the Special Master was in error in the ruling which he made as your Honor mentioned commencing on page 102.

As I understand him he has in effect said let us put an [fol. 2069] end to these depositions before the direct examination is completed, before there is cross-examination and proceed to what is really a final pretrial.

If one looks at page 103, one will find in paragraph 2 that he contemplates the settling of an order which will define not only the issues as between the plaintiff and defendant but also as between the defendant and the additional defendants prior to the time any depositions are begun, either in defense of or prosecution of the counterclaims.

It seems to me that is a fundamental error for this reason:

The time for that kind of a pretrial has not arrived. What has been done so far as I see it is a preliminary pretrial which was of course proper, which set, charted or assumed to try to chart a course of the discovery and that pretrial order has been in existence and while it hasn't worked out, as your Honor suggested, quite the way it was thought it would, discovery is proceeding.

To interrupt all of that now and come in to try to frame the issues before we, the additional defendants, and before TWA has had any discovery from the central act in both [fol. 2070] controversies, Hughes himself, it seems to be a pure waste of time.

I think because of the length of time consumed by Mr. Davis and although he wouldn't answer your Honor's question, we all know that he has about 20 more witnesses whose examinations he has heretofore noticed, because of the inordinate length of his efforts to perform his discovery functions, I think the time has come when we should have a go at Mr. Hughes and I think Mr. Sonnett should be accorded a prompt opportunity, perhaps after the finishing of Rommel and Leslie, to get a little discovery from a man who knows most about both controversies and give me a chance to cross-examine Mr. Hughes in so far as Mr. Sonnett's examination necessarily impinges upon the issues posed by the counterclaim.

I suppose we all realize that to a certain degree the issues are inextricably wound.

The Court: That is one of the reasons I assume you had the Special Master, to have somebody present who can possibly draw a line one between the other.

Mr. Bromley: That is right and he is alert and has done that very well so far and can be trusted in the future [fol. 2071] to do it well but I say again I think it would be a pure waste of time—I don't think the situation is ripe for the kind of pretrial discovery the Special Master seems to envisage because you cannot do that until you have substantial discovery on both sides.

It doesn't do any good to look at the pleadings, having in mind nothing has been developed by anybody with respect to the issues involving the additional defendants. You cannot look at the pleadings and have a meaningful limitation of issues until you have had substantial discovery from both sides.

Since Mr. Davis has seen fit to take so much time with the first witness I say the time has come for us to have and for Mr. Sonnett and me to have a go at Mr. Hughes.

The Court: Mr. Kaminer.

Mr. Kaminer: May it please your Honor, I agree with Judge Bromley's observation that it is a little too early for the pretrial hearings which the Special Master envisaged. I would like to call to your attention that we have a practical problem here.

We want to get the case going. It is costing so much [fol. 2072] money that it is a disgrace and we are not particularly happy I assure you to have been paid as much as we are and to see this kind of thing going on.

Now, in view of what is happening here we are going to have another interesting issue, namely, whether Mr. Hughes considers himself bound. That could be easily avoided. Your Honor has made all the arguments in questions to Mr. Davis which I planned to make so I don't have to make them. If Mr. Hughes appears on the 24th and answers under oath the question of whether or not he signed that paper—

The Court: That is immaterial.

Mr. Kaminer: Sir?

The Court: I think that is immaterial. If he appears and I direct him to appear, which is now the question I have before me, if he answers whether he signed that paper or not is immaterial. You are going down a collateral line which is unnecessary.

Mr. Kaminer: Secondly, I think the only thing which will bring this case somewhere within sensible proportions is if there is now an examination of Mr. Hughes. You have [fol. 2073] heard the reasons for that and I don't want to repeat them but we think this would have a much more beneficial effect on this case than six months of pretrial.

The Court: Mr. Stewart. You represent Dillon Reed.

Mr. Stewart: I won't repeat what Mr. Kaminer said as to the expense in this case. Dillon Reed was brought in some six months ago or seven months ago as an additional defendant on counterclaims and since that time has been forced to spend tens of thousands of dollars in legal fees and out of pocket expenses for documentary reproduction.

It is still unclear why we were joined in the case. We have no power or ability to grant anything that the Tool Company is asking by way of relief. Dillon Reed merely came up with a plan and made a fee but the point is this, your Honor:

After some months of very active litigation we have had no opportunity to make any discovery of facts underlying the counterclaims against Dillon Reed. Our investigation shows the claims against us are baseless.

The principal charge against us is that we in some way [fol. 2074] concealed the intent of Mr. Thomas to resign from the Tool Company.

How do you prove that you didn't conceal something? We know the charge is false. But the only way we can prove it is through the examination of Howard Hughes. He knows the charge is false and I believe he will so testify. It may be, your Honor, that after the examination of Howard Hughes. He knows the charge is false and I believe he will so testify. It may be, your Honor, that after the examination of Howard Hughes we may be able to dispose of this matter as far as Dillon Reed is concerned either by stipulation or settlement.

There is, of course, the additional question that even if your Honor were to order that appear for his examination, whether that would only be the trigger for a new round of litigation as to whether he is able to appear or whether this would be injurious to his health. However that may be, I think that Dillon Reed—

The Court: Really we have enough problems now, Mr. Stewart, without some of those. Somebody said there is a question that Mr. Hughes is psychotic and some counsel [fol. 2075] in this transcript before the Special Master got off on that point but I think we have enough of our own problems without looking for any more.

Mr. Sonnett: He is crazy like a fox, your Honor.

Mr. Stewart: I will be faced with the problem of a lapse of time that if we get into a year or more of pretrial no witness' memory is going to be that good any more. But I suggest if for any reason he won't appear or cannot appear, that we find out now and not a year from now or two years from now after we have expended thousands and thousands of dollars in litigation fees.

I respectfully urge your Honor that you grant the TWA motion for the examination of Howard Hughes on the 24th.

The Court: Mr. Davis, do you want to say anything?

Mr. Davis: Your Honor, very briefly, because I really anticipated some of the arguments made here today. I didn't understand that we are here to explore in detail the

desirability of the suggestion made by the Special Master with respect to this pretrial conference he is suggesting. [fol. 2076] I am simply amazed that here we come down to the discovery of TWA and we don't know the basis of the complaint.

Let me read a short paragraph from a statement of Judge Bromley on protracted cases.

The Court: That is not a nice thing to do. I know how Judge Bromley feels. In the motion part counsel argue a decision I handed down last year.

Mr. Davis: I took this out of Judge Bromley's remarks for your Honor:

> "It wasn't very long before I got a real shock. Judge Weinfeld sent for all of us and said, 'I am not going to pass on these interrogatories which have been objected to by the Government. There is no need to do that.'"

I will skip:

> "'Now, I want you gentlemen to tell me your contentions; settle for me the sections of the country which you say competition may be affected and what lines of commerce.'
>
> "That was getting down to cases much too fast for me. I had not begun to think about the issues yet but we had to get busy right away; quick we had to make up our minds what the lines of commerce were, what [fol. 2077] the sections of the country were, that was not an easy task. I should have much preferred to postpone that for many years until all the proof was taken but we had to do it immediately for Judge Weinfeld and we did do it. We submitted our contentions that put the case very quickly into a posture where it was commencing to crystalize."

I don't know what happened to change Judge Bromley's views so drastically.

I also refer—I am sure your Honor is familiar with this—but this was a section in the manual of recommended

procedures for the trial of protracted cases prepared by the United States Judicial Conference in 1958. It reads:

> "One of the most effective devices for bringing the issues to the surface is for the Court well ahead of the date scheduled for the conference to direct counsel for both sides alternately to submit tentative written or oral statements elaborating and clarifying the positions taken in the pleadings. These should not be couched in the verbose language of the complaint but should certainly state ultimate facts as to each legal [fol. 2078] issue. These statements may then become the subject of one or more pretrial conferences at which the Court can discuss with counsel for the parties any points that appear to require further clarification or elaboration. Discovery should thereafter proceed in accordance with the bound as indicated to the clarification and elaboration of the issues as result of these pretrial conferences."

That is what I understand Mr. Rankin is in effect or has in effect suggested. He suggested that we go through that process. Ordinarily the plaintiff is going to be required to identify what it is they claim and that justifies this Court to do anything, much less order someone to testify, and let us satisfy ourselves first as to what it is that TWA is concealing.

They started this action, they are the plaintiff. How can the defendant come and answer questions about anything unless he knows what plaintiff is talking about?

That is what Mr. Rankin is trying to do and that is what all of the learned gentlemen are trying to avoid.

The Court: All right.

[fol. 2079] Mr. Sonnett, do you want to conclude?

Mr. Sonnett: I have only one thing to say, your Honor. I think a reading of the complaint which Mr. Davis seems to have lost somewhere in the recesses of his deep, dark, distant past, a reading of the complaint would indicate there is set forth in detail specifically, ultimate facts relating to the nature of the commerce involved and the con-

spiracy, the acts performed in furtherance of the conspiracy and the effect thereof. There couldn't be any more precise statement of facts.

The Court: I will reserve decision on your motion, Mr. Sonnett, to review the ruling of the Special Master.

(Decision reserved.)

Reporter's Certificate to foregoing transcript (omitted in printing).

Discovery Proceedings Before Special Master J. Lee Rankin, October 25, 1962

[Doc. 226]

[CAPTION] 61 Civ. 2324

[APPEARANCES]

• • • • •

[53] The Special Master: Anything further, gentlemen? I am ready to rule on this application of the Tool Company to adjourn the deposition of Mr. Hughes and order the return date of the notice for the taking of the deposition and the return date of the subpoena be adjourned.

[54] Before telling you what my final ruling regarding the matter will be, I want to advise you of the various considerations that I have been taking into account in addition to your memoranda, your arguments, and the various papers that have been filed.

In the first place, I do not conceive that Judge Metzner set the date of October 29th as a date that necessarily bound the Special Master as to when the deposition of Howard Hughes should be taken, but it was an indication of the thinking of Judge Metzner, and it was to control, depending upon developments in the interim, at least up to October 22nd.

I also have in mind the statement of Judge Metzner in his order, I think it was in July, in which he modified the order concerning the manner in which depositions should be taken, and said, in words similar, but I am not quoting him exactly, that we must not lose sight of the plaintiff's rights in this litigation.

Discovery Proceedings Before Special Master
J. Lee Rankin, October 25, 1962

By reason of my position as Special Master, and my attendance at these proceedings, I have been in a position to determine whether the parties have cooperated, whether they have been diligent in their efforts to discover, in producing documents, and I find that [55] the parties have all cooperated in producing documents in accordance with the Court's order and the orders of the Special Master, that the Tool Company has diligently proceeded with the discovery proceedings in taking these depositions.

There are several matters pending before the Court which have not been decided, and I think it is important to this litigation that we have the benefit of Judge Metzner's decision concerning them.

I also recognize that Judge Metzner is very busy with the day-to-day business of the court that he has to conduct in the trial of cases, that he has several large matters comparable to this one which have been assigned specially to him by the presiding judge of the court, and there is only so much of his time, by necessity, that he can devote to this litigation.

Therefore, it can only be expected that it would take a reasonable time to get a disposition of the matters pending before him and others that may necessarily be presented to him regarding the problems relating to discovery in this action.

I think that we must take this into consideration both as to the Rule 16 application now under submission and ruling of the Special Master concerning the [56] privileged documents claimed by the Tool Company, but which, as I understand it, has not even been submitted to Judge Metzner yet because he has not set a time for presentation of that matter to him, as I understand it.

Discovery Proceedings Before Special Master
J. Lee Rankin, October 25, 1962

The question has been raised by counsel for the Tool Company as to whether or not there is any cause of action here that can be properly pursued on the ground that the Court does not have jurisdiction of the subject matter.

That issue is not one properly before the Special Master. I have no jurisdiction to pass upon that question.

However, I think it is important to the litigation, and the right of any of the parties, to discover, in that there can be no benefit of a final judgment in this action if the Court does not have jurisdiction of the subject matter, and none of the parties can get their claims properly resolved by the Court if there is a true question of that kind in the case.

Therefore, it is, I think, proper that I take into consideration that there is such a claim being made, and that reasonable opportunity be allowed for its presentation at as early a date as possible to the [57] Court.

The claim is made, as I observe from various papers presented, and argument, that the Court does not have jurisdiction of the subject matter because the primary jurisdiction is with the Civil Aeronautics Board, an administrative body.

While I have no authority to pass upon that question, and do not purport to give any opinion about it, it seemed to me that I should examine it sufficiently to see whether or not it could be a serious issue in the case, and I am particularly impressed with the fact that under the holdings of the Supreme Court generally the question of primary jurisdiction is an issue of whether the administrative body has an expertise that should be applied to the controversy before the Courts act, that the question as developed in the

case of U. S. against RCA, California against the Federal Power Commission, a long line of Interstate Commerce Commission cases, the Shipping Board cases, is whether or not the statute provided for a pervasive regulatory scheme and an exemption from the antitrust laws, and in the cases that I have referred to the Supreme Court has called attention to the fact that the Federal Aviation Act is one of the acts in which [58] such provisions are made.

On the other hand, in the case of Slick Airways against American Airlines, opinion by Judge Forman in 107 Federal Supplement 199, the Court carefully examined the question of whether or not an antitrust suit could be brought and maintained in the Federal Court despite the claim that there was primary jurisdiction with the Civil Aeronautics Board, and he found that the antitrust action could be maintained, principally on the ground that it was not conceived by the Federal Aviation Act that the relief prayed for could be granted by the Civil Aeronautics Board, that the Board had no power to grant damages, treble damages, as requested there, and it had no authority to grant the additional injunctive relief asked for.

Then he dealt with the question of whether or not the particular acts complained of were those which were exempted from the antitrust laws or whether there was something beyond that that was involved in the complaint.

On the rehearing he also dealt with the decision in the Court of Appeals of the District of Columbia taking the other position, opinion by Judge Bazelon, and he distinguished that case and adhered to his opinion.

[59] Then there is a further factor that except in very rare cases the Supreme Court has not said that where they

find that there is primary jurisdiction in an administrative body that the case should be dismissed, but they have merely held the case in abeyance pending the action of the administrative tribunal or agency, and after that action proceeded with it.

However, whatever the merits of that claim are, it seems to me it is a factor that I should take into consideration with regard to the time for Mr. Hughes' deposition to be taken, and the opportunity for it to be fairly presented to the Court if the Tool Company wishes to press it.

If the argument on jurisdiction goes to the question of motion for summary judgment or motion to dismiss based upon all of the evidence, then it is an entirely different question, and it seems to me it involves the problem referred to by the Court and counsel before, as to whether or not the Tool Company is entitled to get the litigation disposed of without the plaintiff having an opportunity to find out what its counsel now says could be 75 per cent of the facts from one of the witnesses who from the record already developed before us obviously knows some important [60] things about this litigation. The extent of his knowledge, and the range of it, we do not know at this time.

But the question of whether or not a final disposition on motion could be had of the case, assuming the Court had jurisdiction otherwise, without even an opportunity to inquire as to the knowledge of this important witness, is a serious one.

I am not purporting to pass upon either of those questions, but I have examined them sufficiently so that I can say to you that I think it is proper that the Tool Company have an opportunity, within such reasonable time as can

be made available to it, to raise them before the Court, which is the proper place, in my opinion, that those questions be raised.

Then I think we have the question of how far the Tool Company fairly should be permitted to go before we think of other parties in this litigation, not with the idea of exhausting the rights of the Tool Company for discovery, but with the concept that there could be a pause that does not injure it, and allow the plaintiff to proceed with some discovery before returning to further discovery for the Tool Company.

In addition to all of this, it seemed to me that [61] I must consider and inquire into the problem of logistics.

I do not know how many records these parties will have to move to California to properly examine Mr. Hughes, but in view of what has already happened in this case in the depositions before me, I would think that a considerable number and bulk of documentary evidence would have to be taken by all parties in order to properly conduct any examination of Mr. Hughes. That is one factor of logistics.

Another is the number of lawyers, associates, and the amount of stenographic help that would be involved in such an examination.

Roughly, I guess that there might be some 35 to 40 people, counting those around the table here and those that would have to be working back of the scenes on documents, getting them ready for examination, and the stenographic help.

That may be too large an estimate, or it may be too small. But regardless of how accurate it is, it certainly is a real problem, and it caused me to believe that taking into

account two holiday periods, one in November and one in December, it was quite unreasonable and certainly undesirable to contemplate [62] that many people going back and forth to California several times to try to adjust to problems and the other considerations involved if we would try to take Mr. Hughes' deposition either on October 29th or during that season.

So I have concluded that the Tool Company should be allowed to complete, within the limits that I will describe, the examination of the TWA witnesses, Mr. Leslie and Mr. Breech, and that I will allow the Tool Company, if it cares to, to make an oral application to suspend the deposition of Mr. Cocke, in light of the fact that his difficulty of recollection up to date has been such that I feel that his deposition has not been very productive, and I should wish to give them an opportunity, if they care to, to use the time to the utmost for productive discovery.

I therefore order that the deposition of Howard R. Hughes be adjourned to February 11, 1963, and that the return date for the notice to take depositions and the subpoena be adjourned to that date, and that the deposition be taken at the same time and place.

I have in mind, in that regard, also the fact that Judge Metzner's order appointing me as Special Master was dated February 7th, and it will be a year [63] at that time during which the Tool Company has had the opportunity to make discovery.

I contemplate also that such period should give it a reasonable time to present whatever motions it cared to to the Court with regard to the jurisdiction of the Court over the subject matter and elements of primary jurisdiction, or

other legal issues of that character, and I would hope that questions in regard to interrogatories will be resolved, that we will have a ruling on the Rule 16 application, and a determination of the right of all parties to any of the documents claimed to be privileged by the Tool Company which is now on appeal.

• • • • •

[114] The Special Master: Lady and Gentlemen, I am ready to rule on this matter.

I shall deny the motion to quash the interrogatories served by the defendant Hughes Tool Company on plaintiff dated October 11, 1962, and deny the order to strike the interrogatories.

[115] I will give you my reasoning, for what it may be worth to you.

In the first place, I do not consider that there is any requirement to obtain leave from either the Special Master or the Court for the filing of the interrogatories. The rule does not require it, and I do not construe the order of Judge Metzner appointing the Special Master and providing for these proceedings to require any such permission.

In that regard, however, lest it be misunderstood, I do consider that the rules give the Court or the Special Master ample power to quash interrogatories or strike them or delay the day that they would have to be answered if they were to cause an unreasonable burden on any of the parties because of the fact that they have a responsibility of moving the case along by conducting the deposition proceedings or some other function in connection with the proceedings that are being conducted day by day.

Discovery Proceedings Before Special Master J. Lee Rankin, October 25, 1962

I invited the application by any of the parties to this litigation to the Court for a proceeding under Rule 16 because I thought it would advance the entire litigation by eliminating issues that the parties did not think were in the case at this time or that they [116] were not satisfied that they could produce evidence to support or for any other reason, and thereby direct our efforts in the taking of depositions to the issues that were important and confine the depositions to such issues as much as possible.

That matter, as Mr. Sonnett has said, is under consideration for determination by Judge Metzner at this time.

I consider each of these rules to be cumulative and independent, and that the whole purpose of the federal civil rules is to aid and assist the acquisition of information which will either support the claim or defense or show that there is nothing to support such claim or defense, and that they should be used by all of the parties, each of the rules, and all of them, as much as possible to get to the facts as promptly as possible so as tc reduce the expense of the litigation and the time consumed by the parties, counsel and the court in the handling of the case.

I therefore think that the interrogatories are proper, that TWA could be of great assistance to the progress of the case by answering them promptly, that insofar as any of the answers eliminate or reduce the issues, or demonstrate ultimate facts that will [117] support the claims, they will be of assistance in the conduct of this litigation.

I also think that it is important that the answers to the interrogatories be furnished so that the depositions from now until February 11th can be devoted to concentration on all of the matters that are not furnished by the answers

to the interrogatories, and also confined to whatever issues can be refined out of the interrogatories and the answers.

It seems to me that it is the responsibility and duty of the Court and the Special Master, as an arm of the Court, to do what can be done to try to determine as explicitly as possible what issues there are in this case between the parties and what ultimate facts there are which will support those issues and what witnesses will be able to testify to them.

Those are the reasons for my ruling.

Transcript of Pretrial Hearing, October 29, 1962

[Doc. 184]

[CAPTION] 61 Civ. 2324

Before: HON. CHARLES M. METZNER, District Judge.
New York, October 29, 1962, 10:30 a.m.

[APPEARANCES]

• • • • •

[3] The Clerk: Trans World Airlines vs. Howard R. Hughes, et al.

The Court: Mr. Sonnett.

Mr. Sonnett: May it please the Court, on study of the transcript before the special master Friday and Saturday it became apparent to me that the problems created by the rulings below were so grave in terms of impact on the progress of this case as to require TWA to try to make its position even more clear than I thought we had before the special master. Accordingly, having spent the weekend in an effort to try to make our position more clear, I put that in a memorandum on appeal to your Honor and was able only to submit it and serve it this morning.

Of course, I have no objection to any amount of time your Honor may see fit to give the defendants to put in any answering memoranda, if they feel one is required.

The gravity of the procedural problem facing us, I think, can best be summed up by saying that if the master's rulings below are permitted to stand in my judgment the TWA case will come to a grinding halt for a period of at least six months.

I think the master, with the best intentions [4] certainly, but without fully realizing the import of his rulings below, and their effect on this litigation, committed error; and our purpose today is to persuade your Honor that that is so.

The master, below, ruled that the deposition of Hughes should be adjourned to February 11, 1963. He ruled that the Tool Company, if it cared to, might suspend the deposition of TWA by Cocke, and that on the ground if the master felt that the deposition of Cocke had not been productive.

I might pause to say that I do not regard that as any function of the master under your Honor's appointment. Nor do I agree with the master's conclusion because what led him to that conclusion with regard to the deposition in fact may be of great significance, and I believe is, in TWA's case, for reasons which I will be glad to develop later, if your Honor sees fit to have me do so.

The master further ruled that he would allow the Tool Company to complete before the deposition of Hughes commences, the examination of TWA witnesses, Mr. Leslie and Mr. Breech.

Now I have no problem about the completion of the Leslie deposition. It has been ordered; three [5] days have been taken; I informed the master as to when the Leslie deposition was to go on to completion, TWA will have at least three days of cross-examination, and subject to what developed yet in the record to be made by Leslie we might have more.

As to Breech, the injection of Breech, Friday came out of the blue. I frankly wasn't aware that that matter was being argued, nor did I purport to argue it. But I think

the injection of Breech came because the master had decided initially to postpone the Hughes deposition to February 11th and then he was trying to figure ways and means to fill in the intervening time, and the deposition of Breech seemed to him a useful thing in that regard.

Now as to Breech, I represent him only in his capacity as chairman of the board of TWA. He is not an officer of TWA. He has no executive functions in TWA. He is in this situation at this time, and has been, because he tried to do a public service for this airline by going on its board, as indeed did the other directors who came on, and I might say that they are having a hard enough time doing it, and all they are getting for it is abuse.

However that may be, Breech's status as [6] a party to this case has not been determined. Your Honor, in connection with the motion relating to service of venue has stayed the proceedings as to Breech. The notices and orders heretofore made relate to Breech only as a witness, and under those orders he is to follow later as a witness and not to precede.

As to Mr. Breech, he is out of the country in fact until the middle or late November, I am advised through his counsel. He has stated to his counsel that he would be available in Detroit, where he has his home; thereafter at Phoenix, where he has a winter home, and thereafter he would make himself available to the convenience of the Court and the parties—indeed, he would provide facilities in Detroit at no expense to anyone for the taking of his deposition as a witness when that time came.

Mr. Breech's connection with TWA does not involve any period of time prior to 1961—December of 1960. So it is manifest, I submit, that his deposition would serve no pur-

pose with respect to the period 1939 through December of 1960. It would be relevant only to 1961 and later.

That period of time, as your Honor will recall, [7] is the period of time covered in our second and third causes of action, and that period of time is the period of time covered in our counterclaim.

You had previously directed that the examinations on the counterclaim be deferred until the end of the discovery program.

So that examination of Breech now could relate only properly to the second and third causes of action, and I see no need that he be examined on those at this time prior to the deposition of Mr. Hughes.

Moreover, that deposition will cause a great deal of controversy as to scope, as to whether it really relates to the answer or whether it relates to the counterclaim.

Further, as to Breech, TWA, in any event, is not in position to produce Mr. Breech since he is neither an officer nor a managing agent of TWA and under Rule 37(d), your Honor, I think it would be improper, therefore, to attempt to require TWA to produce him.

The Court: Whether you can produce him or not his counsel made the offer in court two weeks ago, Mr. Sonnett.

[8] Mr. Sonnett: Yes, sir. I must emphasize this.

The Court: Let's go on to something else now.

Mr. Sonnett: Yes, sir.

The special master below indicated that it would be desirable that certain decisions be made by the Court before Mr. Hughes was deposed. I don't see any relation between the two whatsoever. We are prepared to go forward with Mr. Hughes without the Court's decisions on those matters and abide by the Court's decisions when they come down.

There is no relationship between the two and there is no impediment, so far as I am concerned, as far as interrupting discovery on the basis of the situation now existent.

The special master indicated that he felt that the taking of depositions be postponed. I submit that that is improper under the established practice. Indeed, what it really consists of, I think, would be an effort to try the case on the evidence now available with the hope of short-circuiting the Hughes deposition which I have said to the master—and, I finally believe, will produce at least seventy-five per cent of the evidence we need to try the case.

[9] I believe with the completion of the Hughes deposition for the first time we can come to your Honor and say, "This now is for real. We believe we will need, so far as TWA is concerned, only the following by way of witnesses," and we will be able to suggest, and suggest in all sincerity, and with some basis to go on, that your Honor set a tentative trial date because the setting of the tentative trial date is the only or one of the only effective ways to expedite a pre-trial, as your Honor knows.

Now on that subject let me pause for a moment. It is not oratory when I say to your Honor that TWA's needs for discovery and an early trial are very real. TWA has a very substantial financial problem. It is the legacy of these defendants. The sooner this case can be tried, the better off everybody is.

At this rate, since we haven't been able to commence depositions for a year, the only effective way for us to proceed is to give us access to what I believe and represent to your Honor will be seventy-five per cent of the evidence before we are ready to suggest a trial date.

Now the master also made other suggestions [10] relating to the merits of the case and motions that ought to be made, all, I submit, going far beyond the matters entrusted to his responsibility, which, if carried out, would be productive only of further delay.

If the other defendants seek to make other motions, of course they have their right to make them, and, of course, we have a right to be heard, and, of course, the matter will be decided. But it seems to me that the frustration of the discovery proceedings by repeated discussions, as we have had them ad nauseam, of the merits, without tendering motions for decisions, has operated in this case to delay the discovery substantially because the record is full of such discussion, and I submit that that is what has led the very able and conscientious special master into error, because I think that instead of getting on with the job, handling the day-to-day administration of the depositions, he has sought to be concerned about the expense and the delay of the proceedings and to concern himself with short cuts. And I think that that is what has gotten us into the trouble that we are now in.

The master also ruled, and I believe contrary [11] to the rules and the authorities, that the defendants might use Rules 23 and 36 concurrently, that while they are engaged in the depositions and discovery they have a right to put to us interrogatories. The interrogatories, your Honor, I have discussed in detail in my memorandum. I don't intend to take any of the Court's time in oral argument to try to discuss those in detail, but there are certainly conclusions concerning them that I think your Honor will reach just as I have reached.

These interrogatories purport to be interrogatories relating only to formal allegations in the complaint—paragraphs 2, 3, 4, 7 and 8.

These are allegations identifying the parties, identifying the nature of the trade and commerce involved.

Now, with that tongue-in-cheek approach, I think the master was led into the assumption that all that was involved here was purely formal, were purely formal matters which could readily be supplied, but the fact of the matter is that these interrogatories, as they stand, relate to every single allegation of the complaint—every one of them—and to ask or attempt to ask for them before we have had a discovery [12] would be impossible.

Now as to the statistical ones, which are those relating to paragraphs 7 and 8 of the complaint, I say to your Honor that the fact is—and I am prepared, should your Honor wish to have it, to present evidence today by a witness, subject to cross-examination, that to comply with interrogatories relating to this case proposed by the defendants would require the full-time work of six men or a year at a minimum period.

This is a conservative estimate. It is made by knowledgeable people. One of them is in this courtroom now, Mr. Fellows of TWA, whose responsibilities are such that he knows the details of all this, and I am prepared, should your Honor wish to have this before you, for him to take the stand now.

I am not just making a speech. It will take a minimum of six months to a minimum of a year to do it.

Thus to import into this procedure now the procedure of having to answer interrogatories now before we speak to Hughes is as good as saying we can't have Hughes be-

fore a year, and I say that that is erroneous, and, for that reason, a burden, and [13] also for the reason that it would frustrate the order your Honor has previously made.

Now that is our position. I am sorry to have had to inflict on you a brief; it is not as long as it looks; there is an appendix to it. It is thirty-seven pages.

And I say to your Honor that it was not until Saturday when I reread the transcript for the third time that I realized and became aware of the full impact and application, and what it could do to this case that I felt that I had to write a brief. And I might say that it was not until three o'clock Saturday morning that I decided to tell you what I sincerely meant and believe to be true.

The Court: Judge Bromley, you are alive and interested. Would you like to talk now?

Mr. Bromley: May it please the Court, I endorse Mr. Sonnett's position and everything that he said.

It seems to me that it has now become apparent that Mr. Davis has been able at every critical point to insert into the consciousness of the special master some new tactic well designed to postpone Mr. Hughes' appearance as long as may be, [14] and the sudden injection of Mr. Breech as the man to be examined before we get to Mr. Hughes is an illustration of that tactic.

There really is no reason to have Mr. Breech examined before Mr. Hughes. As Mr. Sonnett has said, his prime concern is in the area of the counterclaims, not in the complaint.

And, secondly, even the February 11th date on the record is not a firm date because the master made it perfectly clear that he was free to postpone it at the last minute

again, or prior thereto, should developments, in his mind, warrant it.

Now all Mr. Davis has to do is to extend Mr. Breech's examination and then argue that, after all, the interrogatories are answered and the February date becomes March or April or May, and all the time the company is suffering, and we, Metropolitan and Equitable, as its principal creditors, are likewise suffering.

And the whole controversy really could be measurably advanced should we have the opportunity promptly to examine Mr. Hughes.

I think the master should be reversed in that respect and that your Honor should rule that upon [15] the conclusion of Leslie—because Mr. Cocke, it is apparent, knows nothing about anything—we should proceed to California, holidays or no holidays.

The Court: Mr. Stewart.

Mr. Stewart: Very briefly, your Honor, I would like to speak about the date for Hughes' examination.

We have already submitted an affidavit outlining our position and I don't see any point in repeating what is contained there.

I don't see any reason for your Honor to put over this examination of Mr. Hughes to February 11th. But even more, I endorse what Judge Bromley says in the sense that whatever date is set should be a firm date.

We have all seen how the Tool Company can come up to what is supposedly a firm date and nothing happens. We actually have a logistical problem, your Honor, in going out to Los Angeles to take Mr. Hughes' examination. I would very much hate to see a situation where we plan

for this, prepare for this, get out to Los Angeles, and on February 11th there is no Mr. Hughes.

So that I would ask that whatever date is [16] set, your Honor, be a firm one.

The Court: Mr. Weiner.

Mr. Weiner: Your Honor, my name is Stephen Weiner. I appear for the Irving Trust Company today.

We join in the position of counsel whom you have already heard, and it is certainly urged that the date of February 11th should be made a firm date, if indeed your Honor does not set an earlier date for Mr. Hughes' deposition.

We certainly think that the special master, having left it open and then further adjourned it to that date, that it should be closed by your Honor and that Mr. Hughes' deposition should be taken on February 11th, if not before. Thank you.

The Court: Mr. Davis.

Mr. Davis: Your Honor, the position of the Tool Company hasn't changed.

The Court: Has changed?

Mr. Davis: Has not changed.

The Court: I didn't think so. (Laughter)

Mr. Davis: We believe that the Tool Company, as well as the Court, is entitled to know what are the [17] facts which the plaintiff claims it is going to be able to prove and which, if they are able to prove, will establish a violation of the antitrust laws based on the circumstances which are admitted, which we know exist in this case.

And we believe that that is a right which a defendant has, since he has no right to try to force an amendment to the pleadings to disclose those ultimate facts under present practice, and is a right which has been frustrated every

Before this case was assigned we know that Judge Ryan made an effort to get counsel for TWA to prepare a form of statement of facts or proposed stipulations as to what they claim so that we could see what it is we were denying —understood what they were claiming.

That opportunity was rejected and they said, "No, it was too soon, and the case ought to be deferred; it is a big case. We know what has happened here."

The question now is whether we fix an arbitrary date, whether it be February 11th or some other date and say, "This is the date on which the Tool Company has to be prepared in order to answer [18] questions to be interposed."

The question that we have today really is that the plaintiff is unwilling to answer interrogatories. This plaintiff has been unwilling to disclose what are the facts which underlie the complaint ever since the complaint was filed in the proceeding.

Now we started out by the taking of oral depositions in the belief that normally that is the most expeditious way of finding out from the plaintiff not only what it is that he is claiming but also, at the same time, discovering what the evidence is which supports the claim, because there is no question in my mind that the discovery rules perform two functions:

One is to give some means to the parties to develop and narrow and identify the issues, and the other is to discover evidence to support whatever positions the parties want to try to prove, come the trial.

Now the special master has found that we have proceeded diligently in our efforts to conduct oral depositions. I don't think anybody can question that.

[19] I took the trouble to do some statistical analysis of what has transpired because I knew that the time would come when I would hear from Mr. Sonnett, seven months having elapsed, or a year having elapsed, and the fact of the matter is that we have had a total of fifty-five days of depositions—Mr. Tillinghast, Mr. Leslie, Mr. Rummel, Mr. Cocke—to date.

Had we had those fifty-five days continuously from the time that we started we would have been up to April 13th. This is the end of October.

More than that, there is reference to 9760 pages of transcript. Only sixty per cent, however, of that is Qs and As. The balance has been left to objections, sometimes on pretexts to objections to form, and then we have had argument.

Now if I were to take the sixty per cent of the pages of transcript, and assuming that all my opponents had done with their objections, their objections to form and let a ruling be made, I would have had, and I would have covered, the same ground that I have covered by sometime in March of this year instead of now, this being the end of October.

The balance of the time has been spent by bringing me here before your Honor on one pretext or [20] another, all aimed at the charge that we are delaying or avoiding or doing something with respect to the deposition of Mr. Hughes.

Now the fact of the matter is that this Court has consistently held that the defendant was entitled to discovery. Your Honor has set forth the schedule and we have attempted to follow that schedule, and we were entitled to complete the deposition only if TWA brought some of the other witnesses before they were to commence their discovery proceeding.

More than that, your Honor, eight of them, by giving them all the documents in our possession that they have asked for—the only thing that is still pending is some question with respect to privileged documents and communications between counsel and his client.

And now we hear, in fact we know, that eminent counsel for TWA investigated this matter before commencing this action and now they tell us that it is going to take them six months to describe or identify the trade or commerce which presumably we have interfered with.

I don't understand why.

[21] Now it is true that interrogatories—and one of the disadvantages of proceeding by interrogatories, is that I must cover whatever imagination my adversaries may have in answering in whatever they may be talking about. They appear to be lengthy. There is no question but that they cover the same ground from different angles. Now all it requires them to do, however, is to state what they claim; and they don't even have to state that. If they don't have any facts all they have to do is to state what knowledge or belief they have with respect to the facts: none of their contentions.

There is no question, your Honor, that interrogatories are one of the tools available to compel an adversary to identify the issues. That is clear. You can find many decided cases.

Now, to be sure, there are other ways of approaching this question of forcing the plaintiff to identify what it is that he claims.

One time I hear Mr. Sonnett say that whatever they are talking about has nothing to do with the approval from the CAB. At the same time I find in the complaint that it

is claimed that we acquired seventy-eight per cent of the stock for the purpose [22] and intent of controlling TWA and using that control in some way so as to interfere with the manufacture and financing of aircraft, the fact not being clear as to the aircraft being used by all carriers or merely aircraft to be used by TWA.

But we did not know at the time we denied that the acquisition of the stock was approved by the CAB.

There is no question, I suppose, that to a large extent the seventy-eight per cent stockholder did exercise some control over the management of the corporation which became in effect, its subsidiary.

CAB approval in the 1950 control case clearly recognized what the effect would be of approving that, and so certainly we have, if that is what they are referring to, interfered with it.

I don't think enough, but that is beside the point. It has nothing to do with the anti-trust laws, is my point. And whether or not it was seeking to acquire this type of aircraft or some other type of aircraft was made by the board of directors that was subservient to the wishes of the Tool Company or was made by the Tool Company, in effect, or by Mr. Hughes while he was chief executive officer, [23] president of the Tool Company.

What difference does it make? If it involved liability, it involved liability to the minority stockholders if we did not do it properly. As a matter of fact, we operated TWA with success, which is more than they did in the last couple of years since they took over control.

I don't understand what the problem of TWA—what its financial problems are, which, to be sure, we were aiding by the use of our credit, which is now no longer available

to them, but what has that to do with the necessity of examining Mr. Hughes? Unless we are trying—and we should all be frank enough to recognize what Judge Dawson had to say—and we know that that is used quite frequently, and if that is what they are trying to do, I think they ought to come out quite frankly and say so.

In any event, whatever their purpose may be, my position, your Honor, is simply this: I am prepared to follow any procedure suggested by your Honor or the special master, or by anyone, including Mr. Sonnett.

How do you want me to go about finding out what it is that TWA claims has taken place which justifies [24] the assertion that the anti-trust laws have been violated by Mr. Hughes or the Tool Company or Mr. Holliday?

And once that is done I will be willing, without resisting, to follow any schedule for the purpose of discovery of whatever evidence there is in anybody's possession to support those contentions or those facts.

That is why I know just exactly what we have. We don't have, it is true at this time, any way for Mr. Sonnett's anticipating the disposal of this litigation. And he says that I have encouraged that. But whether I am right or wrong about it, what is it that I am expected to do in order to carry out what is clearly the intent of the rules, that plaintiff—particularly the anti-trust rules in the so-called "big case"—is going to be entitled to file a complaint which does not have to disclose what I call a cause of action, as this one does not. Oh, it states a claim. It claims that we violated the anti-trust laws. How I don't know.

Why is it that the CAB approval does not cover the situation? I don't know. I have prepared and submitted an exhibit, Defendants' Exhibit 163, [25] before these wit-

nesses wherein I have listed every acquisition of aircraft by TWA from 1939 to date. They don't know where they came from on a few. Most of them were acquired directly from the manufacturer. In some instances witnesses testified, and they will testify some more when I continue with Mr. Leslie, the financial officer, because TWA did not have the credit available that the Tool shop had to place an order to help to finance. Usually it requires the consent of one of the additional defendants, the Equitable.

Mr. Sonnett says that is not what I am talking about. Well, I thought that perhaps we were forcing, because there was some reference to a captive market here. I inquired from Mr. Cocke and the others that testified, and Mr. Rummel testified that they always want more and it is just a question of their getting as much as they could, and they were trying to persuade Mr. Hughes that they need more aircraft and finance, so would he please help to finance it.

So we weren't shoving the equipment down their throat. And we weren't really in restraint of trade. Restraint of what trade? The trade of [26] manufacturing and selling aircraft?

Mr. Rummel testified that Mr. Hughes—that is, Mr. Rummel at the suggestion of Mr. Hughes—contacted a list of people who manufactured aircraft during that period in trying to develop an aircraft best suited to TWA's needs. But how soon those decisions were made, I don't see how they interfered with that aspect of the business.

They alleged one time that the Tool Company had plans for itself getting into the manufacture of aircraft, which were never carried out. There is a suggestion in the testimony that that was done for the purpose of seeing if they

could not get a better deal from those who were not engaged in the business. Suppose that we had gone on with those plans. How would that have restrained the trade of manufacturing aircraft? There would have been one more manufacturer in the field.

Now we are talking about the financing of the manufacture of aircraft. They say that we voted our stock or exercised our control over this subsidiary in a manner which prevented TWA from financing themselves the way they wanted to, I assume. I don't know by what right these lending institutions [27] claim that they had to lend them money if it wasn't necessary.

But however that may be, I suppose that the controlling stockholder had the right to have some views as to what was the best way of financing the business of which he is a stockholder without having anything to do with the anti-trust laws.

I don't know what theory they are going to come up with.

I proceeded expeditiously with depositions. Admittedly I am still finding out what the nature of their claim is. I am finding out that which negates the existence of the violation of the anti-trust laws.

We suggested the possibility of a pre-trial conference for the development of the issues. They resisted that approach also on the ground that it was likewise premature, and they did not want the matter to be referred to a special master.

So we proceeded with Rule 33 and now we are told that that is not a right way to proceed in spite of the fact that the cases I read make it clear that it is exactly the way to proceed. And the cases also have held that it is a proper way to [28] proceed even if my interrogatories are addressed to matters that are presumably within my knowl-

edge and not within theirs, because I am entitled to admissions from them in answer to my interrogatories. And I am also entitled to discover, if it is true, that they don't have a cause of action.

I have reference, your Honor, to the decision by Judge Conger in the Interboro News case, which also involved an anti-trust action, where he pointed out that the amended complaint follows through containing little more than a short plain statement of the claim even though it had some thirty-odd allegations—thirty-seven paragraphs.

And then he says that still the rules do contemplate "that such a pleading, which is little more than a notice of claim, should be supplemented by some procedure designed to give an opponent additional information necessary to prepare for trial."

And I skip some and continue:

> "The plaintiffs suggest that the defendants have acquired this knowledge through prolonged depositions. If the responses of counsel contained in the excerpts annexed to the memoranda [29] are fair examples of what the defendant has learned they know little more than they did after reading the amended complaint."

Now in our case, after taking these oral depositions, all we learned is that they stimulated competition.

Therefore he concludes that these interrogatories come within the power of the discovery rules, which are "to narrow and clarify the basic issues between the parties," referring to the Hickman v. Taylor case.

They do not call for plaintiff's evidence; they call for that which the plaintiff's evidence purports to prove.

Now I am also very conscious of the decision of Judge Kirkpatrick in Pennsylvania shortly after the new rules in 1938 that came into effect. That is referred to also in my memorandum before the special master.

By the way, your Honor, it is my clear understanding that we were to appear today based upon the papers before the special master and I confirmed that late Friday. I understand from Mr. Sonnett today that on Saturday he wanted to submit [30] some additional material and this morning, just before coming to court, I did receive something which looked to me to be voluminous—I don't know whether it contains an appendix or not—I have not had a chance to look at it. I don't know what it contains. And if it is to be considered by your Honor I would like to have an opportunity at least to decide whether or not it requires any answering paper on my part.

The Court: I will give you a week. Next week, Monday.

Mr. Davis: I would like, your Honor, if I may, to advise your Honor whether or not we need it at all because quite frankly whatever schedule will be established with respect to the deposition of Mr. Hughes I am terribly anxious that I do get answers to my interrogatories at the earliest possible moment. And for that reason I am inclined, unless I find something in this memorandum which I feel requires clarification, I would be inclined to let the matter rest for your Honor's decision based upon what seems to me is well established law in this district, that interrogatories are a proper means for delineating the issues.

So far as the service of interrogatories— [31] while oral depositions are going on—I have only found one decision which seems to me is in point. That was the decision

by Judge Weinfeld, which I referred to in my memorandum, in which he says that the deposition discovery rules create integrated procedural devices, again referring to Hickman v. Taylor.

And then he says, "The sections are complementary to one another and the use of one does not restrict the further use of the other on the same subject matter."

Then he ends with this sentence:

> "The various sections may be used independently, simultaneously or consecutively as required."

And he cites for that Hawaiian Airlines v. Trans-Pacific Airlines. This case is referred to in my memorandum before the special master, and it seems to me that the very thing that counsel for TWA were urging not so long ago about simultaneous and recurring depositions, or suspending one deposition and taking on another, all attest to the fact that we have been accustomed to using all these devices however the circumstances may develop, subject always, [32] of course, to the appropriate application to the Court for relief under 30(b).

And if it should be claimed—I don't understand why it should be claimed—but if it should be claimed that my taking the deposition of Mr. Leslie, now working for Douglas Aircraft, imposes a burden upon them with respect to answering the interrogatories, I would be willing to consider giving them a little time to answer.

But I don't know why it is so difficult for them to state what it is that they claim.

The Court: Mr. Sonnett has said that it would take him six months to gather the statistical data that you have

asked for. I am not familiar with the statistical data you have asked for.

Mr. Davis: Well, your Honor, the interrogatories do not ask for any statistical data other than to ask them what it is that they talked about in their complaint.

The thing that is not clear in their complaint is whether they—whether the market is that of TWA or other than TWA, and they cite in their complaint a bunch of statistics with respect to matters that we concede. And all I have asked them to do is to [33] identify what they are talking about. I would be perfectly willing right now to say, "Well, give me what you can. Give me what you can and we will hold in abeyance what you can't give me."

I am finished with the interrogatories. This doesn't cover the entire complaint. I made it clear to the special master that I was supposed to proceed seriatim. We won't submit to them more than one set of interrogatories.

All I am asking you to do at this juncture, as far as I have gone in my attempt, is to identify what business they claim the Tool Company is in—that is crucial, of course, in any question involving the anti-trust laws—and to identify the line of commerce which they claim that we have attempted to monopolize or attempted to interfere with or to restrain.

And if you look at the interrogatories you will see that it follows exactly the allegations of the complaint.

It says, with respect to allegation so and so, identify what you are talking about in here. If they didn't have it before they filed the complaint, let me have what they do have. And then they can [34] supplement later, when they get more information, or indicate where the statistics that they cite come from. That is one of my questions.

One thing which is bothering me a little bit in these interrogatories, your Honor, is periodically I asked them to identify who are the persons who participated in the answers and what is the basis of the knowledge or information that is used to answer the questions. That is difficult for them to do because they don't have it.

But that is the only part in the interrogatories that I am aware of where they might have a little difficulty.

Now it is true that in going through these interrogatories I in effect have forced them to come out and identify what is the course of conduct that they claim the Tool Company has engaged in which supports the filing of this complaint.

Judge Kirkpatrick pointed out that the burden which is on a defendant who is sued, assuming that he is sued without cause or justification in the sense of without facts to support it, is pretty tremendous, and he is entitled to protection against that impose a burden. And that is particularly [35] true when being charged with violations of the anti-trust laws.

Of course, it is a burden upon the plaintiff. And I would like particularly to call to your Honor's attention to two portions in this decision, which is also referred to in my memorandum. Judge Kirkpatrick says:

> "Courts have always been keenly alive to the burdens by way of expense, loss of time, and exposure of private business affairs which discovery imposes upon anyone required to submit to it, burdens which have increased a hundredfold with the volume and complexity of modern business, and have fully appreciated the great wrong of subjecting an innocent defendant to

them merely to let a plaintiff who may think that he has been wronged learn that he has not."

On the other hand he points out that a plaintiff is entitled to plead a cause of action when he has one.

Then he says, with respect to the procedure to be followed—after referring to a decision by Mr. Justice Cardozo he says, "Searching for guidance in the reported decisions under the old practice and [36] avoiding restrictive formulas, the only general rule having 'the capacity of flexible adjustment to changing groups of facts'"—the standard which Judge Cardozo laid down—"which I can discover is that the plaintiff before he is granted sweeping discovery must somehow convince the court that there is at least reasonable ground to believe that a cause of action exists and can be proved if the necessary facilities are afforded him."

That is exactly my position, your Honor. Give them all the rights they want—Mr. Hughes or anybody else—and impose this great burden upon us and upon him, but only after, in one way or another, they have come forth with enough to make this Court feel that there is a reasonable ground to believe that there is a cause of action under the anti-trust laws against Mr. Hughes, and he should be required to subject himself to this burden that they are trying to place upon him. And let's not be naive and overlook the statement of Judge Dawson.

The Court: All right, I will give you until November 7th to submit an answering brief if you care to. If you decide you don't want to submit an answering brief, call my chambers and let me know.

Toolco's Notice of Motion, December 4, 1962

[27289]

[CAPTION]

BEFORE THE SPECIAL MASTER

SIRS:

PLEASE TAKE NOTICE that upon all the proceedings heretofore had herein and upon the annexed affidavit of Chester C. Davis, Esq., defendant Hughes Tool Company ("Toolco") will move the Special Master on December 6, 1962 at 10 A. M., or at such other time as may be fixed by the Special Master, at Room 3111, 120 Broadway, New York, N. Y., for a direction that following the completion of the present examination of E. O. Cocke, and absent changed circumstances, Toolco may either upon the completion of the deposition of [27290] A. V. Leslie or in conjunction with his staggered deposition, next depose Ben-Fleming Sessel and the Irving Trust Company by Sessel and Arthur L. Wadsworth and Dillon, Read & Co. Inc. by Wadsworth.

Dated: New York, N. Y.,
December 4, 1962.

Yours, etc.,

CHESTER C. DAVIS, Esq.
Attorney for Defendant
Hughes Tool Company
120 Broadway
New York 5, N. Y.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

[Doc. 237]

[CAPTION] 61 Civ. 2324

[APPEARANCES]

• • • • •

The Special Master: Mr. Tenney, I will hear from you first in regard to how this stipulation is any different than the subpoenas that have been served in this case.

If you recall, in this record there were some subpoenas to produce documents served earlier, and they departed from the orginal subpoenas that Judge Metzner had ordered documents to be produced under? [4] Do you recall that? Maybe you don't in the record.

Mr. Tenney: I am not quite clear of what the difference is that you are referring to.

The Special Master: That was the case, and I raised the point—I think the Cravath firm had theirs somewhat different, and they proceeded at once to modify them so that they conformed to the subpoenas, and the lists of documents particularly, that Judge Metzner had ordered to be produced, both as to the Tool Company and to the other parties.

Insofar as their departure, I would like to know it if there is any in this case. I understood from Mr. Ordover that there was some difference between this and the listing under the subpoena for the other documents, earlier.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

Mr. Tenney: Mr. Rankin, there is certainly a difference, and I might as well start off by saying that the schedule of documents to be produced which is annexed to this stipulation is the product of an agreement between counsel for TWA and counsel for Atlas as to the documents that counsel for Atlas are prepared to produce, and reflect a joint effort to avoid undue harassment or oppression on Atlas, while securing for TWA those documents that TWA considers [5] important at this time in connection with its preparation of this case.

There was no effort made to have the schedule read exactly as any previous documentary schedule has read. I am sure there are many differences. I am not quite able to comment on any particular one because the differences are quite extensive. This is a very narrow subpoena.

The Special Master: You recognize under the rule that you are entitled to this if you show good cause, don't you? That is what the rule says. That is the reason I want to get this question clarified at the start. Do you want to see the rule?

Mr. Tenney: I am sorry, Mr. Special Master, but I am not quite clear of what you are referring to as to the requirement of making an affirmative showing of good cause. I do not think we would have any difficulty in doing so, but I would like to be enlightened.

The Special Master: Don't you consider that Rule 34 requires an affirmative showing of good cause to discover documents?

Mr. Tenney: Mr. Special Master, I did not consider that we were proceeding under Rule 34. We are [6] proceeding under Rule 45.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

The Special Master: I will hear you. I am not sure whether you are entitled to proceed under Rule 45, in light of the fact that you know you can't depose any witnesses at this time in light of the Court's order. I have, so that you will understand, construed that it was the law of the case so long as you conformed to the prior requests for documents, that the various parties were entitled to them, even though they didn't have the right to examine the particular witnesses.

That is one reason why I wanted to know why there was a departure, and what the departure was.

Mr. Tenney: First of all, Mr. Special Master, I did not understand that the plaintiff was under any obligation to move for permission to obtain the issuance of a subpoena duces tecum, and to serve it. We did not so move. I believe that other parties have followed the same procedure without having moved for permission.

I do not believe that there is any requirement to move.

My understanding of the rules is that under Rule 45 any party is entitled to the issuance of a [7] subpoena by the Clerk upon a showing of a notice of deposition.

My understanding is that there is no requirement of showing good cause, and my understanding further is that no party has any standing to object to the production of documents.

I recognize that there is an order applicable here which for reasons that are very obscure to me, has prevented the plaintiff to this time from taking any pre-trial examinations.

I have understood that because of that existing order, which, as I say, I have difficulty in understanding, and I

consider to be entirely unjustified under the rules, we are under a direction not to take the deposition of any person on oral examination, but I have also understood that we were permitted to avail ourselves of the rights that are ordinarily available to parties under the Federal Rules, to engage in pre-trial discovery, to prepare the case which we instituted in this court as long as we did so without interfering with the conduct by Mr. Davis of the pre-trial examinations which he is conducting at the present time.

We have taken extreme precautions to avoid that.

[8] We have stated on the record, and I repeat on the record that we do not intend to take an examination of any person pursuant to the notice and the subpoena which we have served. We have so stated to counsel for Atlas.

In other words, we have confined, and I believe that this is the most that we can possibly be expected to do under the existing orders—we have confined this very limited effort to do something in support of our case, to a request for clearly relevant documents from a person, a corporation, very closely involved in some of the central actions in this case.

We have phrased our subpoena and our schedule so that the documents called for are without exception within the schedules that we were permitted to obtain from a party.

The schedule is far more limited, however, because we have been careful to avoid any unnecessary harassment of a person not a party to this litigation.

We believe we have been successful in doing so, because we have been able to agree with counsel for that third party on a formula which they do not consider oppressive.

I am not aware of any requirement for me or for [9] TWA to obtain permission to proceed this way, and if there is a requirement, I should like to be enlightened on it.

The Special Master: I am sure that you are aware that all the other proceedings as far as the documentary production, were pursuant to Rule 34, as I recall.

Mr. Tenney: I do not believe that to be the case, sir. I believe most of them have been pursuant to subpoenas duces tecum.

The Special Master: Do you have a question about that, Mr. Bradner?

Mr. Bradner: Mr. Davis obtained all his documents under Rule 45.

The Special Master: That is correct, but not as to the other parties not taking depositions.

Mr. Bradner: As I understood the prior cases of Merrill Lynch and First Boston, were pursuant to the same procedure which is involved here.

The Special Master: That is right.

Mr. Bradner: I assumed this was being done under Rule 45 and not Rule 34.

Mr. Tenney: Mr. Leslie is another example. Both plaintiff and defendant secured documents from [10] Mr. Leslie on a subpoena duces tecum.

The Special Master: But he was being deposed in accordance with the Court's order. That is the distinction I was trying to point out, Mr. Tenney.

Are there any exceptions in that regard?

Mr. Tenney: Merrill Lynch, First Boston, Dillon, Read, at the instance of Mr. Davis. As a matter of fact, I believe all of those who are now presently additional defend-

ants were at some prior time third parties while this order was in effect, and Mr. Davis secured documents from them in exactly the same procedure—along the same lines that we are now proceeding.

The Special Master: What I construe may be wrong. All the people that you have listed so far as being on the list that the Court ordered their depositions be taken, with a priority to the Tool Company. I think that is different.

You may have some reason why it isn't, and if you will tell me I would appreciate it. The depositions would be Merrill Lynch and First Boston.

As I understand, that matter is before the Court.

Mr. Tenney: Merrill Lynch and First Boston are before the Court, sir?

[11] The Special Master: Yes, I understood that there were some objections. Is that resolved?

Mr. Tenney: There are none to my knowledge, the documents have been produced.

Mr. Davis: We had an argument before you, and I did not ask for a review of your ruling.

The Special Master: I understood that First Boston and Merrill Lynch directly took something to the Court.

Mr. Davis: They were contemplating something.

The Special Master: That is the last communication I received on it.

Mr. Davis: I don't know whether they have or not. But I do know that documents have been produced pursuant to some arrangements, as to which we did not object, following the ruling of the Special Master on an argument that was had at the offices of the Cahill firm when those two subpoenas were at issue.

I would like to reserve my comments for when it is my turn to do so.

[12] Mr. Tenney: I wish again to make it very clear that I consider that I was attending this argument as an argument of a motion that had been made by counsel for Toolco with respect to our subpoena, and that in the absence of any such motion, the subpoena is beyond any question whatsoever a fully valid and enforceable subpoena, and I do not understand why I should be required to speak first on this, but I now shall, if that is your wish, sir.

The Special Master: The reason I thought you should speak first was because of an obligation to show cause.

Mr. Tenney: I do not believe there is any such obligation, sir, but I shall try to show cause.

The Special Master: I do not recognize under the Court's order that you have any right to produce any witnesses at this point in the taking of the depositions, because I consider that I am bound by the Court's order giving the Tool Company priority except insofar as it is modified by my order that is on review, concerning Mr. Hughes.

Mr. Bradner: Mr. Rankin, if I might be heard on this, it is my recollection of what transpired before—shortly after you ruled that Mr. Hughes was [13] to be examined on February 11th, Mr. Sonnett raised the question before you as to whether TWA and other parties who were so advised might proceed by the method of obtaining documents, dry depositions, so-called, under Rule 45.

I understood you to rule at that time that this might be done to the extent that it did not unfairly interfere with the examination of the Tool Company, which it was conducting.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

I understood that the subsequent subpoenas that were issued in connection with Merrill Lynch and First Boston were issued under that prior ruling of yours.

I certainly came away from that hearing with the very definite understanding that I had been listening to an argument under Rule 45, in which Mr. Davis was objecting to the subpoenas, and the whole argument was based on that basis.

I must say that this comes as quite a surprise to me to have the position taken that these subpoenas are under Rule 34.

As I remember, under Rule 34 you could not bring such a subpoena.

The Special Master: I do not recall that par- [14] ticular place in the record. Could you refresh me?

Mr. Bradner: I did not come prepared with the reference. I did not anticipate the problem.

The Special Master: As I recall, it was an inquiry as to the production of other documents during .....

Mr. Bradner: It was in connection with the production from third parties. I think that all of the parties to the case have produced to all of the other parties of the case under Rule 34, or under prior Rule 45 subpoenas.

The Special Master: In connection with their depositions.

Mr. Tenney: This case was instituted on June 30, 1961, under the provisions of the Sherman and Clayton Acts. Service was obtained of two of the defendants—one immediately and one in February, or January, I believe.

There has been no successful attack on the service, on the jurisdiction of the Court.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

A motion was filed by counsel for Tool Company about fifteen months ago, which was in form a motion to dismiss the complaint.

That motion has never been brought on for [15] argument. Judge Metzner has expressly stated on several occasions to Mr. Davis that while he may bring that motion on for argument at any time that he wishes Judge Metzner does not believe that it is well-founded at this time.

Now, sir, notices to take depositions of various witnesses, both party and non-party, were filed by counsel for Tool Company and by counsel for the plaintiff.

There was a good deal of argument as to what the schedule of those depositions should be. The order of Judge Metzner to which the Special Master has referred sets forth a schedule for the taking of the existing depositions as to which notices had then been filed.

There is not a word in that order granting to Tool Company priority. There has never been a word in any court order entered in this case granting to Tool Company priority of taking depositions as such, contrary to what counsel for Tool Company has said, and I believe contrary to the understanding that the Special Master a few minutes ago expressed.

The Special Master: Will you explain that to me, Mr. Tenney?

[16] Mr. Tenney: In the first place, sir, that order dealt, and on its face it purports only to deal with the specific notices of taking depositions that were before the Court.

Counsel for Tool Company requested an order, and has acted ever since as if he obtained an order granting him priority of discovery. No such order was entered.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

There was an order entered which specified with respect to the particular witnesses whose depositions had been noticed, an order in which they would be taken, and in point of fact all of the depositions which had been noticed by counsel for Tool Company are listed on that schedule prior to the depositions which had been noticed by counsel for TWA.

The Special Master: Why doesn't that mean priority? I am not following you, I guess.

Mr. Tenney: In the first place, sir, the notices of taking depositions filed by counsel for TWA, and I am sure that counsel for Tool Company would take the same position, by no means exhaust the list of witnesses which counsel for TWA proposed to examine before trial of this action.

I feel sure that counsel for Tool Company feels [17] much the same as to his list so far.

The order entered by Judge Metzner was limited to the depositions before him. His failure to enter an order granting general priority of discovery to counsel for the Tool Company constituted, it seems to me clear, a rejection of the suggestion that Mr. Davis has so often made, that there is some right in the defendant to examine as long as he wishes before the plaintiff can commence.

Now, sir, Rule 26 of the Federal Rules reads, in part, as follows:

> "Any party may take the testimony of any person, including a party, by deposition upon oral examination or written interrogatories for the purpose of discovery, or for use as evidence in the action, or for both purposes. After commencement of the action, deposition may be taken without leave of Court, except

that leave granted with or without notice must be obtained if notice of the taking is served by the plaintiff within twenty days after commencement of the action. The attendance of witnesses may be compelled by the use of subpoena as provided in Rule 45."

From the commencement of practice under the Federal [18] Rules until 1962, there was a general practice in the Southern District which has been characterized by many people in different ways, but a practice of giving the defendant the first opportunity to take examinations.

In the original form of Rule 26, there was not the language about leave of Court being necessary for twenty days after a complaint was filed, when the notice was served by the plaintiff.

That amendment to the Federal Rules constituted a limited recognition by the revisors of a certain sourdness, a limited soundness in the point of view then being taken by the Southern District.

As a practical matter in those twenty-four years—twenty-two years, I guess it is actually—almost no other district in the country followed any general priority rule.

Moreover, I think that I can say with considerable confidence that in the Southern District there was never any application of this general rule which permitted the defendant to take examinations exclusive of any right on the plaintiff to take examinations for an extended period of time, such as the period of time that these pre-trial depositions have [19] continued.

Without exception, when that problem actually arose, a practical solution was found by the judges of the Southern District Court.

One of the common solutions was alternating depositions. Another solution adopted in the Ford-Ferguson case during the latter part of its pre-trial discovery procedure, which lasted for several years, was concurrent depositions, arranged in such a way so as to minimize as far as possible the burden on counsel of having concurrent depositions, but more importantly, both as to the concurrent deposition procedure and the alternating deposition procedure, most importantly, I should say, so arranged as to recognize that the function of a court is to hear the complaints of the injured, and to act upon them, and that the rules are directed to be construed by Rule 1, and I quote:

> "These rules govern the procedure in the United States District courts in all suits of a civil nature, whether as cases at law or equity, with the exception stated in Rule 81. They shall be construed to secure the just, speedy and inexpensive determination of every action."

[20] The plaintiff has come to the United States District Court for the Southern District of New York—Section 4 of the Clayton Act, substantially similar to Section 7 of the Sherman Act, which reads:

> "Any person who shall be injured in his business or property by reason of anything forbidden in the antitrust laws may sue therefor in any district court of the United States, in which the defendant resides or is found or has an agent, without respect to the amount in controversy, and shall recover threefold the damages by him sustained, and the cost of the suit, including a reasonable attorney's fee."

I repeat, "may sue therefor in any district court of the United States."

[21] The federal rules are stated to govern the procedure in the U. S. District Court in all suits of a civil nature, and that they are to be construed to secure the just, speedy and inexpensive determination of the action.

There is not a word in the federal rules about priority to a defendant.

On July 1, 1962, the Judges of the U. S. District Court for the Southern and Eastern Districts of New York put into effect new civil rules. Rule 4 reads in part:

> "From and after the 40th day after commencement of an action, unless otherwise ordered by the Court for good cause shown, neither the service of a notice to take the deposition upon oral examination of party or witness, nor the pendency of any such deposition shall prevent another party, adverse or otherwise, from noticing or taking the deposition upon oral examination of party or witness, concurrently"—I emphasize that word "concurrently"—"with the taking of deposition noticed or commenced earlier."

It has been ruled by Judge Metzner in this matter that that rule now in effect in this district does not deprive the Judges, Judge Metzner in this [22] case, of the discretion to apply a different procedure in the sound discretion of the Court.

Judge Metzner early in July, in the exercise of that sound discretion continued temporarily the order that was then in effect, permitting counsel for Tool Company to take examinations according to the schedule previously entered,

and forbidding, in effect, counsel for the plaintiff from taking depositions in accordance with the schedule previously submitted.

It is our position, and we have expressed it unsuccessfully, I am sorry to say, in these proceedings here, and we now have the point on appeal before Judge Metzner, that all possibility of exercise of discretion contrary to the express—to the sound exercise of discretion, I should say, contrary to the express provisions of the Clayton Act, or the Federal Rules of Civil Procedure, and the Civil Rules for the U. S. District Court for the Southern and Eastern Districts of New York, has now expired, and there is no conceivable justification for further delay, in commencement by plaintiff of the oral examination before trial of key witnesses, particularly Mr. Howard Hughes.

Now, sir, I realize that this is something [23] which is not directly before you this afternoon. However, it is only possible to consider the decision with respect to what is before you this afternoon in the light of this record.

Under the rule that has been adopted here, and the Special Master has been applying, the plaintiff has been prevented from engaging in oral discovery, if I can use a loose term, that is, of putting a witness on the stand under oath, and asking him questions. That right has been to date granted solely to the defendant.

However, within extremely narrow limits, I am sorry to say, in this case now 18 months old, brought by a public service corporation, publicly owned—Mr. Davis may know more about the number of stockholders than I do, at the moment, because as I say, I was not prepared at this point—but with thousands of stockholders, against a ma-

jority stockholder and its controlling person, which is alleged in our complaint to have grievously injured this public service corporation.

As I say, in these 18 months the plaintiff has been granted certain extremely narrow rights, always subject for some reason that I again do not [24] understand to the injunction that they must never be exercised in any such way as to interfere or be burdensome upon the defendant.

Those narrow rights have related to documentary discovery. Judge Metzner ordered the production of documents by parties, quite separate from the schedule of taking oral examination before trial.

While sitting through this year of depositions, counsel for plaintiff has endeavored to make such use as it can of this limited right, this limited opportunity I should say, to exercise the rights given to it by statute.

It has tried to do so, as enjoined upon it, so as not to be unduly burdensome to the defendant.

I find it interesting that we do not seem to have difficulty with the third parties to whom we have addressed these subpoenas. There have been several. We have explained to them that we are willing to be reasonable about these things. We are not trying to harass them or be burdensome. We have a large lawsuit here. We have a duty to our client. And if I may say so, the Courts have a duty to our clients also.

We have addressed in this instance to Atlas [25] Corporation, which your Honor may recall is stated to be a co-conspirator in this action, a subpoena pursuant to a notice of taking deposition, on the expressed understanding that this subpoena would be construed to require the production

of documents, but that no oral examination would be taken at this time. This is a procedure which antedates, I believe, even the federal rules.

I think I am not entirely sure of the origin. I think it may have been under the equity rules. It is a procedure that is so well known in the federal bar throughout the country as to need no justification, because in civil, as in criminal cases, parties are entitled to the assistance of the court in obtaining the evidence that they need, and this evidence often is documentary rather than oral.

Moreover, it is well understood, and counsel for Tool Company has certainly given us many examples of it, that the taking of the examination of a particular person on oral deposition requires the use of documentary material, to refresh his recollection, possibly to under some circumstances perhaps challenge his credibility.

That documentary material may not be in his [26] possession. It very often is not, but is in other persons' possession.

I am certain that long before the admission to practice in the court of the Southern District in New York of any person around this table, subpoenas duces tecum to persons other than those whose depositions were to be taken, have been issued directly without objection.

I am puzzled as to why it is that every time counsel for plaintiff tries to open a door to some of the rights which it has under the federal rules, it finds standing barring the way, the defendant.

As I say again, this stipulation narrowed the types of documents called for to such an extent that counsel for Atlas Corporation was prepared to sign it. I have the original here.

I may also say that I informed personally counsel for Atlas Corporation that there was this argument, so that he could have an opportunity to be here if he wished. He is not here. He informed me he did not intend to come. I shall not try to explain why not, but he did make it quite clear that he was prepared to accept this stipulation, and [27] prepared to commence production of documents under it.

I may say that we have one oral agreement between us, and that is that because he has had some difficulty of a personal nature, production instead of starting on Tuesday, the 18th, he has requested it should start on Wednesday, the 19th, and I have told him that of course this is entirely satisfactory to the plaintiff.

We have no wish whatsoever to be burdensome on Atlas.

Sir, the good cause that I cite is the right of the plaintiff granted to it under the Clayton Act, and I do not understand what precedent gives counsel for Tool Company any standing to object to it.

The Special Master: My original inquiry was whether this stipulation as to the list of documents goes beyond the original lists that were provided for under Judge Metzner's order, and that is what I was trying to consider, because I felt that was largely the law of the case insofar as it reached into that area. I want to get that clear.

I take it from what you say it is less than that rather than anything beyond it.

[28] Mr. Tenney: Insofar as the description of documents is concerned, it is unquestionably less than that. Of course Judge Metzner's order did not refer to documents in the possession of Atlas Corporation. That is why I have

had some difficulty in answering the Special Master's question. This schedule is not encompassed within Judge Metzner's order. For that reason it is in terms of the types of documents requested narrower in many significant respects, and in no respect, I believe broader.

The Special Master: Thank you.

[29] The Special Master: Before you proceed, Mr. Davis, I have a couple of questions I would like to ask Mr. Tenney.

Mr. Tenney has furnished me the copy of the record for October 25, 1962, at 10 a.m., of the argument and inquiries that occurred there, and I think in light of Mr. Bradner's remarks, and Mr. Tenney's concerning this, that it would be wise at this point to insert in the record that portion starting with Mr. Sonnett's remarks on page 64 down through on page 68, just before the statement of the Special Master "That is right," which covers what Mr. Sonnett said on the matter and what I said.

It refreshes my memory as to what happened. I don't know whether you have had a chance to read it again.

Mr. Tenney: I have not read it again. I am going by recollection of what happened. I read it at the time.

The Special Master: Mr. Sonnett said he thought in light of the Court's order that I had plenary control over the proceedings as well as to whether or not he would have any right to follow this procedure, and that was why he was making the inquiry.

[30] Mr. Tenney: I stand corrected. I stated it somewhat differently before.

The Special Master: I think your view probably is different than he expressed about the control of this situation,

but it was raised at that time, and the only particular matter that I had in mind at this time was whether you were going beyond the type or list of discovery that we had followed before.

I notice that I also said that it would be subject to any party raising objection on the ground of harassment at the time, so such authority as was granted was expressly subject to that right in any party to this proceeding.

That may have been beyond my authority, under the law, but that is the way I provided at the time.

Mr. Tenney: Yes, sir, and I had understood that this hearing this afternoon was to consider a motion by a party, Toolco, in accordance with that instruction.

The Special Master: I do have an inquiry, Mr. Tenney. I gather from your argument that you do feel badly aggrieved about the arrangement for the depositions in various orders of the Court and the Special Master, and you have a right to that feeling, and [31] conscientious representation of your client.

I have difficulty trying to reconcile your contentions with going ahead and getting something done in this case. It seems to me that your argument logically would either "when we start Mr. Hughes' deposition, then the Tool Company can notice depositions all over the country and you have to be there too."

I don't see how you can have an orderly court process if there isn't some recognition that TWA does not have unlimited counsel, doesn't have unlimited funds—even the Metropolitan, which I suppose is the largest aggregation of property here, can't conduct litigation as though there wasn't any money involved in expenses.

So the Court has to try to regulate it that a reasonable relationship can be had.

That doesn't solve your problem of whether the plaintiff should be delayed this long. I appreciate that. But it does seem to me that somewhere we have to find an effort to limit how much of this can go on at the same time. Maybe you can tell me how that fits in with your thinking.

Mr. Tenney: Yes, sir, I am very glad to express my views on that. It is always a balance of conveni- [32] ence bearing the necessity of justice in mind.

There are undoubtedly certain key witnesses in any litigation, even one as complex as this one. For a witness whose testimony is obviously crucial to the determination of the case, undoubtedly counsel in chief for the parties closely affected would wish to attend themselves. I feel sure that their desire would be so mutual in that, that there would not be any need for applications to the Court to prevent them from taking other depositions at the same time.

However, there are other kinds of procedure in pre-trial discovery. There are many witnesses that are not that important. I recall at one time in the Ferguson case there were at least six depositions being taken simultaneously. Counsel in chief, I don't believe, was attending any of them.

There is also the question of the extent to which a deposition should be permitted to go on from a time standpoint, and I think that the question of concurrent depositions, and whether that is unduly burdensome on the parties, or alternating depositions, and whether that might be unduly burdensome on an orderly attempt to develop the fact by one of the parties, changes as time goes on.

[33] I think that is recognized by the present provision of Rule 26 with its 20 day proviso, and by the present provision of the Southern District Civil Rules with a 40 day proviso.

Times change. Within limits I think probably it is a very sound rule that the defendant in the ordinary case at least, not knowing too much about the complaint brought against him, should be given a first right to inquire, but if that first right to inquire is dragging on, there comes a point where some decision has to be made for the protection of the other parties.

That decision is clearly within the discretion of the Court, and in this instance, of course, your discretion, Mr. Rankin, I believe.

It could take the alternating deposition route, and that would be, I should think, particularly appropriate for key witnesses.

I should think, for example, that having completed the principal officers that counsel for Tool Company has chosen to notice initially, of TWA, Mr. Tillinghast, Mr. Rummel, Mr. Cocke, Mr. Leslie when he was originally noticed, although now he is no longer an officer—it would be a realistic and reasonable exercise of discretion to suspend and allow counsel [34] for TWA to take the key person—the key person in this entire litigation, indeed, Mr. Hughes—and I would think it realistic and reasonable to provide that that should be the only deposition going on at that time, just as the only actual oral depositions that have been going on in this last year have been those conducted by counsel for the Tool Company.

I don't think that that automatically becomes something like the Laws of the Medes and Persians.

Possibly this might be as much as counsel for TWA needed to establish a major part of its case. As Mr. Sonnett has explained to you, we believe it will be. Conceivably we might want to request permission to go on with some others, but we certainly could not go on indefinitely, and this case would never come to trial if there was no limit placed on the number of depositions to be taken, particularly when it is, I think, fair to say seldom any real motivation on the part of a defendant to press for an early trial.

I would think that as this case moves on towards trial, a time would come when Mr. Davis' very expert assistants could conduct depositions in his absence.

Mr. Cook has appeared as counsel here. He is certainly a lawyer of great experience and ability. [35] Mrs. Lea, Mr. Cox have argued important motions, have prepared important documents. I see no burden on Tool Company to have a portion of the pre-trial discovery handled by Mr. Davis' assistants. That would be very likely to be the case, for example, if concurrently Mr. Davis were permitted to take the deposition of one of the witnesses he has noticed, and TWA were permitted to take the deposition of someone other than Mr. Hughes.

I should imagine Mr. Davis would like to have his entire force present when Mr. Hughes was being deposed.

Perhaps Mr. Davis could examine the witness he had noticed, and Mrs. Lea could protect the rights of the witness we had noticed.

In the case of a third party witness, she would not even be needed to protect that third party's rights. If he needed

protection he could obtain counsel. I don't think that there is anything in this procedure to date that would indicate any disposition on the part of the plaintiff at any rate to unduly oppress or harass or deprive a third party of his reasonable rights.

That is my best answer, sir.

[36] The Special Master: There is one other thing. I notice that Mr. Sonnett in asking if he might proceed in this manner said that the documents he would request would be only very key documents. Do you recall that?

Mr. Tenney: Yes, sir, I think I am familiar with this.

The Special Master: Do you consider that is all you are requesting in this stipulation?

Mr. Tenney: I believe this is a very narrow range, yes, sir. Some of these documents undoubtedly will be more important than others. It would not be practicable to identify documents with a qualifying phrase "important documents." We find it necessary for the protection of Atlas Corporation to describe the documents by date, by addressee, by so forth, by general classification. It is a narrow range of documents. We consider them to be key, which is why we were willing to restrict it to such a narrow range, and I believe it is sufficiently narrow for a full protection of the rights of the people most concerned with the difficulty of producing them, that is, Atlas Corporation.

At least they have so indicated by signing the [37] stipulation.

The Special Master: Mr. Davis?

Mr. Davis: Mr. Rankin, I recognize that Mr. Tenney is capable of outdoing me in brevity. I don't think that I will take the time, in view of the lateness of the hour, to address

myself to the general philosophical expressions as to the application of the rules and the rights of the defendants, or of a plaintiff in any kind of situation, of which there can be many, and which we have argued on many occasions when the issue was really before the Special Master, or before the Court—the right of a defendant to find out from the plaintiff what he is talking about, in some terms which are understandable so as to adequately put the defendant on notice what the claim is.

I don't believe that the rules contemplated that a lawyer, however well intentioned may subject the defendant and a lot of other people to burdens that are involved in this kind of a lawsuit, and still refuse to answer interrogatories or refuse to participate in Rule 16 procedures which will require counsel, since the client apparently doesn't know, what is the basis of the contention that the antitrust laws have been violated.

[38] I would like to address myself to the issue before us today, which is really not as involved as what has been discussed today.

First of all I would like to make this point quite clear.

The Hughes Tool Company was not consulted, and is not a party to this so-called stipulation. Obviously if Atlas Corporation, TWA, or anyone agree among themselves to exchange documents, we, the Tool Company have no standing, and so far as I am concerned, it may happen every day of the year.

My standing here relates only to the asserted right to documents pursuant to a proceeding which has taken place in this action. My understanding is, and I would like to be corrected at this point if I am wrong, that this so-called

stipulation is not an agreement between Atlas and Mr. Dudley, or TWA, or between counsel for Atlas and the Cahill firm, relating to what documents they will voluntarily produce or not voluntarily produce, but rather it is merely an agreement that was arrived at which substituted a schedule to a subpoena which was served pursuant to a notice for the taking of the deposition of Atlas.

Am I correct?

[39] Mr. Tenney: The stipulation speaks for itself. I think you are correct.

Mr. Davis: In other words, the situation before us is, and irrespective of what rights may have been waived, that we have a notice for the taking of the deposition of Atlas, and predicated upon that notice for the taking of that deposition, a subpoena duces tecum was issued, and that the original schedule purporting to describe what documents were to be produced at that deposition pursuant to that subpoena, was amended by an agreement between counsel for Atlas and counsel for TWA.

That is the situation to which I am addressing myself.

I think it is important, however, to correct Mr. Tenney in the suggestion that the prior orders of this Court have not clearly and firmly established the manner and the order in which depositions were to be taken in this action, whether they are to the liking of Mr. Tenney or my liking, I think, is immaterial.

We do know that there are applications which have been made which have been ruled upon by the Special Master, and reviews pending before Judge Metzner with respect to the manner in which this [40] pre-trial discovery procedure is to be conducted in the future.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

I am not going to revert to the length of time for a number of reasons—the number of deposition days we have been engaged in, I don't think require my comments at this time. We have not been a year on depositions. A year has elapsed—more than a year has elapsed—for a number of reasons.

I don't think it is necessary for me to go into those at this time.

Judge Metzner's order—I am referring to the one of March 5, 1962, contains the following:

> "At the outset of the litigation last summer defendant Hughes Tool Company obtained priority in the deposition discovery procedures."

That is what Judge Metzner said in so many words. Then he refers to the fact that it has been assigned, and then my recollection is that Judge Metzner ordered that the Tool Company would continue to take depositions of those people noticed pursuant to the original notices of the Tool Company, which was TWA by certain individuals, and a number of others, and that after that had been completed, TWA could engage in discovery procedures.

[41] Thereafter the additional defendants could, and thereafter the Tool Company could resume. In that same order, as I recall it, the Tool Company was limited as to the area which it could cover in its discovery procedures.

Whether or not Mr. Dudley would like to persuade the Court to change the order, the manner in which these depositions have been taken—I know he has a right to apply to the Court. I recognize whenever there are changes in circumstances, upon a showing of a need, that the Court will undoubtedly listen.

There is no question this record is full of repeated efforts to change that order. I don't understand what Mr. Tenney is referring to by saying that this situation is to be controlled by the rules as though there had been no orders of the Court, because there have been.

Reference has been made to the procedure that the Tool Company followed. It is true the Tool Company is merely following—following the service of this complaint, did serve notice for taking depositions, and did serve subpoenas duces tecum. It was that which was the subject of these prior orders of the Court.

[42] The effort that was made at the time the complaint was filed under seal, an effort was made to obtain the right of the plaintiff to examine Mr. Hughes before the Tool Company could examine, and that was denied. If they want to apply again, they can apply again, but let us recognize what the record is.

What are the rules which are applicable here? Before I go into that I should point out, as I think everybody recognizes, that Judge Metzner in one of his orders establishing the manner in which pre-trial proceedings were to be conducted in this case, and in the exercise of his discretion, did permit the plaintiff and the additional defendants to obtain documents, broad categories, as reflected by the various schedules that were attached to the applications—notwithstanding the right of the Tool Company to pursue with its oral examination, depositions, without interference.

That is what I understood the situation to be, until recently when counsel for TWA began to serve some notices for the taking of deposition of a number of witnesses which

had heretofore never been listed by anyone, and obtaining subpoenas duces tecum for the production of documents in connection with those deposi- [43] tions.

I understand they are referred to sometimes as dry depositions, in the sense they were willing to waive the right to take oral examination.

I have previously stated that I was not inclined to object to any procedure which would give counsel for TWA, or even counsel for the additional defendants, any additional documents that they had not obtained in connection with the Rule 34 motion which had been made and which was granted, so long as it did not impose upon us any unreasonable burden, or annoyance, and so long as it was contained within reasonable limits.

That is still basically my position, not because of any desire to be generous, but for the very simple reason I would like to be in a position of giving to these people all documents they can possibly find anywhere in anybody's hand so they can answer these interrogatories which I want answered.

Therefore I am reluctant to do anything or take any position which in any way would interfere with an opportunity to answer these interrogatories. I would like for them to have all these documents.

[44] At the same time there are limits to what I am prepared to do, when the rights of either my client, or persons associated with my client, or mine are interfered with in a manner which to me is without conceivable justification.

The history of this is that because they served a notice for the taking of the deposition of Mr. Hughes long before they had any right to commence the taking of depositions

of anybody, but presumably so that they would be in a position to serve a subpoena upon Mr. Hughes, they also took the position that they ought to have an opportunity to get documents and begin to prepare themselves for the time when under some court order yet to be obtained, they would be in a position to conduct some oral examination, and I do not question the right they have to obtaining, from wherever any documents exist, whatever document they need in preparation for that date.

I want to point out that TWA is making no showing of a need for the production of any documents at this time, unless it is for the purpose of answering interrogatories.

As to my standing, to take a position with respect to this subpoena, I respectfully submit that [45] whether or not there is an argument they are proceeding under 34 or 45, they have the same standing, because 45 refers to 30(b), and I am seeking a protective order under 30(b), and 30(b) says that after noticing is served for taking a deposition, upon motion seasonably made by any party, or by the person to be examined, and upon notice and for good cause, I may obtain a limiting order, and that is the basis upon which I am applying, in addition to the fact that I construe the existing orders of the Court to have limited the right of TWA to proceed without leave of Court.

I believe that the record to date, and certainly the statements made by Mr. Tenney's partner, Mr. Sonnett, which appear at page 68 of the transcript, clearly recognizes that situation—at least I thought it did.

The prior orders of the Court in this case and Rule 30(b) is the basis upon which I am appearing and objecting to these notices and attached subpoenas.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

The only one at the moment which remains unresolved is this one directed to Atlas Corporation.

What is it in fact I am really objecting to? It is not so much the procedure of what is being [46] worked out between Mr. Tenney and whoever is representing Atlas in this matter, although I must say that if there is not some indication as to where the limits are of this kind of a procedure, I would be burdened.

The fact of the matter is that I do have the assistance of Mr. Cox and Mrs. Lea, but there are a great many things to be done also, which I believe Mr. Tenney understands a lot better than he indicated in his description of how things could be done if he had his way.

My objection to the schedule relates to the perfectly unreasonable and unjustifiable description or attempted definition of persons associated with Hughes Toolco or Hughes Aircraft, which appears in the footnote 1 to the schedule.

If that is construed merely as indicating that any communication relating to the subject matter covered by the schedule, by any of these named persons for or on behalf of the Hughes Tool Company, or anyone reasonably associated with this action, I would have no objection.

But if you take this definition literally, it calls for all writings relating to communications between or among any of these named people, and I [47] point out a number of them are counsel, lawyers. I am one of them.

I do not know, and I do not believe that so far as I am personally concerned there are any communications relating to jet aircraft or airplanes, and flying machines, and all systems, engines and component parts, which I have ever written on behalf of anyone else, which are in

the possession of Atlas Corporation, although it is conceivably so.

For a long period of time when I was a member of the firm of Simpson, Thacher & Bartlett, I did represent Atlas Corporation, and I do not know what letters or communications I may have written to an officer or employee of Atlas Corporation relating to the affairs of I don't know who.

I haven't any idea what Mr. Bautzer, or Mr. Cook, Mr. West, Mr. Richard Gray, or some of the others—or what communications they may have had among them relating to matters wholly unrelated to any conceivable asset of this lawsuit.

I wrote a letter for the purpose of getting some kind of confirmation that that was not the intention. There was no intention to annoy, harass or embarrass any of these listed individuals under the device of [48] seeking documents needed for some understandable purpose in connection with this lawsuit.

Then I refer to Paragraph E of this schedule. All of these sub-paragraphs are covered by this footnoted item, in individuals that I have mentioned.

E refers to any transaction or contemplated transaction, proposal or negotiation between Northeast or Atlas on the one hand, and Hughes or Toolco on the other hand, for the acquisition or proposed acquisition by Hughes or Toolco of any stock, debentures, notes, evidence of indebtedness or other securities of Northeast, or the guaranteeing or endorsement by Toolco or Hughes of any loan by any financial institution to Northeast, or the furnishing by Toolco or Hughes of additional securities for any such loan, whether as an accommodation or otherwise.

The period of time covered is from 1956 to date, to the date of this subpoena.

We do know in this complaint, on the basis of facts which no one can ever disclose, it is claimed that part of this alleged conspiracy was an effort to obtain control of Northeast, even though the testimony to date indicates—I am not so sure, but I think the pleadings themselves recognize that what is there [49] referred to was the submission of a proposed agreement to acquire control of Northeast, subject to stockholder's approval, of both TWA, a majority of the minority stockholders of TWA, and the Northeast stockholders, but also approval of the CAB.

We all know that Section 414 of the Federal Aviation Act specifically excludes from the provisions of the antitrust laws a transaction covered by a 408 proceeding.

Everyone here knows, and counsel for TWA, better than anyone else, because Mr. Ordover sitting here participated in the sense of being present, that there was a 408 proceeding before the CAB, relating to the acquisition of control of the Tool Company of the Northeast, which was approved by the CAB, which is now a final order by the CAB, and which relates to transactions involving efforts of the Tool Company to give financial assistance to Northeast up to now, arrangements which are being made currently with banks, and accommodations which are being made providing funds to Northeast, and I submit to you, Mr. Special Master, that this appears to be an effort to go and inquire into the affairs of Northeast and of the Tool Company, which is frankly and clearly and [50] admittedly outside the scope of this complaint, no matter how you construe it.

It may be that Atlas Corporation does not care as to what they make available or don't make available.

I submit to you there is no conceivable justification that I can recognize, and there has none been advanced by Mr. Tenney with all the talk that we heard about why the prior court orders are improper, that justifies that effort.

We do know that there was for a long time discussions, and presumably a discharge of their fiduciary obligation, these TWA directors should be considering Northeast.

I think it is a matter which is of record without going into any privileged communications or discussions—that information with respect to Northeast and its affairs is a matter that may be of some concern in the business area.

If TWA is interested in details with respect to some of Northeast's affairs, it may be that we would be willing to let them have the information. But not under the so-called guise for the noticing of notice of taking depositions, then making it dry, and [51] obtaining a subpoena duces tecum, and approaching it from the point of view of having a right under the guise of this lawsuit.

I will close by merely pointing out that I am prepared to consider voluntarily any agreement that is worked out between TWA and Atlas for the production by Atlas of any documents, or group of documents which anybody believes that any conceivable relationship to alleged violations of the antitrust laws, but when it comes to attempting to annoy, harass or embarrass the Tool Company or any of its affiliated companies—Hughes Aircraft, for instance, which is named here.

I don't represent Hughes Aircraft. They know since Hughes Aircraft Company is wholly unrelated to the Hughes Tool Company.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

The laughter may be funny to you, Mr. Marshall Cox. It is not funny to me. Nothing will be funny to me until you and your firm have the courage to disclose the justification for the complaint you filed.

I submit that on the state of the record to date, and without showing more justification than I have heard here today, the Tool Company does have the right to object to a procedure in this proceeding, [52] in this lawsuit, under the sanction of the existence of this complaint, under the umbrella of the orders of this Court, to do what they are seeking to do by this proposed notice and subpoena.

The Special Master: Mr. Tenney.

Mr. Tenney: I should like to ask you, Mr. Rankin, to bear with me for a moment, because I agree that much of the discussion that Mr. Davis and I have engaged in as to prior orders of the Court is not really germane to the issue here, but it is important discussion, nevertheless, because I think I must not leave the statements of Mr. Davis unchallenged.

Mr. Davis has referred to a statement by Judge Metzner. I believe the date of it was March 5th—outlining the history of the case to that time, in which the phrase is used that "Toolco secured priority at the commencement of the action."

That is a description of what occurred and must be taken in the light of what did occur, and of the rules as they then existed.

It is true that counsel for TWA attempted to secure permission to take the deposition of Mr. Hughes before any depositions were taken on behalf of Tool Company.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

[53] This under the Federal Rules and in the light of the time that this attempt was made, it being immediately following the institution of the complaint, and in the light of the fact that new Civil Rule 4 had not been adopted, which would at least have changed the situation after a period of forty days, had it been adopted at that time, this did require, as I say, consent, and it was not obtained. It was denied.

That resulted in counsel for Tool Company being permitted to start taking depositions before counsel for TWA could. This is in a sense priority.

The key point that I was trying to make earlier is that this is not a determination of an absolute priority which I believe really would have been unprecedented in this district.

It was a limited priority. It applied to what was before the Court at that time—before my connection with this case—I think it was before Judge Herlands.

Moreover, the reference that Mr. Davis made was to a historical statement, not to an ordering paragraph by Judge Metzner. I think that is significant too.

I think the significant things about those orders [54] are that the orders themselves were quite limited. They did—the evidence of the past year shows this—they did undoubtedly permit counsel for Tool Company to commence taking examinations and to continue taking examinations while counsel for TWA was not permitted to do so, pending some further order.

But that is quite a different thing, I submit, from a determination that counsel for Tool Company had a right to continue to do so for an indefinite period of time as an absolute matter.

The order has to be limited to what was before the Court. The schedule of depositions to which Mr. Davis referred almost simultaneously is part of a different order, actually, and it does not contain a single word about priority.

It contains a schedule of depositions, all of which would have been completed by now if that schedule had been complied with.

The Special Master: It would seem to me, Mr. Tenney, that Judge Metzner made it very clear that the Tool Company had secured priority because he recited the history, and in reciting the history he proceeded to say he did not grant that priority, that it had already been determined by other judges of the Court [55] before the case reached him, as I recall the order.

Mr. Tenney: That is correct, sir.

The Special Master: Then he proceeded to set out the order in which depositions should be taken.

It seems to me in his order of July, in which he modified the order insofar as, particularly, the additional defendants were concerned, he said that it wasn't necessary to have Rule 4, that the Court always had that discretion to determine a change in the order of depositions, and that he conceived that the Special Master had so construed his powers, and that was an inherent power. That is the way I read it.

Mr. Tenney: Yes, Mr. Rankin, I quite agree with you on that. My problem is that counsel for Tool Company has not so construed these references to priority. Counsel for Tool Company has attempted to erect these things into some absolute right that can only be taken from him with his consent, which I am quite sure he will not give.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

I was going to address myself to the more recent orders of Judge Metzner just for the moment again, because I think it is most unfortunate to have these statements as to what they mean to go unchallenged, [56] when I disagree with them.

I think the July 12th order of Judge Metzner, and the orders entered in September—actually, there were some directions in the course of colloquy on September 6th, and a formal order entered on September 21st.

I think it is impossible to read those orders without concluding, as I have concluded, that contrary to what counsel for Tool Company says, there is now an order of the Court calling for the early examination of Mr. Hughes.

At the moment the original date having been set by the Court, being October 29th, which is now past, and the Special Master having set February 11th, a date which is on appeal, and subject to the application that I have given notice I intend to make for changing that date to January 14th, this may seem a little bit not directly important right now, but its importance for the future is very great.

Mr. Davis constantly by mis-characterizing these orders on the record creates an aura in which the orders are intended to be absolute, which they are not.

I would like to address myself more directly to [57] what is before the Special Master at this moment. The difficult thing with Mr. Davis' position is that the documents that are requested are not his documents, or the documents of his clients.

The subpoena is not addressed to them. The subpoena is addressed to Atlas Corporation—documents in their possession.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

It hardly seems worthwhile emphasizing that difference, but Mr. Davis devoted so much of what he had to say to it, that I suppose I must go over it again.

His clients have no property right in those documents. No letter from the counsel that he referred to, to Atlas, possibly affects any attorney-client privilege of any of his clients.

If there could possibly be an attorney-client privilege, it would be that of Atlas. It is always waivable, as far as that goes, by Atlas.

As to Mr. Davis' personal position, I think he may not have noticed—I would like to call his attention to the fact that in consideration for the fact that he might personally find this somewhat troublesome because of his past connection, perhaps with Atlas, we have made a special limitation of date as to documents coming to or from Chester C. Davis, so [58] it applies only to documents after May 22, 1961, which I submit, illustrates our desire not to raise any difficult questions with anyone, but to stick to what we have a right to get.

These documents, I submit, are clearly within the scope of the complaint. I do not see how anyone can challenge that, although I recognize the fact that Mr. Davis has challenged it. There is no basis for that challenge.

Moreover, the limitations of relevancy are primarily intended for the protection of the person to whom a subpoena is addressed, unless there is demonstrated some actual attempt to harass Mr. Davis' clients—and it is excluded by the nature of the proceeding—he has no right to talk about relevance.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

We have, as counsel for TWA, the right and the duty to try to determine ourselves what type of evidence we will be able to submit, to try to obtain evidence that will be admissible, and in that, to extend our search beyond the precise limits of admissible evidence, so as to get documents that may produce other documents that may be admissible evidence.

[59] The Special Master: What about the Northeast documents? Can you tell me, Mr. Tenney, why those are requested?

Mr. Tenney: Northeast, and the relationship between Northeast, and TWA and Tool Company, is a central matter in this litigation. It occupies a substantial portion of the complaint. The documents which we expect to get from Atlas, we hope will be extremely useful in establishing the charges that we have made as to Tool Company's activities in connection with Northeast. That is Point 1.

Point 2. I believe that the activities of Tool Company in the procurement and supply of aircraft to Northeast are of profound significance in determining the nature of the business that Tool Company was engaged in, and particularly in the light of some of the antitrust issues that are presented in this lawsuit, in the light of the duPont case, involving the activities of a supplier who is also a major stockholder of its customer.

Moreover, sir, it seems strange that counsel for Tool Company never refers to the fact that there is a non-antitrust cause of action in this complaint. The third cause of action is not under the antitrust [60] laws.

If there is, which I do not believe to be the case, an available exemption to Tool Company from the application of

the antitrust laws to its wrongful conduct with respect to TWA, that exemption is clearly not applicable to the third cause of action.

But [what] counsel for Tool Company would like to have the Special Master and the Court do is accept, before he proves it, before he establishes it, that he has, or his client has a complete defense to this action.

If there is a complete defense to this action, and it is upheld by the Court, the action is terminated, and the plaintiff no longer has the right to seek to develop evidence to prove its claims.

Until that defense has been proved, the simple assertion by counsel for the defendant that he has a good defense does not deprive the plaintiff of its right.

We have to go ahead and prove this complaint, and we intend to do so, and we think the means that we are using at the present time are reasonable, and are most certainly not any kind of harassment.

The Special Master: I am wondering about information as to financial transactions, recent [61] financial transactions with the Northeast—how they are involved in this litigation. Maybe you can help me on that, Mr. Tenney.

Mr. Tenney: The complaint here charges a continuing wrong. It is not ended on June 30, 1961. There are allegations in that complaint, and applications for injunctive relief, that are continuing.

We are not fully aware of what Tool Company's activities with respect to Northeast have been. We believe that we can establish, if we are given an opportunity, that in the past at least, and we can get to the past in many instances from the present, those activities have involved a

violation of the rights of TWA, cognizable at equity in the historic stockholders' suit, involving a misappropriation by a majority stockholder of rights belonging to the corporation as such, and in our judgment, cognizable under the antitrust laws as well.

Those are continuing. It is a seamless web really. I don't see how you can place a date of limitation on just when we can find evidence relevant to this scheme and plan and past conduct of Tool Company.

I would like to emphasize again, Mr. Rankin, [62] that these are documents in Atlas' possession, not documents in Northeast's possession. We are asking for matters that have already been disclosed by Northeast, in the case of the particular documents that you referred to, to Atlas Corporation. There can be no question of privilege there.

The Special Master: There could be harassment if you are asking for things that you may be entitled to later, but not at this time, in light of getting key information for the purpose of taking Mr. Hughes' deposition.

Mr. Tenney: I might mention also cross-examination of Mr. Leslie, which in the light of the direction made this afternoon, has been postponed, of course. We consider that this material may be very useful also in connection with the cross-examination of Mr. Leslie.

As far as harassment goes, I am sorry, sir, I don't see who we are harassing. Mr. Davis says he would like us to have documents, but he sure won't let us do anything about getting them.

Atlas has not claimed harassment.

As to Hughes Aircraft Corporation, which I apologize for laughing about, it is our belief [63] that Hughes Aircraft Corporation is a creature of Mr. Hughes.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

The Special Master: If the footnote was construed as Mr. Davis was suggesting, how does that limit you in the way it is objectionable?

Mr. Tenney: The sneak phrase he put in there is acting on or on behalf of Mr. Hughes. I do not want there to be a determination prior to our examining these documents, whether a particular associate of Mr. Hughes, among that group name, was in connection with a particular communication in the Atlas files, was acting for or in behalf of the Hughes Tool Company.

The ways of the Hughes Tool Company and Mr. Hughes are sometimes strange and mysterious. The only way I can identify the documents I need are by addressee, addressor designations. It means that Atlas Corporation does not have to make a decision as to who Mr. Davis was acting for after May 22, 1961, when he wrote a letter to Atlas Corporation. They are entitled to assume, as I do assume in fact, that he was acting for whoever he was acting for—these documents are relevant and significant to this litigation.

[64] I emphasize there is no attorney-client privilege at all.

The Special Master: Even if they relate to someone else—the mere communication of address and addressor would be controlling?

Mr. Tenney: There is another non-conclusory limitation. Relating directly or indirectly to jet aircraft, including but not limited to airplanes and flying machines, and all systems, engines and component parts of such jet aircraft, and the financing thereof to summarize some of the remaining language.

We are not asking for things that don't have something to do with this litigation.

Transcript of Proceedings Before Special Master J. Lee Rankin, December 14, 1962

I should also like to call your Honor's attention again to the letter which we wrote you—addressed to Mr. Rankin by Mr. Sonnett—on November 8, 1962, which has actually been marked as an exhibit so as to get it on the record. The authority cited there, I think, established that contrary to Mr. Davis' assertion of a right to plead harassment because the documents requested from third parties are not in his view germane to the action—his standing is very limited indeed. The case of Shepard and Kassel makes it clear [65] he can't plead another party's harassment. It is either his own, or the other party should plead harassment.

The Special Master: I construe that when I said this could be done, it was conditioned upon any party being able to object. I said at the time I considered that part of it—whether or not his claim of harassment is valid, is something else—but I did recognize any party to this litigation granted the right in this manner, which I construed was out of turn in light of what I thought was the priority schedule of Judge Metzner, was subject to the right of any party to object at the time, on the ground of harassment or the burdens that were imposed upon them.

I indicated then and still feel that you should have an opportunity to try to advance your case if we can carry on the other activities, as the Court has directed, must have priority. I want to try to find out how we can get that done without an unreasonable burden. That is why I was asking particularly about limiting the demands or the production to such documents as would relate to the Hughes Tool Company. I do not recognize Mr. Davis' claim about the aircraft company. I assume when he says that the [66] ownership was transferred in 1956, that it is a fact that

he will establish or try to establish later in the proceedings, which is something that he shall have an opportunity to do. But up to that time that you have a right to inquire into it, and find out how valid it is, and what happened in regard to it—at least as long as it was part of the Tool Company, it is part of the issues involved from 1939 up to that time.

So I have thought that the Hughes Aircraft Company is a reasonable inquiry at least within certain limits.

I don't want to foreclose you, Mr. Davis.

Mr. Davis: On the Hughes Aircraft, Mr. Rankin, to my mind it is no more of a problem than what Mr. Tenney keeps overlooking. First of all this footnote does not relate merely to subparagraph A, but all the subparagraphs of the schedule, because it is a definition of associated persons. The problem that arises there is the possibility, of which I am not aware, of communications between these various people relating to something else, which for one reason or another may be in Atlas' possession.

The main point, however, is on this Northeast [67] situation. That gives rise to the statement by Mr. Tenney that of course if we were in a position at this point to obtain a ruling of the Court on the validity, continuance of this complaint, all of its rights would disappear.

In that connection I want to emphasize the fact that no one here can seriously question, and I can assure a Special Master and a Court that it is our intention that as soon as we have the answers to interrogatories, we will have that question before the Court.

There have been rulings by the Special Master that these interrogatories are to be answered. Once those interroga-

tories are to be answered we will understand the area of issues as to which documents may be relevant or pertinent.

The problem we now have is the effort on the one hand to determine what are reasonable requests, what are reasonable burdens based on this vague reference of issues.

Mr. Tenney is saying about Northeast Airlines, and the dealings and transactions relating to Northeast are the essential parts of the case. I don't understand what that means.

[68] I certainly don't understand what the financial arrangements of which Atlas was necessarily a party, since up until the transfer of its majority ownership of Northeast to the Tool Company, pursuant to the CAB order—they were a party to all these various transactions, and banking arrangements currently being discussed, negotiated and arranged for.

I don't think there can be any question about the validity of the 408 proceeding before the CAB, and the legal effect of those proceedings without arguing the matter at length.

The reference to the third cause of action refers to a wilful and malicious interference into the affairs of TWA —how this Northeast matter can have any bearing on this —is beyond my understanding what this schedule and subpoena is all about.

May I suggest, Mr. Special Master, that the rights of TWA to proceed for discovery of additional evidence, of documents in this matter, since apparently it is not related to their ability to answer interrogatories—that the matter be held in abeyance until we have a ruling by the Court on the matters now pending before it, as to the obligation of

TWA to answer interrogatories now on what is really the practical answer to [69] all these burdens that are being imposed on a great many people, and a lot more—this is no assurance yet, that after having had gone through this procedure with Merrill Lynch, First Boston, Mr. Henry Crown, Mr. Atlas, and this will go on indefinitely.

May I suggest that a possible answer to this entire problem will be found after we have an appropriate determination by the Court, where the matter is now pending, as to the obligation of the plaintiff at this time to disclose by answer to interrogatories, or pursuant to the other matter which is pending before the Court—the application for the Rule 16 proceeding—so that the area of the issues will be defined.

The motion to dismiss can then be scheduled for argument and disposition, and having that behind us, then the rights of the plaintiff, which Mr. Tenney is so anxious to protect at this time, will then be fully and adequately protected.

I still haven't heard a reason why it is of any moment or importance to TWA or its counsel to have what they are seeking now, and more particularly I still have not heard a rational explanation of what it is—they are familiar with the complaint—the [70] contentions what is the conduct of the Tool Company or Atlas or Northeast that violates these antitrust laws—how it is that the arrangements or accommodations that the Tool Company may have given to Northeast, or is currently giving to Northeast, all of which was the subject of a 408 proceeding before the Board, and approved by the Board, and now that the Board has determined that it is in the public interest, and

outside the scope of the antitrust laws, for the Hughes Tool Company to acquire control of Northeast, how it can be that the allegations of this complaint include or cover some kind of violation of the antitrust laws by reason of our dealings relating to Northeast. This is something I am still unable to understand, but undoubtedly when these interrogatories are answered, the Court will be in the position of determining just what is the legal justification for counsel for TWA, and the present management of TWA to use the funds of TWA in the manner they are being used, and to impose a burden upon the Tool Company and others by reason of the continuation of this lawsuit.

I submit that a possible sound disposition of this question might be made after we have a clearer [71] understanding of what is involved in this complaint, and presumably the decision of the Court, either on the Rule 16 motion, or in connection with the interrogatories, will give us the answer.

Mr. Tenney: We find ourselves, Mr. Special Master, talking about things here, again and again, which are not apparently directly germane to what is before you. Now the interrogatories. The reason that this is so, sir, is that what is here before you is an attempt by the plaintiff to proceed to prepare its case, as I submit, it has the right to do.

Counsel for Tool Company is opposed to the plaintiff developing evidence in support of the case.

He has various things now pending, each of which would be a major obstacle in the plaintiff's preparation of the case.

The interrogatories is one of them. The interrogatories were not drafted to be answered. They were drafted to be

unanswerable. We have tendered evidence that it would take six men over a year at TWA alone to prepare answers to a portion of these interrogatories.

We have offered a witness on that subject, and will call him when and if the Court desires to examine [72] into the accuracies of that representation.

The significance here, of course, is that counsel for Tool Company wishes to postpone as long as possible, forever, if possible, any development of the affirmative case of the plaintiff. Obviously therefore counsel for the Tool Company would find it extremely reasonable to delay any decision on this very simple matter, until some future time when innumerable other things would have presumably been decided.

One thing that would definitely be decided by that procedure would be that plaintiff would have been forbidden to conduct its limited discovery to try to establish the allegations of the complaint.

On behalf of TWA I object to any delay in the determination of this matter. I believe that we are entitled to this information. I believe that we have asked for it in such a way as to avoid any possible harassment of counsel for Tool Company, or interruption of the proceedings that counsel for the Tool Company is engaging in—any of them.

The Special Master: I am ready to tell you my thoughts in regard to the matter, and possibly it may be necessary to delay a definitive order until [73] Monday if the suggestion that I may make cannot be worked out by counsel for the parties.

I think you are entitled to a ruling, and I am quite reluctant to delay the matter and appear to be trying to

pressure the Court into an earlier ruling than he would otherwise make in regard to the matters that he now has on review. I think it is my duty and function to try to decide the matters that come before me the best that I can, and as they reach me from time to time, and let the Court handle his own business in his own way, without any action of mine appearing to be awaiting some action of his.

I have generally considered that Judge Metzner's orders had granted certain priority to the Tool Company, and that Judge Metzner has made it clear that he felt that he had the discretion to change that priority, and that the Special Master had such a discretion and had exercised it in the past, and that Rule 4 was merely a recognition of that inherent discretion in the Court.

I also have construed that while Judge Metzner provided for certain priority on depositions, that he also wished or made orders that caused me to think that he wished the parties to have available to [74] them the documentary evidence that might assist them in the preparation of their cases, even though they were not authorized under the order of the Court to proceed immediately with the oral examination of their witnesses.

I recognized in the record when Mr. Sonnett made inquiry, that he could make the limited discovery that he was requesting, which he said would be limited to key documents by this dry deposition procedure, and if you will recall, when the matter was before me concerning Merrill Lynch, and First Boston, I said explicitly that the decision in those two matters should not be considered as a precedent for any similar proceedings, and particularly would I examine any later proceedings as to any undue burden or harass-

ment. I believe that the plaintiff is entitled to obtain the documents at this time subject to some reasonable limitations, and I am disposed to sustain the motion of the Tool Company insofar as it purports to extend the footnote in such a way as to reach documents not related to the Tool Company, the Hughes Aircraft Company, and Mr. Hughes, and as to the Northeast Airlines insofar as it would reach out beyond key documentary material relating to the [75] Northeast Airlines. That is, that I consider you are entitled to documents that will assist or might lead to relevant evidence concerning the activities of the defendants with relation to Northeast Airlines in regard to some of the allegations of the complaint.

So I suggest that if counsel prior to noon Monday can agree upon some limiting language, I will be pleased to accept that, and if that is beyond your ability, I will enter an order that I will draft myself at 2 o'clock on Monday, generally sustaining the right of the plaintiff, but limiting it in the respects that I have indicated.

Mr. Davis: Could you make it a little later than Monday noon, because I don't intend to work with counsel over the weekend.

The Special Master: Mr. Tenney, do you have any objection to it going to the close of the day on Monday?

Mr. Tenney: I have no objection to the close of the day on Monday, sir. I see no real difference from my standpoint on that.

May I ask for one point? Perhaps you might comment as to what you mean by "key documents," sir, because I find that it might be rather difficult for [76] Mr. Davis and

I to agree, since I am sure that he would think a document that I thought was quite important would be entirely irrelevant.

Mr. Davis: No, Mr. Tenney. You identify any group of documents which you think support the contention of the violation of the antitrust laws, you can have them.

If you are trying to go into the area of what the aid or assistance or banking arrangements or accommodation of the Hughes Tool Company gave to Northeast during that period, starting, I think, in September of 1961, the various matters presented to the CAB, which culminated in that 408 proceeding and the order of the CAB, I do object to it.

If you are referring to Northeast documents in the so-called period prior to, up to and including the discussions, conferences or efforts that were made to develop a merger agreement to be submitted, between TWA and Northeast; May 1958, 1959 or 1960—if that is the period, you can have them all.

The Special Master: I think it might help if counsel would try to agree—if they would each submit to me by 4:30 on Monday, his suggestions limiting the language of production. What I had in [77] mind was what Mr. Sonnett said when he said "key documents for the deposition of Hughes, to wit, documents constituting or relating to communications from Hughes or on behalf of Hughes to others, on certain subjects which would be a narrow but exceedingly important range of documents to have for his deposition."

He was defining to me at the time when he was asking for this authority, and that is all I can turn to, is what he said.

I don't mean to limit you precisely to that language, but something that would fit in with the spirit of it.

Mr. Tenney: I will see what we can do, and make such suggestions as I am able to. Perhaps Mr. Davis will favor me with his ideas during Monday, and I can look at them.

Mr. Davis: You are the plaintiff, Mr. Tenney.

The Special Master: If you can't agree, exchange your proposals, at least.

(Whereupon, at 7:00 p.m., the hearing was closed.)

Special Master's Ruling on Toolco's Motion to Depose Sessel and Wadsworth, December 28, 1962

[18762]

* * *

The Special Master: I am ready to rule on the motion of the Hughes Tool Company for a direction that following the completion of the present examination of E. O. Cocke, Tool Company may on the completion of the deposition of A. V. Leslie, or in conjunction with his staggered deposition, next depose Ben-Fleming Sessel, and the Irving Trust [18763] Company by Sessel, and Arthur L. Wadsworth and Dillon, Read & Company, Inc., by Wadsworth.

I consider it necessary first to review the record. I shall therefore refer briefly to the prior orders of Judge Metzner and the Special Master in this case.

The priority of Tool Company in the taking of depositions herein was recognized by Judge Metzner in his order of February 7, 1962. In setting the schedule for the taking of certain depositions by the defendant and the plaintiff and fixing the time for taking all depositions noticed by the defendant first, and the depositions noticed by the plaintiff in the order that Judge Metzner entered. That was the effect of his order.

In his order of March 5, 1962, Judge Metzner recognized this priority by stating:

> "At the outset of the litigation last summer, defendant Hughes Tool Company obtained priority in the deposition discovery procedures."

However, he then went on to say:

> "While the courts have adopted a normal rule of priority, depending on time of service of a notice

to take deposition, and the necessity for a defendant [18764] to obtain particulars of the charges leveled against him because of the notice form of pleading, such rules are not rigid in their application, and must yield in unusual circumstances to the ultimate goal of prompt orderly and fair disposition of the litigation.

"Furthermore, the plaintiff who instituted the litigation must not be lost sight of in the maze that has resulted from the pleadings.

"The service of a notice to take depositions six months before answer cannot afford the defendant Hughes Tool Company the right of priority insofar as its counter-claims are concerned."

In the order just referred to the Court allowed the Tool Company to continue its schedule of depositions.

"Limited, however, to evidence which bears on plaintiff's claims against Hughes Tool Company."

He further provided that then the plaintiff should proceed with its schedule of depositions "In the order provided in the pre-trial order of February 7, 1962."

He also authorized the additional defendants to either participate in the depositions conducted by the plaintiff, or by separately scheduling depositions to follow those taken by the plaintiff.

He further provided that at the conclusion of those [18765] proceedings by the additional defendants Hughes Tool Company was to resume and complete its depositions.

On the appeal from the order of Special Master denying the motion of the plaintiff for an order determining that

Special Master's Ruling on Toolco's Motion to Depose Sessel and Wadsworth, December 28, 1962

Rule 4 of the Civil Rules of the United States District Court of the Southern District of New York was applicable in this case, the Court said:

> "Irrespective of Rule 4, the Court has the power to vary any order heretofore entered fixing priority of deposition—discovery proceedings."

Judge Metzner allowed the plaintiff to renew its motion before the Special Master on September 20, 1962, saying:

> "If at that time it is advised that the depositions scheduled upon the completion of the Tillinghast deposition are not moving as expeditiously as possible, and that any further delay in the taking of the depositions of the defendant would be prejudicial to the plaintiff."

In his September 21st order Judge Metzner passed upon and approved the interpretation and conditions expressed by the Special Master as to the binding effect of the subpoena, for which Chester C. Davis, on September 6, 1962, accepted service on behalf [18766] of Howard R. Hughes, obligating Mr. Hughes to appear as a witness for the taking of his deposition. This was to be taken in the United States District Courthouse for the Southern District of California, in Los Angeles, on September 24, 1962, or at any future time that the Court might direct for the taking of Mr. Hughes' deposition pursuant to the subpoena.

Such action was subject to the penalty of grave sanctions which the Special Master stated in his order.

In the same order the Court approved and affirmed "The ruling of the Special Master denying the application of the plaintiff to proceed with the deposition of Howard R.

Special Master's Ruling on Toolco's Motion to Depose Sessel and Wadsworth, December 28, 1962

Hughes on September 24, 1962, to the extent that the return date of September 24, 1962 contained in the subpoena served upon Howard R. Hughes is adjourned by order of this Court to October 29, 1962, at the same time and place.

Judge Metzner further said:

> "The Tool Company may apply to the Special Master on October 22, 1962 for a further adjournment of the date now fixed for the deposition of Howard R. Hughes."

On October 25, 1962, I passed upon the applica- [18767] tion of the Tool Company for a further postponement and set the return date for the subpoena for February 11, 1963.

My order is now on appeal before Judge Metzner.

I wish to refer to my order of October 25, 1962, and so clarify it in this order that there may be no valid basis for misunderstanding it.

In that order I found that all parties had cooperated in the production of documents, and that the Tool Company had diligently proceeded with the discovery proceedings in taking depositions.

I had suggested an application for a Rule 16 pre-trial proceeding to aid in defining and sharpening the issues in this case. The Rule 16 question is now before Judge Metzner.

I set over the return date of the subpoena for Mr. Hughes to February 11, 1963, "and provided that the return date for the notice to take depositions and the subpoena be adjourned to that date, and that the deposition be taken at the same time and place."

Thus, I indicated, and I now wish to remove any doubts about it, that I set the date with the intention and expecta-

tion that the deposition would start at [18768] 10 o'clock on that morning and proceed until it was concluded according to law.

I postponed the date to the time I designated to allow for action in several respects which I described at length. I took into account the witnesses that I thought could be completed by that date, or if not, I planned that there would be an interruption of their depositions.

I named such witnesses as Mr. Cocke, Mr. Leslie and Mr. Breech. In my announcement I referred to the opportunity for the Tool Company to present any motions reaching the question of whether the Court had jurisdiction of the subject matter, and a motion to dismiss the action in the intervening period.

I have overruled motions attacking the interrogatories served on TWA, so as to provide the full benefits of the rules to aid discovery in the interim.

I took into account the people involved and the requirements for moving them as well as the necessary documents and records.

All of this was done in order that there be no doubt left that it was my purpose and intention to proceed with the taking of the deposition of Mr. Hughes by the plaintiff beginning February 11, 1963 [18769] at 10:00 a.m. in Los Angeles, at the place designated in the notice.

I was trying to exercise a judicial discretion in recognition of the need of the defendant to obtain the particulars of the charges leveled against it, and of the further fact that a year will have elapsed by February 11, 1963, since the defendant began taking depositions.

I believed then as I do now that in the light of the discovery that has occurred, the defendant will not be affected

Special Master's Ruling on Toolco's Motion to Depose Sessel and Wadsworth, December 28, 1962

adversely beyond the exercise of a reasonable discretion in light of all the facts to interrupt the taking of depositions merely by allowing the taking of the deposition of Mr. Hughes by the plaintiff.

I also determined that in fairness to the plaintiff it should be allowed at such time to take the deposition of the person by whom plaintiff's counsel have repeatedly asserted they expect to be able to establish 75 per cent of their case.

I considered that the ultimate goal of prompt orderly and fair disposition of this litigation would be substantially advanced by such interruption, and I reaffirm each and all of those conclusions.

[18770] I am now denying the application and motion of the Tool Company to depose Mr. Sessel and the Irving Trust Company by Mr. Sessel, and Mr. Wadsworth and Dillon, Read & Company, Inc., at any time prior to the taking of the deposition of Howard R. Hughes, which is to begin on February 11, 1963, as indicated above.

I do not think it would advance the proper administration of this case since it would in my judgment inevitably branch out into the issues of the counter-claims, or result in such continuous controversy as to the exact limits of such issues that it might interfere with the taking of Mr. Hughes' deposition at the time and place fixed.

Are there any questions?

Mr. Davis: I take it this also covers a denial of the application to take that of Mr. Wadsworth?

The Special Master: Yes. I think I should provide for a prompt time for a review of this order before Judge Metzner if anyone wishes to do so, in light of Mr. Sessel's problems, about trying to go on his trip.

Special Master's Ruling on Toolco's Motion to Depose Sessel and Wadsworth, December 28, 1962

Mr. Davis: May I understand in the light of this ruling, the scheduled depositions which are available to the Tool Company?

[18771] The Special Master: Yes. Mr. Cocke's deposition is set to continue on January 2nd, to the extent that he is to be given a full opportunity to extend each and every question with regard to the years 1959, 1960 and 1961.

Mr. Leslie is to return on January 14th, and continue through that week, and we then reserve the question about what to do with him after that.

If the Court should rule on Mr. Breech, and I feel that while I suggested that he could be deposed as part of TWA's people in my prior ruling, that the Court had that matter or has that matter, at least, under its jurisdiction for determination.

If the Court should determine that he could be deposed, then he would be available.

I want to make it clear that I would expect to interrupt any deposition on February 11th to proceed with Mr. Hughes. I don't want to leave any doubts in your mind, or anybody else's, so that if you feel that that is any modification or change of any prior orders that you wish to seek to review, that you fully understand it, so far as I am holding, that I expect to proceed with Mr. Hughes on February 11th.

Mr. Davis: I have no other question. I would [18772] like to inquire, however, if it would be acceptable to suggest a postponement of the resumption of Mr. Cocke from January 2nd to January 3rd. Mr. Cox and I have been occupied since the last time we have been here, on briefing in the Delaware action, and are proposing to travel out of the city on this forthcoming weekend.

Special Master's Ruling on Toolco's Motion to Depose Sessel and Wadsworth, December 28, 1962

Mr. Cocke may return on January 2nd with a refreshed recollection, but counsel will not be refreshed on January 2nd, particularly if he travels on New Year's Day in order to return here.

The Special Master: I would be disposed to grant that request.

Is there any reason why Mr. Cocke could not be produced on the 3rd?

Mr. Tenney: Not so far as I am aware. I assume that will be all right. I will be in touch with him. I am not sure I can reach him right at this moment. We would have no objection to that as far as TWA, separately from Mr. Cocke.

The Special Master: We will plan on it then for 10 o'clock on January 3rd.

Mr. Davis: Would you undertake to inform Mr. Cocke?

[18773] Mr. Tenney: I will undertake to inform Mr. Cocke.

If there is any hitch in that, I will let you know, Mr. Rankin.

The Special Master: I would like to suggest that for any review of this order, the papers be filed with Judge Metzner by 10 o'clock on Monday.

Mr. Davis: I think that is impossible.

The Special Master: With your problems and all?

Mr. Davis: Yet we ought not to be asked to do it before January 3rd.

Mr. Chanler: Why wouldn't it be possible for Mr. Davis to file the same papers he filed before you, sir?

Mr. Davis: Because I have something entirely new and different now. I have something entirely new and different in the way of a ruling of the Special Master to which I want to address myself.

Special Master's Ruling on Toolco's Motion to Depose Sessel and Wadsworth, December 28, 1962

Mr. Chanler: That affects Mr. Sessel?

Mr. Davis: Yes. What I want to review now is this order.

The Special Master: It is a very short time, and unless there is serious objection, I would tend to grant Mr. Davis time to January 3rd, at 10 o'clock, [18774] in the light of the holiday period that intervenes.

Mr. Stewart: Service to be made on other counsel at the same time?

The Special Master: On all counsel, yes.

I also at this time direct the reporter to send a transcript promptly to Judge Metzner, of this proceeding this morning.

Are there any other questions?

Mr. Davis: I have none.

The Special Master: We will reconvene on January 3rd.

Pretrial Hearing, January 9, 1963

[24686]

[CAPTION]

BEFORE:

HON. CHARLES M. METZNER,
District Judge.

[24688] [APPEARANCES:]

* * *

[24689] The Court: The Court has a number of matters pending. The Court has indicated to counsel that it desired argument on several of them this afternoon. But for the record there is an appeal pending by TWA pursuant to a telephonic request to review an order of the Special Master adjourning the deposition of Howard R. Hughes to February 11, 1963. Yesterday counsel for TWA filed an application to withdraw this appeal based upon the transcript of the hearings before the Special Master on October 25, 1962, and October 28, 1962.

Second, we have an appeal by Hughes Tool Company dated January 3, 1963, seeking to review an order of the Special Master denying Toolco's application to examine Ben-Fleming Sessel and the Irving Trust Company by Sessel and Arthur L. Wadsworth and Dillon, Read & Company by Arthur L. Wadsworth upon the completion of the deposition of A. V. Leslie or in conjunction with his staggered deposition.

Thirdly, we have a motion by Hughes Tool Company pursuant to Rule 16 of the Federal Rules of Civil Procedure, authorizing and directing the Special Master to conduct pre-trial conferences, with recommendations for the form

and terms of a pre-trial order defining and limiting the legal and factual issues [24690] in this case.

Fourthly, we have an appeal by Hughes Tool Company dated September 19, 1962, from an order of the Special Master directing the Tool Company to produce for inspection and copying by opposing counsel the documents with respect to which Hughes Tool Company claims attorney-client privilege.

Fifth, we have an appeal by TWA pursuant to a telephonic request to review an order of the Special Master denying its motion to quash or strike interrogatories served by Toolco on October 11, 1962.

And, finally, we have an appeal dated December 20, 1962, by TWA from an order of the Special Master overruling TWA's objections to the further interrogatories dated November 13, 1962.

Obviously, there is no need to hear argument on item number 1 regarding the adjournment of the deposition of Howard R. Hughes to February 11, 1963, since TWA has withdrawn that application.

There is no need to have further argument on the application by Hughes Tool Company for an order directing the Special Master to have pre-trial conference hearings pursuant to Rule 16 of the Federal Rules of Civil Procedure.

[24691] There is no need to have argument on the appeal by TWA to review an order of the Special Master to quash or strike the interrogatories served by Toolco, since that was argued on October 29, 1962, and the final papers were submitted on November 7th.

I see no necessity for argument, unless counsel wishes it, for the appeal by TWA from an order of the Special Master overruling TWA's objections to the further interrogatories, since I assume the same principles will be argued

on that item as have been argued on the original motion to strike.

Mr. Sonnett: We would rest, your Honor, on the prior record, plus the short brief served this morning.

The Court: I received that this morning.

Mr. Sonnett: Yes, your Honor.

The Court: I suggest then, Mr. Davis, that you start off on your application to review the order of the Special Master denying your application to proceed with the depositions of Sessel and Wadsworth.

Mr. Davis: Your Honor, preliminarily I would like to make some corrections on the papers which we submitted in connection with that application. Referring first to my affidavit——

[24692] The Court: Just a second. I have gone through all these in the last four days. Now I will have to go find it.

Mr. Davis: This is the last paper I filed, your Honor.

The Court: Your affidavit or Mr. Cook's affidavit?

Mr. Davis: That is correct, looking at my affidavit first, your Honor, you will note that following page 16 at the end of the affidavit there is annexed as Exhibit A excerpts from the testimony of Mr. Cocke. Yesterday Mr. Cocke made some corrections of a typographical nature which do change the sense of what he was saying, and I would like at this point to make two small corrections.

The Court: Where do they appear?

Mr. Davis: First at page 55 of Exhibit A, your Honor.

The Court: Yes, I have it.

Mr. Davis: Page 55, you see in the answer of Mr. Cocke where he said, "I said, and I repeat that I expressed the opinion that Mr. Hughes, to use my own words, was afraid of a deposition."

The Court: Yes?

Mr. Davis: He wants to insert the word "not." [24693] He wants to express the view that Mr. Hughes was not afraid.

The Court: Was not afraid.

Mr. Davis: That is what he testified to yesterday. And then at page 65, in the next to the last full paragraph, the line beginning:

> "I don't recall who made the decision that it should be deferred because it wasn't on the agenda."

He wants to insert the word "not" between "should" and "be." So it reads:

> "I don't recall who made the decision that it should not be deferred because it wasn't on the agenda."

The Court: All right.

Mr. Davis: One more matter, your Honor, in connection with the affidavit of Mr. Cook, Mr. Cook annexes as part of his affidavit a letter from Mr. Sessel to a Mr.—— I will give you the exhibit number— I think it is Exhibit A of the affidavit. It is a letter of April 16, 1958, by Mr. Sessel to Mr. Engelman.

The Court: I have it.

Mr. Davis: That, your Honor, is a copy, or, rather, is a transcription by one of our reporters of the document found in the Irving Trust Company files. [24694] At that time we didn't have available to us a photostatic copy of the document itself as found in the files of the Irving Trust. That, however, was made available to us yesterday afternoon. I would like to hand to the Court at this time a photostatic copy of the document that we did find in the files of the Irving Trust. To my knowledge there

is no difference between the document itself and this copy, but I would prefer that for the record.

The Court: Have you given a copy to the other side?

Mr. Davis: All of them have a copy, because the document was produced during yesterday's deposition and all counsel were there and obtained in due course a copy of everything that was produced. I have extra copies here if anyone wishes one.

Mr. Sonnett: There is no correction in the date of the letter; it is still written in 1958.

Mr. Davis: Yes.

The Court: You may proceed, Mr. Davis.

Mr. Davis: Now, your Honor, there is one other matter which I would like to call to your Honor's attention and have the record reflect. The question was raised before the Special Master by Mr. Barr, and I am [24695] calling it to your Honor's attention, and that is that a substantial portion of what appears in my affidavit and Mr. Cook's affidavit was not before the Special Master at the time he made his ruling which is now under review. In other words, the testimony of Mr. Cocke subsequent to December 18, 1962, and which we have in our exhibit as an excerpt beginning at page 13, namely, the excerpts from Mr. Cocke's deposition beginning at page 13 of Exhibit A, and that is following January 3, 1963, wasn't before the Special Master at the time of his ruling. Exhibit B to my affidavit, however, was at one time an exhibit to a brief which was filed with this court and a copy of which had been furnished to the Special Master, and, therefore, in one sense it may be deemed that he would have been aware of the existence of that letter, even though it was not specifically referred to at the time he considered and decided the application which we made for the taking of the deposition of Mr. Sessel.

Pretrial Hearing, January 9, 1963

Now, going to the affidavit of Mr. Cook, the letter of April 16, 1958, which I just handed to your Honor, a copy of which is marked Exhibit A to Mr. Cook's affidavit, that was not before the Special Master at the time of his ruling.

[24696] Exhibit B, being a memorandum found in the files of the Equitable signed by Mr. Oates, was not before the Special Master. Nor was Exhibit C, which is a memorandum from the files of Equitable by Mr. Keehn, dated December 29, 1960.

Now, the next document, Exhibit D, being the notes of a telephone conversation between Mr. Sessel and Mr. Gordon, of the Bank of America, was an exhibit which had been used during the course of the depositions. Mr. Cocke had not testified with respect to that exhibit as he did on January 3rd and following. But that document was one which was part of the record and, therefore, it may be assumed that the Special Master was aware of its existence.

Exhibit E of Mr. Cook's affidavit, which is a memorandum of Mr. Keehn dated July 7, 1965, furnished to us by Equitable Life, was not before the Special Master at the time of his ruling. He became aware of it subsequently.

Exhibit F, which are the notes of a telephone conversation or notes of Carver relating to a telephone conversation between Mr. Gordon and Mr. Sessel, was marked as Defendants' Exhibit 117 and was a document which was made part of the record at the time of the [24697] Special Master's ruling, but, of course, Mr. Cocke's testimony, which, to some extent, relates to the same subject matter was not before the Special Master.

Now, if your Honor please, I do not want to take the time of the Court or burden the Court by repeating to the Court what I know has been previously and adequately presented to the Court and unquestionably considered by

the Court. There are relatively few things which I feel desirable to point out to the attention of the Court if I assume that your Honor has had an opportunity since yesterday to review my affidavit and that of Mr. Cook.

I appreciate the fact that I was late in filing that affidavit. Mrs. Lea and I stayed up to 4 o'clock in the morning to get enough time, but, mechanically, I got a little fouled up and I could not get it filed any sooner than I did. If I may assume that your Honor has had an opportunity to review the material which is presented in these two affidavits, I can limit my remarks very briefly.

The Court: I have read them.

Mr. Davis: First, I would like, then, to emphasize a matter as to which I am sure my opponents will advert to, and that is the length of time which the [24698] Tool Company has been on depositions, and even the reference of the Special Master that on February 11th it will be approximately a year that he has been sitting as a Special Master. In fact, the Tool Company has had 80 witness days during that period of time, 80 days during which we examined a witness. During that time I have had a computation made by my office, and I am informed that only 80 per cent of the pages of transcript taken during those 80 days are in Q and A form. The rest has been spent in colloquy or points being raised by one of the various counsel. On each day of these depositions there have been a number of counsel present, and each, of course, has been afforded full opportunity to either make objections, comment on the objections, or make remarks. So that based upon the number of pages of the transcript taken during those 80 witness days I find that only approximately 66 per cent of those transcript pages are devoted to Q and A. That would reduce, in effect, the taking of questions and answers from witnesses to 53 days.

The further fact that I would like to call to your attention is what has transpired since October 25, 1962, which is the date, if your Honor will recall, when the Special Master ruled with respect to the objections [24699] of TWA to answering these further interrogatories.

The Court: You mean the first interrogatories on October 25th?

Mr. Davis: That is correct, and at the same time it is the time when he ruled upon the application as to the further adjournment of the return date and taking of the deposition of Mr. Hughes, where the Special Master in fixing the advance date of February 11th made certain comments as to what he assumed could take place during that period of time.

Subsequent to that date the Tool Company has had 25 witness days, and based upon the pages of transcript during those 25 witness days we find that approximately 82 per cent of those pages were devoted to Q and A.

I mention that, your Honor, only for the purpose of putting into proper focus what it is that the Tool Company has been doing.

The Court: What is the status of the depositions of Cocke and Leslie?

Mr. Davis: I stopped at the deposition of Mr. Cocke when I said that, "I have no further questions of him at this time." The Special Master felt that it would be desirable to give Mr. Cocke an opportunity [24700] to refresh his recollection and testify further. As to the manner in which it was to be done, the Special Master suggested that his remarks should be kept confidential and under seal, and if your Honor would like to have more information with respect to that——

The Court: Have you now finished with Mr. Cocke?

Mr. Davis: No, I have not. I have been requested—maybe I should say it has been suggested, if not requested by the Special Master to review once more with Mr. Cocke his testimony covering the years 1959, 1960 and 1961 so as to give Mr. Cocke an opportunity to further expand and elaborate on his prior testimony.

The Court: Wasn't he supposed to do that on January 3rd?

Mr. Davis: It started on January 3rd, your Honor, and it has not been completed. First of all, a number of things happened during the course of Mr. Cocke's testimony with respect to the production or lack of production of documents. There is a good deal involved. A good deal of time was taken up in that connection. And, as I say, I have submitted to you excerpts from Mr. Cocke's testimony subsequent to January 3rd. Yesterday I would say that he testified approximately an hour and a [24701] half. The rest of the day was spent in trying to untangle this production of documents question which has arisen, what has been produced and what has not been produced.

The Court: How about Mr. Leslie?

Mr. Davis: Mr. Leslie testified to the financing which took place in the year 1958. Then he asked that he be excused from further testimony because of his commitments and obligations to Douglas, the year end financial statements coming up, and his return date has been adjourned for one reason or another, and as of the moment he is scheduled to return on January 21st.

The Court: Isn't it the 14th?

Mr. Davis: It was the 14th.

The Court: The transcripts I read before the Special Master said January 14th.

Mr. Davis: You are quite correct. However, either yesterday or the day before the Special Master informed us that he is scheduled for argument before the Supreme Court of the United States, which is scheduled for that week. And so yesterday we all received a letter which was confirmed that we would resume our depositions on January 21st with Mr. Leslie.

[24701] The situation with respect to Mr. Leslie is Mr. Leslie has asked that he be required to come to New York only when there could be a full week devoted to him. The matter is left in abeyance as to what the ruling of the Special Master may or may not be as to the availability of Mr. Leslie for that one week which is presently scheduled.

The Court: How much time do you have with Mr. Leslie?

Mr. Davis: Your Honor, it depends almost entirely as to whether or not I may assume that a decision will be made with respect to the appeal which TWA has taken as to interrogatories. There is nothing which transpired subsequent to 1958 other than the 1960 financing which is the heart of this controversy as referred to by Mr. Cocke. Whether I shall take the time to go through the details, and it would be a very detailed examination, because there were extended negotiations with a great many complications taking place during 1958 and 1960. However, from the point of view of the antitrust law, which is all I am addressing myself to or trying to address myself to, there is very little that I can really hope to obtain from Mr. Leslie, other than putting him through basically the [24702] same area that Mr. Cocke testified about in what appears as Exhibit A, because, as your Honor knows, for some time, in fact, I believe, from the first day that I appeared before your

Honor, I indicated that it was my plan and expectation to bring on an appropriate motion to dismiss as soon as we were in a position to do so.

The Court: You have made six references to that before the Court, starting September 1, 1961.

Mr. Davis: I am surprised it is as few times as that, your Honor, and I am sure it is a burden to have me repeat my position so many times. But it is basic to the issue which I think is confronting us, and, basically, the position of the Tool Company is if it is to have or is entitled to any right to discover what a complaint is about, we have not had it yet, because we still do not know.

It now appears from the examination of Mr. Cocke's testimony, and something which I think was to be suspected before I examined Mr. Cocke, but I could not make the assertion, and that is there is no one at TWA, unless it is Mr. Sessel, and I doubt Mr. Sessel knows any facts which justify violation of the antitrust law. Certainly, his letter just handed to you suggests just [24703] the opposite. I don't think there is anyone at TWA knows any fact supporting that.

In that respect, counsel have asserted the work product privilege, which they have a right to assert. The only thing I know of as to how a defendant may find out, if he is entitled to find out, if you assume he is entitled to find out, the only way in these circumstances a defendant is going to be able to find out what this complaint is about or what the course of conduct of either Hughes or the Tool Company of which TWA is complaining about, may be by means of interrogatories or a Rule 16 proceeding, which will require TWA corporate-wise to answer at least questions based upon whatever knowledge that has been accumulated through its various agents or agencies.

[24704] On this advice question, your Honor may know or may not know that in the course of the depositions of Mr. Tillinghast that the attorney-client privilege, not the work-product privilege, between the Cahill firm and TWA was waived in the presence of a third party, namely, counsel for the voting trustees. There was a detailed discussion of the complaint, the legal theories involved, and presumably whether the facts justify or do not justify whatever the complaint is about. There was also furnished the minutes of the executive committee meeting of June 29, which the Special Master has also ruled to be an independent and separate waiver of the attorney-client privilege. So we are not handicapped by the attorney-client privilege insofar as I can now examine any witnesses who had any conversations with counsel with respect to the subject matter of the complaint, although we are at odds, that is, the Cahill firm and I are at odds as to the scope or extent of that waiver, and the Special Master has ruled so far that the waiver has taken place, and the extent of the waiver is yet to be determined as we proceed.

However, the Cahill firm has still asserted the work-product privilege, whatever memos they have [24705] prepared. Apparently, the only person who has given them any memo of any facts is Mr. Rummel. That would seem to be the conclusion from Mr. Cocke's testimony, and certainly based upon the record, the excerpts of which I have not added to Exhibit A. It would seem that the only writing in existence which identifies or describes whatever transactions are involved are the so-called Rummel notes with respect to it. With respect to the financing, there are some handwritten notes of Mr. Leslie and there are other notes of Mr. Thomas, all of which have been produced.

Before I leave this question of interrogatories, your Honor, I understand that counsel for TWA's main objec-

tion from a legal point of view to answering these interrogatories is the assertion that interrogatories may not be served while a party is engaged in oral discovery.

The Court: I think that is in the sole discretion of the Court whether or not they shall be served.

Mr. Davis: That may be the proper answer, your Honor. What I would like to say at this point, your Honor, is I am perfectly willing as I indicated [24706] in my argument before the Special Master, and I want to say it here also, to suspend oral discovery for the purpose of obtaining answers to my interrogatories.

The Court: What else do you have to say about Mr. Sessel?

Mr. Davis: With respect to Mr. Sessel, I think there can be no question from the facts which I have assembled and tried to present to you in these two affidavits that if there is a single person who does have knowledge of what, in fact, took place during the period 1955 through 1960, which counsel for TWA has asserted on a number of occasions is the period of the acquisition and financing of the jet aircraft, the period which involved the so-called negotiations for the Northeast merger, if there is a single person who knows those facts from all sides and angles, it would be first Mr. Sessel, of the Irving Trust, who during that period was not only the leading banker for TWA, but also the principal banker for Mr. Hughes and the Hughes Tool Company, who was a director of TWA, who participated in all negotiations and decisions that took place during that period. And, secondly, if there is any other person who compares to Mr. Sessel, it would be Mr. Wadsworth, of Dillon, Read, [24707] Dillon, Read, who were the principal architects of the so-called Dillon, Read plan, which was on

and off, and finally was consummated in 1960. And if we are to be required to continue the taking of oral depositions for whatever period of time the Court determines is the right which we have or to comply with whatever right the Court previously determines we have, I submit that we ought not be handicapped or restrained as to who we take on next.

In this respect I would submit to your Honor a decision by Judge Weinfeld in Haynes v. Columbia Pictures Corp., 16 F. R. D. 118, 124 (S. D. N. Y. 1954), quoting from what appears in that opinion. As I understand, the facts in that case, your Honor, involved a question as to whether diversity of citizenship existed, and the plaintiff was examining the defendants, some of whom were residents of California and some residents of New York. Apparently controversy arose as to which he ought to examine first, and the Court had occasion to say:

> "... There remains the defendants' final request that the examination of the California residents be deferred until the conclusion of the [24708] depositions of the New York residents.
>
> "Absent unusual or compelling circumstances, an examining party should be permitted to examine witnesses or parties in the order he deems best calculated to disclose evidence or leads pertinent to the subject matter of his claim or defense. No sufficient ground has been presented for interfering with the control which the plaintiff here as the examining party would normally exercise in the order of the examination."

The Special Master's ruling, however, seems to have been predicated upon, first, the fact that in connection with the implementation of the first decision by Judge Herlands with respect to priority the Court annexed a schedule to its order. That schedule consists of nothing more than a notice of the taking of the deposition served by the defendants immediately following the filing of the complaint. I believe I have said more than once that in serving those notices for the taking of deposition there was no intent on the part of the Tool Company or its counsel to follow any particular scheme, nor had it any idea as to what would be the best way in which [24709] to determine whatever evidence was to be developed. Mr. Sessel and Mr. Wadsworth are on that list to which priority was established, and the only question which is to be raised in that connection is that their names do not appear immediately following that of TWA.

The Special Master also seemed to be concerned with the fact that he had determined that Mr. Hughes' deposition was scheduled to take place on February 11, and it may be inferred that he felt by the time that Mr. Leslie was concluded and Mr. Cocke was concluded, then the time lapses which were bound to occur, that nothing worthwhile might be accomplished prior to February 11th, and, therefore, in that sense no particular harm to Toolco, if you assume that Toolco's depositions or discovery is to be interrupted, and is to be interrupted before this Court has satisfied itself that it has jurisdiction over the subject matter of this action.

[24710] I respectfully submit, your Honor, that the facts presented to the Court by these affidavits and by the testimony of Mr. Cocke, and if your Honor has had an opportunity to review even hastily the testimony of Mr.

Rummel, I submit that the conclusion is inevitable that there is at least a very, very serious question as to whether or not the claim that TWA is asserting is properly a claim under the antitrust laws. I respectfully submit to your Honor that we are confronted with the necessity of satisfying ourselves as to the basis for the jurisdiction of this court before a plaintiff may subject a defendant to what TWA is seeking to do with respect to the deposition of Mr. Hughes, quite apart from the admissions of TWA with respect to the testimony of Mr. Cocke, which I have annexed as an exhibit to my affidavit, portions of which I would like to particularly call to your Honor's attention.

Now, I say, your Honor, that even if we were to assume that the CAB did not exist or that if exemption from the application of the antitrust laws did not exist, I am talking now simply as to whether or not there is a course of conduct by the Tool Company which is related in any way to the violation of the antitrust laws.

[24711] The Court: Mr. Davis, we have gone through this several times. You are arguing a motion for a summary judgment.

Mr. Davis: No. I say I want to be in a position to do that.

The Court: But you will never get to that point until you go through the proper procedures. I am not of a mind to overrule the decision of the Court of Appeals.

Mr. Davis: I would like opportunity to address myself to that question at the appropriate time if I get answers to my interrogatories which I am entitled to. We have the position of the plaintiff at that point.

The Court: You have not afforded the plaintiff an opportunity to examine and cross-examine the defendant,

and in Arnstein v. Porter, Colby v. Klune, and in the Bozant case and other cases the Court of Appeals said unless you have had an opportunity of discovery of the opposing party and examination and cross-examination the Court should not grant a motion for a summary judgment.

Mr. Davis: If that is the thing that is underlying the question, I would like an opportunity to brief the question to your Honor.

[24712] The Court: I don't think you have to, because I have looked into that question on several occasions and I have done extensive research upon it and I have written upon it.

Mr. Davis: If the complaint states a cause of action——

The Court: You want to go beyond the complaint and produce the evidence that you have adduced at a deposition proceeding. You, therefore, turn your motion into a motion for summary judgment and the rule states you can do that.

Mr. Davis: Your Honor, in that connection your Honor is overlooking the provisions of the Federal Communications Act. This complaint did not say anything about a course of conduct in violation of the CAB. The admissions of the plaintiff are just as much a part of this complaint as the complaint itself.

The Court: No doubt about that.

Mr. Davis: I am talking about the testimony of TWA.

The Court: All right. Let us go on to something else, then, Mr. Davis. We have been through this several times and I have ruled on it back in March.

Mr. Davis: I recognize that you have, but a [24713] defendant is reasonably entitled to find out the course of conduct that is in the case, and I respectfully submit that I have not had that opportunity. The only thing I have

discovered in these 80 witness days is that counsel for TWA knows what they are doing, but nobody else does.

The Court: Do you have anything else to say about Sessel-Wadsworth?

Mr. Davis: I believe that your Honor is sufficiently familiar with the circumstances which relate to this date of February 11th and how it occurred without my retracing the procedural steps that took place. That developed merely because we elected to accept the service for the subpoena of Mr. Hughes, rather than answer interrogatories, because up to this point there has never been any order of this court or finding either by the Special Master or this court that the circumstances developed justify or support the need of the plaintiff at this time to take the deposition of Mr. Hughes. There is no such finding or order of any kind. All that has happened is that rather than answer interrogatories as to Mr. Hughes' whereabouts I undertook to accept service of a subpoena in connection with the noticing of the taking of the deposition. That notice of subpoena [24714] had an arbitrary date, the same as mine had when I started to file my notices and that date has been adjourned on a couple of occasions. There has been no finding whatever of any kind by the Special Master, no finding of fact or circumstance which has developed since October 25th or any other time indicating any need at this time for the plaintiff for the protection of any rights of the plaintiff to take the deposition of Mr. Hughes or anyone else in the Hughes Tool Company.

Now, as I have indicated before, your Honor, and whether or not I succeed or do not succeed, I respectfully submit I am entitled to this and I am prepared to suspend all oral depositions if answers to these interrogatories are

given which will be binding upon TWA and which will establish whether or not this court has jurisdiction over the subject matter of this action, and I respectfully submit that once we have answers to these interrogatories, this court, as well as defendants' counsel will know what it is we are defending ourselves against, and I ask that an appropriate decision be made as to the order of taking depositions and like related matters.

Your Honor, I would like a few minutes, unless your Honor tells me you are sufficiently familiar with the [24715] testimony of Mr. Cocke, to point out the circumstances which cast great doubts as to the true underlying reasons for having selected the course of action of filing of the antitrust complaint, which is the sole foundation for the Court exercising any of its powers. If your Honor has adequately reviewed these excerpts of Mr. Cocke's testimony, I will not burden your Honor. On the other hand, if your Honor has not had an opportunity to do so, I would like to address your Honor's attention to a few portions.

The Court: You have indicated that at the beginning of your argument and I have read your papers.

Mr. Davis: I have nothing that I think is necessary for me to add, then.

The Court: Counsel for Irving Trust Company, Mr. Chanler. I assume you are also talking for Mr. Sessel.

Mr. Chanler: Yes. The Irving Trust Company and Mr. Sessel.

[24716] As your Honor is aware, I want to remind your Honor that on February 7, 1962, you stated that the schedule of examination may be varied by the Special Master if in his opinion the circumstances require certain variances. Then again on March 5 after the counterclaim was

filed you stated that the examinations of Toolco should be limited to the complaint and they could not examine as to the counterclaims and that since the Special Master is presiding over the depositions on a day-to-day basis, he will see to the application of this limitation.

Now, in September the question of the examination of Hughes came up, and your Honor at that time set the examination of Mr. Hughes to October 29, giving Toolco the right to file an application for further adjournments, stating the propriety of such application is peculiarly within the Special Master's competence.

Mr. Rankin, thereupon, adjourned the deposition to February 11, 1963, stating he did so in order to give everybody, particularly Toolco, ample time to complete the examination of what witnesses it then had, Tillinghast, Leslie, Cocke and Rummel, and the presentation of whatever motions Toolco cared to make to the Court with respect to various legal contentions which it had previously [24717] raised, there having been made more than six times a motion to dismiss.

Now, he made it quite plain that he intended the examination to be held, and no appeal was taken from that order of the Special Master. So that order, it seems to me, is now the law of the case setting down the Hughes deposition for February 11.

On December 4 Mr. Davis filed an application for examination of the Irving Trust by Sessel, and Dillon, Read by Wadsworth, and Wadsworth individually. That was argued at that time without any particular reference by Mr. Davis to come before Mr. Hughes' deposition. It looked as though there would be time to examine Mr. Sessel, because there was some talk about Cocke's examination soon being

terminated and Leslie's. It became apparent while that was pending that there would be less time to examine Mr. Sessel and that there could not be more than four or five days before the Hughes deposition of February 11 during which Mr. Sessel could be examined.

Aside from that point, the Special Master in his order of December 28 stated:

> "* * * in order that there would be no doubt left that it was my purpose and intention to proceed [24718] with the taking of the deposition of Mr. Hughes by the plaintiff beginning February 11, 1963, at 10.00 a.m. in Los Angeles, at the place designated in the notice."

He affirmed that was his intention. He then denied the motion to examine Mr. Sessel on this ground, among others:

> "I do not think it would advance the proper administration of this case since it would in my judgment inevitably branch out into the issues of the counterclaims, or result in such continuous controversy that it might interfere with the taking of Mr. Hughes' deposition at the time and place fixed."

I have pointed out that your Honor has placed in the Special Master the discretion as to the question, first, of whether or not to vary the schedule of depositions and how to arrange the depositions, and, secondly, you have stated that the Special Master had special competence to see to the application of the limitation that there should be no examination as to the counterclaims. He has exercised that discretion.

Now, actually, this application before your [24718] Honor of Mr. Davis is an application to request that you reverse the Special Master's decision on the ground that there was an abuse of the discretion, since your Honor left this matter entirely to the Special Master's discretion. I think it is a most extraordinary thing to ask this Court to review the exercise of discretion by a lower court, to come in and present to you a very lengthy affidavit with innumerable affidavits attached to it, none of which were presented to the lower tribunal at the time the matter was presented there.

Mr. Davis made a long speech that some of them may have been in the record, and the Special Master if he looked through this voluminous record and if he had clerks to do so, he might have found some of them. But none of this material that they present to your Honor in an effort to show that the Special Master abused his discretion when he said there would be no interruption to permit an examination of Mr. Sessel and because it might involve examination as to counterclaims, and tried to show that that is unreasonable by presenting to your Honor totally different facts and totally different affidavits. It seems to me to be a highly improper procedure.

[24720] In the first place, he has changed his grounds very substantially here. Now there being no time for an examination of Mr. Sessel, as far as I can see, because, as Mr. Davis pointed out, the Special Master has to argue a case before the Supreme Court which will take up all of this week and next week, Leslie will be on the week of the 21st, and then Cocke will be on the week of the 28th, and there will be, no doubt, considerable examination there, and the Special Master said he had a considerable number of

questions, and by the week of February 4th we are all going to be packing up to go to Los Angeles. So that really he is now making a plain application here to ask your Honor to reverse the Special Master's order of October 25 setting down the examination of Hughes for February 11. He didn't appeal from it; he never objected to it. He never actually said that is what he is doing, but that is the only implication in his present motion. He said he wants to examine Sessel first and Wadsworth, which means there won't be any examination of Hughes in probably six or eight months.

Your Honor pointed out if he really wants to make a motion to dismiss and if it had any merit in it, the first thing is to get through with the [24721] examination of Mr. Hughes, and no such motion can be granted until that is done. He is trying to get other witnesses involved here in order to postpone the day when Mr. Hughes will have to stand up and be examined.

I submit if his application is granted we won't see Mr. Hughes for eight or ten months or a year. Then we will see other witnesses. The idea of bringing in all this Cocke testimony and all these matters before your Honor have nothing to do with the motion whatever. Moreover, he never made any such application before the Special Master. He never asked the Special Master to postpone Mr. Hughes' examination. He said he wanted to examine Mr. Sessel to find out more of these facts.

Another point I want to make clear is that these affidavits, particularly Mr. Davis' own affidavit, conclusively confirm the wisdom of the Special Master's determination that it would be inappropriate to examine Mr. Sessel because it would be impossible to disentangle questions relat-

ing to the complaint from questions relating to the counterclaims. The burden of Mr. Davis' affidavit, which, I say, was never before the Special Master, is that he has evidence to produce, according to him, that Mr. Sessel and others were instrumental in having this complaint and this lawsuit [24722] brought with improper motives in order to take away Hughes' control and obtain control of TWA for themselves, and that it is all part of this conspiracy. That is the counterclaim. I submit to your Honor that I don't see a single subject mentioned in this Davis' affidavit where he outlines what he is going to talk about. On page 12 in his affidavit I don't see a single subject there as to which I could permit Mr. Davis to ask Mr. Sessel a question without objecting on the ground that he is attempting to examine him on the counterclaims. It may be they have some relation to the complaint, although it is a novel idea to me that in arguing that a complaint does not state the cause of action, you say it was brought in bad faith by the client who told the lawyer, "See if you can't bring a complaint that will bring about such and such a result. That has nothing to do with the validity of the complaint. This is nothing but an attempt to adjourn the examination of Mr. Hughes and to examine, if possible, Mr. Sessel on the counterclaims. There is nothing here to show that Mr. Rankin didn't act in the best of discretion, and, if anything, his discretion has been confirmed.

[24723] I would like to add one personal matter, your Honor: Mr. Sessel has been trying since last October to take a six-weeks' trip around the world, and he has had to postpone it twice, the last time on January 4th. He is leaving on Friday and he would like a decision at the earliest time, your Honor.

The Court: Mr. Stewart, you represent Wadsworth?

Mr. Stewart: And Dillon, Read, yes, your Honor. It is very difficult to assess any kind of reply, either to Mr. Davis' argument here or to the papers, more than 100 pages, that were served on us late yesterday afternoon. Dillon, Read is hardly mentioned. There are one or two references to the fact that Dillon, Read worked on the financing for TWA which later became the 1960 financing. There is no dispute as to that. We admit that. I don't know whether to be flattered or insulted by this omission of any justification for taking the deposition of Wadsworth at this time. But one thing that Mr. Davis said I thought was very interesting, and that is, it is not at all clear that he even plans to examine Mr. Leslie, the financial vice-president of TWA who worked on this financing, as to the facts, the negotiations, the [24724] conversations that were held in connection with this financing.

I have read the Toolco papers, and the same question comes to mind, your Honor, why was Dillon, Read added in this lawsuit?

The Court: You have asked that question before, Mr. Stewart. Nobody wants to give you an answer.

Mr. Stewart: They have not done so so far. We have been in it a year and we have not had an opportunity to examine the man who is responsible for bringing these charges against Dillon, Read.

Your Honor knows that Mr. Wadsworth was the officer at Dillon-Read who was primarily responsible for the so-called Dillon, Read plan for the financing of TWA. In working on this he kept a diary, a day-by-day diary of his telephone calls, of his negotiations, his conversations with the banks and insurance companies who were the prospective lenders to TWA. The diary is voluminous. It is about

500 pages of foolscap altogether. Toolco got that diary, your Honor, by a subpoena before Dillon, Read was named as a party defendant in this lawsuit, along with a bunch of other material. They have had it now for [24725] close to a year and a half, I believe, and Toolco admits as recently as our argument on this application on December 11 that they find nothing in this diary which casts any light as to the facts upon which TWA relies in support of its complaint. I can see this situation developing though, your Honor, with this diary and with these personal notes of Mr. Wadsworth, if the prior examinations of Toolco are any criterion, I can see an examination of Mr. Wadsworth going for weeks, months, on end.

Now, since Dillon, Read is concerned solely with the financing and that is their only part in this case, the financing of 1960 and the subsequent financings of TWA, and the counterclaims are essentially dealing with the 1960 and subsequent financings, any examination of Wadsworth could concern itself with just one thing, and that is the heart of the issues in the counterclaims.

Toolco has had priority for a year to find out what they are being charged with. They are not interested in pursuing TWA's statement that 75 per cent of their case is going to be developed on the examination of Mr. Hughes. But one thing is very certain, your Honor, they can't find out from Mr. Wadsworth what the facts are that TWA relies on in support of its complaint. [24726] Nothing he says, nothing he does not say could bind TWA in any way.

Mr. Wadsworth was not consulted in the filing of the complaint by TWA against Toolco, and I suggest that any inference that Toolco can find out from Mr. Wadsworth what TWA's case is is just sheer nonsense. He is not an

officer at TWA, he is not a director of TWA, he is not an employee of TWA. He can't possibly know.

This file of voluminous material served on us, your Honor, just proves one point to me, that Toolco will claim anything, say anything, do anything to prevent the deposition of Howard Hughes taking place on February 11, or any other date, for that matter.

I respectfully urge, your Honor, that you affirm the ruling of the Special Master.

The Court: Mr. Sonnett.

Mr. Sonnett: I think Judge Bromley is next in our agreed batting order.

Mr. Bromley: May it please your Honor, I really think this is an attempt on Mr. Davis' part just to get rid of the Hughes examination for as long a time as he can, and I call to your Honor's attention in support of that accusation to paragraph 22 on page 15, where he says, [24727] "Toolco respectfully submits that it is entitled to priority in discovery under the circumstances here present in accordance with the prior orders of this Court; and that, accordingly, it is entitled to the examination of Sessel and others before the deposition of Hughes is taken."

[24728] Now, if you turn back to page 2 at the bottom, you will see another device in the making:

> "Toolco expects shortly to bring on a separate application for appropriate protective relief with respect to the current efforts of TWA to take the deposition of Hughes before plaintiff has divulged the justification for an antitrust complaint, whether by way of answers to interrogatories or otherwise."

Your Honor, we are making expensive and extensive preparations to go to Los Angeles confident of your Honor's decision, and if any such further devices delay this are in the making, I think he ought to do it very promptly, and if Mr. Hughes is not going to show up on the 11th, I think these gentlemen ought to tell us before we incur all the thousands of dollars of expense and all the moving out there only to find out that he does not appear.

I endorse everything that has been said and that which is now to be brilliantly said by brother Sonnett.

The Court: Mr. Sonnett, with that introduction do you want to talk or do you want to rest?

Mr. Sonnett: Judge, I am afraid to say anything for fear of spoiling it, but there are a few points that [24729] I feel I must say. Obviously, in respect of the deposition of Sessel or Wadsworth, I have no direct interest, except insofar as it impinges upon the progress of TWA's case. No doubt in due course both will be deposed. No doubt in due course both will be important witnesses on various matters.

But in respect of my problem, which becomes increasingly acute, may I say to your Honor that the needs of TWA to advance its discovery after the defendants have had a year, the needs are acute. TWA's 1962 year will show according to its president at best a break-even, more likely a loss. This litigation is expensive. When I say, as I have said and repeat to your Honor, that I expect 75 per cent of the evidence we will use at the trial to come out of the mouth of Hughes, I am not saying that rashly. I expect that. And I would like very briefly to demonstrate to your Honor why I think that is so and why I think

we need to go forward as quickly as possible with the Hughes deposition.

We have withdrawn our application that you set the date earlier than February 11th because as a practical matter it is apparent that we could not start before that, anyway. I think your Honor will realize that we have no desire to bore you with statistics, but [24730] we have in terms of discovery in this case so far on the documentary side produced over a million pieces of paper, that is, TWA, that the Hughes Tool Company has produced 325,000, that Dillon, Read has produced 18,000, Irving Trust 30,000, Metropolitan Life, 5,000, Equitable, 35,000, Bank of America, 12,000, the Chadbourne firm, general counsel for TWA, 20,000, from the CAB files 12,000, The First Boston Corporation, 3,000, Merrill, Lynch, 2,500, Atlas Corporation, 1,000, the Mellon Bank, 2,000, Charles Thomas, a thousand—approximately 1,700,000 pieces of paper have been produced so far on the documentary side of the case.

The Hughes Tool Company has had all that and they have had a solid year, and if Mr. Davis' count is 80 days, mine is 83 of solid question and answer discovery. We have not had a day. I don't know how long Mr. Hughes is going to be around to be examined, but I do know that he is the one person who has what we need the most. We need to know the decisions at the highest level which Hughes made, and there is no mistake about it, he is the one who made them, and we need to develop out of his mouth, and we will, the reasons why he made the decisions he made.

We start out, your Honor, with a handicap by [24731] the fact that the Hughes Tool Company counsel completely disregard the discovery which they have had to date. For

example, they would brush aside the entire Tillinghast deposition as if it did not even enlighten them as to claims concerning 1961. It does. And I think it contains very significant evidence relating to the efforts of Hughes to ram 990's down the throat of TWA at a time when the independent management for the first time wanted other aircraft, as to what Hughes and his representatives did in that connection at a time, mind you, when there was a voting trust in existence and Hughes was presumably out of control. Now they disregard the Tillinghast deposition.

They would minimize and disregard the Rummel deposition, and a reading of that record is very enlightening, because every time counsel for Hughes Tool came to an area where it was obvious the witness was going to hurt him, he backed away, and at one point it became so obvious the Special Master himself took over the questioning, because he said to Mr. Davis on the subject of whether Hughes had instructed Rummel to boycott airplane manufacturers, except the one chosen by Hughes, Davis does not pursue that, and Mr. Rankin said, "I don't think the record ought to be left that way," [24732] and he pursued it, and the witness testified that he had had such instructions. This is the man who worked with Hughes closely and intimately and knew all subjects connected with the procurement of aircraft. He was a man—and this is not a reflection in any way on him—on the payroll of both Hughes and TWA. He is a high man in his field and he is an excellent witness and is very useful in support of TWA's case.

Now, as to the production of the present set of papers quoting Cocke as to what Leslie said to him, after examining Leslie for 18 solid days they have just reached the beginning of the jet period in their examination, and counsel

for Hughes Tool Company says to you with a straight face presumably, well, he may not want to get into that particularly. The reason is pretty obvious, because I think he had forgotten things, like the document I have in my hand, which they have had for many, many months. This is a document in Mr. Leslie's handwriting. It will be used on his cross if Mr. Davis does not use it on his direct. It was written in the spring of 1960 when both TWA and the Tool Company were on the verge of receivership because of the actions of Hughes. And in that document, among other things—I am not going to go into all of it, [24733] because, as your Honor can see, it is very lengthy—it is headed "TWA, In Appreciation"—in that document, Leslie, the man who has been on for 18 days so far, says, among other things—this is at the very beginning, under the heading of "Background":

> "During 1956 Hughes Tool Company acting through Mr. Howard R. Hughes placed orders for 18 Boeing 331's, 15 Boeing 131's and 30 Convair Model 880 jet airplanes. . ."

stated at the time and repeated many times since to be for TWA's use.

Skipping down:

"It was stated by Hughes at the time the orders were placed (among others the writer) that TWA was not to concern itself with the financing of this equipment as he through Toolco would find the required funds."

Later on after Mr. Leslie has been analyzing the history and the situation of TWA, he comes to the conclusion, among others that:

"TWA with Equitable should sue Toolco-Hughes for damages due to implied contract default."

There are other discussions about TWA to assert claims against Hughes. That was in March or thereabouts of 1960. It represented the judgment of Leslie, who, I [24734] might add, at one time was in the employ of the Hughes Tool Company for some years in a financial capacity, and also with TWA. Leslie has not been asked about that. They have had this piece of paper for months. I think what this shows is that there are none so blind as those who will not see. If counsel for the Tool Company would take a look at the documentary evidence they already have, they would be very much enlightened about various of the problems that face them in this case.

Now, on the Hughes deposition and the need for getting forward with it promptly, I represent to your Honor that it is provable, and without pulling out all the documents, that it was a cardinal policy that Hughes throughout maintained that there be secrecy concerning everything. There are documents in which he instructs people, "Don't make notes of this," "Keep this a secret." As a matter of fact, there is one which is, I think, so amusing and pertinent and it is brief, that I would just like to read it to your Honor, because it comes out of the mouth of Mr. Holliday's secretary, and it is really quite a commentary on the secrecy rules which Hughes rigidly enforced. This is a letter written by Laura Lee, who is Mr. Holliday's secretary, to Mona Lee, who is Leslie's secretary.

[24735] The Court: Where does Lola Lea fit in?

Mr. Sonnett: I don't think there is a relationship, but perhaps we can judge better after reading the letter. Perhaps she is kindred in spirit. It says as follows:

Pretrial Hearing, January 9, 1963

"Dear Mona Lee:

"I am trying to work up some information in regard to all of the subsidiaries of HTC and all companies in which we own stock, etc. and as usual, it isn't easy to find out the simplest information. We do carry secrecy to extremes in some cases, in my very humble opinion!

"Would you be good enough to furnish me the following on TWA: State incorporated in; date of incorporation; and the date set up for the annual stockholders meeting each year. I assume that you will not have to get a security clearance and be fingerprinted and all that stuff to furnish this meager bit of information to a fellow employee.

"Many thanks . . . . . and what would I do without you????????

Laura Lee."

[24736] When it get to a state where a secretary does not know in what state TWA is incorporated in, I think we have some idea of the extremes of the policy.

I might say that Mr. Leslie himself, for example, in 1955 in writing confirmed in a letter to Mr. Damon that the usual policy of everybody being sworn to secrecy was followed in a recent meeting with Mr. Hughes, this being the standing order of business.

Further, if one looks at these call sheets that record in part these telephone messages coming from headquarters, one is struck by the number of entries which say "Omit; they talked." It is astonishing the number of them.

But as to those fortunately that are available which were not omitted—in retrospect they wish they had

omitted—it is probative on the subject of the motivation of Hughes for what he did here with his co-defendants, and I am not going to take a great deal of time, except to indicate that it is in this type of area that we have our problems and where the need for the testimony of Hughes is absolutely essential to the case, because he is the one who has got the information. It is not in the documents. And under his cardinal policy of secrecy, the others knew just as much as he [24737] wanted them to know, and no more.

In that connection, to advert for a minute to the Leslie view of the situation in March, 1960, his appreciation, in which he said that TWA and the Tool Company both were on the verge of bankruptcy, that TWA should sue Hughes, this is long before we came into it as counsel for the new management, that Hughes in referring to that meeting in his own words said, and I would like to read this, your Honor. Your Honor has heard it before, but I want to follow it up with a brief excerpt from one other document you have not heard, and the two together, I think, illustrate where the deposition of Hughes is going to establish all the proof of motivation that we need to sustain the conspiracy, in addition to enlightening everyone as to what, in fact, was done. This is the call sheet of a call from Hughes, a message from Hughes to William A. Forrester, of Merrill, Lynch, of October 26, 1960. It starts out with the time 12:30 p.m. (Per Opr) Get him on the line.

"INFO They talked."

Then "2:00 p.m."—and this is this message from Hughes to Forrester, "Call him back and tell him that

for his information that Charlie Thomas"—[24738] parenthetically the then president of TWA—"negotiated and developed the deal with Dillon Read financing plan without my authority or encouragement from me; he forced it down my throat then at a Board meeting at which time he created a coalition of my directors and turned them against me and faced me with a mass resignation of all but one of the TWA directors. I have never liked this plan; I have never been in favor of this plan; I have fought it from the very beginning and I am still fighting it and I assure you that if it is employed it will be over my dead body and if you would like to come up with any suggestions of any alternative plan or any way whatsoever by which I can avoid being forced into the Dillon Read program, I would be most grateful. It is very flattering for you to say that you don't think I have ever been forced to do anything and maybe there was a time when this might have been fairly accurate statement, but I assure you it is not true today and has not been true concerning this Dillon Read program from its inception. I have fought it hammer and tong from the very first day that I ever heard of it."

Why? What the Hughes deposition is going to establish, and I have no doubt about it, and it will be established in the first week of deposition beyond any [24739] doubt, that the motivation for what Hughes did as charged in this complaint was a financial one and it consisted of tax avoidance, a specific financial motivation. That is what cast light on what was done and why it was done and how it was done and what led him into the antitrust violations which he and the others clearly committed.

In terms of the motivation, on December 4, 1960, Mr. Hughes apparently had a telephone conversation with Mr.

Carver, of the Bank of America. These are Mr. Carver's notes of that conversation. And at page 3 of those notes in setting out at length a conversation with Mr. Hughes that ran about an hour and a half on the phone. At the end of that Mr. Carver says:

"Three things came to HRH's attention this week anti DR."

What follows makes it clear this is anti the Dillon Read financing plan.

"1. 102 tax situation—it is real bad and three weeks before year end—ML——"

That is a reference to Merrill, Lynch and a proposed alternate financing plan——

"ML is better—have chairman of board and only [24740] need to get one man (Nixon?) so he would have to set out at once to refinance."

Now, there is the proof of why. It was the 102 tax situation. And I think the first week of the examination of Hughes based on things like this plus his tax returns, which your Honor directed that we have, and plus some other documents, are going to supply that background against which the purposes of the acts done will be obtained and will explain why they did get into antitrust violations.

Now, I know of no other way to get that information the way Hughes ran his empire, characterized by secrecy, by being surreptitious, by leaving behind no trails, by instructing people to keep things secret and giving them only part of the information, by sitting in the center of the web and pulling all the strings. He is the one there. I have said and I repeat to your Honor, I believe that 75 per cent of the evidence we will introduce at the trial will come out of the mouth of Hughes during his deposition. Thank you, your Honor.

Pretrial Hearing, January 9, 1963

The Court: The next matter for argument is the question of the attorney-client privilege. Mr. Davis.

Mr. Davis: On the attorney-client privilege I [24741] ask Mrs. Lea to present the matter to your Honor, if she may.

The Court: Certainly.

Mrs. Lea: May it please the Court, I should in the first instance like to point out that the documents that we are talking about and the question that was raised before the Special Master which is on here before your Honor involve communications which are unquestionably communications between attorney and client and to which the privilege unquestionably would apply were it not for the matter of waiver.

The Court: I understand that the documents we are talking about on this appeal have already been reviewed by the Special Master.

Mrs. Lea: That is correct. He has seen the documents. He has stated on the record that these are communications between attorney and client, and if it were not for the question of waiver, they certainly would not be producible.

Toolco, of course, does not take issue with the general statement that if a waiver of the attorney-client privilege has occurred documents are producible. The question and the primary question before your Honor, is whether or not a waiver of the privilege has, in fact, [24742] occurred.

It seems to me that in order to put this question of waiver in proper perspective it is necessary to see what it is the privilege is designed to accomplish. The privilege is designed to protect the confidentiality, it is designed, in a measure, to protect secrecy, an unpleasant word here insofar as discussions between client and attorney are con-

cerned, it is designed to operate to keep from the public generally, often persons not directly involved, that which is passed between attorney and client. Accordingly, it is in our view only when the client does something to destroy the secrecy or to indicate that the policy or privilege no longer obtains that we can say the waiver has, in fact, taken place. This is accomplished, if at all, through a disclosure of the contents of the communication, the nature or contents of the communication. It is that which will indicate if the client no longer wishes to keep the material confidential.

Now, if it is a disclosure which is, in fact, required before we can say the waiver has taken place, it is plain to us, at any rate, that in either paragraph 4 of the answer of Toolco nor in any of the affidavits—specific reference was made to the Holliday [24743] affidavit—that neither of those documents did, in fact, disclose what the nature or the contents of the advice that was given by counsel to client is, nor is there any disclosure of any of the facts or any portion of the communications which passed between the attorney and the client.

Under these circumstances, without any kind of disclosure at all there has not been any waiver. If there be no waiver, there is no compulsion for Toolco to produce these documents.

We do understand that having pleaded advice of counsel, Toolco cannot forever claim that privilege and claim that it need not disclose the basis of that defense, assuming that defense is pressed at the trial, and assuming that Toolco at some point seeks to rely on it. If at the appropriate time it appears that reliance will be placed on that defense and if it appears that information which is now privileged is necessary in order to establish that defense or is necessary to

the opposing parties in order to be able to meet it, then at such time it will become appropriate to make a choice of furnishing that information to the adverse parties, thereby waiving its privilege and giving it up, or waiving and giving up its defense. The choice, however, is [24744] Toolco's to make, whether to keep the defense or keep the privilege, and it can be required to do so, we believe, that is, to make a choice, only at a time when Toolco is called upon to divulge the factual basis of its contentions and its defenses. We have certainly not come to this point as yet.

The plaintiff has not even supplied to Toolco what it claims or what the basis of its motion is. We feel very strongly that the papers before this Special Master are privileged, that there has been no disclosure, no waiver of the privilege, and that opposing parties are accordingly not entitled to any of this information.

However, primarily in an effort to see to it that nobody who claims a need for relevant facts is deprived of the relevant facts, on September 17th Mr. Davis made an offer on the record to opposing counsel in which he said that he would turn over and the Special Master hold all materials which we claim pertinent which the Special Master can turn over to opposing counsel when plaintiff has revealed the basis of its complaint and the Court has had jurisdiction of the subject matter.

In a memorandum which we submitted today Toolco, it seems to me, has made an even more generous offer.

[24745] It is said that primarily and by reason of the fact that we think it is essential before anything else in this case be done that plaintiff be required to answer interrogatories and tell us what this is all about, and if they claim that this material or the documents with respect

to which we claim privilege is necessary in order to permit them to answer interrogatories and having got this information, once they are in position to use it, they will then be able to answer interrogatories, then the Tool Company has offered in its papers to make this material under those conditions and circumstances available to the Court. I don't know that we have heard yet from counsel for TWA as to the acceptability of the second proposal. I don't know.

The Court: I am sure Mr. Sonnett will want to answer your argument.

Mr. Sonnett: I am going to yield to a most charming man at this table, Mr. Kaminer.

Mr. Kaminer: I want to apologize, your Honor, on various counts. First, I may be slightly unintelligible because I am getting a cold, and, secondly, for being here at all, because, as your Honor knows, [24746] I am out of the case for other reasons, because of other engagements, but was brought back because of my knowledge of the subject, and, thirdly, for saying to you again that which you have heard before, because I cannot help it if the same arguments are made to you. I think your Honor's patience is something which I really enjoy.

We have submitted to you a brief which we sent to the Special Master in which we set forth the arguments which had been made to you before and made to the Special Master all over again after you had affirmed his first ruling. Now, today at 3 o'clock I get this new brief containing two points, and I quote:

> "1. Toolco has not waived any privilege by reason of its pleading or otherwise since the answer merely gives notice that advice of counsel will be asserted as a defense without disclosing the nature or contents of the advice relied upon . . ."

I now turn to what has been said to your Honor in this courtroom, that no waiver can result from the mere pleading of the defense prior to the disclosure of the privileged information, except in those cases where, unlike here, the pleading itself discloses the advice.

[24747] That was said to you, if your Honor please, before you affirmed the Special Master's ruling.

But let me go on to point 2:

> "2. While Toolco may be required during the course of pre-trial proceedings to disclose the facts upon which it relies with respect to any given defense or give up that defense, it may not be required to do so until such time as it is appropriate for Toolco to disclose the factual basis of its defensive contentions."

This has been said to you by my learned opponent the last time:

> "The development of further specifications of wilful and malicious interference must await the completion of Toolco's discovery. Until all facts upon which TWA relies are ascertained, the matters with respect to which Toolco asserts its counsel's advice as a defense cannot be determined."

And now we turn to page 14 of their present brief:

> "The development of further specifications of wilful and malicious interference must await the completion of Toolco's discovery. Until all facts upon which TWA relies are ascertained, the matters with respect to which Toolco asserts its counsel's [24748] advice cannot be determined."

How often are we going to say to the Court and to the Special Master that there is no question, that this whole thing is moot. And I am not going to be sweet about this. How often are we going to bring this issue before the Court and have the Court listen to this all over again on the basis of the claim that the answer did not waive anything, that the question is totally moot, particularly, your Honor, after all these affidavits that have been filed, which your Honor has, which the Special Master has analyzed and ruled upon and said of course it is waived, anyway. One of the affidavits says:

> "The activities of Toolco subsequent to 1960 which are alleged to have constituted a malicious and wilful interference with TWA's business as well as a violation of the antitrust laws were taken on the advice of counsel to Toolco that such activities were necessary or desirable in order to protect Toolco's equitable rights."

Well, if that is not telling your clients what the advice was and telling the world what it was, I don't know what it is. There is no issue here of any right or question of whether they should waive the privilege—[24749] the privilege is waived. That is the fact. It happened before the answer, it happened again in the answer, it happened again after that.

Now, let me tell you one other point, and I think your Honor will feel perhaps sympathetic with me for being mad and no longer sweet. In April the Special Master ruled that they furnish a list of all the documents which they wished to withhold. Do you remember the April-May letters were with you on your last ruling——

The Court: May 2nd and May 3rd.

Mr. Kaminer: May 2nd or May 3rd. I want to quote from your last ruling in which you said that not only does it seem that the Special Master had written an interesting dissertation of the law, but the Court sustained the ruling of the Special Master as he has applied the law to the questions presented to him. This was no academic exercise and these May letters were before you and there was a direction that a list of all the documents be furnished. We have not got such a list today.

The Court: I understood from reading the transcript before the Special Master that the purpose of furnishing the list was to provide a background for [24750] argument on the motion. But since the documents were referred to the Special Master and he has now ruled that the privilege has been waived there is no need for giving you the list. You get the documents, according to the Special Master's ruling.

Mr. Kaminer: I don't think that is quite right.

The Court: I have read the whole file before you came to court.

Mr. Kaminer: The Master had made a ruling earlier, as you know, not only as to the waiver point, but as to various other points.

The Court: But the purpose of the list was merely to facilitate argument before the Special Master in the application.

Mr. Kaminer: With all due deference, I thought the list was to be given to us to see what documents were withheld, because I do not believe that all the documents which are withheld, none of them were produced.

The Court: Well, the Special Master has ruled you are entitled to all the documents; so what do you need a list for. He is not withholding any.

Mr. Kaminer: We are entitled to all the documents from a certain date on. There were [24751] more documents withheld prior to that date.

The Court: I understood that all the documents in issue were submitted to the Special Master, that the Special Master saw them, that you did not see them, and that appears from a reading of the transcript.

Mr. Kaminer: The Special Master has recently again when he made the second ruling, your Honor, he told us again.

The Court: As I understand it, all documents were submitted to the Special Master and Mr. Davis, I think, so indicated. Page 122 of the transcript of the September 15 hearing before the Special Master. Counsel for the Hughes Tool Company said he made available to the Special Master all the documents in issue.

Mr. Davis: That was done, your Honor.

The Court: And the Special Master ruled upon those documents when he handed down his ruling. So that the purpose of the list was in case there was a dispute at the hearing you could direct your attention to them. Mr. Davis didn't furnish a list because it is immaterial at this point, since the Special Master as it stands right now has ruled that you are entitled to all of them.

Mr. Kaminer: So that you don't misunderstand [24752] my point, at page 164 following this discussion the Special Master again ruled that there should be a list furnished.

The Court: I read that.

Mr. Kaminer: I think we need this list for our protection. The record is now very confused. Let us have a clear list of what is withheld. That is what the Master ordered and that is before you now. That is the ruling on page 164.

The Court: I have a notation of it. Go ahead.

Mr. Kaminer: In any event, what you have been told in this brief is the very thing you have already decided last time. And I think we have reached the point here where there must be an end to this kind of multiplicity of proceedings, where people obey what is ordered to be done. Thank you.

Mr. Barr: My name is Thomas D. Barr. I am one of the attorneys together with Judge Bromley who represent the Equitable and the Metropolitan, and I together with Mrs. Lea and Mr. Kaminer have been on this part of the case, and being somewhat younger than Mr. Kaminer I am not unhappy at the opportunity to argue as he was.

I was prepared to take your Honor at great [24753] length through all of the affidavits that I attached to my affidavit which your Honor has before you and which your Honor, I notice, has seen on several occasions in the past. I am not going to do that. I want simply to say, your Honor, that it is perfectly clear to me the Tool Company has waived the attorney-client privilege with respect to every issue in the complaint and in the counterclaims. That it has done intentionally and deliberately.

You have before you attached to my affidavit the affidavit of Raymond A. Cook, dated November 22, 1961, and filed in the Toolco-Northeast Control case before the C. A. B. That affidavit describes activities of Toolco since 1944. That affidavit, your Honor, I believe is the first draft of the counterclaims. If you read that affidavit next to the paragraphs in the counterclaims you will see that word for word in many respects many paragraphs are the same. The Special Master so found. The Special Master's first ruling at page 4372 of the transcript said just that. That analysis is

not original with me. It was Mr. Rankin's. It is perfectly clear that that is exactly what it is.

In addition to that affidavit, there are two affidavits of Mr. Holliday, one in this case, one in the [24754] C. A. B. Toolco-Northeast Control case. One of them adopts Mr. Cook's affidavit in toto. Both of them set forth in great detail not only the fact that the advice of the lawyer was relied on, but exactly what acts were taken and what was done and what was said with respect to that advice. It is perfectly clear.

Finally, your Honor, Mr. Davis' own affidavit in this case, which is attached to my affidavit as Exhibit C, says on page 4:

> "The activities of Toolco subsequent to 1960 which are alleged to have constituted a malicious and wilful interference with TWA's business were taken on my advice as counsel."

And then for a number of pages thereafter he sets forth what the Tool Company did, what actions he took, and so on.

These men are all attorneys, your Honor. That is perfectly clear. But they are also the attorneys who throughout this whole period of time were doing the basic negotiating on behalf of the Tool Company with all of the other clients. Mr. Cooke and Mr. Bautzer largely negotiated the 1960 financing. Mr. Davis was intermittently involved in the activities of 1961. The Master's last ruling, the one of September [24755] 15, 1962, closes with this:

> ". . . I believe regardless of any pleading there have been numerous waivers by affidavit in which

the whole question of the legal advice over a long term of years to the Tool Company has been presented in support of claims in legal proceedings, and by all of that action I consider that there has been a waiver. . ."

I won't burden your Honor any further. The hour is late. You have read all this material. I am not opposed to having the same opportunity to argue the same question, but I hope the facts are a little different next time and in different form.

The Court: That completes the argument on the matters before the Court. The Court is prepared to rule on the six items and will submit a formal pre-trial order and file it by 10 o'clock Friday morning. The hour is late now and I am in the middle of a three-month criminal trial. So tomorrow's time is pretty well circumscribed.

In Item 1, which was the ruling of the Special Master adjourning the deposition of Howard R. Hughes to February 11th, Mr. Sonnett's application to withdraw the appeal from that ruling is granted. Item No. 2, [24756] which is the appeal by Hughes Tool Company to review the order of the Special Master denying its application to examine Ben-Fleming Sessel and the Irving Trust Company by Sessel and Arthur L. Wadsworth and Dillon, Read & Company by Arthur L. Wadsworth, that appeal is denied and the order of the Special Master is affirmed. In conjunction with that I would like to say that in view of the withdrawal of the appeal by TWA from the order of the Special Master fixing the appearance of Mr. Hughes on February 11 I will take this time as an opportunity to state that I agree with what the Special Master has said and

that this deposition will proceed on February 11 in Los Angeles at the same time and place fixed in the original subpoena.

Item No. 3, the application by Hughes Tool Company pursuant to Rule 16, that application is denied without prejudice to renew on the papers before the Court 30 days after the completion of the deposition of Howard R. Hughes.

As to Item No. 4, which is the appeal by the Hughes Tool Company from the order of the Special Master directing the Tool Company to produce for inspection and copying by opposing counsel the documents with respect to which the Hughes Tool Company claims [24757] attorney-client privilege, the order of the Special Master is affirmed.

As to Items Nos. 5 and 6, which are related appeals, the first one going to the order of the Special Master denying TWA's application to quash or strike interrogatories served by Toolco on October 11, 1962, and the second, which is an appeal from the order of the Special Master overruling TWA's objections to further interrogatories dated November 13, the order of the Special Master is modified to the extent that TWA shall answer those interrogatories 60 days after the completion of the deposition of Mr. Hughes.

I think the resolution of much of this matter, both as to Rule 16 and as to the adequate answering of interrogatories by the plaintiff and the motions which Mr. Davis has been talking about, all will be assisted greatly by the deposition of Mr. Hughes, and I think, Mr. Davis, you will be closer to the resolution of the questions you are raising after Mr. Hughes' deposition than you are now.

Transcript of Proceedings, January 14, 1963

BEFORE:

HON. J. LEE RANKIN,
Special Master

* * *

[4885]

Hearing on request for production of Toolco's privileged documents, at the offices of Chester C. Davis, Esq., 120 Broadway, New York 5, N. Y., on January 14, 1963, at 11:56 a.m. Reported by Hyman Schneider, a Shorthand Reporter and Notary Public of the State of New York.

[4886] [APPEARANCES:]

* * *

[PRESENT:]

* * *

Mr. Hupper: Let the record show that the time is now 11:56 a.m., and that the various counsel are here to accept production of the so-called privileged documents which by Order of Judge Metzner of January 10, 1963, are to be made available to all parties by noon on January 14, 1963.

Let the record show that we are further here to receive delivery of any lists of further documents in respect of which the Tool Company claims the attorney-client privilege, again as provided in paragraph 4 of Judge Metzner's order of January 10, 1963.

Appendix A, Annexed to Affidavit of Bruce Bromley, February 15, 1963

Transcript of Proceedings, January 14, 1963

Mr. Cook, is the Tool Company prepared to com- [4887] ply with the Order of Judge Metzner of January 10, 1963?

Mr. Cook: Mr. Reporter, please show on the record that Mr. Chester Davis is not present at this time, when the request is being made. I have been shown by his secretary, however, a copy of a letter dated January 14th, from him to Judge Metzner, in which Mr. Davis has made the statement, "The documents have been placed in a sealed envelope and are now in my possession subject to further direction by the Court."

I have also been handed by Mr. Davis' secretary a sealed Manila folder which I suppose is an envelope, and it carries this legend on the face. "January 14, 1963. These are the privileged documents which are producible pursuant to the Special Master's order of September 15, 1962, and the order of the Court dated January 10, 1963, not to be opened except upon further instructions from Mr. Davis."

Construing the two together I do not consider, gentlemen, that I am privileged to turn over these documents to you at this time.

Mr. Hupper: Mr. Cook, can you tell us whether or not Judge Metzner has stayed the effectiveness of [4888] his order of January 10th?

Mr. Cook: I have stated all I know about it, Mr. Hupper.

Mr. Hupper: We understand from all information available to us that there is no such stay outstanding, and that being the case, I again call upon you to produce those documents.

Mr. Cook: I have stated all I know on the record.

Mr. Hupper: I must put you on notice that your failure to produce those documents at this time is in our view, it now being 12 noon exact, a violation of Judge Metzner's

order of January 10, 1963, and we will so treat it in further proceedings before Judge Metzner.

Mr. Giddings: The record should show that Mr. Hupper in his remarks has been speaking for all of the additional defendants, and Mr. Furth advises me also for counsel for TWA.

Mr. Bradner: That is correct.

Mr. Hupper: Mr. Cook, I would also like to request of you whether or not there are any other documents other than those which have previously been supplied to the Special Master, as to which a claim [4889] of privilege has been made, in respect of which the Tool Company now claims an attorney-client privilege?

Mr. Cook: I would prefer for Mr. Davis to answer that Mr. Hupper.

Mr. Hupper: The reason I asked that question is that paragraph 4 of the order of the Court of January 10th requires that the Tool Company provide us at 12 noon on this date with a list of any such other documents. In the absence of any information concerning such documents, or the furnishing of a list, it must be our position that there has been a violation of Judge Metzner's order in that respect also.

Gentlemen, I have nothing further except in accordance with your suggestion, Mr. Furth, I think we ought to request the reporter to prepare this transcript immediately so it can be sent forthwith to Judge Metzner.

Mr. Cook: Is that all?

Mr. Hupper: That is all for the moment.

(Whereupon, the hearing was concluded at 12:04 p. m.)

Toolco's Notice of Motion, January 14, 1963

[Doc. 145]

[CAPTION] 61 Civ. 2324

NOTICE OF MOTION

SIRS:

PLEASE TAKE NOTICE that upon the annexed affidavit of Chester C. Davis, sworn to this 14th day of January, 1963, and upon all the proceedings heretofore had herein, the undersigned will move before Honorable Charles M. Metzner, United States District Judge for the Southern District of New York, at a time and place to be fixed by him (a) for an order, pursuant to Rule 30(b), Federal Rules of Civil Procedure, that the deposition of Howard R. Hughes may be taken at this time only on written interrogatories; (b) in the alternative, and if the relief requested under Rule 30 (b) is denied then, pursuant to the order of the Court of September 7, 1961, that the motion of Hughes Tool Company to dismiss the complaint pursuant to Rules 12(b) and 56(b), Federal Rules of Civil Procedure, be brought on for hearing and determination and in connection therewith that the Court set a schedule for argument and for the submission of papers in support of and in opposition to said motion; (c) that the order of the Court of January 10, 1963 be stayed or otherwise modified until a final determination that this Court has jurisdiction over the subject

matter of the complaint; and (d) for such other and further relief as to the Court may seem just and proper.

Dated: New York, N. Y.
January 14, 1963.

Yours, etc.,

CHESTER C. DAVIS, Esq.
Attorney for Defendant
Hughes Tool Company
Office & P. O. Address
120 Broadway
New York 5, N. Y.

[To All Attorneys of Record]

[24759]

Pretrial Hearing, January 17, 1963

[CAPTION]

BEFORE:

HON. CHARLES M. METZNER,
District Judge

* * *

[APPEARANCES:]

* * *

[24761] The Court: Gentlemen, I have just received and have not had an opportunity to look at some minutes before the Special Master. Are they necessary for me to have read before we have our hearing this afternoon?

Mr. Davis: They do involve some new matter, your Honor, but I think we could take care of it with statements.

It primarily relates to the efforts made by some of the parties to obtain further documents or matters on the requested deposition of Mr. Hughes, and that sort of thing is covered in there.

The Court: All right.

Mr. Sonnett: I think Pages 90 and 91, your Honor, of the transcript are the matters in particular that the Special Master suggested be raised with your Honor relating to—I just received ours, yours must be at your office.

Mr. Davis: We have not received them yet.

Mr. Sonnett: I would be happy to read them aloud, if you like, it is a half a page, if you don't have your copy of it.

Is that agreeable, your Honor?

The Court: Certainly.

Mr. Sonnett: Reading from Page 90, this re- [24762] lates to the question of where the Hughes deposition should occur and the length of time during which Mr. Davis and Mr. Hughes should consider that question, having in mind your Honor's suggestions at the pre-trial conference in chambers yesterday, the Special Master stated today at Page 90 of the transcript:

"The Special Master: When I brought the matter to your attention I had in mind that it might be much more satisfactory and pleasant to Mr. Hughes and everyone else involved if we could have some satisfactory place that would provide not only a room where the deposition could be held, but a place where Mr. Hughes and his counsel could retire to at any time that it became a burden upon him and he wished a recess, or anything of that kind, as well as some adequate room for other counsel to retire to.

"I thought it could be arranged without prejudice to any claims and rights that the parties might have.

"As I see it, it is a matter of accommodation, and I am ready to bring the matter to Judge Metzner's attention and ask him to close the matter as of next Monday at 5 o'clock, and if there isn't some agreement on it, we will just have it at the courthouse, [24763] and that will be the end of it."

There is another paragraph, I suppose, that should be read, your Honor.

> "After we once start, or after it is set, and we all have to make commitments, I don't think it is reasonable this notice to try to move around. I am not willing myself to ask the whole court system to try to set something up for us and do all the things necessary, to inconvenience the Court and the Marshal's office, and other people that will be necessary to help us, and then make a change in it.
>
> "I assume you are not ready to say at this time, Mr. Davis, what you would desire to do, without prejudice."

And Mr. Davis replied: "I have the same confidence that Mr. Barr expressed a moment ago with respect to my outcome of the motion to dismiss."

Meaning that he was not ready to answer the question.

The Court: Yes. Well, I would suggest that regardless of the outcome of Mr. Davis' motion that that decision be made because you may be faced, Mr. Davis, with proceeding on February 11th and obviously arrangements do have to be made in advance as to what [24764] is going to happen so that you could indicate by next Monday where you want this taken in view of the information you brought to the Court's attention yesterday.

However, I have received a letter from you today in which I understand that you have withdrawn from the Court's attention that portion of the affidavit that we discussed yesterday. Am I correct in that?

Mr. Davis: I thought it was the reverse, your Honor. I thought I said that since Paragraph 9 was before your

Honor yesterday, that I was following the suggestion in effect that Mr. Sonnett made which was to file the affidavit with Paragraph 9 excised, and I am submitting Paragraph 9 in an envelope to be filed with the clerk of the court.

The Court: So that Paragraph 9 and the claims of relief based upon that Paragraph is still before the Court for determination?

Mr. Davis: No, the only thing before the Court for determination, your Honor, under the motion and application that I have made is solely that of bringing on our motion to dismiss.

I had asked for the Court the alternative of acceding to a procedure for furnishing the plaintiff with answers to written interrogatories, if it was the [24765] Court's view that such a procedure was necessary in order to consider the motion, and I understood the Court to have stated that it was not prepared to consider favorably a procedure for written interrogatories.

The Court: Is that the sole basis for Paragraph 9 being in the affidavit?

Mr. Davis: That is correct, your Honor. The purpose of Paragraph 9 in the affidavit, your Honor, is solely for the purpose of indicating the substantial burden and risk upon the Tool Company to proceed in a manner indicated by the order of January 10th before the plaintiff has either been subjected to the testing by motion to dismiss based upon the record as it is as of today or after the plaintiff had been given such other and additional opportunity as your Honor may grant to not come in with respect to adducing additional facts now known to the plaintiff, but before any examination of the defendants.

The Court: I will consider that the motion is made on the papers submitted to the Court yesterday, but for the purpose of the record, Paragraph 9 has been separately filed and sealed by the Court, the result being that the notice of motion and affidavit, which you filed in chambers today, shall be entered by the [24766] clerk and these papers shall indicate on their face that there is an additional portion of that affidavit under seal, which has been considered by the Court in conjunction with the applications contained in your notice of motion.

Mr. Davis: That is correct, and I understand that procedure is acceptable to the other parties.

Mr. Sonnett: I have no objection, your Honor, but to prevent any inadvertence of direction of your Honor's present direction, may I apply that Pages 5, 6 and 7 of our memorandum served yesterday which relate to this subject matter be sealed and we will submit a fresh copy for the Court file indicating that those pages have been deleted and are sealed, and would ask your Honor to instruct all other counsel who have the memo to so regard it.

The Court: What are the pages?

Mr. Sonnett: 5, 6 and 7. The entire Point 2 of our memorandum served yesterday.

The Court: All right.

Mr. Davis, you may proceed.

Mr. Davis: Your Honor, I understand that today it is primarily for the purpose of having the record indicating your Honor's ruling with respect to the re- [24767] spect to the request that I have made on behalf of Tool Company or a schedule relating to the submission for determination of Tool Company's motion to dismiss and also with respect to the application of Tool Company for a delayed effective

date of the order of the Court of January 10th requiring a production of privileged documents.

I understand that as a result of the discussion we had——

The Court: You left something out. You left something out. You have three requests for relief in this notice of motion.

Mr. Davis: That is right, your Honor, I disposed of the other one a moment ago. There was a third request for the possibility of furnishing to the plaintiff the answers to written interrogatories under Rule 33, whether they be addressed to Tool Company or to Mr. Hughes or however they want.

Likewise, a voluntary offer to make available to them, notwithstanding our position of privileged documents, all privileged documents at this time, if your Honor concludes that plaintiff should have that additional information before being subjected to my motion to dismiss.

[24768] To put it differently, your Honor: I conceive of the question that is confronting us now is that the plaintiff has claimed and is now claiming that it is entitled to examine the defendant, particularly Mr. Hughes, who is a named defendant, at this time, based upon the record to date and without any further disclosure to the Court than has taken place as of today.

On the basis of the Court's jurisdiction over the subject matter of this action, and we are resisting that effort on the part of the plaintiff. In resisting that effort, we have made two suggestions on which we are about to get a ruling on the record based upon our conference of yesterday.

The Court: Make a fresh record. Yesterday was a pre-trial conference. Today is just a pre-trial.

Mr Davis: All right, your Honor, I don't want to burden the Court——

The Court: You want a record, Mr. Davis, and you are entitled to it, so go make it.

Mr. Davis: It is our position, your Honor, that particularly under the decision of the Supreme Court in the Panagra case that came down, this plaintiff, by filing this complaint, has improperly invoked the jurisdiction of this Court.

[24769] I further submit to your Honor that a defendant is entitled to have not only the question of the Court's jurisdiction passed upon by the Court, but is also entitled to an adequate definition of the factual issues or, to put it in other words, the wrongful conduct alleged before the defendant may be required to testify.

The time has come when your Honor had indicated by its Order of January 10th that it was the desire of the Court to permit the plaintiff to examine Mr. Hughes.

Therefore, we are approaching the problem in two fashions: First, I say we are prepared to give additional information to the plaintiff, additional to the information he has now or had at the time he filed the complaint, and I am prepared to voluntarily give him these privileged documents.

Now——

The Court: You mean after the Court ruled?

Mr. Davis: I beg your pardon?

The Court: You are prepared to voluntarily give him the documents after the Court ruled you should give it to them?

Mr. Davis: I meant waiving the objection that we have to a voluntary—I say voluntary—I say without [24770] relying upon the direction of the Court to do it.

Secondly, we are prepared, if as plaintiff has been claiming and as we understand plaintiff's position, that a Rule 16 procedure would be premature, and that their answers to interrogatories are premature because they need to examine Mr. Hughes. I am questioning the validity of that argument.

If the plaintiff is not able to identify to the Court now the wrongful conduct which they claim is within the scope of the jurisdiction of this Court, I believe that the complaint ought to be dismissed and that is what I want to test.

I understand on that aspect of the matter your Honor has indicated—I don't know whether I should have a ruling on each one of these points first——

The Court: You just make your argument and I will hear the other people and then I will rule.

Mr. Davis: All right.

Leaving aside that offer that I have just indicated, we come to the question of fixing a schedule for the hearing and determintion of the motion to dismiss. In that area I call the Court's attention to the fact that that motion in part, only in part, will be based upon admissions on the record to date by the plaintiff [24771] in the court of the oral examination which the defendant was permitted to conduct under the prior Orders of the Court.

I want to call the Court's attention to the fact that the examination of Mr. Cocke is not completed by reason of the direction of the Special Master under circumstances which, if your Honor wishes to go into, we have been requested by the Special Master to discuss with your Honor——

The Court: I have read the transcript of the hearing involving that point.

Mr. Davis: Today the Special Master indicated that by reason of certain questions personal to Mr. Cocke, he will be prepared to dispose and permit me to conclude whatever scope of further examination he directs me to conduct at some future time and, as I understand the position of the plaintiff and the additional defendants, they are not concerned about eliciting any additional information from Mr. Cocke.

The second thing I want to call to your Honor's attention, however, is that Mr. Leslie's deposition has not been completed.

And that today Mr. Sonnett marked for identification a document, parts of which he read to your [24772] Honor in the last argument that we had, which resulted in the January 10th Order, for the purpose of requesting Mr. Leslie to translate these written notes and obviously indicating that he would expect to use that material in opposing my motion to dismiss.

He also stated, or confirmed, on the record today what previously appears on the record, that TWA had substantial cross-examination of Mr. Leslie.

Mr. Leslie, up until very recently, was a senior vice-president and financial treasurer of TWA, familiar with the financing aspect of this transaction involved in the acquisition of aircraft that this complaint talked about.

In that regard, your Honor, the position of the Tool Company is simply this: That the plaintiff be denied his cake and eat it too. Either they want to stand on the proposition that they are entitled to examine the defendant, Mr. Hughes, now based upon the showing they have made to date, or it is their position that they want an opportunity to develop more facts before they take the position they are entitled to examine Mr. Hughes.

As far as I am concerned, they can have either position. I respectfully submit they should not have both.

[24773] In other words, I am prepared to submit for determination by the Court, pursuant to whatever schedule the Court fixes, that my contention that this plaintiff, based upon this complaint and particularly the decision of the Supreme Court of the United States, is not entitled to stay in this court and to pursue the defendants in this way whatever or, I am prepared to consent to any schedule your Honor may fix which would give an opportunity to the plaintiff to develop or adduce any more facts out of TWA.

It is my position that it is the plaintiff's responsibility to establish facts justifying invoking the jurisdiction of the Court. They can not invoke the jurisdiction of this Court based upon what they do not know, but expect to find out from Mr. Hughes.

Obviously if they have got some other documents which they think are relevant or pertinent that they want to use in opposition to the motion, I would just expect an adequate development of whatever the facts are in connection with whatever document it is, according to the direction of the Special Master.

I don't want my position in this regard to be construed as it is likely to be construed as another attempt to delay anything.

[24774] With the Supreme Court decisions of the other day I am satisfied that I can proceed and should proceed with the protection of the rights of my client, especially the heavy burden of expense that this litigation is causing. I do recognize, in fairness to that, the plaintiff may assert and may assert later, and that is why I want to preclude it if I can, the assertion that, oh, well, there was a lot more

that Mr. Leslie knew, but we didn't have an opportunity to complete Mr. Leslie.

I will make one more comment with respect to the schedule, your Honor, because I have in mind what was discussed informally yesterday with all of the counsel.

In connection with the fixing of this proposed schedule, I appreciate the fact that plaintiff is pressing your Honor for a schedule which would permit the possibility at least of a determination of this motion prior to February 11, as if that date is any more sacrosanct than any other pre-trial Order as to the deposition of other witnesses, but I am fully aware——

The Court: I should not use the word "sacrosanct" in that Order, should I?

Mr. Davis: But I am fully aware of the strong expressions made by your Honor in that regard. What I want to call to your Honor's attention, which I did not [24775] do yesterday, your Honor, is that among the other burdens which I already have and may concur momentarily, I am confronted with a briefing schedule in the Delaware action, which also involves a motion to dismiss with respect to Mr. Hughes. That schedule involving a brief this coming Wednesday and oral argument this coming Friday. That is an action which, of course, is being guided and controlled by Mr. Sonnett of Cahill's firm, I should say, on behalf of TWA.

I have no doubt that I can obtain an adjournment or an extension of the schedule in Delaware if I had a little cooperation from counsel here, and I would like to suggest that the Court could be of some assistance to me in obtaining that cooperation if your Honor has in mind the kind of a schedule which was discussed yesterday.

Now then, I come to the last application for relief, which is contained in the papers that were filed last Monday, and that is in connection with the Order of the Court affirming the decision of the Special Master with respect to the delivery of these privileged documents.

In that connection I merely want to point out that the delivery of those documents results in irreparable [24776] consequences, not merely with respect to the documents themselves, but with respect to the subject matter opened up by those documents.

I want to be sure that your Honor understands that the issue here is not whether or not these documents are in fact communication between attorney and client entitled to the attorney-client privilege, but for a waiver, that the issue of law that has been decided by the Special Master, and affirmed by your Honor, is as to the effect of a waiver by a mere pleading of a defense advice of counsel without an identification of the nature of the advice.

The Court: What about the affidavit?

Mr. Davis: Likewise the affidavits which state that what was done was done pursuant to advice to counsel, but does not disclose the nature of the advice. The presumption is that what was done was done because that is what counsel advised, but conceivably they did exactly the opposite of what counsel advised.

There is a statement by the Special Master of other conduct, but there has been no determination of what other conduct is being referred to.

I do recognize that—bear in mind, your Honor, that this is a defense which is asserted before the [24777] defendant knows what the plaintiff is claiming, he knows now little bit more in this wilful prosecution, we do realize that o long as that defense remains the plaintiff is entitled to quire into it, but I submit and that is the whole issue on

which I so far have had adverse rulings of the Court that the time within which the defendant has either to abandon the defense or disclose the nature of the advice, is when it is his turn to be deposed, to testify in pre-trial proceeding of some kind.

That is the issue of law which I would like to preserve, if I may, for some Appellate review or, at least, until such time as the Court has had an opportunity to pass upon this jurisdiction question and, therefore, the relief which I am not seeking with respect to this production of documents is that the Court consider delaying the effective date of the production of those so-called privileged documents at least until the Court has acted upon this motion to dismiss, which is about to be scheduled.

Now, alternatively, so that I won't have to stand up again, I have indicated yesterday that should, contrary to my expectations, the Court not look with favor upon that delayed date, that then I would like a [24778] reasonable opportunity to try to get some additional relief.if additional relief is, in fact, available to me.

Now let me address myself for the moment as to what harm we are talking about by delaying their obtaining these documents, these privileged documents.

Is it for the purpose of opposing my motion to dismiss? Presumably they know what the course of conduct is which they claim, I don't know what they have to prove in a motion to dismiss, but can't they identify what it is they are claiming without these communications between attorney and client?

Presumably it is for the purpose of preparing for the examination of Mr. Hughes. This presupposes, of course, that the motion to dismiss is not granted. They say that is

what we assume and we are entitled and getting ready for that eventuality.

Everything that has been said on the record, your Honor, indicates that the examination of Mr. Hughes is to be protracted. Sonnett made that statement on the record, several months. These additional defendants want to examine on the counterclaim even though they haven't filed an answer yet to the counterclaims because they got extension of time from the Special Master, as [24779] I recall it, that so long as the motion is to dismiss the counterclaim, which they did not make, but TWA made, was pending, they did not want to have to answer the counterclaims.

They want to examine Mr. Hughes on February 11th. We have no answer to the counterclaims yet.

Now, I submit, your Honor, that considering the possible injury to Tool Company, if we should be right, either with respect to our motion to dismiss or on this question of law, as compared to the injury which is likely to take place or the handicap to these plaintiffs and additional defendants in examining because they are not able to obtain what normally no one obtains, namely, privileged communications between attorney and client, leaving aside whether or not I made a mistake in my pleading, is hardly to me a reason for saying that it is of importance that they obtain the documents now.

Therefore, I respectfully submit that on that issue the Special Master has seen all these documents and I would have no objection for the Court inquiring of the Special Master as to whether he believes that these documents would contain anything which would be of material bearing on any motion to dismiss, but I do resist the production of those privileged documents [24780] at this time because of the consequences to my client if that takes place.

The Court: I understand that you are still relying upon your defense of advice of counsel.

Mr. Davis: No, your Honor, as a matter of fact——

The Court: It is not in the case any more?

Mr. Davis: Your Honor, certainly if it is based—if all they are claiming, the defense of counsel was a defense, if a defense at all, to the alleged wilful and malicious interference of the affairs of TWA.

Tillinghast identified the documents, letters—the letters that he received. If that is all that is involved in this wilful and malicious interference, I don't need that defense, but there again I am caught between several things which have happened. I have been taking the position all along that a defendant had to make a final decision with respect to his defenses only after either a Rule 16 proceeding or answers to interrogatories. But on January 10th I was told I was not going to have that.

Therefore, the question about when need I amend my pleadings, well, presumably, if the deposition of the Tool Company takes place on February 11th, as [24781] presently scheduled, then I have got official date at that point on the basis that I am assuming, but I submit that the issue that the assertion of advice of counsel puts the other side merely on notice that that is a defense which will be asserted at the trial, and that they are entitled to discover that evidence before we go to trial, but it itself does not constitute a waiver of the privilege.

That has been the difference of opinion.

The Court: Plus the affidavits, don't forget the affidavits.

Mr. Davis: Likewise it does not identify, disclose or the nature of the advice. I think that that decision, your

Honor, if it is the law, I presume it is as of the moment, I submit has some pretty serious impact on the proof as a whole, and I believe one which does deserve review to the extent to which a review is feasible, without adversely affecting whatever rights the plaintiffs may have.

My point in this regard simply is that I don't believe that there is any facts which would justify the conclusion that there is any particular harm or injury to the plaintiff at this time.

Now, if we presuppose the motion to dismiss [24782] that that is subject—a certification or otherwise, depending which way it goes, by whatever decision comes down, is likely to be reviewed, there would be an appropriate time to obtain a review of the whole at that time. I respectfully submit that until the Court has made a determination that it does have jurisdiction based upon this complaint and whatever has transpired to date, but not about what is to transpire tomorrow, and that the enforcement of the determination that plaintiff is entitled to these documents on the ground of the waiver of attorney-client privilege is something which should be submitted.

The Court: You have not only moved under Rule 12-B, but also under 56, for summary judgment and there will be affidavits submitted and I don't know whether those alleged privileged documents or, rather, I will go along with you and say that the non-waived privileged documents would not be necessary for the plaintiff to resist your motion.

Mr. Davis: Your Honor ——

The Court: I am sorry, I thought you were finished.

Mr. Davis: I was going to address myself to Rule 56.

[24783] The Court: I was just making an observation.

Mr. Davis: Your Honor, the motion was drawn, of course, before the Supreme Court came down with this Panagra decision. I think you will find that the grounds upon which we present this is not based upon any question of the triable issue of fact. It is true the plaintiff does want to submit some affidavit in that regard and I would be interested in knowing what facts they want to disclose.

The Court: Are you going to rely solely on the face of the complaint to make your motion?

Mr. Davis: Yes, sir, I have two grounds on which I am going to brief, at least it is my thinking as of the moment. One is going to be based solely upon the complaint, the decision of the United States Supreme Court in the Panagra case, and the CAB orders, 44, 50, and the further control case which specifically covered the conduct in relationship of Tool Company with TWA.

The second part of my contention will be predicated solely upon admissions of the plaintiff. I submit, your Honor, that admissions of a plaintiff are not in the same category as when parties submit conflicting affidavits which raise an issue of fact to be filed.

If a plaintiff makes admissions and says this [24784] is what I am complaining about, it becomes part of the complaint and if what he is complaining about does not entitle him to any relief, that is the end of it.

The Court: You mean to say—I don't know what the record shows—but I assume you are referring to the record of depositions that exist up to the present time when you speak about admissions, is that correct?

Mr. Davis: Those contain admissions and not admissions, your Honor ——

The Court: You are going to put those in and Mr. Sonnett is not going to be able to say there are other por-

tions of that record which I want to come in which may dilute the admissions.

Mr. Davis: Certainly, my point is, Your Honor, that admissions, I was addressing myself to the ——

The Court: Weight to be given to the document.

Mr. Davis: No, to the problem and the cases and the line of cases which relate to whether there is a triable issue of fact whether two parties contend something different.

Now, we may disagree and Your Honor will have to decide what is the nature and scope of the admission, but it is not the same thing as whether I claim that fact "A" two place and the other side claims fact "B" [24785] two places, thereby raising an issue of fact to be decided which as the Second Circuit has said, you don't decide that on summary judgment. That is the only point I was trying to make, your Honor.

The Court: All right.

Mr. Sonnett.

Mr. Sonnett: Your Honor, I will rest primarily on the memorandum which was served and filed by TWA yesterday. I would add to that only very briefly as follows: In response to the answers Mr. Davis has just made to you and since we have a complaint unanswered here, I take it that Mr. Davis' proposed motions are going to be motions for judgment on the pleadings under Rule 12-C and perhaps a summary judgment motion.

12-C, as the Court will recall, provides that after the pleadings are closed, but within such time as not to delay the trial, any party may move for judgment on the pleadings if on a motion for judgment on the pleadings matters outside the pleadings are presented to and not excluded by the Court, the motion shall be treated as one for summary judgment, and disposed of as provided in Rule 56, and all

parties shall be given reasonable opportunity to present all material made pertinent to such a motion by Rule 56.

[24786] As your Honor pointed out repeatedly in the case before, therefore a plaintiff is entitled to discovery by way of deposition and certainly the plaintiff is entitled to present portions of the existing record, affidavits or anything which can confirm that which is going to be presented to the Court by Mr. Davis, which I haven't yet seen.

Accordingly, your Honor, I think the record made today on this problem is so clear that I would feel that I were trespassing on the Court's time, it being now about a quarter to 6:00——

The Court: Only a half a day, Mr. Sonnett.

Mr. Sonnett: It may be for your Honor, but after listening to Dr. Davis all morning, it seems to me like it is several days.

The Court: I have two questions to ask you.

Mr. Sonnett: Yes, your Honor.

The Court: About what is this Leslie deposition. Mr. Davis seems to indicate that one of the basis of opposition to his motion will be a claim by you that you have not completed or started a cross-examination of Mr. Leslie?

Mr. Sonnett: No, sir. Mr. Davis——

The Court: I think I have voiced Mr. Davis' objection.

[24787] Mr. Sonnett: You have, I was disagreeing not with your rendition of what he said, but Mr. Davis would let me better to speak for myself. Your Honor directed that all depositions pending at the time of February 11th would be suspended for the Hughes deposition to commence.

I intend to comply with the Court's orders, of course.

As for Leslie, again Mr. Davis is making a mountain out of a mole hill. The fact of the matter is, as I presented to the Court the last time we had an argument in court, the fact of the matter is that Mr. Davis has crept up very slowly on Mr. Leslie and he hasn't got into the years which will be most enlightening because these were the years in which the big damage occurred to TWA.

If he sees fit to present a motion to the Court based on whatever there may be in the 10,000 pages of record to date, or the one million, seven hundred thousand pieces of paper to date, obviously I will search that record and present whatever I can to oppose it and anything else available to me to oppose that motion.

As to Leslie, Mr. Davis has not completed his direct and at the rate he is going, he won't be through [24788] with that for a while, so the opportunity for cross-examination hasn't arisen yet.

However, because of a purely practical problem, since he applied this morning in a motion to the Special Master, which is in the record that your Honor hasn't had a chance to read, he applied to suspend all depositions until your Honor had determined his motion to dismiss and in connection with that motion, the Master has directed that the Cocke deposition be adjourned without date, the date to be fixed some time after the conclusion of the Hughes deposition, and in response to Mr. Davis' request that the Leslie deposition be adjourned, I said I had no objection but there was a practical problem.

The practical problem was that we had a piece of paper written by Mr. Leslie, a lengthy one, whose handwriting is illegible or almost so, except to him, and therefore urged that in lieu of taking Mr. Leslie's deposition next week, which was set to be resumed next week and since Mr. Davis

was asking that it be suspended, that the Special Master should, if he saw fit to do so, send the handwritten notes to Mr. Leslie and ask him to dictate a translation and send them back to us, since the content of that document would be of considerable use not only on the motion, but also on the deposition [24789] of Mr. Hughes, and the Special Master saw fit to so decide and has undertaken to do that so that there isn't any problem in respect of the Leslie situation.

The Court: The next question I want to ask you, Mr. Sonnett: Mr. Davis said he had some problems regarding time because of a Delaware proceeding. Is it within your power to "get off his back" concerning the Delaware proceeding?

Mr. Sonnett: The difficulty there which involves, of course, entirely different offenses and different damages is——

The Court: I am just thinking about time. You know the date that I preliminarily set yesterday.

Mr. Sonnett: Yes, your Honor. May I say to your Honor this that it has been as difficult to get Mr. Hughes to come in to that court as it has been in this and that dilatory tactics followed by Mr. Hughes finally led—after an appeal—finally led to a holding that he couldn't attack the sufficiency of the complaint against him individually there without making a general appearance.

Finally that was settled on appeal and, by the way, all TWA's way, I might add, and finally Mr. Davis brought on his motion. He has been talking about this [24790] Delaware case where, by the way, they are represented by very competent counsel, Judge Tunnel, a former member of the bench down there and a very able advocate, easily as good as what we see in any courtroom.

Judge Tunnel has argued a good many matters before. I haven't found it necessary to argue down there except once on a preliminary matter about a year ago. He has been talking about a motion to dismiss the complaint against Hughes individually in Delaware for a long, long time, back since May, at least, of this year.

He has made his motion. He has submitted his brief. We have put in our answering brief. It has been served and filed. The vice-chancellor has set the matter down for argument, I do not intend to argue it and I don't see what his problem is.

Mr. Davis creates these very problems for this very purpose. That is to say, that only he can attend everything that may be involved in the Hughes situation no matter where it is and then urges that upon the Courts as an excuse for delay.

If your Honor, despite what I have just said, were to say to me that you think that the administration of justice would be furthered if we were to consent to an adjournment, I would say to your Honor, we would ask [24791] the vice-chancellor to do so cheerfully, because we will follow any suggestion your Honor makes.

The Court: Well, I can't direct you as to what you should do.

Mr. Sonnett: I only want a suggestion if your Honor feels your Honor should make it.

The Court: Well, I think that it would be helpful in view of the tremendous burdens that Mr. Davis says that he is involved in and I am not going down the collateral road to find out whether those burdens are as heavy as he said they are or not, but in view of the position that you have taken in the proceedings in this court, I would say

that if it was possible for you to relax the schedule that is imposed upon Mr. Davis in Delaware, that you should do so, if it does not prejudice your clients' interests in any way.

Mr. Sonnett: On the assumption, your Honor, that the Special Master is going to rule favorably on a second motion which was before him today, and it was left that rather than speculate as to your Honor's decision, because we were running into conflicting versions of your Honor's tentative thinking as of last night, and I suggested that the Master hear the arguments today and reserve decision until he had your Honor's [24792] Order and then decide these other matters.

One of the motions, which is critically important, involves some additional tax information which will be essential in connection with the deposition of Hughes, and I think very helpful in our position to this forthcoming motion.

I think that the Special Master is going to grant that.

Now that, therefore, will allow a lot of time for Mr. Davis to function on that question, although he doesn't need any help there because Mr. Cocke's firm has worked on the tax problems of Hughes for many years, and is a very distinguished tax partner who could produce all the documents we sought in the motions this morning within a matter of 48 hours.

However, in order—since I anticipate a favorable ruling there and I want Mr. Davis to turn his attention to the more urgent matters involved in this case—I would be willing, your Honor, quite happily, to ask our local counsel, Mr. Fingerly, to ask the vice-chancellor to set this motion down for any time between the 1st and the 11th of February, which Mr. Davis would select.

I believe he is going to be in California on [24793] February 11th, along with the rest of us, if not earlier.

The other alternative, if I may finish, the other alternative is that we will be tied up in this deposition out there and if Mr. Davis insists that he, rather than Judge Tunnel, should argue the thing in Delaware, it will be some months before it is argued.

So I am perfectly agreeable to any adjournment up to, but not later than whatever time it takes him to get to the West Coast for February 11th, whichever date is agreeable to him and to the vice-chancellor.

Mr. Davis: You are not replying to the reply brief, Mr. Sonnett, which you keep overlooking. It is perfectly agreeable to me and I appreciate your cooperation.

Mr. Sonnett: You aren't representing that you are writing the reply brief?

Mr. Davis: Yes, that is so.

The Court: Pardon me, it is getting late and the sun is beyond the mizzenmast, or something like that.

I understand, Mr. Sonnett, that you will try to arrange for a relaxation beyond February 1st of whatever schedule Mr. Davis is under in the Delaware proceeding.

Now, I am not familiar with the schedule except [24794] that he indicated he had to get something out during the period between now and February 1st. All I ask is that, if you can, do this with all propriety with regard to the interests of your client, and if you can, facilitate the adjournment of that schedule so that Mr. Davis will have his time free for these motions, which he wishes to make before this Court in this proceeding.

Mr. Sonnett: Yes. Mr. Tenney, my partner, your Honor, suggests that we can do that quite readily if we

have his reply brief a few days before the argument, we can, I am sure, work that out by agreement.

It may be one of the few things we can work out by agreement.

The Court: Now the last thing. On the attorney-client privilege, Mr. Davis in urging the Court that at least the Court should modify the Order of January 10th to the extent that you are not furnished with the documents prior to the Court's ruling on the motion to dismiss.

Mr. Sonnett: As to that, your Honor, it is very hard to answer because we don't know what is in the documents and depending upon the nature of the advice—and I must say I don't understand Mr. Davis' argument—when something is said that a client acted pursuant to [24795] legal advice, that that may not mean that at all. It may mean that the client acted just the contrary to the legal advice.

I am completely lost there. That is one of the more difficult of the many difficult things I have heard Mr. Davis say, but not having seen the documents, I can't tell how useful they would be in connection with the motion to dismiss.

I don't know whether there is advice in there which is now waived which I could stand up in Court and say, "Your Honor, Mr. Davis, or one of his colleagues back a year ago or two years ago, expressed the legal opinion which I join in today," on some point or another. I can't tell.

As to the question of the damage that will be done by a disclosure, I think that is very badly overstated. We have a situation where the first order to produce this material was made many months ago and by a process of trip, stumble and delay, Mr. Davis has kept them out of our hands for many months despite all the pressure from the Court. To say that to make this material available to counsel in-

volved in this case is going to cause any great public injury, I just don't understand. I don't follow it at all.

[24796] The fact is the Court has directed that we are entitled to have the material. I therefore see no mystery about our having it now as the Court has directed.

The Court: Judge Bromley.

Judge Bromley: I think not tonight, your Honor.

The Court: Mr. Giddings.

Mr. Giddings: Your Honor, in view of the hour and everything that has been said, we will rest on Mr. Sonnett's remarks.

The Court: Mr. Stewart.

Mr. Stewart: No further argument.

The Court: I promised you I wouldn't call on you last next time. I will change that.

I hope to have a formal written order tomorrow, but I am involved in this long criminal case and the committee meeting that I attended between the adjournment of the case this afternoon at 4:30, and coming down here at 5:00, has been adjourned after a half hour because of my leaving until tomorrow at 4:00 o'clock, so that if it is not out by tomorrow at 5:30, it will be out by noon on Saturday morning.

All right.

Toolco's Notice of Motion, January 22, 1963

[CAPTION]

[2527]

SIRS:

PLEASE TAKE NOTICE that upon the motion of defendant Hughes Tool Company ("Toolco") to dismiss the complaint herein, the papers to be filed in support of said motion by Toolco as provided in the order of the Court dated January 19, 1963, and upon all proceedings herein, the undersigned will move before Honorable Charles M. Metzner, United States District Judge for the Southern District of New York, at such place as shall be fixed by him, on February 8, 1963 at 4:00 o'clock in the afternoon, or at such other time thereafter as shall be fixed by the Court, (1) for an order that the deposition of Howard R. Hughes shall not be taken in this action until after a final [2528] adjudication of the aforesaid motion to dismiss and (2) for such other and further relief as to the Court may seem just and proper.

Dated: New York, New York
January 22, 1963.

Yours, etc.,

CHESTER C. DAVIS, ESQ.
Attorney for Defendant
Hughes Tool Company
120 Broadway
New York 5, N. Y.

[APPEARANCES]

• • •

[3] Mr. Davis: I have just sent a letter to Judge Metzner which I would like to read into the record, and I will have copies for you, sir, and all counsel here, which reads as follows:

"Dear Judge Metzner:

I was unable to obtain an interlocutory review of your order requiring the delivery to opposing counsel of privileged documents pursuant [4] to your order dated January 10, 1963 as amended by your order of January 19, 1963 and the stipulations between the parties pertaining thereto. In view of the irreparable injury to my clients which would result from prematurely turning over to opposing counsel such documents, as counsel for Hughes Tool Company I must respectfully decline to comply with your said orders, at least prior to a determination of the motions to dismiss now pending before your Honor.

There would be no objection, of course, to furnishing such documents to your Honor so that you may satisfy yourself that nothing contained therein would be useful in connection with your proper determination of said motions.

Very truly yours."

Transcript of Proceedings Before Special Master J. Lee Rankin, January 23, 1963

I have a copy here. I will show this copy to you.

Mr. Barr: Mr. Davis, purely in the interest of making a record, I certainly want to put you on notice that I do consider this to be contempt. I assume that it is deliberately done. May I ask just for the record whether there is any dispute as to whether or not you were as of 5 o'clock this evening [5] required under the existing orders of the Court to produce these documents for our inspection and copying.

Mr. Davis: There is no question in my mind that the stipulation extending the time within which the Tool Company could comply with the order of Judge Metzner dated January 19, 1963 expired at 5 o'clock today.

Mr. Barr: I have one other matter.

Mr. Zeller: I would like to note for the record that it seems apparent that Mr. Davis is going to turn to this in regard to the premature turning over of the documents. This is deliberate flagrant contempt of the Court's order. We certainly have to reserve our rights to act accordingly.

Mr. Davis: I appreciate that. So the record may be clear, you should understand that I, as counsel for the Hughes Tool Company, am satisfied that the Court lacks jurisdiction over the subject matter of this action. I recognize that could develop if I was in error, but I feel it is my duty as counsel for the Hughes Tool Company, and I believe I have precedence for this, to refuse to permit any further action on the part of the parties [6] which would cause any injury to my clients, until after the Court determines the motions which are pending before it, and which establish that there is jurisdiction in the premises.

I know this is not the time and place to argue the merits or lack of merits of such a position, but that is the position.

Transcript of Proceedings Before Special Master J. Lee Rankin, January 23, 1963

Mr. Barr: Mr. Davis, again for the record, I take it you do not contest the jurisdiction of the Court over the counterclaims?

Mr. Davis: There are motions to dismiss those counterclaims now pending before the Court. I recognize that you have taken advantage of the existence of that motion for obtaining a ruling that you were not required to answer those counterclaims, and in the form the motion was made by TWA.

My recollection is a little vague of the extent as to which you supported that position, directly or indirectly before the Court, but whether you did or did not, the fact is that there is pending before the Court, undetermined, a motion to dismiss the counterclaims. By reason of the existence of that motion to dismiss now pending, the additional defendants have not filed any answers to the counter-[7]claims within the time prescribed by the rulings.

Mr. Barr: I take it that you are not persuaded by the efficacy of the motion to dismiss, or any motion to dismiss.

Mr. Davis: If the Special Master feels it would be useful for me to engage in any more discussion with Mr. Barr, the matter is adequately stated on the record.

Mr. Barr: I want to be perfectly clear. I think it is to your advantage as well as ours, that we are clear on this —I take it from your remarks that you do not contest the jurisdiction of the counterclaims.

Mr. Davis: You may assume whatever you want to. At present there are motions to dismiss those counterclaims before the Court. I did resist that motion, but I have no decision on it. I will consider what else is involved after I get a decision on those motions.

Transcript of Proceedings Before Special Master J. Lee Rankin, January 23, 1963

Mr. Giddings: Mr. Special Master, to complete the record on the question of documents, Judge Metzner's order of January 10th directs that the documents heretofore submitted to the Special Master shall be produced.

[8] It goes on to state that if there are any additional documents to which the defendant Hughes Tool Company asserts a non-waive[d] attorney-client privilege, such documents shall be submitted for a ruling to the Special Master by noon of January 14, 1963, and a list thereof furnished at the same time to counsel for all parties.

May I ask through you, Mr. Special Master, whether or not there are such other documents, and whether lists are available?

The Special Master: Mr. Davis.

Mr. Davis: I do not know of the existence of any other documents called for by the rulings of the Special Master heretofore made with respect to the production of documents.

Mr. Zeller: That is not quite the question. The question is whether there are any documents you withheld from production on the grounds of attorney-client privilege.

Mr. Davis: I do not know of the existence of any other documents called for by your Rule 34 motion, which have been withheld on the ground of privilege, that are not in that sealed envelope which I now have, and which represent all the documents that [8A] the Special Master examined. I don't know how clear I can make it.

Mr. Zeller: Well, it is clarified.

[9] Mr. Barr: Mr. Special Master, for your information you should be informed that we have not received any notification or any indication, or any communication of any

sort from counsel of the Tool Company with respect to the place of taking the deposition, and therefore pursuant to the last sentence of Judge Metzner's order of January 19th, which I think perhaps I should read— "Consequently, unless counsel for the defendant indicates by noon on January 22, 1963, a desire to change the designated place, the deposition shall proceed in the United States Court House in Los Angeles."

We have not received any such indication, and accordingly, pursuant to Judge Metzner's order the deposition will be held at the courthouse.

We are making our arrangements, and for your convenience I want you to be aware of it also.

Mr. Giddings: That applies to the other additional defendants.

Mr. Davis: So no one may take any unnecessary steps, let me say that the Tool Company is not prepared to address itself to whatever problems, if any, exist with respect to the availability of Mr. Hughes at any particular time, until after there [10] has been a determination of the Tool Company's motion to dismiss.

Mr. Zeller: I take it that deals adequately, in your judgment, Mr. Davis, with that provision of Judge Metzner's order, as well as the provision directing you to produce documents. I take it this is something you thought about very carefully before doing it.

Mr. Davis: I trust that it adequately takes care of all the information that you gentlemen need.

Mr. Zeller: I am talking about the expression of the defiance that you just made.

Transcript of Proceedings Before Special Master J. Lee Rankin, January 23, 1963

Mr. Davis: Your characterization of the facts, Mr. Zeller, will not change the facts, and you may describe it as you wish. I am prepared to pursue this matter of dismissal. I am satisfied, not only by my knowledge of the facts, but based upon the complaint, the law as I know it, the admissions of the plaintiff on the record, that this court does not have jurisdiction over the subject matter of the complaint, and I am satisfied that ultimately that will be the decision.

Therefore, I feel it is my duty to protect my client from a further burden and annoyances which [11] would be extreme by attempting to make any further arrangements on the assumption that this complaint will continue as a complaint justifying any further proceedings in this action.

Mr. Barr: Mr. Special Master, may I request—we want these documents very badly and we will take whatever steps are available to us.

May I request, sir, and I think that you should immediately inform Judge Metzner at your first opportunity, of contempt of Toolco's counsel so that the Court can take whatever proceedings it deems advisable under the circumstances.

The Special Master: If you ask that this transcript be transcribed promptly, and be sent to Judge Metzner, I will so direct.

Mr. Barr: I do so request. In view of the fact that the contempt has occurred, that you, sir, at your first convenient opportunity, should inform the Court that its order is being held in contempt by the Tool Company.

The Special Master: I shall do so. I assume that any action concerning the contempt will be taken before Judge Metzner.

Transcript of Proceedings Before Special Master J. Lee Rankin, January 23, 1963

Mr. Barr: I have been running that over in my [12] head, sir, and I believe this is his order, and it is before him.

The Special Master: I am not sure what the status of it is. I think it is an affirmance of my order, but you will have to figure out what you think is the proper thing to do, and I will be available.

I do regard it as a contempt. Mr. Davis, I appreciate your position that you claim the Court does not have jurisdiction of the subject matter. I am not sure that that will protect you if the Court during its deliberations has to have a reasonable time to determine that fact, if prior to the time it determines that fact you fail to comply with the Court's orders.

Furthermore, I wish to call to your attention that even though you would maintain your position that the Court does not have jurisdiction of the subject matter insofar as the complaint is concerned, the counterclaims may very well be independent as far as the law is concerned, and this order bears both upon the counterclaims and the complaint, so that the contempt may be valid for failure to produce with regard to the counterclaims even if the Court should find [13] finally that the complaint should be dismissed because it does not have jurisdiction of the subject matter.

I bring that to your attention so that you will not overlook it, and act in such a way as to bring great injury to your client without at least having it in mind.

Mr. Davis: These are matters which I have had in mind, Mr. Special Master, which have been very carefully considered by me.

The fact remains that those counterclaims are currently subject to a motion to dismiss, whatever the grounds, and

that until the Court has acted upon those pending motions to dismiss, I believe that I am not only justified, but it is my duty to resist further discovery on the basis of the complaint or counterclaims until those pending motions are decided in such a way so as to determine the questions that are involved.

I hand you a copy of the letter that I sent to Judge Metzner, sir. May the record show that I am handing you gentlemen a copy thereof at this time?

Mr. Barr: Mr. Special Master, just so there will be no doubt on the record, I construe Judge Metzner's order as requiring the production for each [14] of us individually, and the right of the plaintiff to receive the documents and the right of any of the additional defendants is equal, but separate.

But so that there will be no doubt on that question, may I ask you to direct the Tool Company to produce those documents only for the additional defendants.

The Special Master: I so direct.

Mr. Davis: The position of the Tool Company remains the same, Mr. Special Master.

[15] The Special Master: I want to call your attention, Mr. Davis—this may be gratuitous on my part—this is a serious action and I am sure you are well aware of that—of the fact that your requests for stays of this action during the efforts to take various action, until the Court will act concerning your motion to dismiss, or for summary judgment, have all been denied, as I understand it, and I think that has an important bearing upon the question of your duty to comply with the order. I merely call it to your attention—

Transcript of Proceedings Before Special Master J. Lee Rankin, January 23, 1963

Mr. Davis: That may be unless those orders are errors as a matter of law. Insofar as the stays involved are concerned, they were for a review of these interlocutory orders, which I did not obtain, since the application for review of the interlocutory orders were denied, or at least the decisions covered both.

I am aware of the fact that I had previously made an application to Judge Metzner for a stay with respect to the application of the provisions relating to the production of the privileged documents. I am aware of those matters.

The Special Master: I do not mean to argue [16] the matter with you, Mr. Davis, and I am sure you do not mean to.

I am just trying to make sure that you are not overlooking any of these things which I think have a serious bearing upon the whole question.

Mr. Davis: I have tried not to overlook anything.

Mr. Barr: Let me say again so that this record is clear, that whatever the appeals, the Second Circuit, this afternoon at about 4:00 o'clock, denied Mr. Davis' application for a stay of Judge Metzner's order requiring him to produce those documents, which have been extended by stipulation until 5:00 o'clock.

It denied his petition for leave to file a petition for mandamus, and it dismissed the appeal that he took yesterday afternoon—that the Tool Company took yesterday afternoon—with respect to both of Judge Metzner's orders of the 10th and the 19th of January.

So that there is no motion of any sort pending with respect to either of Judge Metzner's orders, or with respect to the privileged documents.

Transcript of Proceedings Before Special Master J. Lee Rankin, January 23, 1963

The Special Master: Mr. Zeller.

[17] Mr. Zeller: There is one other matter I would like to turn to, if I may, Mr. Special Master, and that is to the order which your Honor recently issued requiring the production of what we might call the tax documents, for lack of a better shorthand expression.

I would like your Honor to direct at this time that at the time of production of those documents, that any documents called for by that motion which the Tool Company desires to withhold under a claim of attorney-client privilege be submitted to your Honor for consideration and a ruling, and that a list of such documents be furnished at the same time to us.

The Special Master: Mr. Zeller, I am not clear—maybe you can help me—as to whether there is anything open that the Tool Company could claim a privilege on.

Mr. Zeller: I don't know. It is the way Mr. Davis responded earlier on this question, your Honor, when we asked him whether there were any other documents being withheld on grounds of attorney-client privilege.

His response was, if you will recall, that there were no documents called for in our original [18] Rule 34 motion which he was withholding on grounds of attorney-client privilege.

A new category has been opened up by your Honor's granting of the additional Rule 34 motion here recently.

It may well be, and I suspect it will be, that there will be documents called for in those categories which the Tool Company will assert a claim of attorney-client privilege on.

My request is simply for a direction that if that be the case, that the documents against which any such claim be

asserted, be submitted to your Honor at the same time production is made to us of the clearly non-privileged documents, and that we be given a list of the documents as to which the claim is made.

The Special Master: Mr. Davis, do you wish to comment on that request?

Mr. Davis: May I say this, Mr. Special Master: I am informed that it would be physically impossible to gather the documents covered by your last ruling with respect to the production of documents within the time specified therein, irrespective of any other objections that we may have.

[19] I base that upon information I received from Mr. Cook that it would take weeks to try to gather all of the material called for if the Tool Company were in fact properly required to produce such material.

Therefore, at this juncture I know of no claim of attorney-client privilege with respect to the material called for.

I haven't the slightest idea whether there would exist or would not exist any documents which would fall into the category of attorney-client privilege when that is done.

But to be sure, some of those documents would be located fairly soon, but to produce all that were called for would not be feasible within the time allowed.

May I also state that it will be our intention to seek a review of the ruling, and of course, we also are confronted with the position which the Tool Company has indicated today it intends to take and maintain, until after there has been a determination of the motions pending before the Court.

I am not going to try at this time to address myself to all those various things, but I have given [20] you at this time all that I know on the subject.

The Special Master: I will grant your request then, and direct that the Tool Company furnish such documents and lists thereof at the time of production.

You may incorporate that in your request for a review, if you like.

Is there anything further, gentlemen?

Mr. Zeller: I think that is it.

(Whereupon, at 5:30 p.m., the hearing was closed.)

Toolco's Notice of Motion, January 25, 1963

[Doc. 152]

[CAPTION] 61 Civ. 2324

NOTICE OF MOTION

SIRS:

PLEASE TAKE NOTICE that defendant Hughes Tool Company ("Toolco") will move before Honorable Charles M. Metzner, United States District Judge for the Southern District of New York, at a time and place to be fixed by him, and upon such papers as he may direct, for review of the order of the Special Master of January 22, 1963 requiring Toolco to produce for inspection and copying by opposing counsel certain new and additional documents recently requested which the Special Master has ruled are entitled to confidential treatment, and which are more fully described in the schedule attached to the affidavit of John Hupper filed in support of the motion to produce, and for such other and further relief as to the Court may seem just and proper.

Dated: New York, N. Y.
January 25, 1963.

Yours, etc.,

CHESTER C. DAVIS, Esq.
Attorney for Defendant
Hughes Tool Company
120 Broadway
New York 5, N. Y.

[To All Attorneys of Record]

[24799]

Pretrial Hearing, January 28, 1963

[CAPTION]

BEFORE:

HON. CHARLES M. METZNER,
District Judge

* * *

[APPEARANCES]

* * *

[24801] The Court: Mr. Davis, you filed a notice of motion setting down for hearing an application by you to adjourn taking the deposition of Mr. Hughes. You made it returnable——

Mr. Davis: Four o'clock, February 8th, your Honor.

The Court: Yes, I assume from your subsequent correspondence you are withdrawing that motion.

Mr. Davis: That is correct, your Honor. The only purpose of filing that notice of motion was merely to give your Honor an opportunity by mechanical means to carry out what your Honor indicated you intended to do in your January 10th and January 19th order, and at this time I have no motion or application to make.

The Court: You don't have to actually because I think I indicated in that order that after reviewing the papers, if I thought the deposition should be adjourned, I would notify you to that effect.

You did not have to——

Mr. Davis: Your Honor, it was just a question to have something before your Honor to [24802] act upon. That was the only purpose that I had in bringing on that motion, and I am pleased to withdraw it at this time.

The Court: Secondly, we have your application to review the order of the special master regarding the production of the so-called tax documents.

Mr. Davis: That is correct, your Honor.

The Court: Let us hear argument on that.

Mr. Davis: All right, your Honor.

I am not prepared to present to the Court at this time all the facts and circumstances relating to the problems of the Tool Company in connection with the production of those documents. I have been in communication with Mr. Holliday in Houston, who in turn reported to me the information he obtained there. I am prepared to give that information to your Honor orally now.

I would hope to have an opportunity to submit an appropriate affidavit identifying what those circumstances are and perhaps more fully or accurately than I can state them now.

I am sure your Honor will appreciate that I have been addressing myself primarily to the problem [24803] of the papers that I am to file by February 1 on the very important motion to dismiss that we have brought on, which is now pending before your Honor.

Quite apart from any other consideration, I am informed that in order to review the files which would have to be reviewed to reduce the documents which are called for by the schedule annexed to Mr. Hupper's affidavit it would require a review of substantially all of the same files which were reviewed once before in connection with the production of documents which was made pursuant to your

Honor's order of, I believe it was, March of last year. In other words, there is no way that all the documents called for by that schedule could be produced other than by reviewing substantially all of the files, both in Houston and in Los Angeles, which were reviewed once before.

I am informed that it is the opinion of those who are familiar with those files that probably all the documents called for have already been produced and made available to plaintiff and these additional defendants. To be sure, that does not include the 1961 tax return or the 1962 tax return called for, which is not yet prepared, and [24804] of course that is not available.

I am also informed that based upon the actual cost and expenses incurred in connection with the prior review of the files and production, it is estimated that the cost of doing this at this time would be conservatively at least $150,000.

I am also told that in order to review the files which would have to be reviewed it would take a period from four to six weeks.

I am also informed that at this time, particularly with the year end and the work which has to be done in connection with year-end tax returns, federal and state, the closing of the books, the individuals who are familiar with or who could most readily identify the documents called for, which relate to information that was used in connection with the review by the Internal Revenue of whatever tax returns were filed or whatever questions were raised, are all at this time busily engaged on other matters.

Now, this is the substance of what I was told. I have asked that it be put in affidavit form so I could submit it to your Honor. I expect to have it shortly. I am not in a position to per- [24805] sonally supervise the preparation of the affidavit.

However, in that connection, your Honor, I think that I should also state that the Tool Company believes quite sincerely that the motion to dismiss is entitled to not only the most careful consideration by the Court but, notwithstanding the indications given on the record by the Court, is firmly convinced that the action will be dismissed and therefore has asked me to resist as respectfully as I can granting to these plaintiffs or additional defendants further discovery causing any further expense or burden upon the tool company until after the Court has either decided the motion to dismiss or has satisfied itself that it is a meritorious motion to dismiss.

While I am up I will cover all the ground at once, and, without suggesting that I believe that the Court is likely to require that the tool company incur the burden of expense I have attempted to describe prior to a consideration of our motion to dismiss, I would like to respectfully suggest that, if the Court is of a different view, as in the case of the privileged documents, which the Court's order [24806] of January 10th and January 19th required me to produce—and I exhausted my efforts to obtain a review of those orders unsuccessfully—I be given an opportunity of developing some procedure so that I may have some kind of an order which would be appealable, because I know that I still have to convince your Honor that the motion to dismiss that we are bringing on is a meritorious one.

I believe that when I submit my papers on February 1, and they are not going to be in as well organized a shape as I would like them to be—I am running behind schedule—I believe that your Honor will be satisfied, whichever way your Honor will decide the question, that it is a serious and meritorious question, and I can personally assure your Honor that the desire on the part of the Tool Company to resist further production or discovery proceedings by the

plaintiff at this time is not for the purpose of interfering with the expeditious disposition of this lawsuit.

I would like to finish my remarks by pointing out that somehow or other the issue seems to have developed as to whether or not Mr. Hughes will or will not be available on a particular date [24807] and whether or not the tool company will or will not make further production of documents, rather than the question which basically the Tool Company has sought to bring on for disposition, and that is whether or not this Court should entertain any further the action commenced by this complaint. And I think at this point perhaps I should address myself, unless it would be preferable that I wait in connection with the application which is being made to withdraw the motion to dismiss the counterclaims——

The Court: I assume that would be in answer to what they have to say, because you still do have at the present time the counterclaims pending; so even if you were successful on a motion to dismiss the complaint, you still have counterclaims totaling $385 million for which Mr. Hughes' deposition is also scheduled.

You can answer that after we hear from the plaintiff and the additional defendants on the question of the production of the so-called tax documents, and then I will come back to you, Mr. Davis, because I am sure you will be answering that question on the counterclaims.

[24808] Mr. Davis: All right, your Honor.

The Court: Who wants to start off—Mr. Sonnett or Judge Bromley?

Mr. Bromley: May it please the Court, I take it from what we have just heard that Mr. Davis does not now dispute the correctness of the special master's finding that good cause has been shown for the production of the documents requested under the Rule 34 motion; that said docu-

ments are all relevant; that it does not present a new or novel contention because the plaintiff many months ago was put on notice that we wanted these documents; that we were making the contention that the Tool Company made a profit and received tax advantages from its transsactions.

I take it that he no longer disputes that the documents are important and necessary and that his sole argument is related to the burden and that he wants more time.

Well, the master recognized that there was a burden, but found that it was not an unreasonable one and that he should comply, because it was highly important that we have the documents prior to the taking of the deposition of Mr. Hughes.

[24809] Now, as your Honor has indicated, I am not at all concerned with his motion directed toward the complaint because I am perfectly clear that the counterclaims will stand, and I assert that I have a right to examine Mr. Hughes and to get these documents all in relation to my examination with respect to the counterclaims.

I therefore take it that it is perfectly clear that the special master's action should be affirmed by you and that we should proceed to give our attention to the question of how serious, if at all, the question of burden really is. And I think you, Mr. Sonnett, should express your views in that respect of that matter to his Honor.

The Court: Mr. Sonnett.

Mr. Sonnett: Yes, your Honor. I have a short answering affidavit in connection with Mr. Davis' appeal on the tax document matter. With the Court's permission I would like to serve it and file a copy now. It has some facts which I think should be in the record before your Honor on this question of burden.

The Court: Go ahead.

Mr. Sonnett: Does your Honor wish to [24810] examine that affidavit or shall I paraphrase it?

The Court: You might as well paraphrase it.

Mr. Sonnett: In paragraph 2, your Honor, the affidavit adverts to the findings by the special master based on his intimate familiarity with the discovery matters in this case.

The burden of production on the Hughes Tool Company of these documents at this time is in fact reasonable.

Secondly, in paragraph 2 of the affidavit we refer to that portion of the special master's ruling in which he adverted to the fact that employees and counsel of Houston, Texas, who have for many years represented Tool Company generally as well as in its tax matters, could assist in the production to such an extent that the burden upon Mr. Chester C. Davis and his associates in connection therewith should not be great.

In paragraph 3, your Honor, the affidavit develops the fact—and we believe it to be the fact—that a substantial amount of work has been done previously in assembling various material which will be of help in connection with this matter. [24811] such as supporting papers, work papers relating to financial statements, and other detailed financial information.

That became known to us first about a year ago when they were producing documents at Houston, Texas, and at that time they withheld two or three boxes of work papers which were said to contain supporting work papers relating to financial statements and the like. That matter was brought to the attention of the special master on March 22, 1962, and it resulted in a direction by consent to effect that that material be held in the custody of Mr. Davis's firm for delivery as might be required later.

In paragraph 4 of the affidavit we point out that the Andrews, Kurth, Campbell & Jones firm, which is undoubtedly one of the leading firms in Texas, has been counsel for the Hughes Tool Company for some 50 years; that Mr. Cook has been personally engaged in the legal and financial matters of Hughes Tool Company for over 10 years, this by their own statements.

Accordingly it seems to us that with the resources available to the Andrews, Kurth firm, the [24812] production could, where there is a will to do it, be made promptly and, indeed, should be made by Wednesday, recognizing, however, that the matter of production of documents is always a burden on any litigant, as it has been, I can assure the Court, in the case of TWA, where we have produced hundreds of thousands of hundreds of thousands of documents at great expense to our minority stockholders—recognizing that burden. However, our proposal in this affidavit is that your Honor direct that whatever is available now be produced by January 30, 1963, as the master has directed; that your Honor further direct that there be a production on a day-to-day basis thereafter until the production is complete, and that it should be complete on February 6, 1963, which would mean about a week's extension of time to make the production, which the master has found, in fact, could reasonably have been made on the 30th of January.

Now, as to the importance of the TWA viewpoint in these documents, I think it speaks for itself, your Honor. We want them not only for the deposition of Mr. Hughes, but it is my opinion and belief that these documents, when we get them, may [24813] be of considerable assistance for the motion which Mr. Davis is now at long last going on and insisting be pressed to your Honor for the Hughes deposition.

I think that materiality is evidence, your Honor, from the fact that I hold in my hand documentary proof from the Bank of America files of statements made by Mr. Hughes himself in 1960 and statements made by Mr. Noah Dietrich in 1960 specifically pointing out that the 102 tax problems had always been and were at the heart of the Hughes problem, and I propose to establish on the record to date, and certainly so out of Hughes' mouth when he is deposed, that because of the tax problems of Hughes Tool Company and Mr. Hughes personally they engaged in the course of conduct alleged in our complaint and that that course of conduct undeniably violates the antitrust laws and was not and could not be exempted or dealt with by the CAB.

So I would like to have these papers in connection with his motion as well as in connection with the deposition.

Thank you, your Honor.

The Court: Mr. Chandler?

[24814] Mr. Chandler: I have nothing to add to the statements of Mr. Sonnett, your Honor.

The Court: Mr. Stewart?

Mr. Stewart: I join very heartily in the statements that Judge Bromley and Mr. Sonnett made.

The Court: All right.

Mr. Davis: May I reply?

The Court: Surely.

Mr. Davis: If your Honor please, I don't know about the facts referred to in Mr. Sonett's affidavit. I do have a recollection about some arrangements that some work papers were to be kept by Mr. Cook pending some determination of confidentiality. As far as I know, they were all produced, but I don't know what the facts are in that regard.

What I would like to address myself to primarily, however, is to the assumptions made by Judge Bromley in his

remarks that I am conceding that there was good cause or relevancy in the documents called for. That, of course, is not an accurate statement of my position. My position is at this point I am not prepared to address myself to [24815] that request or to that review of the special master's order. I simply have not had time to prepare in view of my efforts to work on the brief.

May I point out, first of all, how the additional defendants are affected by whether or not the Tool Company made a profit or did not make a profit or obtained some tax advantages reviewed by the Bureau of Internal Revenue with respect to its control or exercise of control of TWA, I just don't see how that establishes any relationship whatever to their defense.

In so far as plaintiff TWA is concerned, Mr. Sonnett just said that this will indicate to give an explanation as to why Mr. Hughes engaged in the course of conduct allegedly in violation of the antitrust laws.

I respectfully submit, your Honor, we are not concerned as to why someone violated the antitrust laws; we are concerned with whether they were violated, and I respectfully submit that whether or not the Tool Company did or did not make a profit in transactions which were reviewed and approved by the CAB and whether or not the purpose or objection or reasons why the Tool Company acquired 78 per cent [24816] control of TWA was because it would put it in a position where it could employ its cash and thereby avoid whatever is to be avoided against an improper accumulation of cash, and whether or not that was done by buying more securities of TWA or by providing funds for the acquisition of aircraft by TWA, I just don't understand how that can be said to be seriously documents that they have to have for the purpose of establishing

either that the Tool Company or Mr. Hughes engaged in a violation of the antitrust laws or how they could conceivably afford a defense to any of the counterclaims.

It is respectfully submitted at this point, however, that I am expressing this as what seems to me to be a rational reaction to the statement that I have heard, and I respectfully request the Court for an opportunity to address more fully on that question.

The Court: You have had this problem for a long, long time. I don't think you need any more time to present your point of view on this.

There is nothing new; it has been hanging around for several weeks.

Mr. Davis: What has been hanging around [24817] for several weeks, your Honor?

The Court: This production of the documents. What was the date of your affidavit before the special master?

Mr. Davis: The special master's ruling——

The Court: You prepared yourself to oppose the ruling of the master, you must have prepared yourself for this too. What is the date of the Hupper affidavit?

Mr. Bromley: January 9th.

The Court: Today is January 28th.

Mr. Davis: That is correct, your Honor, and I can assure you that between January 9th and now I have been on one matter or the other constantly in connection with this litigation.

I would also like to point out that I have lost two, almost three days of the time that was allotted to me by the Court in connection with the preparation of this material relating to this motion to dismiss. One of them was I received a request to attend a subcommittee of the Senate Judiciary Committee, it is called some Antimonopoly Committee, with

Senator Kefauver with reference to the Pan American-
[24818] TWA merger and whether or not there was any pressure being applied on Mr. Hughes or the Tool Company in connection with this Pan-American-TWA merger. I have received two calls today from the Justice Department on the same question, and between times your Honor knows I have had to prepare papers and appear before the Court of Appeals——

The Court: This is your choice, not mine.

Mr. Davis: I understand that, but nevertheless I don't believe the circumstances here present indicate that the Hughes Tool Company is not entitled to whatever efforts it is entitled to make in order to protect what it believes to be its rights. I don't think there can be any question that if, in fact, as we claim we are going to be able to satisfy your Honor shortly, this complaint lacks merit and is a matter which is not properly before this Court but should be properly before the CAB, I respectfully submit that there is a grave injustice being done by requiring the Tool Company to do any more than it already has done.

The Court: You already have boxes of this stuff that you have gone through. Turn it over.

[24819] Mr. Davis: That is what happens when we get the facts piecemeal. That is not compliance with the schedule that Mr. Hupper has stated. That was compliance with your Honor's order as construed by the special master with respect to what we in fact did produce on March 15th and April 15th of last year.

The Court: You have it, haven't you, and it has been gone through?

Mr. Davis: They have been made available, your Honor.

The Court: These three boxes, I understand, have not been made available.

Mr. Davis: Your Honor, all I know is that Mr. Cook assumed the responsibility with respect to that production. The special master required that somebody be done, and it was done. There was a ruling with respect to treating it with confidentiality.

If what we are talking about is this affidavit by Mr. Hupper, I frankly do not know what is in this affidavit, and I am not in a position to either analyze what is in those boxes, if there are any such boxes——

[24820] The Court: Mr. Cook is, though, isn't he?

Mr. Davis: Mr. Cook has been engaged as I have been——

The Court: Let us get one thing straight. Has the material in the three boxes been turned over to parties in this litigation?

Mr. Davis: Have they been?

The Court: Yes.

Mr. Davis: I haven't the slightest idea.

The Court: Why don't you ask Mr. Cook tonight. If they haven't, turn them over.

Mr. Davis: I will do that.

Mr. Bromley: Of course not. They have been refused.

The Court: He has had them for a long time.

Mr. Davis: Your Honor, I cannot say any more sincerely than I have already said that it seems to me—and I believe I have authority to support it, if I had time to present it to your Honor—that there is a serious motion to dismiss this complaint.

[24821] The Court: You have argued that before the Court of Appeals.

Mr. Davis: No, your Honor. The only thing I have argued before the Court of Appeals was whether or not the order of this Court with respect to privileged documents was appealable and therefore reviewable.

The Court: I read what you said before the Court of Appeals. You went beyond that narrow point, Mr. Davis.

Mr. Davis: Now, your Honor, if your Honor has the record of the argument before the Court of Appeals and the notice of appeal that was filed, you are fully informed as to what took place there. All I can say, your Honor, is that it was one order which covered the production of the privileged documents and referred to other material. In order to obtain a stay from the Court of Appeals it was necessary for me to have an appealable order and my understanding of what the Court of Appeals did was to refuse to recognize that the order requiring the production of documents was appealable and thereby denied me a stay and did not consider my [24822] writ of prohibition——

The Court: Did not.

Mr. Davis: Did not.

The Court: I think Judge Lumbard directed you to argue all three items before him. It says so in the record.

Mr. Davis: If your Honor please, it turned out to be that I was denied leave to file it. That is what the order of the court was.

Mr. Sonnett: It was on our cross motion which was before the court.

Mr. Davis: I came back from Washington your Honor, on Tuesday, late Tuesday afternoon, having spent the day with this Kefauver committee, which, like everybody else, takes the position, an independent branch of the government—I tried to tell them I was busy in a court proceeding—that it is none of their concern, and found myself in the Court of Appeals the next day; and I respectfully submit to your Honor that I did not argue my writ of prohibition and that all that has happened so far has been that the order of this Court with respect to privileged docu-

ments was held to be nonreviewable, and I am prepared to follow whatever [24823] procedure is the appropriate procedure to follow in order to obtain what may be a reviewable order.

The Court: Well, I come back. It appears that Mr. Cook has two or three file boxes of work papers supporting the financial statements sent to the special master which had been held pending determination of their confidentiality, which means they have been reviewed and you know what is in them, and they have been there since March of 1962.

Mr. Davis: I will be perfectly happy, your Honor, to get what the facts are and submit them to your Honor. I am just not in a position to give you the information that you are asking me for.

The Court: Call me tomorrow morning and let me know.

Mr. Davis: I did not hear what your Honor said.

The Court: Call me tomorrow morning after you have spoken to Mr. Cook. At your suggestion Mr. Cook has them, according to this transcript before the special master, if Mr. Sonnett has correctly reproduced the transcript.

Mr. Davis: I will undertake to give the facts to your Honor tomorrow morning.

[24824] The Court: But I can't see any reason for any more time to argue why these things should not be submitted. You have had that same problem with even a greater degree in the attorney-client privilege asserted by you.

Secondly, I haven't heard anything about the question of, assuming that the complaint is dismissed, which is what your goal is now, the six counterclaims that are still pending in this court asserted by you against the plaintiff and the additional defendants.

In regard to the plaintiff, the plaintiff has moved to withdraw its motion to dismiss the counterclaims, and the additional defendants have filed their answers to those counterclaims, and Mr. Hughes is being deposed on those as well as upon the complaint, so I can't see why this material can't be furnished.

And let me hear from you, Mr. Sonnett, on your motion to withdraw your motion to dismiss the counterclaims.

Mr. Sonnett: Yes, your Honor. Before coming to that, and in order that the record be perfectly clear, may I call to your Honor's attention [24825] pages 18 and 19 of the transcript of January 23rd before the special master, because there, as again I believe here, what Mr. Davis was contending was that he had received information from Mr. Cook, because obviously Mr. Cook is the source of all Mr. Davis' information on the matter of these documents.

At the top of page 19 of that transcript what Mr. Davis said, which I think he has again said here, is that it would take weeks to try to gather all of the material called for if the Tool Company were in fact properly required to produce such material.

I am confident, your Honor, that on the basis of the 50 years that Andrews, Kurth has represented the Tool Company and the over 10 years that Mr. Cook has been in intimate contact with their financial and other matters that firm is quite capable of producing within 48 hours 90 per cent of the material called for by this motion, including the three boxes of work papers in connection with financial statements that were segregated a year ago.

It seems to me that they therefore should be required to produce that which is now available and to continue producing until some date [24826] prior to the Hughes deposi-

tion and complete it so that we have the opportunity of looking at the documents.

Mr. Davis' problems about understanding the relevance of the tax aspects of this can be set at rest if he would only read the statements that Mr. Howard Hughes made to the Bank of America in December of 1960 because Mr. Hughes understood the relevance very clearly of his tax problems and the course of conduct which he followed with respect to TWA.

The Court: What about your motion to withdraw your motion to dismiss the counterclaim?

Mr. Sonnett: Yes, your Honor.

We served our motion on January 25th, your Honor. As my affidavit indicates——

The Court: I wish you had done it a couple of weeks before. I have wasted a lot of time.

Mr. Sonnett: I can only suggest to your Honor the question of Pandora's box, or the lady and the tiger, and perhaps only your Honor would be the one to know, but I do regret that it wasn't done sooner. My only excuse for that is that I know [24827] how much the Court has to do anyway on this and other cases, and that is that when I was advised, as I was, that the additional defendants had seen fit to answer these counterclaims and took the position, as I did, that that was a matter for them and not for TWA, in view of the fact that they were going to answer the counterclaims, it seemed to me that the procedural morass that would then result was one that TWA should try to avoid and, in the interest of trying to avoid that, it seemed to me I should ask your Honor's leave to withdraw the motion to the extent indicated in our motion papers, namely, to the extent that we seek now to keep the motion alive, in effect, only with respect to a portion of counterclaim 2, that

is to say, a portion of our attack on counterclaim 2, and with respect to paragraph 6——

The Court: You mean it doesn't state a claim under 408; is that the part you are keeping alive?

Mr. Sonnett: Yes, your Honor. It fails to state a cause of action.

In so far as we pressed on your Honor a highly technical and complicated set of motions [24828] addressed to the point that the counterclaims were not proper under Rule 13, in light of the present posture of the case, and the fact that the additional defendants have answered, it seems to me TWA's interests are best served by our withdrawing the motion to that extent and asking your Honor for leave to reply to the counterclaims when we have examined Mr. Hughes.

On that point the derivative nature of the counterclaims, assertedly derivative nature of the counterclaims that would be left in the case, I think, make it particularly appropriate if we give Mr. Hughes a chance to tell us what he knows, not only about the allegations of the complaint, which I take the stand denied, regardless of this motion, but as well as the allegations in the counterclaim which, so far as TWA knows to date, are not true.

That is our position, your Honor.

The Court: Mr. Davis.

Mr. Davis: Your Honor, the reason given by Mr. Sonnett for withdrawing his motion on the counterclaims is indeed fascinating because the reason that the additional defendants did not answer [24829] the counterclaims was, when they argued before the special master that they should not be required to answer the counterclaims by reason of the motion to dismiss which was pending, the special master over my objection granted the request of the additional

defendants to delay answering the counterclaims while the motion to dismiss was pending; and now, if I understand Mr. Sonnett correctly, upon hearing that the defendants were ready to answer the counterclaims, he withdraws his motion.

I appreciate, your Honor, I haven't had time to really think about what this maneuver really means, because at the same time I understand that counsel for the additional defendants is bringing on a motion returnable the 18th of February to dismiss the counterclaims with prejudice as punishment for alleged contempt by reason of the fact that I have withheld these privileged documents.

What it appears to be, your Honor—and this is a matter of extreme seriousness, and unfortunately it involves matters which are not before the Court relating to this Pan American-TWA merger—but what this means, your Honor, is a development [24830] of a sacrosanct——

The Court: Thank you.

Mr. Davis: —date, February 11th.

Now, what is it about February 11th, or any other date in the neighborhood of February 11th, which is of such vital importance to this plaintiff or these defendants where even our effort to have a most serious motion to dismiss considered by the Court, nothing should interfere with the date of February 11th? That became——

The Court: Let me ask you a question, Mr. Davis. If the date was April 11th, could I have had your motion to dismiss the complaint for summary judgment?

Mr. Davis: Yes, your Honor.

The Court: I would have?

Mr. Davis: Your Honor, let me put it this way. That motion was made, as I believe the rules require, upon the basis of the complaint. My Rule 11 motion was——

Pretrial Hearing, January 28, 1963

The Court: If you had noticed it for argument and if I had fixed the date of Mr. Hughes' deposition for April 11th——

Mr. Davis: Of '63?

[24831] The Court: —and adjourned the master's fixing of the date of February 11th?

Mr. Davis: Your Honor, whether I was right or wrong on this, let me at least explain to you what I was doing, and this is basically a problem which I think is an interesting one from the point of view of the rules.

We have the concept that a complaint does not have to be as explicit as it used to be in some pleadings. Therefore, we then approach it next that a plaintiff who has seriously brought on a claim—I would not say in this case the plaintiff is represented by counsel who is inept at drafting pleadings, but in other cases it may be—I understand some of the rulings of the Court of Appeals to be that courts lean over backwards in giving a plaintiff opportunity to adequately explain or demonstrate what it is he is complaining about.

The Court: Pardon me, Mr. Davis. I have just one question to ask you, and I think the answer can be a simple one.

If on January 10th I had adjourned the deposition of Mr. Hughes from February 11th to April [24832] 11th, and if I had acceded to your request that you proceed with the deposition of Ben-Fleming Sessel and Mr. Wadsworth, do you tell me that I still would have received a notice of motion from you dated January 14th to dismiss the complaint for summary judgment?

Mr. Davis: Your Honor, the answer is yes to your Honor, but let me say there is only one thing that I don't want to be misunderstood on, and that is what I was waiting for was not a decision about Ben-Fleming Sessel or Wad-

sworth; the only thing that might have delayed my bringing on the motion to dismiss until January 14th was or would have been the ruling with respect to the answer to interrogatories under Rule 16.

Had your Honor on January 9th granted the application for a Rule 16 proceeding that we made, referring to the special master or to the Court, or had your Honor required the interrogatories to be answered, then there is no question in my mind that I would have withheld the making of the motion, because then I would have made a motion both under Rules 11 and 56.

Now let me say one other thing, your [24833] Honor. At the present time the motion, the papers that I will file with you on February 1, by noon, in whatever condition they may be——

The Court: They will be in good condition, I am sure.

Mr. Davis: Not in the condition they should be in, your Honor.

I will call your Honor's attention that as a practical matter I am forced to abandon my Rule 56 motion and I have to proceed solely on the Rule 12 motion.

The other impetus which permits me to tell your Honor, with no question whatever in my mind that such a motion had been made, was a decision of the Supreme Court in the Panagra case.

The Court: You did not even know about it when you filed the papers with me.

Mr. Davis: Your Honor, I had been relying on the Panagra case for some time. To be sure, both sides had been using it.

The Court: You did not know when the Panagra case was coming down, and your papers were prepared before it came down.

Pretrial Hearing, January 28, 1963

Mr. Davis: The minute your Honor [24834] indicated to me that your Honor had decided not to give me a Rule 16 proceeding and no answers to interrogatories, at that point, so far as I was concerned, there was going to be no further opportunity to elicit from the plaintiff what the basis is for this complaint, what is the course of conduct on which they are relying, and at that point I had no more any reason whatsoever but to test the theory which I had adhered to from the time this complaint was filed, that this complaint and the subject matter of this complaint was improperly in this court.

However, I naturally, so long as the Court would permit me to adduce from the plaintiff what is (sic) is that the plaintiff was claiming—now, the notice for taking the deposition of Mr. Sessel, which had been made at the time the complaint was filed and which was covered by the earlier orders of the courts, your Honor—and, as I explained to the special master, I was treading water, your Honor, from October of 1962, until your order of January 9th, proceeding with taking oral depositions in the face of what the special master said on the record repeatedly, that there was no question that I was not [24835] going to be able to find out the facts I was seeking because TWA quite candidly said, "We don't know the facts." The facts are in the knowledge of counsel who investigated the facts and there is only one way to get at that and that is by interrogatories.

I could have examined every officer of TWA and know no more than I know today. I could have called your Honor's attention to Mr. Rummel's testimony, to Mr. Cocke's testimony, to Mr. Tillinghast's testimony. None of them know of any course of conduct violating antitrust laws. They say this complaint is because of what counsel recommended

because of their investigation. They asserted the work-product and attorney-client privilege, and here I am.

The minute your Honor denied me the answers to interrogatories until after we were examined—and there is no question that for the Tool Company to proceed with these depositions in Los Angeles will involve the expenditures of vast sums of money. Now, that has nothing to do with respect to the availability or lack of availability of Mr. Hughes and, so far as I am concerned, your Honor, I would have brought on that motion to [24836] dismiss, as I was prepared to argue that motion to dismiss shortly after it had been referred to your Honor for all purposes——

The Court: Except you acquiesced that it wasn't timely to bring on.

Mr. Davis: Your Honor, I always recognized, and I am prepared to recognize at this date, that I am prepared and I am so confident of my facts that I am prepared to let this plaintiff, any time he wants to, present whatever facts he wants; not for the purpose of raising an issue of fact, I will admit every fact he asserts and ask for a decision on the law, I will admit every answer he gives me on interrogatories.

It seems to me I should have an opportunity to do that. An issue of fact is raised, your Honor, only if I were to deny anything, if I were to deny what they say, but I need a statement under oath, I don't need a statement under oath by any officer of TWA claiming to have knowledge of the facts and I admit them. They can use those facts either for the purpose of construing the complaint or anything else they please, and I ask for a determination of the case on the law, and if I am wrong on [24837] that, your

Honor, I will make a commitment. Then we proceed to the assessment of damages.

Mr. Sonnett: What Mr. Davis just said—or else I am having trouble with my hearing—it is like someone once said, "Listening to him is like trying to nail a custard pie to a wall," but if he said that he admits the allegations of the complaint, TWA now moves for judgment on his admissions and for the relief sought in the complaint.

The Court: I don't think he said that.

Mr. Sonnett: I am not sure. I never know exactly what he is saying except that he wants to use the Federal Rules for himself, the Tool Company, but he doesn't want anybody else to use them.

The Court: All right. That takes care of three matters I have here.

Review the rulings of the special master regarding the production of the tax documents: I will give you until tomorrow to tell me about those three boxes of papers, Mr. Davis, and I will then decide the matter. I see no necessity for additional time for additional argument on the question of the counterclaims.

I assume everybody has finished talking [24838] about TWA's motion to withdraw the motion to dismiss the counterclaims. That motion is granted with leave to TWA to file their answer 10 days after the conclusion of the deposition of Howard Hughes.

I have an application here which I received at 2:30 this afternoon, and I assume other counsel have received it, from an attorney for Mr. Tillinghast——

Mr. Davis: I don't believe I have that, your Honor.

The Court: You don't have it?

Pretrial Hearing, January 28, 1963

Mr. Harrell: Mr. Davis, your office was served with it Friday evening.

The Court: —to answer the counterclaims within 10 days after the conclusion of the deposition of Howard R. Hughes.

Do you want to say anything in opposition to that, Mr. Davis?

Mr. Davis: No, your Honor. I suppose it is the same thing that TWA is doing.

The Court: Yes, the same disposition on that.

I have one other thing here, a question I wanted to ask you, Mr. Davis. [24839] You wrote me a letter January 23rd which has been made part of the record before the special master. I will just refer to the last three lines of the second sentence in that letter, which read:

> "I must respectfully decline to comply with your said orders, at least prior to a determination of this motion to dismiss now pending before your Honor."

The question I want to ask you about those three lines is: did you make this decision on your own, or did you discuss this with your client?

Mr. Davis: I discussed it with my client, your Honor.

The Court: All right. That is all.

Mr. Stewart: If your Honor please, one other item.

Additional defendant Dillon Read has not as yet answered the counterclaim, and under the prior state of the record had until 30 days after your Honor's decision on the motion of TWA to dismiss the counterclaim.

May I at this time apply for 30 days in which to formulate our reply to the counterclaims? [24840] Since the mo-

tion is now withdrawn, there will therefore be no decision, presumably, and we would like to have this additional time to prepare a reply.

The Court: I don't think you can have 30 days. I certainly think your answer ought to be in by February 11th, the date of the deposition.

Mr. Stewart: That would be perfectly satisfactory. That is fine.

The Court: All right.

Re: *TWA* vs. *Hughes Tool Company, et al.*

Hon. Charles M. Metzner
United States District Judge
United States Court House
Foley Square
New York, N. Y.

Dear Judge Metzner:

Referring to the request of Your Honor for a report with respect to the material referred to in the affidavit of Mr. Sonnett served upon me in Court yesterday, and the conversations that Mrs. Lea had with your law clerk this morning, there is annexed hereto a self-explanatory telegram I have just received from Mr. Gray, a member of Messrs. Andrews, Kurth, Campbell & Jones of Houston, Texas.

The nine boxes of papers referred to by Mr. Gray are covered by rulings of the Special Master of March 22, 1962 that Toolco need not produce such documents. (Tillinghast Tr. pp. 3710-3715) To my knowledge those rulings were never altered or modified in any respect. However, should

the Court or Special Master so desire, I am prepared to arrange immediately for the shipment of those nine boxes to the Special Master so that he may satisfy himself as to the propriety and soundness of the March 22, 1962 rulings.

I respectfully renew my request for additional time so as to give me an opportunity to address myself in opposition to the ruling of the Special Master of January 22, 1963 which, in effect, would require Toolco to examine voluminous files which have already been examined, and from which full production has already been made pursuant to earlier orders, for the purpose of locating and producing additional documents, which I submit, have no bearing on any of the issues of the case to the extent that those issues are presently identified and, more particularly, in view of the pending motion to dismiss.

I and my staff have been working more than 16 hours a day 7 days a week since January 19, 1963 in an effort to prepare our papers on the motion to dismiss. In view of the number of unanticipated time-consuming matters which have arisen since that date with respect to this litigation, I respectfully request a reasonable extension of time for the submission to Your Honor of a brief in support of the motion to dismiss. In my opinion, I do not now have enough time within which to present an adequate analysis of the issues involved, particularly in the light of the statements made by Your Honor on the record, in conference, and in the January 19 order to the effect that you had a preconceived notion that the motion is premature, and that in your view it appears to be another attempt to postpone the deposition of Mr. Hughes. I understand that Your Honor wishes to consider the probable merit of said motion prior

to February 11. However, for reasons which I indicated on the record yesterday, I do not believe that the plaintiff and the additional defendants have any proper interest in insisting upon February 11 as the date on which the deposition of Mr. Hughes is to commence.

I would appreciate hearing from Your Honor with respect to the above.

Respectfully,

/s/ CHESTER C. DAVIS
Chester C. Davis

Re: *TWA* vs. *Hughes Tool Company, et al.*

J. Lee Rankin, Esq.
36 West 44th Street
New York 36, New York

Dear Mr. Rankin:

Referring to the order of Judge Metzner dated February 1, 1963 and our telephone conversation relating thereto, this is to confirm the following:

Friday evening, February 1, 1963, I requested Messrs. Andrews, Kurth, Campbell & Jones to forward to me immediately the nine boxes containing work papers which Toolco claims are not producible under your rulings and orders of the Court. The boxes have left Houston and as soon as I receive them, I will advise you promptly so that you may examine each document and rule thereon.

As I explained to you in our telephone conversation, Toolco is taking the action indicated above without prejudice to its position that at this time it may not be properly subjected to further discovery proceedings by plaintiff or the additional defendants. Rather than submit to fur-

ther discovery on the record to date, Toolco reserves the right, if it becomes necessary to do so, to elect not to defend on the merits.

It is, of course, the expectation of Toolco that the disposition of its pending motion to dismiss will obviate the necessity of pursuing the matter further. In addition, in connection with the claims being asserted by Toolco against the additional defendants, you are referred to the motion of the additional defendants, returnable February 18, for an order dismissing said claims with prejudice, and to the letter of Toolco to Judge Metzner dated February 1, 1963.

Sincerely,

/s/ CHESTER C. DAVIS
Chester C. Davis

February 5, 1963

Re: *TWA* v. *Howard R. Hughes, et al.*

Dear Mr. Davis:

Reference is made to the provisions of the order of Judge Metzner dated February 1, 1963 which required among other things the day-to-day production of documents which were the subject of that order. None has been supplied to date.

We hereby request that you produce to us no later than 5:00 P.M. tomorrow for inspection and copying the 1961 and 1962 tax returns and financial statements of the Hughes Tool Company which have been ordered produced as described in subparagraphs (v) and (w) of the Special Master's opinion dated January 22, 1963.

Very truly yours,

Chester C. Davis, Esq.

Toolco's Notice of Motion, February 6, 1963

[Doc. 170]

[CAPTION] 61 Civ. 2324

NOTICE OF MOTION

SIRS:

PLEASE TAKE NOTICE that upon the annexed "Complaint of Hughes Tool Company and Request for Investigation" which was filed with the Civil Aeronautics Board today and upon all proceedings herein, the undersigned will move before Honorable Charles M. Metzner, United States District Judge for the Southern District of New York, at such place as shall be fixed by him, on February 8, 1963, at 10:00 o'clock in the forenoon or at such other time as shall be fixed by the Court, for an order (1) that all further proceedings with respect to the counterclaims of Hughes Tool Company herein be stayed pending the entering of a final order by the Civil Aeronautics Board with respect to said "Complaint of Hughes Tool Company and Request for Investigation" and (2) for such other and further relief as to the Court may seem just and proper.

Dated: New York, N. Y.,
February 6, 1963.

Yours, etc.,

CHESTER C. DAVIS, Esq.
Attorney for Defendant
Hughes Tool Company
120 Broadway
New York 5, N. Y.

[To All Attorneys of Record]

Affidavit of Nazeeh S. Habashy, February 6, 1963

[3828]

[CAPTION]

STATE OF NEW YORK }
COUNTY OF NEW YORK } ss.:

NAZEEH S. HABASHY, being duly sworn, deposes and says:

1. I am a law clerk employed by Cahill, Gordon, Reindel & Ohl, counsel for Trans World Airlines, Inc. ("TWA"), who has been specially cleared to handle confidential documents in the above-mentioned action.

2. On Wednesday, February 6, at 4:45 PM, I went to the offices of Chester C. Davis, counsel for the Hughes Tool Company ("Toolco"), and requested the production for inspection and copying of the 1961 and 1962 tax returns and financial statements of Toolco which have been ordered produced as described in subparagraphs (v) and (w) of the Special Master's Opinion of January 22, 1963.

[3829] 3. Counsel for Toolco refused to comply with this request.

(Sworn to by Nazeeh S. Habashy on February 6, 1963.)

Pretrial Hearing, February 6, 1963

[CAPTION]

BEFORE:

HON. CHARLES M. METZNER
District Judge

[APPEARANCES:]

* * *

[24843] The Court: Before we commence arguing on motions, does anybody have a copy of the CAB order of December 29, 1960? That was not public, as far as I could find.

Mr. Davis: We could have it before the close of the argument.

The Court: Secondly, Mr. Sonnett, your brief, on page 40 you refer to intermediate orders of the CAB in this matter. Do you have copies of those?

Mr. Sonnett: I do not, your Honor, have them with me but I can get them readily, I think.

The Court: Would they indicate what the Board was asked to do aside from just a three or four-line alternate finding?

Mr. Sonnett: I can't answer that question until I have another look at that.

The Court: All right.

[24844] Mr. Davis, you may proceed.

Mr. Davis: May it please the Court, I would like to say preliminarily that I put my energies in the paper that

we prepared for submission to the Court and I am a little hoarse and hard of hearing today.

I would like, if I may, to reserve as much of the time that the Court would be inclined to allow me to reply to whatever argument counsel for TWA may present, because I believe that our position is adequately set forth in our memorandum and reply memorandum.

In that connection, your Honor, I am not personally aware of when that reply memorandum was in fact delivered to your Honor's chambers.

The Court: Before lunch.

Mr. Davis: May I assume that you are familiar with the contents of that memorandum?

The Court: It was read in detail. Luckily I did not have to hold court this afternoon because I had to review some 3500 material and grand jury minutes for the grand jury tomorrow morning. I spent all afternoon on your reply brief.

Mr. Davis: Then apart from answering [24845] whatever questions I may be able to answer, I can state my position very briefly.

I want to emphasize first of all that we are not bringing on the motion for summary judgment under Rule 56. We have withdrawn that motion for the reasons stated in our memorandum. I can expand those reasons, if they would be a matter of interest.

The Court: No, I don't think it is necessary. I disagree with the reason you give or the indication you are compelled to withdraw your motion.

Mr. Davis: Then I would like to emphasize that so far as the motion we are bringing on is concerned, we are relying solely on the allegations of the complaint; we are not going outside of it.

Pretrial Hearing, February 6, 1963

In the introductory statement of our memorandum in connection with the explanation I attempted to set forth reasons why we wanted to withdraw our motion for summary judgment. I did refer to the testimony of Mr. Tillinghast and other officers, and the comment of the special master with respect to that testimony but only for the purpose of explaining the [24846] posture that the Tool Company found itself in.

The Court: I think you have a problem we can overcome simply. I am going to decide this as a motion for judgment on the pleadings in so far as that particular claim of yours is concerned.

You are in a procedural dilemma. You are withdrawing the motion for summary judgment, and yet you have gone outside the face of the complaint, and necessarily so, because the face of the complaint does not mention the orders and exemptions which you rely on as your third affirmative defense. Consequently since you have answered and raised that issue by your third affirmative defense I will consider this as a motion for judgment on the pleadings to get over whatever procedural hurdle you would have in arriving at your first determination for the first grounds of dismissal.

Mr. Davis: May I state in that connection——

The Court: Under the Putnam case the complaint would withstand a motion to dismiss under 12(b)(6). We will get to the merits of your ground without being held up by any procedural problem.

[24847] Mr. Davis: May I merely state then that my position with respect to referring to the CAB orders, I did not refer to all of the many CAB orders which approve particular transactions between the Tool Company and

TWA because my position is that it is immaterial whether they were in fact in violation. If not, we were in violation of CAB orders; and if they were, we were not.

I refer to the orders issued by CAB under 408, because to my mind those are quasi-judicial decisions which under the law, as I understand it as reflected by the decision of the Supreme Court in Panagra, it is a matter which needs to be considered as a matter of law, the legal effect of those particular orders of the CAB.

Having made those observations, your Honor, I believe that I can only address myself to answering questions, answering the position taken by TWA. I can anticipate to some extent, I think, in my reply memorandum I have adequately made clear that there is no basis for the distinction between the conduct alleged in 1961 and that alleged prior to 1961, so far as the contention is that such conduct was in violation of the antitrust laws. I can [24848] expand on that, although my reply memorandum, it seems to me, adequately takes care of that contention.

I think I would just be taking up the Court's time unnecessarily if I repeated what I set forth in my memorandum, reply memorandum.

The Court: Mr. Sonnett.

Mr. Sonnett: TWA submits on the papers before your Honor, unless there is some question you have of me.

The Court: I have no question.

I received Mr. Davis' reply at noon last Friday. I received your brief at noon last Saturday, and I worked Friday night, Saturday, Sunday, Monday night and last night, and I called for this hearing on the chance that maybe Mr. Davis could persuade me that the conclusion I had reached on reading the briefs and studying them and

checking the law was wrong. Mr. Davis wants me to rely on his papers. Consequently I will deny the motion to dismiss the complaint. This is the order of the Court and a formal opinion will follow in the next day or two.

Mr. Davis: Your Honor, may I respectfully [24849] request then that in your opinion you certify the matter, 1292, so that I may obtain a discretionary review by the Court of Appeals?

The Court: The application is denied.

Mr. Davis: May I respectfully request your Honor to stay all further discovery proceedings by the plaintiff until I have had an opportunity to seek a discretionary review by the Court of Appeals?

The Court: Are you referring to the production of the documents under my pretrial order of January 19th or the tax papers covered by the orders of February 1st, or the deposition of Mr. Hughes, now scheduled for February 11th?

Mr. Davis: I was referring to all further pretrial proceedings, your Honor, because of the unquestioned burden and expense that the Tool Company will withstand if we are to continue to litigate with a view toward having a trial prior to our effort to obtain a review as to whether the determination made today on our motion to dismiss is not upheld.

It seems to me it is difficult, although I would be willing to cooperate if it would be helpful in any way, to separate how far to go and [24850] where to stop.

The desire of the Tool Company is to seek an early and expeditious disposition of this litigation, particularly since it is bearing 78 per cent of the cost of this prosecution. Therefore it would be extremely burdensome, assuming

that the Court of Appeals will review the basis for our motion to dismiss, upon the Tool Company to be incurring those very substantial expenses pending a review of that question by the Court of Appeals.

It seems to me, your Honor, that there is at least a very substantial question raised by the decision of the Supreme Court in the Panagra case as to whether or not this court should entertain jurisdiction of the questions raised by this complaint.

Granted that this decision in the Panagra case in some respects, as the dissenting opinion indicates, digressed from a prior determination of the Supreme Court and therefore to that extent may be regarded as a new and important question, but I find it difficult to conclude that the Court should not consider the fact that there is a very serious question involved, a question of law.

[34851] The Court: I will tell you what I will do. I will grant your application to the extent of staying all further discovery or deposition proceedings until 5 o'clock Friday. That will give you two days to make whatever application you wish to make to the Court of Appeals for a stay.

Mr. Davis: All right, your Honor.

The Court: Today is Wednesday, and you have tomorrow and Friday to draw your papers up and go to the Court of Appeals and ask for a stay. My stay will expire at 5 o'clock Friday, February 8th.

I have been bombarded with briefs, memoranda, motion papers and letters, and I have difficulty keeping abreast of them all. Let me see if I can find what I am looking for.

Mr. Davis: Is your Honor referring to this notice of motion that we made?

Pretrial Hearing, February 6, 1963

The Court: I am referring to a letter that you wrote to Judge Hall.

Mr. Davis: I wrote two. One was in response to a letter from Mr. Rankin to Judge Hall.

The Court: The earlier one you sent to Judge Hall without sending copies to the special [24852] master, who is counsel to the Court.

Mr. Davis: I received information that there had been communications with Judge Hall of which I did not receive a copy. I did not know what they were. The only information I received, I think, was at the time Mr. Sonnett filed with your Honor a memorandum indicating some representative had communicated with Judge Hall.

I never received a copy of any communication by anyone contacting Judge Hall until I received a copy of a letter by Mr. Rankin. Mr. Rankin has indicated that he would contact Judge Hall, and I was waiting for him to do so in order to address myself to that question. Then, as I recall it, I received a copy of a communication by Mr. Sonnett to your Honor indicating that someone in California had contacted Judge Hall and the United States marshal out there. That is what, as I recall, produced my first letter. Shortly thereafter, as I recall it, I received a copy of a letter from Mr. Rankin to Judge Hall and I addressed myself to that letter.

The Court: I can't find it offhand with all these papers that have come in in the last [24853] two weeks.

What I was looking for that letter for was an indication that you had made in that letter, as I recall it, that until the Court had ruled upon your motion to dismiss you saw no reason why arrangements should not be made—or why ar-

rangements should be made for the deposition of Mr. Hughes on February 11th.

In your letter of February 4th to the special master, a copy of which was furnished to me on February 5th by Mr. Hupper, of counsel to the insurance companies, the additional defendants in this case, you stated as follows:

> "As I explained to you in our telephone conversation, Toolco is taking the action indicated above without prejudice to its position that at this time it may not be properly subjected to further discovery proceedings by plaintiff or the additional defendants. Rather than submit to further discovery on the record to date Toolco reserves the right, if it becomes necessary to do so, to elect not to defend on the merits.
>
> "It is, of course, the expectation of Toolco [24854] that the disposition of its pending motion to dismiss will obviate the necessity of pursuing the matter further.
>
> "In addition, in connection with the claims being asserted by Toolco against the additional defendants, you are referred to the motion of the additional defendants, returnable February 18, for an order dismissing said claims with prejudice and to the letter of Toolco to Judge Metzner and dated February 1, 1963."

My reference to your letter to Judge Hall and to this communication is in the light of the ruling which I now have made regarding the sufficiency of a complaint and its validity against the attack you have made upon it.

I think, if I read the implications of your letter correctly, that if the Court's determination is final you would not proceed with the deposition in California on February 11th. If that is true, I think that it would be better for all people concerned, considering all the time and effort necessary to move the proceedings to Los Angeles, to indicate that as quickly as possible, so that arrangements which are now in progress are not carried forward at [24855] great expense to yourself, to the plaintiff, to the additional defendants, and the inconvenience to the court in Los Angeles which, as I understand it, is proceeding to make the necessary arrangements for this hearing to go forward on February 11th. This is a suggestion which I am making.

Mr. Davis: Your Honor, I am quite aware of that. I do intend and hope, perhaps tomorrow, that I will be in a position of advising all concerned, and particularly Mr. Rankin, to whom I have already pointed out the possibility, and I did expect that I would get some guidance as to what I will have to do next based upon today's ruling or observation that your Honor might make.

I will so advise the parties and try to work out an appropriate procedure so as to put the position of the Tool Company on the record.

Your Honor, I am wondering if it would be appropriate for me to make another suggestion or request, if I may.

In connection with the denial of our motion to dismiss and the time which I now have to apply to the Court of Appeals for whatever relief I can have, and more particularly in view of what I [24856] understand by your Honor's ruling denying the certification under 1292—I also understood that the reasons or the opinion of the Court in reaching that conclusion will not be available to me for

another day or two—I was wondering what I would have to present to the Court of Appeals as the basis of the Court's ruling on the one hand and my position on the other.

The Court: It is complicated. I must formalize my ruling and give you the reasons for it. But the two grounds which you are urging are fairly simple grounds.

I think you have set forth in your brief and in your reply brief—and I must say better in your reply brief than in your original brief—your position. I would assume that if you do not have a copy of my opinion by noon on Friday —and I will make every effort to see that you get it; I will have my secretary down tonight and tomororw night to get it out—even absent the formal reasons, the answer is I do not agree with you.

Mr. Davis: I know I can say that to the Court of Appeals, but in order——

The Court: I will make every effort to [24857] have it before you—it is not going to be too long and will probably run about 15 pages—but I think if you were to go to the Court of Appeals and, if it is necessary, say to them, "Judge Metzner disagreed with this position that I took on my briefs," it would suffice, because all I had before me were the briefs. I ruled upon the briefs and the complaint.

Mr. Davis: That is correct, your Honor. But obviously, and particularly in view of your ruling refusing certification of 1292, I was thinking that the Court of Appeals might like to know what the legal issue——

The Court: I think I flatly can say that I disagree with your interpretation of 408 and 414 as applicable to the specific orders involved here upon which you rely, the orders of 1944 and 1950. The scope of the order goes to the fact of acquisition, as I see it. It does not give you a license to engage in subsequent acts which may amount to restraint

of trade or attempts to monopolize, and I do not think the words in 414 are necessary to carry out what was authorized or approved by the Board encompassing such activity. That in [24858] brief is what the 15 pages are going to say.

Mr. Davis: Do I also understand that it is the conclusion of the Court that——

The Court: Let us leave it this way. You will have an opinion signed by 10 o'clock Friday morning.

Mr. Davis: Thank you, your Honor. I would prefer a stay for a couple of more days.

The Court: I can go on, but you may say what I said from the bench is not what I put in the opinion. I will go over the draft and polish it up.

Mr. Davis: I was really hoping for a little more time beyond Friday.

The Court: I am afraid not.

Mr. Hupper: Your Honor, if I may indulge the Court for a minute, my name is John Hupper and I appear here in the absence of Mr. Bromley, who unavoidably is out West today. I won't say exactly where.

I speak in connection with a paper that was served upon us around noon today involving an application for a stay of any further proceedings in this case on behalf of the additional defendants [24859] on the counterclaim by reason of a so-called complaint which has been filed today with the CAB. If I may say so, and I think I speak for all the additional defendants, our plans for California are well advanced. Many of our files are there and some of our people.

We believe it is very important to have a quick disposition of this application for a stay, which, as we view it, is simply another diversionary effort in some manner or other to avoid the deposition of Mr. Hughes.

Mr. Davis, in his notice, states that he is bringing on this motion on February 8th, or such other time as the Court may direct. We respectfully urge your Honor to hear Mr. Davis on this motion now so that we will know where we stand at the earliest possible moment.

The Court: I can listen to him. Does that mean I have to decide it too?

Mr. Hupper: We believe this motion to be just a——

The Court: I have read the complaint which Mr. Davis served upon you. He filed a copy with the Court. I read it this afternoon.

[24860] Would you say, Mr. Davis, in view of the determination of your motion on the complaint, that this motion which you served today, returnable at 4 o'clock Friday, need not be heard at 4 o'clock on Friday?

Mr. Davis: Need not be heard, your Honor?

Well, your Honor, it may very well be that the reasoning that the Court will give in its opinion will cover this also. However, based only upon what your Honor has indicated today, which, if I understand the remarks which obviously——

The Court: Which you are not going to hold against me.

Mr. Davis: Which I won't hold against anyone—indicate the views of the Court as to whether or not the orders obtained from the CAB covered the course of conduct alleged in the complaint.

We have, as your Honor is aware, a second independent ground on which we claim that this primary jurisdiction is in CAB based upon a Supreme Court decision in Panagra, and that is whether the CAB had the the power to approve.

To the extent to which your Honor, in [24861] denying my motion to dismiss, addressed himself also to that ques-

tion—and I recognize that inferentially, but I would like to have it for the record—you would be denying the basis upon which I claim that I would be precluded from pursuing the counterclaim in this court on the ground——

The Court: You wrote to me, as I recall, several days ago—and I think I have those papers right here; your letter of February 1st, that was last Friday—in which you gave me the impression that the reason you were going to move before the CAB and for a stay in this court with regard to the counterclaim was that, if the motion to dismiss had been granted, there would still be outstanding the counterclaims upon which the plaintiff and the additional defendants could proceed with depositions and, since you felt that those counterclaims dealt with the primary jurisdiction of the Board, if they were the only things left in the lawsuit at this time you were then going to move, with regard to the counterclaims, to remove them from the case and remove them as a possible basis for the deposition of Mr. Hughes on February 11th.

In view of the fact, however, that I [24862] have found that your motion to dismiss the complaint should be denied, I was wondering whether the reason for this last procedural step existed any longer.

Mr. Davis: It still exists to this extent. It is quite true that in my February 1st letter I was addressing myself to the situation which would exist if the complaint was dismissed and we had the counterclaims and what the basis of jurisdiction of the court was on the counterclaims absent the existence of the complaint.

Quite frankly I do not know the answer and I have not had an opportunity to research the question as to what is procedurally the question if you assume a complaint as being

validly before the Court and a counterclaim as to which primary jurisdiction rests in the Board.

Assume it is a compulsory counterclaim or not a compulsory one and then the question——

The Court: You think they are compulsory counterclaims, don't you?

Mr. Davis: Certainly some of them are.

The Court: Miss Lea argued that a year or so ago.

Mr. Davis: They are certainly com- [24863] pulsory permissive.

My problem, and the reason for the answer I am now giving you as to whether or not there is any question left, is that I believe there is a question left, although to be sure to the extent to which the Court is predicating denial of our motion to dismiss merely on the fact that 408 does not grant exemption of 414, that has nothing to do with the counterclaim because we do not claim that there were any 408 orders granting exemption of 414.

We do recognize, and our position has to be consistent, and is, we read the Panagra case, there is primary jurisdiction of CAB if the course of conduct alleged is one that the CAB could approve. Whether it did or not is besides the point. Whether it could approve under 408, that is the point.

Whatever the Court may do here, we are proceeding before the CAB for a determination by the CAB as to whether or not the course of conduct there involved—by "their involved" I mean the counterclaim—is something that they will find to be either in the public interest or not in the public interest.

Our view of the case, that is, the pre- [24864] requisite before we could recover anything in our counterclaim, if I

could rely on the ultimate conclusion of the Court that that is not so—and I have not even heard it today, but I assume your Honor will cover that aspect of the matter in your opinion—as I say, it may very well be that, as far as a need of argument or an extended argument or briefing on this question, it will be unnecessary in the light of whatever opinion the Court hands down in connection with the ruling made today, but so far as Toolco is concerned we most sincerely believe that the only proper interpretation is the Supreme Court direction in the Panagra case, because that was in fact the question before the court in the Panagra case, squarely before the court.

There was a situation where something had not been submitted to the CAB for approval. The CAB unquestionably had not issued any orders and the CAB had to act under 411, which was not involved in 414. Yet the Supreme Court dismissed the complaint because you must go to CAB first and let the CAB decide.

Presumably if the CAB—and I am talking about the Panagra situation now—were to [24865] decide that the manner in which Pan American and Grace were exercising control over Panagra was not in the public interest and they refused to bless it or sanction it or however it is done, then presumably whoever had an interest in the situation could resume litigation in the court on the basis of violation of the antitrust laws.

That, of course, was the second independent ground upon which we predicated our motion to dismiss. We were not relying exclusively on the existence of 408 orders.

The Court: Obviously.

Mr. Davis: To answer the suggestion of your Honor, we do—of course, if the complaint is to continue to be litigated, we are not asking to be stayed in our counterclaims,

and that is something I will have to think through between now and Friday.

As far as our pursuing our procedure before the CAB, we do not think we have any choice on that.

The Court: Well, I don't know what I can do about your motion. You have noticed it at least for Friday at 4 o'clock. I am in the [24866] ninth week of this criminal trial so I am tied up from 10 until 5 every day, except this afternoon, when we had this lucky break.

If you want your decision out on your motion to dismiss to show the Court of Appeals what I said, it is physically impossible to take this up.

Mr. Davis: I appreciate that.

May I suggest that the matter be left in abeyance, but tomorrow I will make an effort to also make a decision and take whatever action I am advised to take—either tomorrow or Friday—but I will advise the parties with respect to this Los Angeles date so that——

The Court: May I take your motion and hold it in abeyance and have argument on it?

Mr. Davis: Any time convenient to your Honor.

The Court: Mr. Hupper is not satisfied.

Mr. Hupper: Isn't it perfectly plain what Mr. Davis is trying to do here? He is going to have a decision some time Friday from the Court [24867] of Appeals on whether or not there is any merit to his attempt to get appellate review. At that point he will have something else which he can wave in front of you or some other court which he will use as a basis for arguing that the deposition of Hughes should not go ahead on Monday. There are still unresolved questions——

The Court: Will you agree, Mr. Hupper, if the Court of Appeals stays my determination, that you are not going to run out to Los Angeles Monday?

Mr. Hupper: I would not agree to that as a matter of law for this reason: The charges made against us in this CAB proceeding are quite entirely different than the charges made by the TWA people against the Tool Company completely. We have an additional question here which is a matter of discretion.

We have, for over a year or almost a year now, been engaged in this case, brought in by Toolco against our will, the Tool Company asserting claims of over $330 million against us and alleging that this court had jurisdiction over those counterclaims, and we have——

The Court: Mr. Davis said Panagra did [24867-A] not come down until——

Mr. Hupper: That is not applicable here at all. That involved Section 411.

The Court: I read it four times. Don't tell me that.

Mr. Hupper: It has not the slightest thing to do with this. We are not air carriers and we are not engaged in air transportation. It has nothing to do with this case. There is not a possible basis for it.

What Mr. Davis is doing here is using this motion as a basis after a year of dragging us down the garden path and making us spend hundreds of thousands as a last ditch attempt to stave off the deposition of Hughes.

We have a right to examine Mr. Hughes independently of whatever his position in that complaint is. As a matter of discretion we feel you ought to permit us to go forward on that examination if only for the fact that it would enable us perhaps to adduce facts which would be helpful to you in determining whether or not you have jurisdiction over the subject matter.

Pretrial Hearing, February 6, 1963

The Court: Mr. Davis, do you intend to [24868] pursue your counterclaims?

Mr. Davis: Not until we have a determination from the CAB.

The Court: In other words, you want to stay any proceedings regarding the counterclaims in this court until the CAB has spoken first?

Mr. Davis: That is our understanding of what the Supreme Court has held.

Of course, if I am told in some final manner that I am wrong in that regard, I want to be able to resume. That is our understanding of the Panagra case. It is a basis for our motion to dismiss. It will be the basis on which we will try to obtain a review at this time and therefore I don't understand why a defendant is so anxious to be prosecuted if I am willing to stay my claims against the additional defendants. So far as the facts in their petition, they are set forth in these proceedings before the CAB.

I fail to understand every time being accused of following some procedure for some improper motive. What is the motive of the additional defendants in feeling that they want to examine Mr. Hughes to defend themselves and I am permitted to [24869] keep their claim in abeyance until the CAB can make a ruling? Perhaps Mr. Hupper can explain it more clearly.

The Court: We will have to take Mr. Stewart first. This is his chance to be not the last man.

Mr. Stewart: Mr. Davis, as far as the additional defendant Dillon Read is concerned, for the first time in this case, after having been in it for a year, we have the opportunity presumably to prove that the counterclaims which are brought against us are absolutely baseless. It

is particularly compelling because this co-called complaint which Mr. Davis has brought before the CAB is absolutely meaningless as far as we are concerned.

Dillon Read is not an air carrier; it is not engaged in a phase of aeronautics, nor does he claim that we are so engaged. Nothing that the CAB says or does not say can affect us in any way.

We have no interlocking directorates and nobody in Dillon Read is on the board of Pan American or TWA or the Metropolitan or the Equitable. There is no possible way in which we can come into Section 411, which deals with unfair competition among air [24870] carriers. Nothing that the CAB decides in this complaint can affect us in any way.

For the first time in this litigation we have come close to being able to prove there is nothing to the charges in his counterclaim, and I suggest it is absurd for him to want to stay on the counterclaims he brought, bringing us into this action, at this particular juncture. I ask your Honor to deny it from the bench.

The Court: There are other problems in the CAB proceeding, are there not, Mr. Davis? You allege that Pan American World Airways and Mr. Juan Trippe were also co-conspirators during this whole time with the additional defendants named in your counterclaim.

Mr. Davis: There is no question, your Honor. Subsequent to the filing of our counterclaims I discovered additional facts which I am bringing to the attention of the CAB.

There is no question, however, that the course of conduct involved, which is a matter of concern, primary concern, to the CAB, is the same whether or not the addi-

tional defendants are limited or expanded by one more or less. The question [24871] basically is whether or not the CAB—for all I know, although I don't believe so, the CAB may approve this interlocking relationship between Metropolitan and Pan American. That is where we get into the question of where I am disagreeing with your conclusions.

It is clear to me, as the Supreme Court said, we are in a peculiar situation if on the one hand the Court were to entertain whether or not a course of conduct was or was not in violation of the antitrust laws and then the CAB should turn around and approve it and specifically grant exemption under 414, even though they never did it before.

The Court: Is the issue of whether any of the parties named in the complaint before the CAB are engaged in a phase of aeronautics a question for the CAB or for the Court under the counterclaim?

Mr. Davis: We allege and claim that they are engaged in a phase of aeronautics. The CAB has any number of decisions as to what they claim is a phase of aeronautics. I believe it is a question for the CAB to determine, subject to judicial review by the Court of Appeals.

There is no question; the Act uses a [24872] phrase "a phase of aeronautics," and there again we come to the question as to how we construe the Supreme Court direction or mandate which said the Act must be construed broadly and must be intended to empower the Board to correct the evils inherent in whatever it deals with.

There is no question but by 409, interlocking directorate relationship, and there is no question under 408, the Congress intended that agency to control and regulate the relationship between a person engaged in "a phase of aeronau-

tics" and an air carrier and transactions between them and what they do to each other.

You emasculate 408 if some independent such as the Court is going to define what a phase of aeronautics is or is not. There is no question of judicial review as to what the Board may determine. I don't have any question in my mind. I may be in the minority here today, but it is at least the primary jurisdiction, the expertise of the CAB, to determine in the first instance what they regard as a phase of aeronautics.

I know that throughout the years since the Act was passed a great many people have argued [24873] before the CAB that the kind of activities they were engaged in were not the manufacture of aircraft or parts of aircraft and therefore outside of the control of the CAB, and therefore they could do what they wanted to do, and CAB has rejected those arguments on a number of occasions and has developed CAB law as to what they claim constitutes a phase of aeronautics. That is unquestionably involved here.

Go back to reasons why I did what I have done and how things change. There is no question in my mind that the Panagra decision of the Supreme Court expanded what I was contending for prior to the Panagra decision.

If your Honor will recall I was accepting the decision of Judge Murphy in the Panagra case where he had excluded from the jurisdiction of the Court that area which had been covered by orders of the CAB, leaving to the CAB to interpret its own orders as to whether or not it did cover the conduct that was alleged.

The Court: He only went ahead, as I understand it, on the charge that Pan American had prevented Panagra from applying for additional routes [24874] from the Canal Zone to the United States.

Mr. Davis: That's correct. Before Judge Murphy the contention—there were two aspects of the claim. One was that one which was predicated upon an agreement between Grace and Pan American entered into before the Civil Aeronautics Act was adopted and therefore protected by the grandfather concept, and there were alleged violations of the antitrust laws by reason of the fact that control had been exercised over the air carrier in the use of ticket offices and some other things which were subject to orders of the CAB.

In our earlier brief back in August of 1961, I think it was, I was arguing that Judge Murphy had recognized the primary jurisdiction of CAB, leaving to the CAB the interpretation of its own orders as to what it was approving or not approving, because the CAB had acted in that area but assumed jurisdiction in the area they had not acted and at that time believed it could not act, namely, this exercise of control over Panagra and how the routes were being divided.

The Supreme Court came down and said that even in the area in which the CAB had not acted [24875] and in fact an area which the CAB did not believe it could act, nonetheless it said, "We are going to construe the Act so broadly as to infer a power in CAB to do something about this kind of exercise of control," dismissed the complaint, and this was a matter that CAB should act in.

That does not mean necessarily there has not been a violation of antitrust laws and after the CAB has acted and has found or failed to find it is in the public interest, thereafter if someone violated the antitrust laws they will be subject to whatever remedies the antitrust laws provide.

It is our view of the matter that until that determination is made for the reason given by the Supreme Court, it

would be odd indeed if a course of conduct which could be approved by CAB under 408 could run afoul of the antitrust laws.

So our position was not—that is what I meant in my opening remarks—I was not relying as a matter of fact on what CAB had or had not obtained but only on a recognition that the authority might be in the CAB to act on it. Tomorrow they may say that the way you exercised control over it was in the public interest and we approve [24876] it. That would preclude the enforcement of antitrust violations and therefore we believe that should be determined first.

The Supreme Court said that if you are claiming damages, there is no question the CAB cannot grant you relief for damages, in that footnote in the court decision referring to the Hewitt decision; that in that situation you ought to get a determination of the violation of the law with the possibility you have a remedy of the antitrust laws and go to the court and collect your damages.

The Court: Mr. Hupper, I am sorry, I am not in a physical condition to comply with your request. I am going upstairs now to get this opinion out. I am on trial all day tomorrow. I may have to work on the opinion again tomorrow night. I hope not.

Mr. Hupper: May I express my hope, your Honor, that the argument is not set down on the motion for a stay so as to interfere with our examination of Mr. Hughes starting Monday.

The reason I say that is that we believe very firmly that we have an independent right to examine him quite apart from what happens to Mr. [24877] Sonnett. We intend to vindicate——

The Court: What do you think of Mr. Davis' argument that I don't have jurisdiction on the counterclaim as opposed to the complaint?

Mr. Hupper: I am not sure I understand what his position is, but I do——

The Court: This is very simple. He is going to take you down to Washington.

Mr. Hupper: I think the very simple reference to these counterclaims will show you how completely different they are from the claims made in the complaint. The first counterclaim——

The Court: I know.

Mr. Hupper: The only reference that has anything to do with CAB is the second counterclaim. All the others are completely different. I want to join very wholeheartedly in what Mr. Stewart said about the time and expense that we have to go through in trying to get our first witness on the stand after we had to sit through the other deposition for a year. We want to proceed with this case and prove that there is absolutely no merit to these claims against us.

The Court: Well, all I have before [24878] me is a motion returnable on Friday for a stay of the discovery proceedings. I am telling you I can't hear you on Friday. It would be impossible. I will try some time tomorrow to read the complaint filed with the CAB with greater particularity than I remember it this afternoon and try to match them up.

Mr. Hupper: Do you suppose we could set it for the 18th, which is the return date for our motion to dismiss the counterclaim?

The Court: It is all right with me.

Mr. Hupper: That's all right with us.

The Court: The 18th? That is a Monday? Certainly. Does that dispose of it?

Mr. Hupper: I guess it does. I wish we could have heard and disposed of it right away. I know your problems.

The Court: I don't see how I could possibly do it.

Mr. Hupper: There is a minor thing. You did stay, as far as the TWA people were concerned, all further discovery production until 5 o'clock tomorrow.

The Court: I will put in the additional [24879] defendants too.

Mr. Hupper: The situation is different, Judge——

The Court: Let us not argue with the stay. It extends to all the additional defendants.

Mr. Hupper: Thank you.

Mr. Sonnett: Thirty seconds, your Honor, by way of a report. I don't want to get mixed up with this other question except to say the so-called derivative counterclaim, counterclaim 3, by no legerdemain of Mr. Davis or anybody else can possibly have anything to do with the CAB, and on behalf of TWA I have a very definite interest in that counterclaim. While Mr. Davis is deciding what he means when he says they may elect in effect to cop a plea, he better realize there are derivative counterclaims asserted by him, and for him to stand up and say "We default" is not going, in the judgment of TWA, to dispose of this case, if that is the way he thinks he can dispose of it; it won't meet the problem.

The other thing is a report. I would like to file with the Court an affidavit by one of [24880] my associates and serve a copy on Mr. Davis because this relates to the additional contempt committed and fully ripened prior to 5 o'clock today arising out of their failure to comply in any

respect with your order to make a day-to-day production of so-called tax documents.

Yesterday I wrote them and asked that they produce prior to 5 o'clock today, pursuant to your order, 1961 financial statements and tax returns, and the same for 1962, on the theory they could get those in five minutes. They have declined to do so. This affidavit is an affidavit that we asked for them at 5 today and they refused to do it.

The Court: All right. Thank you, gentlemen.

Affidavit of Bruce Bromley, February 15, 1963
[4871]

[CAPTION]

STATE OF NEW YORK, }
COUNTY OF NEW YORK, } ss.:

BRUCE BROMLEY, being duly sworn, deposes and says:

I am a member of the firm of Cravath, Swaine & Moore, attorneys for The Equitable Life Assurance Society of the United States, Metropolitan Life Insurance Company, James F. Oates, Jr. and Harry C. Hagerty, additional defendants on the first five counterclaims herein. I make this affidavit in support of a motion by said additional defendants pursuant to Rules 37(b)(2), 37(d), 41(b) and 41(c) for an order dismissing the first five counter- [4872] claims herein with prejudice as to them by reason of the repeated deliberate refusals of defendant Hughes Tool Company (Toolco) to make discovery in accordance with the Rules of Civil Procedure and lawful orders of this Court. This affidavit is also submitted in support of an application for immediate entry of judgment dismissing such counterclaims pursuant to Rule 54(b) and for an express determination that there is no just reason for delay of the entry of such judgment.

BASIS FOR THE MOTION SUMMARIZED

Toolco has repeatedly refused to produce two major categories of highly relevant documents and has also refused to produce its managing agent for examination before trial by the additional defendants. On January 23, 1963, Toolco refused to produce certain allegedly privileged

documents which it had been ordered to produce under Rule 34 on several occasions, most recently by an order of this Court dated January 19, 1963. On February 1, 1963, and on each day thereafter up to and including February 11, 1963, Toolco refused to produce certain so-called tax documents which it had been ordered to produce under Rule 34 by this Court on February 1, 1963. On February 8 and February 11, 1963, Toolco and Howard R. Hughes (Hughes), Toolco's managing agent, wilfully refused and failed to appear before the Special Master for examination before trial in accordance with several previous orders of this Court, the latest of which was dated January 19, 1963. Each of said refusals was intentionally made in direct contempt of a lawful order of this Court issued in accordance with the Rules of Civil [4873] Procedure and separately and together justifies dismissal with prejudice of the counterclaims herein.

The Tremendous Burden Imposed on the Additional Defendants by Toolco's Previous Prosecution of the Counterclaims

The counterclaims were filed and the action commenced as against the additional defendants on February 13, 1962. It thereupon became necessary for counsel immediately to begin day-by-day participation in the Toolco depositions already in progress, although we had not as yet had an opportunity to examine the facts sufficiently even to file a responsive pleading. Within days my clients were required to produce tens of thousands of pages of documents for production and copying by the Toolco attorneys. Within four weeks counsel for all parties were engaged in a full-scale discovery program which in the course of the next six

months produced for inspection and copying well over a million pages of documents. During the rest of the year 1962, with intermittent interruptions, the attorneys for Toolco enjoyed the exclusive right of conducting deposition discovery before the Special Master, in all of which counsel for the additional defendants were required to attend and participate. At the same time that those depositions were going forward it was necessary for us to copy, organize, analyze and summarize the tremendous quantity of documents which had been produced in discovery proceedings by all parties. It was also necessary to prepare for the cross-examination of various witnesses undergoing direct examination by the Tool Company and, during the last several months, to prepare for the examination of Toolco by Mr. Hughes. During the last few weeks before February 8 it was necessary for us to set up a special office in Los Angeles and to transfer to it over [4874] 800 binders of documents and other material. Those steps were necessary because Toolco's counsel refused to "function" on the matter of the Hughes deposition.

In this office alone the manpower requirements for the foregoing activities have involved the services of at least a dozen lawyers, several of them on a full time basis and for others a major portion of their time, as well as the hiring of a whole battery of file clerks and the like. To my personal knowledge such activities have involved direct expense to my clients for legal fees and disbursements of several hundred thousands of dollars through the end of last year—to say nothing of the obvious tremendous inconvenience and disruption of their regular business activities.

It is in this context of the case, after the Tool Company has enjoyed exclusive deposition discovery rights for a year at great inconvenience and expense to my clients, that its

peremptory and contemptuous refusal to afford us even preliminary discovery on obvious critical factual areas must be viewed.

This Court is familiar with the so-called "positions" of Toolco which have assertedly led to its refusal to comply with discovery orders. Such asserted "positions" of Toolco neither explain nor justify Toolco's contemptuous defiance in three major areas of the lawful orders of the Court, particularly in view of the record. Moreover, on the basis of our review of documentary and other information to date (more fully described in the affidavit of William C. Chanler), it is perfectly clear to me that the real reason for Toolco's refusal to make discovery is the certainty that such discovery would demonstrate that the counterclaims are merely a smokescreen designed to mask the reality of the depredations inflicted upon TWA for Toolco's own selfish purposes.

[4875] Toolco's Refusal to Produce the So-Called Privileged Documents

On February 14, 1962, the above-named additional defendants moved pursuant to Rule 34 of the Rules of Civil Procedure for an order requiring Toolco to produce for said additional defendants certain categories of documents for inspection and copying. (A copy of that motion is attached hereto as Appendix F and made a part hereof). The Special Master granted that motion on February 16, 1962 (Tr. 1482-1512 of 2/16/62). On March 15, 1962, Toolco produced certain of those documents in New York City, Houston, Texas and Los Angeles, California.

However, a number of documents admittedly called for by that Rule 34 motion and the Special Master's order

were withheld by Toolco under a claim that such documents were not subject to production because they were protected by the attorney-client privilege. Such documents were potentially of great significance to my clients' defense of the counterclaims because Toolco had for many years used its counsel as business agents and, indeed, the financing and voting trust agreements repeatedly referred to in the allegations of the counterclaims as having been forced upon Toolco as a result of my clients' alleged unlawful conduct were primarily negotiated on Toolco's behalf by its counsel. Accordingly, Toolco's claim of privilege was argued and briefed at great length before the Special Master. On April 17, 1962, the Special Master ruled that the privilege had been deliberately waived by Toolco through disclosure in several affidavits and in its pleadings and ordered such documents to be produced for the additional defendants (Tr. [4876] 4361-4391 of 4/17/62). That order of the Special Master was affirmed by this Court by order dated July 24, 1962. Thereafter, the same matter was reargued by Toolco before the Special Master on September 15, 1962. Again, the Special Master ordered the documents produced (Tr. 164-167 of 9/15/62). Again the Master's order was affirmed by the Court in its order dated January 10, 1963. In that order the Court directed that such documents be produced by 12 noon on January 14, 1963. At that time on January 14, we made specific demand on Toolco to produce those documents, but counsel for Toolco refused to make such production. It should be noted that the documents at the time of that demand were conveniently assembled in an envelope which counsel exhibited but refused to produce. (Attached hereto as Appendix A and made a part hereof is a transcript of the proceedings on January 14, 1963.)

Affidavit of Bruce Bromley, February 15, 1963

By the Court's order of January 19, 1963, Toolco was given until 12 noon on January 22, 1963 to produce the documents in question. At the Court's suggestion this date was by stipulation changed to 12 noon on January 23, 1963. Toolco attempted to obtain appellate review of the orders of January 10 and 19 and, particularly, sought a stay of that part of the orders requiring Toolco to produce the allegedly privileged documents pending such review. By stipulation we and other counsel consented to a stay of production until 5 P. M. on January 23, 1963, to enable Toolco to attempt to obtain a review and a further stay from the Court of Appeals for the Second Circuit. Such review was sought by way of notice of appeal under 28 U. S. C. § 1291 and by petition for a writ of mandamus. The appeal was dismissed on [4877] motion and the writ and stay were denied by the Court of Appeals on January 23, 1963. Accordingly, at 5 P. M. on January 23, 1963, we again demanded production of those documents and were again refused. (Attached hereto as Appendix B and made a part hereof is a copy of the transcript of the proceedings before the Special Master of January 23, 1963.)

Toolco's Refusal to Produce the So-Called Tax Documents

As a result of our study of the documents produced by Toolco on March 15, 1962, we were able to ascertain the probable existence of certain other documentary information primarily relating to Toolco's tax returns and financial statements which would, in our view, have established a complete defense to the allegations of the counterclaims. By notice of motion dated January 9, 1963, we moved for the production of such documents for inspection and copy-

ing. On January 22, 1963, the Special Master ordered Toolco to produce such documents. (The Special Master's opinion and order are annexed hereto as Appendix C and made a part hereof.) By order of February 1, 1963, this Court ordered Toolco to produce those documents on a day-to-day basis commencing on February 1, 1963, such production to be completed by February 11, 1963. As the affidavit of Donald I Strauber sworn to February 15, 1963 (attached hereto as Appendix D and made a part hereof) more fully shows, production of those documents in accordance with the Court's order was repeatedly demanded by letter and in person. Finally, on February 8, 1963, counsel for Toolco categorically refused to produce any of those documents and stated that he would not produce them [4878] (Tr. 58-9 of 2/8/63). Thus, those documents have also never been produced. Those documents also were readily available to counsel for Toolco. Indeed, I am informed that certain of the documents which Toolco was ordered to produce were exhibited to the Special Master on February 6, 1963.

Toolco's Refusal to Produce Its Managing Agent, Howard R. Hughes, for Examination

By notices dated February 14, 1962, the day after this action was commenced against the additional defendants, we noticed the deposition of Toolco by Hughes, its managing agent, for February 21, 1962. (Copies of those notices are annexed hereto as Appendix E and made a part hereof. See also Tr. 1099 *et seq.* of 2/14/62 and Tr. 1108 *et seq.* of 2/15/62 where service of such notices was acknowledged by counsel for Toolco.) The prompt examination of Hughes was critical to our defense against the

counterclaims, since not only was it Hughes' creature, Toolco, which had instigated the litigation against my clients, but it was the activities and eccentricities of Hughes which necessitated the financial and voting trust arrangements which were challenged by Toolco in its counterclaims.

Toolco has never challenged the right of the additional defendants to examine it through Hughes as managing agent, although it has consistently sought to postpone such examination to some undetermined future date.

On the strength of the chronological priority of the notices of February 14, 1962, the additional defendants moved for priority of discovery with respect to the allegations of the counterclaims. That motion was denied by the [4879] Special Master on February 16, 1962 (Tr. 1514-1515). The additional defendants appealed that ruling to this Court. By order of March 5, 1962, this Court granted the application of the additional defendants by modifying the deposition schedule in its previous order of February 7, 1962 (entered before institution of the counterclaims), to the following extent:

> "Defendant Hughes Tool Company may continue the depositions scheduled, limited, however, to evidence which bears on plaintiff's claims against Hughes Tool Company. Since a Special Master is presiding over the depositions on a day-to-day basis, he will see to the application of this limitation. Upon completion of this phase of defendant's depositions, the plaintiff shall proceed with its depositions in the order provided in the pretrial order of February 7, 1962. *The additional defendants may participate in such depositions conducted by plaintiff, in furtherance of their own deposition proceedings,*

> *or may separately schedule such depositions to follow upon the completion of plaintiff's depositions.* At the conclusion of the deposition proceedings by the additional defendants, the defendant Hughes Tool Company may then resume and complete its deposition proceedings." (Emphasis added.)

Thereafter, on September 6, 1962, Chester C. Davis, counsel for Toolco, accepted service of a subpoena duces tecum for Hughes as a witness on behalf of plaintiff, TWA, returnable on September 24, 1962, at the United States District Court House in Los Angeles, California. On September 15, 1962, the additional defendants joined in an application by TWA to the Special Master to suspend the then existing examination schedule so that the deposition of Hughes could be taken commencing on September 24, 1962 (Tr. 63-75 of 9/15/62). The Special Master denied that application. However, at that time the Master said in part:

> [4880] ". . . I am satisfied that there was authority for the service of the subpoena.
>
> "That the subpoena is binding upon Mr. Hughes, and as I construe the subpoena, it is binding upon Mr. Hughes to appear on September 24, 1962, or in the alternative, as fixed by the Court at any other time that the Court lawfully orders Mr. Hughes to appear in the courthouse at Los Angeles.
>
> "I feel that there is such a close connection between Mr. Hughes, as evidenced by some of the documents that I have seen, and the fact that he is the sole owner of the Hughes Tool Company, that the

Hughes Tool Company is responsible for Mr. Hughes with regard to this subpoena . . ." (Tr. 98.)

That order of the Special Master was appealed and on September 21, 1962, this Court issued an order affirming the Special Master and adjourning the date of the Hughes deposition to October 29, 1962. The Court went on to say:

"However, in connection with this denial the Special Master directed Chester C. Davis to write to Howard R. Hughes and inform him that the Special Master considered that the subpoena is binding upon Mr. Hughes and that he is subject to appear pursuant to that subpoena on September 24th, 1962 or at any other date fixed by the court. The Special Master stated for reasons set forth in the record that unless Howard R. Hughes communicated with him by today, Friday, September 21st, 1962 he would consider that Mr. Hughes has acquiesced in this interpretation and that if Mr. Hughes subsequently either attacked the validity of the subpoena on September 24th, 1962, or at any future time that the court might direct for the taking of the deposition of Mr. Hughes pursuant to that subpoena, he, the Special Master, would consider the imposition of sanctions upon the Tool Company, and that he would entertain a motion to strike the answer of the Tool Company and enter judgment against it.

"Without passing upon the power of the Special Master to grant the entry of such judgment, the court adopts the interpretation and conditions expressed by the Special Master. Any determination

by the Special Master on the application for a default judgment would, of course, be reviewable upon appeal to the court.

[4881] "On the hearing of this appeal the court inquired of Chester C. Davis as to whether he had followed the directions of the Special Master. Mr. Davis advised the court that he had written to Howard R. Hughes on Monday, September 17th, 1962, and enclosed the pages of the transcript of the hearing before the Special Master on September 15th, 1962 which contained the views of the Special Master. Howard R. Hughes has neither communicated with the Special Master nor the court as of 5:30 p.m. today, which is the end of the business day. Therefore, I find that Mr. Hughes has acquiesced in the interpretation and conditions expressed by the Special Master."

On February 8, 1963, counsel for Toolco stated with respect to the above rulings of the Special Master ". . . the Tool Company did not seek a review of those rulings of the special master by the Court and accepted in effect the responsibility placed upon it by that ruling." (Tr. 9 of 2/8/63).

On October 25, 1962, Toolco sought to adjourn the date for the examination of Hughes beyond October 29, 1962. We opposed that adjournment and asked that a firm date be set for our examination of Hughes (Tr. 48-50 of 10/25/62). The Special Master granted Toolco's application for adjournment, but set February 11, 1963, as a firm date for the Hughes examination (Tr. 53-63 of 10/25/62). At that time the Special Master fixed ten days from that

date as the time for any party to appeal from the order setting the Hughes deposition for February 11, 1963 (Tr. 72 of 10/25/62). Toolco did not appeal.

On December 11, 1962, Toolco brought on before the Special Master a motion to interpose the depositions of A. L. Wadsworth and Ben-Fleming Sessel before the deposition of Hughes. On December 28, 1962, the Special Master rejected that maneuver by Toolco, stating "I am now denying the [4882] application and motion of the Tool Company to depose Mr. Sessel and the Irving Trust Company by Mr. Sessel and Mr. Wadsworth and Dillon, Read & Company, Inc. at any time prior to taking of the deposition of Howard R. Hughes, which is to begin on February 11, 1963." (Tr. 11 of 12/28/62). At the same time the Master referred to his order of October 25, 1962, to clarify it so "that there may be no valid basis for misunderstanding it". (Tr. 8). Toolco then appealed the Master's decision to this Court.

In its order of January 10, 1963, this Court, among other things, affirmed the Master's ruling with respect to the Sessel and Wadsworth depositions and concluded (P. 3) that "the deposition of Howard R. Hughes by the plaintiff and the additional defendants should now go forward". Following the entry of that order, Toolco undertook a variety of stratagems transparently designed further to postpone the date for the Hughes examination, *e.g.*, Toolco's motion to dismiss the complaint; Toolco's "appeal" to the Second Circuit and its petition for a writ of mandamus; and Toolco's motion to stay prosecution of the counterclaims on the basis of its hurried commencement of a proceeding before the Civil Aeronautics Board in order, as this Court noted, "to see if what we claim is

wrong is really allright" (Tr. 27 of 2/8/63). All such diversionary efforts were unavailing. Finally, on February 8, 1963, counsel for Toolco, although accepting on behalf of Toolco the complete responsibility for producing Hughes in response to the notices of the additional defendants and the subpoena of TWA, refused to produce Hughes for either purpose (Tr. 1-63 of 2/8/63).

[4883] CONCLUSION

It is submitted that each separate refusal of Toolco to make discovery, in defiance of the orders of this Court, is independently more than sufficient justification for dismissal of the first five counterclaims with prejudice. It is also submitted that there is no just reason for delay in the entry of such a final judgment.

(Sworn to by Bruce Bromley on February 15, 1963.)

Affidavit of William C. Chanler, February 15, 1963

[4955]

[CAPTION]

STATE OF NEW YORK, }
COUNTY OF NEW YORK, } ss.:

WILLIAM C. CHANLER, being duly sworn, deposes and says:

I am a member of the firm of Winthrop, Stimson, Putnam & Roberts, attorneys for additional defendants Irving Trust Company and Ben-Fleming Sessel in the above-entitled case. I make this affidavit in support of the motion of said additional defendants pursuant to Rules 37(b)(2), 37(d), 41(b) and 41(c) of the Federal Rules of Civil Procedure, for an order dismissing with prejudice the counterclaims asserted against them herein by defendant Hughes Tool Company (Toolco), on the ground of Toolco's willful failure [4956] and refusal to comply with orders of this Court pertaining to discovery proceedings herein. I also make this affidavit in support of an application for the immediate entry of a final judgment of dismissal of the counterclaims, pursuant to Rule 54(b) of the Federal Rules of Civil Procedure.

I have read the affidavit of Bruce Bromley which is submitted in support of the motion of the additional defendants, and I adopt the statements therein contained with respect to the procedural history of Toolco's defiance of discovery orders of this Court. I would also note that my clients have also incurred huge expenditures in defense of this lawsuit from the time they were brought in as additional defendants in February of 1962.

Affidavit of William C. Chanler, February 15, 1963

It is appropriate for me to observe that a notice to take the deposition of Toolco by Howard R. Hughes, its Managing Agent, was served and filed on behalf of my clients on or about February 23, 1962. A copy of this notice is annexed hereto as Exhibit A and made a part hereof. A motion for the production of documents by Toolco pursuant to Rule 34 of the Federal Rules of Civil Procedure was served and filed on behalf of my clients on or about February 26, 1962, and was granted by the Special Master on March 6, 1962 (Tr. 2760). Finally, my clients joined in the motion for the production by Toolco of the "tax" documents pursuant to Rule 34 (see Tr. of January 17, 1963, p. 24).

Thus, it is clear that Toolco's failure to proceed with the deposition of Hughes, its failure and refusal to produce documents pursuant to Rule 34 which were held not to be protected by the attorney-client privilege, and its failure and refusal to produce the "tax" documents, were in [4957] violation of the right to discovery afforded to my clients by the orders of this Court. Toolco's wilful and deliberate default in making discovery to my clients fully warrants the dismissal with prejudice of the counterclaims asserted against them.

Toolco has attempted to justify these defaults by an alleged eleventh hour discovery (after over a year of expensive and burdensome litigation) that its counterclaims should have been referred to the CAB at the outset, and by its assertion that the expense of further litigation will exceed the amount of damages recoverable from Toolco by plaintiff. It is quite apparent from evidence now in the possession of the additional defendants that these contentions are frivolous and sham, and are advanced in a patent attempt to conceal the true reason why Toolco has refused

to proceed. That reason is that the documents and testimony which Toolco has refused to produce in accordance with this Court's orders would conclusively establish that the delays in obtaining financing and necessary flight equipment, which Toolco's counterclaims allege caused damage to TWA in an amount exceeding $45,000,000, were the direct result of a deliberate and carefully planned scheme by Toolco and Hughes to reap millions of dollars in profits and tax savings at the expense of TWA, and were not caused by the additional defendants as alleged in the counterclaims (See, e.g., opinion and order of Special [4958] Master dated January 22, 1963 attached as Appendix C to the affidavit of Bruce Bromley).

(Sworn to by William C. Chanler on February 15, 1963.)

IN THE UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK
61 CIV. 2324

TRANS WORLD AIRLINES, INC., Plaintiff,

—against—

HOWARD R. HUGHES, HUGHES TOOL COMPANY and RAYMOND M. HOLLIDAY, Defendants,

—and—

THE EQUITABLE LIFE ASSURANCE SOCIETY OF THE UNITED STATES, METROPOLITAN LIFE INSURANCE COMPANY, IRVING TRUST COMPANY, ERNEST R. BREECH, DILLON, READ & CO. INC., BEN-FLEMING SESSEL, JAMES F. OATES, JR., HARRY C. HAGERTY and CHARLES C. TILLINGHAST, JR., Additional Defendants on Counterclaims.

ORDER TO SHOW CAUSE—February 16, 1963

On the pleadings, the pre-trial orders of this Court entered herein, the annexed affidavit of John F. Sonnett dated February 15, 1963, and on all the other proceedings heretofore had and papers heretofore filed herein, and good and sufficient reasons appearing therefor, it is

Order to Show Cause, February 16, 1963 and Affidavit of John Sonnett, February 15, 1963

Ordered that defendants Hughes Tool Company and Raymond M. Holliday show cause before this Court at 5 P.M. o'clock on February 21, 1963, in Room 1305 of the United States Court House, Foley Square, New York, New York, or as soon thereafter as counsel can be heard, why an order should not be issued herein;

[fol. 4971] A. Providing that the complaint be amended by striking the third numbered paragraph of Section I of the prayer which follows paragraph 70 of the complaint and substituting therefor a new numbered paragraph 3 reading as follows:

"That the defendants pay to plaintiff $135,000,000, or such other sum as shall be three times the damages sustained by plaintiff, together with costs and attorneys' fees;",

and further providing that the answer of defendant Hughes Tool Company, served and filed February 13, 1962, and the answer of defendant Raymond M. Holliday, served and filed March 26, 1962, shall each be deemed to relate to the complaint as so amended; and

B. Severing from these proceedings, from and after the date of such order, the claims herein made by plaintiff TWA against defendant Raymond M. Holliday; and

It Is Further Ordered that defendant Hughes Tool Company show cause before this Court at the same time and place why an order should not be issued herein:

C. Entering, pursuant to Rules 37(b), 37(d) and 55(b)(2) of the Federal Rules of Civil Procedure, a judgment by default against defendant Hughes Tool Company in favor of plaintiff on its complaint;

D. Adjudging and decreeing that defendant Hughes [fol. 4972] Tool Company, by the conduct alleged in the complaint, has violated Sections 1 and 2 of the Sherman Act, Section 7 of the Clayton Act, and, with respect to the First Claim for relief only, Section 3 of

the Clayton Act and, with respect to the Third Claim for Relief, has maliciously and wilfully injured the business of plaintiff, and that Hughes Tool Company thereby has caused the injuries to plaintiff alleged in the complaint;

E. Adjudging and decreeing that defendant Hughes Tool Company shall divest itself of all right, title or interest in the stock of plaintiff;

F. Directing that defendant Hughes Tool Company present to this Court within 30 days from the date of such order, for the consideration of this Court in framing the final decree and judgment to be entered herein, a plan providing for divestiture by sale to the public through a bona fide public offering, within a period ending no later than one year from the date of such order, of all right, title or interest of defendant Hughes Tool Company in or relating to the stock of plaintiff, and providing that thereafter plaintiff shall have 30 days within which to submit to this Court, if it shall be so advised, proposed amendments or modifications to such plan or a proposed alternative plan; and enjoining, until such time that this Court shall have found that the divestiture by Hughes Tool Company of all its right, title or interest in or relating to the [fol. 4973] stock of TWA shall have been fully effectuated in accordance with a plan approved by this Court, defendant Hughes Tool Company, its directors, officers and employees, and all persons in active concert or participation with them who receive actual notice of such injunction, from interfering with, attacking or otherwise impairing or attempting to impair the existence, operation or validity of the voting trust established by execution of an agreement entered into by defendant Hughes Tool Company, the plaintiff, and three voting trustees, and dated as of December 15, 1960; and

G. Setting an early date for a hearing to be held before this Court solely for the determination of the amount of the damages to be paid by defendant Hughes

Order to Show Cause, February 16, 1963 and Affidavit of John Sonnett, February 15, 1963

Tool Company to plaintiff by reason of the injuries alleged in the complaint to have been caused by Hughes Tool Company, together with the plaintiff's costs of suit and attorneys' fees; and

It Is Further Ordered that defendant Hughes Tool Company show cause before this Court at the same time and place why an order should not be issued herein:

H. Dismissing as against plaintiff TWA, with prejudice, pursuant to Rules 37(b), 37(d), 41(b) and 41(c) of the Federal Rules of Civil Procedure, each and every counterclaim asserted in the answer and [fol. 4974] counterclaims of defendant Hughes Tool Company served and filed February 13, 1962; and

I. Enjoining defendant Hughes Tool Company, its directors, officers and employees, and all persons in active concert or participation with them who receive actual notice of such injunction, from instituting or threatening to institute or causing to be instituted in any court in any jurisdiction within the United States any suit in which plaintiff, its directors, officers or employees, or any of them is a party and which contains or is based upon the allegations which are contained in said counterclaims of defendant Hughes Tool Company and from instituting or threatening to institute or causing to be instituted in any administrative or other agency within the United States any proceeding in which plaintiff, its directors, officers or employees, or any of them is a party and which is based upon such allegations; and

It Is Further Ordered that service of this order to show cause, together with a copy of the affidavit in support of this order, on Chester C. Davis, Esq., attorney for defendant Hughes Tool Company, on or before the 18th day of February, 1963, at 10 A. M. shall be deemed due and timely service.

Charles M. Meltzner, U.S.D.J.

Dated: New York, N. Y., February 16th, 1963.

Order to Show Cause, February 16, 1963 and Affidavit of John Sonnett, February 15, 1963

ATTACHMENT TO ORDER

UNITED STATES DISTRICT COURT

SOUTHERN DISTRICT OF NEW YORK

61 CIV. 2324

TRANS WORLD AIRLINES, INC., Plaintiff,

—against—

HOWARD R. HUGHES, HUGHES TOOL COMPANY and RAYMOND M. HOLLIDAY, Defendants,

—and—

THE EQUITABLE LIFE ASSURANCE SOCIETY OF THE UNITED STATES, METROPOLITAN LIFE INSURANCE COMPANY, IRVING TRUST COMPANY, ERNEST R. BREECH, DILLON, READ & CO. INC., BEN-FLEMING SESSEL, JAMES F. OATES, JR., HARRY C. HAGERTY and CHARLES C. TILLINGHAST, JR., Additional Defendants on Counterclaims.

AFFIDAVIT

State of New York,
County of New York, ss.:

John F. Sonnett, being duly sworn, deposes and says:

1. I am a member of the firm of Cahill, Gordon, Reindel & Ohl, attorneys for the plaintiff Trans World Airlines, Inc. ("TWA"), and am familiar with the prior proceedings had herein. This affidavit is submitted in support of plaintiff's application for an order to show cause seeking the issuance herein of certain orders set forth in such application and more fully described below. This motion is brought on by an order to show cause because of the paramount importance of an early determination of the rights of TWA in the present posture of this litigation.

[fol. 4976]

2. An order is requested amending the complaint herein with respect to the First Claim for Relief to pray for

judgment of $135,000,000 or such other amount as shall [redacted] threefold the damages suffered by TWA (instead of $105,000,000). (Paragraph A, Order to Show Cause.) As is stated in paragraph 54 of the complaint as filed, the figure of $35,000,000 was plaintiff's then first estimate of the minimum amount in which TWA had been damaged by defendants' wrongful acts. Subsequently defendant Hughes Tool Company ("Toolco") in its verified answer and counterclaims filed February 13, 1962 has estimated (paragraph 99) that TWA was damaged in excess of $45,000,000, the factors of damage listed (paragraph 98) [redacted]ng the same as the primary factors of damage listed in the complaint. Defendant Toolco, together with defendants Hughes and Holliday, was in control of TWA throughout most of the period when the damage was being suffered.

3. As I stated to the Court on February 8, 1963, our investigations have led us to the conclusion that the damages suffered by reason of the injury to TWA alleged in the First Claim for Relief in fact exceed $45,000,000. After trebling of this amount and addition of the more than $10,000,000 in damages prayed for in the Third Claim for Relief, TWA's total prayer for damages exceeds $145,000,000.

4. Since the filing of the complaint, the leading engineering firm of Coverdale & Colpitts has been retained to make a study to determine TWA's loss of net operating profits resulting (a) from delay in the delivery of 20 Convair 880 jet aircraft which TWA eventually got (Complaint, para- [fol. 4977] graphs 17 and 19), (b) from the diversion of 6 Convair 880's to Northeast Airlines (Complaint, paragraph 22), and (c) from the diversion of 6 Boeing 707's to Pan American World Airways (Complaint, paragraph 18). After months of intensive effort, Coverdale & Colpitts has completed its study of this matter and has advised that, in its opinion, the loss to TWA of net operating profits through delay in the delivery of the 20 Convair 880's was approximately $14,700,000; from the diversion of 6 Convair 880's to Northeast Airlines, approximately $9,000,000; and from the diversion of the 6 Boeing 707's to Pan American, approximately $20,000,000, or a total of $43,700,000.

Order to Show Cause, February 16, 1963 and Affidavit of John Sonnett, February 15, 1963

5. Other damages suffered by TWA through defendants' acts alleged in the First Claim for Relief are still under study, including particularly the increased costs to TWA of borrowing in 1960, due (a) to the general increase in the cost of money, and (b) to the change in TWA's financial condition which made it an inferior financial risk in 1960 from the standpoint of a lender. It is believed that such damage and the other factors of damage referred to in the First Claim for Relief of the complaint will increase the amount of TWA's loss when finally ascertained to substantially in excess of $45,000,000.

6. No rights or interests of defendants will be infringed by the requested amendment of the prayer for relief since the denials contained in the answers of both defendants who are now parties can be deemed to apply to the complaint as amended in accordance with this request.

[fol. 4978] 7. An order directing the severance from this cause of TWA's claim against defendant Holliday is requested (Paragraph B, Order to Show Cause), because it appears that Holliday has not yet chosen the course of deliberate, intentional and wilful default. On the other hand, plaintiff is entitled to maintain its claims against Holliday, and to the benefit of the prior proceedings herein insofar as they relate to those claims, at least until its claims against Toolco have been finally disposed of and the judgment thereon in favor of TWA has been satisfied. A severance is the simplest means of preserving the rights and present positions of the parties.

8. The next category of orders requested by plaintiff relates to entry of a default judgment in TWA's favor against Toolco for the relief requested in the complaint (Paragraphs C-G, Order to Show Cause).

9. The Court is fully familiar with the record of wilful, deliberate and intentional refusal on the part of Toolco to comply with the Court's orders, culminating in its direct and express refusal, first through a "Notice of Position" served and filed February 8, 1963, and thereafter on the record in open court at a hearing before this Court held the same day:

(a) to produce documents ordered to be produced by this Court's order of January 10, 1963, reaffirmed in this Court's order of January 19, 1963, an appeal from which orders was dismissed by the Court of Appeals for this Circuit on January 23, 1963, and as to which all stays have long expired, (b) to produce documents ordered to be produced by this [fol. 4979] Court's order of February 1, 1963, as to which all stays have expired, (c) to submit to any further discovery whatsoever in this action on behalf of plaintiff TWA, and (d) to produce a witness for examination before trial pursuant to the order of this Court, Toolco having expressly and with full knowledge of the consequences accepted the duty and obligation to produce such witness, and neither inability to produce such witness nor any other legal excuse for such refusal being presented.

10. As the record stands, there can be no question but that on the consent of Hughes Tool Company, and based on this series of deliberate defaults, plaintiff is entitled to apply to this Court for a judgment in its favor for the relief sought in the complaint. (See Transcript of Hearing, February 8, 1963, pp. 62-63.) Defendant Toolco now stands charged by the complaint with violations of the antitrust laws and (in the Third Claim for Relief) with intentional tortious interference with TWA's business relations. It has deliberately placed itself in the position, by refusing to defend against those charges, of admitting their accuracy.

11. The legal theory upon which plaintiff here proceeds is well established and indeed long predates the adoption of the Federal Rules of Civil Procedure in which it is now clearly embodied. It rests upon the "presumption that the refusal to produce evidence material to the administration of due process [is] but an admission of the want of merit in the asserted defense." *Hammond Packing Co.* v. *Arkansas*, 212 U.S. 322, 351 (1909).

[fol. 4980] 12. By thus wilfully and deliberately refusing to comply with the orders of this Court, Toolco must, it is respectfully submitted, be presumed to have admitted the want of merit in any defense it might assert to the complaint. It has intentionally and with due reflection elected

to default rather than let the truth come out. By so electing, Toolco has irrevocably abandoned any right to contest hereafter any allegation of the complaint, except as to the exact amount of money which it is to pay over to TWA for the injury it has admittedly caused TWA, and has abandoned as well any and all alleged defenses.

13. On previous motions in this cause, and particularly in connection with Toolco's motion to dismiss the complaint which this Court denied on February 6, 1963 (the opinion on which was filed February 7, 1963), we presented to this Court not only evidence of the legal merits of TWA's charges against the defendants, but evidence that the conduct of defendants was so deliberately and intentionally wrongful to TWA that, it is respectfully submitted, the wrong cannot be remedied without granting plaintiff both the divestiture and the injunctions which it seeks. The Court is respectfully referred to my previous affidavit dated February 1, 1963 and to the exhibits (A through D) filed in connection therewith, all of which are incorporated herein as if fully set forth in this affidavit, for evidence both of the wilful character of these wrongs and of the blatant nature of the violations of Sections 1 and 2 of the Sherman Act and of Section 7 of the Clayton Act charged in the complaint. The Supreme Court has held that divestiture is the specific and [fol. 4981] most appropriate remedy for such violations. *United States* v. *E.I. DuPont de Nemours & Co.*, 366 U.S. 316 (1961). It is submitted that, on the now indisputable violations of the antitrust laws set forth in the complaint, under the *DuPont* decision divestiture is not only appropriate but required.

14. Beyond this, even on the basis of the limited documentary discovery which TWA has had since it filed its complaint, the record herein contains compelling evidence of the need for divestiture. To cite but a few examples, Hughes, in November 1960, told an important Convair figure [Crown] that in return for financial support in staving off the Dillon, Read financing plan, Hughes would have TWA meet its future aircraft needs by purchases from Convair (Exhibit A19 to my affidavit of February 1, 1963).

Order to Show Cause, February 16, 1963 and Affidavit of John Sonnett, February 15, 1963

In February 1961 (after the voting trust had gone into effect) Hughes was questioned by Holliday and Convair about his intentions with respect to 13 Convair 990 aircraft then on order by Toolco (7 of which had been ordered after the voting trust took effect); Hughes said "It is not up to Convair to decide whether TWA will accept the so-called 97% of the airplanes. This has never been a matter for discussion. However I obtain TWA acceptance to this is my own problem; most likely HTCo will control TWA when that matter comes up" (Exhibit A35). The defendants' efforts to force these aircraft upon TWA are reflected in the report of a conference between Toolco's counsel and Dillon, Read in May 1961: "[Davis] said that we should know that his client had every intention of doing everything he could to 'bust up the Boeing deal'" (Exhibit A45). Similarly, it is patent from the other documents which make [fol. 4982] up Exhibit A that the defendants habitually exercised the unbridled power to determine when, if ever, how many, how, what and from whom aircraft were to be acquired by TWA. The Leslie "Appreciation" and Bew affidavit (Exhibits B and C to my affidavit of February 1, 1963) provide further evidence of how Toolco and the other defendants dealt with TWA and why divestiture is absolutely necessary herein.

15. Merely ordering that Toolco divest itself of all right, title or interest in TWA's stock by a sale to the public within one year is not, as experience has unfortunately and clearly demonstrated, the complete answer. Pending permanent removal of this incubus from this great airline, TWA must be free to act without those restraints and that interference which has heretofore characterized the conduct toward TWA of Toolco and those acting in concert with it. For this reason, it is submitted that Toolco must, during the interim period before divestiture is finally effectuated, be enjoined from interfering with, attacking or otherwise impairing or attempting to impair the existence, operation and validity of the voting trust which was agreed to by Toolco and which was intended to free, but has not fully freed, TWA from the vicious influence exerted by the defendants over its affairs (Paragraph F, Order to Show

Cause). Such relief would appear to be the minimum required to assure cessation by Toolco and those acting in concert with it of the wrongful acts of which they now have admitted guilt.

[fol. 4983] 16. TWA requests that a date be now fixed for the hearing on its damages before this Court (Paragraph G, Order to Show Cause). Plaintiff will be obligated to present evidence as to several different types of damage which will require it to arrange for a number of witnesses, including expert witnesses. Our present estimate is that the hearing for calculation of TWA's damages, costs and counsel fees should require no more than ten trial days, assuming reasonable cross examination of plaintiff's witnesses. The schedule to be followed in preparing for this hearing should be fixed at this time, and it is respectfully submitted that TWA's financial needs and the importance to it of securing the redress to which it is entitled are such that the date fixed should be as early as is practicable, in view of the Court's schedule, and, if possible, about one month from now.

17. The final category of orders requested by TWA relates to dismissal, with prejudice, of Toolco's counterclaims against TWA and certain injunctive relief in connection therewith (Paragraphs H and I, Order to Show Cause).

18. It is respectfully submitted that the sweeping refusal of Toolco to comply with previous discovery orders and to participate in any respect in further discovery proceedings in this litigation makes dismissal with prejudice of the counterclaims, as Rules 37(b), 37(d), 41(b) and 41(c) contemplate, the apropriate relief for TWA. The requested injunction against Toolco's raising again in some other jurisdiction or before some administrative agency the same alle-
[fol. 4984] gations which it here was unwilling to pursue (when the price of such pursuit was to let the facts be known) is closely related to TWA's other needs for injunctive relief (see *e.g.*, Paragraph G, Order to Show Cause). The propensity of Toolco and those acting in concert with it to turn to numerous forums within which to harass TWA and interfere in its affairs is clearly evident from the alle-

gations of the complaint which Toolco can no longer contest. It is a propensity which, it is respectfully submitted, this Court should now curb.

19. No previous application has been made for the relief sought herein.

WHEREFORE, I respectfully request that plaintiff TWA's application be granted and an order issued in the form annexed.

John F. Sonnett

Sworn to before me this 15th day of February, 1963.

THOMAS J. CERNA
Notary Public

Thomas J. Cerna, Notary Public, State of New York, No. 41-0607760, Qualified in Queens County, Certificate filed in New York County, Term Expires March 30, 1963.

Pretrial Hearing, February 21, 1963

[24946]

[CAPTION]

Before:

HON. CHARLES M. METZNER,
District Judge.

[APPEARANCES:]

* * *

[24948] The Court: Mr. Barr, I assume that this letter which you gave to the clerk a few minutes ago, with the attachment to it, is in relation to the motion by the additional defendants.

Mr. Barr: It is, your Honor. It merely refers to the documents, and they are not in the courtroom at the moment but they are outside.

The Court: That would be enough to scare anybody.

Mr. Davis: May I ask if that was a letter as to which the Tool Company should be aware?

The Court: A copy of this letter and index will be furnished to each counsel, it says.

Mr. Barr: That is right, your Honor. That is a list of the documents that have been on file before the special master, and I assume Mr. Davis has copies of all of them.

The Court: Have you given this to Mr. Davis?

Mr. Barr: We will, sir.

The Court: Do you want to give it to him now?

Mr. Barr: Yes, your Honor (handing to [24949] Mr. Davis).

The Court: The first think I want to dispose of is a notice of motion that was filed by the additional defendants

on January 25, 1963, returnable February 18, 1963, to dismiss with prejudice the counterclaims by the Hughes Tool Company on the ground that the Tool Company deliberately refused to comply with the order of the Court.

I assume that motion is withdrawn, and will be so marked by the Court, in view of the fact that you have embraced that as a ground of the motion returnable today to dismiss the counterclaims.

Mr. Bromley: That is right, your Honor.

The Court: I should also inform you, although you know it already, that the motion that was brought on by the Tool Company to stay the proceedings regarding the counterclaims pending an action by the CAB was denied at the time of the hearing on February 8th. That appears on page 56 of the transcript, and I have so endorsed those motion papers.

We then have a motion by the Hughes Tool Company which was filed with the Court on February 13th, at a quarter to 5, along with a notice of [24950] amendment to that notice of motion, which was filed with the Court this afternoon at 4 o'clock, which requests reargument of the Court's order and decision of February 6th and 7th, and also requests that an order be entered referring to the CAB certain questions set forth in that notice of motion, and also requests an order admitting as part of the record copies of various CAB orders in related proceedings under Section 408 of the Federal Aviation Act.

The notice of amendment of that notice of motion, which was received by the Court at 4 o'clock, requests the Court to stay all proceedings on the complaint as are directed to claims seeking an award of damages pending a final determination by the CAB as to whether the conduct of Toolco relating to equipment acquisitions and financing

of TWA was authorized, approved or required by any order of the CAB or whether such conduct was not inconsistent with the public interest and, secondly, pending a final determination by the CAB with respect to the complaint of Hughes Tool Company and request for investigation, which was filed by the Hughes Tool Company with the CAB on February 6th relating to the counterclaim.

[24951] The application for reargument is denied. The affidavit of Mr. Davis, sworn to on February 13, 1963, is not to be considered as part of this record.

Rule 9(m) of the General Rules of the Southern District requires that on a motion for reargument counsel submit to the court a memorandum setting forth wherein it feels the court erred. Such a memorandum was not submitted to the Court; and, secondly, the Court will not consider affidavits on application for reargument.

The application for an order referring certain questions to the CAB is also denied.

The application for an order admitting as part of this record certain orders of the CAB is also denied. The material that is sought to be admitted was not before the Court on the submission of the original motion and therefore will not be considered as part of that motion.

This refers to two orders of the CAB, those of '44 and 1950, known as 6 CAB 153 and 12 CAB 192. Those orders and the order of the CAB dated December 2, 1960, which is known as order No. E-161195, were considered by the Court and will be considered as part of the record.

[24952] In so far as the notice to amend the notice of motion, which I am now discussing, that motion is also denied. The Court will not stay any further proceedings in this action.

We come therefore to the motion by the plaintiff, TWA.

Mr. Davis: If your Honor please, before proceeding further, may I ask if your Honor would indicate on the record whether or not the affidavit which was annexed to the motion of February 13th, that is, my affidavit dated February 13th, I believe——

The Court: It is.

Mr. Davis: —may be part of the record. It was intended to be, in part at least, in support of the application for a stay.

The Court: Application for a stay of what?

Mr. Davis: The one that your Honor just denied a moment ago, namely, which was part B of the notice of motion dated February 13, 1963.

I understand that the notice of motion of February 13, 1963, sought, No. 1, an order granting reargument, which I understand has been denied.

The Court: Right.

[24953] Mr. Davis: It also sought a stay, which has also been denied.

The Court: That is right.

Mr. Davis: I understood your Honor to rule that my affidavit in support of both those motions was not to be considered as part of the record for the purpose of the consideration of the order denying reargument.

I am requesting, for clarification purposes, your Honor, whether or not that—all or part of it—may be a part of the record in connection with the motion for the stay, which I understand your Honor is also denying.

The Court: No, it may not be, because that goes to my fundamental decision of February 6th and 7th. Whatever was in the record before the Court on February 6th and 7th will be part of the record.

You applied for a stay at that time and I denied it to you, except that I gave you until 5 o'clock on Friday,

February 8th, to apply to the Court of Appeals for a stay, and you saw fit not to do it.

Mr. Davis: I have obtained the clarification I sought, your Honor.

[24954] The Court: Mr. Sonnett, on your motion, I am ready to hear you.

Mr. Sonnett: In order, your Honor, to get at least myself oriented to what is before the Court today, because I find the Tool Company papers disorient me——

The Court: You just address yourself to what you have asked the Court to do and then you will be oriented to that extent.

Mr. Sonnett: I would like to recall, before coming to the specific motion, to your Honor the portion of the transcript at the last previous hearing, commencing on the bottom of page 60 and going through to 63.

The Court: Go ahead.

Mr. Sonnett: That, as your Honor will recall, resulted in what I am sure the Court and everyone else clearly understood to be agreement by counsel for the Tool Company with a statement which your Honor made at page 62 as follows:

> "In other words, the understanding of the Court is that you"—meaning TWA—"have now an anticipatory default for failure to appear which will ripen at 10 o'clock Monday, February [24955] 11th, on consent of Hughes Tool Company, the only defendant here with the responsibility, I assume, to answer in money damages to your claim. And then you are free to move for a dismissal——"

The Court: There is a misprint in that. I thought he was going to say "Monday damages," but I don't know what they are.

Mr. Sonnett: Well, we will take them any day, your Honor.

It seems to me that that record was perfectly clear and understood by everybody, and I thought including the Hughes Tool Company.

Pursuant to that record, as your Honor knows, Monday came and Mr. Hughes did not appear. We submitted an order to show cause, supported by an affidavit of mine, and that order to show cause seeks, in terms of purely technical relief, that the prayer of the complaint—only the prayer of the complaint—with respect to the amount of damages be amended. I think I indicated—I am sure I did—the last time the reasons for that, and that is the substantive allegation in the complaint stated that we estimated the damages to be in excess of [24956] $35 million; the Tool Company in its counterclaims, referring to the same items of damages in sum identical, said that the damage was $45. Our investigation by our experts proves that the damages on the antitrust claims are in excess of $45 million.

We, I must say, had no reason to anticipate the default of the Tool Company, its wilful and deliberate choice to default, which occurred before this Court at the last session.

I think, therefore, that since the default judgment rule provides that on a default the plaintiff should get no more than the relief demanded in the complaint, the prayer of the complaint can and should be amended to conform to the substantive allegation and that we should thereafter have the hearing on damages which we have asked your Honor to order. No substantial right of the Tool Company has been or can be prejudiced by that amendment.

The Court: What about Rule 56(c)? I am sorry, I meant 54(c).

Mr. Sonnett: 54(c), your Honor, relates, I believe, only to the entry of the judgment by default. That is to say, that the judgment by default, when entered, shall not be different in [24957] kind from or exceed in amount that prayed for in the demand for judgment.

Prior to your Honor's entering a judgment in this action, I think your Honor has complete control over it and may permit amendments to the pleadings and may permit, as we request, a severance of the action as to Holliday. I think your Honor's power is plenary under the Rules until you have entered the final judgment to be entered into the case.

The Court: Let us take one point at a time.

Isn't it perfectly possible—I suppose I have to say this facetiously—isn't it perfectly true that a defendant may be willing to suffer a default for $105 million but will not suffer a default for $115 million? If he is willing to pay $105 million and if you say, "No, I want $115 million," haven't you put him over a barrel?

Mr. Sonnett: I see no tender in the papers of payment of $105 million. If that tender is made, I will be happy to take it up with the TWA board immediately.

The Court: Do you have to go that far?

[24958] Mr. Sonnett: I am afraid so, your Honor, because I think that the determination of the damages which are not liquidated damages—in this case, as the substantive allegation of our complaint points out, we estimated the damages to be in excess of $35 million—since they are not liquidated, it seems to us necessary to be a determination of the amount. That being so and since no default judgment has yet been entered, it seems to me your Honor has the power to grant amendments——

The Court: Yes, I understand that. But what you are saying is that you have a default and you want to hold on to

that default, but at the same time you want to recover more than you asked for in your complaint.

Mr. Sonnett: We don't have a default judgment, your Honor.

The Court: No, but you have a default, and based on that default you are asking for a judgment.

You want to let them off the hook on a default?

Mr. Sonnett: If the position of the Hughes Tool Company—which is what I indicated to [24959] your Honor when I started—had been confused, if their position before your Honor today is that they consent on the money side to your Honor entering a judgment today for $105 million, I can say to you that TWA will not oppose the entry of that judgment.

The Court: Their position has to be they defaulted. They cannot retreat from that position. They have stated on the record that they will not proceed with the deposition or any further discovery proceedings, and they said that Mr. Hughes would not appear on February 11th.

Then they say to you, "You can't get more than $105 million from us."

You say no, you want $135 million.

I have problems with that, Mr. Sonnett, so we will have to hold that for further research by the Court.

Mr. Sonnett: I think 54(c), your Honor, if I may suggest, the first sentence contemplates the situation where there is an entry of default judgment by the clerk, whether liquidated or capable of computation by the clerk under Rule 55(b)——

The Court: If they said that—and I think these rules are very carefully drafted—I [24960] think they would have referred to subdivision (a) of the rule you are referring to, which provides for entry of judgment by the clerk.

Subdivision (b) provides for an entry by the Court. The drafters of the rule did not see fit to distinguish between subdivisions (a) and (b), and therefore I would have to rule that the words in Rule 55, 54(c), "a judgment by default," must refer to both of them.

Mr. Sonnett: I have had called to my attention Moore and a citation purporting to sustain the proposition that where a hearing is had to determine the amount of unliquidated damages—certainly we have unliquidated damages by reason of the substantive allegation—and the defendant participates in the hearing, the court, in the exercise of sound discretion, may permit the claimant to amend his prayer for relief, citing a series of cases. I am reading from page 1823 of Moore's Federal Practice, Vol. 6.

I think your Honor has the power.

The Court: Perhaps we can clarify this whole thing by determining whether you are moving under a default judgment or whether you are really moving under Rule 37(b), subdivision 2 thereof, for [24961] failure to comply with an order of the court. Which are you moving under?

Mr. Sonnett: It was our intention to move under all the rules, your Honor, so as to be sure to get all the relief we think we are entitled to.

In terms of your Honor's discretion on that point, may I say that obviously, if substantively TWA and its minority stockholders are entitled to damages in excess of $35 million, I would think that your Honor's discretion should be moved to permit the amendment if your Honor has the power to permit it, and I think this case holds that you have.

The Court: All right. Go ahead.

Mr. Sonnett: In so far as the severance with respect to Holliday is concerned, your Honor, the reason why, we

had no way of knowing that the Hughes Tool Company was going to choose, as it did, deliberately, intentionally, wilfully, not to defend this case, and when that became apparent to us we then for the first time were confronted with the problem of what to do about Mr. Holliday. We think a severance as to Mr. Holliday is appropriate. We think that undoubtedly, after the judgment has been satisfied, [24962] there would be no occasion to proceed against Mr. Holliday because TWA would have been made whole.

There may be some question of particular injunctive relief that might be appropriate or necessary as to Mr. Holliday individually, but I don't think we need to take a position on that now, except to suggest that it is a possibility and we cannot tell.

The Court: Mr. Davis represents Mr. Holliday in addition to the Hughes Tool Company.

Mr. Davis, are you in a position to say that Mr. Holliday adopts the position of the Hughes Tool Company as indicated on February 8th?

Mr. Davis: Yes, I am, your Honor, and if it will help to solve the matter I am perfectly willing to do so.

The Court: You have objected to the severance in your papers.

Mr. Davis: I do not see any basis for a severance, your Honor. I don't understand what the plaintiff is trying to do by asking for a severance.

The Court: He is an individual defendant who has been served in this action and I am asking [24963] you, are you representing that Mr. Holliday takes the same position of the Hughes Tool Company so that they will be treated together and no severance is needed?

Mr. Davis: Yes, your Honor. The Tool Company is responsible for whatever Mr. Holliday did or did not do. It would have to——

The Court: I think that clarifies that point.

Mr. Sonnett: I would therefore request that our motion for severance of Mr. Holliday be withdrawn, or deemed withdrawn.

Turning to the substantive portion of our order to show cause, your Honor, we have asked in paragraph D for an adjudication that the Hughes Tool Company, by the conduct alleged in the complaint, has violated the relevant provisions of the anti-trust laws and, with respect to the third claim for relief, has maliciously and wilfully injured the business of plaintiff, and that Hughes Tool Company thereby has caused the injuries to plaintiff alleged in the complaint.

In that connection, as I read the affidavit served by counsel for Hughes Tool Company this [24964] afternoon, an effort is made in that affidavit to say that the legal effect of the consciously deliberate default is not or should not be an admission and should not lead to an adjudication such as we requested but rather they should be in substance free to go ahead and litigate any and all issues they would like to litigate.

Of course they would do this on the basis of selecting such evidence as they have that would be favorable to them but denying TWA access to any of that evidence, which is a strange method of procedure and I don't think it has ever been sanctioned by any court.

In so far as the legal effect of what they did and have done on this record, it seems to us clear, your Honor, under the cases, and certainly going back to the Hammond Packing case, that with respect to the deliberate, wilful, conscious choice not to defend against the complaint they have thereby admitted they have no defense. As the Supreme Court said in the Hammond case, they have admitted a want

in merit in any alleged defense, and therefore the allegations of the complaint must be taken to be admitted for the purpose of this proceeding.

[24965] One of the key allegations in the complaint of course is the allegation that the acts alleged caused the injuries described, and this allegation too must be admitted.

When they consented to a default judgment it seems to us, your Honor, that the Court could not issue a judgment of any kind; it would be beyond the judicial power of the Court to issue a default judgment with respect to relief in a private antitrust action without the judgment embodying the determination that the acts violated the law and, as the statute requires, that the acts caused injury to the property or business of the plaintiff.

While we do not urge that they have admitted the amount of the damages, except to say, as they do in the counterclaims, that the damages to TWA were $45 million, we do think that is an admission sufficient so that we can say to your Honor we want three times $45 million simply because of what they say in the counterclaim.

We think there has to be a hearing to determine what are the unliquidated damages. Nevertheless, the legal effect, the irrevocable legal effect, of what they have done is to admit what we [24966] have set forth in paragraph D of the order to show cause.

One additional and, I think, wholly independent point in that connection is that by the deliberate and conscious and wilful choice with respect to their default relating to the counterclaims they have there again put themselves, as a matter of choice, in the position where a dismissal of those counterclaims with prejudice is the natural and inevitable outcome, and, if that is so, the result, it seems to us, is that it is now or will be upon the entry of your Honor's

order to that effect res judicata that the injuries to TWA were not caused as alleged in the counterclaims and they would be estopped by the judgment to contend otherwise.

As to the next prayer for relief, your Honor, the adjudication that the Tool Company should divest itself of all its rights, titles or interests in the stock of plaintiff, I have to report to your Honor that our research has not yet discovered a private antitrust suit where divestiture has been ordered. Our research has not discovered a private case where divestiture has been refused. The three, I believe, cases that would be most helpful in rela- [24967] tion to Section 7 are not cases where the question was ever reached. It was not reached in the sugar case, although in that case the prayer in the complaint asked for divestiture. The fact is that the prayer was not pressed during the case, your Honor. So that we have no specific precedent relating to a private litigant.

However, I need not remind your Honor of the Du Pont case, or the words of the Supreme Court concerning remedy——

The Court: I had the Du Pont-General Motors minority stockholders suit. I am completely familiar with that.

Mr. Sonnett: Having mentioned the Du Pont case, let me pass to the point that if ever a case called for divestiture, this is the classic case that called for it, because these are the kinds of abuses which I think Section 7 was intended to reach.

In that connection, without pressing the facts unduly, your Honor will recall that in February of 1961, after the voting trust had been in effect, Hughes stated—we have his words and they are on a piece of paper, Exhibit A—that Convair need not concern itself about whether TWA would or would not [24968] take Convair 990 aircraft that

Hughes had on order; that Hughes would attend to that matter, and it might well be that Hughes would be back in control of TWA at that time.

I think the record before your Honor factually as well as legally compels the conclusion that the only suitable remedy here is the remedy of divestiture. Certainly any equitable relief short of divestiture will accomplish nothing. We have only to look at the record of what has happened since the voting trust, to which Hughes agreed in November, 1960, was signed and the campaign of attack and efforts by the defendants to impede that voting trust.

Here was a document that thick, worked on by dozens of lawers, articulating a voting trust fully accepted by the Tool Company, and the ink was hardly dry before they tried to tear it to shreds, as they are still doing. So that equitable relief short of divestiture would be no relief at all, your Honor.

As to prayer F of our order to show cause, we think the record before this Court warrants the conclusion that divestiture should not only occur but that it should occur promptly, because the need of TWA [24969] to be relieved of this incubus is still very real. We have the same campaign of harassment, the same attack on the directors, the same attempts to conduct end runs by going down to the CAB and stirring up a fuss there, the same type of harassment to interfere with a management and a board which is trying to do what is right for this air line.

We have curiously at the same time an unwillingness, as a matter of choice, deliberate decision by the Tool Company, to submit these claims to a court having jurisdiction for decision, hence the deliberate choice not to defend in your Honor's court.

Therefore, I submit, your Honor, that the record warrants and, indeed, requires the conclusion that divestiture should be had, and had promptly. There is no other way that this air line is going to be free of the pernicious influence of Hughes short of divestiture.

The final prayer, your Honor, is that we do have, as your Honor will recall, a request for an early date for a hearing to be held before the Court solely for the determination of the amount of damages. We think that is the only question that is open on this record, the amount of the damages, and that your [24970] Honor should have a hearing on that subject. We ask that your Honor have the hearing before the Court because we are confident, and the papers served by the Tool Company today make it all too evident, that a hearing on damages is going to require immediate, decisive rulings by the Court; and with the greatest respect for the excellent job the special master has done, I am confident that we will be running up here every day, interrupting your Honor's other work, or trying to, getting rulings on points that will have to be disposed of. The hearing will be pandemonium, really, in light of the affidavit.

For example, are we going to try the question of a Capitol 880 crash? What does that have to do with the allegations in our complaint and damage? They have admitted the allegations of the complaint and that those activities caused the injury which was described. The only question is how much.

Unless this has firm judicial control, the hearing will turn out to be 10 months instead of 10 days.

I can only say to your Honor, without trying to gild the lily in that regard, that all of [24971] the equipment program of this air line is suspended in terms of future equip-

ment. They have an acute need for short-range jets and for cargo ships. They cannot move on that, they cannot go forward at all on that, in light of this situation.

Your Honor may have noted in the Wall Street Journal that the chairman of the board of TWA said yesterday that if TWA received a substantial award of damages in this case—he was making a speech in Kansas City——

The Court: I do not read the Wall Street Journal. I apologize to any representative of the Wall Street Journal.

Mr. Sonnett: It is not only a fine newspaper, but it is also one of the few, which makes it even finer.

But they did report that Mr. Breech, during the course of a luncheon, I think, while speaking about the air line, stated that if TWA received a substantial award of damages in this case the terms of the proposed merger with Pan American would have to be reopened to renegotiate.

So we have not only the equipment program of the air line being suspended; we have this [24972] merger problem in the background.

In the meantime we have the Tool Company's minions running around Washington trying to create some kind of back fire, and the air line's need for an early determination is just as acute as its need for a full determination of its damages.

So that I am very mindful of the heavy schedule that your Honor has been fulfilling here for some months; and obviously not meaning any disrespect to the Court, but our associates have come to refer to this as the night court because your Honor sets sessions after the conclusion of a full day, which is a great sacrifice on your Honor's part, but I do think the administration of justice overall would be best served by your Honor conducting these hearings as soon as may be feasible, consistent with your Honor's schedule.

As to the counterclaims, your Honor, that will be argued to you by others. We have joined in the motion to dismiss the counterclaims with prejudice, and the only point, so far as TWA is concerned which it has that the additional defendants do not have, is our prayer in paragraph I of the order to show cause for interim injunctive relief.

[24973] There, as the Court will recall, we asked that there be injunction against impairing or interfering with the voting trust pending the consummation of divestiture. It seemed to us that that was the easiest, most effective, most precise and simplest way to maintain the status quo, at least in terms of additional attack by the Tool Company, until the divestiture could be consummated.

The other aspect of paragraph I which we think this record warrants, and, indeed, which TWA needs, is an injunction, also pending the consummation of divestiture, against instituting or threatening to institute or causing to be instituted suits in any other jurisdiction in which TWA, its directors, officers or employees are parties, which suits embody the allegations of the counterclaim. We think that we are entitled to that bill of peace.

The Tool Company had its opportunity to litigate all of these matters in this court with its eyes wide open and, I am sure, fully conscious that they were better off not to have the truth come out than to have it come out. They decided not to defend this case and not to press their counterclaim. I think they are entitled to peace and [24974] quiet until the Court finally issues the relief by way of judgment. We think we are entitled to the damages and divestiture.

That is all I have, your Honor, unless you have a question.

The Court: Mr. Davis.

Mr. Davis: We want the truth to come out. We would have the truth if we had answers to interrogatories.

So far as lack of financing that apparently is bothering TWA now and which in the past the Tool Company provided is also the basis for which this complaint has been filed against the Tool Company.

One thing that counsel for TWA says—and I am sure it must be inadvertent—and that is when he refers to the page of the transcript he referred to and then, in the course of his statement, makes references to the Tool Company having consented to a default judgment.

I want to make it clear that the Tool Company has not consented to a default judgment, does not consent to a default judgment and does not intend to.

The Court: You said you would not [24975] proceed and Mr. Hughes would not appear, and now the Court is presented with what it is going to do to you.

Mr. Davis: That is correct, your Honor. There is a big difference between saying that the Tool Company, for the reasons it stated at the time and by reason of the practical effects with which it was confronted, by reason of the proceedings today, to take the stand that it took, fully aware as to what might be the consequences should it prove to be wrong, and another thing to say that we are consenting to the entry of a default judgment. I believe that counsel for TWA is fully aware of the distinction, as well aware as I am sure the Court is.

Your Honor, I realize and I will apologize, if I should, for the time when we filed this affidavit in opposition to this motion brought on by an order to show cause, and I don't know whether or not to assume that your Honor has had an opportunity to even——

The Court: I read it very carefully, Mr. Davis.

Mr. Davis: Then it should not be [24976] necessary for me to repeat what is set forth in that affidavit.

There is one thing I would like however to address myself to most seriously, particularly in view of the decision of the Court with respect to our motion on reargument, and that is that it is still imperative that this Court determine what it is in terms of conduct by the Tool Company which is the basis for these alleged damages, as well as what is the scope of what is to be adjudicated by any default judgment.

In that connection I am sure it is not necessary for me to point out that the Court has a continuing duty to consider its jurisdiction based upon the development of facts whenever they occur in the course of this proceeding.

The Court: Mr. Davis, you are leading right back to directing Mr. Hughes to appear for examination. Is that where you want to go?

Mr. Davis: No, your Honor. I believe it was a decision by your Honor when this Court recognized that a plaintiff has the burden of satisfying the Court as to its jurisdiction; but however that may be, certainly the plaintiff has the [24977] burden of establishing what it is he claimed injured him, and there is no question that that must be causally connected to the alleged violation that the plaintiff is claiming, and I am merely suggesting to your Honor that we can approach this question of causal connection between damage or injury and a course of conduct when we know what the course of conduct is.

There is no question, based upon the position we have taken, all the well-pleaded facts of the complaint are binding upon us, not the conclusions of law set forth in the complaint.

For instance, let me refer to the offenses charged in paragraph 9, particularly paragraph 9(b) of the complaint —that was quoted in your Honor's decision of February 7th—where it is said that there was a combination to re-

strain interstate and foreign commerce in violation of Section 1 of the Sherman Act "by providing financing of the acquisition by plaintiff of aircraft, including jet-powered aircraft, only upon the condition that plaintiff acquire all such aircraft from defendant Tool Company." The key word there is "such."

It is a very well-drafted complaint, [24978] you Honor.

Now we can assume two states of facts. We can assume a state of facts where the Tool Company went to TWA after having acquired control and said, "TWA, we will provide you with all and any financing you need provided that you acquire all aircraft from us and only from us." I am sure that if Toolco had done that that it would be outside the scope of any authorization from CAB.

The other way that this reads, and in fact what has happened, is—because there is no question that TWA required aircraft from everybody, Martin, Lockheed, Boeing, Convair; that is in the record—what this says is, based upon the facts, what occurred is that the Tool Company, when TWA was unable to finance itself, would place the order for TWA, finance the aircraft and make them available to TWA. There is no question that the financing we provided in this case was only the financing for all the aircraft acquired from the Tool Company. That is also what the English in paragraph 9(b) means. That is the kind of conduct which I think was specifically approved by the CAB, because [24979] those are individual transactions which CAB approved.

Now, there are allegations in this complaint that there were delays in the acquisition of aircraft, on 880. All right. There were delays. Delays from when? Delays by reason of conduct by Toolco which is a violation of the antitrust laws or delays because Convair was unable to deliver or TWA

could not obtain financing from these monopolies who control the financing of aircraft?

TWA, who is so anxious to bring out the truth, but they don't want to tell us ever, and all the depositions we took of TWA officers they were unable to tell us ever, what it is that the Tool Company did. They can talk in terms of conclusions of violations of law and state in a complaint what the statutes say and say we violated them, but no officer of TWA has been able to do it to date, and the record is there for anybody to read, and the special master listened to all of it, to find out from responsible officers of TWA what it is that we did. That has yet to be established.

I am not suggesting that this Court conclude that this complaint states the cause of action. [24980] Let us find out what other facts are well pleaded which identify the course of conduct that Tool Company engaged in and from which we can relate any question of damage to TWA.

What is the course of conduct that the Tool Company engaged in while it was a 78 per cent owner of TWA which harmed TWA? What is the course of conduct that TWA engaged in which was outside the specific approval of CAB? Those problems still exist.

In opposition, as basically set forth in this affidavit, notwithstanding the risk we have taken, we respectfully submit that we still have a problem of some procedure of requiring the plaintiff, based upon what the plaintiff knows or claims to know we are not going to be in a position to pull out any evidence, as Mr. Sonnett has suggested to oppose them. Whatever testimony the Tool Company or Mr. Hughes otherwise would be able to adduce, we are barred from this. We take that handicap.

Let them put any officer of TWA, or whoever else they want—the lending institutions who participated in these

transactions—let them [24981] put them on and prove what we did or give some evidence of what we did. All I ask is to cross examine. Use their own documents. That is all I want to know: What did we do? That is what TWA has successfully resisted, but only in this sense. Your Honor affirmed the decision of the special master that they were to answer the interrogatories but provided they were to be answered only after the deposition of Mr. Hughes. We put that one to rest, at the risk we have taken, to be sure.

We have always claimed that we were in a position that, if TWA was required to state and identify what it is we did, with whatever intent they want to attribute to it, we admit it. Now what?

I believe the defendant has a right to do that if he is confident enough of his position and the facts. I don't think that conduct can be described as contemptuous or wilful, except that it is a wilful decision. It was and is a deliberate decision, fully aware of the risks involved. But that does not mean that we are to be punished because of our effort to save what otherwise would [24982] be the expenditure of millions of dollars because we had sufficient confidence that TWA, by no officer of TWA, by no other witnesses that exist in the world is capable of presenting a case identifying something which we did which can be attributed to a violation of the antitrust laws and damage to TWA, and I don't see any decision that I know of which would justify any other result but giving the plaintiff an opportunity to present its case, we merely to cross examine, and let us discover what the truth really is as to what the plaintiff claims.

They must know something, your Honor. If they were prepared to examine Mr. Hughes for so many months, they must know something. It isn't as though we refused to give them any information. We have given them all the docu-

ments in our file, and then some, relevant or irrelevant, that were called for.

What are these documents he is quoting from? They come from our files.

The Court: He would like to have the tax documents.

Mr. Davis: They have had tax documents, your Honor.

[24983] The Court: The ones I said you were supposed to give him and which you refused to give him.

Mr. Davis: We did furnish tax documents, your Honor, which were granted confidential treatment by the special master. That was very recently, and after we had your Honor's decision of January 10th counsel for the insurance companies then asked for additional tax documents, including the 1961 and 1962 tax returns and some work papers, as if whatever may appear in the tax documents could conceivably be a defense to the counterclaims against the lending institutions.

We have been having a game going on——

The Court: You asked for it. You filed counterclaims for $385 million.

Mr. Davis: There is no question that my client is going to have to take the consequences of whatever I have done, but I am merely pointing out that we are in a proceeding where we must carefully distinguish, when TWA asks for something, with those who control TWA, the additional defendants, deriving a benefit from the position taken by TWA, and when the present management of TWA conversely— [24984] which is all that is being represented in court, not the stockholders—takes a benefit out of the position being taken by those who install and are controlling that management, the lending institutions—I know they would like to prevent us from voicing our objections to the manner in which the air lines have been operated, to having

this air line continue to be controlled by these lending institutions who acquired control without approval of any agency, and I don't think it is proper to try and still us, and whether or not they approve or disapprove of any suggestions or comments made by the Tool Company in 1961 I don't think is a basis for seeking this injunctive relief which counsel representing the present lender-control management of TWA is seeking. All we have done is to take the position that we do not believe that this plaintiff can establish facts which cause damage to TWA.

We respectfully submit that before there can be any effort at determining what those damages are, it is essential and we think that finally we are going to be entitled to require TWA to identify that conduct, and then we will be able to determine the extent to which the Tool Company may be answerable [24985] in damages to its 78-per-cent-owned TWA, assuming that a prior position with respect to the jurisdiction of this court is not sustained.

I do want to point out, however, in this connection that it could very well be that in the course of the development of the facts as to the conduct which TWA establishes as a basis for these damages the Court may very well want to reconsider its jurisdictional decision, because, your Honor, if there is one thing——

The Court: Let me ask you this and maybe we can cut it short. Mr. Davis, are you interested in a quick review of my prior decisions? If you are, isn't it possible for you, counsel for the plaintiff and counsel for the additional defendants to get together and draw a judgment which would be appealable without reference to either the special master or myself for the ascertainment of the specific relief required?

I think the Court of Appeals might look upon that as a final judgment, and you can get up there as quick as you

want and have this all reviewed instead of spending the time and effort and the exorbitant amounts of money you refer to.

[24986] Mr. Davis: Your Honor, I will be glad to entertain that suggestion. I frankly would have to say to your Honor that I don't believe that is feasible.

We have been trying for some time, in fact, even before this case was assigned to your Honor for all purposes there was an effort made by Judge Ryan, to get the plaintiff to put up some statement as to what its position was——

The Court: We will pass that point now. All I am asking you is that if you are really interested in a fast determination of the propriety of my prior orders, especially the ones of February 6th and February 7th, would it be possible for you, Mr. Sonnett for TWA, Judge Bromley, Mr. Chanler and Mr. Stewart to get together and agree on a form of judgment which you think would be appealable and save all this time and effort and money which is undoubtedly going to have to be spent if you go through the long, drawn-out procedure of the hearing on the default judgment?

If I am wrong on what is the fundamental question as I see it from you, that this Court has no jurisdiction and you don't want a Panagra situation [24987] all over again, where you go through the court for seven years and the Supreme Court says you should not have been there, you should have been before the CAB, find that out now.

Mr. Bromley: I won't entertain your suggestion, your Honor, I will accept it right now.

Mr. Davis: May I address myself to something in that connection?

Mr. Bromley: All you need is a 54(b) certificate, your Honor, as far as the additional defendants are concerned.

The Court: We also have the problem of TWA as a plaintiff, and I would not want half of this to go up without the other half.

Mr. Bromley: I will be glad to join in that, your Honor.

Mr. Chanler: We join in that, your Honor.

Mr. Stewart: We join in that, your Honor.

Mr. Davis: I would love to join them, your Honor, if I thought I could get what we are all seeking to do. The problem I have is twofold. One is what my position is if I consent to a judg- [24988] ment——

The Court: The old antitrust consent judgments say you don't consent to anything even though you consent to the judgment.

Mr. Davis: I understand that, your Honor, but I have real concern based on the research I made to date on that question.

Unquestionably it would require certification under 1292(b), unless something which occurred today gives me a right of review.

More important than that, your Honor, and quite sincerely, I would much prefer to be in a position of obtaining a review by the Court of Appeals after we have put some meat on this complaint, and the meat that I am referring to, your Honor, is the identification of what we did, because, your Honor, the thing that is disturbing me—and I did not reach the same conclusion that your Honor did in his decision of February 7th—I have read that decision more often than I read the Panagra decision, and I think I understand it at times——

The Court: You mean me or Panagra?

Mr. Davis: Panagra I had no difficulty with. I galloped through it and enjoyed every [24989] moment of it.

It occurred to me, your Honor, that what I just demonstrated with respect to paragraph 9(b) of the complaint could very well be the key to the answer as to which way the decision ought to go. In other words, it is perfectly clear, your Honor, 408 refers to the acquisition of control, not merely the acquisition of stock. The acquisition of control necessarily means, by the rule of reason if nothing else, that you must be permitted to do something.

The Court: You were permitted to get control.

Mr. Davis: Does that mean sit there with the stock in my vaults? It is control over management and therefore decisions.

The Court: You and I are going to get into an argument about my decision, and let's not do that.

Mr. Davis: I am referring to the Court of Appeals, your Honor, and the desirability, if it is possible, in this procedural development—if it is possible for the purpose admittedly of furthering what has to be done in any event if they are right, [24990] that they are entitled to money damages—Mr. Sonnett just pointed out that they want that quickly and TWA needs money very badly. They have somebody else in control with more money than we have but apparently it isn't coming very easily. If we are going to get ourselves any posture to determine those damages, because there is no question we are not going to get together on that question——

The Court: The amount? They review it with the damages open. They have done that in the past.

Mr. Davis: If we are going to have to, or if we assume there is this damage which they are anxious to bring on as soon as possible, would it not make more sense, may I suggest, to have as a preliminary procedure an identification of this course of conduct which your Honor's prior decision

did hold was to be finished by the plaintiff which then would permit a much more definitive decision not only with respect to this question of primary and exclusive jurisdiction but also for the purpose of determining damages, assuming that is the result to be obtained?

The Court: If I am wrong you are not [24991] going to need such a statement to prove I am wrong. I spent a lot of time on this and I am convinced I am right until I am told I am wrong by those who can tell me I am wrong.

I am merely saying that your time, other counsel's time, and, I am sure, the tremendous amounts of money that would be involved before you ever got a review of my determination if you follow the course you are suggesting could be saved. If I am wrong on the question of exclusive primary jurisdiction, let us find it out now and get that out of the way before you spend another nickel; and if I am wrong, you can go down to the CAB and they can have all the fun with this lawsuit that I am having.

Why don't you do that now? And I am sure that in view of what Judge Bromley said and the other counsel for the additional defendants, although I have not heard from Mr. Sonnett yet, they would facilitate the preparation of such a document to completely protect you to the extent that you need protection and still would come up with a judgment that would be reviewable by the Court of Appeals.

[24992] Mr. Davis: Your Honor, I certainly will cooperate with anyone who submits to me a document that they think I ought to give serious consideration to. I am merely pointing out in all fairness that I do not believe that will solve the problem.

The Court: You mean if the Court of Appeals says that I am wrong and you should go down to the CAB, that does not solve the problem?

Mr. Davis: No, your Honor, I am referring to the procedure of our preparing or their preparing for my approval a proposed form of judgment that would be reviewable. That is what I do not believe will be feasible. It would require certification by your Honor, and I assume this implies you would be willing to do so.

The Court: I am not sure it involves a certification, but if it does I would be willing to certify.

Mr. Davis: The question is if they can prepare something which I am satisfied protects my clients' interests. That is a procedure I want to pursue. I am willing to try.

The Court: When do you want to sit [24993] down with counsel and try?

Mr. Davis: Any time they are prepared to submit something for me to consider.

Mr. Bromley: I will give him something tomorrow morning at 11:45, your Honor.

Mr. Davis: I am going to take this weekend off.

The Court: Give him the weekend, Judge Bromley.

Mr. Bromley: All right. I will, reluctantly.

The Court: Mr. Sonnett.

Mr. Sonnett: Your Honor said you had not heard from me on this subject, and I am most reluctant to try and agree with Mr. Davis on anything, even the form of a judgment, because I don't think we start from the same premise at all and I can see just wrangling and a waste of time involved.

My understanding is, and I believe it is the understanding of the Court, that the rule, 55, that we are talking about—55(b)(2)—is an outgrowth of the old equity rules, and it is my understanding that for at least a hundred years it has been settled under our rules that a decree pro confesso [24994] which is what we have here, in effect admits all the allegations in the complaint.

Pretrial Hearing, February 21, 1963

I would like to invite your Honor's attention to Thomas vs. Wooster in 114 US, page 104, that being a very thorough discussion of the pro confesso rules, the old equity rules, where the court stated at page 110, for example:

> "The defendants are concluded by that decree"—this being a decree entered on default—"so far at least as it is supported by the allegations of the bill taking the same to be true. Being carefully based on these allegations and not extending beyond them, it cannot now be questioned by the defendants unless it is shown to be erroneous by other statements contained in the bill itself. A confession of facts properly pleaded dispenses with proof of those facts and is as effective for the purposes of the suit as if the facts were proved and a decree pro confesso regards the statements of the bill as confessed."

Further, at page 111, the Supreme Court said, and it is only one sentence, your Honor, so I will trespass long enough to read it, if I may:

> [24995] "We may properly say therefore that to take a bill pro confesso is to order it to stand as if its statements were confessed to be true and that a decree pro confesso is a decree based on such statements assumed to be true and such a decree is as binding and conclusive as any decree rendered in the most solemn manner."

Mr. Davis: How about reading the other part, John?

Mr. Sonnett: I will give the book to you and you can read the balance of it. It might do you some good.

If what we are dealing with here was an effort to agree on the form of a judgment consistent with those rules and consistent with the Rules of Practice as I understand them, I would cheerfully sit down with Mr. Davis right now, but he would not start from those premises.

If he is prepared to do so, that is to say, to discuss only the form without consenting to or waiving whatever it is he wants to try to preserve on this record, if he is prepared to sit down and work on form and to take a form which carries out the [24996] complaint—and I think the form is very easily indicated in our order to show cause—I will be happy to sit down with him.

The Court: I have problems with the order to show cause. I am not sure you are entitled to relief under Section 7 of the Clayton Act. That is one example or one area that I will not agree with you on tonight.

Mr. Sonnett: I will be happy to file a brief or to present argument. I have the cases at hand, if you want to hear me——

The Court: No, not tonight. I think there is really no further point for argument on this motion, and perhaps not even on the motion by the additional defendants. I would suggest that if you don't want to join in this, we still have counterclaims around that can be disposed of and either Mr. Davis sit down with counsel for the additional defendants or the additional defendants can propose a proposed judgment to Mr. Davis which would be appealable, you can follow whichever course you want.

Mr. Bromley: We will follow the latter suggestion and hand him a proposed judgment.

[24997] The Court: All right.

Mr. Bromley: We will do that, so he will be good and rested, by Monday.

The Court: Mr. Davis will have his comments on your proposed suggestions back to you by Thursday night at 5 o'clock.

I hold in abeyance the application by TWA pending a possible resolution of the counterclaim problem.

All right.

A-2736

Order Re Leave To Appeal.

[5407]

[CAPTION]

Application for Leave to Appeal Under Section 1292(b) of Title 28, United States Code.

CHESTER C. DAVIS, New York, N. Y., for defendants Hughes Tool Company and Raymond M. Holliday.

Application to appeal the issues of (1) Whether the U. S. District Court for the Southern District of New York had jurisdiction of the action, and (2) Whether the exercise of its regulatory power by the Civil Aeronautics Board in the premises by issuance of orders permitting defendants to act as defendants acted constitutes a good defense to the anti-trust claim of plaintiffs [sic], is granted; and in all other respects the application is denied.

Proceedings before the district court or any master appointed to carry forward any proceedings below for the assessment of damages, or otherwise, are ordered stayed pending disposition of this appeal. Judge Friendly took no part in the consideration or the disposition of this application.

Before:

SMITH, KAUFMAN, and HAYS,

Circuit Judges.

Cross-appeals from a final judgment for plaintiff in the amount of $145,448,141.07, upon a previous default judgment entered on a complaint alleging violations of the antitrust laws, by the United States District Court for the Southern District of New York, Charles M. Metzner, *Judge*, following a hearing on damages before Special Master Herbert Brownell.

Modified with respect to interest on the judgment and as modified, affirmed.

JAMES V. HAYES (Ralstone R. Irvine, Mahlon F. Perkins, Jr., David A. Wier, *of counsel;* Donovan, Leisure, Newton & Irvine, New York, N. Y.; Davis & Cox, New York, N. Y., *on the brief*), *for defendants-appellants.*

DUDLEY B. TENNEY (Paul W. Williams, Immanuel Kohn, Marshall H. Cox, Jr., Abraham P. Ordover, Lawrence C. Browne, Michael P. Tierney, *of counsel;* Cahill, Gordon, Sonnett, Reindel & Ohl, New York, N. Y., *on the brief*), *for plaintiff-appellant.*

Opinion of the Court of Appeals,
September 1, 1971

KAUFMAN, *Circuit Judge*:

We are presented in this case with cross-appeals from a final judgment entered April 14, 1970, premised upon a previous default judgment, in favor of plaintiff Trans World Airlines, Inc. (TWA) against defendants-appellants Hughes Tool Company and its chief financial officer, Raymond M. Holliday (Toolco), which, the district court tells us, 312 F. Supp. at 480, is some thirty times greater than the next highest monetary award ever entered.

The extraordinary aspect of this complex litigation is in large measure attributable to the elusiveness of Howard R. Hughes, progenitor and sole owner of Toolco, protagonist in its operations, in a sense the central character of this litigation as well, and yet not a party to this appeal because Hughes himself, although named as a defendant in TWA's complaint, could not be located for service of process.

I.

Since the facts in this litigation have been set forth in detail in many prior reported decisions, *see* 214 F. Supp. 106 (S.D.N.Y. 1963), 32 F.R.D. 604 (S.D.N.Y. 1963); 332 F.2d 602 (2d Cir. 1964); 38 F.R.D. 499 (S.D.N.Y. 1965); 308 F. Supp. 679 (S.D.N.Y. 1969); 312 F. Supp. 478 (S.D.N.Y. 1970), in the interest of avoiding unconscionable length of this opinion, we will limit our own initial statement to a brief resume of the tortuous history of the case, sufficient to permit a meaningful statement of the issues raised.

More than a decade ago, by a complaint dated June 30, 1961, TWA filed its complaint in this action charging

Toolco and Hughes with violations of the Clayton and Sherman Acts, 15 U.S.C. §§1, 2, 11, and 18, as well as with a claim, for which pendent jurisdiction was asserted, alleging malicious and willful injury to the business of TWA.

Convoluted and protracted pre-trial maneuvers culminated in the failure of Toolco to produce Hughes for a deposition scheduled by court order to be taken on February 11, 1963. As a result of Hughes's confessed unwillingness to appear, as well as the nonproduction by Toolco of certain papers and documents whose disclosure to plaintiff had also been required by court order, the Rule 2 judge assigned to the action (Rule 2, *General Rules for the Southern and Eastern Districts of New York*), Judge Metzner, on May 3, 1963 filed two orders. One entered the default against Toolco and granted TWA's motion to increase the *ad damnum* clause of its complaint from $105,000,000 to $135,000,000, after trebling. In the second order Judge Metzner also found Toolco in default with respect to five counterclaims that Toolco had asserted against TWA and several additional defendants. Judge Metzner dismissed these counterclaims and also granted TWA's motion for summary judgment on a sixth counterclaim.

Opinion of the Court of Appeals, September 1, 1971

We granted leave to take an interlocutory appeal from the former order, after Judge Metzner had certified that an appeal was appropriate under 28 U.S.C. §1292(b). But we limited our review to considering whether the district court's jurisdiction over the antitrust action was ousted because primary jurisdiction lay with the Civil Aeronautics Board, which had approved various steps by which Toolco gradually assumed virtually complete control of TWA, holding about 78% of its stock at the time the complaint was filed, and whether certain of the CAB orders associated with those grants of approval constituted a good defense to TWA's action. The interlocutory appeal was consolidated with defendants' parallel appeal as of right from Judge Metzner's dismissal of the counterclaims. A panel of this court ultimately ruled that the district court did properly assert its jurisdiction and that the CAB orders did not constitute blanket approval of the claims in the complaint and hence were not a defense to TWA's action. In the appeal on the counterclaims, the orders of the district court were affirmed with one exception, not relevant here (determining that the CAB had exclusive jurisdiction over one of the dismissed counterclaims). 332 F.2d 602, *cert. granted,* 379 U.S. 92 (1964), *cert. dismissed as improvidently granted,* 380 U.S. 248, 249 (1965).

Judge Metzner's ruling adjudging Toolco in default necessitated an extensive hearing to determine damages. Herbert Brownell, Esq.,[1] appointed Special Master for this purpose, conducted hearings between May 2, 1966 and April 9, 1968. On September 1, 1968, in a thorough

---

1 Hon. J. Lee Rankin, appointed Special Master during pre-trial proceedings, was replaced when he resigned in December 1965 to become Corporation Counsel for New York City.

report, the Master awarded TWA trebled damages of $137,611,435.95. Both sides filed objections. On December 23, 1969, Judge Metzner adopted Brownell's report in all respects, 308 F. Supp. 679, and then in a subsequent opinion awarded attorneys fees of $7.5 million and assessed costs in the amount of $336,705.12. 312 F. Supp. 478. On April 14, 1970, the district court entered its final judgment, with 6% interest to run from that date, in the sum—impressive even by space age and inflationary standards—of $145,448,141.07.[2]

II.

A. *Toolco Appeal*

The first thrust of the Toolco appeal is directed at the default judgment itself and primarily concerns issues that were not the focus of the damage hearing before Special Master Brownell. The broad question pressed by Toolco is whether TWA is entitled to recover any amount whatever on the record before us, regardless of the adequacy of its proof of damages. Toolco contends (discussed in part III below) that the default judgment was improperly entered against it, in violation of its due process rights, and should be vacated; that (part IV) even if the default judgment is valid, the judgment does not justify assessing damages against Toolco for any antitrust violations, since in Toolco's view the evidence in the record conclusively refutes the possibility that any such violations could have occurred; and that (part V) even if the default judgment establishes antitrust infractions, TWA has not proved that any damages it might have suffered as a result of acts of

[2] A prayer for equitable relief included in the original complaint was mooted when Toolco sold all its TWA stock in May, 1966.

mismanagement alleged in the complaint arose from anti-trust violations. On each of these questions, we affirm the judgment below in all respects.

Toolco also contests Special Master Brownell's calculations of the damages. It argues that (part VI), even if proximate causation was shown, the damages were in several respects wrongly computed. In each of these respects we also affirm the reasoning and conclusions of the Master and of Judge Metzner.

Additionally, Toolco challenges under F.R. Civ. P. 54(c) Judge Metzner's grant of TWA's motion to increase the *ad damnum* at the same time he entered the default judgment (part VIII). It also argues that the award of attorney's fees is excessive and unreasonable (part IX). We believe Judge Metzner properly permitted TWA to raise the *ad damnum* and that the payment allowed for legal services was within the bounds of his discretion.

B. *TWA Appeal*

TWA takes issue with only one item of Brownell's report, *viz.* certain interest charges credited in mitigation of damages (part X). We affirm the Master's disposition of this issue. TWA also appeals from the denial by Judge Metzner of moratory interest as an element of the damages to be trebled under Section 4 of the Clayton Act, 15 U.S.C. §15. It also questions Judge Metzner's holding that interest on the judgment should run from the date of the district court's judgment, rather than the date the Special Master filed his report, and contests the award of only 6% interest pursuant to New York judgments law, instead of the 7½% currently set by the state Banking Board as the maximum allowable commercial rate. We discuss these issues in part XI and affirm the district court

on the first two points but hold that proper interest under current New York decisional authority is 7½%. TWA's last assertion (part XII) is that it may recover $1.6 million compensation for fees paid to experts as a component of its "cost of suit," 15 U.S.C. §15. With this assertion we disagree.

III.

Toolco argues forcefully that Judge Metzner's entry of a default judgment having such drastic consequences resulted in a denial of due process and was otherwise an abuse of discretion under F. R. Civ. P. 37(b)(2)(iii) and 37(d). We are reminded not only of the severe nature of this particular default but of the fundamental importance of the right to an adversary hearing prior to judicial determination of rights and liabilities. We are in full accord with the general proposition, for which Toolco cites the three leading cases of *Hovey* v. *Elliott*, 167 U.S. 409 (1897), *Hammond Packing Co.* v. *Arkansas*, 212 U.S. 322 (1909), and *Societe Internationale* v. *Rogers*, 357 U.S. 197 (1958), that the totality of circumstances surrounding the failure to make discovery must be considered in determining what sanctions to apply under Rule 37. As we understand Toolco's argument, those portions of the "totality of circumstances" it considers to control the invalidity of the default here are these: that TWA did not itself comply with Toolco's efforts to pursue pre-trial discovery sufficiently to lay an adequate foundation for the attempt to depose Howard Hughes; that, to similar legal effect, Judge Metzner on January 10, 1963, improperly denied Toolco's request for a Rule 16 hearing and permitted TWA to delay answering interrogatories served on it by Toolco in the fall of 1962 until after the Hughes deposition sched-

uled for February 11, 1963; that its own compliance with TWA's requests for discovery was substantial and in good faith; and that TWA did not and indeed could never have shown a need to depose Hughes. In sum it argues that in the face of all this, the district court grossly abused its discretion in not resorting to a less drastic alternative remedy before putting an end to litigation on the merits with a default judgment.

Although we agree with TWA that these arguments are unpersuasive, for the sake of clarity we pause to reject TWA's alternative theory that we may not consider the merits of the default judgment because we are required by either res judicata or collateral estoppel to follow the affirmance by the earlier panel of this court of the default judgment entered against Toolco on its counterclaims. Res judicata is singularly inappropriate in this context. As we have noted, leave to Toolco to appeal from the default judgment entered on TWA's antitrust complaint was narrowly confined and the panel expressly reserved the very question at issue here, "[t]he propriety of the court's entering a default judgment against the defendants with respect to the complaint . . . ." Prior to the judgment now appealed from, there had simply been no "final judgment" entered with respect to the merits of TWA's cause of action against Toolco, and thus we lack the fundamental prerequisite for applying res judicata. See *Moore, Federal Practice* ¶0.405[1].

Nor will collateral estoppel avail TWA. The relevant issue "actually litigated and determined in the prior" appeal, *Lawler* v. *National Screen Service Corp.*, 349 U.S. 322, 326 (1955), was only that Judge Metzner properly entered the default on Toolco's counterclaims. This is a sharply distinguishable issue from the propriety of a dif-

ferent default judgment in favor of Toolco's adversary (this does not follow, as Toolco suggests, because the latter default is more drastic, but simply because the two questions are not the same). The issue of the propriety of the default here is not a right, question, or fact determined on the previous appeal. We believe we can fairly assume that TWA would not attempt to invoke collateral estoppel if the counterclaim had been asserted in a separate action. Combining two claims for trial as permitted for convenience under the Federal Rules does not dissolve the separate identities of the two claims or the two default judgments. Collateral estoppel and res judicata take aim at redundant litigation of identical issues or causes of action; they are not intended to foreclose consideration of the legal merits by analogy—however persuasive the analogies may be.

This is not to say that we will entirely disregard the obvious force of the prior determination on so closely related a question. This is foremost a matter of *stare decisis* and, of course, we *are* bound by collateral estoppel not to reopen subsidiary issues actually determined in the earlier appeal. We are persuaded that the most important considerations that prompted the earlier affirmance of the default on Toolco's counterclaims compel the same result here.

The essential details of the pre-trial proceedings that climaxed in the default are succinctly set out in Chief Judge Lumbard's earlier opinion, 332 F.2d 602, and we will endeavor to avoid unnecessary repetition. Because the factors bearing on the two default judgments are not identical, however, and in view of Toolco's attack on the district court's conduct of the pretrial proceedings, we cannot entirely avoid a brief sketch of the history of the litigation prior to the default.

Opinion of the Court of Appeals,
September 1, 1971

One relatively minor justification put forward by the earlier panel in affirming the default judgment on the counterclaims related to Toolco's noncompliance with two discovery orders entered upon motions made by certain defendants who had been joined in the litigation by Toolco's counterclaim. Toolco now asserts that these production orders concerned matters irrelevant or at least of marginal importance to TWA's complaint. However this may be—and it is virtually impossible, because of the default and the nonproduction of the documents to evaluate this claim—we agree that the failure to comply with orders granted in favor of the other litigants would most likely not in itself have warranted the severe remedy of a default judgment in favor of TWA on the principal action.

But it is also apparent that these production orders are of trivial importance to the propriety of the default judgment in question here, in light of Howard Hughes's deliberate, knowing, willful, and plainly announced refusal to comply with an order requiring his appearance for the taking of his deposition on February 11, 1963, and which had been served long in advance of the return day. The reason that entry of the default was inevitable after Hughes's nonappearance can only be understood against the background of TWA's intensive efforts, first undertaken on the very day that it filed its complaint, to compel Hughes's personal testimony, as a witness and "managing agent" of defendant Hughes Tool Co. under F. R. Civ. P. 37(b)(2). TWA has consistently maintained, and continues to do so, that quite aside from the fact that he was Toolco's alter ego, Hughes's pretrial testimony was absolutely essential for it adequately to frame the issues and prepare for trial because of Hughes's extraordinary secretive methods of doing business. It was the indispensable nature of Hughes's

personal testimony, according to TWA, that prompted its diligent pursuit of Hughes from the inception of the litigation. TWA's campaign to depose Hughes, which opened with a motion for leave to do so on the date it filed its complaint, was temporarily frustrated when the motion was denied and Toolco was granted priority in the taking of depositions. But TWA renewed its effort with a further unsuccessful motion and proposals to depose Hughes prior to Toolco's depositions. In early January, 1962, TWA adopted a new tactic and repeatedly sought with equal lack of success, to discover Hughes's whereabouts from Toolco. After further futile notices to depose Hughes served in January and February, 1962, TWA achieved a breakthrough when on June 4 the then Special Master rejected Toolco's objections to interrogatories directed to both Hughes and Toolco to locate Hughes so that he might be deposed. Toolco was ordered to answer the interrogatories unless Hughes should authorize counsel to accept service of a subpoena on his behalf for his appearance at the deposition.

On appeal the district court ordered that the interrogatories be answered as modified by it in an immaterial respect. Counsel for Toolco on July 27 informed the Master that Hughes had authorized counsel to accept service of a subpoena for Hughes to appear as a witness. An extended period of wrangling followed. Among other highlights of this period, Toolco refused a proposed stipulation and order to serve Hughes through Toolco's counsel, on the ground that agreeing to the stipulation might prejudice its right to object to the propriety of the deposition. Finally, on September 6, 1962, the same day that TWA charged that a purported authorization for counsel to accept service for Hughes was apparently a forgery, counsel for Toolco informed Judge Metzner that another lawyer,

Chester Davis, had in fact been served that day in California, pursuant to Hughes's personal authorization. On September 13, as part of its indignant response to the forgery allegation, Toolco submitted to the court the notice of deposition, a subpoena to Hughes, an affidavit of Davis stating his authority to accept service for Hughes, and a second affidavit from a Los Angeles notary stating that Hughes had indeed appeared in person before him and had acknowledged Davis's authority.

Subsequently, the district court adopted a decision of Special Master Rankin that Toolco would bear responsibility for Hughes's response to the subpoena, and stated that Hughes would be considered bound by this declaration unless he objected. No objections were ever made and there is, of course, no question that Toolco was responsible for the actions of the owner of all its stock. At Toolco's instance, the deposition date was twice postponed until by order of January 10, 1963, the court affirmed a final date set by Master Rankin requiring Hughes's appearance on February 11, a schedule "to be adhered to in the absence of extraordinary circumstances." Also on January 10, 1963, Judge Metzner denied an application for a Rule 16 pre-trial hearing that had been presented to it by Toolco on September 25, 1962, at the initial suggestion not of Toolco but of the Master. The motion was denied "without prejudice to renew on papers before the Court 30 days after the completion of the deposition of Howard R. Hughes." Judge Metzner also affirmed the denial by the Special Master of Toolco's motion to depose two financial institutions concerned primarily with issues raised by Toolco's counterclaim, the Irving Trust Co. and Dillon, Reed, & Co., on the ground that to grant the motion would interfere with the scheduled deposition of Howard Hughes.

Thus by mid-January Toolco had explored and exhausted myriad possible avenues for further delaying the day of reckoning. On February 8, 1963, the Friday prior to Hughes's scheduled appearance the following Monday, Toolco announced a strategy decision. That day Toolco's counsel served on TWA and filed with the court a "notice of position" stating that in view of the court's denial of its motion two days earlier to dismiss the complaint, the denial of a certification permitting review of that order under 28 U.S.C. §1292(b), and because of "the enormous expenses which would be incurred by Toolco . . . in further pre-trial *and trial* proceedings and the belief of Toolco *that such expenses would exceed the amount of damages provable by plaintiff under the complaint*" (emphasis added) Toolco "elects, subject only to whatever judicial relief it may hereafter obtain, to rest on the merits of its positions as heretofore taken so that it may avoid the burdens and expenses involved in further pre-trial *and trial* proceedings prior to the time that an appellate court has the opportunity to rule upon the decisions and orders heretofore made herein" (emphasis added).

At a hearing conducted February 8, 1963, Toolco's counsel, Davis, whose signature appeared on the "notice of position," admitted that "the subpoena on behalf of Mr. Hughes was valid, never was questioned." He also read from the record that portion of a ruling by the Special Master on September 15, 1962, imposing responsibility for Hughes's actions on Toolco, including the Master's comment that "I am piercing the corporate veil as to the Hughes Tool Company, and I am bringing what I hope is clear notice of very substantial sanctions" against Toolco "in case there should be at some later date a . . . failure to respond to the subpoena . . . ." Davis commented that

Toolco was "aware of these rulings" and had accepted the responsibility imposed on it by the Master. Davis further explained that he had described to Toolco the sanctions available in the event Hughes should not appear, with particular regard to F. R. Civ. P. 37(d). Davis further explained that the basis of Toolco's strategic judgment was that which had been expressed in the "notice" a calculation that TWA could not prove damages equal to the expenses of further litigation. Finally, Davis candidly and clearly recognized, and attributed the same awareness to Toolco, "that by insisting on a right to obtain a review on the legal questions which have been decided to date, and should it develop that they are in error . . . as a consequence *they may be deprived of further defending on the merits, other than on the question of damages*" (emphasis added). Davis described Toolco's decision to stand on Hughes's nonappearance as a "business decision" —the wisdom of which Davis himself pointedly would not vouch for—and responded affirmatively to the court's query whether Toolco's position was that "the plaintiff may take whatever proceedings it is advised to take by way of sanctions under Rule 37."

Short of express consent to the entry of a default judgment, a clearer case for the necessity and propriety of such a judgment could hardly be imagined. On appeal, as we have said, the complaint was held sufficient to state an antitrust claim under several theories and after all that was said at the February 8 hearing Toolco could hardly have been shocked that it then found itself left with nothing to litigate but damages.

The language of the panel on the previous appeal with respect to the Hughes non-appearance is as relevant in this context as it was to the issue presented by the default with respect to the counterclaims:

Opinion of the Court of Appeals, September 1, 1971

"When Hughes chose not to appear for this deposition—which action was taken deliberately and with full knowledge of the sanctions available to the additional defendants under Rule 37—Judge Metzner was fully justified in entering judgments dismissing the counterclaims against TWA and the additional defendants. The sanction of judgment by default for failure to comply with discovery orders is the most severe sanction which the court may apply, and its use must be tempered by the careful exercise of judicial discretion to assure that its imposition is merited. However, where one party has acted in willful and deliberate disregard of reasonable and necessary court orders and the efficient administration of justice, the application of even so stringent a sanction is fully justified and should not be disturbed."

Chief Judge Lumbard further elucidated in words pertinent on this appeal:

"beyond any question . . . the deposition of Hughes was necessary to all aspects of this litigation. Hughes has at all times been sole owner of Toolco and the guiding light behind all the transactions between Toolco and TWA. Both TWA and the additional defendants had the right to depose Hughes.

. . . .

Hughes' deposition was absolutely essential to the proper conduct of the litigation. Yet he and Toolco seized upon every opportunity to forestall this event. . . . Indeed, Hughes and Toolco seemed to look upon the entire discovery proceedings as some sort of a game, rather than as a means of securing the just and expeditious settlement of the important matters in dispute. It was only at the very eve of the Hughes

deposition—after the other litigants had been put to much delay and expense—that the defendants made a 'business decision' to terminate discovery.

Hughes' conduct is particularly intolerable in a large and complex litigation such as this one. The protracted antitrust suit taxes the energies and resourcefulness of each party to the litigation; and it consumes much time of the court and the special masters it appoints. Tactics such as Hughes' serve only to frustrate the implementation of the discovery machinery devised by the federal judiciary to expedite the handling of such complex litigation." 330 F.2d at 614-15.

Nor was that panel's references to the necessity of Hughes's deposition to "all aspects of this litigation" gratuitous. It was prompted by Toolco's position on the earlier appeal that Hughes's deposition was relevant *only* to the TWA action and not to the counterclaims. Even if we are not bound in a strict legal sense by the previous ruling that Hughes's deposition was essential to TWA's claim, that holding was manifestly correct. As will be seen, many of TWA's asserted charges relied on interpretations of intent and of the significance of ambiguous projects quickly aborted, and of possible exploratory actions taken by Toolco that may or may not have been relevant to TWA's several antitrust theories. The reality behind the charges could hardly be tested without the testimony of the one man who personally directed Toolco's activities throughout the relevant period and whose singular penchant for secrecy was, after two years of frustrating delay in the conduct of the litigation, well known to the Master and the trial court. Clearly the court was entirely correct in concluding that the litigation would

only continue its desultory course without the appearance on stage at the earliest possible moment of the hitherto unseen Prince of the drama. Thus, the court's decisions to postpone all further discovery by Toolco—discovery of the sort which had not substantially advanced the litigation in the past—were not only within its discretion but quite obviously correct. Indeed, in light of TWA's express reliance on Hughes himself to establish as much as 75% of its own case against Toolco, one would have expected that Toolco might have welcomed the opportunity to force TWA to play the card that it had proclaimed was so important to its case, in the expectation that a disappointing deposition would open the way for an early termination of the case favorable to Toolco. Toolco's argument that TWA had not by February 8 laid a sufficient foundation for its case thus falls as well, because by failing to produce Hughes, Toolco deprived both TWA and itself of the opportunity to establish their respective positions. Finally, the suggestion that the court might have resorted to some sanction short of a default judgment after Toolco had announced a policy decision to take an action that would give it the right to take an immediate appeal—which only a final judgment on the merits would accomplish—and following the willful refusal to produce a witness whom the court had rightly found central to the expeditious progress of the lawsuit, has such an air of unreality about it as to bear its own refutation. Contrast *Rosenberg, Sanctions to Effectuate Pretrial Discovery*, Colum. L. Rev. 480, 495 (1958) (giving party "second chance" desirable in appropriate case).

Toolco intimates that throughout the litigation TWA sought in bad faith to win a fabricated case by exploiting Hughes's known craving for solitude. Nothing in the record would justify any such finding, and in any event the

district court did offer to permit the deposition to be taken in as much privacy and under any other conditions that might suit Hughes's aversion to public appearance.

The cases relied on by Toolco are far afield and demonstrate by negative implication the inevitability of the default in this case. For example, in *Gill* v. *Stolow*, 240 F.2d 669 (2d Cir. 1957), the court reversed the entry of a default only upon a showing of a "real attempt to comply" with an order requiring the witness to travel from England to New York for the deposition, a trip the court found actually barred by his ill-health. There, the witness defied doctors' orders to appear for the deposition within two months of the time scheduled for taking it. As far as we know, defendants have never in the eight years since the default judgment represented that Hughes was willing to be deposed were the default vacated. *Von Der Heydt* v. *Rogers*, 251 F.2d 17 (D.C. Cir. 1958) (per curiam) reversed a default judgment only upon a conclusion that the district court had not adequately set forth its findings. Concurring separately, then Circuit Judge Burger commented that "if the information sought is material to the case and not privileged, and if appellant was able to produce it, failure to produce warrants dismissal." *Id.* at 19. That is precisely the case here, except that the information sought was more than merely "material." It was essential. It could prove to be the life or death of the action. In *Independent Productions Corp.* v. *Loew's, Inc.*, 283 F.2d 730 (2d Cir. 1960), we simply found full compliance with the only court order outstanding at the time of the default judgment and concluded that the default judgment was improperly entered merely because when the witness appeared for the deposition he raised a Fifth Amendment privilege. See also *Bon Air Hotel, Inc.* v. *Time, Inc.*, 376 F.2d 118 (5th Cir. 1967), *cert. denied*, 393 U.S. 815 (1968).

(petitioner's failure to comply due to inability brought about neither by its own conduct nor by circumstances within its control did not warrant default judgment). Finally, *Societe Internationale* v. *Rogers,* 357 U.S. 197 (1957), as in *Gill,* reversed a default judgment only on the strength of findings by the Special Master, adopted by the district court, and approved by the court of appeals, that the party had made good faith and diligent efforts to execute a production order where compliance would have violated Swiss law.

Indeed, the circumstances mandating entry of a default judgment here are stronger than in *Hammond Packing Co.* v. *Arkansas,* 212 U.S. 322 (1909), where the party against whom a default judgment was entered claimed a privilege that it urged justified its noncompliance. Despite this, the Court ruled that because the Hammond Co. "absolutely declined to obey the order," which required production of evidence that the court could only "assume was material," in view of the non-compliance, the default judgment was proper. As in this case, Hammond too relied on the denial of pretrial motions by the defaulting party that would have postponed compliance with or modified the order. The Court found no abuse of the district court's broad discretion to control pretrial procedures.

In light of the foregoing, it would appear that were less at stake in this litigation, the propriety of the default judgment would not have deserved the full discussion we have afforded it. The entry of the default judgment was inescapable and virtually invited by Toolco.

IV.

Toolco, assuming arguendo that we would hold that the default judgment was properly entered against it on TWA's

complaint, seeks nevertheless to avoid any liability for the antitrust violations alleged by TWA on the ground that we are required to find as a matter of law that facts essential to establish any such violations, although alleged in the complaint, are in fact untrue and could not have been proved by TWA at a trial. To the extent that the allegations of antitrust infringements are not conclusively disproved, so Toolco asserts, the allegations themselves are either too vague or conclusory or otherwise insufficient to support any recovery whatever. We disagree.

Despite inevitable sharp contrasts of tone and emphasis in the voluminous briefs, the parties do not seem to disagree that Judge Metzner, in preliminary rulings prior to the damage hearing and again in his decision adopting the report of the Master, applied an entirely correct standard in defining the legal effect of a default judgment. We too find Judge Metzner's discussions of the law in this complicated area unexceptionable. Extracting justiciable standards from the venerable but still definitive case, *Thomson* v. *Wooster*, 114 U.S. 104 (1885), Judge Metzner ruled that by its default Toolco admitted every "well pleaded allegation" of the complaint, a term of art which Judge Metzner interpreted to permit finding an allegation not to be "well pleaded" only "in very narrow, exceptional circumstances:"

> "For example, an allegation made indefinite or erroneous by other allegations in the same complaint is not a well-pleaded allegation. Other examples . . . are allegations which are contrary to facts of which the court will take judicial notice or which are not susceptible of proof by legitimate evidence, or which are contrary to uncontroverted material in the file of the case." 308 F. Supp. at 683.

Judge Metzner then discussed the meaning that the much-mooted phrase "judicial notice" should take in the present context, as distinguished from the much different circumstance of a full trial, and summarized his previous discussion as implying that "only indisputable facts"—facts which could not possibly be rebutted if the non-defaulting party were permitted a trial—may be judicially "noticed" to rebut factual material otherwise admitted by a default. Toolco now attempts to hoist Judge Metzner by his own petard in directing our attention away from the "judicial notice" standard to certain "material in the file of the case" introduced by Toolco during the hearing on damages which according to Toolco has not been "controverted" by TWA. But this argument stands the matter on its head and implies that it was TWA's responsibility to defend the allegations of its complaint by rebutting adverse matter introduced by Toolco in the damage hearing. TWA had no obligation to introduce any evidence whatever in support of the allegations of its complaint. Matter introduced by Toolco to disprove or mitigate damages which only *tends* to contradict the allegations of the complaint has no legal effect except as it bears on the question of damages unless it could not conceivably have been refuted and disproved by TWA had there been a trial and thus is "indisputable." It would usher in a new era in the dynamics of litigation if a party could suffer a default judgment to be entered against it and then go about its business as if the judgment did not exist and as though, despite the opportunities to comply with the court's orders and to defend on the merits which had been ignored, the slate was wiped clean and a new day had dawned. To state the proposition is to expose the folly of it.

The applicable principles are clearly implied from *Thomson* v. *Wooster, supra,* where the court held that defendants who had defaulted in a patent infringement suit would not be permited to show that the patent sued upon was invalid. Defendants had sought to introduce the original patent to show it differed from a reissued patent, which was the patent the plaintiffs sought to enforce. The court ruled that neither this proof nor evidence that defendants had delayed 14 years in seeking reissue were sufficient to defeat the contrary allegation of the validity of the patent contained in the complaint because, *inter alia,* the delay "might possibly have been explained, and the court could not say as a matter of law, it was insusceptible of explanation. . . ." We are instructed by *Wooster* that so long as the facts as painted by the complaint "*might* . . . have been the case" they may not now be successfully controverted by Toolco. There was a time for that and Toolco cannot elect to default and then defend on the merits. It cannot have its cake and eat it too.

Toolco's adversion to TWA's alleged failure to buttress its allegations in effect seeks to have us review the evidence presently in the record as though we were passing on a motion by Toolco for summary judgment supported by appropriate affidavits following normal discovery proceedings and prior to entry of any final judgment. In such a case, we would grant the motion unless TWA "set forth specific facts showing that there is a genuine issue for trial." F.R. Civ. P. 56(e). But TWA need not introduce any facts whatever in support of its complaint. Judgment has already been entered in its favor on a complaint held on the earlier appeal to this court to state a sufficient claim. Only damages remained to be determined. As Judge Metzner ruled "[w]here file material is involved, if the plaintiff did not have full opportunity to

meet or controvert such material, then it should not be used to nullify the allegation." This conclusion is the clear implication of the Court's refusal to permit the admission of the prior patent in *Thomson*.

We have, nevertheless, reviewed all the evidence introduced and relied on by Toolco in its attempt to negative its liability and conclude that Toolco has shown nothing that renders inconceivable the likelihood that TWA could have proved at trial that actions by Toolco which formed the basis for the award of damages were in fact, as alleged in the complaint, violations of the antitrust laws. Although we have found it desirable to set forth and affirm the propositions of law relied upon by the district court and by both Masters involved, it would serve no useful purpose to rehash in detail the arguments which defendants have repeatedly urged to show that the exacting test of *Thomson v. Wooster* has been met and which incidentally have been rejected both by Judge Metzner and Special Master Brownell in thorough and well-reasoned opinions.[3]

Briefly, as we said on the earlier appeal, the allegations of the complaint "state the outlines of a tying arrangement, an economic boycott of the defendants' competitors, and an attempt to monopolize commerce, all unlawful under the antitrust statutes." 332 F.2d 602, 611. Specifically, in the first of three claims set forth in the complaint—the only claim upon which TWA introduced evidence of damages—TWA contended that Toolco, 100% owned by Hughes throughout the relevant period, acquired control of TWA and made it a "captive market" for Toolco "with the primary purpose of restraining and monopolizing the trade

[3] We also are in agreement with the similar statements of the applicable principles of law contained in Brownell's report, as well as those in a preliminary opinion of Special Master Rankin dated July 30, 1965, and in an earlier opinion of Judge Metzner, reported at 38 F.R.D. 499 (S.D.N.Y. 1965).

and commerce" of TWA, which was alleged to constitute a substantial proportion of various defined markets for airplanes, including jets, and related equipment. TWA further alleged that defendants intended that Toolco would become the sole source of supply of jet-powered aircraft to TWA (thus by implication intending to monopolize a substantial portion of a defined market) and a dominant source of supply of jets to air carriers generally; that suppliers to TWA other than Toolco would be boycotted; and that defendants would cause Toolco to supply TWA with aircraft only upon condition that TWA would accept financing dictated by Toolco.

Quite apart from proof of intent, paragraph 9 of the complaint alleged that defendants conspired to restrain trade in violation of Section 1 of the Sherman Act; provided financing to TWA only on the condition that plaintiff buy all aircraft needed for its operations from Toolco; required TWA to boycott all suppliers of aircraft except Toolco; conspired to monopolize the TWA market in violation of Section 2 of the Sherman Act; attempted to monopolize the TWA market, also in violation of Section 2 of the Sherman Act; and sold and leased jets to TWA on the condition that TWA not buy or lease the goods of a competitor of Toolco, in violation of Section 3 of the Clayton Act.

Paragraphs 11 through 29 of the complaint set forth in detail specific acts performed in furtherance of the offenses charged and for the improper purposes alleged, as outlined above. Thus, according to the complaint, Toolco first acquired TWA with the intent to make it its own market for supplying aircraft, an intention which was carried through into the advent of the commercial jet age during the years 1955-56. In 1956, according to these

allegations, Toolco ordered a total of 33 Boeing jets and 30 additional Model 880 jets manufactured by General Dynamics Corporation ("Convair"). At the same time, defendants prohibited TWA from "making any arrangements for the acquisition, by sale, lease, or otherwise, of any jet-powered aircraft." The complaint goes on to say that throughout 1956-60, Toolco refused to assign to TWA the rights to acquire the jets on order from Convair and Boeing, despite TWA's requests that it do so and despite provisions in Toolco's contracts with Boeing and Convair that permitted it to do so. Jets leased to TWA by Toolco on a day-to-day basis in 1959-60 were the only jets made available to TWA during the years 1955 to 1960 and were inadequate to TWA's needs, it was charged. Each lease was conditioned on TWA's agreement and understanding that it would not purchase or lease aircraft from any other supplier. In 1960 six of the Convair 880's Toolco had ordered in 1956 were leased to Northeast Airlines, including three previously assigned to TWA. Similarly, in June, 1959, six of the Boeing jets ordered in 1956 were "diverted to the principal transatlantic competitor of TWA" (Pan Am). While thus restricting TWA's purchases of jets, the complaint alleged that Toolco also inhibited TWA's ability to obtain equity financing and caused TWA to rely chiefly on debt financing, thus rendering TWA unable to finance needed aircraft acquisitions except upon Toolco's approval. Toolco intended by this restriction to increase TWA's dependence on Toolco in furtherance of its unlawful purposes. From 1955-60 defendants prohibited TWA from obtaining financing for the acquisition of jets required for TWA's needs.

The damages which Brownell ultimately awarded to TWA consisted primarily of profits lost as a result of

(1) diversion of the six Convair's to Northeast; (2) temporary retention by Toolco of four additional of the ordered Convair's and the ultimate lease of those jets to Northeast; (3) diversion of the six Boeings to Pan Am; (4) the lease, instead of outright sale, of jets in 1959-60; and (5) late delivery of 47 of the 63 jets ordered in 1956, which would have been avoided if, by the allegations of the complaint, Toolco had not unlawfully constricted TWA's financing and acquisition of its own jet fleet. Although TWA also attempted to prove other damages resulting from Toolco's manipulation of its financing, and further damage arising from delayed sales of obsolete prop aircraft, Brownell found TWA's proof in these respects insufficient and TWA does not appeal from either determination. No damages were sought to be proved for alleged continuing antitrust violations by Toolco subsequent to December 15, 1960, when Toolco put all its TWA stock in a voting trust controlled by three voting trustees (including Holliday), thus relinquishing control of TWA, an action required as a condition of loans to TWA advanced by various banks and insurance companies to permit the purchase of new jets.

As it did before Brownell and Judge Metzner, Toolco now seeks to discredit primarily one part of paragraph three of TWA's complaint, in which TWA alleged that Toolco had been engaged since 1939 "in the development, manufacture and acquisition of aircraft and related equipment" and its "sale and lease" to air carriers, and to demonstrate the inadequacy of one antitrust theory that, according to Toolco, collapses if the allegations of paragraph three are untenable. Toolco thus would have us find *United States* v. *Yellow Cab Co.*, 332 U.S. 218 (1947), to be the linchpin of TWA's complaint, without which the remainder cannot hold together. In *Yellow Cab*, the

Court reversed the grant of a motion to dismiss a complaint which had alleged that a company engaged in the business of manufacturing taxis had established control of a substantial segment of cab operations in four cities and had exploited its control by extracting exclusive purchasing agreements from its owned cabs and taxi companies, thus excluding other manufacturers from the affected market with the ultimate effect, as the Court said, that "the appellees effectively limited the outlets through which cabs may be sold in interstate commerce." *Id.* at 226. This argument fails at each of three points. Toolco has not established to our satisfaction that TWA could not possibly have proven violations analogous to those alleged in *Yellow Cab.* Even if it had, additional specific allegations of antitrust violations in the complaint other than the one which rests on the holding in *Yellow Cab* are not conclusively disproved by Toolco's evidence. Nor has Toolco demonstrated that TWA's postulates for recovery are in any other manner not "well pleaded."

To disprove the allegation of paragraph 3 that Toolco was a "manufacturer" of commercial airplanes, Toolco relies primarily on (1) CAB opinions and orders dating from 1944-50 that concluded Toolco was not then engaged in or planning the manufacture of airplanes for commercial use, (2) schedules to CAB Form 41 Reports filed by domestic trunk airlines pursuant to 49 U.S.C. §1377 indicating that between 1950 and 1966 none of these airlines purchased or leased a Toolco-made airplane, and (3) the fact that no TWA annual report ever mentioned the manufacture of a "Hughes plane." These documents, Toolco asserts, conclusively establish that Toolco was never a manufacturer of commercial aircraft and certainly not a competitor with the giant manufacturers—Boeing, Douglas, and Convair—and

thus the exclusive dealing arrangements alleged in the complaint are entirely innocuous and incapable of producing the kind of market foreclosure alleged in *Yellow Cab.* Toolco similarly sets out to undermine the allegation that it was a "dealer" in aircraft, again directing attention to CAB opinions and orders dated no later than 1950 finding no sales or leases of planes by Toolco to any airline but TWA; and again introducing the Form 41 Reports to the same effect but extending to 1961. The thrust of its argument is that under no view of the complaint, given the facts established by these documents, could TWA conceivably have proved more than that Toolco as a parent of TWA engaged in good-faith efforts to rescue it from financial crisis and to operate it as a successful business enterprise. Even if TWA could prove mismanagement by Toolco, that is insufficient, in Toolco's view, to intimate any possible foreclosure of competition—since Toolco was a mere manager or conduit and had no independent competitive significance—and accordingly TWA's theories must be found barren, since danger to free competition is the *raison d'etre* of the antitrust laws and some showing of such a danger in every case is a *sine qua non* of proving their infringement.

Both Judge Metzner and Master Brownell met Toolco's argument in this respect head-on, holding that courts could not consider as conclusively proven, facts merely recited in CAB orders and opinions and in airline reports that are the product of no adversary proceedings, distinguishing between the *existence* of such documents, of which courts might in an appropriate case take judicial notice, and the truthfulness of their contents, which would be subject to contrary proof had the trial precluded by Toolco's default actually been conducted. We agree with the reasoning of

both opinions and find the authorities there relied on to be in point and sound. See *Stasiukevich* v. *Nicolls,* 168 F.2d 474, 479 (1st Cir. 1958); *McCormick on Evidence* §328 at 704, §330 at 709 (1954); *Morgan, The Law of Evidence,* 1941-45, 59 *Harv. L. Rev.* 481, 482-87 (1946); *McNaughton, Judicial Notice,* 14 *Vand. L. Rev.* 779 (1961).

Moreover the documents described above, while (if their contents were accepted as true) showing that Toolco was not a major force as a supplier of aircraft other than to TWA, hardly negative the possibility that Toolco possessed independent economic significance, apart from its role as supplier to TWA, sufficient to support proof of any or all the antitrust theories limned by TWA's complaint. There is evidence in the record of activities by Toolco or Hughes that suggest significant movement by Toolco and Hughes toward actual or potential commercial manufacturer or dealership in airplanes, especially jets, and their parts. We cannot say that proof at a trial—prevented by Toolco's conduct—that Toolco was more than a conduit for TWA but rather possessed independent competitive significance with respect to the commercial aircraft market, would be insufficient, if combined with appropriate related proof of the intent, attempt, collusion, tying arrangements, boycotts, and monopolization alleged in the complaint, to support an antitrust judgment for TWA.

The evidence that Toolco's interests and ambitions in commercial air flights may have extended beyond mere management of TWA begins with Toolco's admitted role, initiated in World War II and continuing to the present day, as a substantial manufacturer of helicopters and aircraft parts for military purposes (and now of aerospace materials as well). Although Toolco stresses the non-commercial nature of this activity, it is clear that Toolco

throughout the relevant period had the technical capability and sophisticated "know-how," to enter the commercial market without untoward delay if it had so chosen. Early in its history, Toolco acquired the rights to the first forty Constellation aircraft developed in cooperation with Lockheed in the early 1940's. Twenty-five of these were intended by Toolco for sale to airlines other than TWA. 6 CAB 153, 155 (1944). During and after the war, Hughes actively engaged in the development (ultimately unsuccessful) of a plan worthy of Jules Verne, for a 700-passenger plywood flying boat for commercial development. Manufacture by Toolco of aircraft in association with AVRO of Canada, and of Caravelles as a licensee of Sud Aviacion of France, were considered during the middle 1950's. In 1956, Toolco ordered at least 300 Pratt & Whitney jet engines, later sold primarily to Boeing and Pan Am at a substantial profit. The engines could well have been intended for installation in the planned Toolco jets and in any event constituted Toolco as a competitor with other sellers of jet engines.

Also in 1956, secret discussions were commenced within the inner circles of Toolco and TWA for Toolco to manufacture commercial jets, a plan scuttled before the end of that year by the initiation of a CAB investigation into the matter which followed a TWA motion to the Board for approval to purchase up to 25 Toolco-manufactured commercial jets. Through most of 1955, Toolco was engaged with Convair in the development of a jet which again proved unfeasible. Evidence of these last mentioned aborted forays is consistent with allegations in paragraphs 14 and 15 of the complaint that defendants arranged with Convair to develop "a jet-powered aircraft to be manufactured by Convair and to be supplied by the defendants to

air carriers" and that "defendants also entered into a plan under which Toolco would itself" manufacture jets to be furnished "both to TWA and to other air carriers."

Additionally, there was testimony that Toolco ordered seven Convair 880s manufactured to the specifications of Capital Airlines and thirteen Convair 990s built for American Airlines' requirements.

Finally, Toolco's activities with respect to the 63-plane fleet ordered in 1956, only part of which was ever delivered to TWA, further support an inference that Toolco contemplated that it was or might become more than a manager for TWA. Thus, Toolco conditioned its order for the Convair 880's on a stipulation that the price to it would be reduced progressively as Convair was successful in selling more of the planes beyond the initial orders by Toolco and by Delta Airlines, Inc., a condition consistent with possible Toolco participation in marketing the 880. Non-assignment provisions in the purchase agreements do not conclusively negate the capacity of Toolco to have dealt in its Boeing and Convair contracts and priority rights with airlines other than TWA—and of course Toolco did not in fact exercise its right to assign the contracts to TWA. Ultimately, of course, as alleged in the complaint and demonstrated at the damages hearing, defendants did sell or lease 16 planes of the ordered 63-plane fleet to Pan Am and Northeast. As Master Brownell observed, the ability of Toolco to deliver these jets immediately may have given Toolco a significant competitive advantage over their own manufacturers. Late in 1959, Hughes negotiated with Lockheed for purchase of Electras at a time when Toolco's own actions indicated TWA was fully stocked with jets.

Toolco's response to most of these considerations is that each is consistent with a sole intent on its part to deal in

aircraft and aircraft parts solely for the benefit of TWA. However, the allegation in the complaint that Toolco refused to assign the rights to the ordered fleet to TWA, although it was empowered to do so under the contracts of sale, is consistent with a contrary inference.

In any event, the question is not whether one inference or another is the stronger but whether Toolco's evidence —in light of its default and thus the absence of a trial— absolutely forecloses the possibility that Toolco enjoyed actual or potential independent competitive significance in the commercial aircraft market sufficient to support a finding of an antitrust violation under any of the several hypotheses put forward in the complaint, including, in addition to the *Yellow Cab* theory, (1) unlawful *intent* to monopolize a substantial portion of the commercial aircraft market in restraint of trade; (2) unlawful conspiracy to do so, see *Sunkist Growers, Inc.* v. *Winckler & Smith Citrus Products Co.*, 284 F.2d 1 (9th Cir. 1960), *rev'd on other grounds*, 370 U.S. 19 (1962); *Poller* v. *Columbia Broadcasting System, Inc.*, 368 U.S. 464 (1962); *Perma Life Mufflers, Inc.* v. *International Parts Corp.*, 392 U.S. 134 (1968); *Albrecht* v. *Herald Co.*, 390 U.S. 145 (1968); *Simpson* v. *Union Oil Co.*, 377 U.S. 13 (1964); (3) enforcement of an illegal boycott, see *Fashion Originators' Guild* v. *Federal Trade Commission*, 312 U.S. 457 (1941); *United States* v. *New York Great Atlantic & Pacific Tea Co.*, 173 F.2d 79 (7th Cir. 1949); *Klor's Inc.* v. *Broadway-Hale Stores*, 359 U.S. 207 (1959); (4) tying adequate financing of TWA to its purchase or lease of jets from Toolco, and vice-versa, see *Fortner Enterprises, Inc.* v. *United States Steel Corp.*, 394 U.S. 495, 502-03 (1969); and (5) the lease of Aircraft to TWA on the condition that TWA not purchase or lease aircraft from other suppliers, see *Inter-*

national Salt Co. v. *United States*, 332 U.S. 392 (1947); *Standard Oil Co. of California* v. *United States*, 337 U.S. 293 (1949).

Toolco's reply brief argues that the allegations of unlawful intent are unduly vague but this is unsupported by the cases it relies on, *Glenn Coal Co.* v. *Dickinson Fuel Co.*, 72 F.2d 885, 888 (4th Cir. 1934); *SCM Corp.* v. *Radio Corp. of America*, 407 F.2d 166 (2d Cir.), *cert. denied*, 395 U.S. 943 (1969) (mere conclusory and vague allegations and nothing more, of unlawful attempt or conspiracy to monopolize or to restrain trade, or, simply, to violate the antitrust laws, were held insufficient). By contrast, TWA's complaint alleges specific acts by defendants allegedly pursuant to an intent to monopolize specified markets by means which are described in detail in the complaint. These allegations are both adequate as a matter of proper pleading and sufficiently definite to support an award of damages entered on the default judgment.

Toolco's argument that a conspiracy among Holliday and Hughes, as officers and shareholders of Toolco, with Toolco itself, is as a matter of antitrust law unprovable, is an illustration of the thrust of Toolco's approach to the question whether the decisive allegations in the complaint are "well-pleaded." Whether TWA might have proven such a conspiracy would have turned on the nature and weight of technical and secretive evidence bearing on the independent economic significance of each of the parties and also on subjective questions of intent and attempt. Toolco's conduct barred even initial exploration of these crucial factual issues. We are reminded that even summary judgment "should be used sparingly in complex antitrust litigation where motive and intent play leading roles, the proof is largely in the hands of the alleged con-

spirators, and hostile witnesses thicken the plot." *Poller* v. *Columbia Broadcasting System, Inc., supra* at 473. See also *White Motor Co.* v. *United States,* 372 U.S. 253, 259-60 (1963). We should be far more reluctant to grant summary judgment for Toolco following entry of judgment for TWA, as it now in effect requests us to do, when its own default barred even initial exploration of the crucial factual issues.

V.

The opinions below and the briefs submitted to us on this appeal reveal some confusion as to the proper scope of the hearing on damages. As the authorities cited above illustrate, a default judgment entered on well-pleaded allegations in a complaint establishes a defendant's liability. Also, at the hearing before Special Master Brownell it was incumbent upon TWA to introduce evidence showing the extent of the damages which resulted from the antitrust violations established by the default judgment. The difficulty arises as to a question that Toolco refers to in part II of its main brief as one of "proximate cause." To what extent did the default judgment dispense with a plaintiff's normal obligation to show that damages alleged were proximately caused by Toolco's illegal actions? The answer seems to us inherent in the question.

The default had the effect of admitting or establishing that the acts pleaded in the complaint violated the antitrust laws and that those acts caused injury to TWA in the respects there alleged. Because, however, the damages were unliquidated and uncertain, F.R.Civ.P. 55(b), it was necessary for TWA at the hearing to establish the *extent* of the injuries established by the default. The outer bounds of the recovery allowable are of course measured by the principle of proximate cause. The default judgment did

not give TWA a blank check to recover from Toolco any losses it had ever suffered from whatever source. It could only recover those damages arising from the acts and injuries pleaded and in this sense it was TWA's burden to show "proximate cause." On the other hand, there was no burden on TWA to show that any of Toolco's acts pleaded in the complaint violated the antitrust laws nor to show that those acts caused the well-pleaded injuries, except as we have indicated that it had to for the purpose of establishing the extent of the injury caused TWA, in dollars and cents.

Thus, in *Sunkist Growers, Inc.* v. *Winckler & Smith Citrus Products Co.*, 284 F.2d 1 (9th Cir. 1960), *rev'd on other grounds*, 370 U.S. 19 (1962), cited by Toolco, the court held that an antitrust plaintiff could not recover for losses attributable to a watered-down product rather than to defendant's acts. To the same effect are the other cases relied on by Toolco, e.g., *Milwaukee Towne Corp.* v. *Loew's, Inc.*, 190 F.2d 561 (7th Cir. 1951), *cert. denied*, 342 U.S. 909 (1952) (plaintiff could not recover for losses based on defendant's illegal restriction on its distribution of first-run movies during a period when plaintiff's theatre was not equipped to show first-run movies). TWA purports to dispute Toolco's abstract statement of the appropriate scope of the damage hearing, relying on an unreported district court opinion whose reasoning on the issue of proximate causation we adopted in *Jones* v. *Uris Sales Corp.*, 373 F.2d 644 (2d Cir. 1967). While TWA cites *Jones* for the proposition that at the damage hearing it had no obligation to show proximate cause in any sense, the central language of the district court opinion in *Jones* which TWA relies upon belies its own assertion: "[t]he causal relationship is stated distinctly in the complaint by the allegation that

Penn diverted profits belonging to the defendant Uris. All that remained to be supplied were the identities of the accounts and the enterprise *to which they were diverted*, and the amount of *the profits diverted* . . . ." (Emphasis added.) Implicit in the limiting words we have emphasized is the proposition that it was plaintiff's obligation following the default to establish that any lost profits for which it sought recovery were in fact those whose unlawful diversion was established by the default judgment. The default judgment proved the fact of the diversion (the injury) and its illegality. But to recover damages, plaintiff was necessarily required to establish that those damages were attributable to the diversion. Thus, however well-pleaded the allegation that profits were diverted, plaintiffs in *Jones* could not avoid, to the extent necessary to establish the causal nexus for the recovery of damages, introducing evidence relating to the diversion alleged.

Nor do we believe, contrary to Toolco's assertion, that Special Master Brownell misunderstood this issue. His formulation that the "burden of establishing proximate cause is satisfied *as to liability* if proximate cause is adequately alleged in the complaint" (emphasis added) is consistent with our own understanding of the law and, as we will elucidate shortly, we find his application of the proper principles to have been unexceptionable. In fact, Toolco helpfully reminds us that Special Master Brownell disallowed two major elements of damage alleged by TWA. We have reference to those supposedly arising from the assertions in TWA's complaint that it was chronically underfinanced by Toolco and from TWA's claimed tardy sale of its prop fleet. His conclusions on this score were based on his determination that TWA's proof that those damages arose from the illegal acts and injuries established by the default judgment was inadequate.

Despite its present broad assertion (perhaps in an excess of caution), that "proximate cause" was in no sense an element essential to establishing recoverable losses, TWA's strategy at the hearing, with respect to the damages actually awarded, was in fact designed to prove causation. To illustrate, and to lay the foundation for our discussion of Toolco's various claims that in several respects TWA's proof of causation was inadequate, we conclude this portion of our opinion by sketching the contours of the evidentiary foundation of TWA's damage award.

TWA's most important witness was Robert W. Rummel, at the time of the hearing TWA Vice President for Planning and Research. Rummel testified to the effect that had Hughes and Toolco not interfered with TWA's operations in the manner alleged in TWA's complaint, TWA would have attempted to acquire in the commercial market a jet fleet of its own consisting of the same 63 airplanes we have made reference to—33 Boeing 707's and 30 Convair 880's—which Toolco did in fact order for TWA and which were ultimately delivered to Toolco in 1959-60. As we have noted, major elements in the damages awarded were losses incurred by TWA and caused by Toolco's diversion of 16 of these jets, 6 Boeings and 10 Convairs, to Pan Am and Northeast and delays in the delivery of the Boeings and Convairs that were not diverted. Brownell accepted only in part Rummel's testimony that the delays in the Convair deliveries were solely attributable to Hughes's misconduct, but he fully accepted Rummel's testimony as to the makeup of the "reconstructed" 63-jet fleet. His report concluded that only the Convair delays beyond those provided in a March 2, 1960, amendment to the original delivery schedule were chargeable to defendants, since delays reflected in that amendment were caused by Convair's own mismanagement.

John B. Connelly, Vice President and Assistant General Manager of Boeing Aircraft Division corroborated TWA's claim that delays in Boeing deliveries were caused by defendants' failure to negotiate with reasonable diligence for priorities in delivery dates in 1955 when jets were first offered commercially. The thrust of the Connelly-Rummel testimony was that if defendants had not, as alleged in the complaint, prevented TWA from negotiating for itself, it would have ordered and received a full 63-jet fleet sooner than it in fact received the abbreviated 47-jet fleet from Toolco. Apart from a portion of the Convair delays, Brownell credited this evidence in its entirety. The illegality of Toolco's arrogation of all authority for buying aircraft was, as we have said, conclusively established by the default judgment.

Two other fact witnesses for TWA testified as to losses caused by disruptions in the transition from prop to jet operations attributable to defendants' interference with the Convair 880 deliveries. The Special Master adopted their computations without reservation and, except for Toolco's attack on the underlying finding of disruption already referred to, Toolco does not seem to press its argument that the proof with respect to these items was inadequate.

The testimony of TWA's four expert witnesses fared somewhat worse with the Special Master than did that of its so-called "fact witnesses." Brownell rejected a "Comparative Profit Study" report comparing TWA's actual profits with two of its competitors during two separate periods offered in an effort to prove TWA's losses. The report was prepared by Coverdale & Colpits, a consulting engineering firm, and testimony concerning it was given by a partner in the firm, Edward L. Wemple. The Special Master did, however, accept the computations contained in

a second Coverdale report tracing in detail the operating losses attributable to Toolco's disruption of the jet fleet for the years 1959-63. These computations included an estimate of increased profits that would have accrued had TWA owned outright certain Boeing 707's which Toolco only leased to it in 1959-60, as well as of profits that would have been realized otherwise from timely delivery of the reconstructed fleet.

TWA also attempted to prove damages resulting from Toolco's inadequate financing of TWA by introducing a study prepared by Drexel Harriman Ripley, Inc. (the DHR study) testimony concerning which was given by its Senior Vice-President, Edward J. Morehouse. Morehouse testified that if TWA had been independently and competently managed during 1955-60, it could have financed the purchase of the reconstructed fleet at much lower costs than those actually incurred through Toolco's management. The program of independent financing described by the DHR study was rejected by Brownell, as was a report prepared by R. Dixon Speas Associates estimating TWA losses from belated sales of piston airplanes.

Finally, John C. Biegler, a partner of Price Waterhouse & Co., testified with respect to a report in evidence and prepared by his firm under his supervision which reconstructed TWA's historical financial posture on the basis of TWA's evidence of disruptions and their supposed effects which were caused by Toolco. The Price Waterhouse study, as supplemented at times during the hearing, was the vehicle through which evidence of both sides bearing on the effect on TWA operations of supposed Toolco disruptions was translated into differences between actual and hypothetical TWA profits.

Toolco's direct case consisted of testimony of four expert witnesses, Gene M. Woodfin, partner in Loeb, Rhoades

& Co., investment brokers, and Nathan S. Simat, Robert I. Helliesen and L. John Eichner, principals in the aviation consulting firm of Simat, Helliesen & Eichner, Inc. Each of defendants' experts sought to discredit the evidence of Wemple, Morehouse, and Speas.

Thus, as is apparent from the above summary, TWA did not rely only on its default judgment but introduced evidence linking each component of the damages claimed to the pleaded illegal acts of Toolco and injuries to TWA. Toolco contends, however, that TWA's proof should have been rejected by the Special Master and that TWA has not established that the delays in delivery, the diversions, or the Boeing leases caused any damage to TWA attributable to those acts and injuries.

VI.

Both sides agree that Special Master Brownell's findings, adopted by Judge Metzner, may not be disturbed at this juncture unless we agree with Toolco that they are "clearly erroneous," F.R.Civ.P. 52(a), the standard also properly applied by Judge Metzner himself in reviewing the Master's Report, F.R.Civ.P. 53(e)(2). Our function would seem to be in a sense redundant, since it appears that each of the substantial objections to the Master's conclusions raised by Toolco before us has already been considered and rejected by the district court. But because of the huge sums involved in this litigation, we have not been content to rest on Judge Metzner's appraisal of the Master's findings and have made our own independent review of those findings. We agree with Judge Metzner's assertion that it is relevant that Special Master Brownell's report is a product of "painstaking" analysis of highly complex questions following hearings on damages which extended over a period of

two years, consisting of hundreds of hours of testimony and producing a transcript of 11,000 pages. See *Badenhausen* v. *Guaranty Trust Co.*, 145 F.2d 40, 53 (4th Cir. 1944), *cert. denied*, 323 U.S. 797 (1945); *Graver Tank & Mfg. Co.* v. *Linde Air Products Co.*, 336 U.S. 271, 274-75 (1949). We might add that his report reflects an extraordinary awareness of the issues raised and the applicable principles of law.

In this connection we observe that the Master, in considering the proof of both parties, did so with explicit reference to the classic statement of the applicable guidelines expressed in *Bigelow* v. *RKO Radio Pictures, Inc.*, 327 U.S. 251, 264 (1946), permitting an award in cases such as this to be based "upon probable and inferential, as well as direct and positive proof," and imposing on the wrongdoer any "risk of uncertainty which his own wrong has created," *id.* at 264. Indeed, the Supreme Court recently observed:

"Trial and appellate courts alike must also observe the practical limits of the burden of proof which may be demanded of a treble-damage plaintiff who seeks recovery for injuries from a partial or total exclusion from a market; damage issues in these cases are rarely susceptible of the kind of concrete, detailed proof of injury which is available in other contexts."

Zenith Radio Corp. v. *Hazeltine Research Inc.*, 395 U.S. 100, 123 (1969). In this case the reference to risk in *Bigelow* would seem to have even greater application. Toolco must bear the responsibility for any lack of preciseness of proof, and there is good reason that this should be so. The fault itself by Toolco rendered precise proof of damages even more difficult than in the usual antitrust case, where

the plaintiff may avail itself of the full battery of discovery procedures to prove damages as well as to prove liability. Toolco cannot be permitted to block the discovery of precise, clear and direct evidence and then be heard to complain that the evidence should have been more convincing.

In any event, our answer to each of the many objections that Toolco raises to the specific findings of the Special Master as to the "proximate cause" of the damages awarded TWA, is that each of the challenged findings is amply supported by evidence introduced during the hearing and that none is "clearly erroneous." Toolco's arguments on this score are principally five, each of which we shall discuss sufficiently to demonstrate the basis for the Master's conclusions.

1. Toolco attacks first the validity of the entire basis of the damage award, the reconstructed 63-jet fleet which Brownell found constituted "a proper basis for computing damages." That he was justified in doing so is established first by Rummel's testimony that TWA *should* in fact have ordered the fleet that Toolco ordered for it, although with more dispatch. Rummel was TWA's senior engineer in 1943, chief engineer in 1949, elevated to Vice President in charge of Engineering in 1956, was throughout this period closely associated with Hughes himself in his early exploration of the commercial jet market and indeed may have been the only individual with whom Hughes entrusted a share of responsibility for aircraft procurement. Rummel testified that he reported directly to Hughes, had authority to commit funds under Toolco's contracts, and "the Toolco factory representatives at Boeing and Convair reported to me as special representative of Toolco responsible for the technical administration of the Toolco contracts . . . ." His primary responsibility throughout most

of his employment with TWA "has been to recommend what size and what type fleets to procure . . . ." In addition to the historical fact that Rummel, chief procurement officer for TWA at the time and Hughes' confidant, participated in and concurred in the decision to acquire the 63-jet fleet, the assumption that TWA would have acted approximately as did Toolco in the interest of exploiting to maximum financial benefit the enormous potential of the jet age is entirely reasonable. Indeed, in view of the well-pleaded allegations of the complaint, asserting that defendants did not always act in the best interest of TWA, and defendants' contrary assertion that it did always so act, it ill-behooves defendants now to suggest that a well-managed TWA would have acted differently in evaluating its jet fleet requirement than did Toolco.

Assuming then that an independent TWA would have attempted to acquire the same 63-jet fleet ordered by Toolco, defendants contend that TWA would not have been able to finance such an undertaking, which would have cost about $353 million or $93 million more than TWA actually spent for its 47-jet fleet. Toolco notes that $100 million of the financing for the 47-jet fleet was supplied by Toolco itself through its purchase of TWA subordinated debentures. We find untenable Toolco's characterization as insufficient to support the Special Master's contrary assumption that an independent TWA would and could have financed the full 63-jet fleet, the evidence that United, American, and Pan American Airlines each were in fact able to finance comparable ventures during the same period. Toolco directs our attention to financial reversals experienced by TWA during the period preceding the time Brownell assumed TWA would have financed the fleet (1958-59). But the well-pleaded allega-

tions of the complaint demonstrate conclusively that crippling TWA's financial posture and reducing it to a state of vassalage, dependent on Toolco's support, was part of defendants' overall antitrust violation. See Complaint ¶¶17, 18, 19, 22, 23, 24, 26, 50, 51, and 52(a). To the extent of negating Toolco's attempted reliance on TWA's asserted financial weakness, these allegations must be given effect. Any inferences other than that an independent TWA would have fared neither better nor worse than competing airlines in financing its jet fleet would have been unwarranted.

3. Assuming then that the 63-jet reconstructed fleet was a reasonable basis for assessing damages, Toolco nonetheless insists that Special Master Brownell erred in his findings that in several respects (concerning the delays in Boeing and Convair deliveries; the leasing of Boeings to TWA; and the diversion of 16 jets to TWA's competitors) an independent TWA would have been managed to better financial advantage. It first attacks the assumption, fully supported by testimony of Rummel and Boeing Vice-President Connelly, that more diligent bargaining for Boeing jets would have resulted in TWA enjoying approximately the same rights to priority in deliveries as did Pan Am, American and United. Rummel's testimony adequately supports the conclusion that TWA would and could have engaged in negotiations reasonably "calculated to preserve TWA's competitive position in the industry for early deliveries," to quote Brownell's words. Connelly, who was in a position to be entirely familiar with Boeing's policies with respect to delivery dates,[4] testified, contrary to

---

4 Connelly testified that as Director of Contract Administration he was a member of a "headquarters group" at Boeing in 1955 and in 1956 became Vice President and General Manager in charge of the department at Boeing in which responsibility for commercial airline programs was centralized.

Toolco's present contentions, that more diligent efforts by TWA would in fact have resulted in substantial parity of priorities.

Because of Master Brownell's and Judge Metzner's thorough discussions of these questions, and in the interest of curtailing this necessarily protracted opinion, we will not continue to discuss each of the other fine-drawn points raised by Toolco in an attempt to discredit this testimony. It is sufficient that we note we have thoroughly considered each of them and found them insufficient to support a holding of clear error.

4. Special Master Brownell concluded that defendants' dalliance in securing Convair deliveries and its active interference with Convair's production schedule was responsible for delays beyond the amended delivery schedule. This finding is amply supported by evidence of (1) Hughes's refusal to accept delivery of the Convair 880's when Convair was ready to deliver them; (2) his assumption of personal control of all matters concerning the deliveries and his direction that TWA was not to proceed with any acceptance procedures without personal clearance from Hughes; and (3) Hughes's personal instructions to Toolco armed guards at one point to forcefully seize four CV-880's from the Convair production lines, thereby aggravating Convair's production difficulties. Moreover, it was uncontested that TWA received its planes on an average approximately 9.9 months later than provided in the original schedule, while deliveries to Delta were delayed by only 1.4 months.

5. Finally, the Master's assumption that TWA as a non-handcuffed independent operator would have pur-

chased outright nineteen Boeings leased to it by Toolco in 1959-60 is supported by evidence in the DHR study establishing that as a general rule outright ownership was more desirable than leasing under the conditions existing at that time, subject to certain exceptions not applicable. Also, in cross-examination, defendant's expert Woodfin, admitted that the 1959-60 leases were an interim and unsatisfactory arrangement. The Master's observation that, of 2,036 aircraft operated by certified route carriers on December 31, 1960, only 117 were leased, is also relevant.

VII.

Our response to Toolco's objections to certain calculations by Special Master Brownell of damages, given that the elements of injury to TWA—from late deliveries, non-deliveries, leases instead of sales, and resultant disruption—were properly established, as we believe, is based on the same rationale that underlies our conclusions in the preceding portion of this opinion. Once again, we find none of Brownell's findings to be clearly erroneous.

There are essentially two issues raised with respect to the calculation of damages, which seem to be subdivided for purposes of analysis and emphasis many times in the briefs. The first concerns the degree of injury due to Toolco's failure to deliver the 10 diverted Convairs and 6 diverted Boeings in light of the size of TWA's jet fleet over the period of five years, 1959-63, for which damages were assessed. Toolco claims alternatively that certain aircraft purchased by TWA during that period made up for at least part of the lost profits that would otherwise

have been incurred as a result of the lost 16 planes. Moreover, to the extent the losses were not thus compensated for, Toolco would attribute the fault not to the diversions but to the failure of TWA's new management to "mitigate" damages by purchasing other jets to replace the diverted ones (as we have noted, three voting trustees, two of whom were not controlled by defendants, assumed control of Toolco's voting stock on December 15, 1960). We do not believe that these claims are inconsistent, as TWA asserts. Rather they amount in the aggregate to a single contention that TWA did in fact partly mitigate damages but could and should have done so entirely, or at least to a greater extent.

The second issue raised is based on the argument that even if TWA's fleet size was decreased as a result of Toolco disruptions to the extent found by Brownell, one cannot calculate the extent to which the larger fleet would have increased TWA's profits.

A. *Fleet Size.*

All the issues raised with respect to the decrease in the size of TWA's fleet attributable to Toolco's mismanagement turn on the conflict between the testimony of Toolco's experts and that of TWA's expert, Wemple, of Coverdale & Colpitts, who prepared and gave testimony concerning two reports estimating damages, assuming TWA had received the full reconstructed 63-jet fleet on schedule, rather than 47 jets late. As we have said, Brownell rejected one report, the Comparative Profits Study, but accepted entirely the calculations of the other, which we will refer to as the Wemple study. To rebut the Wemple study, Toolco introduced a report by Simat of Simat, Hellieson & Eichner, Inc., which Brownell rejected in its entirety.

According to the evidence accepted by Brownell, the six Boeings were diverted to Pan Am between November 5, 1959 and June 8, 1960 (they would otherwise have been received by TWA between July 19, 1959 and May 9, 1960). The ten Convairs were to be received between December 1959 and September 1960. On March 5, 1959, Toolco told TWA that it would not receive the Convairs. Six were then diverted to Northeast (and in 1963 repurchased by TWA). The other four were retained for a time by Toolco, then sold to Northeast (and never bought by TWA).

Brownell accepted Wemple's estimates that the Convair diversions resulted in the loss to TWA of the use of 5.1 planes in 1960, 9.9 planes in 1961, the 10 planes in 1962, and 7.9 planes in 1963. The six Boeings, unlike the Convairs, were suitable for international as well as domestic use. Brownell accepted Wemple's conclusion that their diversion resulted in a loss to TWA of use of the following quantities of planes in the stated years, for international and domestic use:

	International	*Domestic*	*Total*
1959	0.2	none	0.2
1960	3.6	1.4	5.0
1961	3.7	2.2	5.9
1962	4.8	1.0	5.8
1963	0.9	0.5	1.4

The markedly lower figures in each category for 1963 reflect the purchase by TWA in that year of the six diverted Convairs and the lease for use in 1962 and 1963 of five Boeing B-331B's (as substitutes for the diverted B-331's).

Brownell also accepted Wemple's testimony that even if it had received its full 63-jet fleet on schedule, TWA would still have leased, as it in fact did, four B-720B aircraft (a

medium range late model Boeing) during 1961-62 and would also have purchased 18 additional B-131B fan jets in 1962. Thus, these purchases were not considered as mitigating the damage caused by Toolco's diversions.

Toolco argues that there is no justification for Brownell's refusal to consider the purchase and lease of these B-720B's and B-131B's as at least partially mitigating damages. Alternatively, it contends that there is no support for the conclusion that any deficiency in TWA's fleet existing in 1959-60 as a result of Toolco's diversions, could have had effects that lingered for four years, into 1963, three years after Toolco relinquished control of TWA. Rather, Toolco insists, at least by 1962 and 1963 any deficiencies in the TWA jet fleet must be attributed either to TWA's business judgment that investment in replacements was not economically justified (thus there could have been no damage resulting from the earlier diversions) or to TWA's unjustified refusal to mitigate damages. The cumulative thrust of this pincer argument is that if TWA would have profited, as Brownell found, from the lost jets, why did not TWA replace them? If it would not have profited, there can be no damages.

We find Wemple's testimony that the B-131B purchases and the B-720B leases did not represent "substitutes" for the lost jets justified by several considerations. First, these assumptions were based on Wemple's background of expertise, and there is no basis in the record for finding they were dictated by TWA's counsel, as Toolco maintains. Second, no airline which commenced using commercial jets in the period during which damages were assessed stood pat and remained contented with its originally acquired fleet during that time. Thus, between 1960 and 1963, Pan Am increased its jet fleet from 38 to 64; United

from 34 to 91; and American from 25 to 73 jets. It is entirely reasonable and appropriate to assume TWA would also have expanded its fleet. Thus, it was not for the Master to conclude that the damages caused by the diversions had been entirely mitigated as soon as TWA acquired a fleet of 63 jets, as it did during 1962. It was not until 1963, the last year for which damages were assessed, that TWA obtained a fleet comparable to the 63 jets it should have had in 1959-60, plus those that it acquired in the meantime. Moreover, the transcontinental but not international-range B-131s may not have been an effective substitute for either the lost intercontinental-range B-331's or the diverted intermediate range Convairs. Finally, we note that Toolco failed to present a single expert witness to challenge the claim that the interim acquisitions did not mitigate damages, or to present an alternative assumption; indeed, Simat, Toolco's own expert, relied on Wemple's contention in this respect.

In support of its claim that TWA failed to mitigate damages, Toolco specifically cites (1) TWA's termination of the B-720B leases in 1962; (2) the decision of a Flight Equipment Committee appointed by TWA in 1961 to lease *only* four B-720B's, instead of six, as recommended by Rummel; (3) a reduction in its order of the B-131B's from an original 20 to only 18 actually purchased in 1962; and (4) its refusal in 1961 to buy the four CV-880's retained by Toolco which were ultimately sold to Northeast.

It is sufficient response to the latter contention to note that the complaint alleges that Toolco offered the CV-880's only on the illegal condition that TWA would not buy jets from Boeing, and Toolco has not shown that this contention was not well-pleaded. This adequately explains TWA's refusal to purchase the CV-880's offered by Toolco. More-

over, there is evidence that neither the B-720B's nor the B-131B's were adequate substitutes for the diverted jets, and thus TWA's actions with respect to those planes are not necessarily indicative of its ability and thus of a deliberate refusal to compensate for the diverted aircraft. In any event, the burden of proof to establish failure to mitigate damages was on Toolco, see *Ellerman Lines Ltd.* v. *The President Harding*, 288 F.2d 288, 291 (2d Cir. 1961); *United States* v. *Warsaw Elevator Co.*, 213 F.2d 517, 518-19 (2d Cir. 1954); *United States* v. *Russel Electric*, 250 F. Supp. 2, 20 (S.D.N.Y. 1965), and Toolco failed to demonstrate TWA's financial capability to purchase substitute jets deliverable before 1963, or that any such jets were on the market. There is evidence in the record indicating that the lead time in the purchase of jet-powered aircraft, each of which is tailor-made in many respects for the specific customer, is several years. Finally, a holding, in the face of no evidence to the contrary offered by Toolco, that TWA was financially able in the time immediately after the transfer of control to restock its depleted fleet, would not be consonant with the allegation of ¶53(a) that Hughes's manipulations of TWA had left it financially debilitated.

B. *Lost Profits From Decreased Fleet Size*

Toolco also attacks Wemple's testimony credited by the Special Master, that even if TWA had received all 63 jets, the additional 16 jets would have enjoyed a "load factor" (measure of the number of passengers carried on an average trip) equal to the average load factor for all jets of the same types during the years for which damages were assessed. Toolco's principal argument is that its own expert was correct in (1) considering the probable depressing

effect on demand of introducing new jets into the commercial air flight market and (2) basing his estimates on TWA's specific records of profits for each of its separate jet routes.

But adding 16 planes to the market would have increased overall capacity of domestic American air carriers by only 3.7% at most. It is entirely reasonable to believe that TWA's new, modern jets would have attracted at least as many extra passengers to TWA as might have been lost because of the added capacity. Thus one does not have to strain to recognize that TWA's competitors would have borne a loss of passengers. In any event, the effect hypothesized by Toolco is highly speculative and Toolco has not carried its burden of proof on this score.

Moreover, Toolco's approach of calculating the potential market for the lost planes only by looking at the capacity of each existing TWA route to absorb the new capacity is too rigid and the Master was not clearly in error to reject it. There is no reason to believe TWA could not have arranged its schedules to maximize its profits.

Finally, there is simply no sound reason to accept Simat's assumption that international competitors of TWA would have increased their transatlantic jet flights by four for each flight added by TWA. The Master was justified in rejecting this guesswork.

C. *Accounting Adjustments in the Price Waterhouse Study*

Toolco seeks to challenge certain adjustments made in the Price Waterhouse financial analysis, upon which both parties relied throughout the hearing to show the financial impact on TWA of various competing or alternative assumptions, some of which were ultimately resolved in

favor of TWA, and some in favor of Toolco. Contrary to the claim in Toolco's reply brief, these adjustments were made by Price Waterhouse, not Beigler, who directed the study and testified concerning it. In Plaintiff's Exhibit 50, Biegler merely summarized the adjustments already made by Price Waterhouse and which were previously incorporated in its study. The exhibit included an index of references to the Price Waterhouse study that explained and justified each conclusion. Toolco raised no objections to any of these adjustments before the Special Master, although it had ample time to study the Price Waterhouse report prior to Brownell's decision and in the face of Judge Metzner's clearly expressed and entirely appropriate suggestion that any technical problems that might arise after Toolco had thoroughly scrutinized the report should first be referred to Brownell so that rebuttal evidence could be put in the record. Toolco's failure to do so is inexcusable, particularly in litigation as complex and difficult as this is. It is precluded from raising these issues now since its conduct has denied TWA an opportunity to submit its own evidence on these intricate accounting matters to the Special Master.

In any event, Brownell's acceptance of the adjustments relied on by both parties and to which no objections were made can hardly be assigned as plain error unless the defect is patent and obvious on the face of the report. We find none of the adjustments complained of clearly erroneous, and indeed most, if not all, seem clearly justified as reflecting reasonable accounting procedures.

VIII.

In its May 3, 1963 order entering the default judgment on TWA's complaint, as we have already noted, the district

court also granted TWA's motion to increase the trebled ad damnum from $105,000,000 to $135,000,000. Toolco assigns this as error under F.R.Civ.P. 54(c), which provides that "a judgment by default shall not . . . exceed in amount that prayed for in the demand for judgment." Although the authorities do not appear to be in agreement and this Circuit has not expressed itself on the question, we are of the view that there is no sound basis for restricting TWA to the precise damages originally sought in a case where damages alleged were unliquidated, and where defendant did not default by non-appearance, but rather because of non-compliance with discovery procedures, and indeed was granted a full trial on the question of damages actually caused by the allegations established by its default. See *Riggs, Ferris & Geer* v. *Lillibridge*, 316 F.2d 60, 62-63 (2d Cir. 1963); *Sarlie* v. *E. L. Bruce Co.*, 265 F. Supp. 371 (S.D.N.Y. 1967); 6 Moore, Federal Practice ¶¶54.61, 55.08 at 1206. Toolco cannot in good conscience complain of any unfairness or surprise, for, as we said in discussing the propriety of the default judgment, at no time has it sought to rectify its refusal to cooperate with the legitimate discovery orders, an act it easily could have performed after Judge Metzner granted the motion to increase the ad damnum. Moreover, at the February 8 hearing, prior to Hughes's non-appearance, TWA clearly announced its intention to apply for an increase in the prayer for damages to the trebled $135 million.

IX.

Judge Metzner awarded attorneys fees to TWA of $7.5 million based on the time expenditure of 56,000 hours and taking into consideration many relevant factors which are each thoroughly discussed in his opinion, 312 F. Supp. 478.

Toolco assigns the award as error largely on the basis that the hourly rate (about $128) is excessive, thus ignoring the unprecedented size of the judgment (the allowance for attorneys fees is less than 6% of the award of damages), the complexity of the proceedings, and the fact that the default judgment was the product of intensive pre-trial activity for two years and was followed by exhaustive appeals and intricate damages proceedings during which Toolco persistently attempted to undo the effects of its own default. In extraordinary litigation such as this, it would be artificial to fix an arbitrary hourly rate without regard to other relevant factors, for example, quality of the representation, the success achieved, and the size of the award. There are no exact formulations of which we are aware, that would require a precise maximum hourly fee to be fixed in a vacuum. Under all the circumstances, especially in view of Judge Metzner's meticulous discussion of the problem, we are unable to say that he exercised his broad discretion in this respect unreasonably. *W. Montague & Co.* v. *Lory*, 193 U.S. 39, 48 (1904); *Hanover Shoe, Inc.* v. *United Shoe Mach. Corp.*, 245 F. Supp. 258, 302 (M.D. Pa. 1965), *vacated on other grounds*, 377 F.2d 776 (3d Cir. 1967), *reversed in part on other grounds*, 392 U.S. 481 (1968).

TWA's Cross-Appeal

The five points raised by TWA on its appeal do not call for more than summary discussion.

X.

Its only objection to Brownell's computation of damages is that he sensibly permitted a deduction from TWA's

damages for the cost of capital that TWA would have incurred if it had independently purchased its 63-jet reconstructed fleet because of interest charges that TWA would have incurred if the necessary capital had been borrowed in 1958-59. The Special Master calculated a somewhat higher interest rate (6.3%) for the Convairs than for the Boeings (6%) because the Convairs under the reconstructed plan would have been delivered later than the Boeings. In arriving at a rate of 6.3%, the Master relied on average interest rates charged to other airlines for similar loans during this period, and indeed paid by TWA itself on its own comparable indebtedness during that period. The 6-6.3% rate is identical to that which TWA's expert Morehouse had computed in a portion of his rejected financing plan which contemplated some additional borrowing, in 1959, supplementing earlier financing in 1955 at lower rates.

In seeking a smaller deduction for interest costs, TWA relies on (1) its Exhibit No. 314, showing interest rates on debts outstanding to various airlines in 1960, but without regard to the times that the debts were incurred or the purposes for which they were incurred; (2) the rejected Comparative Profits Study; and (3) a Price-Waterhouse estimated financing charge premised on the rejected Morehouse report. For the reasons just indicated, each ground asserted is insufficient to establish that Special Master Brownell's adoption of the higher rate was clearly erroneous. In the absence of a viable alternative offered by TWA (and TWA does not contest the rejection of the Morehouse and Comparative Profits studies) the Master properly based his deduction for interest charges on the price of money at the time when financing would normally have been arranged for the 63-jet fleet.

Opinion of the Court of Appeals,
September 1, 1971

XI.

TWA also argues that the interest allowances on the damage award and the judgment itself were incorrect.

TWA contends that it was improperly denied moratory interest as an element of "the damages sustained" by it under Clayton Act §4, 15 U.S.C. §15, to be computed from the time the damages were sustained and trebled to the date of judgment. We agree with the Seventh Circuit's contrary resolution of this issue in *Locklin* v. *Day-Glo Color Corp.*, 429 F.2d 873, 877 (7th Cir. 1970), *cert. denied*, 400 U.S. 1020 (1971). It is reasonable to interpret Congress's silence on the matter as indicating that trebled damages are sufficient penalty and that interest need not be included. See *Rodgers* v. *United States*, 332 U.S. 371 (1947). Moreover, trebled damages will more than adequately compensate TWA for its injuries. *Brooklyn Savings Bank* v. *O'Neil*, 324 U.S. 697 (1945). Thus, there is no inherent policy reason to award moratory interest here and not doing so avoids difficult questions of proof—including highly abstruse inquiries as to proper rates and the time from which interest should run. Since the trebled damage device in any event adequately serves the penal and remedial purposes of the antitrust laws, we believe that it is sounder, absent contrary express Congressional intent, to consider that these difficult and time-consuming inquiries are intended to be avoided.

TWA also urges that interest on the judgment should run from the time the Master filed his report, rather than from the date of the district court's judgment, contrary to the apparently clear language of 28 U.S.C. §1961, which speaks of an award of interest "from the date of the entry of the judgment" and applies by its terms to "any money judgment . . . recovered in a district court." TWA is not,

as it attempts to show, "penalized" in any sense by any delay in judgment occasioned by the court's discretionary referral of the case to a Master. To the contrary, the salutary device of having the highly complex questions in this case heard and analyzed by a Master served to expedite this litigation. TWA cites no authority in point for its position[5] and we perceive no good reason to adopt its novel argument in the face of the plain words of Section 1961.

We do, however, agree with TWA that under New York law, applicable here pursuant to 28 U.S.C. §1961 (interest on the judgment is calculated "at the rate allowed [on such judgments] by State law"), interest on the judgment should be at the rate of 7½% rather than the 6% allowed by Judge Metzner. Under N.Y.C.P.L.R. §5004, interest on money judgments in New York "shall be at the legal rate." When this section was first adopted in 1963, it clearly referred to the rate then set as the maximum allowable interest rate prescribed by Gen. Bus. Law §340 (6%). Section 340 was subsequently superseded by an identical provision codified as §5-501(1) of the N.Y. Gen. Obl. Law. In 1968, that provision was amended to give the State Banking Board discretion to set the maximum rate of interest allowable on loans or their equivalent. The 6% rate was thereafter to prevail only if the Board prescribed

---

5 *Tilghman* v. *Proctor*, 125 U.S. 136 (1888), and other patent cases relied on by TWA do not involve the question of when interest begins to run on a judgment, but rather from when interest *as an element of damages* should be measured. The holding of the cases cited is that interest should run from the date that the fact and amount of damages cease to be "in earnest controversy and of uncertain issue," *id.* at 151, an event marked by the filing of the Master's report. Since we determine that moratory interest is inappropriate here, these cases are inapplicable. In *L. P. Larson, Jr., Co.* v. *Wm. Wrogley, Jr., Co.*, 20 F.2d 830 (7th Cir. 1927), a trademark and unfair competition case, the question at issue was also the time from which interest would be assessed "as an element of damages." *Id.* at 836. See also *Carter Products, Inc.* v. *Colgate-Palmolive Co.*, 214 F. Supp. 383, 417-18 (D. Md. 1963).

no other maximum lending rate. In February, 1969 (the Court's judgment was filed in 1970), the Board prescribed a rate of 7½%.

Ever since the amendment to Section 5-501(1), there has been a lively controversy among New York courts and commentators as to which rate governs money judgments — 6% or the rate set by the Board. The commentator to the C.P.L.R. argued persuasively in 1969 (see N.Y.C.P.L.R. 1970 Supp. at 146-49) that the sounder view was that the Board's rate should prevail, since the purpose of C.P.L.R. §5004 was to set interest on money judgments at the going rate at the time in New York State, and the purpose of amending Section 5-501(1) was to permit that rate to be responsive to changing economic conditions. The commenator saw no need for leaving the rate of interest on judgments rigid after the state had determined that for commercial purposes the rate should be more flexible.

We agree with this reasoning. Toolco relies on our contrary decision in *Caldecott* v. *L. I. Lighting Co.*, 417 F.2d 994 (2d Cir. 1969), where we followed the tentative view of the then highest state court ruling on this question, *Belcher* v. *Kesten*, N.Y.L.J. July 29, 1969, p. 11, col. 7 (Sup. Ct. Queens County). Since *Caldecott* was decided by us, the Appellate Division, First Department, has unanimously held in *Rachlin & Co.* v. *Tra-Max, Inc.*, 308 N.Y.S. 2d 153 (March 5, 1970), that the 7½% rate should apply to a money judgment on a claim founded in contract. We see no sound basis for distinguishing contract from tort actions in fixing the appropriate rate of interest on a judgment and since *Rachlin* is presently the most authoritative declaration of New York law interpreting C.P.L.R. §5004, we will modify the judgment of the district court and direct that interest run from the date of the judgment at the rate of 7½%.

XII.

TWA's last contention is that it should be compensated for fees paid to its experts as part of its "cost of suit," 15 U.S.C. §15. This precise issue has long since been decided contrary to TWA's position in this Circuit, *Straus* v. *Victor Talking Machine Co.*, 297 F. Supp. 791 (1924) and TWA has not persuaded us that that decision, or the unanimous host of cases relying on *Straus* in this and other jurisdictions should be overruled. See e.g., *Twentieth Century Fox Film Corp.* v. *Goldwyn*, 328 F.2d 190, 224 (9th Cir. 1964); *Union Carbide & Carbon Corp.* v. *Nisley*, 300 F.2d 561 (10th Cir. 1961), cert. dismissed sub nom. *Wade* v. *Union Carbide & Carbon Corp.*, 371 U.S. 801 (1962); *Farmington Dowel Prods. Co.* v. *Forester Mfg. Co.*, 297 F. Supp. 924 (D. Me.), aff'd and remanded, 421 F.2d 61 (1st Cir. 1969).

The judgment is modified to allow 7½% interest on the judgment. In all other respects, the judgment of the district court is affirmed.

Orders of the Court of Appeals in Dockets No. 34902 and No. 35114, September 28, 1971

Excerpts From Transcript of Deposition of Charles C. Tillinghast

[Docs. 54, 210-211, 216, 221]

[604] By Mr. Davis:

Q. Mr. Tillinghast, let me try to establish a few independent facts, and I would appreciate it if you could answer my questions without feeling the necessity at this time of explaining the reasons for whatever decision may have been made.

I can assure you that you will have a full opportunity to explain anything that was done or was not done.

Isn't it a fact, in accordance with your understanding, that the Tool Company, as a result of the 1960 financing, held a hundred million dollar note of TWA?

A. It is.

Q. And that in connection with that 1960 financing TWA had obligated itself to make an offering to all of its stockholders not later than May 31, 1961 of either a hundred million dollars of debentures or $111 million of debentures, approximately?

A. Yes.

Q. Is it also a fact, in accordance with your understanding, that the Tool Company had obligated itself to subscribe to 78 per cent of such an offering, and to also subscribe to whatever portion the 22 per cent of the [605] stockholders failed to subscribe?

A. Up to a ceiling of $100 million.

Q. Up to a ceiling of $100 million?

A. That's correct.

Q. And that the Tool Company could acquire those new TWA debentures by surrendering all or part of its $100 million note in payment?

A. That is correct.

Q. Is it also a fact that in May 1961 the Tool Company asked TWA to consider a delay in the effective date of a TWA registration statement covering these debentures to be issued?

A. That is correct.

Q. Isn't it also a fact that the board of directors of TWA in fact refused to grant that request for a delay?

A. Yes.

Q. Isn't it also a fact that at that time the financial advisers of TWA, namely, Dillon, Read and others associated with them, advised TWA that it would be unadvisable to grant the request of the Tool Company for an extension of time?

A. It is.

Q. Isn't it also a fact that those financial ad- [606] visers made that recommendation on the ground that such a delay might have an adverse effect on the Boeing financing then contemplated?

A. That is correct.

Q. My understanding is that your conversations with Mr. McCone with respect to what you have testified to this morning took place after that action of the board meeting.

A. Yes.

Q. Isn't it a fact, then, that at the time you were discussing these matters with Mr. McCone the question or the issue as to what might or might not interfere with the Boeing financing was uppermost in your mind?

A. That was certainly one of the things that was uppermost in my mind when I was talking with Mr. McCone, yes.

Q. Now I am going to ask you if your recollection has been refreshed as to whether or not in your conversations with Mr. McCone, when you were discussing the desirability

or lack of desirability to "bail out the Hughes Tool Company," or whatever, the Boeing financing was very much on your mind?

A. Oh, yes, quite.

Q. Isn't that one of the reasons you gave to Mr. [607] McCone as to why it seemed to you that it would be undesirable to consider the 990 program?

A. I think it probably was, Mr. Davis, yes.

Q. And that it was discussed in the course of these communications relating to the decision that should be made?

A. Yes.

Q. Had you occasion to discuss with any of the lending institutions involved, or their representatives, what would adversely affect their financing commitment or arrangements?

A. At what time, Mr. Davis?

Q. I am still referring to that same period of time of from May 15th, if you please, to June 10th, but before the receipt of the three proposals reflected by Defendants' Exhibit 10. Let's make it June 8th, if you please.

A. Except to the extent that I may have discussed the matter with Mr. Sessel, the answer is no, I did not discuss it with the financing institutions.

Q. Isn't it also true that during that period you discussed with Mr. Breech the things which in your judgment or in his judgment might adversely affect this Boeing financing?

[608] A. I am sure I did.

Q. Did either Mr. McCone or Mr. Breech suggest to you that it would be desirable to investigate by communicating with the principal officers of the major participants in this lending institution group the question as to whether or not it would or would not adversely affect the Boeing financing?

A. Again making an exception in the case of Mr. Sessel, the answer is no.

Q. You understand my question was not what you did, but whether either Mr. McCone or Mr. Breech suggested your doing something or investigating?

A. My answer is that I don't think that they did suggest that.

Q. Did I understand your prior answer, when you said with the exception of Mr. Sessel, to say that they suggested Mr. Sessel?

A. I don't think that they suggested that I talk with Mr. Sessel. As you know, Mr. Davis, Mr. Sessel is a member of the board of directors of TWA, and in his capacity as a director, I am sure that I discussed this matter with him at the board meeting on the 17th, if not perhaps before that. I am not sure at the moment. I am quite sure that Mr. Sessel expressed [609] the view that it would be a mistake, so far as the financial institutions were concerned, to get into a 990 negotiation with Hughes Tool Company.

Q. Before we come to your conference with Mr. Sessel, I am interested in pursuing what took place between you and Mr. McCone or you and Mr. Breech, and my question to you is are you quite certain that neither of them suggested that you discuss the matter directly with a representative of the lending institutions?

A. I am quite sure that they made no suggestion. If they did, I have absolutely no recollection of it at the moment.

Q. I understand that Mr. McCone also, in the course of those conversations, suggested the possibility of reducing the Boeing order in part?

A. Yes.

Q. At the time that he made that suggestion, did you say to him, "But if we do that, that will change the amount of the financing arrangements that we have made with the lending institutions"?

A. No, I am sure I didn't say that.

Q. What did you say?

A. As I recall it, Mr. Davis, what I told him was that I thought that it would be uneconomical to try to [610] have, for example, half Boeings and half Convairs, that the operating—well, the operating lack of economy of relatively small fleets was very great, that from a standpoint of flexibility we would be far better off to have a homogenous fleet, and that quite apart from the problem of getting into possible endless negotiations with respect to the 990, and leaving the whole program in suspense, that I did not think it made sense, from an operating standpoint, to try to mix the two.

Q. You consider a fleet of 13 jets a very small fleet?

A. I don't know that I would say very small, but it is too small, in our opinion, to be effective from an operating standpoint.

Q. At that time, and I am referring to the time when you were having these conversations with Mr. McCone, you had already made studies investigating the operational advantages or disadvantages of 990s vs. Boeings or a combination of the two?

A. Oh, yes. Prior to the time that I came with TWA Mr. Rummel's department had made a very extensive investigation of this subject, and had come up with a recommendation with which you are familiar, and from the time that this question was first raised by you, I [611] had a number of discussions, repeated discussions, with Mr. Rummel on the subject, asking him to review the question and let me know whether anything that had happened changed, in any regard, his opinion.

Q. You are now referring to conversations you had with Mr. Rummel after you commenced to hear from me. I understand we are talking after May 26th, but I am still

referring to the period when you were discussing this matter with Mr. McCone, namely, from the time you received the May 26th letter and June 8th.

Are you addressing yourself to that period of time in your answer?

A. Yes. I had repeated discussions with Mr. Rummel about this.

Q. You discussed with Mr. Rummel, during that period of time, his views as to the possibility of a mixed fleet; is that correct?

A. Well, I can't say definitely, Mr. Davis, that I discussed that specifically between the 26th of May and the 10th of June. But in this general period I discussed it with him several times, and was quite familiar with his views on the subject.

Q. I understand that, Mr. Tillinghast. I am trying to ascertain what was the basis for the statements or [612] contentions that you were making in your conversation with Mr. McCone.

A. Well, at the time that I talked with Mr. McCone and made this statement I was quite familiar already with Mr. Rummel's views on this particular subject.

Q. They had been discussed, then, before May 26th?

A. Oh, yes.

Q. Was it before or after that Mr. Breech suggested to you that you should not involve yourself personally in this equipment problem?

A. That was some time prior to my visit to Seattle on the 25th and 26th of May.

Q. Let me understand. You went to Seattle the 25th or 26th of May?

A. I went in the afternoon of the 25th, and was there that evening and on the 26th.

Q. In connection with your visit to Seattle Mr. Breech had occasion to comment that he did not think it was desirable for you to become personally involved in the equipment selection; isn't that correct?

A. That is correct.

Q. Am I to understand, then, that between May 25th or 26th and June 8th you nevertheless pursued this question with Mr. Rummel so as to put you in a position to [613] make the remarks and comments you made to Mr. McCone?

A. That is not correct, Mr. Davis. I had been pursuing this question with Mr. Rummel since the 30th of March.

Q. What question had you been pursuing with Mr. Rummel since the 30th of March?

A. The equipment question generally, and what equipment TWA should select.

Q. In those discussions with Mr. Rummel you also discussed the 990s?

A. Yes. Mr. Rummel's study discussed 990s and several other different types of ships.

[614] Q. Was that on the basis that TWA was possibly interested in 990s, or expected to order some, or what was the nature of your conversation that you had from March 30th on with Mr. Rummel as to the 990s in relationship to the equipment program of TWA?

A. Well, Mr. Davis, your question is a little diffuse, but let me start.

I first talked with Mr. Rummel, I believe, on the 30th of March, at which time I think he gave me, although I may have had it a couple of days before that, his study on the 1961 equipment program, and from that time in March up to the time that you are speaking about I had a number of conversations with Mr. Rummel, as well as others, about this problem, because it obviously was a very major ques-

tion, and one that was going to come to a head very, very quickly.

Mr. Rummel's study, covered a number of different ships of the general sort in which TWA might be interested, and among others. This study covered 880s, 880Ms, and 990s. Whether or not the study itself mentions that Hughes Tool Company had some 990s on order, or whether Mr. Rummel told me that orally, I cannot at this moment recall. But early in the game I knew that one of the alternatives [615] that was under consideration was the 990. As a consequence, again early in the game, I had discussed with Mr. Rummel the pros and cons of the 990, and in particular the pros and cons of the thirteen 990s which were under order by Hughes Tool Company.

Does that answer your question?

Q. In part.

I believe you decided to become chief executive on March 20th?

A. That's correct.

Q. One of the things you immediately began to instruct yourself about, to obtain information, on becoming chief executive officer was this equipment program of TWA?

A. That was one of the things.

Q. You had a great many other things to do?

A. I did, an exceedingly great number of things to do.

Q. You reviewed with Mr. Rummel the studies he had made previous to your becoming a chief executive officer?

A. That's correct.

Q. You weren't reviewing with him studies which he had undertaken pursuant to your request?

[616] A. No. This had all been begun before I joined the company, or before I agreed to join the company.

Q. This was a discussion you had with Mr. Rummel based upon some written reports that Mr. Rummel had got-

ten up, or programs, or presentations?

A. This is a specific study, Mr. Davis, with which I think you happen to be familiar.

Q. I don't happen to be familiar with it, but whether I am or not, for the record, will you please answer my question.

A. It is a specific study, entitled, as I recall it, "1961 Equipment Program."

Q. Can you tell us about how much time you spent with Mr. Rummel studying this program?

A. When?

Q. At the time that you first began to discuss this matter with Mr. Rummel, and up to the period we are talking about, which is either May 26th or June 8th?

A. Well, in the aggregate, by June 8th I had probably, oh, spent an aggregate of, I would guess, 10 or 15 hours discussing the thing with Mr. Rummel, and I had spent considerable additional time reading the report and studying the report.

[617] Q. When was the decision made that the Boeing aircraft was the best suited or more desirable from TWA's point of view?

A. The decision made by whom?

Q. TWA.

A. Well, if you mean when was the decision made by the board of directors, the decision was made by the board of directors at their meeting in Kansas City on, I believe, the 27th of April.

Q. No, I am not referring to a decision by the board of directors. I mean the decision or the recommendation which resulted in a recommendation to the board for action. I am referring to the conclusion. When was the conclusion reached, so far as you were concerned?

A. So far as I was concerned?

Q. Yes.

A. Shortly before the meeting of the 27th.

Q. Of which month?

A. April.

Q. During this period between March 30th and April 27th you considered the possibility of 990s as well as Boeings, is that correct?

A. That's correct.

[618] Q. Did you also consider, during that period, the possibility of a mixed fleet?

A. There was some talk of it, yes.

Q. What do you mean by "some talk"? Can you identify the talk, and with whom?

A. I can't identify it specifically, Mr. Davis. I imagine I must have talked with Mr. Rummel. I am sure that it was discussed with him. On the 17th—

Q. Which month?

A. (Continuing) —of April, the first day that I took office, as I recall it, the afternoon was devoted to an equipment meeting which included Mr. Rummel, Mr. Cocke, Mr. Rourke, Mr. Fellows. I can't remember for certain—no, it didn't include Mr. Hall. I think it may have included Mr. Dunn. I am not positive.

Q. Let me ask you this: Did Mr. Rummel have occasion to review or revise this original report that he had and which you discussed with him shortly after you became chief executive officer?

A. Not that I can recall. Certainly not to any significant extent.

Q. So far as you were concerned, then, the recommendation which was made to the board, which was [619] decided upon on or about April 17th—

A. April 27th.

Q. That was board action?

A. Board action.

Q. I understand that the conclusion as to the recommendation to be made was made on or about the 17th, or shortly before the 17th.

Mr. Sonnett: What he testified to was shortly before the 27th.

Mr. Davis: I understand that. Then he found that was based upon some meeting that was held on the 17th.

Q. What are the facts, anyway, Mr. Tillinghast?

A. The facts are these, Mr. Davis, if that is what you want: The recommendation by the TWA operating people had already been reached before I came with the company. Obviously this was a matter of such great significance and importance that I wanted to review this recommendation, this conclusion that had already been reached, so prior to coming with the company I talked with Mr. Rummel, I read the equipment proposal, and the first day that I was there I had a meeting in the afternoon for the purpose of having a broader discussion of this to see myself as to whether I was [620] prepared to adopt this program and recommend it to the board at its meeting ten days later.

Q. If I understand your testimony, the operating people had already made up their own mind and made a recommendation before you became chief executive officer?

A. That's correct.

Q. Then you felt that you as chief executive officer ought to review it?

A. That's correct.

Q. As a result of the review that you made of it you subsequently recommended it to the board on April 27th?

A. Yes.

Q. What you recommended to the board on April 27th was, in substance, the recommendation of this operating personnel group, is that correct?

A. Yes.

Q. So what was recommended to the board on April 27th was, in effect, the conclusion reached by the operating people of TWA before you became chief executive?

A. That's correct.

Q. Do you know whether or not that was a program [621] or conclusion that was prepared by the operating people at TWA at the direction—at whose direction was that program or study made prior to your becoming chief executive officer, do you know?

A. Well, I can't be altogether positive about that. I believe that Mr. Rummel's department generated the study on its own, and that that study was brought by Mr. Rummel's department to a point where some action was required, and at a meeting of the board prior to the time that I took office there had been an equipment committee appointed specifically to deal with this problem.

Q. May I interrupt you by asking you to identify this equipment committee, because up to this point I was thinking everything was being done by this operating committee or operating personnel under Rummel.

A. Well, I can't remember—I can refresh my recollection, but at the moment the only people I can be sure of on that committee were Mr. Leslie, Mr. Cocke—

Q. All operating people?

A. Mr. Pierson, I believe, and I believe there were one or two others, but I can't remember for sure at the moment.

[622] Q. All operating personnel, in a broad sense?

A. I wouldn't guarantee that.

Q. Mr. Sessel?

A. There may have been an outside director on the committee. I just can't recall at this point.

Q. Mr. Sessel, perhaps?

A. I doubt—

Q. Mr. Breech?

A. No, I am sure Mr. Breech wasn't on that committee.

Q. When you were reviewing these recommendations did anyone of any importance or significance, or whose views would be material—

A. My recollection is that it consisted mainly of the inside directors.

Q. Inside directors or inside employees?

A. Inside directors; Mr. Leslie, Mr. Cocke, Mr. Hall. But there may have been one or two outside directors on it. I would have to refresh my recollection to be sure, Mr. Davis.

Q. So this was an equipment program which had been generated by this personnel at TWA at a time when TWA was without a voting trust—is that your understanding of the facts?

[623] A. No. I think it started before there was a voting trust, and ended after there was a voting trust, because the study itself was dated in March. I think maybe March 10th was the date of the study, and it is obviously the sort of study that had taken quite a time to prepare, and I believe, although I can't state positively, that it was commenced sometime in the latter part of 1960, and reached fruition in the early part of 1961.

Q. But so far as you know, the new management group or the new people in control of TWA had not impinged upon the study, they hadn't influenced it in any way, had they?

A. The new management people, you say?

[624] Q. Yes, the new persons who had acquired control of TWA.

A. Well, there weren't any new people in management, Mr. Davis, until I came in.

Q. What I am trying to say, Mr. Tillinghast, is the people who acquired control of TWA as a result of the voting trust did not exercise any influence or direction which is reflected by this study or report?

A. To my knowledge, Mr. Davis, neither the voting trustees nor the new directors stimulated, generated or directed the preparation of this study.

Q. You, some time shortly after March 30th, discussed this report with Mr. Rummel?

A. The first time was on March 30th, I believe.

Q. At that time the report was fairly well completed, but you wanted to review it before submitting it to the board; is that correct?

A. At that time the report was completed.

Q. That report contained an evaluation of the 990s?

A. It did.

Q. Did it also contain a comparison between the 990 and what Boeing had to offer?

A. It did.

Q. Am I to understand that it concluded that [625] the Boeing was more desirable?

A. It did.

Q. You had occasion of discussing with Mr. Rummel the nature and extent to which 990s might be available to TWA if the decision in fact was to take 990s?

A. Yes.

Q. Can you describe to me a little what was said at that time between you and Mr. Rummel or with respect to the availability or lack of availabilty or probable availability of the 990s?

A. What I was told, Mr. Davis, and I can't tie this to a specific discussion, but what I was told was that Hughes

Tool Company had some 990s on order, that they possibly would be available, that whether or not they would be available, and if so on what terms, wasn't definitely known.

However, Hughes Tool had some delivery positions which would be attractive if one were going to acquire 990s.

The 990s were in American Airlines' cockpit configuration, and if the 990s were purchased there would be a problem of delay in delivery and a problem of expense in converting the America cockpit—American [626] Airlines' cockpit configuration to a TWA cockpit configuration, and in that connection Mr. Rummel said that he had several times tried to discuss this question with Mr. Hughes because it seemed clear to him that if these planes were intended for TWA, and if TWA were going to take them over, it was important, had been important for a long time, that they be constructed with TWA cockpits and TWA systems rather than with American Airlines' cockpits and systems, but that he had never been able to discuss the matter with Mr. Hughes, and he understood, he had been told by Convair, that Mr. Hughes had given directions that Convair were not to discuss the 990s with him or any of the TWA people.

Q. Is that the full extent of your recollection as to what you discussed with Mr. Rummel relating to the 990s?

A. No, not relating to the 990s. We discussed far more than this relating to the 990s, but I thought your question was directed to the availability of the 990s.

Q. That is what I had in mind.

A. Well, as to the availability of the 990s, this is the substance of—well, I need to add one other [627] thing, that Mr. Rummel expressed the hope that we would not get into a 990 negotiation because he felt that if we did it would be typically long, involved and drawn out, and he felt very deeply that TWA needed planes just as quickly as it could get them, and he was afraid that the whole equipment pro-

gram would be delayed if we got into extensive negotiations on the 990s.

Q. Did he indicate at that time that for the terms and conditions under which the planes were available they would be or could be advantageously used by TWA, assuming that the terms and conditions were not a problem?

A. Mr. Rummel's view throughout was that if we were going to get any planes they ought to be Boeings, and that if we were going to get more planes we ought to get more Boeings so as to have a more homogeneous fleet.

Q. In other words, it was Mr. Rummel's position that it was undesirable from TWA's point of view to consider 990s, irrespective of any question of terms or conditions or delivery schedules?

A. Not entirely, Mr. Davis. I am sure that Mr. Rummel believed, felt—I had this discussion with him [628] at a later time—that there obviously were terms good enough that TWA should be interested in 990s, but they would have involved, as I recall the figure, knocking a million dollars or more off what he assumed computed would be the probable price.

Q. You say you had a discussion with Mr. Rummel at a later time.

Are you still referring to the period from March 30th to April 27th?

A. No, I am not. I am referring to a period in July.

Q. After this litigation started?

A. That's right.

Q. I am interested now in what took place during the period we are talking about.

A. Yes.

Q. Did you have any further conferences or discussions with Mr. Rummel between March 30th and April 17th that is of any consequence, relating to this subject?

A. Yes.

Q. May I call to your attention that your calendar appears to refer to a date on April 21st with Mr. Rummel, but that is the only one, I believe, [629] that we have been able to find.

A. Well, I have the feeling, Mr. Davis, and I may be wrong here, that I had two meetings with Mr. Rummel before I took office.

Q. Before you took office?

A. That's right. I know that I had a meeting with Mr. Rummel and Mr. Fellows, and that may have been this meeting on the 30th or it may have been a meeting the following week that we agreed upon when we met on this date.

I know that when I had the meeting with Mr. Rummel and Mr. Fellows that Mr. Fellows was there to discuss the traffic problem, and at the meeting of which I am speaking, at which Mr. Fellows was present, I had already made a quick review of this document, the equipment program I spoke about, and I was—wanted to have Mr. Fellows there because I understood that he was the man who could best answer the question of if we have all these planes, can we fill them sufficiently with passengers so that we will earn revenue with them, and I wouldn't be positive, but I have the feeling that I had one preliminary meeting with Mr. Rummel and then a meeting with Mr. Rummel and Mr. Fellows before the 17th of April.

[630] Q. Do you recall anything that was said by you or by Mr. Rummel at the subsequent meetings which relate to the availability of the 990s, the desirability of the 990s?

A. Well, I haven't discussed yet the desirability of the 990s.

I have told you, Mr. Davis, about all that I can recall about the availability of the 990s. I haven't testified about the desirability of the 990s.

Q. Did you discuss the desirability? For the purpose of shortening the record, I am not interested, on the desirability, any more than the report shows, by Mr. Rummel, unless you discussed whether or not there should be a change in the report.

Did you discuss any possible change in his report as to desirability of the 990s?

A. No. As a matter of fact, intensive discussions as to the desirability of the 990s didn't arise until some time after the 17th of May, when the controversy with Hughes Tool Company arose.

Q. There had been little or no discussion as to the desirability of the 990s prior to that time?

A. There had been some discussion, but it wasn't intensive discussion.

[631] As I recall it, Mr. Rummel discussed with me why it was that he preferred the Boeing 707 to any of the other ships, and we briefly discussed each of the other ships and its virtues and shortcomings, and why it was that he felt that on balance the 707 was the desirable ship for TWA to buy.

Q. Can you, as briefly as you can, summarize the recommendation that was made to the board of directors on April 27th?

A. Well, the recommendation was that TWA proceed with a program for the purchase of 26 Boeing aircraft, consisting of 20 707-131s and six 707-331s.

Q. Excuse me for interrupting, but to identify, the six Boeing 707-331s are a long-range aircraft primarily used in the international segment?

A. That's the intercontinental version.

Q. The 20 707-131s could be best described as short-range or medium-range jets?

A. Long-range, but not as long as the 331.

Q. Was that the competitor, so to speak, of the 990?

A. I believe that has greater range than the 990.

Q. The 990, in fact, is a shorter range than the 131?

[632] A. It is a little shorter than the 131.

The 131B, and these were both fan engine, the 131B is capable of trans-Atlantic utilization, whereas I do not believe that is true of the 990.

Q. For the purpose of following your testimony, the discussion you had with Mr. Rummel of the 990s versus the Boeing is really a comparison of the 131s of Boeing versus the Convair 990?

A. That's correct. The 990 isn't comparable at all with the 331B. It is broadly comparable with the 131B.

Q. I believe I interrupted you when you were going to summarize the recommendation that was made to the board when you said it was basically to take 20 131Bs and six 331s.

A. Well, that is all I intended to say. That was the recommendation.

Q. Between April 27th and your conversation with Mr. McCone had you had any occasion or opportunity to discuss the matter any further with either Mr. Rummel or Mr. Leslie or Mr. Cocke, and I am now referring to the subject of the desirability or lack of desirability of the 990s, or the nature or extent of the obligation of TWA to the Tool Company.

[633] A. Yes. As a matter of fact, during the period from the 17th of May through the period you have—

Q. June 8th?

A. June 10th.

Q. Prior to the June 10th letter, prior to the date of the June 10th letter, I am saying.

A. Between May 17th and June 10th this subject was a subject of very frequent discussion, and including an afternoon session, Mr. Davis, when you sat with us and stated at considerable length the reasons that you felt or reasons that you felt we should take into account.

Q. Can you identify the date of that meeting?

A. I believe that was the 2nd of June.

Do you confirm that that is right? It is not on my calendar here.

Q. I don't have my calendar with me, but I am willing to accept that. It is, I am told.

My question is was this conversation or series of conversations with Mr. McCone before or after June 2nd.

A. I can't distinctly recall these in relation to June 2nd. I would—my best recollection, Mr. Davis, would be that I had one before June 2nd and another [633A] after June 2nd, because I recall having told Mr. McCone that we either were having or had had a discussion of the specific matter with you.

[634] Q. Were these calls calls that were originated by Mr. McCone to you or from you to Mr. McCone?

A. Most of them originated from Mr. McCone to me.

Q. But during this period in which these conversations took place there were some calls from you to Mr. McCone?

A. Well, I think in every instance it was a case where Mr. McCone had called and I called him back.

Q. Where was Mr. McCone, where did he live or where was his business?

A. Well, his home was in California, his business was in California, but he was in New York a good deal.

Q. These conversations that you have previously described this morning, these were long distance telephone calls, weren't they?

A. At least one of them was. I may have had a telephone conversation with him when he was up at the Waldorf in New York. He made it a habit almost whenever he was in New York to call me up.

Q. This long distance call or calls that you had with Mr. McCone, which were originated by him, as you recall, but probably leaving word that he called, and you called him back—

A. Yes.

Q. (Continuing) —where would he be calling from in [635] California?

A. I can't tell you specifically, Mr. Davis, I would know only that I would receive a slip saying Mr. McCone called, call operator so and so, and my secretary would get him on the phone.

Q. You personally do not know where or how you would go about reaching Mr. McCone by phone without your secretary's assistance?

A. Well, I think I could find—well, I think I could find him without her assistance, but she took care of the problem.

Q. But you don't know where you would be reaching Mr. McCone in connection with these telephone conversations we are talking about, is that your testimony?

A. Well, I don't know specifically. I presume it was at the Joshua Hendy Company.

Q. Where, sir?

A. In Los Angeles.

Q. That is what I was trying to elicit from you.

I understood your testimony this morning to be that in the course of that telephone conversation you took some positive positions with Mr. McCone in connection with what he was urging you to consider or reconsider?

A. I expressed an opinion, yes.

[636] Q. That was based upon what you have described as to what had taken place as to your study of the equipment program that you have just testified about?

A. Well, it was based upon my appraisal of the whole situation.

Q. But specifically, it was based upon your study of the equipment program as programmed by Mr. Rummel and this equipment committee, et cetera, that you just testified about?

A. It included that.

Q. I would like you to describe, if you please, what, if anything, you did following this conversation with Mr. McCone to confirm your conclusions, if you did.

A. You mean to reconfirm—

Q. I may have misunderstood your testimony, the record will show what it was, but I understood it to be as to what you said and what Mr. McCone said with respect to this 990 program, and the desirability of considering bailing out the Tool Company.

A. Mr. Davis, this was the subject of very, very frequent discussion in the office. I was discussing it very frequently with Mr. Rummel and Mr. Leslie and Mr. Cocke, and I can't recall that as a consequence of this discussion with Mr. McCone I did anything specific.

[637] Q. Did you ever communicate with a representative of the Hughes Tool Company for the purpose of finding out to what extent the Tool Company was prepared to enter into a firm or more definitive commitment that would make 990s available to TWA, or the terms and conditions under which they would be made available?

A. Yes. I wrote you several times about that.

Q. You are referring to letters addressed to me?

A. I guess they were addressed to Mr. Holliday. I stand corrected. I believe they were addressed to Mr. Holliday.

Q. Can you identify those letters more specifically, Mr. Tillinghast?

A. If I had before me the correspondence covering the period from the 17th of April up to the middle of June I am quite sure I could. Also, if I recall correctly, Mr. Davis, at the meeting on the 2nd of June at which you were present I asked that if you wished seriously to pursue this you let us have some very definite terms just as promptly as possible.

Q. Will you produce at our next session your copies of letters to either Mr. Holliday or me or anyone whom you thought was a representative of the Tool Company during this period that you refer to which you have identified [638] or described as inquiries as to the availability or terms of the 990s?

Mr. Sonnett: You will have those, Mr. Davis. It would facilitate it if you produced the originals, and the witness can identify—

Mr. Davis: Mr. Sonnett, I cannot identify the letters from the witness' testimony. I do not know what letters he thinks constitute that kind of request. Quite frankly, I believe that I am fairly familiar with that correspondence. I must say I have never thought about it in quite this connection. We have been furnished with a great mass of material, to be sure. It would be very burdensome for us to try to identify what Mr. Tillinghast is talking about. I think that we will move more rapidly, since Mr. Tillinghast knows what he is talking about, he knows the letters he has in mind.

I am sure that we left the originals of those documents in Mr. Tillinghast's or TWA's possession, and I am sure

it will be no difficulty whatever, if Mr. Tillinghast is willing, pursuant to your advice, to identify or produce what he has in mind. I am perfectly willing to take in place of a physical production a sufficient identification of the letters [639] so we may find them among the documents supplied to us.

Mr. Sonnett: May I ask the witness a question? Maybe we can facilitate this.

We are dealing with letters written by you to Holliday during what period of time?

Mr. Davis: The record shows that.

Mr. Sonnett: I am sorry. I am just asking the question because I don't have in mind at the moment what the record shows.

The Witness: The period May 17th to, oh, the middle of June.

Mr. Sonnett: Isn't it perfectly simple to get out of your files the letters written by Mr. Tillinghast to Mr. Holliday during that period of time?

Mr. Davis: No, it is not, sir, because Mr. Holliday receives letters in Houston, Texas, he sometimes receives letters addressed to him at the Waldorf, and I probably have copies of them, if he has been efficient, but I still will not know what letters it is Mr. Tillinghast is referring to.

The Witness: If you will produce copies—

Mr. Davis: Mr. Tillinghast, my position is on the record. My only question now is whether you will [640] or will not produce the letters that you have been referring to as constituting what you described, you claimed they constitute.

Mr. Sonnett: Mr. Davis, we will produce them. My only point is I thought you might have them at hand, and it would save time to go ahead with the documents which Mr. Holliday received and which you presumably have.

Mr. Davis: If Mr. Tillinghast is prepared to identify the letters more specifically, we may be able to find them.

Mr. Sonnett: How many letters are we talking about?

The Witness: Oh, I would say, both ways, a dozen or 15 letters, somewhere in that vicinity.

Mr. Davis: May we take a luncheon recess now?

The Witness: I am probably thinking of a few telegrams in between.

Mr. Davis: I would prefer, in this area, Mr. Sonnett, to have the witness satisfied that he is referring to all of such documents, and I do not want to assume the burden of presenting Mr. Tillinghast with what he subsequently may feel is less than a complete reference to him as to the documents he has [641] in mind which supports the testimony he just gave.

Mr. Sonnett: You will have them after the luncheon recess.

Mr. Davis: When would you like to return after lunch? It is now a quarter of 1:00, ten of 1:00.

The Witness: 2:00 o'clock.

Mr. Sonnett: While we are on the scheduling, I still have Rummel and Cocke sitting by.

Mr. Davis: I am sure, as I told you before, Mr. Sonnett, you don't need to keep either of those gentlemen on tap. I will give you full, adequate notice, I believe, as to when we will be finished with Mr. Tillinghast, and when the next person may be expected—

Mr. Sonnett: All right. I want to know if you are now able to tell me when you are going to finish with Mr. Tillinghast.

Mr. Davis: I do not know at this point when I am going to be finished with Mr. Tillinghast, and as soon as I have any indication as to when I may be through, I will so advise you.

Mr. Sonnett: How far in advance do you propose to advise me?

Mr. Davis: As much as I can. How much time [642] would you like to have?

Mr. Sonnett: I would like several days' notice—

Mr. Davis: I will undertake to give you several days' notice before you have to produce the next individual.

Mr. Sonnett: On that assumption, you will need Mr. Tillinghast for tomorrow and Friday.

Mr. Davis: There is no point to making any assumptions like that.

We are now adjourning for lunch.

Mr. Sonnett: You are not telling me whether you want this witness tomorrow morning or not?

Mr. Davis: I will tell you that at 2:00 o'clock this afternoon. The fact of the matter is I am waiting for a communication—

Mr. Sonnett: If you can tell me at 2:00 o'clock, that is fine.

Mr. Davis: I will tell you when I know, and not before.

Mr. Sonnett: The witness will be here.

(Whereupon, at 12:45 p.m. a luncheon recess was taken.)

---

[643] AFTERNOON SESSION

2:05 p.m.

CHARLES C. TILLINGHAST, resumed the stand and testified further as follows:

Mr. Sonnett: Are you ready, Mr. Davis?

Mr. Davis: Yes.

Mr. Sonnett: During the luncheon recess I obtained and now produce two files containing letters from Chester C. Davis at 120 Broadway and Raymond Holliday and others to and from Mr. Tillinghast and TWA, which you asked us to assemble and produce.

I have them here and now produce them.

I assume you want to mark them.

Mr. Davis: No. I wish you would hand them to the witness, Mr. Sonnett, if you please.

Mr. Sonnett: I think you ought to mark them before I hand them to the witness, just to identify them.

Would you like to mark them plaintiff's exhibits?

Mr. Davis: No, I am not prepared to mark them as exhibits, Mr. Sonnett.

[644] Mr. Sonnett: I won't show anything to the witness that is not identified on the record by a number.

Mr. Davis: I assure you that I will identify anything which the witness has identified.

The question, Mr. Sonnett, on the record, is, I believe, that I wanted this witness to identify the correspondence which he claimed in his testimony to constitute an effort on his part to determine from the Hughes Tool Company or any of its representatives on what terms and conditions 990s would be available to TWA, and I am not interested at this time in identifying a mass or a file of correspondence.

The question is, I believe, simple enough, and it is merely for Mr. Tillinghast, with the material which is now available to him, to identify, and then I will mark for identification for this record, all letters, telegrams, or other communications, which this witness claims constitute the support for his statement on the record that he made an effort to determine from the Hughes Tool Company or any of its

representatives or from anyone whom he thought was a representative of the [645] Hughes Tool Company, the terms and conditions under which 990 aircraft would be available to TWA.

Mr. Sonnett: Mr. Davis, let me suggest to you the following:

I know you are anxious, as usual, to continue to argue with the witness, but the subject matter of your request was for correspondence to TWA from yourself or Mr. Holliday or others which the witness thought related to interference with—

Mr. Davis: You are referring to a different request, Mr. Sonnett. I am referring to the request I made this morning, and the request I made was wholly unrelated to the request I made for the witness to identify the correspondence which he claimed constituted malicious or wilful interference with the affairs of TWA.

Which request are you now referring to?

Mr. Sonnett: Let me simplify your problem. I thought I was meeting your request. These, after all, are communications written by you, Mr. Davis, or your client, Mr. Holliday, or others of Hughes Tool. You should be very familiar with it.

I thought I was being cooperative in offering you the file of correspondence in this area which [646] you requested. We went to considerable length to get it at this late date for you.

As to the claims of TWA, the claims of TWA are that every document you wrote, Mr. Holliday wrote, was written in furtherance of the conspiracy charged in the complaint.

If you would like to debate the evidentiary weight of every one with me, we will debate it, but I don't propose to have you engage in an argument with the witness about it.

I am producing the documents. Do you want them or don't you?

Mr. Davis: You leave them right where they are.

Mr. Sonnett: You mark these as being produced now and available for inspection as Plaintiff's Exhibits 1 and 2, and then you can do what you like with them.

Mr. Davis: Will you use A and B instead of confusing them with 1 and 2?

Mr. Sonnett: They are plaintiff's exhibits, so I don't think there will be much confusion. We went to a lot of trouble to get these for you, and now you are standoffish about looking at them, [647] even though it is principally communications from you and Mr. Holliday.

Mr. Davis: Of course, Mr. Sonnett, I am not going to take the time to correct every misstatement you make—

Mr. Sonnett: You will never have an opportunity, because I don't make them.

Mr. Davis: I told you ten times that Mr. Holliday is not my client, and you persist in saying that. It is rather typical of your understanding of the facts.

Mr. Sonnett: You represent Hughes Tool Company, don't you?

Mr. Davis: That's right. Your statement a moment ago was I represent Mr. Holliday, and I do not believe that you are not capable of remembering something—

Mr. Sonnett: Is Mr. Holliday an officer of Hughes Tool Company?

Mr. Davis: Mr. Holliday is an officer of Hughes Tool Company. You said this morning you do not represent Mr. Breech. Do you represent every officer and stockholder of TWA?

Mr. Sonnett: I represent each of them, and [648] in that capacity, Mr. Howard Hughes.

Mr. Davis: In that capacity, you are using your best efforts for the Hughes Tool Company?

Mr. Sonnett: Certainly.

Mr. Davis: When the time comes, we will have to find out who you were trying to represent—

Mr. Sonnett: All of the stockholders of the company, Mr. Davis.

Mr. Davis: Will you mark those two files as Plaintiff's Exhibits 1 and 2 as requested, and then I will proceed with my questioning of the witness.

(Group of documents marked Plaintiff's Exhibit 1 for identification, as of this date.)

(Group of documents marked Plaintiff's Exhibit 2 for identification, as of this date.)

Examination (Cont'd) by Mr. Davis:

Q. Mr. Tillinghast, you have before you two files of numerous documents which have been produced by your counsel, and I ask you to identify each communication which supported the statement of yours this morning to the effect that you wrote on numerous occasions to the [649] Hughes Tool Company, or representatives of the Tool Company, with respect to the terms and conditions or the availability of 990s to TWA.

A. Mr. Davis, without admitting the accuracy of your characterization of my former testimony, I leafed quickly through these papers this noon, and my recollection is refreshed that I first raised this question at our meeting on June 2nd, that on June 8, 1961, Mr. Rowe, at my request, wrote a letter drawing attention to the request I made on June 2nd—

Q. Excuse me for interrupting, Mr. Tillinghast, but so there will be no misunderstanding, I want you, with respect

to each document that is in response to my question, I want to have it marked as a defendants' exhibit.

If you please, as you go along, I would appreciate it if you would refer to the letter, have it marked, and then you may make any comment or explanation that you wish with respect to it. It would be helpful if at the same time you could refer to the portion or the portions of any lengthy letter which you characterized as constituting a request for information as to the terms, conditions and availability of the 990s.

Mr. Sonnett: As purely a mechanical [650] suggestion, to avoid further wasting of time, may I suggest that when the witness identifies the date of a letter, and from and to whom, that instead of stopping with the reporter to physically mark it, we deem it marked the next defendants' exhibit. We can physically do the marking at the close of the session.

Mr. Davis: Let us furnish the witness with some paper clips then, so we will not spend too much time in doing that.

Mr. Sonnett: Fine.

Q. Mr. Tillinghast, we will have no objection, if you can, to identifying the portions of a letter if the letter relates to several subjects, so that it will not be necessary for me thereafter to pick up each document and ask you to indicate the portion of the letter which constituted a request within the scope of my question.

A. Mr. Davis, I do not have with me the transcript of the discussion on the 2nd of June.

However, I do have a copy here of Mr. Rowe's letter of June 8, 1961, and in this regard I call your attention to the next to the last paragraph.

Q. Which reads how?

[651] A. Well, it reads as it reads, Mr. Davis, but this particular—one particular part said, speaking of me: "What he clearly said was that if TWA is to consider the acquisition of Convair 990s it has to have a specific, definitive, written statement of the terms on which they would be available, including the question of whether or not Hughes Tool Company would be willing, in effect, to give us a delivery bond and pay us a penalty for every week of delay from the deliveries which you state."

Q. Will you hold that for a second so that we can save time, Mr. Tillinghast? This was a letter dated June 8th?

A. This is a letter dated June 8th.

Q. Written at your request?

A. Written at my request.

Q. Is that the first communication in answer to my question, or are you picking them up as you find them? Is it your recollection that was the first time such a request was made of Hughes Tool Company?

A. No. The first time, as I have said several times, Mr. Davis, was on June 2nd, at the meeting which we had in the board room of TWA, at which you were present.

[652] Q. I have a transcript of that.

A. And of which you have a transcript.

Q. Referring to that comment, is that reference to a bond where you were requesting that the Hughes Tool Company give TWA a bond for the performance by General Dynamics as to delivery dates of the aircraft?

A. That's correct.

Q. The next communication?

A. The next communication is on June 16, 1961, and consists of a letter from me to Mr. Holliday. In the first paragraph 4 of the letter to which I have just referred it

is stated: "It should be noted, however, that you have not even yet advised us of the purchase price of the planes, an obviously essential term. You have also failed to advise us of the form in which Hughes Tool Company would want payment for the assignment of its rights under the purchase agreement, whether in cash or subordinated obligations, or otherwise. These are all facts that in addition to the relative advantages to TWA of the Convair 990s and other equipment must be taken into consideration in weighing your proposal."

Q. This was a letter addressed to Mr. Holliday, replying to the three proposals in the letter of June [652A] 10th, which is Defendants' Exhibit 10?

A. That's correct.

[653] Q. Anything else?

A. That is all that I have discovered so far, Mr. Davis.

Q. Do you have in mind the existence of any other communication?

A. No, I don't have in mind any other communication, Mr. Davis. Perhaps there was a later reference to the subject, but I rather doubt it, and that is as far as I had time to go through the file.

Q. Does that indicate to you that you would like to change your testimony of this morning?

A. No, it does not.

Q. You feel that this morning you fairly described your efforts to obtain information from the Tool Company in the manner that you did?

A. Yes. There were several requests for specific information, none of which, so far as I can recall, was satisfied.

Q. The requests for information you are referring to are those that you have adverted to, including the transcript of what occurred on June 2nd?

A. That's correct.

Q. And that is all that you have in mind?

A. That is all that I have in mind.

[654] Mr. Davis, I have got to change that, because I believe, if I recall correctly, that Mr. Rowe had some oral conversations with you on the subject. I do recall that he was seeking a copy of the contract. He received a copy of the contract, and the price schedule was not attached to it. I believe, as I say, that in addition to what I have referred to here, Mr. Rowe had either correspondence or conversations or both with you on the subject.

Q. You recall, then, that Mr. Rowe, in connection with this letter of his that you have referred to, also asked for a copy of the contract with General Dynamics relating to the 990s?

A. That's correct.

Q. And he received same?

A. He did, minus certain schedules.

Q. Was that request of Mr. Rowe made pursuant to your suggestion or request to him?

A. Yes. I asked him to get the material.

Q. Up to that point TWA had not sought or obtained to seek a copy of the contract with specifications referred to in that contract between General Dynamics and Hughes Tool Company?

[655] A. Well, now, I can't answer that definitely. Whether somebody at some point had tried to get this information and failed, I don't know. The only thing I know for sure is that we didn't have it.

Q. Did you inquire of either Mr. Rummel or Mr. Leslie or Mr. Cocke if they had any information as to the price or how to go about determining the price of such aircraft?

A. I discussed that with Mr. Rummel on several occasions.

Q. I am referring to the time that you were seeking to obtain this detailed information from the Hughes Tool Company so as to be in a position to make a business decision.

A. I just can repeat that I discussed that with Mr. Rummel on several occasions.

Q. What did Mr. Rummel tell you?

A. Mr. Rummel told me that they had guessed at a price computed as best they could what Hughes Tool Company's price would be, but there were several variables in it, and he couldn't tell me either exactly what the Hughes Tool Company price would be or the terms on which we could take an assignment if there was in fact an assignment.

[656] Q. You understand that it is normal under a purchase contract with a manufacturer of aircraft that the exact price is subject to variation based upon events and change orders and various details relating to the aircraft?

A. Yes, I am quite conscious of that.

Q. A moment ago you estimated that the commitment of the Tool Company would be in the neighborhood, as you understood, of $5 million per aircraft, or $65 million for the 13—you remember testifying to that effect?

A. Yes.

Q. Was that estimate on your part based upon what Mr. Rummel had told you in these discussions you had with him?

A. It was.

Q. Have you had occasion to subsequently find out whether or not the estimate of $5 million per aircraft is fairly close to what you would anticipate would be the price for a 990 aircraft?

A. It is my understanding that it is fairly close to what I would anticipate the price of a 990 aircraft to be.

Q. Isn't it also true, Mr. Tillinghast, that in [657] order to determine the desirability of an aircraft you have to consider the cost of the aircraft for the purpose of determining whether its use along various segments of the route of the airplane will permit you to make money or lose money?

A. No doubt about it.

Q. I thought that you also explained that you had very carefully studied, between March 30th and April 27th, a report of the operating personnel that included their recommendations and evaluations of the 990 aircraft.

A. That's correct.

Q. Are you trying to tell me now, Mr. Tillinghast, that these studies made by TWA, evaluating the advantages and disadvantages of 990 versus the Boeing, this was done without any reliable information of any kind as to the cost of such aircraft?

A. It was done without any specific advice from Hughes Tool Company as to the price at which Hughes Tool Company would in fact assign these aircraft to TWA.

Q. But you knew even at that time, even with your short experience in the airline industry, or with TWA, that TWA had traditionally obtained aircraft from the [658] Hughes Tool Company at the Hughes Tool Company's cost?

A. I understood that that had happened on quite a number of occasions.

Q. Wasn't it your understanding that if these aircraft were, pursuant to past practices that Mr. McCone referred to, made available to TWA it would be, presumably, at the actual cost to the Tool Company, a figure which is not determinable until the aircraft are ready for delivery?

A. I did not know, and had no way of knowing, in fact, at what price the Tool Company would make them available.

Q. Am I to understand from your testimony, Mr. Tillinghast, that when you were discussing with Mr. McCone the advantage and lack of advantage of considering bailing out the Tool Company or the desirability of these aircraft you had no idea whatever as to what those aircraft would cost?

A. That is your statement, Mr. Davis, not mine.

Q. I am asking what yours was.

A. No, I had a knowledge of a global figure which 990s should cost. I had no knowledge as to the terms on which Hughes Tool Company would in fact make them available to TWA.

[659] Q. But you knew that the past practice of the Tool Company had been to make them available to TWA at no more than the cost of the Tool Company?

A. I knew in a general way what the past practice was, but I had no way of knowing whether the past practice would in fact be followed in the future, or, in fact, whether Hughes Tool Company would make the planes available.

Q. Mr. Tillinghast, isn't it true that at that time you were concerned in pursuing a financing program with the lending institutions relating to the Boeing aircraft and that is what primarily was on your mind?

A. That is not so, Mr. Davis.

Q. Are you aware of the extent to which Mr. Breech consulted or discussed this matter of additional jet aircraft with Mr. Rummel?

A. Except for discussions at the April 27th directors' meeting, and possibly also at the June directors' meeting, I have no knowledge that Mr. Breech ever discussed the question with Mr. Rummel.

Q. Excuse me for interrupting the train of thought, but it suddenly occurred to me that since your counsel produced these two files of documents marked Plaintiff's [660] Ex-

hibits 1 and 2, intermingling two requests of mine, let me go back for just a moment and ask you now to examine those two files and identify the documents which you previously testified constituted malicious and willful or other kind of interference by Hughes Tool Company or me or any representative of the Tool Company.

As before, I would appreciate it if you would clip the document so that it later may be marked for identification.

Mr. Sonnett: I think I will have to undertake to answer that question, Mr. Davis. It is argumentative.

It is the position of TWA that all communications by you and by Mr. Holliday in this connection were acts in furtherance of the conspiracy and other violations of law charged in the complaint.

Mr. Davis: I appreciate that, Mr. Sonnett.

My question is to the witness. You may direct the witness not to answer if you choose to.

Mr. Sonnett: I advise the witness that your question is argumentative, and therefore does not require an answer.

Q. Mr. Tillinghast, you recall testifying, do you [661] not, that you received and knew of communications by the Tool Company which you characterized as being unwarranted interference with the affairs of TWA—do you recall your testimony in that regard?

A. I recall my testimony in that regard.

Q. Do you also recall testifying that you had reference to dozens of communications and telegrams?

A. I don't think I said dozens, Mr. Davis.

Q. Have you finished your answer?

A. Yes.

Q. Without reference to the number of documents, which I believe you did testify to at one point, let me refer you to page 472 of your testimony. Let me start you, if I may, at page 471, when there was again some discussion between counsel as to the line of that inquiry.

At the bottom of page 471 you, as a witness, said:

> "Mr. Davis, let me say I am referring to all of the letters you wrote, which were very numerous and lengthy and considerable, from the period beginning about the 15th of May and continuing through the period really up to the present."

The next question was:

> [662] "Those are the communications which you feel constitute interference by the Tool Company in the affairs of TWA?
>
> "A. Oh, I didn't say that, Mr. Davis. I think some of the letters were appropriate, perhaps proper statements of position to management, and others were unwarranted interference in management of TWA."

The next question was:

> "Will you identify, if not by exact dates, the letters or the number of letters which you have in mind as letters which you felt constituted unwarranted interference in the affairs of TWA?"

Then, if you will recall, Mr. Tillinghast, just subsequently you felt that they were, on page 473, where your answer was:

> "Well, Mr. Davis, they were so numerous that it would be difficult for me to recall all of them."

You have before you, Mr. Tillinghast, the file prepared by your counsel which purports to include all the letters and communications which your counsel, in support of the complaint, feels constitute unwarranted interference. I am asking you to identify the [662A] communications which you had in mind when you testified as you did.

Mr. Sonnett: Are you through?

[663] Mr. Davis: I have asked a question, Mr. Sonnett.

Mr. Sonnett: You have made various references to what TWA's counsel feels or what these files are supposed to represent in the judgment of TWA's counsel, and you are quite incorrect.

They represent an effort to assemble for you, in response to a belated request, communications from you or Holliday or others acting on behalf of Hughes Tool Company to TWA, and, I think, and I am informed, that they represent all of the written communications that we have in the files.

As to their evidentiary significance, Mr. Davis, this is a matter that the Court is going to have to determine, and I don't propose to have you get into a debate with the witness as to what document proves what.

These are communications that you sent or received or Holliday sent or received. They speak for themselves. The best evidence of what they say is in the documents.

I don't suppose you want to quarrel with the authenticity of these copies, or of the originals, in same cases, bearing your own signature, but it seems to me you are taking an awful lot of time in nagging [664] at a question of let's debate what the documents prove.

If you call the witness' attention to any particular document in the series of communications, you want to ask him any questions about conferences, discussions, or whatever he did or said in response or in connection therewith, go ahead.

By Mr. Davis:

Q. Do you understand my question, Mr. Tillinghast?

A. Yes, I understand your question.

Mr. Davis: May he answer the question, Mr. Sonnett?

Mr. Sonnett: I don't understand the question, myself.

Mr. Davis: Will you read the question back to the witness? I know there was some lapse of time since my question.

Mr. Sonnett: You see, if you put questions without oratory we would be better off. Your reference as to what TWA's counsel intended or thought or believed or how these documents were assembled, was inaccurate. So I had to correct it.

(The question was read.)

Mr. Sonnett: I object to the form of the [665] question and advise the witness not to answer it.

Q. Mr. Tillinghast, will you identify from the material which is before you the letters or communications which you had in mind when you testified as you did at page 471 and 472 of the transcript?

A. Well—

Q. To avoid wasting time, you need not refer to communications which you described as being appropriate. I am interested solely in your identifying those documents

which you felt were unwarranted interference in management of TWA.

A. Well, Mr. Davis, let me first say this, that I think this whole line of correspondence was for the purpose and intent of interfering unduly with TWA's purchase of Boeing aircraft.

But dealing specifically with those letters which affirmatively caused interference, and leaving out the routine ones—

Q. You mean routine letters of interference? I don't want you to leave out anything, Mr. Tillinghast.

A. Then I will have to say, Mr. Davis, that your letter of May 16, 1961, written to the board of directors, saying that you had been retained by Hughes Tool Company in connection with its acquisition and possible distribution of [666] debentures—

Q. Wasn't that a letter by me as a member of the firm of Simpson, Thacher & Bartlett?

A. That's correct, yes.

Q. It was a letter by Simpson, Thacher & Bartlett to the board of directors of TWA, dated May 16th?

A. That's right.

Q. That is one letter that you had in mind as being an interference with TWA—

A. To the extent that it was part of an overall plan to interfere with the purchase of Boeing aircraft, although I suppose the letter, on its face, is, let us say, fairly innocuous and routine.

The letter of May 19, 1961, to the Securities and Exchange Commission, is, in my view, a clear interference with the management of TWA.

Your telegram of May 22, 1961 appears to be routine and harmless.

Q. Likewise, the telegram of May 22, 1961, which merely advises of Simpson, Thacher & Bartlett's withdrawal.

Please clip those. I think it will prevent any possible error by the reporter as he subsequently marks them, so we will be sure the court record will be complete as well as accurate.

[667] Mr. Sonnett: Let's be clear, so we don't have any further needless controversy, you are asking the witness to clip not the telegram from Simpson, Thacher advising of their withdrawal, you are asking him to clip only the ones which he characterizes as overt and clear indications of interference?

Mr. Davis: I am asking him to identify what he was referring to when he testified as he did at the parts in the record that I previously mentioned, Mr. Sonnett, and since in one of his answers he admitted that some of them were appropriate, I am telling him that I am not asking him to identify any communication which he thought was appropriate.

Mr. Sonnett: Okay. All right. Now we understand what you are supposed to do with the paper clips.

Mr. Davis: Whenever you are interested to pursue the subject as to what happened in connection with the withdrawal of Simpson, Thacher & Bartlett or my withdrawal from that firm in order to continue to represent Hughes Tool Company so as to bring out the facts, I will be very happy to pursue that subject either under oath or in appropriate affidavits to the Court.

Mr. Sonnett: Mr. Davis, I know the firm of [668] Simpson, Thacher & Bartlett for many years, and I regard it as an outstanding and very distinguished firm.

A. A letter of May 24, 1961, from Mr. Settles to Mr. Duckworth, which, on its face, is harmless, except in the light of the purpose for which it was written.

The same—well, on May 25, 1961, there is a letter to Mr Hocker of the Securities and Exchange Commission, which I deem to have been for the purpose of delaying the effectiveness of TWA's registration.

On May 25, 1961 there was a letter from Mr. Settles addressed to me, on its face unobjectionable, except for the purpose for which it was written.

The same may be said for the second letter—I will clip the two of them together here—from Mr. Settles as of the same date.

On May 26, 1961 there is a letter from Mr. Davis to the Irving Trust Company, the Equitable Life Assurance Society, Metropolitan Life Insurance Company, the director of Trans World Airlines, and Messrs. Breech, Olds and Holliday, the purpose of which, in my opinion—the purpose and effect of which, in my opinion, was to interfere with the affairs of TWA.

There is a letter dated May 26, 1961, from Mr. [669] Holliday to Mr. Breech, Mr. Olds and Mr. Holliday, which, on its face, appears to be harmless.

There is a letter dated May 26, 1961—

Q. Excuse me. I don't think you finished your last answer.

Mr. Davis: Read back what Mr. Tillinghast said.

(The answer was read.)

Q. Is that what you said, Mr. Tillinghast?

A. Yes.

Q. I am not asking you to identify those that you consider harmless.

A. I am sorry. There is a letter dated May 26th—I will skip that.

Telegram dated May 31, 1961, from Hughes Tool to Boeing Aircraft Company.

Letter dated May 31st—it should be telegram dated June 1, 1961, from Chester C. Davis to Mr. Rowe.

Telegram dated June 2, 1961, from Mr. Holliday to me.

Letter dated June 4, 1961, from Mr. Davis to Mr. Rowe.

Letter dated June 4, 1961, from Mr. Davis to Mr. Olds.

[670] Letter dated June 8, 1961, from Mr. Davis to Mr. Breech.

Letter dated June 9, 1961, from Mr. Holliday to me, which on its face appears harmless, and appears objectionable only so far as it is part of a plan and conspiracy.

A letter from Mr. Holliday to Trans World Airlines, Mr. Breech, Mr. Olds, Mr. Holliday, Irving Trust Company, Equitable Assurance Society, Metropolitan Life Insurance Company.

Q. When you refer to Irving Trust Company, isn't it addressed to Irving Trust Company as agent?

A. Yes, it is.

Mr. Sonnett: You haven't given the date.

A. Dated June 10, 1961.

Q. Is that what has previously been marked as Defendant Exhibit 10 as containing several proposals (handing to witness)?

A. Yes.

Mr. Davis: Actually, the record might show it is addressed to Messrs. Breech, Olds and Holliday as voting trustees.

Mr. Sonnett: From?

Mr. Davis: From Hughes Tool Company, by Mr. Holliday.

[671] Mr. Sonnett: The same Mr. Holliday?

Mr. Davis: Oh, yes.

Mr. Sonnett: Now I understand the true meaning of the song I'm Going To Sit Right Down And Write Myself A Letter.

Mr. Davis: When they do that, please send it COD to Mr. Sonnett, because we don't want to pay for it.

Mr. Sonnett: I will pay for it. It was worth it, Mr. Davis.

[672] A. A telegram dated June 20, 1961, from Mr. Holliday to Mr. Sessel, a copy of which, I think, or a telegram similar to which was sent to each of the other directors.

A letter dated June 21, 1961, from Mr. Holliday to the board of directors of TWA.

A letter from Mr. Davis to Mr. Rowe of June 21, 1961.

Letter from Mr. Settles dated June 27, 1961.

Letter of June 30, 1961, from Mr. Davis to Mr. Reed.

I think that covers the list, Mr. Davis, up to the filing of the complaint.

Mr. Davis: Will the reporter then mark all those documents identified by Mr. Tillinghast as Defendants' Exhibit 11, and each document identified with a letter.

• • • • •

[857] Q. Then I believe you testified that the other occasions that you recall, when you discussed the [858] financial condition or financial problems, as I understood them, of the Tool Company, was in connection with this subordinated debenture offering?

A. Yes.

Q. And that was a discussion at that time that you had with Mr. Leslie?

A. Yes.

Q. What was the occasion for that discussion? Can you give me the substance of what was said?

A. Well, the occasion for the discussion, Mr. Davis, as best I recall it, is that Mr. Leslie came into my office one day and said that he had been talking with a Mr. Forrester whom he knew—I believe they both live in Greenwich—and that Mr. Forrester said that he had been retained just a day or two before in order to handle a proposed public offering of Hughes Tool Company share—secondary offering of the Hughes Tool Company share of our subordinate debentures.

He said that Mr. Forrester wanted to talk with us about a possible delay of the effective date of our offering so as to accommodate this.

I remember saying to Mr. Leslie, or asking Mr. Leslie what did he think this was all about, and did he have any recommendation. He went on to say—

[859] Q. "He," being Leslie?

A. Leslie. He went on to say that he had been associated with Mr. Hughes for years, and knew him like a book, and that one thing he knew about Mr. Hughes was that if he was planning to go across the street to buy a package of cigarettes, that he would say that he was going in the other direction to go to the bathroom.

He said, "You better take a good, hard look at this before you say anything about it."

We discussed why Hughes Tool Company wished to dispose of these. Whether it presaged a decision to sell out its interest in TWA or whether it indicated something else, and without having a very clear recollection in my mind just what he had to say about the details of the Hughes Tool

Company's finances, I do recall that there was some discussion of it at that time.

Q. That offering by TWA was one which was being undertaken pursuant to the agreements entered into in the December 1960 financing, isn't that right?

A. That is correct.

Q. That offering by TWA was not designed to raise any cash by TWA, was it?

A. No, that was merely to re-finance the obligation to Hughes Tool.

[860] Q. The $100 million interim note to Hughes Tool?

A. That is right.

Q. So that the timing of that offering would not result in TWA having any more or less equity money or working capital or cash, isn't that right?

A. That is correct.

Q. Except perhaps to the limited extent to which the Tool Company had an option to subscribe to an additional $11 million-some odd of these debentures?

A. So far as the timing is concerned.

Q. That offering was for $11 million, but only the Tool Company had an option to subscribe to the additional $11 million; isn't that correct?

A. Substantially, yes.

Q. Mr. Leslie discussed with you an approach made to him by Mr. Forrester; is that correct?

A. Right.

Q. Mr. Forrester is a senior executive of Merrill, Lynch, Fenner & Bean; is that correct?

A. He is a member of the firm. I am not sure just what his seniority is.

Q. You never had any reason to doubt the bona fides of Mr. Forrester or Merrill, Lynch, have you?

A. No.

[861] Q. And Mr. Leslie reported to you that apparently the Hughes Tool Company was interested in making a secondary offering?

A. That is correct.

Q. And did that indicate to you that therefore the Hughes Tool Company was interested in effect of realizing some cash?

A. Well, that would indicate that, yes.

Q. Was it your understanding that the Hughes Tool Company had furnished a great deal of cash in connection with the aircraft equipment obtained by TWA as a result of orders placed, or the transactions which took place in 1959 and 1960?

A. Yes, I was aware of that.

Q. And the Tool Company in connection with the 1960 financing, had received this $100 million interim note rather than cash?

A. That is right.

Q. The $100 million note in effect reflected the cash investment made by the Tool Company in connection with the aircraft obtained by TWA?

A. That is my understanding.

Q. And now apparently the Tool Company indicated an interest or desire to get some cash back; is that right?

[862] A. Yes.

Q. And you thought in your discussions with Mr. Leslie that there was some underlying motive of the Tool Company that should be explored?

A. Mr. Leslie raised that question, yes.

Q. That was when Mr. Leslie explained to you that based upon his prior association with Mr. Hughes, he felt that Mr. Hughes was likely to go a long way around to buy a package of cigarettes?

A. Right.

Q. Was there any discussion at that time as to what would the Tool Company do with all this cash if it once got that secondary offering—if it was successful?

A. I think, as I recall it, Mr. Davis, there was some discussion of whether the Tool Company was hard up and really needed this money, and what they would do with it. I don't remember much of the detail of what was said, but I know that general subject was discussed.

Q. I would like you to concentrate on that conversation with Mr. Leslie, if you will, please. I would like you to tell me whether or not in effect there was a discussion with Mr. Leslie speculating as to whether or not the Hughes Tool Company might have in mind a plan for re-financing the TWA debt to the lending institutions?

[863] A. I believe, Mr. Davis, that there was some mention of that possibility.

Q. It was discussed, wasn't it?

A. I believe it was discussed.

Q. That was an important subject to you, was it not?

A. Not terribly, no, sir.

Q. If you recall, when you were hired as president, one of the matters of concern to you—whether you raised the subject or Mr. Breech did—had to do with the possibility of the Tool Company ever being able to re-finance?

A. That is correct.

Q. And here we were in the same year, in May of the same year, and there was a move made by the Tool Company which on the surface at least appeared desirous of producing about $100 million in cash, and you didn't associate the two possibilities at all in your mind, Mr. Tillinghast?

A. Mr. Davis, I am sure that I must have associated the two things in my mind in a broad sense. It has been my feeling, however, that so far as the management of TWA is concerned, its job is to manage TWA—to try to further the interests of the corporation and all of its [864] stockholders—and not be concerned with matters personal to particular stockholders.

Q. I am not inquiring at this point as to your views as to the duties of the management of TWA. I am interested in what took place when Mr. Leslie reported to you that Mr. Forrester had been asked by the Tool Company to develop a program designed to effect a secondary offering which would have given the Tool Company, or replenished the Tool Company with more or less $100 million.

A. I have reported it as best I can, Mr. Davis.

Q. Do you think you have fairly and adequately and fully described your conversation with Mr. Leslie in discussing or speculating as to what Mr. Hughes or the Hughes Tool Company was up to?

A. As best I can recall it at the moment, yes.

Q. Do you have any notes or letters or communications that you made to anyone else which would help you to refresh your recollection?

A. Not on this subject, no.

Q. Do you have any notes, in Defendants' Exhibit 1, your calendar, that would help you to identify about when it was you had this conversation with Mr. Leslie?

A. Yes, I can tell you when it was. If I am not [865] mistaken, it was on the 11th of May, because I believe it was the day before I sat down with Mr. Forrester and some other people to discuss this specific request.

Q. As a result of your conversation with Mr. Leslie, you asked him to arrange for a meeting between you and Mr. Forrester and others?

A. Yes. I believe that the purpose of Mr. Leslie's coming in to my office was in order to say that Mr. Forrester wanted to come up and discuss the matter with me.

Q. You find that entry on May 12th, do you not?

A. That is correct, yes.

Q. And Mr. Leslie spoke to you about that on May 11th, the day before?

A. That is correct.

Q. Before you met with Mr. Forrester, didn't you call Mr. Breech to tell him about the information?

A. No, I am quite sure I called Mr. Breech after I talked with Mr. Forrester.

Q. You mean on the 12th?

A. On the 12th, yes.

Q. Tell us about your meeting with Mr. Forrester on the 12th then.

A. Mr. Forrester came up with his lawyer, Mr. Hagarty.

[866] Q. Of the Sherman, Sterling firm?

A. Yes. We discussed this thing, and he outlined it.

Q. What did he outline to you?

A. He outlined the proposal that they wanted to make.

Q. Who is "they"?

A. Merrill, Lynch—wanted to make for the secondary offering, and their desire to obtain a week's postponement of our offering, in order that they might do a secondary.

I told them that I was very concerned about the fact that we had committed ourselves to the Boeing Company for planes that we had to have our financing completed by the end of the month, by the 31st of May, as I recall it, and that one thing that I had to be concerned about was whether or not a postponement of this might interfere in any way with the consummation of the Boeing program, and the obtaining of the commitments necessary to carry out the Boeing program.

[867] Q. Will you explain at this point your understanding as a chief executive of TWA, what the relationship was of this offering by TWA of these convertible debentures, which would not produce any cash for TWA, the financing arrangements with the lending institutions, which was related to this Boeing purchase program—

Mr. Sonnett: Would you mind reading that back?

(The question was read.)

A. One of the obvious questions in my mind, Mr. Davis, was whether or not if we ran into a serious delay on this, whether or not it might in any way affect our Boeing financing. With that in mind, I talked with Mr. Brandi.

Q. Of Dillon, Read?

A. Yes, to ask him whether in his opinion it would make any difference one way or another to the consummation of the Boeing financing. He said he thought it would. He thought it would be undesirable to get mixed up in anything that would involve a serious sag in the schedule.

For that reason I was very concerned at the time of this meeting with Mr. Forrester to see whether [868] or not he could say anything that would change my judgment.

Q. Let me see if we can get this straightened out in my mind.

A. May I finish?

Q. Please continue.

A. My judgment that it was the most unlikely thing that one could suddenly bring in a third party, and in one week's time turn an offering of this sort into an underwritten public offering.

I specifically taxed Mr. Forrester and Mr. Hagarty with the question of whether or not they could assure me that in fact this could be done, and told them my own limited ex-

perience in the securities field—told me that even under the best circumstances it would be most unlikely that one could do this within that period of time. And I thought if Mr. Hughes was genuine in wishing to make an offering of his interest, that we would extend to him every cooperation on a secondary offering, and indeed the lawyers discussed how by stickering the prospectus, this could be done immediately following our offer.

To come to the end of the discussion, I told Mr. Forrester that I quite appreciated his interest [869] in engaging in this activity, but personally I thought it was an impractical thing to do, and that while it was not a matter on which I wished to make a decision myself without consulting my chairman, in fairness to him I could only say that my recommendation would be that we not postpone our offering, but that we go right ahead with it, and extend to Hughes Tool, if it wished to do so, every courtesy with respect to a secondary offering at an immediately following date.

Q. Is that the end of your answer?

A. That is the end of my answer.

Q. Now let us go back to May 11th, when Mr. Leslie first talked to you. Do you understand?

A. Yes.

Q. That was the first time that you heard of the plan of the Tool Company to make a secondary, is that correct?

A. That is correct.

Q. The next day, the 12th, you met with Mr. Forrester?

A. That is correct.

Q. Am I to understand that between the 11th and the 12th, you consulted with Mr. Brandi of Dillon, Read?

[870] A. That is correct.

Q. In other words, after Mr. Leslie made his report to you to the effect that Mr. Forrester wanted to speak to you—

A. That is right.

Q. You became concerned and sought the advice of someone else?

A. That is correct.

Q. The first thing I want you to explain to me is your concern as a chief executive of TWA, to what was the problem that you envisaged that required you to consult someone.

A. The question in my mind, Mr. Davis, was that raised by Mr. Leslie, and I will have to amplify slightly what I have already testified to.

One thing that Mr. Leslie said in the course of this conversation relative to Mr. Hughes, was that one of the particular proclivities was delaying and trying to get extensions of time, and if you can't get it decided the way you want it now, just postpone it and postpone it.

He raised the question at that time as to whether or not this would be just the beginning of a series of postponements, the net effect of which would be to [871] derail—would be to prevent the consummation of the subordinate debenture financing on the schedule provided, and by that derail the Boeing financing which we had until the 31st of May to complete.

I was naturally very concerned with seeing to it that nothing was done which would prejudice the Boeing financing.

Q. I would like to take this one at a time, Mr. Tillinghast.

A. All right.

Q. The 1960 financing required TWA to make this debenture offering on or before May 31st?

A. Right.

Q. That was an agreement between the Tool Company on the one hand, and TWA on the other, is that correct?

A. Right.

Q. And that financing was not going to produce any cash to TWA—that offering?

A. Not unless we sold more than $100 million.

Q. Whether you sold more than $100 million was solely at the election of the Tool Company?

A. That is right.

Q. Mr. Leslie indicated to you that this request was about to be made on behalf of the Tool Company, on [872] May 11th—that might have the effect of delaying this transaction beyond May 31st, if you granted further and subsequent delays?

A. That is right.

Q. You had a feeling that Mr. Hughes or the Hughes Tool Company would make repeated requests that might delay this offering beyond May 31st? That was your concern, was it not?

A. That is correct.

Q. That would have involved possibly some new agreement or understanding between the Tool Company and TWA, because you had a commitment to do it by May 31st, is that correct?

A. That is correct.

Q. What I am failing to understand is, the relationship between that obligation to the Tool Company and the financing of the Boeing acquisition, that you had been negotiating with the lending institutions.

Can you explain how you, as a chief executive officer—what was concerning you? What relationship was there between a delay in this offering by TWA, and the financing of the Boeing purchase?

A. Mr. Davis, there were really two things that concerned me.

[873] Q. Excuse me for a moment before you answer. I am not interested at this moment what Mr. Brandi told you. I am asking you what was concerning you before you went to see Mr. Brandi.

A. I was concerned about two things. One, whether this was a diversionary tactic.

Q. Diversionary tactic by whom?

A. By Hughes Tool Company.

Q. Diversion from what?

A. An attempt by Hughes Tool Company somehow to interfere with and prevent the consummation of the Boeing deal.

Q. At that point you had not received any letters from anyone from the Tool Company objecting to the Boeing deal?

A. That is correct.

Q. In fact, you hadn't disclosed the proposed Boeing deal to the Tool Company?

A. Yes, we had.

Q. In what way?

A. In the minutes of the directors' meeting, and quite a number of things that Mr. Holliday had received.

Q. You anticipated that the Tool Company might [874] have some views different from or adverse to those held by the TWA management with respect to the Boeing program, is that correct?

A. That question came up in my mind when Mr. Leslie talked with me on the 11th.

Q. And therefore you were suspicious that this move by Mr. Hughes or the Tool Company might be used in what way that would interfere with the Boeing program?

A. As a means of preventing the consummation of the financing that would make the Boeing deal possible.

Q. How could that happen other than possibly the re-financing of the existing indebtedness, you mean?

A. Mr. Davis, that very nearly did happen as a consequence of your efforts.

Q. The re-financing?

A. No, the consummation of the Boeing financing was in fact almost upset as a result of your actions between this time and the two weeks subsequent to that.

Q. I appreciate that. At the moment, however, I am trying to understand how the successful secondary offering by the Tool Company, which would have put into cash $100 million, more or less, how that fact in your judgment, on May 11th, contributed to your feeling [875] that the Tool Company might have some devious plan to interfere with your Boeing program?

A. The secondary offering, the successful secondary offering in and of itself would have presented no problem at all, Mr. Davis. What I was concerned about was that this was not a genuine proposal, and that the effect of granting a week's delay would have been—a week's delay which in my opinion was quite unrealistic.

The effect of that would have been to delay and perhaps prevent the consummation of the subordinate debenture financing, and that if we were mired down in that problem, that the financial institutions would not honor the very informal commitments that we had at that time to go ahead with the financing, and that as a consequence of this, the whole situation would be upset.

Q. I am having difficulty in understanding, Mr. Tillinghast, and I want to give you a full opportunity to explain why you concluded that the possibility which you thought was remote, perhaps, of accomplishment with just a week's delay—why the possibility that the Tool Company

might realize $100 million in cash, would have an adverse effect, or mire you down, or bog you down in your Boeing program.

[876] A. You keep trying to put words in my mouth. I tried to say before that the consummation of the secondary offering by the Hughes Tool Company would not have been any problem whatever.

Indeed, I would have welcomed it. But what I was concerned about was not that we were dealing with a secondary offering, and the realization of money by the Hughes Tool Company, but rather a maneuver which would have the effect of preventing consummation of our offering. And through that would upset and prevent the Boeing financing.

Q. Was there some condition in the negotiations with the lending institutions in connection with this Boeing financing that you had in mind, that would be upset, if for any reason this offering by TWA, which was not going to realize any cash, was delayed beyond May 31st?

A. There was no condition, Mr. Davis. I can only say that the consummation of the secondary financing—I am sorry—the consummation of the debenture offering on the time schedule originally planned was one of the background factors in everyone's contemplation in connection with the financing for the Boeing plans.

I was deeply conscious of the fact that I had [877] expended $850,000, and was committed for $187 million, for which I had to get my financing nailed down, and I wasn't going to do anything that carried with it a serious threat of unhinging that financing.

Q. Mr. Tillinghast, let me lead you a little, if I may. Prior to this additional financing of Boeing, for this $187 million and a half—the amount due the financing institutions was how much?

A. Before this?

Q. Before the Boeing financing, what was the amount due to these lending institutions?

A. I am not sure of the amount actually due at that time, but the amount of the commitment was $165 million, all of which I don't think—

Q. Isn't it true if the Tool Company realized $100 million in the marketplace, that it might be close enough to the goal of refinancing that $165 million?

A. That was certainly a possibility.

Q. And you discussed it?

A. Yes.

Q. It was very important to you that the additional financing with the lending institutions for $147 million be an accomplished fact before the Tool Company could raise a sum of money that conceivably might [878] permit it to refinancing the 1960 debt, isn't that right?

A. No, it is not.

Q. Isn't it true, Mr. Tillinghast, that in February 1961, you discussed with Mr. Breech, the Tool Company would have difficulty in refinancing for additional jet equipment?

A. At the time I talked with Mr. Breech on the 28th, I was concerned with the question as to whether or not I wanted to seriously entertain the possibility of becoming a chief executive of this company. Subsequent to that time, in pursuance of the discussions had at that time, I worked out a contract which I thought put me in a position to call the shots as I saw them, without concern as to whether or not the control of TWA stayed in one place rather than the other.

At the time you speak of, and since that time, I have tried to conduct the affairs of TWA in such a way as not to favor or prejudice any particular stockholder, and I think my job is to call them as I see them, without regard to these things that you are concerned about.

Q. But it is a fact that the May 31st date with respect to the issuance of these debentures by TWA [879] was a time limit [which] had been placed for the benefit of the Tool Company rather than for the benefit of TWA?

A. So far as I know, yes.

Q. So that if there had been a delay beyond May 31st, or if in fact TWA should have consented to delays beyond May 31st, it would have been basically a detriment to the Tool Company rather than TWA?

A. It would have been a detriment to the TWA if it in any way affected the Boeing financing.

Q. The only way in which it could have affected the Boeing financing is that the Tool Company would have had a lot of cash in its pocket?

A. No, it is not, Mr. Davis, and you know a lot better than that.

Q. Isn't it true, Mr. Tillinghast, that it was Mr. Breech who suggested to you that before you took the position you ought to consult with Mr. Brandi of Dillon, Read for expert advice?

A. It is not my recollection. At the moment I don't have any recollection of having talked with Mr. Breech about this until after I talked with Mr. Forrester. Possibly if I did, but if I did, it doesn't stick in my mind.

As I recall it, that was something that Mr. [880] Leslie and I agreed on as the result of this discussion which I have already described.

Q. I am trying to refresh your recollection that the first time you talked to Mr. Brandi of Dillon, Read, was after your first meeting with Mr. Forrester, and after you talked to Mr. Breech, who warned you or suggested to you that before you took a position in this matter, you ought to consult "the financial advisers"?

A. No. As a matter of fact, I talked with Mr. Brandi just before I talked with Mr. Forrester.

Q. On the 12th?

A. On the 12th.

Q. After talking to him on the 11th?

A. I don't think I talked with him on the 11th.

Q. After your conversation with Mr. Leslie?

A. No, I think I talked with Mr. Brandi, so far as I can recall, only on the 12th.

Q. Was that a telephone conversation, a meeting or a conference?

A. It was a meeting in my office.

Q. Who else was there?

A. Mr. Leslie, Mr. Rowe was there, I think.

Q. Mr. Rowe, the general counsel of TWA?

[881] A. Mr. Rowe who sits down there.

Q. Counsel for TWA?

A. Yes. I am trying to remember when he got there. Mr. Reed, I think, was also there.

Q. Of the Hughes, Hubbard firm?

A. Yes.

Q. Counsel for the voting trustees?

A. Yes. At the time of the discussion with Mr. Forrester—and I think he was there at the time of the discussion with Mr. Brandi as well. I think that is the extent of it.

The Special Master: Let us take a five-minute recess.

(Whereupon, a short recess was taken.)

By Mr. Davis:

Q. Mr. Tillinghast, before the recess, you were about to finish to identify the meeting at your office with Dillon, Read, and others. But before you resume at that point, I

overlooked asking you whether at or about that time you had a discussion with Mr. Sessel as to what the plans or purposes or consequences to TWA might be if the Tool Company was able to raise a substantial amount of cash.

A. No, I don't think I did, Mr. Davis. I am [882] quite sure that somewhere within this period, I mean sometime between the 11th of May and the board meeting on the 17th of May, I discussed this with Mr. Sessel, and I know Mr. Sessel was quite concerned that this was a delaying tactic, and should be dealt with as such.

Q. That was between May 11th and May 17th?

A. Yes. I can't tell you exactly when it was in the progression of things, but I know that I discussed the thing with Mr. Sessel, to get his view as to how the banks would react to the thing.

Q. Do you recall more specifically what Mr. Sessel said to you at that time as to what his ideas were of the objectives of the Tool Company, and the plans?

A. No, I don't recall discussing that with him as such. The one thing that sticks in my mind was that Mr. Sessel said not once, but several times, that Hughes always wants time, he wants a week if he can get a week, and if he can't, a day, and if he can't get an hour, he will want half an hour. His view was very definite and strong that if we gave a week's delay, then that would be followed by a request for a further delay and a further delay, and it would be an endless matter.

[883] Q. Did he express the point of view that such delays would be injurious to TWA?

A. Yes, he expressed the view that failure to carry out a consummation of the subordinate debenture offering might raise questions as to what it was all about.

Q. Raise questions in whose mind?

A. The financing institutions' minds, and might prejudice the Boeing financing.

Q. You keep referring to problems being raised in people's minds. It is not clear to me that you have identified to me what problem you had in your mind or you understood them to be referring to, Mr. Tillinghast.

A. I personally was concerned about the fact that we had a very short time within which to finalize our Boeing financing.

Q. I understand that.

A. And I didn't want to do anything that might give anyone any reason or concern for not carrying through with the financing on the basis of the informal commitments given. It was my strongly held view then, as it is now, that when you are dealing in figures of this magnitude, that the sooner you get the thing signed, sealed and delivered, and definitely nailed down, the better off you are.

[884] Q. Do you know who Bob Kerr is?

A. Yes.

Q. Who is he?

A. Mr. Sessel's assistant.

Q. Is he at the Irving Trust?

A. Yes.

Q. Only for the purpose of refreshing your recollection, Mr. Tillinghast, let me refer you to some notes of a telephone conversation between Mr. Kerr and Mr. Gordon of the Bank of America.

Mr. Sonnett: Would you mind marking that and identifying the source, Mr. Davis?

Mr. Davis: I will identify it.

By Mr. Davis:

Q. I want you to look at this, and particularly call to your attention the line which says "Odlum and Bautzer are in New York scurrying around on this matter. Ben thinks only one reason why Hughes wants money—to buy out a voting trust. Crown might come up with balance of money."

That is dated May 16, 1961. Does that refresh you at all as to what Mr. Sessel was in fact saying to you as to what the problems and dangers were?

[885] Mr. Sonnett: Have we identified this document yet?

Mr. Davis: At this moment I merely want to know if this refreshes the witness' recollection. We will get the documents in when we get the Bank of America.

Mr. Sonnett: You have shown something to the witness. It hasn't been marked and identified.

Mr. Davis: I will mark it for identification.

(Transcript of telephone conversation, marked Defendants' Exhibit 22 for identification, as of this date.)

By Mr. Davis:

Q. Now I refer you to Defendants' Exhibit 22 for identification.

Mr. Sonnett: These are notes by who?

The Witness: Mr. Gordon, I gather.

Mr. Davis: Bank of America, Bob Gordon's files.

The Witness: No, it does not.

Q. That was about the time we are now discussing the offering by TWA?

A. Yes, this would have been about the time I talked with Mr. Sessel.

Q. And it is your clear recollection that when you discussed this matter with Mr. Sessel, before the board [886] meeting of the 17th, that this subject, if not in those exact words, but the same subject matter did not come up for discussion?

A. Mr. Davis, it is not my clear recollection that this subject did not come up. My only recollection that is distinct of my discussions with Mr. Sessel was to the effect that he was very concerned about this being a delaying and diversionary tactic, and his feeling that it would be a mistake, and maybe spread some doubt and concern among the financial institutions if we failed to go ahead with the debenture offering within the time required by the original—

Q. How about the possibility of the voting trust terminating—that was important, wasn't it?

A. Not to me.

Q. It wasn't?

A. Not in this context.

Q. Do you think the termination of the voting trust might have adversely affected the financing?

A. I am sure it would have.

Q. When you come right down to it, the interference that might have taken place in the Boeing financing program was that if the Tool Company was able to raise that much money, conceivably they might make an effort to [887] terminate the voting trust, and in turn that would affect the lending institutions, isn't that right?

A. No, Mr. Davis. The only way the voting trust could be terminated would be by buying out the whole financing. My concern was not with that. Indeed we expressed the willingness repeatedly to cooperate in every way—

Q. Expressed willingness to whom, sir?

A. To Mr. Forrester, and it seems to me to other people, but I know particularly in the case of Mr. Forrester, and I will stick with him. We repeatedly expressed the willingness to cooperate in every way with a secondary offering just as rapidly as the Tool Company wanted to do it, and except for delaying the orderly progression of [our] own financing plans, we did everything we could to cooperate with the Tool Company in anything they wanted to do.

Q. Delaying what financing plans, Mr. Tillinghast?

A. Mr. Davis, I have repeatedly testified to the—the financing that we had to have committed for by the 31st of May.

Q. You are referring to the financing by the lending institutions for the Boeing program?

A. Correct.

Q. And you are saying, as I understand you, that any [888] delay in the offering by TWA of debentures which would not produce any cash to TWA, but which would produce cash to the Tool Company would have an adverse effect on the lending institution?

A. Might have.

Q. And this would be by reason of the possibility that the Tool Company might be in a position to terminate the voting trust?

A. No, those are your words.

Q. Explain in what respects, if you please.

Mr. Sonnett: Explain what?

Q. In what respects would the financing of the Boeing program by the lending institutions be adversely affected because of a delay in the debenture offer by TWA, which was not going to produce any cash to TWA?

Mr. Sonnett: I think this has been answered twice already, but if this is the last time, I won't object to it. I think the witness twice covered the subject matter. What counsel is doing is arguing with the witness.

A. Mr. Davis, at this point we had informal assurances from the executives of the financial institutions that they would recommend to their committees participation in the financing to the extent required. There obviously [889] was a serious question in my mind as to whether any substantial delay or change in the program might have the effect of unhinging some of these informal commitments, and I was not going to take any chances of having the financing of the Boeings, even though the chances might be slight.

I talked with Mr. Brandi, and asked his opinion as to whether or not delaying the debenture offering might have an effect on our financing, and his opinion was yes, it might have a serious effect on it, and on the basis of that I wasn't going to take the chance of having this financing abort, and lose either the program or the down payment of $850,000.

Q. Now, Mr. Tillinghast, let us go to the meeting which you had in your office on the 12th of May. Do you recall you identified Mr. Rowe being there?

A. Yes.

Q. Mr. Leslie?

A. Yes.

Q. Yourself?

A. Yes.

Q. And who else?

A. Mr. Forrester, Mr. Hager, and one other person has come to mind—Mr. Joy, who is an assistant of Mr. Reed.

[890] Q. Prior to that meeting you had a conversation with Mr. Brandi of Dillon, Read?

A. That's correct.

Q. And that was a conversation you had with him over the telephone?

A. That was a conversation in my office.

Q. Prior to the meeting when these other gentlemen arrived?

A. Which other gentlemen?

Q. Mr. Forrester, Mr. Carl Rowe, and these others.

A. It was prior to the arrival of Mr. Forrester and Mr. Hager, but as I recall it, after the arrival of Mr. Rowe and Mr. Reed and Mr. Joy, and Mr. Leslie.

Q. In other words, Mr. Brandi joined you at your offices on May 12th?

A. That's correct.

Q. Before Mr. Forrester and his attorney showed up?

A. Correct.

Q. And you were gathering there ahead of time to discuss what position you would take with Mr. Forrester?

A. Correct.

Q. That was based upon the report made to you by Mr. Leslie the day before?

A. In part based on that.

[891] Q. You had not talked with Forrester between times, had you?

A. No.

Q. Before Mr. Forrester's lawyer arrived, will you describe the substance of what took place insofar as it relates to the subject under discussion, namely, the position of TWA with respect to Mr. Forrester's anticipated request?

A. Yes. We discussed the subject with Mr. Brandi, and said that we were presented with this request, and we would like his views on the position that we should take.

I said that I was particularly concerned with one thing, and that is that we had this big program, and to me a very important program in midstream. I wanted to assure myself that nothing that was done in this regard might in any way prejudice the consummation of our financing with the financial institutions.

I said my own limited experience in the securities field made it seem to me a little unrealistic about effecting all of the things that would have to be affected within a week's time. I said even under the best of circumstances, with somebody who had a greater reputation than Mr. Hughes for being easy to negotiate with, I thought this was a tremendously ambitious schedule, and [892] that I personally doubted it could be effected within that period of time.

I said, "I would like your views as to whether this might have any effect on the financing or not."

He said that he felt that it might have a serious effect on the financing. The financial institutions were willing to make the commitments they had made on the assumption that TWA had achieved a degree of independence, and was free to proceed with programs that it considered to be in the best interest of the company, and that if you got into a situation that dragged on and got bogged down in a controversy of one sort or another, he felt no assurance at all that you could count on the financing continuing to be available, and that his very strong recommendation would be that we not postpone the financing, but go ahead—

Q. You are referring to which financing?

A. The subordinate debenture financing—but go ahead on our predetermined time schedule, and if there was a genuine secondary offering in the wind, that could be handled as such.

Q. Let us take this piecemeal. Prior to this gathering in your office, to your knowledge had anyone told Mr. Brandi what the meeting was about?

[893] A. I believe Mr. Leslie had talked with him.

Q. Mr. Leslie was fully familiar with the nature and details of Mr. Forrester's request?

A. He was the most familiar one, yes. He had talked with Mr. Forrester.

Q. Wasn't the purpose of the meeting to find out from Mr. Forrester what it is exactly that they proposed to do?

A. The purpose of the meeting was for him to explain in as much detail as he cared to exactly what they proposed to do, and to obtain TWA's agreement to a postponement.

Q. Isn't it fair to say that all Mr. Forrester told Mr. Leslie up to that point was that he had been approached by the Tool Company to see if they would undertake some sort of a secondary, and that Mr. Forrester would like to sit down with you, or whoever, and discuss a program?

A. No, I am sure that isn't the case, because I am quite sure that when this first was mentioned to me, the matter of the delay was in the conversation already.

Q. But my question is whether or not it is your testimony that Mr. Forrester discussed in detail what he proposed with Mr. Leslie on the 11th.

[894] A. My impression is that most of what had been discussed—most of what was discussed in my presence on the 12th, already had been discussed with Mr. Leslie.

Q. And it is your understanding that you asked Mr. Leslie to call Mr. Brandi to arrange this meeting, and tell him what it is that Merrill Lynch wanted to do?

A. It is my recollection that I asked Mr. Leslie to get in touch with Dillon, Read, explain the nature of the request, and get their views as to what effect, if any, it would have on the new financing.

Q. And he is the one who arranged for Mr. Brandi meeting at your office the next day, the 12th?

A. I believe so.

Q. You made this suggestion to Mr. Leslie without having heard from Mr. Breech?

A. That is my best recollection. As I recall it at the moment, the first time I talked with Mr. Breech was after I talked with Mr. Forrester.

Q. These gentlemen met in your office before Mr. Forrester and his lawyer arrived?

A. Correct.

Q. At that time there took place the conversation that you described a moment ago?

A. That's correct.

[895] Q. Without having heard what Mr. Forrester and his lawyer had to say?

A. No.

Q. Somebody must have described what Mr. Forrester and his lawyer were proposing. Who did that? Did Mr. Leslie, did you?

A. Mr. Forrester outlined—

Q. I am talking about before Mr. Forrester arrived.

A. Before Mr. Forrester arrived—excuse me, I misunderstood you. Mr. Leslie, in the prior conversation, I believe, outlined what was proposed.

Q. To Mr. Brandi and Mr. Rowe and Mr. Joy, Mr. Reed's associate or partner. Is Mr. Joy a partner of the firm of Hughes, Hubbard?

A. I don't think so, no. I think he is an associate.

Q. At that time, as I understand your prior testimony—but I want you to change it if it is not accurate—Mr. Brandi in effect confirmed your views, or confirmed the view that the lending institutions that made advances to

TWA on the assumption that TWA would maintain a certain degree of independence, I believe you said—

A. That's right.

Q. And if there was anything which might take place to jeopardize that degree of independence, it might have [896] an adverse effect on the Boeing financing?

A. What he said, as I recall it, was that if this degenerated into another Hughes controversy, and it appeared that the company had not achieved the ability to deal objectively with its problems, that it might have a serious effect on the financing.

Q. Mr. Sessel was not there?

A. Mr. Sessel was not there.

Q. So far as you know, how and when was Mr. Sessel first informed about this approach by Merrill Lynch?

A. I can't say. It would have been by Mr. Leslie or myself. Which it was and exactly when it was, I can't recall.

Q. You believe you may have been the one?

A. Possibly, I think it is more likely that it was Mr. Leslie, but it conceivably could have been I.

Q. Before Mr. Forrester and his lawyer arrived, did you or Mr. Leslie, or anyone else at that meeting, suggest that this move by the Hughes Tool Company might be part of a plan to refund or refinance or terminate the voting trust?

A. I don't recall any such discussion, Mr. Davis.

Q. Do you think you would recall it if it had taken place?

[897] A. I think I probably would, but I just don't recall it at this time.

Q. Do you recall with clarity what concepts Mr. Brandi was expressing in suggesting that this discussion by Merrill Lynch might interfere with the Boeing financing?

A. I think I have already testified as fully as I can about that.

Q. You are satisfied that is as full and as clear a description as you are capable of giving us?

A. At this time, yes.

Q. Do you think there is anything you might do to help you refresh your recollection?

A. Not that I can think of, no. If I re-discussed it with everyone present, it undoubtedly would refresh my recollection somewhat, but as I sit here now, that is the best recollection I can give you.

Q. Did this group arrive at some consensus of opinion? Did anyone express a different point of view in that group?

A. No, I think I summed up the meeting by saying that I wasn't prepared to take any reasonable risk of unseating the Boeing financing, and that unless people could give me assurances that that wouldn't happen, that it was going to be my position that we deny the request.

[898] Q. Did Mr. Brandi suggest that perhaps he ought to discuss it with some of the lending institutions or their representatives before giving any firm views?

A. I don't recall any such thing, Mr. Davis.

Q. Do you recall whether or not he telephoned anyone for the purpose of getting some other points of view?

A. He didn't telephone anyone from my office.

Q. Who were the individuals who were negotiating on behalf of the lending institutions, this Boeing financing?

A. I am not sure I know exactly. I think it was Mr. Kerr, so far as the Irving Trust was concerned—either Mr. Keehn or one of his subordinates so far as the Equitable was concerned. I guess it was Jenkins at Metropolitan, and then each of the banks had a representative involved in it. I know Gordon of the Bank of America was one.

Q. You said the senior officer of TWA, negotiating on behalf of TWA, was Mr. Leslie?

A. That's correct.

Q. You did not assume any personal functions in negotiating?

A. That's correct, at this time. On the 29th of May, I very much got into it, but up until that time—

[899] Q. Mr. Leslie had been handling it?

A. Mr. Leslie had been handling it.

Q. To what extent had Dillon, Read been participants?

A. They had been very active participants, I believe, because they were our financial advisers, and they had been very active in the whole thing.

Q. You mean they had been. I don't understand what you mean by saying "they had been your financial advisers."

A. They were our financial advisers at the time.

Q. As a continuation of the 1960 financing?

A. They handled the 1960 financing, and then separately represented us with respect to the 1961 financing.

• • • • •

[914] Q. Was the consummation of the 1961 financing involved, difficult or complex?

A. I would say it wasn't nearly as difficult or complex as I understand the 1960 financing was. It was not, however, without some difficulties and complexities, particularly as things developed in the matter.

Q. Will you describe the nature of the difficulties and complexities that were involved in the 1961 financing, and if you know, to what extent those were complexities and difficulties that did not exist in the 1960 financing.

A. I would say this, Mr. Davis, that one of the problems of the 1961 financing was the fact that at the time I joined TWA, this had pretty well taken form.

Q. The 1961 financing?

[915] A. The 1961 financing had substantially taken form. One of the things that were contemplated was the participation of the Prudential Insurance Company, to the extent, as I recall it, of $39 million.

We had received informal assurances from Mr. Chappelear—

Q. Of the Prudential?

A. Of the Prudential, that he would recommend it, and he felt confident that his committee would go along.

Then as the result of the publicity and controversy that was raised by Hughes Tool Company, the Prudential pulled out of the deal, and we were then faced with the problem of what we would do in order to take up the slack left by the Prudential.

We had various discussions with Dillon, Read. Dillon, Read, I know, spent a substantial amount of time and effort trying to find other insurance companies who would participate in this and take the Prudential's place without success.

Then later on, when it became apparent that the revenue and earnings forecast which had been made in the first part of 1961, in late February or March, I believe, were not being realized, and that TWA would have a cash problem of meeting the payment schedules under the [916] proposed financing, then it became necessary to work out a modification of the deal, and then more recently, as a consequence, let us say failure of the Caravelle program to materialize, it was necessary once again to try to work out with the financial institutions a further modification of the program.

I would say if one looks at it by hindsight, the 1961 financing has been, let us say, more than averagely complicated.

[917] Q. I understood you to say that this fee had been fixed, at least by the time of the board meeting of July 19, 1961?

A. That's correct.

Q. Were you at that time anticipating those complexities that developed in connection with the Caravelle program, which I understood from your prior testimony was around September?

A. No, we certainly didn't anticipate that at that time. In July we were in the middle of what I referred to as the Hughes problems, and the complexities springing from that, both past and potential, were realized at that time.

I would say this fee of $200,000 was, as I recall, the figures in Mr. Leslie's memo, a more or less average fee for an offering or a financing of this size.

Q. What were the complexities of the Hughes problem at that time, namely, prior to July 19, 1961?

A. Well, I don't know how deeply you want me to go into this, Mr. Davis.

Q. As factually as you can.

A. Going back to the period that we were talking about yesterday, when the question was first raised by Mr. Forrester of Hughes Tool Company's desire to have us [918] postpone for a week the offering of the subordinated debentures—

Q. On May 12th or 11th?

A. On May 12th or 11th—on the 17th we had a TWA board of directors meeting, at which time it had been planned to fix the final details of the offering and become effective the next day.

Q. The price amendment to the registration statement?

A. Yes. As you will recall, you appeared for the first time at that directors meeting, and made a rather lengthy statement at the directors meeting, the substance of which was that unless TWA was prepared to agree to the extension that was being requested, you were going to file, or you were going to object on a variety of grounds to the ade-

quacy of the registration statement, and in fact, that same day, if you recall correctly, you sent a letter to the SEC, and we suddenly found ourselves in a highly publicized situation not calculated to make easy the consummation of the financial arrangements.

Q. Excuse me for interrupting you. You are still referring to making difficult the financial arrangement in connection with this convertible debenture issue, all of which was going to go to Hughes Tool Company? Is that the one you are referring to?

[919] A. I wasn't referring primarily to that, but I would include that also.

Q. You are referring to the publicity—

Mr. Sonnett: I object to the witness being interrupted in the middle of an answer which was perfectly responsive to a question, and then Mr. Davis attempting to cut him off before he is through. I think the witness should be allowed to finish the answer which he was in the middle of making when he was once again interrupted by counsel.

The Special Master: Let us try to let him finish his answers.

Mr. Davis: Will you pick up Mr. Tillinghast's answer?

(The record was read.)

By Mr. Davis:

Q. It would help me when you refer to the financial arrangements—when you are referring to financial arrangements for the lending institutions, I wish you would identify it. When you are referring to the financial arrangements relating to the issuance of convertible debentures by TWA, I wish you would refer to that arrangement and when you

are referring to some other financial arrangement, I would appreciate it if you would identify [920] it. I think it would save time in the long run if in your answer you would identify the financial arrangements that you have in mind.

A. (Continuing)—the middle of the following week, the committees of the insurance companies were scheduled to meet, to give committee approval to the tentative arrangement that had been made for the Boeing financing. We learned to our disappointment, I think on Wednesday, the 24th, but I wouldn't be sure within a day or so, that Prudential had withdrawn because the committee would have nothing to do with this situation.

That, of course, presented us with a difficult problem of what to do about our financing, and left us in the position where we had only a week left in which to firm up our financing under the Boeing agreement, and being short at that point $39 million.

Q. Have you finished describing the complexities involved involving Hughes Tool that had a bearing?

A. At this particular point, yes.

Q. You have been referring to the complexities—you had in mind in connection the fixing of the fee of Dillon, Read?

A. Among other things, yes.

Q. In your last answer you referred to the committee—[921] I believe the committee of the insurance companies—reporting they would have nothing to do with the situation? Did you say something to that effect?

A. Yes.

Q. Will you please identify the committee, the insurance company, or whoever was on that committee, and what situation they would have nothing to do with?

A. Mr. Davis, I know this only third or fourth hand.

Q. From whom did you hear?

A. I believe I heard it from Mr. Leslie, and I believe he in turn heard it from Mr. Wadsworth, and I believe Mr. Wadsworth talked with the insurance companies. As it was reported back to me, the Prudential was not satisfied that there might not be some way that the voting trust would be upset, and they didn't want to get into that situation.

As I recall—it was reported to me that Chappalear told Wadsworth that you couldn't re-open this matter with a crowbar.

Q. Did you understand what was meant by saying, "You could not re-open the situation with a crowbar"?

A. There was no point in going back and trying to re-open the matter.

Q. Re-open what matter?

[922] A. The matter of their participation in the financing.

Q. The 1961 financing?

A. Yes, the 1961 financing, Mr. Davis.

Q. Since yesterday, did you have occasion of refreshing your recollection with anyone, particularly with respect to the note I showed you referring to Mr. Sessel and his comment?

A. No, I have not, Mr. Davis.

Q. Did you make an effort to communicate with anyone?

A. No.

Q. You made no effort to refresh your recollection at all as to what transpired in that period beginning about May 11th?

A. I have been turning a number of these things over in my mind trying to refresh my recollection, but I haven't talked with anyone about it.

Q. You didn't call anyone?

A. No.

Q. Mr. Sessel?

A. No.

Q. You weren't surprised at what had been marked Defendants' Exhibit 22, which are the notes from the Bank of America, a telephone conversation presumably made by Mr. Kerr of the Irving Trust? You remember that?

[923] A. Yes.

Q. That did not cause you to inquire of Mr. Sessel whether that was true, or what he meant by it?

A. No.

Q. When was a decision made to refuse to the Tool Company this week's extension, or any extension of time that was being requested through Merrill Lynch?

A. It was made at the board of directors meeting on the 17th, following your appearance at the directors meeting, and the position that you stated there.

Q. Mr. Tillinghast, I don't mean when was a record made of the decision. I am asking you when, in fact, was a decision made by the TWA management.

A. The decision was, in fact, made on the 17th by the board of directors. As I told you yesterday, Mr. Davis, at the time of my discussion with Mr. Forrester, I told Mr. Forrester that I frankly didn't think that it was realistic under the best of circumstances to accomplish this within a week. I didn't think, and he concurred in that, that he or anyone else could give me any assurance that this could be accomplished within a week, and that while it was something that I felt that I would not want to take the responsibility for answering myself, and would want to have my chairman [924] share my decision, I thought in fairness I could only tell him that my recommendation would be that the extension not be granted.

I then called Mr. Breech—

Q. When was this?

A. This was on the 12th. I then called Mr. Breech and explained to him the request that had been made, the discussion that had been had, and said that I didn't want to make a decision in the thing without discussing it with him.

He said that he thought this was a matter that the whole board ought to consider, and that neither he nor I should make a decision.

He said, "Let us plan to take it up at the directors meeting."

In the meantime, we authorized counsel to do some preliminary work, so that further time would not be lost if the board decided that we should grant an extension. The matter, however, was not decided until the board meeting on the 17th, after your appearance at the board meeting.

Q. In other words, Mr. Tillinghast, you are quite sure that as chief executive officer of TWA, the decision to deny this request to the Tool Company was not made by [925] TWA until the board meeting of the 17th of May, and it was made at that meeting?

A. That's correct.

Q. You are quite sure of that?

A. I am quite sure of that.

Q. Would there be anyone else at TWA who could make such a decision without your knowing it?

A. I don't believe so, Mr. Davis.

Q. You had not delegated to anyone else the duty or responsibility of making the inquiry or the decision?

A. No, this decision to the extent that it was a decision would have been made either by me or by the board of directors. As I told Mr. Forrester from the beginning, my own recommendation was against it, and I proposed to take

that position with the board, but no final decision was made until the board meeting.

[926] Q. I understand that you discussed that conclusion with Mr. Breech on the 12th of May, is that right?

A. Yes, I did.

Q. Did you discuss it with any other director of TWA prior to the 17th?

A. I think I probably, although I can't tell you the exact time or circumstances, discussed it with Mr. Sessel sometime before the 17th.

Q. So you discussed it with Mr. Breech and with Mr. Sessel?

A. Yes.

Q. Do you have a recollection of having discussed that decision or recommendation with anyone else?

A. Well, I certainly discussed it with Mr. Leslie, who was a director.

Q. Do you recall when?

A. Well, he was present on the 12th, and undoubtedly discussed it with him sometime between the 12th and the 17th, I am sure.

Q. Any other director that you can recall?

A. Possibly Mr. Cocke.

Q. Mr. Cocke being an officer. I mean with outside directors primarily.

A. At this time, Mr. Davis, I have no recollection [927] of having discussed it with any of the other outside directors. I won't say that it is impossible that I did, but I have no recollection.

Q. You are aware, are you not, that on the morning of the 17th, there was filed with the SEC an amendment to the registration statement, which contained a reference to the fact that TWA had not consented to the delay?

A. Yes.

Q. And that was something which you instructed counsel to do in anticipation of the board action on the 17th, is that correct?

A. Well, I was aware that counsel was doing it, yes.

Q. Were you aware that the statement filed on the morning of the 17th with the SEC contained a statement as to whether or not TWA would or would not grant this delay requested by the Hughes Tool Company?

A. I think at that point the material filed with the SEC just said that we had not agreed to the delay.

Q. So that the language may be clear to you, and without bothering to mark in evidence the public record, let me hand you the registration statement of TWA at that time, and refer you to page 4, so that you may construe the language —at least your understanding of what it means. I think it is the top paragraph, Mr. Tillinghast.

[928] A. Yes.

Q. You construe that to mean merely that TWA had not agreed to grant the request, but still might?

A. I think it speaks for itself, Mr. Davis, that we had not agreed to grant the request.

Q. But so far as you were concerned, no decision had been made to deny or refuse the request?

A. No decision was made until the meeting of the board, Mr. Davis. As I said before, I knew what my own views on the subject were, and what I proposed to urge upon the directors, but no decision was made until the directors' meeting.

Q. Let me refer you to Defendants' Exhibit 22, which you will note purports to be a note from the Bank of America of a telephone conversation with Mr. Kerr of the Irving Trust, with Mr. Gordon. You will note a portion of this reads: "TWA management and board has declined to give

the extension on advice of own investment counsel who say a week won't do."

That was dated May 16th.

Mr. Sonnett: Have you a typed copy of that?

Mr. Davis: No, not of this one.

By Mr. Davis:

Q. Do you see that?

[929] A. Yes.

Q. You see there is no basis whatever for Mr. Kerr or anyone else making such a statement, is there?

A. Mr. Davis, the board hadn't met by this date.

Q. I understand that.

A. I can only assume that Mr. Kerr was predicting what the board was going to do.

Q. You don't think Mr. Kerr was referring to the fact, when Mr. Sessel and Mr. Breech got together, that was a decision?

A. No, I don't think when Mr. Breech and Mr. Sessel got together, that was a decision.

Q. You think when Mr. Breech, Mr. Sessel and you got together, it was a decision?

A. Not in this particular situation.

Mr. Davis: May I have this marked for identification?

(Handwritten notes from Dillon, Read's files, marked Defendants' Exhibit 23 for identification, as of this date.)

Mr. Sonnett: May I read the paragraph you referred to?

Mr. Davis: I am not offering that in evidence now.

[930] Mr. Sonnett: You purported to refer to a paragraph and you incorrectly described the contents of the paragraph. I think the record should describe correctly what the paragraph says.

Mr. Davis: You can read the whole thing into the record. The exhibit will be part of the record, and you have a copy of the document.

Mr. Sonnett: You offered me the opportunity to read it all in the record, and I would like to have it copied. My initial suggestion was to read the one paragraph.

The Special Master: Let us have the one paragraph that the witness was referred to.

Mr. Sonnett: The paragraph reads as follows:

"TWA management and board has declined to give the extension on advice of own investment counsel, who say a week won't do."

By Mr. Davis:

Q. I am going to hand you what has been marked as Defendants' Exhibit 23, Mr. Tillinghast. I represent to you that these are parts of notes that we obtained from the files of Dillon, Read. I believe those to be handwritten notes of Mr. Wadsworth at Dillon, Read. You don't have to be influenced in your answer by reason of [931] what you see on this exhibit. The handwriting may be difficult to read without Mr. Wadsworth, but let me read to you the way I read it.

It is dated June 13, 1961, and presumably refers to—I am suggesting it may refer to a telephone conversation between Mr. Wadsworth and Mr. Sessel.

"Sessel—will be faced with decision. Meeting at Hagarty-Haycock, Keehn, Somers, Olds, Breech and

Sessel. Ecker for a little while. Will lenders continue to be lenders without voting trust in either old credit or new credit."

"Tillinghast will write short lender to lenders." I think it means short letter.

"Answer is no, except not certain on Bank of America. Tillinghast will come to us and ask us whether we could replace present lenders for $165 million plus new financing—$147 million—Boeing."

Then another entry under same date "Attended closing on subordinated debentures."

The next entry dated June 14, 1961 is, "Met with Langmuir, notes attached."

Do you know who Langmuir is?

A. It doesn't mean anything to me.

Q. Perhaps from Prudential?

[932] A. I don't know.

Q. Then a note under the heading of June 15, 1961, "Talked to Leslie. Reported meeting with Langmuir. He advised us of letter he was writng us, and lenders, re: Ability to finance."

You still don't know who Langmuir is?

A. No, I don't.

Q. That, in fact, related to what transpired when TWA received the offer of the Tool Company reflected by its letter of June 10, 1961?

A. That is correct.

Q. It had nothing to do with the subject under discussion, namely, the refusal to delay?

A. This was a month later.

Q. Now continuing with what took place in May, following the meeting with Dillon, Read and Forrester on Friday,

May 12th, did you subsequently receive a written confirmation of the conclusion of that meeting?

A. A written confirmation of the conclusion of the meeting?

Q. Yes.

A. No, not that I would describe as that, Mr. Davis.

Q. What I am referring to is a letter you received from Mr. Brandi. I believe you received it from Mr. [933] Brandi.

A. Oh, yes. Mr. Brandi at my request wrote a letter to have at the board meeting on the 17th.

Mr. Davis: May I have this marked for identification, please?

(Letter dated May 15, 1960 to Mr. Tillinghast from Dillon, Read, marked Defendants' Exhibit 24 for identification, as of this date.)

Mr. Davis: I think I would like to have the record show what has been marked as Defendants' Exhibit 24 was numbered document 88 as part of Defendants' Exhibit 12, as being part of the documents made available to us for the first time on January 31, 1962, which we had never received before.

Mr. Sonnett: If you want to make a point in that connection, I will have to go back and we can have a lot of time wasted to find out whether your statement is correct or not. Apart from the editorial comment, I think you got the piece of paper you have in your hand on January 31st, so you had it for some time. I think the editorial comment only gets us both into colloquy which wastes time and money.

By Mr. Davis:

Q. Mr. Tillinghast, let me hand you Defendants' Ex-
[934] hibit 24, and ask you if you can identify it.

A. Yes, I recognize that letter.

Q. It is a letter you received from Mr. Brandi which referred—confirming the advice they gave you at the meeting of the preceding Friday, namely, May 12th, is that correct?

A. That is correct.

Q. Does this letter accurately confirm the advice that you received on May 12th?

A. It accurately summarizes the advice given orally on the 12th.

Q. Are you now satisfied that in your testimony of yesterday you described all of the reasons given by Dillon, Read for the conclusion reflected by Defendants' Exhibit 24?

A. Repeat that, please.

(The question was read.)

A. Yes.

By Mr. Davis:

Q. And the reasons as so given to you satisfied you?

A. They did.

Q. You did not feel it necessary to inquire of anybody else to see whether or not others might have a different opinion or reach a different conclusion?

[935] A. No, I didn't, Mr. Davis. I was very concerned personally by the things that he mentioned and he confirmed, and saw no need for further investigating the matter.

Q. At that time were you aware of the financial arrangements with Dillon, Read?

A. Aware of what financial arrangements with Dillon, Read?

Q. With respect to the fee payable to them, or fees for either 1960 or 1961? Do you have to refer to the memorandum from Mr. Rowe? I am only interested in your independent recollection, Mr. Tillinghast.

A. So far as I can recall at this time, I just can't recall at this time, Mr. Davis, when I first became—let me think here. I know I became aware of the arrangement by the 17th, because I know when you appeared before the board, one of the things you questioned was this fee, and later you sent a telegram, or somebody sent a telegram saying that you wanted to withdraw any objection that you had made to the fee. So I know that by that time I was aware of the amount of the fee.

How much before that I was aware of it, I would hesitate to say now. I probably was aware of it at this time, but I just have no independent recollection of it.

[936] Q. I am sure you didn't intend to confuse the facts with your last answer, Mr. Tillinghast. I think I know what you are referring to, but for the sake of the record let us see if we can't straighten it out.

The drafts of registration statements filed with the SEC, and the next to the last draft, for the first time contained, as is normal, a description of fees to be incurred?

A. Yes.

Q. And the relationship of the parties?

A. Yes.

Q. And that registration statement disclosed an amount due or payable to Dillon, Read?

A. It is very likely that was when I first learned of the amount.

Q. And you were referring to a communication while I was a member of the firm of Simpson, Thacher & Bartlett, to the effect that our various objections to the proposed financing did not relate to the question of fees?

A. That is right.

Q. Do you recall in relationship to this date of May 12th or May 16th when this information came to you about the fee arrangement, the $750,000 payable in three installments in 1960, and the question as to the amount [937] of fee to be fixed for the 1961 financing?

A. My recollection is that the question of the amount to be fixed as the fee for the 1961 financing came up substantially later than this. So far as the 1960 financing is concerned, I have no independent recollection as to exactly when I first learned about the amount of the fee. I have no mental association that I can recall that fixes that date with respect to the 12th of May.

Q. The first time you heard about it, did you find it shocking, surprising, large, usual, unusual?

A. I thought it was a lot of money.

Q. I understand that, but when you heard about it, did it impress you as being something indicating that something out of the order had happened?

A. I knew, Mr. Davis, that a good deal out of the order had happened. The fee struck me as a very substantial one, a lot of money. As I said before, this was a heritage from the past, and on the basis of the knowledge I had, I had no reason to think it wasn't quite reasonable for the services rendered even though it impressed me as a lot of money you would have to pay.

Q. Did it raise some concern on your part that you might have to pay a comparable amount with respect to [938] the $147 million then contemplated to be planned

through the same lending institutions, through the same Dillon, Read?

A. I certainly hoped and expected that we were not talking about $750,000 for the subsequent financing, which turned out to be the case.

Q. On May 12th you telephoned Mr. Breech and reported what had transpired?

A. That is correct.

Q. Do you have a clear recollection of that telephone conversation?

A. I have a recollection of one part of it, and that was his saying that he or I should not take the responsibility for deciding this, and it was of sufficient importance that it ought to be decided by the board.

Q. You reported to him the approach made by Merrill Lynch?

A. That is correct.

Q. At that time he heard of it from some other quarters, or were you giving him the information for the first time?

A. I think this was the first he had heard of it, Mr. Davis.

Q. And you told him that you had a meeting with—

[939] A. Mr. Forrester.

Q. That morning?

A. It was in the afternoon.

Q. The meeting on the 12th was in the afternoon?

A. I am sure it was in the afternoon.

Q. And this telephone call to Mr. Breech was in the evening?

A. No.

Q. Right after the meeting?

A. My recollection is that it was right after the Forrester meeting.

Q. After they left?

A. Yes. I may be wrong on that, but I know it might even have been the next day, but I know following the meeting I tried to get in touch with him as soon as I could, to explain the situation to him.

Q. Do you recall whether or not there were other people in the room when you were talking to Mr. Breech and explaining to him what happened?

A. I have no recollection of other people in the room at the time, Mr. Davis.

Q. Did Mr. Breech show some interest at what you were telling him?

A. He was obviously interested in it.

[940] Q. Do you recall what Mr. Breech said and what you said to him?

A. I recall this much. I recall that I went through an explanation of the request, the discussion with Brandi, the meeting with Forrester, summarizing what was said in those discussions. I said I felt very strongly that it would be a mistake to get started on a program that very likely would lead from postponement to postponement.

Q. You told him that?

A. I did. That my own experience told me that it was very unrealistic to expect to do something like this within a week's time, and that if we granted a week's delay, that I was morally certain that we would at the end of the week be faced with the question of a further delay. And I felt that we ought to deny the request but I didn't want to do so without discussing it with him and getting his concurrence.

If I recall what he said, he said, "Charlie, this is one that neither you nor I should decide. We better put this before the whole board."

Q. When you said to him that based on your own experience a week was not sufficiently long, what experience were you referring to?

A. Such limited experience as I had had with regis-
[941] tration statements.

Q. You had had experience with registration statements?

A. Limited experience, yes.

Q. Was it your understanding at that time that the same registration statement that had been prepared by TWA would be used?

A. With such modifications as were necessitated by bringing in a new party.

Q. Did you understand why Merrill Lynch wanted a week's time?

A. I know what they said.

Q. What did they say?

A. They said they wanted a week's time in order to permit them to put together an underwriting syndicate, and to make the necessary changes in the registration statement in order to effect a public offering.

Q. Were you familiar with putting together an underwriting syndicate?

A. Not directly.

Q. Indirectly?

A. I guess limited.

Q. Would you describe your experience in putting together an underwriting syndicate?

[942] A. It is hearsay, Mr. Davis. I never actually engaged directly in putting one together. I have been on the fringes enough to have some idea.

Q. Describe as well as you can what indirect experience you have had in putting together an underwriting syndicate?

A. I was quite active in the distribution by General Motors of the Bendix stock which General Motors sold, as I recall it, in the first part of 1947. During the time I was at Hughes, Hubbard, there were a good many offerings around the office that I didn't directly participate in, but got some impressions about.

In 1950 something or other—I don't remember when—I represented the underwriters in an offering of the stock of the Edo Corporation, and was active in that.

I know enough about it—I don't represent myself as an expert in this field. I know you have to have underwriting agreements, and you have to give information to the underwriters on the company, and you have to give an opportunity to the underwriters that are interested to investigate the company. You have to have meetings.

Q. Isn't it true that all that work, the investigation of the company, material to be disclosed to the [943] public—all that work had been done by Dillon, Read and the Chadbourne firm, for the public offering by TWA, had it not?

A. A certain amount of that had been done.

Q. Merely a certain amount of it?

A. May I finish?

Q. Yes, certainly. I was quite aware of the fact that if you brought in new underwriters, the discharge of their responsibility would require them to make at least a casual investigation of the company. I can't believe that a firm of the standing of Merrill Lynch would make an offering without taking some steps to familiarize themselves with the company, the company's future, the company's problems. They would bring in new counsel who would have to go over the registration statement, educate himself sufficiently to be in a position to pass the registration statement on behalf of his client.

It would bring in Hughes Tool Company as an active party, and Hughes Tool Company, as it turned out on the 17th, had many serious questions about the adequacy of the registration statement.

By the time that you had gotten a new set of counsel in for the underwriters, by the time you had [944] gotten Hughes Tool Company counsel in, no one in this world could convince me there was a reasonable prospect of getting that offering off the boards and ready to go public in a week's time.

Indeed, I said as much to Mr. Forrester, and particularly to Mr. Hager, his counsel, and Mr. Hager, in substance agreed with me, and I said, "What sort of a guarantee can you gentlemen give me that this can be accomplished within a week's time?"

They said, in substance, "Obviously we can't give you any guarantee. All we can say is we will do our best."

[945] Q. When you refer to a week's time, you are not quite accurate, are you? We are talking about a request made on May 11th. They were seeking a week's adjournment from the contemplated May 17th, so it was two weeks' time, wasn't it?

A. No, it wasn't two weeks' time. I was talking with them on the 12th of May, which was a Friday, and the proposal was to become effective on the 24th, which was 12 days later.

Q. 12 business days?

A. No, not 12 business days.

Q. 12 days?

A. 12 days including Saturday and Sunday.

Q. Do you think that is closer to two weeks, or one week?

A. That is 12 days. I will say, Mr. Davis, unless there be any confusion on the subject, that what I say is to the impossibility of accomplishing this, in my opinion, applies equally to 12 days as it does to one week.

Q. Will you admit that you have had no experience really, or you don't consider yourself to be an expert as to how long it takes to get together an underwriting group, leaving aside for the moment—

[946] Mr. Sonnett: I object to that as to form. It is argumentative. The witness has fully described his experience.

The Special Master: I think he already said he isn't an expert.

By Mr. Davis:

Q. In connection with this request to Merrill Lynch, you were not concerned with the problems that Merrill Lynch might encounter in achieving their objective, were you? I will withdraw the question.

Did you consider Merrill Lynch was being adequately advised by experienced people, legal people, so that they fully understood what they were proposing to do? Were you satisfied about that?

A. Yes.

Q. Did Merrill Lynch say to you that they thought that they could put together an underwriting group if TWA, or its management, would delay the effective date of their registration statement from the 17th to the 24th? Did they say that to you?

A. They might well have.

Q. Did they or didn't they, Mr. Tillinghast?

A. I wouldn't put it exactly that way, but let me say this, that there was no real question in my mind [947] as

to their ability to get together an underwriting group. That wasn't the problem. The problem was the problem of becoming effective.

Q. You mean how much longer it would take to become effective if they got together an underwriting group?

A. That's correct. The problem that I was interested in, Mr. Davis, was not how long it took them to get together an underwriting group. I was concerned with the question of if we granted this delay, when we would become effective.

Q. And you thought that if they formed an underwriting group, it might delay beyond the 24th the effective date of the registration statement?

A. I felt if we tried to go to an underwriting on this, that the probability was that it would delay it far beyond the 24th.

Q. Did you try to make an estimate as to how much of a delay you thought would occur?

A. I thought that under the best of circumstances, that you were talking about, roughly, a month.

Q. Did anyone tell you that?

A. I discussed that with our own counsel. I discussed it—

Q. How do you mean by your own counsel?

[948] A. Mr. Rowe. I discussed it with Mr. Brandi. I discussed it with Mr. Forrester and Mr. Hager, and expressed that viewpoint.

Q. This was on the 12th?

A. On the 12th. None of the experts in this field seriously disputed that expression of viewpoint by me.

Q. In other words, you are saying now that on the 12th of May, Mr. Forrester and Mr. Hager, of Sherman Sterling, agreed with the views which you expressed out loud, that it would take an additional month in order to become effective?

A. Let me say, Mr. Davis, to be more accurate, that they did not disagree with that expression of viewpoint by me.

Q. You assumed from that they were in accord with your point of view?

A. I did. As I said before, Mr. Davis, they repeated—Mr. Forrester repeated they would do their best. They were hopeful that they might succeed in doing it, but certainly couldn't assure us that it was possible.

Q. Was it as a result of this meeting that a group was formed, included Mr. Reed, who was at that meeting, wasn't he?

A. He was.

[949] Q. Mr. Reed and Mr. Hager of Sherman, Sterling, to get up a lot of papers from the Tool Company, requesting the Tool Company to give a firm letter of commitment to Merrill Lynch, preparing resolutions, and they worked an entire weekend over it? You were aware of that, weren't you?

A. I was. I believe it was after the meeting that someone said would we be willing to have the lawyers work over the weekend in order to make such progress as they could, so that if the decision was an affirmative one, no time would be lost.

I authorized them to go ahead and start working.

Q. In fact the Hughes, Hubbard firm sent bills to TWA and others with respect to the work that was done to get the Tool Company committed to Merrill Lynch, following this meeting on the 12th?

A. I wouldn't say worked to get the Tool Company committed to Merrill Lynch, but they did work over this weekend, and I believe—

Q. Doing what—do you know?

A. Working on an underwriting agreement, and they worked on a letter of commitment that the Tool Company would give. Just what else they worked on, I don't know.

[950] Q. Do you recall a discussion about trying to get the Tool Company to agree to guarantee one year's interest on these debentures?

A. Yes, I do. That came up on the 12th. Mr. Forrester said at that time that one of the problems that they had run into was that it very likely would be necessary for someone to guarantee the interest for a year, in order to make these publicly favorable.

Q. The meeting on the 12th, with Mr. Forrester and the others there, broke up on the basis of all this work to be done, these problems to be solved, get the Tool Company to consider guaranteeing a year's interest, an underwriting agreement to be worked on—that was what everybody started to do upon the break-up of this meeting?

A. No, it was not. If I recall correctly, that did not come up at the meeting. It came up after the meeting, and I got a telephone call, I believe from Mr. Reed, saying that they wanted to go ahead so that there wouldn't be any waste of time, and I told him in effect that so long as it doesn't involve expense on the part of TWA, and as long as it is clearly understood what my position is in the thing, go ahead and extend every cooperation, and see what progress you can make.

[951] Q. Did Hughes, Hubbard in fact send a bill to TWA for the legal work that they did during that period?

A. I think they sent one to the Tool Company, didn't they?

Q. I know they did, but I am asking you if they also sent one to TWA.

A. Not for the work. I think this was all paid for by the Tool Company, Mr. Davis.

Q. And it is your understanding that following that meeting, they worked on a proposed underwriting agreement between the Tool Company and Merrill Lynch?

A. Yes.

Q. Do you recall saying that before anything else would happen, you would want to see a firm letter of commitment from the Tool Company to Merrill Lynch?

A. Offhand I don't, no.

Q. Have you ever heard that Merrill Lynch was ever asked to obtain from the Tool Company a firm irrevocable letter of commitment?

A. Not that I recall, Mr. Davis. I remember that there was some sort of a commitment letter, and there was question as to the adequacy of the commitment letter, but I don't recall that TWA asked for that. As I recall it, it was volunteered by the Tool Company.

[952] Q. Without drawing a distinction who TWA is, do you know of any individual, whatever association he may have with anyone, who asked Merrill Lynch to obtain such a firm letter of commitment from the Tool Company?

A. Not offhand, Mr. Davis. I don't recall it at this point.

Q. Is it still your testimony that on May 12th, at this meeting you indicated, and it was your personal opinion, that the whole thing was absolutely impossible, and it was just a waste of time?

A. That's correct.

Q. And it is your testimony that you believed that Mr. Forrester and Mr. Hager understood that point of view, and did not disagree with it?

A. Yes, although I would have to say in fairness that they obviously wanted to go ahead with this thing, and let us say with viewing it in the most optimistic light from that

standpoint. I specifically put the question to them as to whether or not they could give me any assurance that this would be completed in the time suggested, and the answer was no, they couldn't.

Q. Was there any discussion at that meeting as to what the Tool Company would do with all that money, with all that cash?

[953] A. No, there was not, at least I am sure there was no question as to what the Tool Company would do with that money.

Q. Then you called Mr. Breech and expressed your own personal view that this request of the Tool Company was not feasible, is that correct?

A. That's right.

Q. What else do you remember telling Mr. Breech?

A. I have already testified—

Q. Excuse me for interrupting you. Did Mr. Breech express any personal views based upon his experience as to whether or not this would be feasible or not?

A. Not that I recall. He certainly didn't disagree with what I said. I don't recall at this moment his having expressed any independent opinion on the feasibility of it or not.

Q. Would you say that Mr. Breech had had more experience than you as to the problems of feasibility of forming an underwriting group, or the length of time it takes to carry out that kind of a project?

A. I would think he had had considerably less experience than I.

Q. In that telephone conversation, would you say you did most of the talking or did Mr. Breech do a substantial [954] amount of the talking?

A. I am not sure those are alternatives. I did most of the talking, and Mr. Breech did a substantial amount of talking.

Q. Did you tell Mr. Breech what Mr. Leslie had discussed with you on May 11th?

A. If I did, I don't recall it at this moment. I don't think so.

Q. Mr. Tillinghast, isn't it true that at that time at least there was a great deal of interest on your part as to what the Tool Company was trying to do? Are you saying that you did not discuss that, or express some views or report to Mr. Breech along these lines?

A. No, I am not saying that, Mr. Davis. I certainly was concerned very much with whether or not this request was genuine, or whether it was a maneuver.

Q. What kind of a maneuver?

A. A delaying maneuver.

Q. For what purpose?

A. For the purpose of upsetting the Boeing financing.

Q. Not for the purpose of raising $100 million?

A. Not for the purpose of raising $100 million.

Q. Not because of any concern because without that money the voting trust might terminate?

[955] A. That's correct.

Q. And that is what you told Mr. Breech?

A. I told Mr. Breech that I was very concerned that this was a delaying tactic, that if we become involved in this, that questions would arise, that the thing would go from delay to delay, and we would find ourselves up against a deadline without our subordinate debenture financing complete.

Q. Did Mr. Breech give you any reasons why he thought this was a matter that should be acted upon by the board?

A. I don't remember any specific reasons, but it was of an obvious importance that one might well take that point of view, and indeed I didn't disagree with it.

Q. At this point, Mr. Tillinghast, I am more interested in what Mr. Breech actually said, than your reasoning. I know you have many justifications for what took place. I am interested in what happened.

A. As best as I can recall it at this time, Mr. Davis, what happened was that Mr. Breech said that he thought this was something of a magnitude that neither he nor I nor the both of us together ought to decide it, and it ought to be decided by the board.

Q. Based upon a recommendation made by you, or to be [956] made by you and him?

A. He didn't go into that, that I can recall.

Q. Did he indicate that he agreed with your reasoning and conclusions?

A. He certainly didn't disagree with them. My recollection, so far as I can recall it, Mr. Davis, is that he was generally in agreement with what I had to say, but didn't want to take the responsibility of deciding it.

Q. Mr. Tillinghast, there was a purpose in your calling Mr. Breech, wasn't there? Wasn't it for the purpose of gossiping?

A. No. The purpose of calling him was for the obvious purpose of acquainting him with this development, because I thought (1) that I should not handle it by myself.

Q. So you wanted his advice? You wanted him to help in making a decision, didn't you?

A. That's correct.

Q. I am trying to find out what Mr. Breech said to you that helped you to make a decision.

A. He didn't say anything to me to help me make a decision, other than that he and I should not make the decision, that it should be taken to the board.

Q. I believe you said that you expressed to Mr. [957] Breech your views that this was part of a maneuver by the Tool Company to interfere with the Boeing program, is that correct?

A. That's correct.

Q. On that date on May 12th, what evidence had you had, what reasons did you have to believe that the Tool Company was interested or desired or wished to interfere with the Boeing purchase program?

A. Well, I really had none directly, Mr. Davis, because up until this particular time there had been no indication one way or the other as to what viewpoint the Tool Company would take on this matter. Based on my conversations with Mr. Leslie, and as I mentioned before, the fact that I didn't consider this a realistic proposal, a durable project, I was suspicious—I became suspicious as to whether or not this was a genuine proposal, or whether it was a diversion. My suspicions undoubtedly were more readily aroused by such knowledge as I had of the delays and attempted delays and diversions that had taken place in connection with the 1960 financing, and the general reputation that Mr. Hughes had, as I understood it, of being one at the last minute to seek a delay, and to prevent things from coming to a conclusion.

[958] This matter of the offering of the subordinate debentures had been something that had been on the fire for many months.

Q. Pursuant to an agreement with the Tool Company?

A. Pursuant to the agreement embodied in the 1960 financing.

Q. With the Tool Company?

A. With the Tool Company and others. Obviously one of the questions in my mind was the question of why had Hughes waited until the 11th hour to suggest something like this, if in fact it was a genuine proposal, and from what Mr. Leslie had said, from the lateness that this question had been raised, from what I had heard about Mr. Hughes' negotiating tactics, I was suspicious that this might not be genuine, and indeed, on the 17th when you appeared, my suspicions were richly fulfilled.

Q. Thank you, Mr. Tillinghast. At that time what was the market price of the TWA common stock?

A. I don't remember exactly. It was higher than it is now, as I recall it.

Q. Substantially so. Was it around 22?

A. No, it was 19 or 20, or somewhere in there.

Q. Had you had discussions with Dillon, Read, as to the probable offering price of these convertible [959] debentures?

A. Yes. There had been discussions.

Q. What were the nature of those discussions, without the detail? I am interested in what they said to you with respect to the probable offering price.

A. Well, I am not sure that I had direct discussions with Dillon, Read at that point. I think most of my discussions were with Mr. Leslie. It was hoped—I have got to refresh my recollection and think about this.

Q. Would you like to take a short recess?

A. Let me finish this answer first. We were talking. I believe at that time half a point higher.

Q. Than what?

A. Than the price finally fixed, if I recall correctly, in the delay that took place, we lost half a point in the conversion price.

Q. You are referring to the period between May 17th and the day it actually became effective. I am talking about May 12th. What was the price you were discussing with Dillon, Read on or about May 12th, or prior to May 17th?

A. I think it was half a point higher than the conversion price ultimately fixed.

[960] Q. And that was what figure?

A. It was 20½ and 21½.

Q. That was the conversion price?

A. Yes.

Q. What was the offering price of the debentures? Actually wasn't it an offering debenture with warrants?

A. Yes. There wasn't an offering price. It was an offering to the shareholders.

Q. Weren't the shareholders given an opportunity to subscribe to subordinated debentures?

A. Yes.

Q. With warrants?

A. With warrants attached.

Q. The warrants gave you the right to convert, or turn in the debenture for stock?

A. That's right.

Q. But the stockholders were going to be given the opportunity of buying a debenture?

A. Right.

Q. Was this financing something that you didn't pay any particular amount of attention to?

A. I wouldn't say I didn't pay any particular attention to. It was one of many, many things I was dealing with at the time, and it was something that had started in motion long before I got there. Mr. Leslie was carrying [961] the responsibility on it. I was generally familiar with it, but I was not deeply involved in it.

Q. Would it be fair to say that you as chief executive officer of TWA wasn't paying too much attention to this whole program?

Mr. Sonnett: I think that is repetitive and argumentative. I object to it on that ground.

The Special Master: I think the witness' answer has shown how much attention he paid to it, unless you have something further.

Q. Can you tell us, Mr. Tillinghast, what this offering consisted of?

A. Yes. It consisted of $100 million of subordinate debentures.

Q. At what price?

A. At par.

Q. The offering price was going to be par, is that correct?

A. Par.

The Special Master: We will have a five-minute recess.

(Short recess taken.)

By Mr. Davis:

Q. Am I correct that Defendants' Exhibit 24, which is [962] a letter from Dillon, Read, dated May 15th, referring to the meeting Friday, was received by you because you requested such a letter?

A. That's correct.

Q. Do you recall when you requested the letter?

A. No, I don't, Mr. Davis. It might either have been on the 12th or on Monday. I can't recall at this point.

Q. Did you have any subsequent meetings with Mr. Forrester, or his counsel after this meeting on the 12th?

A. Yes. If you call it a meeting. I think it was probably the 16th. It was either the 15th or 16th. Mr. Forrester and Mr. Fredley, of Sherman, Sterling, showed up without prior appointment, and as I recall—

[963] Q. Showed up where?

A. At 380 Madison Avenue. As I recall, I was in the process of going from a meeting that was just finishing in my office down to something else in the conference room, and I spoke to them just briefly, standing outside of my office, where my secretary sits, and apologized for being pressed so that I couldn't sit down and talk with them.

They handed me a letter summarizing, as I recall it, what they wanted to accomplish.

Q. There was no discussion with them at all?

A. Very limited, almost none at all, because I was just running from one meeting to another.

Q. Mr. Breech was there?

A. He was not there, no.

Q. Mr. Breech was in town?

A. Mr. Breech was in town.

Q. When did he come to town?

A. I notice here that on the 15th I have a note that says, "Breech in town." Which would be in accordance with his normal custom, so I imagine he came in the late afternoon or evening of the 15th.

Q. At that time did you have a further discussion or conference of what had transpired on the 11th or [964] the 12th?

A. Mr. Davis, I have no specific recollection. The probabilities are that I did, but I can't at this point tell you certainly that I did, and where we had the meeting.

Q. Are you quite certain it was not Mr. Breech who suggested that you ought to get a letter from Mr. Brandi confirming the position to be taken?

A. I can't be absolutely positive. I don't think so, Mr. Davis. If I recall correctly, that was my own idea.

Q. Do you know if Mr. Breech had any discussions or conversations with anyone else—any director, Dillon, Read, or Mr. Sessel of the Irving Trust, or anyone else—relating to this maneuver by the Tool Company?

A. There are none that I can recall, Mr. Davis.

Q. Have you ever heard that he did have such conversation or conversations with anyone?

A. Not that I can recall at the moment.

Q. Was there also a meeting in the evening of the 16th with Mr. Forrester and Mr. Eaton?

A. With me?

Q. That you know of, relating to this matter—with [965] anyone?

A. I am sure there wasn't a meeting with me, Mr. Davis. Conceivably he may have met and talked with the lawyers who were working on this.

Q. Do you mean Mr. Reed or Mr. Rowe?

A. My recollection is they were both involved in it.

Q. Did Mr. Reed undertake to keep you informed as to what was going on in connection with his activities with Merrill Lynch and Sherman, Sterling?

A. I knew he was actively working on it.

Q. I understand that, but my question is, did he report to you or keep you informed of what was developing?

A. I think he did generally, yes.

Q. What did he tell you?

A. Well, I recall, and I can place this exactly, but I recall there was a question of directors' indemnification, and there were two or three open questions on this proposed Hughes Tool agreement.

Q. Will you explain what you mean by "questions about directors' indemnification"?

A. I think one of the questions, if I recall correctly, that was involved in the discussions with [966] Hughes Tool was the extent to which Hughes Tool would indemnify the directors of TWA for any liability by reason of this offering by Hughes Tool Company.

Q. And you discussed that with Mr. Reed?

A. I believe I did, yes.

Q. What was the result of that discussion?

A. My position was that we ought to get every indemnity position. Let us say it was generally in accordance with the customs of the trade.

Q. Mr. Reed is counsel for the two voting trustees—the two outside voting trustees?

A. That's right.

Q. And Mr. Breech came to town on Monday the 15th?

A. That's correct.

Q. Do you know to what extent Mr. Reed discussed with Mr. Breech this matter?

A. I don't have a specific recollection, Mr. Davis, but I am quite sure that Mr. Reed must have discussed it at some length with Mr. Breech.

Q. But not in your presence?

A. I just can't be sure. It is entirely possible, although I have no independent recollection of it now, that on the evening of the 15th, the three of us may [967] have had dinner together.

Q. And discussed this matter?

A. That is quite possible, yes, but I have no independent recollection of it.

Q. Whether it was exactly that evening or another time, do you remember the discussion when sitting with Mr. Breech and Mr. Reed, maybe fairly casually, speculating as to what the Tool Company was up to?

A. I have no independent recollection, Mr. Davis. It is entirely likely that we did, but I would be misleading you if I said I could specifically recall such a discussion.

Q. And is it your testimony that on the 16th it was the only other meeting that you had of any significance with Mr. Forrester or Sherman, Sterling?

A. I am quite sure that was the only meeting I had with them, Mr. Davis.

Q. And that was when you were going from your office to the conference room?

A. That's right.

Q. You just met them in the hall?

A. That's right.

Q. And then handed you a piece of paper?

A. That's correct.

[968] Q. And you were on your way to a conference?

A. That's correct.

Q. Can you tell us what that piece of paper was that they handed you?

A. As I recall it, it was an outline—if I saw it, I am sure I would recognize it—an outline of their proposal for this offering, and I believe it had attached to it a copy of a draft of the Hughes Tool Company agreement, and perhaps it also had a Hughes Tool Company resolution.

Q. A corporate resolution?

A. A corporate resolution.

Q. I sat up all night and the night before to get it.

A. So be it.

Q. What conference was it you were going to with this piece of paper in your hand?

A. At this point I can't remember.

Q. It had nothing to do with this at all?

A. No. Mr. Davis, I am sure you appreciate this was shortly after I had come to TWA. I had a million things

that I was trying to digest, and some things stick in my mind, and many things do not.

Q. This was late in the afternoon, or fairly late?

[969] A. I guess 3:30 or 4:00, or somewhere in there.

Q. Then what did you do with this piece of paper and attachments?

A. I took them with me and presented that to the board meeting.

Q. The next day?

A. I am not sure whether it was the board meeting the next day or two days later.

Q. We have been referring to a board meeting on the 17th?

A. That's right. I am not absolutely sure whether this was the 15th or the 16th that they were there.

Q. You kept this piece of paper in your pocket for the one day or two days until the board meeting?

A. Yes. One of the letters that you wrote refers to this by correct date but incorrectly says that Mr. Breech was there, because it wasn't a meeting with him. It was just a quick handshake in my outer office.

Q. I understand that part of it, Mr. Tillinghast. What I am trying to establish is, this document with attachments that Mr. Forrester of Merrill Lynch, and Mr. Eaton of Sherman, Sterling handed you on the 15th or 16th; did you put it in your pocket and keep it until the board meeting on the 17th?

[970] A. I kept it until the board meeting. Whether I put it in my pocket or put it with some other papers that I had with me, I just couldn't recall.

Q. And you presented that to the board on the 17th?

A. Yes.

Q. You didn't discuss it with anyone in between?

A. I wouldn't say that I didn't discuss it with Mr. Reed. It is quite possible that I did, because this was the material he was working on.

Q. Wasn't this an important piece of paper that you had to consider in connection with your recommendation to the board on the 17th?

A. As I recall it, except with respect to the matter of the nature of the commitments that the Tool Company was making, there was nothing particularly new about it.

Q. You mean so far as you were concerned, a decision had been made?

A. No. So far as I was concerned, I had reached a conclusion.

Q. Which you had reached on the 12th?

A. Which I had reached on the 12th. This did not really add or subtract anything significant to the picture as I saw it.

[971] Q. You read it pretty carefully, didn't you?

A. I am sure I read it carefully.

Q. But you didn't consult anyone about it?

A. I didn't say that. I am quite certain, although I can't tell you when and where, that I discussed it with Mr. Reed.

Q. Let me show you Defendants' Exhibit 3—would you like to consult with your counsel?

Mr. Sonnett: I have a message I want to give him while you are marking something.

Mr. Davis: I never have any objection, where you think, if it would help you to give me a complete answer, to consult with your counsel.

Mr. Sonnett: I waited until you finished your question and answer, and you were about to mark an exhibit. It has nothing to do with your question.

Mr. Davis: I have no objection.

Mr. Sonnett: I didn't want it to appear on the record that you had some profound or puzzling question.

Mr. Davis: There is nothing personal in it. In a deposition I always like to get all the facts, and any time a person wants to consult, [972] whether it be their lawyer or someone else, I have no objection. I want Mr. Tillinghast to understand that.

Mr. Sonnett: That is very generous of you, and I will follow the same practice when you examine Mr. Hughes. If you want to mark the document—

Mr. Davis: I have no document to mark.

Mr. Sonnett: Go ahead.

By Mr. Davis:

Q. Referring to Defendants' Exhibit 3, Mr. Tillinghast, which is a diary, which I believe was kept by your secretary, and which I hand you, I refer you to the entry on Tuesday, May 16th, indicating that at 5:00 o'clock, the stock option committee met in Suite 36H of the Waldorf, the Irving Trust suite, and indicating that those who attended or might have attended were Hood, Leithead, Sessel, yourself, and Mr. Breech, with a question mark.

Does that help refresh your recollection as to what was going on on the late afternoon of May 16th?

A. Yes. Mr. Davis, I would have to say—I don't have a very distinct independent recollection, but I am quite sure that what this was was a meeting of the [973] stock option committee, and I believe that the record would show that at the directors' meeting of the 17th, a whole series of stock options were confirmed by the board. I am quite sure this was a meeting that we had the night before, or the afternoon before, consisting of those people, and I believe Mr. Breech was also in attendance, although he was not a member of the stock option committee—at which we went over the whole stock option program.

I had made recommendations—I hesitate here, because I can't be certain at this point whether this was a meeting at which we had a preliminary discussion of general amounts and approaches to the stock option problem, or whether this was the meeting—whether this was the time they were actually granted. They were granted either in May or June. I am inclined to think that it was in May, but I do have a recollection of a preliminary discussion where we discussed the broad principles to be followed but didn't actually award stock options.

Q. That meeting was held, wasn't it, on May 16th?

A. I am quite sure there was a meeting.

Q. You attended it?

A. I attended it.

[974] Q. And Mr. Breech was there?

A. I think in all probability he was, yes. Yes, I am quite sure he would be, because he was in town, and if there had been such a meeting, he would have been there, I am quite sure.

Q. It also indicates that a number of the directors were in town then on the 16th, doesn't it?

A. Those who were there.

Q. Do you know if others also came into town on the 16th?

A. I am sure that having a meeting on the 17th, that several had been in town the night before.

Q. Do you know to what extent Mr. Breech on the 16th discussed with individual directors, particularly the outside directors, the action to be taken on the 17th, or any matter that would come up on the 17th?

A. No, I don't, Mr. Davis. My recollection is that Mr. Breech was in the office that afternoon, but that I was involved in some meetings, and didn't see him or talk with him during the main body of the afternoon.

Q. Referring you to Exhibit 22 again, you will note that purports to be notes of a telephone conversation between Mr. Kerr and Mr. Gordon. You will note the time there is 8.06 a.m.

[975] A. Yes.

Q. At that time of the year, what was the time differential between the West Coast, California, where Mr. Gordon is, and New York—do you know?

A. It is three hours, isn't it?

Q. If it is on Daylight Time, it might be four.

A. Isn't it always three hours?

Q. That would indicate that the call from New York, that would have been about 11:00 o'clock that day?

A. Yes.

Q. Does that refresh your recollection in any way that by 11:00 o'clock of that day the management and the directors of TWA made a decision?

A. No, it does not, Mr. Davis, and I am quite sure that that wasn't the case. Mr. Breech has a 1 William Street meeting on that day, and I am quite sure that he was at 1 William Street—at the 1 William Street meeting all morning.

Q. Do you know whether or not he stopped in to see Mr. Sessel that day?

A. I just would have no knowledge of that. I would doubt it, but I just don't really know.

Q. You think Mr. Kerr was wrong, if these notes are correct?

[976] A. I think Mr. Kerr obviously was anticipating something that hadn't happened.

Q. You have no idea as to how Mr. Kerr could have anticipated this action?

A. No, I would just be speculating.

Q. And then, on the 17th, at the board, you made your recommendation; is that correct?

A. That's correct.

Q. Did Mr. Breech make a recommendation also?

A. Well, he certainly joined in mine.

Q. Do you remember how he did it?

A. My best recollection is, Mr. Davis, that this came up after you had appeared at the meeting and made a rather lengthy statement, and that the matter was then taken up.

My recollection is that I repeated my views on the subject, expressed the viewpoint that if we started getting into postponements, that I thought that there might well be no end of the road, and I thought that the Boeing program was so important to TWA's future, that we ought to proceed with the Boeing program and avoid doing anything that might have the effect of unhinging it.

Q. That is what you said?

[977] A. That is what I said.

Q. What did Mr. Breech say—the same thing? Did he say, "I agree with everything Mr. Tillinghast said"?

A. The only thing I can recall Mr. Breech saying was, "After all, Mr. Hughes has had months to do this. If he really wanted to do it, I don't feel we should feel under any compulsion at this late date to upset a program that the management of TWA is anxious to effect in order to accommodate a last-minute change of heart, if that is what in fact it is."

Q. And the program which the management of TWA was anxious to effect was which program?

A. The Boeing program.

Q. Did you or Mr. Breech explain to those directors the connection between this offering of subordinate debentures and this Boeing program?

A. I explained, and the letter from Mr. Brandi was read, that I didn't feel any assurance that if we failed to meet the deadline on the subordinate debentures, that we wouldn't get into technical arguments and postponements that might have the effect of causing our financing to fall apart, and in view of the importance and magnitude of the program, I thought the thing that ought to take precedence over everything [978] else was to make certain that we did nothing that might involve any reasonable possibility of upsetting the program.

Q. Were any of the directors there present who asked any questions?

A. There was a lengthy discussion.

Q. How long a discussion?

A. My best recollection is, Mr. Davis, that this went on for three-quarters of an hour or so. I would hesitate to say exactly, but that is my present recollection.

Q. Let us see if we can establish some facts here, Mr. Tillinghast.

When did the board meet—what time in the morning?

A. At 9:30.

Q. This discussion and consideration was after the presentation which I made; is that correct?

A. That's correct.

Q. Was there some business taken up before I was invited to appear at the board meeting?

A. I believe there were just some routine things, like approval of minutes taken up.

Q. When would you say I was invited to appear [979] before the meeting—around 10:00 o'clock?

A. My guess would be around 10:00 o'clock, yes, sir.

Q. Do you think the presentation I made was a fairly lengthy one?

A. I think it took about an hour.

Q. An hour? As much as that?

A. That would be my recollection. Maybe that is too much.

Q. That would bring us up to 11:00 o'clock?

A. Let us say a quarter to eleven or eleven, yes.

Q. And then there was some discussion among the directors to decide what to do; is that right?

A. Yes.

Q. Do you know at what time the signal was given for Mr. Rowe to file the amendment before the SEC?

A. I know Mr. Rowe was laboring under a pressure of time.

Q. Isn't it a fact that at 11:00 o'clock he went to make a telephone call to his colleague at Washington, to file the price amendment? Mr. Rowe is right here, you know.

A. Yes, I know he is here.

It is possible, although that wouldn't make [980] things happen faster than I thought they did.

Q. Would you like to confer with Mr. Rowe, that he made that telephone call just before 11:00 o'clock?

Mr. Sonnett: I object to that. I think we ought to go ahead with this witness.

The Special Master: I think you can get all the knowledge the witness has, and if he doesn't recall anything of that kind, he can say so, and that will be in the record.

By Mr. Davis:

Q. Isn't it a fact, Mr. Tillinghast, at that board meeting you were told by your counsel that the price amendment had to be voted by the board, and the time was noted on the minutes when the price amendment—

A. I recall there was a question of time, and that Mr. Rowe had to make a telephone call. That he in fact did make a telephone call. Whether it was 11:00 o'clock or 11:30 I wouldn't be sure. The minutes of the meeting, I am sure, would show it. My recollection is that the meeting commenced, and just about the first thing of any substance we did was to have you come in. You talked at some length. I think I recall that your discussions were perhaps drawn [980A] to a conclusion so that we could meet this deadline, whatever it was.

[981] (Discussion off the record.)

A. The answer is I was wrong in my recollection.

What happened was that before you entered the meeting, Mr. Davis, that there was a general outline and discussion of the matter, and that some of the things which I said I thought had taken place after you left, in fact had taken place before you came into the meeting.

By Mr. Davis:

Q. Let us start at the beginning. You don't have the first page. Let me say that the meeting did meet at 9:30.

A. I believe that was the time the meeting began.

Q. And normally the first action of the board is to approve the minutes of the prior meeting?

A. That is correct.

Q. And then the next subject was a discussion of the proposed offering of subordinated debentures?

A. That is correct.

Q. At that time Mr. Rowe, counsel for the corporation, made some presentation as to the registration statement, and what was needed in connection with it?

A. Yes, although I don't recall there was much with respect to the registration statement itself. I think [982]

it was mainly with respect to the question raised by Mr. Forrester's request.

Q. And then in fact, Mr. Holliday was present, and advised the meeting that the Hughes Tool Company had retained Simpson, Thacher & Bartlett?

A. That is correct.

Q. And asked if Mr. Davis of that firm would be invited to the meeting for the purpose of discussing the financing plan?

A. Before that there had been some discussion of the request of Merrill Lynch, and I had made the recommendation, which I testified to before, that it not be acceded to. Mr. Breech had made his comment, which I alluded to, that he thought there had been a lot of time to do this, and there was no point—

Q. I want to follow what happened at that meeting. It is very important to me. With the minutes there to help you to refresh your recollection, is it a fact that after Mr. Rowe suggested, or made some remarks with respect to the registration statement, Mr. Holliday made some remarks with respect to the retention of Simpson, Thacher & Bartlett and asking Mr. Davis be invited?

A. That's right.

Q. The next thing that happened—I am asking you for [983] your own independent recollection now—because you have got the minutes there to refresh you, but if you think something happened that the minutes don't fairly reflect, I want you to say so.

A. All right.

Q. The next thing that happened was that the chairman —that is Mr. Breech, is that correct?

A. Yes.

Q. He said that before acting on the request of inviting Mr. Davis to the meeting, the meeting should be informed of any recent developments relating to the subject?

A. Right.

Q. That is what happened, isn't it?

A. That is correct.

Q. And then Mr. Rowe advised the meeting—Mr. Rowe sitting here, of the Chadbourne firm?

A. That is correct.

Q. And he is the one who then described to the meeting that a request had been made on May 11th to postpone the offering of the debentures for one week?

A. That is correct.

Q. Will you read that paragraph of the minutes, and let me ask you whether or not that fairly summarizes the [984] description made by Mr. Rowe?

A. It is a condensation of it.

Q. It took a little bit longer than that?

A. In substance it is correct, as I recall it.

Q. Mr. Rowe said, he stated "A number of meetings had been held with representatives of Merrill Lynch Fenner & Smith, who were proposing to attempt to arrange such an underwriting."

What number of meetings was he referring to?

A. I think he was referring to the meeting we had with Mr. Forrester, about which I have testified, and several meetings that had been held between Friday and the following Wednesday, between the lawyers, to accomplish as much as they could while this thing was awaiting decision.

Q. Let me see if I understand you, Mr. Tillinghast. There was a meeting on May 12th?

A. That is correct.

Q. At which you concluded that the whole thing was wholly unrealistic and unfeasible, is that correct?

Mr. Sonnett: If counsel will not characterize the testimony. We have covered the May 12th meeting three or four times, I think.

By Mr. Davis:

[985] Q. I want to understand what the testimony is. You then asked Mr. Brandi for a letter, either on the 12th, but anyway you got one dated the 15th?

A. That is correct.

Q. And after that, the only meeting you were aware of was the one, this passing meeting, when you were going from your office to some conference?

A. That is not correct, Mr. Davis. The only meeting that I am aware of in which I participated was that. I know there were a series of meetings going on between the the lawyers.

Q. You mean Mr. Rowe and Mr. Reed?

A. Mr. Rowe and Mr. Reed, and people representing the underwriters, and representing Hughes Tool Company.

Q. Was it your understanding those were serious meetings to work out and develop a practical plan?

Mr. Sonnett: I object to the form of that question. It is argumentative. The witness has testified in detail as to his understanding of what the lawyers were doing and why they were doing it. This is just argument.

The Special Master: I think it is a reasonable inquiry. He may answer the question.

A. The purpose of that meeting, Mr. Davis, or those [986] meetings, and the activity of the lawyers, was to make certain that if the board should have a different feeling than I had, that no time would have been lost by reason of the passage of days between Friday and Wednesday.

By Mr. Davis:

Q. And then, referring you back to the minutes of tha meeting, you, Mr. Tillinghast, reported further on meet ings and other discussions with representatives of Merril Lynch Pierce Fenner & Beane, and Hughes Tool Company on this subject. Do you see that?

A. Yes, I do.

Q. What reports and meetings of other discussions d these minutes refer to?

A. The only thing that I reported on—the only meeting that I had—and let me say I don't recall any discussio with any representative of Hughes Tool Company relativ to this.

Q. You think the minutes are in error in that respect

A. So far as I can recall now, they are, Mr. Davis.

Q. Do you know who prepared these minutes?

A. Mr. Duckworth.

Q. Do you know whether or not he prepared them wit [987] the aid and assistance of Mr. Rowe?

A. I think Mr. Rowe reviews them, yes. I review the also.

Q. And Mr. Duckworth was present at the meeting?

A. Mr. Duckworth was at the meeting.

Q. And Mr. Rowe was at the meeting?

A. Mr. Rowe was at the meeting.

Q. Mr. Reed was not at the meeting?

A. Yes, he was there part of the meeting.

Q. And Mr. Duckworth had not been aware of what ha been transpiring with respect to these discussions wit Merrill Lynch prior to what he heard at the meeting, isn that right?

A. That is generally correct, yes.

Q. Is it your testimony now that in your opinion Mr. Duckworth just misunderstood the nature and scope of your report when he made these notes?

A. I would have to say so, because I don't have any recollection of any meetings with Hughes Tool Company. It is barely possible that Mr. Holliday and I talked briefly about this, but I have no recollection of it at the moment, Mr. Davis.

Mr. Holliday, perhaps would remember whether we did. My present recollection is that I talked only [988] with Merrill Lynch on the two occasions that I mentioned.

Q. Is it customary for Mr. Duckworth to make notes at the meetings themselves, from which he subsequently prepares the minutes?

A. I presume so, yes. I am quite sure he does.

Q. I am interested in the procedure that is followed in the preparation of these minutes, Mr. Tillinghast. Then are these first put in draft form?

A. Yes, he ordinarily circulates a draft.

Q. And that draft is circulated among whom?

A. Well, I see it and Mr. Rowe sees it, and insofar as I know, that is every one who sees it.

Q. And it is not unusual for some corrections to be made by either you or Mr. Rowe?

A. I think that is quite common.

Q. And then you return the drafts with your comments to Mr. Duckworth?

A. I do.

Q. And then he puts the minutes in final form?

A. That is correct.

Q. And then they are mailed out to the individual directors?

A. That is correct.

Q. Prior to the next meeting?

[989] A. Usually prior. Sometimes he doesn't get the job done until just at the time of the meeting, but he is supposed to have them out in advance of the meeting.

Q. And at the following meeting the minutes are read and the directors are asked if they want to approve the minutes as read?

A. No, the minutes are not normally read. Normally they have been distributed to the directors, and they are not read at the meeting.

Q. Does it ever happen that the directors point out some errors in the minutes of a prior meeting, and suggests that they be corrected?

A. I think there have been some suggested corrections, yes.

Q. Do you have any recollection that any different procedure was followed in connection with the minutes of the meeting of May 17, 1961?

A. I do not.

Q. Will you now tell us to the best of your recollection the nature of the reports that you made to the directors at this meeting of May 17th?

A. Except for being refreshed that I reported on this before you came into the meeting, rather than after you came into the meeting, I would think my testimony already [990] given, was correct.

Q. You understood, did you, that at that time the board was meeting with a possibility they might have a different point of view than the one you shared, is that right?

A. That is correct.

Q. Are you now testifying that you made a full presentation of all aspects of the problem?

A. I made a presentation which, with what Mr. Rowe had already said, I thought adequately outlined the problem.

Q. Are you now testifying that what you did in effect was substantially endorsed by what Mr. Rowe, the counsel, had said to the board.

A. He had explained certain portions of this, and I elaborated on what he said.

Q. I would like to know now what it was that you explained, Mr. Tillinghast, because while I believe the record does disclose what your views and opinions were on May 12th, subsequent to that time you had an opportunity to look at this piece of paper that was handed to you on the 16th, and you had the benefit of meeting with, perhaps informally, some other directors, and now I would like you to testify as accurately as you can the [991] report that you made to those directors, and the explanation that you gave as to what was being proposed, and the views and recommendations of the management, and the reasons for those views and recommendations, to the best of your recollection.

Mr. Sonnett: Mr. Rankin, I am under the impression that the witness testified previously and set forth what he could recall as to what he said to the board of directors, and that the witness has just said that except for when he said it, his prior testimony sets forth fully his recollection.

I think this, therefore, is repetitive and wasting time.

The Special Master: I am not clear from the record just what the witness finds in conflict with his testimony in the minutes.

Mr. Sonnett: Only that what he said to the board, he said before Mr. Davis was invited in, rather than his earlier testimony that he thought it was after Mr. Davis made his presentation.

The Special Master: What is this about the Tool Company meetings that he questions whether the minutes accurately reflects?

A. I have no recollection at this time of any meet- [992] ing with the Tool Company, or any Tool Company representative pertaining to this.

The Special Master: Do the minutes purport to say that you so reported?

The Witness: They do.

The Special Master: That you did have such meetings?

The Witness: Yes, it says I reported further on meetings and other discussions with representatives of Merrill Lynch Fenner & Smith and Hughes Tool Company on this subject. Literally, this doesn't say that they were meetings that I had with Hughes Tool Company, although one conceivably could infer that.

My testimony is that I cannot recall having had any meetings with representatives of Hughes Tool Company, if that is what the minutes purport to state.

The Special Master: I think at this point the parties are entitled to determine exactly what the witness said to the board of directors in regard to this matter so that we can have it in one place.

The Witness: I would merely have to repeat what I said before, which is that I discussed my discussions with Mr. Forrester, explained—

The Special Master: Can you describe in sub-
[993] stance what you said, and anything that anybody else said, so that we can get something more than just discussions?

The Witness: Mr. Rankin, I am afraid that I would be somewhat misleading if I purported to be quoting what one person said and what another person said, because it is not that clear in my mind.

The only thing I can say is that as I recall it, I mentioned that I had met with Mr. Forrester and Mr. Rowe and Mr. Reed and Mr. Joy, and Mr. Hagarty, and Mr. Leslie, and that they had outlined their proposal. That I said to them that I was extremely doubtful that such a program was possible of accomplishment. That I did not think it was realistic, and from what limited experience I had had in the securities field told me that it would be quite impossible to bring two new parties into a financing, and with a week's delay resolve all the problems that might arise in getting out a registration statement, and getting all the problems solved so that everyone was in agreement.

I said that I thought that the Boeing program and its accomplishment was of great importance to TWA, and that I was concerned as to whether this [994] embarking on such a program as was suggested would lead to anything other than delays, and that I was afraid we might get into a situation where we missed our date of May 31st, which was the deadline for the offering of the subordinated debentures, and also the deadline for meeting the financing requirements of the Boeing program, and I thought it would be a great mistake to run any risk in trying to do

what seemed to me very unlikely of accomplishment—any risk of interfering with our settling of the financing of the Boeing deal.

I said that I had told Mr. Forrester very frankly that that was my point of view. That none of the people present had been willing to give me or express any opinion. That one could with assurance accomplish this within the postponement requested, and in my mind, it would be an unwise thing for TWA to do.

Q. And that, you feel, was the complete statement of what you reported to the board?

A. As far as I can recall it today.

Q. Following the minutes which read "He also read to the directors a letter from Dillon, Read & Co. concerning the effect of a delay in the offering of the [995] debentures." That is Defendants' Exhibit 24?

A. That is right.

Q. You read that in its entirety—this letter?

A. I believe that was read in its entirety. I should have added to my testimony that I said that I had felt that I should consult with Dillon, Read as to the possible effect on our financing, and obtain their opinion as to whether or not the fears I had were substantial, or were groundless, and at my request they prepared a letter summarizing their views.

Q. At that point do you recall any of the directors asking questions or for explanations, either based upon the Dillon, Read letter, or the statement that you had made? Did everybody remain quiet?

A. No. I am sure there was a discussion. I believe I recall Mr. Slack entering into the discussion.

Q. Do you recall what he said?

A. I don't have any recollection of anyone having quarreled with the position or seriously questioned the position I took on the matter of delay.

Q. Would you say that the directors there predicated acquiescence in what you said?

A. Yes. The attitude was one of general agreement.

Q. And then, referring to the minutes, Mr. Tillinghast then read also to the meeting [996] a letter dated May 16, 1961, from Merrill Lynch Pierce Fenner & Smith outlining the proposal for their underwriting, the interest of Hughes Tool Company in the proposed offering of subordinate debentures.

Did you do that?

A. Yes.

Q. That was the letter you had received the previous day, which had these attachments?

A. That is correct.

Q. Did you read the entire letter to the board?

A. I read the letter. I don't believe I read all the attachments.

Q. Then Mr. Breech made some comments—turn to page 3. The next paragraph refers to the recommendation you made, which I assume you have described, isn't that right?

A. Yes.

Q. Then Mr. Breech commented on the lateness of the proposal by Hughes Tool Company, and suggested the alternative or secondary offering of the debentures by the Hughes Tool Company, and offered the cooperation of the corporation in such an offering. Do you remember that?

[997] A. Yes.

Q. Did Mr. Breech comment at some length on his views?

A. I don't think I can add anything to what I have already testified.

Q. I am trying to understand to what extent Mr. Breech made any comments?

A. I already testified to that.

Q. Were they lengthy comments?

A. No, I don't think they were lengthy.

Q. They were brief?

A. They were relatively brief.

Q. Did he in effect say "I agree with Mr. Tillinghast, and I don't think we ought to grant this request of the Tool Company"?

A. I don't recall his having said specifically "I agree with Mr. Tillinghast."

My recollection is rather he sort of picked up where I left off, and said "After all, Mr. Hughes has had months to decide to do this if he wanted to. This thing has been pending for quite a period of time, and I think that he can, if he is sincerely interested in a distribution of his interest, that he can do it by means of a secondary offering, and it is not necessary to post- [998] pone TWA's offering for that purpose."

Q. You referred to Mr. Slack who had formerly been counsel for the Hughes Tool Company?

A. Yes.

Q. Do you recall if he made any remarks based upon his prior experience with the Tool Company or Mr. Hughes?

A. My recollection is that he said this was a fairly typical Hughes maneuver.

Q. What maneuver was he talking about? Did he indicate to the board the maneuver involved?

A. I don't recall he elaborated it.

Q. But everybody understood it?

A. Everybody understood what he meant.

Q. And then you will note at 10 o'clock Mr. Davis was invited to attend the meeting?

A. Yes.

Q. All you described took place between 9:39 and 10 o'clock?

A. That is right.

The Special Master: We will adjourn until 2 o'clock.

(Whereupon, at 12:45 p.m., the hearing adjourned until 2:00 p.m.)

---

[999] AFTERNOON SESSION

2:00 P.M.

The Special Master: Are you ready to proceed?

Charles C. Tillinghast, Jr., resumed the stand and testified further as follows:

Examination (cont'd) by Mr. Davis:

Q. Is it your testimony that the decision of the board was made during this period from 9:30 to 10 o'clock?

A. No, it is not. The decision of the board was made after you left.

Mr. Davis: I don't know exactly how or why it happened, that we have not received copies of the complete minutes of the board of directors from January 1, 1961 to the date of the request. It may

be through a misunderstanding or confusion that took place.

I understand that we were furnished with excerpts of certain minutes, and it may have been that there was a confusion as to whether we were requesting excerpts from the minutes or the minutes themselves of the meetings which were clipped when we went over the documents.

In any event, may I now request TWA furnish [1000] us as soon as possible with a photostatic copy of the minutes of the meetings of the board of directors or meetings of the committees of the board of directors for 1961, including any reports or documents which were annexed as part of the minutes, or which were presented to the meeting of the board involved.

The Witness: Mr. Holliday gets all of the minutes of the board.

Mr. Davis: It may be, but if he has received them as a director, they are not presently available to the Tool Company. What Mr. Holliday has done with the minutes he received, I do not know. It may very well be, that as you know, Mr. Holliday spends a great deal of time traveling, and I am not sure that all were received by him.

It would facilitate and expedite our efforts to discover the facts if it would not be too much of an inconvenience to TWA to make that material available to us. I can also make an appropriate motion.

The Witness: Let me say for TWA that this has been made available to you. If by any chance any of it hasn't been made available to you, it will [1001] readily be made available to you.

• • • • •

[1069] Q. I understand your prior testimony to be that the actual decision by the board to reject the request of the Tool Company was not made until after I appeared before the board at 10 o'clock, is that correct?

A. That is correct, yes.

Q. Do you have the minutes of that meeting before you?

A. I have an excerpt from the minutes of that meeting before me.

Q. You mean the first page is missing?

A. I don't know just how much is missing.

Q. The pages are numbered. Do you see the page number at the top of the page? Yours starts with page 2?

A. Yes.

Q. Let me show you my copy. Do you see that the first page is missing? Do you satisfy yourself as to that, Mr. Tillinghast?

A. Yes.

Q. You have page 2?

A. It starts with page 2.

Q. And you have page 3?

A. Page 3.

Q. You have got page 4?

A. Page 4.

[1070] Q. And 5?

A. And 5.

Q. And 6?

A. And 6.

Q. And 7?

A. No.

Q. It stops at page 6?

A. Yes.

Q. You see that Mr. Davis left the meeting at 10:45?

A. Yes.

Q. That appears at page 4?

A. Yes.

Q. Do you have any doubts that the minutes correctly reflect when Mr. Davis left the meeting?

A. No, that would accord roughly with my recollection as to how long you were there.

Q. At this point Mr. Reed, counsel for the voting trustees, entered the meeting, isn't that correct?

A. Yes.

Q. That is what the minutes reflect?

A. That is correct.

Q. That is in accordance with your recollection?

A. That is in accordance with my recollection.

[1071] Q. He was apprised of the discussions held on the subject of the financing with particular reference to Mr. Davis' comments?

A. That is correct.

Q. He was brought up to date for the comments that were held from 10 to 10:45?

A. Yes.

Q. The minutes read, "At this point Mr. Francis C. Reed, counsel for the voting trustees, entered the meeting, and was apprised of the discussions held on the subject of the financing with particular reference to Mr. Davis' comments."

A. Correct.

Q. That is in accordance with your recollection?

A. That is correct.

Q. Then the minutes read "After further discussion, it was moved, seconded, and carried that the corporation should decline the request set forth in the letter of May 16, 1961 from Merrill Lynch Pierce Fenner & Smith, for a postponement."

Do you see that paragraph?

A. Yes.

Q. After 10:45, Mr. Reed came into the meeting, is that correct?

[1072] A. That is correct.

Q. And someone—do you recall who—purported to bring him up to date as to what had transpired from 9:30 to 10:45?

A. Yes. At this point I don't have any distinct recollection as to who summarized what had transpired before then.

Q. Then following bringing Mr. Reed up to date, a motion was made denying the request of Merrill Lynch, isn't that right?

A. That is correct.

Q. It was acted upon?

A. It was acted upon.

Q. Look at the minutes at the bottom of page 4—Mr. Holliday advised the meeting that on the advice of counsel he would not accept the responsibilities as a director for the statements in the prospectus, and withdrew the power of attorney previously given by him authorizing others to sign amendments to the registration statements as his agent. That took place, did it?

A. Yes.

Q. After that at the top of page 5, "After full discussion, upon motion duly made and seconded, the following resolutions were adopted, Mr. Holliday opposed."

[1073] A. Yes.

Q. There appears four resolutions relating to fixing the price as to which the debentures were to be offered?

A. Yes.

Q. That was after a full discussion as to the price?

A. I don't believe there was very much discussion as to price.

Q. The statement appearing in the minutes, "After full discussion," does not accurately describe what took place?

A. I didn't say that. I said I don't recall that there was any extensive discussion as to price.

Q. There was some discussion?

A. Certainly the price was stated. My recollection is it was discussed.

Q. At the meeting?

A. At the meeting.

Q. By the directors?

A. The price was explained to the directors. I do not recall that the price was the subject of extensive discussion

Q. Do you recall who made the presentation with re

[1074] spect to the price?

A. I believe Mr. Rowe did.

Q. How long do you think he spoke on that subject?

A. I would guess that the whole matter of price occupied a minute or two.

Q. Were the actual resolutions read in toto?

A. The resolutions were before the meeting. I do not recall they were read in toto. I think each director had copy of the resolutions.

Q. Are you quite sure of that?

A. No, I would not say I am quite sure of it. I think that was the case. I would be surprised if it wasn't.

Q. On page 6, "Mr. Holliday requested that the time of the adoption of the foregoing resolutions be recorded as 11:02 a.m."

A. Correct.

Q. Is that a correct statement of the minutes?

A. I think it is certainly substantially correct.

Q. Whoever made it recorded it as 11:02 a.m."?

A. I am sure if Mr. Holliday had been badly off when he made this request, that somebody would have argued with him, so I presume 11:02 is substantially correct.

Q. Isn't that what Mr. Duckworth did, to record the [1075] time as 11:02?

A. It says Mr. Holliday requested that the time of the adoption of the foregoing resolutions be recorded as 11:02 a.m.

Q. Then the next sentence, "Mr. Rowe temporarily left the meeting at 11:02 a.m. to direct that amendment No. 4 to the registration statement be filed immediately with the Securities and Exchange Commission"?

A. That is correct.

Q. You have no doubt these minutes correctly reflect what happened?

A. I have no doubt.

Q. Between 10:45, when Mr. Davis left the meeting, and 11:02, first Mr. Reed was brought up to date as to what had happened?

A. Right.

Q. Then there was a discussion with respect to the request of Merrill Lynch for an extension of time?

A. Right.

Q. Then Mr. Holliday made some statement with respect to withdrawing his power of attorney?

A. Right.

Q. And then there was a full discussion or some discussion of the price amendment?

[1076] A. Right.

Q. And all that took place between 10:45 and 11.02?

A. I believe that is correct.

Q. Now will you please tell me what the discussion was that took place, and what was said to the directors there

present relating to the action to be taken on the request of Merrill Lynch for an extension of time?

A. My recollection is that after you had left, and after the situation had been summarized by Mr. Reed, someone made a motion, I think myself, that the request of Merrill Lynch Pierce Fenner & Smith be respectfully denied, and that we express our readiness to cooperate in every way in a secondary offer.

Q. Therefore at that time there was no further discussion of the merits or lack of merits of the request?

A. As I recall it, there was some more discussion and some more comment on the thing, all of which, as I recall it, were to the point that it didn't seem to be of any interest to TWA to grant this request.

Q. Do you recall who made what comments? Did you make some further comments?

A. I don't at this point remember any specific comments, but I am quite sure there were some, Mr. Davis.

Q. Isn't it a fair statement, Mr. Tillinghast, that [1077] the deliberations, or to the extent to which there were deliberations, as to this decision to be made by the board at that meeting, took place between 9:30 and 10 o'clock, and that after my presentation it was really a matter of a formality of someone making a motion and denying the request?

A. The burden of the discussion certainly took place before. I think, Mr. Davis, that it would be only fair to say that your appearance there, and the things that you said, did a great deal, I think, to solidify the opinion of the directors that this request ought not be granted.

Q. Can you identify the things that were said during the 45 minutes that I was at the meeting, which you have characterized as solidifying the conclusion or the feelings of the board?

A. Yes, Mr. Davis. I don't know to what extent you want me to go through the whole discussion, as I recall it.

Q. Just answer the question, if you can.

Mr. Davis: Will you read the question back to the witness?

(The question was read.)

A. Yes, Mr. Davis. You stated in effect several [1078] times that unless TWA was prepared to acquiesce in the request of Merrill Lynch in this event as a business matter, your client was prepared to waive the objections of Hughes Tool to our registration statement. That you proposed to oppose the effectiveness of the registration on the ground that the registration statement was incomplete and improper, and you went through quite a list of specific matters with which you took issue.

Q. Isn't it a fact, Mr. Tillinghast, that a portion of that 45 minutes was devoted to my explaining that the Tool Company was confronted with the necessity of either stating its position with respect to the 990 program, and other related matters, and that if a registration statement went to the public, particularly if it was to be used in connection with a secondary offering, in fact, the Hughes Tool Company would have lost the right to thereafter assert any claims in that regard? Isn't that the substance of what took place?

A. That is not entirely correct, because I do not recall, and do not think that you said anything about if it is to be used in connection with a secondary offering.

Q. The purpose was to urge the directors to give favorable consideration to the request of Merrill Lynch, [1079] was it not?

A. That is right. What I understood you to say was that if we were prepared to give favorable consideration to Merrill Lynch, you would forget about the inadequacies of the registration statement, and that was a business decision your client was proposing to make, but if we weren't prepared to do that you had no choice but to bring to the attention of the Securities and Exchange Commission, what you considered to be a number of inadequacies in the registration statement.

Q. Do you recall what those inadequacies were that were presented by me at that meeting?

A. I remember some of them. You are quite correct in stating that you said initially that Hughes Tool Company was faced with a problem, that if it maintained silence it might be deemed to have waived or acquiesced in certain things, and then you went on, as best I can recall at this time, to say that you felt that the registration statement was deficient in not pointing out the voting trust might be terminated, otherwise in accordance with its terms, and you were presently studying, and not in a position yet to give an opinion as to its invalidity of the voting trust as a consequence of certain circumstances of its creation.

[1080] You talked about my employment contract. I think you said that you thought that the registration statement was deficient in not having pointed out facts relative to prior connections that I may have had with the financial institutions.

You talked about the 990s, and said the registration statement was deficient in its failure to contain a statement as to whether or not we proposed to claim that we were entitled to the 990s, and you also said, if I recall correctly, that it was deficient in failing to state whether there was any obligation on the part of TWA to take the 990s, and you

said you were studying that question, and hadn't yet formed an opinion.

You also talked about the fact that maybe Hughes Tool Company would be considered an underwriter. I believe you also stated that you felt that the registration statement should say something about the financial institutions being controlling persons.

At the moment that is as much as I can recall of the specific objections you mentioned.

[1081] Q. And those are the remarks which solidified the opinion or conclusion of the board, is that correct?

A. No, Mr. Davis, it wasn't those particular remarks so much as I think it was the remarks that preceded them, when you appeared at the meeting and said that there were two subjects that you wanted to talk about. One was the matter of the Merrill Lynch proposal, and the other was another matter which you were not at liberty to disclose until the first matter had been disposed of. That you had given a commitment to Merrill Lynch that you wouldn't raise the second question until the first one had been dealt with.

As I recall it, you talked in that vein for a couple of minutes, and I believe both Mr. Slack and I separately said "Why don't you come to the point and tell us what it is. You assume to be threatening us with something. Now, let us get it out on the table."

At that point my recollection is that after having said again you had told Merrill Lynch that you wouldn't get into this second matter until the first matter was disposed of, you said, "Well, all right, here is what the problem is."

I got the impression, as indeed I think did most of the other people there, and this became clearer as you [1082] left, that we were being threatened with the fact that either

we went along with the Merrill Lynch proposal, or you were going to raise trouble with our registration.

Q. To see if I can sharpen your recollection a little, Mr. Tillinghast—as you have testified, when I came in I indicated that there were two matters I wished to discuss?

A. That's correct.

Q. The first one was whether or not the Merrill Lynch request for an extension of time was to be granted or not?

A. That's correct.

Q. And I inquired whether or not a decision had yet been made?

A. That's correct.

Q. Do you recall the answer that was given as to whether a decision had yet been made?

A. The answer was given that a decision had not yet been made.

Q. That's right. Then I in effect said that that created a problem to me?

A. You continue.

Q. Do you recall my advising the board that the Tool Company had committed itself to Merrill Lynch to proceed [1083] with a secondary offering, and had furnished Merrill Lynch with a document to that effect?

A. Yes.

Q. And if the Merrill Lynch request was granted, the Tool Company was prepared to waive asserting certain claims which it felt it had, or possibly might have in connection with the matters you have described—the voting trust, et cetera?

A. My recollection with respect to this latter part is that you did not get to the point of stating the dilemma of Hughes Tool Company, and their willingness to waive their objections to the registration statement, until after you had talked for some time with respect to the proposed un-

derwriting, and had at least twice stated that you couldn't deal with the second matter until the first one had been disposed of, because you had assured Merrill Lynch that you would not do so.

Q. And the second matter being the objections which the Tool Company had to the registration statement?

A. That's right.

Q. And that the nature of those objections of the Tool Company would obviously be affected by whether or not it was going to participate in the secondary offering?

[1084] A. That's correct.

Q. I recall prior testimony to be that in your telephone conversation with Mr. Breech, Mr. Breech in substance indicated to you that this request of Merrill Lynch was a matter which should be decided by the board, and not by you or by him, is that correct?

A. That's correct.

Q. This was the board meeting at which the decision was to be made?

A. That's correct.

Q. There had been no decision made on the day before?

A. There had been no decision made the day before.

Q. And in that half hour between 9:30 and 10:00, before I appeared in the room, is when there was that discussion?

A. That's correct.

Q. That is, after taking care of the preliminary formalities of the meeting, and the description of the offering?

A. Yes.

Q. Are you satisfied that you have fully and completely and adequately described the nature of the discussion and consideration that was given by these directors, particularly the outside directors, with respect to [1085] this request of the Tool Company?

A. As far as I can specifically recollect, Mr. Davis, as developed earlier in the day, we had the day before, in the late afternoon, a meeting of the Audit and Compensation Committee, to deal with the matter of granting options under the stock option plan. I would be surprised with that many directors present if there weren't some discussion of it at that time.

However, I have no specific recollection of any discussion of it at the meeting, and I mention this merely to say that I think the directors who were there very likely got some of the background on the thing before the meeting the next day. So far as any decision being made, I am quite sure that there was none.

Q. Most of those outside directors had become directors after the 1960 financing, isn't that correct?

A. There were only two. Yes, there were three outside —excuse me. The answer is yes.

Q. And those were directors, therefore, who were unfamiliar with the nature of this commitment between the Tool Company and TWA with respect to this offering to be made of subordinated debentures, isn't that correct?

A. I think they were broadly and generally familiar with it. I don't believe they were familiar with the [1086] details of it, except in the case of Mr. Sessel, who undoubtedly was quite familiar with it.

Q. Did you describe or explain to those directors that after all TWA was not going to realize any financing, any new money as a result of this new offering?

A. I doubt very much that I said that.

Q. Did you say anything which conceivably might have been construed or interpreted by the directors present that this offering was primarily for the benefit of the Hughes Tool Company?

A. I doubt that I said that. Possibly I might have, but I really doubt it.

Q. Did you explain or say anything to those directors present that might have been construed by them as an indication that this deadline of May 31st was a deadline in the agreement between the Tool Company and TWA?

A. I don't believe I stated it exactly that way, although I know that I discussed with some people—I don't think with directors at this time—I think it was with the people at the time we had the meetings on the 12th, the question of just what the effect might be if we missed the date, and whether or not we would get into a technical controversy over the effect of failing to do this before the 31st.

[1087] Q. Did either Mr. Breech or Mr. Rowe, or anyone else present at that meeting, attempt to explain to the directors there present the matter indicated by my last two or three questions?

A. What time are you speaking of?

Q. At that board meeting—to those directors who were there to meet and act upon this question.

A. I don't recall it.

Q. Did you or Mr. Breech or anyone else there present make any statements to the effect that the granting of this extension of time would adversely affect the financing of the Boeing program?

A. Oh, yes.

Q. You said that, did you?

A. Yes, and I have already testified to it several times.

Q. Mr. Breech said that too, did he?

A. I don't remember Mr. Breech having said that. I am sure I said it. That was the burden of my position, and I had the letter from Mr. Brandi dealing with that subject.

Q. Did you explain to them how and why it would interfere with the financing of the Boeings?

A. It wasn't the question of how it would interfere.

[1088] Q. How it would, or why?

A. How it might interfere.

Q. Did you describe to them how it might interefere?

A. I did.

Q. In any way other than what you have testified to?

A. No, as I testified to here.

Q. Did you say anything at all with respect to what possible advantage there might be to TWA to grant this request of the Tool Company, or of Merrill Lynch on its behalf?

A. Yes. We discussed the question of the possibility of realizing another $11-½ million out of it, and felt that on the terms on which it was available, that it wasn't a a sufficiently attractive inducement to warrant taking this risk.

Q. Did you point out to those directors that the Merrill Lynch proposal would in effect give TWA an underwriting for some $11-½ million worth of debentures at no cost to TWA?

A. No. I believe you stated that, and that, I believe, was in the Merrill Lynch letter. That was quite clearly understood.

Q. That would have given TWA an additional $11-½ million of equity moneys?

[1089] A. Not equity moneys.

Q. The subordinated debentures?

A. Subordinated debentures.

Q. Income debentures?

A. Income debentures—6-½ per cent debentures.

Q. At no cost to TWA in raising this additional money?

A. That's right.

Q. And it also provided a guarantee by the Tool Company of one additional year's interest on all these income

debentures, including those that would go to the public? Did you explain that to them also?

A. That was clear. Again, that was in the Merrill Lynch proposal.

Q. It is not quite clear to me to the extent to which you had read the Merrill Lynch letter in its entirety to the board. Do you recall whether you read it in its entirety?

A. I believe the covering letter was read in its entirety.

Q. I am interested in the letter or documents handed to you the preceding day, which described the proposal itself. Did you read that out at length?

A. You mean with all the attachments?

[1090] Q. What did you do, Mr. Tillinghast?

A. I have testified several times that my recollection is that I read the Merrill Lynch letter, but not the attachments.

Q. What did the attachments consist of?

A. The attachments consisted of, as I recall it, a resolution of the board of directors of the Hughes Tool Company and Merrill Lynch.

Q. And is it your testimony that there was a rather full discussion of the advantage and disadvantage to TWA with this proposal?

A. There was the discussion that I have already described, Mr. Davis.

Q. As chief executive officer of TWA, is it your testimony that it was a full and complete or adequate, discussion, from your point of view?

A. From my point of view as chief executive officer, it was an adequate discussion.

Q. I believe you also testified that you read to the board the Dillon, Read letter of May 15th, which is Defendants' Exhibit 24?

A. That's right.

Q. You read that in full?

A. I believe so, yes.

[1091] Q. I notice the sentence at the end of the third paragraph which reads:

> "We do not believe that the inducement offered would adequately compensate TWA for the risk entailed in this delay."

There was no representative of Dillon, Read present at the meeting, was there?

A. No.

Q. Did you describe to the board what Dillon, Read meant by the inducement offered?

A. I don't know that I discussed it specifically as such. I think that it was obvious that they were talking about the cost or expense of underwriting the additional $11-½ million of debentures.

Q. Do you now recall whether any directors asked a question "What inducement is Dillon, Read talking about?"

A. I have no recollection that anyone did.

Q. I notice in that same paragraph the statement "We confirm to you that after consideration of the facts, we have advised you that we believe a postponement of the offering would not be in the best interest of TWA, because it might well have a detrimental effect on the completion of the $147 million in financing necessary to purchase new equipment."

[1092] A. That's correct.

Q. Did any director ask you to explain what Dillon, Read meant by that statement?

A. Not that I recall.

Q. Do you now recall giving any more detailed explanation as to the meaning of that sentence, other than what you have already testified to?

A. No.

Q. As I understand your testimony, this was Dillon, Read's first approach to this problem—presented to them on Friday, May 12th, and this was a letter dated May 15th, over the weekend. Did you indicate to the directors that Dillon, Read reached that conclusion after, at best, a hasty consideration of the problem?

A. I am quite sure I told the directors that I had talked with Mr. Brandi on Friday, and asked him to confirm this, which he had done subsequent to that date.

[1093] Q. My question to you is whether or not you called to the attention of those directors that the question had been put to Dillon, Read on Friday, and that this was a letter dated the following Monday.

A. I didn't specifically call that to their attention, I am quite sure. I should say, Mr. Davis, just to keep the record straight, that I believe this question was first put to Dillon, Read by Mr. Leslie the day before, when Mr. Brandi visited me in my office—that was not the first time, I am quite sure, that he had heard of the matter.

Q. Did you or anyone else at the meeting indicate that the lending institutions had been contacted to get some reaction or point of view or feeling as to how they would feel towards proceeding with the then contemplated Boeing financing?

A. Not that I recall, Mr. Davis. I don't think anyone said that.

Q. Mr. Tillinghast, I want to be fair to you, but I am frankly somewhat puzzled, if I may say so. I understand your testimony to be that the primary concern that you had

which caused you to recommend rejection of this proposal by Merrill Lynch was your concern over this Boeing financing?

[1094] A. That's correct.

Q. And that the Boeing financing was something which had been in the works at least informally prior to your becoming chief executive, but it was progressing fairly satisfactorily?

A. That's correct.

Q. And you are now saying, as I understand, that you did not think it was important for anyone to communicate with these lending institutions to find out if, in fact, such a delay, or any delay in this subordinated offering, would, in fact, jeopardize this financing?

A. Mr. Davis, I didn't talk with the financing institutions. So far as I know, Mr. Leslie didn't talk with the financial institutions, except that both of us talked at some point, I am sure, with Mr. Sessel.

Q. Who talked to Mr. Sessel?

A. I say I am sure that both of us at some point talked with Mr. Sessel.

Q. You mean between May 11th and May 17th?

A. Yes, I have already testified to that, Mr. Davis.

Q. Proceed. I do not want to interrupt your [1095] train of thought at the moment.

A. I was quite content to discuss this with Mr. Brandi and take Mr. Brandi's view on the subject, because indeed that is one of the reasons that we retain Dillon, Read.

Q. I am not suggesting that you did not previously describe this meeting or conversation with Mr. Sessel, but it just happens to escape me. Would you mind referring back to what you have in mind about a meeting or discussion with Mr. Sessel relating to this subject?

A. Well, I think I testified before, Mr. Davis, that somewhere between the time this first came up in the directors' meeting, that I had at least one conversation with Mr. Sessel during the course of which he said in substance, "This is a standard Hughes maneuver, to wait until the eleventh hour and then ask for time. He will ask for a week, and if he can't get a week, he will ask for a day; and if he can't get a day, he will ask for an hour; and if he can't get an hour, he will ask for a half hour."

Q. I remember that now. I would like you to explain how that meeting was called about and what was the purpose of the meeting. Was it for the purpose [1096] of discussing this very proposal?

A. Mr. Davis, I have no specific recollection of just when and where this was. It may have been by telephone. As we already established, I saw Mr. Sessel at the audit and compensation committee meeting.

Q. At 5:00 o'clock on the 16th?

A. On the 16th. It may have been there. Mr. Sessel occasionally drops in when he has an uptown meeting in the morning—he will just drop in for 10 or 15 minutes, and it may have been an occasion such as that.

At this point I can't tell you exactly when it was, but I do recall his warning to be very careful about getting into a situation where we had a delay.

Q. Did Mr. Sessel in those casual conversations with you or the meetings or discussions to which you are now referring, was he speaking for and on behalf of the lending institutions as a group?

A. No, I don't think he was speaking formally for the lending institutions. I think he was speaking more as a director of TWA.

Q. I am concerned at this moment at the effort made, or how you satisfied yourself that the lending [1097] institutions, or how the financing by the lending institutions was going to be jeopardized by a favorable consideration of this Merrill Lynch request.

A. Mr. Davis, I have been through that several times. I will try to do it again.

Q. I don't ask you to repeat anything you have already said.

A. Then I am afraid I have already said it all.

Q. Then I will repeat the question this way:

What efforts did you make, or anyone else on behalf of TWA, that you know about—what efforts did they make to communicate with the lending institutions as such for the purpose of determining their views or positions?

A. At this point, Mr. Davis, I cannot recall that anyone made any approach to the lending institutions other than the conversations that I had, and perhaps Mr. Leslie had, with Mr. Sessel—whether or not those are an approach to the financing institutions.

Q. So far as you know, Mr. Breech made no effort to communicate or contact any one of those lending institutions; is that right?

A. I know of none. I can't recall any at this [1098] point.

• • • • •

[1217] By Mr. Davis:

Q. Mr. Tillinghast, resuming to the events that you were describing, which occurred at the meeting of the board of directors of TWA on May 17, 1961, it is a fact, is it not, that the Securities and Exchange Commission failed to accelerate the price amendment which was filed

on that date with the Securities and Exchange Commission?

A. That is correct.

Q. And it is correct, is it not, that subsequent to that date, TWA filed further amendments to its registration statements, other than the price amendment?

A. That is correct.

Q. And it is correct, also, that those additional changes or amendments to the registration statement of TWA were made as a result of conferences between TWA or its counsel and the staff of the Securities and Exchange Commission?

A. Certainly in part at least, Mr. Davis. I could [1218] not state at this moment whether all of them resulted from that, but that was true of the main body of them.

Q. Isn't it correct that one of the amendments that was made as a result of these conferences with the staff of the Securities and Exchange Commission was the disclosure of additional facts with respect to the position of certain lending institutions, in relationship to the control or management of TWA?

A. Mr. Davis, the only thing that I particularly recall at the moment is that there were rather copious quotations from a letter that you had written, which were embodied in the final prospectus. I believe there were also some related changes in the prospectus, but they don't come immediately to mind.

Q. It is a fact, is it not, that TWA, through its representatives, insisted upon, or requested a hearing before the Commission, itself, with respect to the price amendment, or the acceleration of the price amendment? You were aware of that, weren't you?

A. Mr. Davis, it is not clear in my mind who asked for the hearing before the Commission. I know there was a

hearing before the Commission, but I am not sure at this point whether we asked for it or you asked for it.

[1219] Q. As I understand, at that time TWA and its management, and you in particular, felt that it was of extreme importance to TWA to have this registration become effective as soon as possible. That is correct, isn't it?

A. That is true.

Q. And you do understand that there was an oral presentation made to the Commission itself?

A. I do.

Q. Do you know on what day that was?

A. I hesitate to be positive about that. My recollection is that there were a couple of appearances before the Commission.

Q. Isn't it a fact it was on the 18th?

A. I was going to say if I had to guess, I would say the first one was on the 18th, and there was one subsequently, a week or so later, on the 24th or 25th.

Q. When the registration statement was eventually permitted to become effective by the Securities and Exchange Commission?

A. That is correct.

Q. I am referring to the first one, which was on either the 18th or the 19th—is that your recollection or do you have a recollection it was on the 18th?

[1220] A. I wouldn't be positive about that. I think it was probably on the 18th, but I have no way of specifically ascertaining that.

Q. But you do know that as a result of this oral presentation before the Commission, the Commission refused to accelerate the price amendment filed by TWA?

A. That is correct.

Q. And it is also your information that the Commission requested the Tool Company, through its counsel, to submit within 24 hours a letter setting forth, or confirming what had been stated to the Commission orally?

A. That is correct.

Q. Let me refer you to Defendants' Exhibit 12, and ask you if you can identify that as being in fact the letter which was addressed to TWA, and the Securities and Exchange Commission under date of May 19, 1961, which was sent by the Tool Company or its counsel at the request of the Securities and Exchange Commission?

A. Mr. Davis, without checking every page of it, that appears to be the letter, yes.

Q. In the course of your deposition, you identified a number of documents and letters as reflecting, as I understood your testimony, what you considered to be part of malicious and wilful interference, or some other [1221] kind of interference, by the Tool Company or its agents and representatives in the affairs of TWA. Do you recall your testimony in that regard?

A. Yes, I do.

Q. Do you identify this same letter, Defendants' Exhibit 12, as one of the communications that you considered and regarded as part of that interference?

A. Mr. Davis, I can't recall. The record will show whether I did, in fact, so identify it. If you are asking me the question now, I will say yes, I would identify it now as such a document.

Q. Will you please explain in what respects you regard this letter of May 19, 1961 as a wilful or other kind of interference by the Tool Company in the affairs of TWA?

Mr. Sonnett: I think the question is argumentative. He wants the witness to argue as to what the

document says, and as to what construction he puts upon it. I think if he wants argument, that should be for counsel.

The Special Master: I think he may answer.

A. I feel as I do, Mr. Davis, because of the fact that it was made, I thought quite clear by yourself, that this letter was written for the purpose of inter-[1222]fering with the plans and programs of TWA. You told us at the directors meeting on the 17th that unless we were prepared to co-operate in a program that you wanted to put forward, in which event you would overlook these alleged deficiencies, that you would take steps to assert these things that are embodied in that letter.

The purpose for which it was written, in my opinion, was for the purpose of interfering with the running of the business of TWA by its management, as it thought it ought to be run, and to have it run in favor of the special and private interests of a specific stockholder.

Q. So that your recollection may be clear, Mr. Tillinghast, let me refer you to page 666 of your deposition.

Mr. Sonnett: Are you going to read from the record? If so, I will accept your reading of it.

Mr. Davis: Yes.

By Mr. Davis:

Q. (continuing) The question was following some others:

"Q. That is one letter that you had in mind as being an interference with TWA—

[1223] "A. To the extent that it was part of an overall plan to interfere with the purchase of Boeing

aircraft, although I suppose the letter, on its face, is, let us say, fairly innocuous and routine. • • •

I would refer to a letter dated May 16th. Then you continued as follows:

"A. • • • The letter of May 19, 1961 to the Securities and Exchange Commission is, in my view, a clear interference with the management of TWA."

Do you now recall your testimony in that regard?

A. I am sure I so testified, Mr. Davis.

Q. Would you like to change that testimony now?

A. No. Are we talking about the same thing here?

Q. The letter of May 19th. May I show you Defendants' Exhibit 12 as the letter of May 19th?

A. My testimony is now, and apparently my testimony was then that I considered this a clear interference or an attempt to interfere in carrying on the business of TWA.

Q. I now would like you to explain the manner in which you believe this letter interfered with the management of TWA.

A. Well, it was done, in my opinion, for the purpose [1223A] and with the partial effect of delaying our registration becoming effective, with an aim, I believe, of so involving that registration in delay and controversy as to cause Boeing financing to abort, and to make it impossible for us to finalize our Boeing financing on the 31st of May.

[1224] Q. Mr. Tillinghast, I am going to respect your opinions as being your personal opinions. At this point I would like to ask you to state as fully as you can the facts and circumstances which had come to your attention, which is the basis of that opinion.

Mr. Sonnett: May I object to the form of that question. I think the witness gave a responsive answer to the question.

The Special Master: Isn't this a further development of that question?

Mr. Sonnett: I think with the wind-up that Mr. Davis gives his question, it is argumentative in form, he having asked the witness for his views, then says in effect he is not interested in those, he now wants to talk about something else. I think he just ought to put the question, and if so I will object on the ground it is repetitive, because the facts and circumstances preceding the date in question, the witness has testified to at great length a number of times. The record is full of it. This is a letter of May 19th.

The Special Master: If you ask the question as to the basis for his opinion, and confine it to anything he has not already described—

[1225] By Mr. Davis:

Q. I do not ask you, Mr. Tillinghast, to repeat anything that you have already said. You may incorporate anything you have already said by reference. I am interested in your stating as fully as you care to, the basis for the opinion you have just reiterated.

A. Mr. Davis, yesterday or the day before, I testified to the various circumstances which raised a great question in my mind as to whether or not this request for a week's delay was a genuine request, or was part of a scheme or device to delay the effectiveness of our registration and the offering of our debenture, and through that means to upset the consummation of the Boeing transaction.

I testified once before, I believe, although on the chance I am mistaken, I will say again that one of the reasons that convinced me of this was a statement that you are alleged to have made, to the effect that one thing that just was not negotiable was the Boeing purchase transaction in that you would do everything in your power to prevent its being consummated.

Q. Who reported to you these alleged statements attributed to me?

[1226] A. Mr. Reed.

Q. When?

A. I would say at about the end of May, or the first of June. I can't remember the exact date.

Q. Let me understand something else then, Mr. Tillinghast. Is it your testimony that at the time this letter of May 19th to the Securities and Exchange Commission and TWA came to your attention, you did not then consider it an interference with the affairs of TWA, is that correct?

A. No, that is not correct, Mr. Davis. I did so consider it.

Q. Then I would like you to refer to the facts that you had on or before May 19, 1961, which led you to the opinion you have expressed, and to what you have described as an aim on the part of the Tool Company to upset the Boeing transaction, and again I want to say before Mr. Sonnett interrupts me, that I am not asking you to repeat anything that you have previously testified to. You may refer to that by reference.

A. I think I have several times testified, Mr. Davis, about those things which led me, let us say from the outset, to be very concerned with whether this was a diversionary maneuver.

[1227] I have also testified about your own appearance at the board meeting, and the things that you said, which convinced me that my original suspicion that the aim of this was to divert and to delay, was a correct conclusion.

Q. In other words, your conclusion or opinion was based upon the facts that you have described in some detail in your deposition to date, is that correct?

A. That is correct.

Q. Is it fair to say that your characterization of the other documents that you identified on your deposition of January 10th, is also based upon those facts that you have heretofore described in your deposition?

A. Without going through each one of them, Mr. Davis, I would say generally yes, and I think I should add one other thing as part of the background against which this matter had to be viewed. I did not have any participation in them myself, but I was told by various people at various times that numerous attempts on the part of the voting trustee to meet with Mr. Hughes, or to find some basis for establishing a modus operandi, and the constant frustration of those efforts, and I am sure that what I had heard [1228] in that regard was one of the bits of background against which my judgment was formed as to what the purpose and aim of these various letters and actions was.

Q. Let me refer you to page—excuse me, are you finished? Let me refer you to page 668 of your testimony, Mr. Tillinghast, where your answer starts at the top of the page, when you refer to a letter of May 24, 1961, from Mr. Settles to Mr. Duckworth, which on its face is harmless except in the light of the purpose for which it was written, and then you continue as follows:

"The same—well, on May 25th, 1961, there is a letter to Mr. Hocker of the Securities and Exchange Commission,

which I deemed to have been for the purpose of delaying the effective[ness] of TWA's registration."

Do you see that testimony?

A. Yes.

Q. Let me hand you Defendants' Exhibit 11-D, which is a letter by me dated May 25, 1961, to Mr. Hocker, and ask you if that is not in fact the letter that you identified was referred to on page 668 of your testimony? Your answer is that it is, is that right?

A. Yes.

[1229] Q. Who called that letter to your attention, Mr. Tillinghast?

A. May I see it again, Mr. Davis, please?

Q. Yes.

A. I am not altogether sure that I can say at this point, Mr. Davis. I think I received a copy of it in the mail, but possibly counsel gave it to me. I am just not sure at this point. Perhaps my own copy of it would refresh my recollection, but from that I can't tell you positively.

Q. Did someone explain to you the meaning or effect of this letter?

A. I don't believe so.

Q. Let me call this portion of the letter to your attention. After the first sentence of the second paragraph, which reads as follows, "As I told Mr. Hocker, my client Hughes Tool Company disclaims any liability or responsibility with respect to said registration statement, or any statements which appear therein or omissions therefrom.

"Said registration statement was prepared without consultation with or approval by Hughes Tool Company or its counsel. Furthermore, Hughes Tool Company has not acquiesced in, nor does it acquiesce in the [1230] accelera-

tion of the effective date of said registration statement. However based upon a limited review of amendment No. 6 thereto, and amendment No. 7 which was received by me late yesterday afternoon, Hughes Tool Company has no desire to delay appropriate action by the Securities and Exchange Commission in the circumstances making said registration statement effective."

Did you give consideration to that portion of this Defendant's Exhibit 11 in connection with your testimony, Mr. Tillinghast? Had you given consideration to that portion of the letter I just called to your attention, in connection with your testimony?

A. Mr. Davis, answering a question that you asked me a moment ago about how did I get this, I notice from the last paragraph that a copy of it was sent to me, and I am sure I received it in the normal course.

Answering your question about when I testified the other day did I particularly notice and ponder the significance of the part that you have just read—no, I did not.

Thirdly, is my answer changed? No, it is not.

Q. May I ask you another question? Isn't it a fact that when this letter was written to the Securities and Exchange Commission, the registration statement [1231] of TWA had in fact become effective?

A. I gather that is the case, and that is why I think the statement to which you referred was more a polite acquiescence of the inevitable rather than any gesture in our favor.

Q. What I am trying to get at, Mr. Tillinghast, is for you to explain to me what are the facts which support your conclusion that a letter acquiescing to what has taken place constitutes an interference with the affairs of TWA.

A. At the risk of being repetitive, Mr. Davis, let me say once again that I considered that this whole line of corres-

pondence, this whole line of activity, had but one purpose in mind—strike "but one purpose in mind"—had as its principal purpose the disruption of the Boeing purchase contract. I believe you said as much yourself. It is all part of one plan and scheme, in my judgment, and every piece of paper written in pursuance of that plan and scheme constitutes, in my opinion, an improper interference with the affairs of TWA.

Q. Did you discuss with anyone those views and opinions at or about the time that you developed them?

A. Oh, yes, I am sure I discussed them with [1232] numerous people.

Q. Would you please identify the people with whom you discussed them most seriously?

A. Well, I am sure that I have expressed these views and to a degree discussed them with each of the directors of TWA. I have discussed them with counsel. I have discussed them with counsel for the voting trustees.

Q. When you referred to counsel before that, you mean Mr. Rowe?

A. Mr. Rowe.

Q. And counsel for the voting trustees, you mean Mr. Reed?

A. Mr. Reed. I am quite sure that on at least one occasion, maybe more, I discussed them with Mr. Olds.

I guess I would have to say, Mr. Davis, that I discussed them with probably everyone who had any legitimate interest in discussing the subject with me.

Q. Mr. Breech?

A. Oh, yes.

Q. Several times?

A. Many times.

Q. Mr. Sessel?

[1233] A. Mr. Sessel.

Q. Any of the other representatives of the lending institutions, insurance companies in particular?

A. At some time or another, and I can't place it right at the moment, I am sure that I discussed this with Mr. Keehn.

Q. Of the Equitable?

A. Of the Equitable, yes.

Q. Anyone from Metropolitan?

A. I would have to get my dates straight to be sure, but I have a recollection that I discussed it with Mr. Hagerty, at Mr. George Bovneizer's funeral.

Q. With respect to that one, can you give us an approximate time and date?

A. If you can find out when Mr. Bovneizer's funeral was, I can give you an exact date, but I met Mr. Hagerty by chance at Mr. Bovneizer's funeral, and standing on Riverside Drive, in front of the Riverside Church—

Q. Was this in May, June, July?

A. It was in the warm weather. I would say it was in May or June, although I would want to check to be absolutely certain. I remember running into Mr. Hagerty at that time, which I believe was only the [1234] second time or third time, I guess, I had seen Mr. Hagerty, in talking with him about things. I believe we discussed the flood of letters that were then coming from you, and which we all were receiving, and the purpose and significance thereof.

Q. Was this more than a very casual conversation?

A. This was in a very casual conversation.

Q. Did Mr. Hagerty express any point of view, or make any statement to you which either confirmed the views you expressed, or which tended to indicate any disagreement with the views you expressed?

A. No. The only thing I can particularly—I am not sure that I can remember anything he particularly said, except that I think he said, "You have to get used to this," or something to that effect.

Q. Do you have a recollection of about when you had occasion of discussing this with Mr. Keehn?

A. Mr. Davis, I am going to change what I said, because on the 29th of May I saw both Mr. Keehn and Mr. Hagerty separately, and I am quite certain that I discussed this at that time.

Q. Did you have in mind another meeting with Mr. Keehn, other than this one on May 29th?

A. Yes. Subsequent to May 20th, I am sure there [1235] was at least one occasion, perhaps a couple of occasions, when I talked with Mr. Keehn about something on the telephone, and mentioned all the letter writing that was going on.

Q. That was a relatively brief and casual discussion?

A. As I recall it now, yes.

Q. Now going to this May 29th date, I understand that you on that day saw Mr. Keehn and Mr. Hagerty on separate occasions.

A. That is right.

Q. Let us pursue Mr. Hagerty for the moment. Was that at Mr. Hagerty's office or where was it?

A. That was at Mr. Hagerty's office.

Q. Do you remember when—in the morning or afternoon?

A. In the afternoon, around 3:30 or 4 in the afternoon.

Q. You will note that on Defendants' Exhibit 1, your calendar, there is no notation to that effect. Are you still quite confident it was on that date?

A. Yes. I am quite confident it was on that date.

Q. Was this before or after you had met with Mr. Keehn?

[1236] A. This was both before and after I met with Mr. Keehn, because I met with Mr. Keehn, and then I met with Mr. Hagerty, and then I met with Mr. Keehn again.

Q. Perhaps you ought to describe then what was the occasion or circumstance that brought about this meeting or conference between you and these gentlemen?

A. Well, as I mentioned before, some time, a day one way or the other of the 24th of May, we got word that the Prudential would not participate in our financing.

Q. Excuse me for interrupting. I don't want to do it any more than absolutely necessary, but it would assist me if when you make an expression like, "we got word," if you would indicate someone reported something to you.

A. I think I already testified to that, Mr. Davis. We received word through Mr. Wadsworth that the Prudential would not participate in our financing. That left me in the unhappy position of being $39 million short of the amount of money that I needed to have in hand on the 31st of May.

As a consequence of that, I did some scurrying around, and succeeded in setting up a meeting or meetings with Mr. Keehn and Mr. Hagerty and Mr. Sessel [1237] and Mr. Wadsworth for the afternoon of the 29th, which, since it was the day between the weekend—Memorial Day was a very slow day in the financial community—it is that which helps me place it exactly.

Mr. Leslie and I went to Mr. Keehn's office, and if I recall correctly, we met Mr. Sessel and Mr. Wadsworth there. Mr. Wadsworth, I believe, previously had talked with Mr. Keehn. The purpose of our visit was to urge upon Mr. Keehn that the Equitable, along with the Metropolitan take up the rather substantial slack that was left by the Prudential's withdrawal from the financing.

I urged it with all the vigor at my command, and pointed out that I was in the position where I had a deadline on the 31st.

[1238] Q. That was a deadline by reason of your negotiating with Boeing?

A. Under the Boeing contract we had until the 31st of May to firm up our financing.

Q. Satisfactory to Boeing?

A. And to us. We had the right to cancel at a penalty of $850,000 on the 31st, if we didn't have our financing solid. After the 31st, the contract became firm.

I said to Mr. Keehn that I didn't think that I could go to my board or to the Executive Committee and obtain authority to let this dating by, unless I had the financing in hand, and that I felt that there was nothing that we could do but ask them to increase their participation.

Mr. Wadsworth had already worked out some tentative deal which would involve having the banks take $10 million more than originally planned. So that the amount of the insurance companies as a group would put up would drop from $117 million to $107 million.

What I was urging upon the Equitable was that they increase their participation from $39 million to $53-½ million, I guess the mathematics.

Mr. Keehn was very anxious that we find other [1239] insurance company money to participate in this, because he said that they had as deep a participation as they would like, and very much wished that we could find some other participant. He said he thought it would do TWA good in any event to broaden the number of companies with which it did financing, and broaden its credit picture as a consequence.

I suggested that they commit for this subject, with the understanding that first we try to obtain additional insur-

ance company participation, and that if we did, their share would be reduced.

He was worried about a technical problem in this regard, because insurance companies apparently cannot be underwriters, and he was afraid that if they agreed to take whatever was left, somebody might consider that they were improperly acting as an underwriter.

We suggested then—

Q. Who is "we"?

A. Mr. Wadsworth, or I. I can't remember exactly. That they commit for the full amount, and that without any commitment one way or the other for a scaling down of that in the event we found other insurance companies to participate, that we would, because we were equally anxious to obtain additional insurance company [1240] participation—that we would engage in an attempt to find additional insurance companies that would participate, and when, as and if we were successful in that regard, we would come back and renegotiate the deal.

Before we came to any conclusion in the matter, we went down to the Metropolitan, because we had a specific date—I can't remember whether it was 3:30 or 4:00, but we had a date at a specific time with Hagerty—we went down there and had a similar discussion with Mr. Hagerty, and I believe with Mr. Jenkins who was there.

Mr. Hagerty was, I would say, more appreciative of our problem, and more ready to act than Mr. Keehn, and I would say in approximately half an hour's time, we had what I took to be his personal commitment that he would recommend to his committee that their amount be increased up to the higher figure.

Q. $53-½ million instead of $39 million?

A. If that is the exact figure. Yes, I think that's right. Then we went back again to Mr. Keehn's office, and dis-

cussed the situation further with Mr. Keehn, and Mr. Keehn said that he would call a meeting of his committee on Wednesday, the 31st—yes, I am quite sure it was Wednesday, the 31st—that he would [1241] have a special meeting of his committee, and let me know the first thing on the 31st what he would be able to do.

He said that he personally was inclined to favor what we were suggesting, but that he didn't feel that he could say anything at all definitively until he had a meeting of his committee.

I should also add that during these discussions, Mr. Sessel indicated that he thought that it was entirely feasible for the banks to take another $10 million, but that he didn't think the banks would be willing to go beyond the $10 million limit.

Then we broke up and went in several directions.

Q. In your answer you referred to some discussion you had, I believe with Mr. Keehn, about the effort that would be made to get additional insurance companies to participate in this loan. Would you describe the effort that had been made, both prior to that meeting and subsequent to that meeting, by you or by TWA, or any of the representatives?

A. So far as I am personally concerned, Mr. Davis, I had made no effort at all. I am not sure to what extent, if any, Dillon, Read made an effort beyond trying to bring in the Prudential. My recollection [1242] is that Dillon, Read was concentrating on bringing in the Prudential as a third company, and as one, at least, of the very few companies that had indicated an interest in airline financing, and that no great effort had been put forward to bring in anyone else until after the Prudential fell through, following which Dillon, Read made several efforts.

Q. Can you describe what those were?

A. I know they approached, as I recall it, about five other insurance companies—Northwest Mutual, I believe was one of them. Massachusetts Mutual, I think, was one of them—and after having been turned down approximately five times, Mr. Wadsworth recommended they cease their efforts there, because he felt all this was doing was making a negative record for TWA, and it would be a mistake to continue the effort.

Q. I understand now the circumstances which brought about this meeting. Going now to the first meeting, which was with Mr. Keehn at the office of the Equitable—

A. That's right.

Q. I understand you were accompanied with Mr. Wadsworth?

A. Mr. Wadsworth was there when we got there, I [1243] believe.

Q. You went there with Mr. Sessel?

A. No. I think we met Mr. Sessel there. I went there with Mr. Leslie.

Q. You and Mr. Leslie went to Mr. Keehn's office?

A. Yes.

Q. And there you met Mr. Wadsworth and Mr. Sessel?

A. That is my recollection.

Q. Who else was present at that meeting, in addition to Mr. Keehn?

A. Mr. Keehn had either one or two other people with him, and I can't at this point remember who they were, Mr. Davis. I am quite sure it wasn't Bill Cowie, whom I know. I think it was someone—

Q. From the Legal Department, perhaps?

A. Possibly. Mandel something.

Q. M-a-n-d-e-l?

A. Mandel, perhaps, whom I wasn't familiar with.

Q. And the primary purpose of the meeting was to discuss the extent to which the Equitable would be willing to increase its participation from $39 million to $53½ million, is that correct?

A. The purpose of the meeting was to get a definite commitment out of them that I thought gave [1244] me the protection I needed on the 31st.

Q. In that connection you or someone else had occasion to refer to the activities of the Tool Company?

A. That's correct.

Q. Will you please describe how that came about, how the subject was introduced into the conversation, and what was said by the various persons there?

A. I can't, I am sure, Mr. Davis, remember everything that was said by everyone, but I know that among other things, I said that I thought that this was a very critical question. That I was satisfied that Hughes Tool Company was doing everything it could to prevent the consummation of the Boeing Transaction. That it was a clear example, I thought, of Hughes Tool trying to prevent the management from doing what the management considered to be in the best interests of TWA.

That they had set up a voting trust for the purpose of giving TWA an independent management that would run the company in an independent businesslike way, and that this was the first test the new management was being put to.

I thought if the management was to have power [1245] to run the company as it thought was in the best interest of the company, it at this time needed their support sufficient to enable the management to go ahead with the Boeing deal on the 31st.

Q. Do you recall what Mr. Keehn said, in substance?

A. What Mr. Keehn said in substance was that he quite appreciated that and understood it, and he felt unquestion-

ably some way of working this out would be found, and we should not worry too much. That undoubtedly there would be some solution, and I told him that I didn't think that I could go before my board or Executive Committee and just express the hope and speculation that something would work out that would make everything all right. That I felt that I had to have on the 31st a definite commitment for my financing, and that [if] I did not have a definite commitment for my financing, I did not see how I could go ahead with the Boeing contract.

Q. Did you also explain or have occasion to remark at the apparent efforts of the Tool Company to seek funds with which they might try to upset the voting trust?

A. No, I did not, Mr. Davis. I don't believe I discussed that.

[1246] Q. As I recall your prior testimony on or about May 17th you were very much concerned about the activity of the Tool Company, because it might adversely affect this financing arrangement. You were no longer concerned about the 29th?

A. I don't understand your question, Mr. Davis.

Q. You do recall testifying, do you not, that on May 17th your concern that the efforts of the Tool Company through Merrill Lynch to obtain a delay in the offering of the subordinated debentures was because of the impact it might have on this financing?

A. Yes.

Q. You were concerned about that?

A. I certainly was.

Q. As I understand, prior to the 29th you had not explored the validity of that concern with the insurance companies, had you?

A. If I may digress a moment, Mr. Davis, on that subject I would like to, let us say, amplify some of my testimony of yesterday.

As a result of talking with Mr. Rowe and scratching my own head and doing some thinking overnight, I am quite certain that Mr. Leslie on or about the 11th or 12th, possibly the 15th—somewhere along there—[1247] talked with the insurance companies, and asked them whether a delay would make any difference with respect to the financing. I believe, if I recall correctly, that he got a letter, a response that the insurance companies wouldn't take a definite position on it, but maybe it might.

I asked counsel to see if he could find, and they haven't yet, what I think is a memo that Mr. Leslie—either a memo for the files, or a memo he wrote me, let us say, just summarizing what the insurance companies had said. I just wanted to clarify that, since we got into this, and I am afraid I have lost the other.

Q. You say it is a memo that you are looking for at the moment?

A. Yes.

Q. May I request that when you find it, you furnish me with a copy of it?

A. Sure. I am not absolutely positive of that, Mr. Davis, but I think I am right, and I think we will find it sooner or later.

Q. You may be thinking of the memo you received with respect to conversations relating to the June 10th letter?

[1248] A. That is one of the things that troubles me, because I am trying to sort out the two things in my mind. But I think there is a memo anyway. Let me see if I can find it. I am, from thinking about it, quite sure that Mr. Leslie did talk—I am not sure whether he talked with

all three or not, but I know he talked with some of the insurance companies, and got some sort of a maybe out of it.

Q. Now to go back to the thread we were on. I recall your prior testimony to be, starting on May 11th, thoughts occurred to you of the possible efforts the Tool Company might make to refinance the existing moneys, or some other way terminate this voting trust. Do you recall that?

A. In order to clarify that, because I am not sure I would put it quite as you have—my recollection is that when Mr. Leslie first told me about this, and said some of the things to which I have already testified, we had a casual speculation as to what the probable purpose and meaning of this thing was, and that one of the things that was said at that time was that maybe what Hughes is trying to do is to raise enough money so that he can find some way of refinancing.

[1249] Q. And such efforts on the part of the Tool Company could have had, in your opinion an adverse effect on the additional financing that was then contemplated with respect to the Boeing program?

A. No, I don't think that—you have to assume a lot of things, Mr. Davis. I would suppose, and I am not sure that I really thought about it this way—I would suppose that I would have to agree that if there were a complete financing, and a termination of the voting trust, you obviously would have had a very real question as to what you did for further funds. But that was something, let us say, in the power and knowledge of Hughes Tool Company and not particularly within mine.

Q. Basically within those efforts on the part of the Hughes Tool Company, which in your view was jeopardizing the Boeing financing?

A. No, they weren't, Mr. Davis.

[1250] Q. I understood that you felt the delay in the offering of the subordinated debentures, which, admittedly, was not going to produce any more cash to TWA, was having or potentially would have an adverse effect on this Boeing financing. That is correct, isn't it?

A. Yes.

Q. That was the underlying basis for refusing the request of the Tool Company?

A. That's right. Let me say, Mr. Davis, that was one of the reasons.

Q. For refusing the request of the Tool Company?

A. That's right.

Q. The other reasons are reasons you have already described?

A. Yes. Everything that I would add as additional reasons has already been described.

Q. You felt that the insurance companies were likely to withdraw their support of the Boeing financing if for some reason this offering by TWA was delayed; is that correct?

A. I am not sure that I would say they were likely to. The question in my mind was whether there was any risk that they might, and I wasn't prepared to take [1251] any substantial risk.

Q. Did you ever understand the factual basis for that risk that the insurance company might withdraw their support if there was a delay in the offering by TWA?

Mr. Sonnett: I do not think you understand the purport of that question in the light of the witness' prior testimony.

By Mr. Davis:

Q. Do you understand my question?

A. I am not sure that I did. Perhaps if the reporter will read it back I will get it straight.

(The question was read.)

A. Let me answer that this way, Mr. Davis: I was very much afraid that if this thing were delayed—

Q. The offering of the subordinated debentures?

A. The effective date—and then we got into a controversy of the sort in part that we got into beginning on the 17th of May, that this might well upset the financing, and indeed my fears, or the substance of my fears was too clearly indicated, too clearly substantiated when, in fact, the Prudential did fall out.

Q. I understand that you felt that this occurrence [1252] might well upset the financing, and in fact it caused the Prudential to pull out.

What I want you to describe to me now, apart from your opinions, is what is the factual basis for that opinion. What were you relying upon—what anybody told you, or what did you think was going to happen? Why did you think it might upset the financing? Do you follow what I am trying to get from you?

A. Mr. Davis, I think I have testified to most of this several times, but I will take one more try at it here.

TWA had had a heritage of tremendous controversy, a heritage of tremendous controversy, delay and uncertainty, with respect to its financing.

The quarrels, disagreements, difference of viewpoint between Hughes and a number of financial institutions were well known.

We had a very important plane program involving a vast amount of money, which had a deadline.

I considered it a real risk, which I did not want to take, that if we got bogged down in delay, if we missed the date of the 21st for the offering of the subordinated debentures, if the Hughes Tool Company took a technical position, which I understand [1253] they have taken many times in the past, we might find ourselves going into June, July, August, in the midst of controversy, all of which involved the risk, in my opinion, that we might unhinge our financing, which seemed to be very nicely set up on a reasonably favorable basis, and that was a chance that I just was not willing to take. I thought it certainly would not be in the interest of TWA to take it.

Q. Have you discussed yesterday's testimony with anyone other than Carl Rowe?

A. No, sir. I will have to modify that. Mr. Sonnett was present down in the main hall here when I talked with Mr. Rowe.

Q. At that time in May you had been the president of TWA, or chief executive officer, for a couple of months?

A. I had been chief executive officer just one month on the 17th of May.

Q. Who had told you about this heritage of controversy and difficulties with the financing institutions? What facts had been called to your attention, or were you relying solely on newspaper accounts, or what is sometimes described as "what everybody knows"?

[1254] Mr. Sonnett: It is, then, what he has already testified to. He has been over this repeatedly about the account in Fortune Magazine—he has been all over this several times.

By Mr. Davis:

Q. Were you relying on the same thing as what you described, what you knew at the time you had your meeting with Mr. Breech on February 28, 1961?

A. No, between February 28th and this time I had learned quite a number of things in conversations with executives of TWA and conversations with directors of TWA, and conversations with Mr. Reed, conversations with Mr. Rowe. Rightly or wrongly, Mr. Davis, I developed the impression that Hughes was not an easy person with whom to do business, nor particularly a straightforward one.

Q. Will you identify the officers or directors of TWA with whom you had those discussions between February 1961 and May, from whom you obtained information which, in your judgment, was sufficiently reliable to permit you to formulate the opinion you have expressed?

A. I have already mentioned Mr. Leslie.

Q. Mr. Sessel?

[1255] A. Yes.

Q. Mr. Slack?

A. Yes.

Q. Mr. Breech?

A. Mr. Breech, Mr. Reed.

Q. Let us keep lawyers out of the way for the moment. Let us talk about people that I can interrogate more easily.

A. Mr. Cocke, Mr. Rummel, Mr. Rowe.

Q. You mean the attorney, Mr. Rowe?

A. Attorney, Mr. Rowe.

Q. And lesser people?

A. Several of the directors, lesser people.

Q. You mean some of the directors other than those included in this list? Mr. McBain, for instance?

A. No, I don't recall anything particularly from Mr. McBain.

Q. Mr. Maestre?

A. Mr. Maestre.

Q. Any of the newly selected directors—Mr. Leithead, Mr. Hood?

A. No, I don't remember anything. I think it is unlikely they had much to say about this, because their association with the situation was very new also.

[1256] Q. Is it fair to say that all those people told you substantially the same thing, or did you get a lot of varying accounts from these people that you have identified?

A. Numerous, varying accounts. Most of this was in the course from time to time of casual conversations, various remarks about this, that and the other thing. It is an impression that I developed.

I might say that what I had read in the press perhaps made it a fertile field to give significance to some of the things.

Q. Can you recall or can you identify any particular conversation that you would be willing to describe as a serious conversation, where the effort was to describe or detail facts?

A. I mentioned one conversation with Mr. Leslie, and I don't know whether that really qualifies or not. I don't recall, with the possible exception of Mr. Rowe, having had what you would call serious conversations on this subject.

If you mean, for example, my calling someone in and sitting down and saying, "What do you think of Mr. Hughes," the answer is that I didn't do that.

Q. No, I am not thinking of personal [1257] characterizations of Mr. Hughes.

Do you know anyone who knows Mr. Hughes well personally?

A. No. I guess I would be safe in saying that I don't.

Q. You know many who would like to?

A. I know, for example, a person like Mr. Six, of Continental—some people say he knows Mr. Hughes well.

I don't know whether he does know him well or not, but I don't know anyone who I know first-hand knows Mr. Hughes well.

Q. My question was directed, really, Mr. Tillinghast, to facts relating to transactions or relations between the Tool Company, or Mr. Hughes, and these financial institutions which formed the basis for your conclusion that TWA had a heritage of delays, or unsatisfactory financing relations.

A. Mr. Davis, so far as that is concerned, I would have to go back to the article in Fortune.

Q. That is what you were relying on primarily?

A. The Spook and The Banker—with respect to relations between Hughes and the financial institutions. I have been told—

[1258] Q. By whom?

A. I believe by Mr. Rowe and by Mr. Sessel, and possibly others that I don't recall at the moment—that that was a very accurate article. From Mr. Reed and Mr. Rowe I know that all sorts of difficulties were encountered in actually getting delivery of the 880s.

I also know it from Mr. Rummel. That Mr. Hughes had agreed to deliver pursuant to the 1960 settlement.

I know that Mr. Hughes was at least difficult in permitting Hughes' directors to constitute a quorum of the meeting of TWA following the 1960 settlement.

Q. By "settlement" you mean financing?

A. The 1960 financing, yes. I had no reason to feel that I could count on any different tactics from Mr. Hughes

than those which apparently had taken place, and I had no intention, having been in this position approximately a month, of being caught with a big plane order on my hands and no financing to cover it.

Q. Did anyone ever tell you that should the Hughes Tool Company be successful in refinancing this [1259] 1960 financing, it would become impossible for TWA to obtain financing necessary for the Boeing program?

A. No.

Q. Nobody ever told you that?

A. No.

Q. And you were satisfied that could be done, even though the voting trust terminated; is that correct?

A. No, I wasn't satisfied one way or the other, Mr. Davis. So far as I was concerned, when, as and if Hughes Tool Company could terminate the voting trust according to the provisions thereof, it was perfectly free to do so, and that was none of my business.

My business was to run TWA in accordance with the interests of TWA and neither to favor Hughes Tool Company nor to discriminate against Hughes Tool Company, and that is the way I have tried to run it.

Q. So that your concern as to the inability of TWA to finance Boeing was wholly related to the possibility of Hughes Tool Company realizing some $100 million in cash or thereabouts if it had been permitted to have a secondary at the time of that TWA primary offering of subordinated debentures?

[1260] A. That's correct.

Q. And the report to you by Mr. Leslie that this might be what Mr. Hughes or the Tool Company had in mind, that was not a matter that concerned you at all?

A. I didn't consider what the Hughes Tool Company proposed to do in a financial way was any proper concern of mine.

Q. And you consider your testimony today to be consistent with the testimony you have given heretofore?

A. I do.

Q. Going back to this meeting of May 29th, did you have occasion at that time to discuss the interfering activities by the Tool Company, or its representatives, or counsel, with Mr. Keehn?

A. Yes, I have already testified to that.

Q. You have testified that you did. Now I would like you to tell me how that meeting came up and what you said in that regard.

A. I just testified to that about 10, 15 minutes ago.

Q. I don't believe that you have other than to advert to the fact that you were worried that Mr. [1261] Hughes might be doing something.

I would like you to tell me, did you discuss with Mr. Keehn the letters to the Securities and Exchange Commission?

A. No.

Q. Just what did you discuss? Can you tell me what took place in relation to the activities of the Tool Company which you felt were interference with the management of TWA?

A. I said, in effect, Mr. Davis, that I considered that the recent actions of the Tool Company had been for the purpose of preventing consummation of the Boeing purchase; that they had already succeeded in frightening out one of the insurance companies; that this represented the first, let us say, large project of an independent TWA management; and that if they were to accomplish what they sought

by setting up a voting trust, that I thought in this hour of crisis, if you will, they ought to support the management of TWA doing what it considered to be in the best interests of the company.

And if in this particular instance Hughes proved his ability to prevent the management doing what their judgment told them they should do, that to [1262] my mind it presages a breakdown of the whole situation.

Q. Will you please explain how the Prudential was frightened off?

A. By the letter that you wrote, and by the fact that they didn't want to get into a controversial situation with a controversial person.

Q. Which letter that I wrote do you believe frightened them off? May I refer you to a letter dated May 26, 1961, which is Defendants' Exhibit 11F. Although I don't want to suggest to you this is the letter, but I am guessing, but I want to help you, if I can.

A. No, this isn't the letter.

Q. The letter to the SEC?

A. The letter to the SEC.

Q. The May 19th letter?

A. The publicity connected therewith.

Q. What is the basis for your believing that Prudential was frightened off by reason of this letter of May 19th to the SEC?

A. I would say two facts, Mr. Davis: one is that obviously it would have that effect, that potential effect; and, secondly, that Mr. Wadsworth told me from conversations he had with Chappalear, [1263] he was convinced that was the sole reason.

Q. Your conclusion to that effect was based upon what Mr. Wadsworth of Dillon, Read told you?

A. That's correct, plus what seemed to me obvious on the face of it.

Q. Obvious on the face of the letter?

A. Obvious on the face of the situation.

Q. You are still referring to the situation as developed in your testimony?

When did Prudential indicate directly or indirectly that it was withdrawing from this financing program?

A. Approximately the 24th of May.

[1264] Q. How was that done?

A. It was done in a conversation with Mr. Wadsworth, to which I have already testified.

Q. Between Mr. Chappalear and Mr. Wadsworth?

A. I believe it was Mr. Chappalear.

Q. Can you give me the substance of what Mr. Wadsworth told you was the conversation he had with Mr. Chappalear or any one else at Prudential?

A. All that I can remember at this particular time was that there were several conversations, the first one or two of which had to do with requests by the Prudential for information relative to the voting trust and possible means by which it might be terminated.

I can't bring to mind exactly what the problem is at this moment, but they had some problem troubling them as to the permanence of the voting trust, and the ability to satisfy themselves that it couldn't be circumvented.

Then the final conversation was one in which Chappalear called Wadsworth, and told him that he was very embarrassed. I believe he said this was the first time he had ever been turned down by the committee on something which he had recommended, but that they were not going to get into this situation, and he said that [1265] this is one you couldn't reopen with a crowbar. There is no point in coming back.

Q. And Wadsworth told you this on the 26th of May; is that correct?

A. Wadsworth told me this—I don't know exactly when. He didn't tell it to me on the 26th of May, because I was in Seattle that day. I believe, in fact, he first told Mr. Leslie, and Mr. Leslie told me at some subsequent date. I don't remember exactly when I discussed it with him myself.

Q. But some time before the 29th?

A. I am not sure that I discussed it with him myself before the 29th. As I say, I am quite sure that I first learned about it through Mr. Leslie.

Q. I understood you to say that on the 29th you were telling Mr. Keehn that the Prudential had been frightened off?

A. Yes.

Q. So somebody had told you that before the 29th?

A. Yes. Mr. Leslie told me the day it happened, which was either the 23rd or the 24th.

Q. You just said that you were aware of several requests by the Prudential—about the requests on the voting trust, and how it could be terminated.

[1266] A. All I can recall at this point is that they spoke to Ted Wadsworth, and wanted some information relative to it. I believe he called Mr. Leslie, and I learned of it through Mr. Leslie.

Q. Do you know what Mr. Wadsworth told the Prudential?

A. I think I did know. I am quite sure I did not. I can't bring to mind at the moment just what the point in issue was. I knew it at the time.

Q. How long had the Prudential been interested in participating in this financing?

A. I don't know exactly. Ever since I got into the picture they had been considered a party to the financing.

Q. Is there a question in your mind but that the Prudential had been aware for some time as to the existence of this voting trust?

A. There is no question about that.

Q. Have you any reason to believe, or did anyone ever tell you that the Prudential withdrew from this possible participation because of the possibility that the Hughes Tool Company might re-finance the 1960 financing, and thereby terminate the voting trust?

A. No.

[1267] Q. Did anyone ever tell you as to why the Prudential was so interested for detail information as to the circumstances under which the voting trust could be terminated?

A. I had the impression that they had before them, and were concerned with the question of whether the voting trust was sufficiently copper-riveted that they would be prepared to take the plunge in face of the fact that there seemed to be a controversy developing.

Q. So you understood that the Prudential was interested in a copper-riveted voting trust?

A. That is correct.

Q. Who told you that?

A. Mr. Leslie and/or Mr. Wadsworth.

Q. Mr. Sessel?

A. No, I don't believe I talked of this with Mr. Sessel.

Q. Did you ever make an effort to communicate with the Prudential to urge them to consider continued participation in this financing?

A. I personally?

Q. Yes.

A. No.

Q. Did you have any particular conversation with [1268] anyone to act on behalf of TWA, to make efforts to persuade them to remain interested in this financing?

A. I can't recall, Mr. Davis, whether my conversations were solely with Mr. Leslie or with Mr. Leslie and Mr. Wadsworth, but I know it was Mr. Wadsworth's strongly expressed opinion that there wasn't any chance of reopening the thing.

I think, as a matter of fact, he did have some further conversations the next day, and his advice was that this was a completely closed matter, and "You might as well forget about it."

Q. I don't understand what you mean by reopening the thing, and something being a closed matter, Mr. Tillinghast. Could you explain what it meant to you, if that was the expression used by Mr. Wadsworth?

A. I have already several times said that Mr. Wadsworth was told this was something you couldn't reopen with a crowbar.

Q. What thing was something which couldn't be reopened with a crowbar?

A. The Prudential turndown.

Q. Did he explain to you what brought about this change of mind on the part of the Prudential who had been interested in this thing since before you became [1269] president, and this turndown?

A. Yes. He said that in his opinion it was the fuss being kicked up by Hughes Tool Company.

Q. By that you mean the request for the extension of time—what you described from May 11th until the registration statement became effective on the 24th?

A. Yes, the sequence of events. I am talking principally about the position which you took on the 17th of May.

Q. Before the board of directors?

A. And the SEC.

Q. And the SEC?

A. Mostly the SEC.

Q. And you were told by Mr. Wadsworth that it was the efforts made by the Tool Company to raise $100 million in cash through a secondary offering that closed the door down tight, that could not be reopened? Is that your testimony?

A. No, it is not my testimony.

Q. What is it that Mr. Wadsworth told you to explain to you, as chief executive officer, as to why the Prudential, who had been interested in this financing for some time, some time prior to the time you even took office, in this period of May, the thing was closed, [1270] could not be reopened, and forget it. How did you satisfy yourself that was a fact?

A. To my mind, Mr. Davis, the likelihood of this was so obvious, that I didn't go around asking questions such as "Do you think financial institutions are some times scared away by controversy?" Of course, they are. It was perfectly obvious what the problem was, and I have no doubt you intended it to be that way.

Q. Let us state on the record the fact which made it so obvious. Assume for the moment I don't understand the obvious facts as readily. Will you please do that for me? What was it that was so obvious to you, that the Prudential Insurance Company should have withdrawn from its participation in this financing between May 11th and May 24th?

A. All I can say, Mr. Davis, is that my experience makes it sort of self-evident to me, that financial institutions prefer frequently not to put large amounts of money into situations which are fraught with controversy.

Q. What controversy was in existence between the Tool Company and TWA during this period we are talking about? At this point, Mr. Tillinghast, let me remind you that unless you are looking into a crystal ball, [1271] you had no idea of what was going to develop subsequently, did you?

A. I had a suspicion that turned out to be frighteningly accurate.

Q. Do you think the Prudential had the same crystal ball?

A. I suspect they had enough foresight to suspect some of the things that might lie in store.

Q. The effort of the Tool Company to re-finance and terminate the voting trust?

A. No.

Q. What controversy were you expecting, or you understood the Prudential was visualizing, as a result of the request made by the Tool Company through Merrill Lynch on May 11th for an opportunity to arrange some $100 million, and turn this interim note from the 1960 financing into cash?

A. That is not what I am talking about.

Q. Let us put it on the record.

A. Let me finish. What I am talking about is the letter you wrote to the SEC on the 17th, I believe, of May, which contained numerous charges, and was well publicized in the papers, and certainly was fraught with controversy.

[1272] Q. Let me hand you now Defendants' Exhibit 12. Please indicate the portions of that letter which you considered to be these "numerous charges," which in your judgment was the basis for the Prudential withdrawing from this financing.

A. Mr. Davis, beginning on page 11 of this letter where it says:

"Mr. Davis, who is approving this letter, states that based upon every fact known to him to date, including conversations had with Mr. Howard Hughes, and other representatives of the Tool Co., the position being taken by the Tool Co. is not a device or an effort on the part of the Tool Co. to interfere with the offering contemplated by TWA to its common stockholders."

Beginning with that sentence, and reading on through the following paragraphs—and I will try to pick up here where to stop—but the part to which I am referring is that part commencing where I just read, and continuing on—

Mr. Davis: May I suggest while the witness is looking at this, a recess be taken. Perhaps the witness, with the assistance of his counsel, will be able to identify the portions of the letter [1273] more readily.

The Special Master: Let us take a seven-minute recess.

(Whereupon, a short recess was taken.)

The Special Master: Do you want the question read to you?

By Mr. Davis:

Q. You were in the process of identifying—

A. I want to get the question accurately, so I can give you an accurate answer.

(The question was read.)

A. Continuing on to the end of the letter.

Q. Did anyone tell you that it was those portions of the letter which frightened the Prudential?

A. No.

Q. This letter was addressed to TWA and the SEC, was it not?

A. Correct.

Q. And it is dated May 19th, and presumably was mailed on or about that date. Do you know when you received your copy?

A. I presume my copy would show that it was the next day or so. You say it was mailed on the 19th, which was a Friday.

[1274] Q. Actually, it was not until Saturday, because if you will recall, your counsel indicated anxiety of receiving it as soon as possible. The SEC required it be done in 24 hours, and the operation was a little behind schedule.

A. I think I probably first saw it on Monday, the 22nd.

Q. And it is addressed to TWA, to your attention, and to the SEC, the attention of Mr. Hocker?

A. That is correct.

Q. Do you know or can you explain how this letter came to the attention of Prudential?

A. Not specifically, Mr. Davis, no.

Q. What is your information as to how it got to the attention of Prudential? May I suggest to you perhaps Dillon, Read sent it to them?

A. I just don't know, Mr. Davis. I would just be guessing.

Q. If you received this letter on Monday, the 22nd, I thought you testified that you heard the reaction from the Prudential about the 24th of May, didn't you?

A. That is correct.

Q. And you have no information whatever as to how this letter got into the hands of the Prudential so [1275] as to frighten them?

A. Mr. Davis, I don't know whether this letter, as such, got into their hands. At the moment I have no recollection of any knowledge as to whether it did. It may have gotten to them, or excerpts from it may have gotten to them through the revised registration statement, because, as you will recall, portions of this were—

Q. In the registration statement?

A. Yes.

Q. That was by reason of action between counsel for TWA and the staff of the SEC, wasn't it?

A. That is correct. They may have read about it in the newspapers. At this particular point in time I just can't tell you how they learned about it, but I am quite sure that they were aware of it.

Q. Do you know who, if anyone, undertook to make a copy of this letter available to the other lending institutions, other than the Prudential?

A. Well, at this particular sitting, I can't say positively that a copy of it was made available to them, but I presume that at some point along the line they obtained copies.

[1276] Q. When you had this meeting on the 29th, was Mr. Keehn and Mr. Hagerty, or their associates, who were present, had they seen a copy of the letter? Did they comment upon it?

A. I am sure they were aware that a letter had been sent, and were generally familiar with its contents. Whether they had actually received copies of the letter, I would have difficulty in saying at this point.

Q. Mr. Tillinghast, if you considered the letter to contain statements which to you seemed obviously interfering

this serious financing program, are you certain that you did not make any inquiry to discover as to how this damaging letter got into the hands of the financial institutions?

A. I am sure that I didn't make any inquiry. It may well be that at the time I knew whether it had gotten into their hands, and if so, how it had gotten into their hands.

Q. But it was not an important fact so far as you were concerned?

A. The important fact was they did know about it, and indeed properly they should. Whether they had exact copies, which parts of it they read, wasn't a [1277] matter of any concern at all to me. We had a controversy on our hands. It was well known, and that was the important circumstance.

Q. I believe we started this line of questioning, Mr. Tillinghast, because I was trying to find out what had been discussed between you and certain other people.

A. Yes, sir.

Q. This feeling of yours that the Tool Company was attempting to interfere with something or other. I would like you to address yourself once more to that meeting of May 29th in Mr. Keehn's office, and those there present, and ask you if you can recall anything else that was said by anyone at that meeting, either agreeing with your statements, as you have testified to, or disagreeing to portions of it, or making any comment whatever.

Would you like to have your previous testimony as to what you said at that meeting read back to you?

A. No. As I said before, Mr. Davis, Mr. Wadsworth and I and Mr. Keehn did most of the talking. As I recall it, Mr. Leslie had very little to say. Mr. Sessel commented on what he thought the banks would be prepared to do in order to increase their participation.

[1278] At the moment I can't recall anything significant that was said over and beyond that to which I have already testified.

Q. You then went to Mr. Hagerty's office?

A. That is correct.

Q. Who attended that meeting?

A. Mr. Wadsworth, Mr. Sessel and I.

Q. And who was there from the Metropolitan?

A. As I testified before, Mr. Hagerty and Mr. Jenkins.

Q. I gather from your prior testimony that that was a relatively short meeting?

A. My recollection is that it lasted just about exactly half an hour.

Q. Will you describe what took place, what was said by you or Mr. Wadsworth, Mr. Hagerty or Mr. Jenkins?

A. Well, as I recall it, I made substantially the same statement to Mr. Hagerty as I made to Mr. Keehn, pointing out what I considered the importance of supporting TWA in its efforts to acquire the flight equipment which it considered that it needed.

I alluded to the problem that was presented by the withdrawal of the Prudential.

[1279] Mr. Wadsworth outlined the modified proposal that he thought would be a feasible and satisfactory one.

I believe Mr. Sessel again stated what he thought the banks would be prepared to do.

Q. Without repeating what took place before the Equitable, I am interested primarily as to what was said about the Prudential withdrawing or not withdrawing, the activities of the Tool Company, the effect upon the financing—that is the area I am interested in, Mr. Tillinghast. I assume that you discussed, as you did with Mr. Keehn,

whether they would take $53.5 million instead of $39 million?

A. That is right.

Q. Now the rest of the conversation.

A. I don't at this point, Mr. Davis, recall much, if anything, that was said about Prudential, other than the fact of their having withdrawn, and our desire to find a substitute insurance company to take their place, and the impossibility of achieving this before the 31st of May.

Q. Let me hand you what has been marked as Defendants' Exhibit 22, which if you will recall, are the notes of the telephone conversation between Mr. Kerr [1280] and Mr. Gordon of the Bank of America, on May 16, 1961, and direct your attention to what appears at the bottom of those notes, beginning with the line which reads "Ben"—referring to Ben Sessel—"this is only one reason why Hughes wants money—to buy out a voting trust. Crown might come up with balance of money. Dillon, Read and other"—something "banks, three insurance companies (including Prudential), plus Ben, and Bob Kerr attended meeting with lawyers for lenders and TWA lawyers. Meeting was to determine that insurance companies were together on major points of 1961 financing."

"Choate"—who is Choate, is he counsel for Irving?

A. He is counsel for the group of banks.

Q. "Choate says he would not approve anything that would not preserve the voting trust."

That would seem to indicate, Mr. Tillinghast, that Mr. Sessel, based upon some information he obtained as to the approach that had been made by Merrill Lynch, indicated the possibility that Hughes may want to buy out the voting trust, doesn't it—at least somebody thought that?

A. Yes.

Q. You were not unaware of that, were you—of [1281] that possibility?

A. I have already testified to that.

Q. And Dillon, Read and other banks, and the three insurance companies, including Prudential, and Ben and Bob Kerr, attended a meeting. You were not aware of that?

A. I am sure I was aware of it. The lawyers were working on the detail of the agreements with the financial institutions, and I gather this was a meeting for that purpose.

Q. This was obviously sometime on or before May 16th, wasn't it?

A. I would think so, yes.

Q. That was before any letter on behalf of the Hughes Tool Company, that contained any nasty implications, isn't that right?

A. Yes.

Q. There was a meeting with lawyers for lenders. Who were the lawyers for the lenders?

A. I am not sure that I know, Mr. Davis. I think probably someone from the Cravath firm for the insurance companies, and Choate, or someone from his firm for the banks.

Q. Who were the TWA lawyers?

[1282] A. I presume Mr. Rowe, or one of the partners or associates.

Q. Anyone else?

A. I don't know specifically who was there.

Q. There was a meeting—the meeting was to determine that the insurance companies were together on major points of 1961 financing. Was that a meeting held without your knowledge, acquiescence, or any information as to what that meeting was about? Were there any reports on the meeting?

A. A whole series of meetings were going on about this time, and about the only thing I knew about them was that the lawyers and people working on the detailed negotiations were meeting and trying to work out the deal.

Q. At that meeting the Irving Trust was represented, wasn't it?

A. All I know is what appears from here.

Q. And the Irving Trust was aware of the possibility that Hughes might want some money to buy out the voting trust, isn't that a fact?

A. Mr. Davis, you can read this just—

Q. I am asking about the facts you were aware of, Mr. Tillinghast. After all, you were the chief [1283] executive of TWA.

A. I have no knowledge specifically about this meeting, or what Mr. Kerr told somebody at the Bank of America.

Q. And Choate says that he would not approve anything that would not preserve the voting trust. Are you quite sure that Mr. Sessel, the Irving Trust, or someone explained to you as the chief executive officer of TWA, that the condition of this new financing was on the condition of a preservation or continuation of this voting trust, and that anything that might happen or give the likelihood that the Hughes Tool Company might "buy out the voting trust" would jeopardize or adversely affect the Boeing program?

A. You include several things in there, but I was never told by Mr. Sessel, nor as far as I can recall by anyone else, that the buying out of the voting trust by Hughes would jeopardize this financing.

From the first time that the subject of the voting trust in connection with this financing was mentioned, it was my understanding that the financial institutions would insist on some sort of a voting trust protection, so long as the financ-

ing was outstanding. But beyond that, the answer to your ques- [1284] tion is no.

• • • • •

[3626] The Special Master: There is this problem, Mr. Davis, that in accordance with Judge Metzner's order, after certain depositions are taken, one of the depositions scheduled is that of Mr. Hughes.

If he is not served—there is the problem of getting that accomplished. On the other hand, if it is within my power, the power of the Federal Court, and my appointment as Special Master, to see that that service is accomplished before the day arrives rather than have to wait until that time, I have the problem now of whether I should do anything to interrupt in order to accomplish that.

I am not sufficiently knowledgeable to know the full extent of the power of the Special Master in that area.

On the other hand, as I have said, I am not disposed to just let an important individual, insofar as he might be able to contribute to the facts in this matter, just avoid participating at his will, if the Court has the power to make it otherwise.

I think probably the best way is to proceed [3627] with Mr. Tillinghast's deposition, and for anyone who cares to, of any of the parties to the litigation, to submit a week from Monday briefs as to whatever authority the Court has to demand from the Hughes Tool Company, or anyone else over which it has such power, the present whereabouts at any particular time of Mr. Howard Hughes, so as to be of assistance in making it possible to take his deposition in accordance with the Court's order—I think that will permit us to go ahead, and then we will all have an opportunity to develop the law in regard to the rights.

Mr. Davis: I have no objection to that, Mr. Rankin, of course. I am merely trying to point out at this time that when these discovery proceedings commence, at that time Mr. Sonnett will be in a position to examine officers of the Tool Company, and I assume that a proper area of discovery would be the location, if known, by those individuals, or which individual would be likely to know who is a person subject to the jurisdiction of the Tool Company.

The point I am making now is, and I am sure [3628] it is not always intentional on the part of counsel of TWA, is to, in effect, interfere with the priority which also has been established, much more clearly, than the suggestion that the Court order the deposition of Mr. Hughes.

It merely recognized that a notice for the taking of Mr. Hughes' deposition as a witness was served, and that deposition, together with any other deposition of the Hughes Tool Company, was to await until the Hughes Tool Company had an opportunity to complete its discovery proceedings.

While we recognize the importance of dates and the necessity of proceeding expeditiously, we are doing everything but that, through the device of interrupting at all possible occasions the oral examination which the Hughes Tool Company has a right to pursue and continue.

The only thing which the Court has done, that I am aware of, to this date, has merely been to provide, contrary to the usual practice, but for reasons which undoubtedly existed here by reason of what was asserted, that it was essential and important to furnish this plaintiff and these additional defendants—the Court with respect to [3629] this plaintiff, and the Special Master's ruling with respect to additional defendants—with documents, so that they could adequately prepare themselves and participate in these oral examina-

tions which are now being conducted by the Hughes Tool Company.

In one way or another, and ever since this complaint was filed, counsel for TWA has been seeking ways and means to upset or defeat or frustrate the orders of this Court with respect to the priority which the Hughes Tool Company has obtained in this discovery proceedings, and that is what I am objecting to.

I have no objection whatever, of course, to any time the Special Master wishes a particular point of law to be briefed, to undertake to do so, within the time allowed for the preparation of such briefs.

But I do respectfully submit that there is a point in what Judge Bromley said this morning, that we are continuously spending time in diversions.

I think it would be helpful if we all could agree that having produced the documents that were required to be produced, and I do not know [3630] why the Hughes Tool Company should be treated differently than anybody else with respect to the production of documents—we now have done that, however long it may take Mr. Sonnett to complete his microfilming process—and now let us return to where we were, without taking away from the Tool Company the right to conduct its oral examination, and complete it before counsel for the Tool Company has to go into fishing expeditions—whether on or off the record—it is interfering with what I am required to do.

I do not understand why I should be required to take the time of myself or my staff to make a lot of inquiries of all the employees of the Hughes Tool Company to find out if anybody knows where Mr. Hughes is.

Mr. Sonnett: I think there is a very good reason why counsel should do exactly that.

I think it is about time that counsel came to grips with the problem that the Federal Court has the power to enforce and protect and secure its jurisdiction.

A lot of tougher guys than Howard Hughes learned that, including John Lewis, when the [3631] Court dealt with his attempt to thumb his nose at Court orders.

I refer to page 3455—the master said you communicate with Mr. Hughes and get Mr. Hughes to respond in writing, after he has seen a certified copy of the order, whether he has documents or not.

The only communication sent to Hughes was sent to 7000 Romaine, and Hughes is not there.

This is illusory. If counsel is going to communicate with Hughes, I want a copy of the communication, and it ought to be sent to where Hughes is.

That will solve the problem. If he does not know how to reach him, let him say so.

If counsel is willing to represent that nobody at Hughes' company knows where this man is hiding, let us have it out on the table, and then I feel warranted in continuing to spend thousands of dollars trying to find him.

But a lot of this money is minority stockholders' money. It is not just Hughes' money. I think it is time we came to grips with the real problem.

[3632] What happens here is a delaying battle by Mr. Davis. He says he does not represent Hughes, but represents the corporation—with the idea of keeping this man beyond reach of Federal process.

I think when the Master directs counsel to communicate with Mr. Hughes, counsel has got to communicate with him effectively. I think it is that simple.

I think if Hughes Tool Company knows where he is, they should be obliged to tell.

Mr. Hughes will be represented by able counsel in due course in this case, whether Mr. Davis or somebody else.

His rights are not being offended by Hughes Tool Company being required to disclose where he is, so that the process of the Court can be brought to bear.

The Special Master: I will take that question up right after I receive the briefs a week from Monday.

Mr. Sonnett: Yes, sir.

Mr. Davis: So there will be no question on the record with respect to the activities of [3633] counsel, by addressing communication to 7000 Romaine Street, is the only way that I know of to make a communication available to Mr. Hughes. There is no mystery about anything.

It is where messages or communications are to be addressed, and when Mr. Hughes, who was known for years to have been a person who does not necessarily stay in one place any particular length of time—when he calls in and finds out what messages are there for him, and what other communications, and then, through some courier arrangement, sends somebody and picks it up. There is no particular mystery about it.

I just want to make it clear in addressing the communication which I did address, which, by the way, is not the one Mr. Sonnett is referring to, because the communication I addressed to 7000 Romaine Street was the one pursuant to the instruction of the Special Master, I sent a notice to Mr. Hughes inviting him to participate in these depositions, as I recall it. I stated this morning, as counsel for TWA well knows, that I have not purported to take any steps whatever with respect to whatever directions were [3634] given by the Special Master last Tuesday. I will attend to it just as soon as I have an opportunity to do that.

The Special Master: I shall assume that the communication directed to 7000 Romaine Street in Los Angeles to Mr.

Hughes got to him, unless he comes into court under oath and establishes that he not only did not get it, but also that he did not have a reasonable opportunity to get it.

Mr. Davis: You may rest assured, Mr. Special Master, that the communication will reach Mr. Hughes.

The only problem I have is when it may reach him. It may not reach him the day that it arrives at 7000 Romaine Street, but at some point in time, it will reach Mr. Hughes.

* * * * *

[3640] *Examination (cont'd) By Mr. Davis:*

Q. Mr. Tillinghast, before the luncheon recess you indicated that if you were given the opportunity to do so, you might be able to refresh your recollection as to the persons with whom you might have discussed in a serious manner the contents of the letters of June 10th and June 9th, which have been marked as Defendants' Exhibits 56 and 57. Have you had an opportunity to think the matter over?

A. Not any substantial opportunity, Mr. Davis. Most of the time I was away from here was spent in discussing other matters, and as a consequence I do not have any materially different recollection than [3641] I had before.

Q. Do you think it is possible that you might have had a serious discussion with respect to the contents of these two letters and not recall it at this time?

A. Quite possibly.

Mr. Sonnett: I take it that question does not mean a serious discussion of these letters at lunch today, just so we are clear about it. I take it the witness so understood.

The Witness: That's right.

By Mr. Davis:

Q. Do you have Defendants' Exhibit 56 before you?

A. I do.

Q. Do you recall the other day you were explaining the reasons why you felt that this letter or portions of this letter constituted an interference, an improper interference with the affairs of TWA?

A. I recall that I testified regarding that.

[3642] Q. Referring to what has now been marked Defendants' Exhibit 56, which is the letter of June 10th, but which has your marginal notes, I first find on the top of page 3, in connection with the sentence which reads—at the bottom of page 2—"Hughes Tool Company is prepared to place in escrow securities of a value commensurate with such undertaking, which would be forfeited in the event that Hughes Tool Company fails to perform in accordance with any obligation it undertakes pursuant to this proposal."

Do you see that sentence?

A. Yes.

Q. In the margin you have a line and the note "What securities?"

Do you see that?

A. Yes.

Q. That is in your handwriting?

A. It is, all of this is in my handwriting.

Q. At the top of the page you have "Securities of TWA —listed securities."

I take it that those notes were made at the time that you received this letter, and before you had any discussion of the letter with anyone, [3643] isn't that correct?

A. I wouldn't say before I had any discussion of the letter with anyone, Mr. Davis. As I recall the circumstance

when this letter came in, before I had had a chance to read it carefully, and I think make these notes, there were very brief discussions with Mr. Cocke and Mr. Leslie merely of the fact that a letter had come in. It may well be that those discussions preceded the making of these notes. I believe these notes were made before I had any discussion of the substance of the letter with anybody.

Q. You mean you heard from Mr. Cocke and Mr. Leslie, or you mentioned the fact to them that such a letter had been received—this might have happened before you began to study the contents of the letter, is that what you mean?

A. That is what I said, yes.

Q. My question to you is, these notes which I have just referred to you, were made by you the first time you sat down to consider the contents or merits or lack of merits of this letter?

A. I believe they were made the first time that I read the letter carefully.

[3644] Q. And that was before you had any of these personal or telephone conversations with Mr. Rowe, Mr. Reed or Mr. Leslie, or posibly Mr. Breech?

A. Having to do with the substance of the letter.

Q. Having to do with the substance of the letter?

A. Yes.

Q. Can you explain, or does this refresh your recollection as to what these two notes I have referred to mean?

A. I was just curious as to what securities were being talked about, and whether they were securities of TWA, whether they were the subordinateds, debentures, or whether they were other securities such as listed securities.

Q. In other words, at the time that you began to seriously consider this proposal No. 1, you were interested in whether or not—or what the Hughes Tool Company pro-

posed to do by its statement that it would put in escrow securities of a value commensurate with the undertaking described?

A. Yes. What I had in mind, as I recall it, was that there would be a substantial difference between TWA's own securities, and, for example, listed securities, which were independent of and [3645] had a value independent of TWA and TWA's securities.

Q. TWA's securities are listed, are they not?

A. Yes, these particular ones were.

Q. The TWA common stock is listed?

A. Yes, Mr. Davis.

Q. The debentures which have been issued in May of 1961 were listed?

A. Yes.

Q. The warrants that were issued in connection with those income debentures are listed?

A. Yes.

Q. But you were, as I understand your testimony, interested in the difference between the possibility of escrowing TWA securities, or some other kind of listed securities?

A. Yes, I had two questions. I believe one is whether we were talking about securities of TWA, and whether we were talking about listed securities. What I had in mind was the question of what in the event that we entered on such program, and there was a default, what we would have by way of security.

Q. Do you think that was important for you or for TWA to determine what kind of securities the Tool Company was prepared to put in escrow as [3646] security for the performance of any undertaking it was making?

A. I think anyone who is taking securities in escrow, would be curious as to what securities he was taking.

Q. Did you make any inquiry as to what securities the Tool Company contemplated placing in escrow?

A. I would have to refresh my recollection by looking at the letter, but my recollection is that in my reply to this letter I raised that question.

Q. You mean you would like to look at a letter which you wrote in reply to this letter? Is that what you mean?

A. I said if my recollection is correct, I referred to this in a letter which I wrote in response to this letter.

Q. I am asking you to describe or identify what you did to determine what securities the Tool Company contemplated placing in escrow. Is your answer that the only inquiry you made was whatever you said in a letter which you wrote in response to this?

A. That is my recollection.

Q. You don't recall what the inquiry was?

[3647] A. Yes, I recall what the inquiry was. If I am correct it was an inquiry made in my letter.

Q. Do you know what the nature of the inquiry was?

A. What securities were contemplated.

Mr. Davis: May I have marked for identification as Defendants' Exhibit 58 letter dated June 16, 1961 from Mr. Tillinghast to Mr. Holliday?

(Letter dated June 16, 1961 from Mr. Tillinghast to Mr. Holliday marked Defendants' Exhibit 58 for identification, as of this date.)

Q. Let me hand you what has been marked as Defendants' Exhibit 58, being a letter dated June 16, 1961, addressed to Mr. Holliday, and ask you if that is the letter to which you have reference?

A. Yes, that is the letter. I see here on page 2 a paragraph marked "A" covers this.

Q. I notice that this letter was addressed—a blind copy was sent to Mr. Breech, Mr. Olds, and Mr. Reed, and a copy to Mr. Rowe. Do you see that at the bottom of page 5 of the letter?

A. Yes.

Q. Had you discussed with either of those [3648] gentlemen your reply, or this letter of June 16th, Exhibit 58, before sending it?

A. I have the recollection, Mr. Davis—I am not positive of this, but I think I sent a draft of my letter to each one of these individuals, and to each of the directors.

Q. A draft?

A. A draft.

Q. Do you recall about when?

A. It obviously would have been between the 12th and 16th. I would guess on the 13th or 14th.

Q. Do you know what happened to those drafts?

A. No, I don't, Mr. Davis.

Q. Do you have any recollection of having destroyed the draft?

A. I am sure I didn't.

Q. Your recollection is that you sent that draft to each of the directors, with the possible exception of Mr. Holliday?

A. I think that is right, Mr. Davis, yes.

Q. You did not send a copy of that to Mr. Holliday?

A. No, I don't think I sent a copy to Mr. Holliday.

[3649] Q. But to Mr. Leslie and Mr. Cocke?

A. I believe to all of the directors.

Q. When was the last time you saw that draft?

A. I would guess about the 16th of June.

Mr. Davis: Mr. Special Master, I realize this witness has not personally assumed the responsibility,

quite understandably, of the production of documents. I wonder if the question could be addressed to counsel for TWA as to whether or not they are satisfied that any draft which may be in existence, either in the files of Mr. Leslie or Mr. Cocke, or anywhere else, is still in existence.

I am informed that we did not receive any such draft.

Mr. Sonnett: I cannot answer that without making inquiry. I will make inquiry.

May I note on the subject of Mr. Holliday, that this was apparently—what the witness is describing is the draft of a reply to a letter which Mr. Holliday sent, to, among others, himself as voting trustee. It would be strange to send Mr. Holliday a draft of a proposed reply to Mr. Holliday's letter. However, we will [3650] make inquiry.

I don't know whether the drafts were produced or are available. If they are, they certainly will be.

A. Let me say, Mr. Davis, that I have the impression that drafts of letters that turned into final letters are rather regularly disposed of in the normal course, and are not kept permanently in the file. If I am correct in my recollection, however, there should be a covering letter.

Q. That is what I am looking for too?

A. Sending the draft to the directors.

Mr. Sonnett: You needn't ask if there are covering letters. We will produce those too if they are around, and haven't been produced.

The Special Master: All right.

Q. Do you recall receiving any comments from anyone with respect to this draft that you circulated to all the directors?

A. I am sure I received a few comments. My recollection is, Mr. Davis, that there were not very many. Maybe if I glance at this—

[3651] Please do, because my next question was going to be to ask you to describe what change of any substance you recall was made between the draft and the letter that was actually sent.

A. One comes to mind, Mr. Davis. Referring to page 2 of Defendants' Exhibit 56, and particularly to that portion, the last sentence of the page, which reads "Should you question the ability of Hughes Tool Company to perform, or its good faith in submitting the offer represented by this proposal."

My recollection is that my first draft of this reply contained a slightly sarcastic remark to the effect that I was not surprised that you would raise a question as to whether we thought this was in good faith.

Mr. Reed suggested that it was not an act of statesmanship to be smart or sarcastic.

Q. Do you recall any other change that you might consider a change of any substance?

A. It is my recollection that the first full paragraph on page 3, which reads "You are mindful," and so forth—

Q. Which letter are you referring to now?

A. Defendants' Exhibit 58. —was suggested [3652] by someone else, I think by Mr. Leslie, but possibly someone else. My recollection is that the following paragraph relating to the approval of the Civil Aeronautics Board was somewhat expanded and elaborated as a result of suggestions from others.

Q. Do you know who?

A. My recollection is that that came from counsel, but I wouldn't want to be positive. In a quick reading through of Exhibit 58, Mr. Davis, those are the only changes that occur to me at this time, although I wouldn't want to represent that I recall this exactly enough to say those were the ones.

Q. Those are the only changes in substance which come to your mind?

A. That's correct.

Q. Do you recall the nature of the remark that you originally contemplated making, which Mr. Reed suggested might better be eliminated?

A. I don't remember it exactly, Mr. Davis. I remember at the time I thought it was rather well phrased, but at the moment all I can recall is that if was something to the effect that I wasn't surprised that you would recognize the possibility that we [3653] might question the good faith of Hughes Tool Company in submitting this proposal.

Q. Did you have any question in your mind as to the ability of the Hughes Tool Company to perform, as distinguished from its good faith?

A. I had some question, yes, Mr. Davis. When I say that I don't mean, as I recall it, that I had substantive information that entitled me to have an opinion that they couldn't perform, but there was an obvious question in my mind as to whether in fact they could perform and would perform.

Q. But there was not such a question in your mind that caused you to question it in your response or in your discussions with others, is that correct?

A. I didn't question it in my response. I don't recall particularly questioning it in my discussions with others.

Q. At that time you were aware of the securities of TWA, at least, which were held by the Tool Company, were you not?

A. Yes, I was.

Q. Did you have any idea what the market value of those securities were at the time that you were considering this letter, namely, on or about June [3654] 10th or June 12th?

A. No, I can't bring that to mind, Mr. Davis, except I recall that during this period they were slipping in value. The market, as I recall it, was shrinking fairly rapidly.

Q. Do you recall when in fact the offering was made of these debentures?

A. The offering had been made the latter part of the preceding month.

Q. Do you recall when the closing was had with respect to those debentures?

A. I don't recall when the closing was had, but I think the debenture offering—the offering became effective about the 24th or 25th of May.

Q. But that was when the registration statement became effective. I am talking about the closing. Don't you recall, Mr. Tillinghast, that there was some question, and a great deal of correspondence you referred to, as to whether or not there should be some delay in the closing so as to permit full and adequate consideration of proposal No. 2, namely, the subscription of another $11 million of debentures?

A. Yes, I do, Mr. Davis, but if I am not mistaken, the debentures with warrants attached were [3655] admitted to trading, and were being quoted in advance of the closing.

Q. I understand that, but I am trying to understand your testimony with respect to the value of TWA securities had begun to slip on or about June 10th or June 12th,

and I am trying to address your mind to the offering price that had in fact been paid by the public at or about the time of the closing, as distinguished from at or about the time of the offering.

A. I remember, Mr. Davis, that when they were first offered and admitted to trading, they were selling on a when-issued basis at a substantial premium, and by the time the subscription period was complete, that premium had disappeared, and they continued to go down.

From almost the day they were quoted first, they appeared to go down, and at this point I can't relate exactly to you in relation to the 12th of June.

Q. You recall, do you not, that at closing, Hughes Tool Company was going to surrender a $100 million interim note, and receive subordinate debentures in the face value of $100 million?

[3656] A. Yes.

Q. And those debentures had just been offered to the public pursuant to a registration statement by TWA at par, isn't that right?

A. No, they weren't offered to the public, Mr. Davis.

Q. As to the stockholders?

A. Rights to subscribe were offered to the stockholders.

Q. The right to subscribe at par?

A. The right to subscribe at par, that's right.

Q. Approximately $18 million to $20 million of those debentures were in fact subscribed for by the minority stockholders, or the public to purchase rights?

A. That's correct.

Q. And subscribed to those debentures at par?

A. That's right.

Q. Did that indicate to you that at or about that time the Hughes Tool Company received the securities or cash of a value of approximately $100 million?

A. I am sorry, I am not sure I understood your question

[3657] (The question was read.)

A. The Hughes Tool Company didn't receive cash. The Hughes Tool Company surrendered a note for the securities.

Q. And the cash. Isn't it a fact, Mr. Tillinghast—you seem surprised.

A. That's right.

Q. Isn't it a fact that all of the cash realized by the subscription from the public, of approximately $18 million to $20 million was to be paid to the Hughes Tool Company in reduction of the note, or the interim note?

A. That's correct.

Q. And the balance the Tool Company had agreed to accept these subordinated income debentures?

A. Right.

Q. Which had just been offered to the public, through rights offered to the stockholders, which rights offerings were traded to the public?

A. That's correct.

The Special Master: How about a little recess?

(Whereupon, a short recess was taken.)

[3658] By Mr. Davis:

Q. At that time you knew, did you not, that the Tool Company also held approximately 78 per cent of the outstanding common stock of TWA?

A. That is correct.

Q. And is it correct that at that time the market price was in the neighborhood of $20 a share?

A. That would be approximately so, yes.

Q. Did you know at that time about how many shares the Tool Company owned of TWA stock?

A. Yes, I did.

Q. What was that?

A. You mean the numerical number of shares?

Q. Yes.

A. It was five million odd out of six million six outstanding.

Q. The market price of $20 a share—did you go through that mental computation at least when you made that note "Securities of TWA, listed securities"?

A. I am not sure I went through the complete mental process, Mr. Davis, but the question in my mind as to whether or not, and it seemed to me quite significant in its context—whether or not you were talking about seccurities of TWA, which in the event of a default on the under-[3659]taking to subscribe additional equity would depreciate very substantially in value, or whether they related to negotiable or listed securities which would not be affected by any default, and would therefore be a better security than TWA's own securities.

Q. I appreciate that, but at the moment I am directing myself more to the doubt in your mind, or whatever was in your mind, as to the ability of Hughes Tool Company to perform what it was proposing or undertaking to do.

Isn't it a fact that 5,200,000 shares, more or less, of TWA common stock at that time represented marketwise, at least, something in excess of one hundred million dollars?

A. Yes.

Q. And that would be one hundred million dollars worth of securities in addition to the one hundred million dollars of cash and income debentures that the Tool Company had

received at the closing which took place in the early part of June?

A. That is correct.

Q. Am I to understand from your testimony that you still had some doubts in your mind as to the ability of the Tool Company to perform any undertaking described in [3660] this letter of June 10, 1961?

A. Of course, Mr. Davis, the ability of the Tool Company to perform would not depend alone on the assets it had, but would also depend on the liabilities it had. As to what the liabilities of the Tool Company were, I didn't know.

Q. Did you make any inquiry?

A. No. I remind you again, Mr. Davis, these were notes I was making as I was reading the letter and these questions were coming to my mind.

Q. I appreciate that, but at the moment I am interested in what you in fact did in connection with this letter which you received. You noted, did you not, the paragraph on the last page of Defendants' Exhibit 56, which reads "Mr. Chester C. Davis, who is empowered to discuss all or any of the above proposals, and to take whatever action is necessary to commit Hughes Tool Company with respect thereto, will be continually available to you during the next ten days."

Do you see that?

A. Yes.

Q. My question to you is, did you make any effort to communicate with me with respect to all or any of the above proposals, or any doubts or problems which you had [3661] in your mind as to the ability or good faith of the Tool Company?

A. I communicated with you, Mr. Davis, through Defendants' Exhibit 58.

Q. You mean the letter which you addressed to Mr. Raymond Holliday, at the Hughes Tool Company, the Gulf Building, Houston 2, Texas?

A. Yes, and a copy of which was sent to you or delivered to you in New York.

Q. Did you make any other effort to communicate with Mr. Davis?

A. Not that I recall.

Q. Did you ask anyone else representing TWA—Mr. Leslie, or counsel—to communicate with Mr. Davis with respect to the proposals, and the extent to which he might be prepared to commit the Hughes Tool Company, or anything of that sort?

A. No, I did not.

Q. Was this a matter of any discussion between yourself and anyone else as to the desirability of communicating for the purpose of discussing any of these proposals, or any doubts that you might have had in your mind as to the ability of the Tool Company to perform, or the good faith of the Tool Company, or anything of [3662] the like?

A. Yes, Mr. Davis. These were discussed, and I discussed them, I am sure, with Mr. Rowe and Mr. Reed principally, I think. I know it was my own judgment based on those discussions that in view of the way this proposal had been made, in view of the fact that Mr. Holliday, who had been requested by me to come in and sit down and discuss anything of interest had chosen not to do that, but write a letter of this sort, which seemed to me to be more a letter for the record than anything else. That the appropriate way to respond to the letter was to write a formal response, and that is what was done.

Q. Was that the conclusion you reached as a result of a conference or discussion with Mr. Breech or Mr. Sessel or any of the other directors to whom you sent a draft of this proposed letter of June 16th, Exhibit 58?

A. I think, Mr. Davis, it was my own initial reaction and one with which no one disagreed. I can't recall at this point with exactly whom I discussed it. No doubt I discussed it with some others, but my recollection is what seemed to be a carefully phrased letter should have a written reply.

Mr. Davis: May I have this document marked [3663] as Defendants' Exhibit 59 for identification.

(Copy of Western Union Telegram dated June 19, 1961, marked Defendants' Exhibit 59 for identification, as of this date.)

By Mr. Davis:

Q. Let me hand you what has been marked as Defendants' Exhibit 59, Mr. Tillinghast, which is a telegram from Mr. Holliday addressed to you as president of TWA, under date of June 19, 1961, and I call your attention to the lower right-hand corner, the date of June 19, 1961, and underneath that appears "President's Office."

My question is, is it a fact that is a telegram which you received on June 19, 1961, from Mr. Holliday?

A. That is correct.

Q. And that telegram stated or called to your attention that the letter of June 16, 1961 stated that Mr. Davis was authorized to discuss with you and commit the proposal of Hughes Tool Company, and refers also to another letter dated June 13, 1961, reaffirming that Mr. Davis was avail-

able to consider those proposals with you, and you received that on June 19th, did you not?

A. I received Defendants' Exhibit 59 on June 19th.

Q. You see at the bottom of that exhibit, "Copy made for C. S. Rowe, Esq.," and underneath that [3664] in handwriting "Who supplied copy of reference to C. C. Davis"?

A. Whose handwriting is that?

Q. It was not until you received the telegram from Mr. Holliday on June 19th that you took steps to arrange for Mr. Rowe to deliver a copy of that letter, isn't that a fact, Mr. Tillinghast?

A. No, it is not a fact, Mr. Davis. In fact, it refreshes my recollection that before this was received I had already asked Mr. Rowe to be sure to see that a copy was delivered to you. I note that June 19th was the Monday immediately following the Friday on which the letter of the 16th was sent out.

Q. Now that your recollection has been refreshed as to what you did with respect to seeing to it that Mr. Davis received a copy of your letter of June 16th, can you tell us what your present total recollection is as to what took place with respect to the desirability or lack of desirability of communicating directly with Mr. Davis with respect to the extent to which the Tool Company was prepared to commit itself, or discuss any of these proposals that were outlined in the letter of June 10th?

A. Mr. Davis, I don't recall any discussion of that [3665] particularly. I wrote the letter to Mr. Holliday because it was in response to a letter that was written to me by Mr. Holliday. It had been my custom that counsel communicated with counsel, and principals communicated with principals.

When I got the letter from Mr. Holliday, I considered it, I am sure without any great thought, but the normal thing was to reply to Mr. Holliday.

Knowing that you were active in this, I asked Mr. Rowe to see that you got a copy of it.

Q. There was no litigation extant at that time, was there?

A. No.

Q. When you gave the consideration which you gave to the letter of June 10th, were you aware of the fact that the letter by Mr. Holliday advised you that Mr. Davis was the person to contact or communicate with, with respect to the subject matter of the letter?

A. I know what the letter said, Mr. Davis, but as I recall it, Mr. Holliday did not suggest to me that I should reply to a letter from him to somebody else.

Q. Did anyone suggest to you directly or indirectly that it would be inadvisable for you to communicate directly with Mr. Davis?

[3666] A. Not that I can recall. I don't believe anyone did.

Q. Did you understand that there was a time limit within which the proposal could be considered, unless an extension of time was obtained?

A. Mr. Holliday's letter so stated.

Q. Referring you to Defendants' Exhibit 56, the first full paragraph appearing on page 3, besides the sentence which reads "The foregoing proposal is open for consideration by you for a period of ten days from the date hereof." Next to it you have a note "Too short."

Do you see that?

A. Yes.

Q. That is a note in your handwriting?

A. Yes.

Q. Did that indicate at the time you read the letter you felt that ten days was too short a time within which to adequately consider the proposal set forth in the letter?

A. It suggested this to me, Mr. Davis, that these proposals which you refer to were by no means complete proposals which could be accepted merely by saying yes.

They seemed to me obviously, if in good faith, [3667] at best, proposed basis for discussion.

It seemed to me abundantly apparent that ten days was nowhere nearly a long enough time within which to work out an arrangement such as was suggested by you in this letter.

Q. So that in effect you concluded ten days was too short a period of time?

A. Yes, I think I commented on that in my letter.

Yes, I said here "It clearly will not be possible to dispose of the equity financing proposal within ten days period suggestion in your letter."

Q. Did that suggest to you that if you wanted to get more time for consideration of the proposal, it would be desirable to communicate with Mr. Davis as soon as possible for the purpose of at least asking for an extension of time?

A. I was quite sure, Mr. Davis, and in fact it was the case, that we would be in communication before the ten day period expired.

Q. You are referring to the letter which you wrote to Mr. Holliday in Houston, Texas, dated June 16th?

A. Yes, a copy of which was delivered to you on the 19th.

Q. Did you understand that that was a letter pri- [3668] marily for the purpose of asking for an extension of time?

A. No, it was not.

Q. Did you give consideration as to the desirability of asking for more time to consider these proposals?

A. I felt, Mr. Davis, that if this proposal were in good faith and had any substance, that the time consideration would be quite immaterial.

Q. You have indicated in your prior testimony that you seriously questioned that these proposals were submitted in good faith.

A. I did.

Q. What facts or assumptions were you making at that time that made you question the good faith of these proposals?

A. Well, I would have to go back, Mr. Davis, and start with the matters that began on the 12th of May, or indeed I would have to go back beyond that. I would have to go back to the fact that since I had become president, Mr. Holliday had been completely unavailable and unresponsive to my suggestion that we might sit down and discuss matters of common interest.

I refer to the fact that we had this proposal for a postponement of our rights offering, a proposal [3669] which in my opinion was not a genuine proposal, but was aimed at delaying and impeding and interfering with our Boeing financing.

I had the fact to which I testified that Mr. Reed had advised me that you had told him that the matter of the Boeing purchases was something that could not be compromised.

I had in mind the fact, and this goes back to your request for an adjournment, that you had told us in effect if we would postpone our offering as requested, you would waive and forget about what you considered serious deficiencies, and if I may paraphrase, a fraud on the public, in our registration statement.

I have in mind the fact that after talking a lot about Hughes Tool Company's desire to distribute its subordinate debentures to the public as soon as that ceased to be a possible tool for delaying our registration, Hughes Tool Company showed no interest whatever in following up on our proffered cooperation for a secondary offering which could have been done quite as quickly as the offering that the Tool Company purportedly was interested in.

I am referring to the fact that prior to this time the Tool Company had made a public statement that [3670] it was considering throwing onto the market its rights to purchase the subordinate debentures which had the effect of very, very seriously unsettling the market.

To my mind the high probability was that this letter which had been written by Mr. Holliday about things which he might have come in and talked with me about, if he were genuine, was a letter designed to put us on the spot, to interfere with the progress of our Boeing program and the financing thereof.

Q. Is that all?

A. That is all I remember at this time.

Q. Do you think you could remember more if you had more time?

A. Additional circumstances might occur to me later. I think that is quite enough to indicate that I had very serious ground for suspicion, and I guess I will have to add one more here that does occur to me at this time, and that is that Defendants' Exhibits 57 contained a statement which I considered to be false and known by Hughes Tool Company to be false, and that is that TWA was under an obligation to acquire the 990 aircraft.

Q. Now, do you think you have had an adequate amount of time to fully describe all the facts and assumptions that

underlie your feeling that the proposals [3671] set forth in Defendants' Exhibit 56 were not being submitted in good faith?

A. I think I have recited enough circumstances, Mr. Davis, to provide a very clear and cogent reason for suspecting that this was not a genuine attempt to achieve an appropriate objective, but rather, an attempt to disrupt, divert and delay.

Q. At that time were you concerned with the possibility that the Tool Company might be able to carry out some of these proposals if accepted by TWA, and thereby avoid the necessity of this additional $150 million, more or less, of the 1961 financing?

A. No. I was not, Mr. Davis. I would have been very happy with any genuine program that would have brought substantial additional equity to TWA.

Q. Did you discuss these suspicions with anyone?

A. I am sure I did.

Q. Can you identify—

A. I am sure I discussed them with Mr. Rowe. I am sure I discussed them with Mr. Reed.

[3672] Q. And those were suspicions that you discussed with them following the receipt of this letter of June 10th?

A. Before and after the receipt of the letter of June 10th.

Q. You mean before you received the letter of June 10th you were suspicious of the lack of good faith of the proposals that might be contained in the letter of June 10th?

A. No, I am not saying that. I am saying that prior to June 10th I was suspicious of the Tool Company's motivations, and what they were seeking to accomplish. Prior to the receipt of this letter I had on several occasions discussed with Mr. Reed and Mr. Rowe and the directors of

TWA what the Tool Company seemed to be seeking to accomplish.

I discussed the background against which this letter of June 10th appeared.

Q. And discussing with them what seemed to you the Tool Company was seeking to accomplish, what did you mean by that? The intention to terminate the voting trust?

A. No, the abortion of the Boeing equipment purchase.

[3673] Q. Did you discuss with them your fears or feelings with respect to any possible effort on the part of the Tool Company to terminate the voting trust?

A. If you mean to terminate it as set forth in your letter, your letter of May 16th, to the Securities and Exchange Commission, or May 17th—

Q. I believe you are referring to a May 19th letter, or you may be referring to a May 26th letter.

A. The letter you wrote to the SEC.

Q. May 19th.

A. You referred there to questions as to whether there were circumstances that entitled the Tool Company to terminate the voting trust.

That letter, and that much of the termination of the voting trust was discussed.

If you are talking about the re-financing of the situation, and the termination of the voting trust through refinancing the situation, the answer is that I do not recall ever having discussed that with the directors.

• • • • •

[3738] *Examination (Cont'd) by Mr. Davis:*

Q. Mr. Tillinghast, let me refer you to page 3668 of the transcript of your testimony, where you [3739] made an effort to identify the facts or assumptions underlying your

conclusion that the proposal made by the Hughes Tool Company was not in good faith. You see at line 21 your statement:

> "Mr. Holliday had been completely unavailable and unresponsive to my suggestion that we might sit down and discuss matters of common interest."

I would like you to identify the time, place and the nature of suggestions you made to Mr. Holliday prior to June 10, 1961, that you sit down with him and discuss matters of common interest.

A. I had written him a letter, Mr. Davis—I can't tell you from memory exactly when it was; I would guess it was some time in the early part of May—asking him to come in and sit down and discuss matters of mutual interest.

Q. You have reference to that one letter?

A. Yes. I think that's the only direct communication I had with Mr. Holliday.

Q. Do you have in mind any indirect communications that you had with Mr. Holliday?

A. No, I don't recall any indirect communications.

[3740] Q. So at that point in your testimony you were referring to this one letter which you believe you wrote some time in early May, is that correct?

A. Yes, although I would have to add I guess one other thing to that, Mr. Davis. At some point along in this period, and I can't tell you exactly when it was, I am sure I had one or more conversations with Mr. Reed, during the course of which Mr. Reed said that he thought it would be a good idea if I could find an opportunity to sit down and talk with Mr. Holliday, and I told him that I would very much welcome an opportunity to sit down and talk with Mr. Holliday any time that he was in town and available.

Q. That is what you told Mr. Reed?

A. Yes.

Q. Can you identify the occasion or the substance of this letter of early May to Mr. Holliday to which you are referring?

A. As I recall it, Mr. Davis, it was merely what one might call a courtesy letter, saying that I hoped he would come in and sit down and discuss matters of mutual interest. At this point, I don't remember any more about it than that.

[3741] Q. Do you recall whether or not it was a letter prior to the May 12th date, when you learned that the Tool Company was interested in a public offering?

A. I would think it was probably prior to May 12th, although I am not absolutely certain about it. I think it probably was, yes.

Q. Do you recall the circumstances which made you write such a courtesy letter?

A. No. It was merely that I thought it would be a constructive thing to do, to invite Mr. Holliday, with whom I had not had any chance to talk at all, to come in and get acquainted.

You may recall that—from my prior testimony—that on the 20th of March I had gone down to 380 Madison Avenue for the purpose of meeting some of the directors, principally Mr. Holliday, but Mr. Holliday had suddenly disappeared and wasn't available, and consequently I believe the only time I had even seen Mr. Holliday was when I made a very brief appearance at the directors meeting on the 20th of March, and since he was one of the voting trustees and a director of TWA I thought it would be a very constructive thing to meet him and get [3742] acquainted and have a chance to discuss matters of mutual interest, of which obviously there would be many.

Q. Why do you say that Mr. Holliday "suddenly disappeared"?

A. Because that is what I was told.

Q. Who told you that?

A. Oh, I can't remember specifically. I think it was Mr. Reed, although I wouldn't be positive. There were many people there on the 20th when I went to TWA. I understood, if I recall, that I was told that he had rather suddenly received a phone call and he had to go somewhere to take the phone call.

Q. I don't understand what you mean by saying that someone told you that he received a phone call and he suddenly had to take the phone call.

A. That is what I was told.

Q. Who, Mr. Reed, only Mr. Reed?

A. Mr. Davis, I wouldn't be positive who told me that. I think it was probably Mr. Reed, but there were a number of people there on that date, and I wouldn't want to say positively it was Mr. Reed.

Q. At this point, Mr. Tillinghast, I am interested [3743] in discovering your descriptive tendencies, and I would appreciate it if you would make as much of an effort as you can to describe what facts, what events, or what you were told, that caused you to describe the failure of Mr. Holliday to meet with you as a sudden disappearance.

A. Well, merely that I had been called to come down to 380 Madison Avenue, as I recall it, about 11 o'clock, to meet some of the directors, and particularly Mr. Holliday, and I got down there, Mr. Holliday never showed up, and I was told that he had received a phone call and suddenly had to leave to take—apparently to take a phone call.

Q. Do you think it is rather unusual to have to suddenly take a phone call?

A. I didn't say it was unusual, Mr. Davis.

Q. Then when you said a moment ago that Mr. Holliday suddenly had to disappear, you didn't think it was anything unusual?

A. Well, I thought it was a little unusual that he didn't show up at all when I had gone down there for the purpose, among others, of meeting him, but I didn't—I knew nothing in particular of the circumstances.

[3744] Q. I have been noting, Mr. Tillinghast, in your testimony, that when you report discussions that you have had with respect to some of these matters you recall conversations with Mr. Reed and Mr. Rowe, two attorneys, and you never refer to Mr. Breed or Mr. Sessel or any of the other directors. Is that deliberate on your part?

Mr. Sonnett: I object to the form of that question. It misstates the record.

It is argumentative and incorrect in fact from what the witness' testimony has been.

The Special Master: I don't think it advances the examination, Mr. Davis.

Mr. Davis: I am trying to find out, Mr. Special Master, whether or not this witness recognizes a conscious effort on his part to avoid referring to conversations he may have had with others than lawyers.

The Special Master: I think that if the record shows, the further record, shows that he does that, whether conscious or otherwise, you can draw what inferences are proper at the time it is presented.

The Witness: Mr. Davis, let me say, [3745] since you have raised this question, that it was Mr. Reed who called me on the telephone and asked me to come down, and it was Mr. Reed who was sort of showing me around.

By Mr. Davis:

Q. Mr. Holliday did attend a meeting of the board of directors on May 17th, did he not?

A. Yes, part of it.

Q. Do you recall if prior to that board meeting he had a private conversation with you [or] Mr. Breech?

A. No, he did not.

Q. Do you know whether he had a private conversation with Mr. Breech prior to that time?

A. Not that I recall. Quite possibly he did, but I don't recall it.

Q. When you saw Mr. Holliday on May 17th, that was not the first time you had seen Mr. Holliday, was it?

A. As I recall it, that was the second time, Mr. Davis. I think the first time I saw Mr. Holliday was at the board meeting on the 20th of March, at which I had appeared very briefly and been introduced to a whole group of people, including Mr. Holliday, and I believe the next time I saw Mr. Holliday was [3746] at the board meeting to which you have just referred.

Q. Referring to your testimony at page 3668, you say that "Mr. Holliday had been completely unavailable and unresponsive to my suggestion that we might sit down and discuss matters of common interest." That is your testimony there, Mr. Tillinghast?

A. Yes.

Q. Does this refer to the facts that you have described, your going to this board meeting on March 20th, meeting Mr. Holliday there, Mr. Holliday's sudden disappearance, and your not seeing Mr. Holliday again until May 17?

Mr. Sonnett: Plus the letter that was written, and if you are going to summarize the testimony, summarize it accurately.

Q. What you have testified to date in its entirety, Mr. Tillinghast, that is what you mean by saying that Mr. Holliday "had been completely unavailable and unresponsive to my suggestion that we might sit down and discuss matters of common interest," is that correct?

A. Well, let me say, Mr. Davis, beginnng with the 20th of March, which I have just described, and continuing then up until the time in June, the [3747] only times that I had seen Mr. Holliday, that Mr. Holliday had, to my knowledge, appeared at TWA, that Mr. Holliday had come to a directors meeting or stockholders meeting, was the occasion when he came to the meeting of May 17th, the circumstances of which have been covered, as I recall it, rather completely in the record.

Mr. Holliday had, at least as far as I was aware, indicated no interest whatever in coming in and discussing common problems. He had, let's say, been completely absent from the scene, and I could only assume that his absence from the scene was not accidental, but was due to a desire on his part, which, of course, was his prerogative, not to come in and sit down and become acquainted and seek, in a constructive way, to deal with our common problems.

Q. You met the board at the meeting held in March, which was March 20th?

A. That's correct.

Q. The next board meeting was the one which was held on April 27th?

A. That's right.

Q. The next meeting of the board after that was the one on May 17th?

[3748] A. That's right.

Q. And you actually took office when?

A. The 17th of April.

Q. April 17th?

A. Right.

Q. So that by June 10th you concluded that Mr. Holliday had been completely unavailable and unresponsive to your suggestion that you might sit down and discuss matters of common interest?

A. That was my view, yes.

Q. That is one of the matters which made you feel that this letter of June 10th was probably not sent in good faith?

A. That's correct, Mr. Davis, and I would want, if I may, to state further in that connection that it is my view that if Hughes Tool Company had had a real interest in a constructive solution to some of the problems that the most natural and proper thing in the world would have been for Mr. Holliday, who was a voting trustee and director of TWA, to come in, sit down, discuss the problem, try to deal with it as sensibly and dispassionately as possible.

[3749] When I received the letter in Mr. Holliday's name on a very complicated subject, which letter I am quite confident you prepared, suggesting that conversations be carried on not with Mr. Holliday but with yourself, it seemed to me that this was obviously a maneuver, a tactical move in a controversy rather than a genuine attempt to come to a solution to these problems and to accomplish the things that the letter tried to create the impression it was the purpose to accomplish.

Q. Prior to this meeting of May 17th do you recall the efforts of Mr. Holliday to sit down with you and Mr. Breech to discuss this public offering that the Tool Company was desirous of making?

A. No, I don't remember any attempts to sit down with me, Mr. Davis, at all.

Q. Were you unaware of the efforts made by Mr. Holliday, Mr. Bautzer, together with Mr. Forrester of Merrill

Lynch, to sit down with you and Mr. Breech for the purpose of discussing the secondary offering?

A. I have no recollection of any attempt by Mr. Holliday or Mr. Bautzer to sit down with me. If Mr. Holliday had wanted to sit down with me my door would have been open to him any day he wanted to come in.

Q. You made no effort to contact Mr. Holliday [3750] except that one letter?

A. That's correct, other than what I testified before, my agreeing with Mr. Reed that I thought it would be a desirable thing to find an occasion to sit down with Mr. Holliday.

Q. Now let me refer you to page 3669 of the transcript of your testimony, Mr. Tillinghast, and you see at line 19 you said:

> "Hughes Tool Company showed no interest whatever in following up on our proffered cooperation for a secondary offering . . . ," et cetera.

All I want at this time is for you to first identify what you refer to as your "proffered cooperation for a secondary offering." What are you referring to?

A. Well, I am referring to the fact that the first time I discussed this with Mr. Forrester I assured him that we would give every cooperation to the Tool Company and Merrill Lynch in any secondary offering that they might want to carry out. At the board meeting on the 17th of May the board formally took that position, and it is my recollection that whenever and whatever form the question came up, we said "We are ready to give you every cooperation that you want in [3751] effecting a secondary offering."

Q. Let's see if we can identify some facts, Mr. Tillinghast.

You say that statements were made to Mr. Forrester?

A. That's correct.

Q. Do you know by whom?

A. By me.

Q. Those were statements to the effect that in the future TWA would cooperate with Merrill Lynch in connection with any public offering of these income debentures that the Tool Company might receive?

A. Not in the future, at least in the sense that I think you are using it, Mr. Davis. Right now, and so far into the future as they might wish it.

Q. Would you describe or identify what you said to Mr. Forrester that makes you testify that you told him that TWA was prepared to cooperate "right now"?

A. Well, the conversation at the meeting on the 12th of May included a discussion of the possibility and the ease of stickering the prospectus and having a secondary offering right on the heels of the offering to shareholders, and as I recall it, it was principally the lawyers who were discussing the mechanics of it, [3752] but I personally told Mr. Forrester that we would give them every cooperation that they might want in such an offering if they were interested in proceeding.

Q. Were you referring to cooperation for an offering that would come right on the heels of the TWA offering, or were you referring to cooperation that would develop right on the heels of the 1961 financing?

A. I was talking about one that would come right on the heels of the rights offering of the subordinated debentures.

Q. At that time, though, you were claiming, were you not, it was your position, that this rights offering by TWA could not be delayed or postponed because it jeopardised the 1961 financing?

A. It was.

Q. So weren't you telling Mr. Forrester, in effect, that the cooperation you were prepared to give was only to follow the 1961 financing? That is the reason why you were not willing to delay it otherwise, isn't it?

A. No, Mr. Davis, that is quite wrong. So far as I recall, an offering, secondary offering by the Tool Company, so long as it didn't delay the offering of our [3753] subordinate debentures, wouldn't have been any problem at all in connection with the 1961 financing. The two things could have gone along simultaneously without any problem whatsoever.

Q. What was the problem in having the TWA offering simultaneously with the Tool Company's offering?

A. The problem was simply this, Mr. Davis, one of delay, and I have been over this time and time again—

Q. Delay of what, Mr. Tillinghast?

A. The delay of the completion of our offering of the subordinate debentures and the possible effect of that on the firming up of our 1961 financing, concerning which I have testified already at the greatest of length.

Q. Still referring you to page 3669, the bottom of that page, you state, as one of the facts which made you feel that the Tool Company's offer of June 10th was not made in good faith, that "The Tool Company had made a public statement that it was considering throwing on the market its rights to purchase the subordinate debentures which had the effect of very, very seriously unsettling the market."

What public statement of the Tool Company are you referring to, Mr. Tillinghast?

[3754] A. As I recall it, Mr. Davis—I am a little fuzzy as to the detail—the Tool Company made a statement I believe to the Stock Exchange—

Q. I think you are right.

A. (Continuing)—that it might sell all or part of its rights.

Q. What else do you know about the events relating to the statement made by Hughes Tool Company to the New York Stock Exchange?

A. I am not sure, Mr. Davis, that I know much beyond that.

Q. Do you know whether or not TWA had made an effort to obtain trading prices on the New York Stock Exchange with respect to those rights?

A. Yes, I know that we made an attempt, and we did list them for trading.

Q. Don't you know as a fact that the New York Stock Exchange insisted that the Tool Company make a statement to the Exchange as to its intention with respect to the very substantial amount of rights it was to receive as a condition to the granting of trading prices on the Exchange?

A. I think that is very possible, yes. I think that's correct.

[3755] Q. It is more than possible; you were told that, were you not?

A. Well, I am not sure I was told that, Mr. Davis, but I think that's correct, yes.

Q. Your testimony at the bottom of page 3669 refers to the statement made by Hughes Tool Company to the New York Stock Exchange pursuant to their request, is that correct?

A. That's right.

Q. Is that correct?

A. That's correct.

Q. That is one of the facts that you consider indicated the probable lack of good faith by Hughes Tool Company when it made its offer of June 10th?

A. Yes, the fact that the Hughes Tool Company gave the impression that it might sell its rights when in fact it didn't, and I suspected never had any intention of doing so.

Q. What is the basis for your "suspecting that it never had any intention of selling any of its rights"?

A. Well, I am not sure, other than just a conclusion that I came to in the light of all the circumstances that existed at the time.

Q. What circumstances existed at the time which led [3756] you to that conclusion, Mr. Tillinghast?

A. Well, Mr. Davis, I would have to go back and repeat everything I have testified to as to the things that had been happening.

Q. No, Mr. Tillinghast, I don't think it is necessary to do that. I am merely asking you to identify the facts or circumstances which made you conclude that the Tool Company had no intention of selling any of its rights.

Mr. Sonnett: Mr. Rankin, may I object to the question unless it is understood that the witness is being asked only if there is any fact or circumstance which he has not previously testified to which bears on the question. He has just said everything that happened up to that date was what he based his conclusion on.

Mr. Davis: No, Mr. Rankin, I don't think that that would be satisfactory for me. This witness, who presumably understands how to reach a conclusion like a rational person, has just testified that in his opinion he reached a conclusion that the statement made by the Hughes Tool Company to the New York

Stock Exchange was false or misleading, and that in fact the Tool Company [3757] did not have any intention to sell any of those rights.

I believe I am entitled to discover at this point what facts or circumstances, which facts and circumstances, this witness is relying upon, what he has been told by anyone, what he believed to be true, which justifies such a conclusion.

Mr. Sonnett: He has already testified everything that happened up to that time is what he based his conclusion on. Does Mr. Davis want an argument, or does he want information?

The Special Master: Mr. Davis, you are not asking for a repetition of his testimony up to date, are you?

Mr. Davis: No, I am not asking him for repetition of testimony up to date, but I want him to identify, without repeating, whatever fact it is that he claims supported his conclusion as a rational human being.

The Witness: Mr.—

Mr. Sonnett: Just a minute, Mr. Tillinghast. I think that makes it perfectly obvious that what counsel is trying to do is argue. He is not engaged in discovery.

[3758] He wants to argue with the witness. The witness has said that all of the facts concerning which he has fully testified are what led him to his conclusion.

Mr. Davis would like to sit and waste time here debating that, and I don't think it is proper as to form, and I am certainly clear that under no circumstances should he be allowed to waste time by requiring the witness to testify as to all events that

preceded the formulation of this conclusion, concerning which he has fully testified.

The Special Master: The witness may answer as to anything additional, if there is anything that he has not already testified to, as the basis for his conclusion.

The Witness: I would say in addition to what I have already testified to, Mr. Special Master, the one thing I might say is that in fact the Hughes Tool Company hadn't taken any steps actually to sell its rights, did not take any steps actually to sell its rights, and the fact that I was under the impression that the Hughes Tool Company was not likely, at that point, to dilute its percentage interest.

[3759] By Mr. Davis:

Q. What were the facts that gave you the impression that the Tool Company was not likely to dilute its percentage interest?

A. As best I can recall, Mr. Davis, a conversation with Mr. Leslie. I recall, and it is not very sharp in my mind, that Mr. Leslie—that I discussed briefly with Mr. Leslie the question of whether he thought the Tool Company actually would sell their rights, and he expressed a negative opinion.

Q. You said that the Tool Company took no steps to sell its rights. Are you aware of the effort that was made by the Tool Company to get the voting trustees to transfer the rights from the voting trustees to the Tool Company so they could be saleable?

A. Not at the moment.

Q. You mean Mr. Rowe did not tell you, Mr. Reed did not tell you, no one told you, that the Tool Company wrote

letters, made an effort to have the rights which were issued to the stockholders of record, namely, the voting trustees, transferred to the Tool Company?

A. I don't remember any problem of that sort, Mr. Davis.

[3760] Q. I am not talking about a problem. I am asking you if you do not know that in fact it was done.

A. You mean that the rights were transferred so that they would be saleable?

Q. That the Tool Company requested the voting trustees to transfer the rights to the Tool Company.

A. Mr. Davis, I don't distinctly recall it. I do recall that there was some question of getting the rights in the right name, but I don't—it doesn't stick clearly in my mind as to just what the problem was, and I don't recognize it in terms of what you say.

Q. In what terms do you recognize it?

A. Well, it is very fuzzy in my mind, but I do remember that there was some problem—I thought it was the other way around—that the voting trustees had in getting some transfer or—in getting the Hughes Tool Company to transfer something so as to put them in a position so that these could be listed with the Stock Exchange. I am sorry. It is very fuzzy in my mind. I can't remember just what it was. But I remember there was a—some problem of that sort. But I don't recognize the problem that you apparently are referring to now.

Q. Mr. Tillinghast, don't you know to whom the [3761] rights were issued?

A. The rights were issued to the voting trustees.

Q. Because they were the stockholders of record?

A. That's right.

Q. Until the voting trustees transferred those rights from themselves to the Tool Company the Tool Company could not sell them, could it? Isn't that self-evident to you?

A. Well, I am not sure, Mr. Davis, whether that is so or not. I don't know just what steps would have to be gone through in order to put the Tool Company in a position to sell them.

Mr. Davis: In order to permit me to continue with the witness at this point, I would like to refer to this document, Mr. Special Master, but our duplicating facilities haven't caught up with me.

I will have it marked, just this one copy, as Defendants' Exhibit 60.

(Photostatic copy of letter dated May 26, 1961, to New York Stock Exchange, from Raymond M. Holliday, consisting of two pages, marked Defendants' Exhibit 60 for identification as of this date.)

[3762] By Mr. Davis:

Q. Defendants' Exhibit 60, Mr. Tillinghast, was produced by you. There is at the lower right-hand corner the following: "May 29, 1961, president's office."

Since I do not have extra copies of this now, let me read that letter into the record.

A. May I look at it?

Q. Certainly (handing to witness).

Mr. Sonnett: That will simplify matters, I think.

Q. You see that letter?

A. I see the letter, yes.

Q. That was in your files, was it not?

A. Apparently, yes.

Q. This is a letter by Mr. Holliday to the New York Stock Exchange?

A. Yes.

Q. Can you explain how that letter got into your files?

A. Not at this point, no. I presume somebody sent me a copy of it.

Q. You don't know who?

A. At this point, I don't, Mr. Davis.

[3763] Q. You notice it is dated May 26th?

A. I do.

Q. You see the second paragraph, which reads:

> "This is to inform you that we did not know until approximately 2:30 this afternoon whether we would be able to make arrangements with the voting trustees of TWA common stock beneficially owned by Hughes Tool Company and L. A. Church & Company, the registered holder of the voting trust certificates, to receive these rights."

A. I see that.

Q. You were aware of that then, weren't you, Mr. Tillinghast?

A. I undoubtedly, if this came through my office, read it at that time.

Q. There is no doubt that it went through your office, is there?

A. No, I don't think so, Mr. Davis.

Q. Do you recall the offering period that TWA fixed for the exercise of those rights?

A. As I recall it, it was 15 days.

Q. Are you sure about that?

A. No, I am not. I think it was about 15 days. That figure sticks in my mind. But I would have to [3764] check it. It is very easily ascertainable.

Q. Do you also recall whether or not it went over a holiday weekend? Do you know how many trading days there were available for those rights?

A. Well, I am not sure at this point. If the total period was 15—well, I would have to, Mr. Davis, recall, and I don't recall whether the Exchange was open on the 29th of May, which was the day before Memorial Day, or whether it was closed that day, but if it was open that day, there would have been approximately 11.

Q. Is that your recollection?

A. Well, I have no independent recollection, Mr. Davis, just how many trading days—

Q. Do you have any recollection as to whether or not you gave any consideration as to what would be a reasonable or fair or appropriate period of time for those stockholders to trade in those rights?

A. I personally did not, Mr. Davis.

Q. Do you know who did?

A. Well, the people who were arranging the offering.

Q. Who are you referring to, Dillon, Read?

A. Dillon, Read, Mr. Leslie, Mr. Rowe, the people [3765] who had this in charge.

Q. And you did not give that matter any personal consideration?

A. No. The matter of the length of the trading period I gave—the period in which to exercise rights, I don't recall I gave any consideration whatever.

Q. At page 3670 of your testimony, Mr. Tillinghast, you testified that as a result of the advice that the Tool Company gave to the New York Stock Exchange pursuant to

their request, you say, "Which had the effect of very, very seriously unsettling the market."

You see that?

A. Yes, I do.

Q. Now will you describe the facts which you describe as having had a very, very serious unsettling effect on the market?

A. Well, as I recall it, Mr. Davis, somebody, I think it was Mr. Wadsworth, possibly it may have been Mr. Leslie, but I think it was Mr. Wadsworth, said that they were very concerned about the situation, that people who were making the market in these rights were extremely concerned that the Tool Company might dump great quantities of rights on the market and leave those who were making the market in a very bad position, [3766] and my recollection is that these rights opened at a very substantial value, and by the end of the exercise period had gone to practically nothing, and my impression was that a major cause of this had been the uncertainty as to whether the Tool Company was or wasn't going to dump onto the market a great number of rights.

Mr. Davis: May I have that answer read to me now, please?

The Special Master: You may.

(The answer was read.)

Q. When did this somebody tell you this, Mr. Tillinghast?

A. Well, my recollection is, Mr. Davis, it was at some point after the Tool Company had taken the position that it might sell all or part of its rights.

Q. Some time after May 26th?

A. Yes. It seems to me—

Q. That letter to the Exchange was dated May 26th, wasn't it?

Mr. Sonnett: That didn't say you had made a decision. If you had read the balance of the paragraph it would have been clear.

A. Well, at this point, Mr. Davis, I am not [3767] altogether clear whether that is the only letter, or whether there was a subsequent letter.

Q. But it was something said to you during this offering period?

A. That's correct.

Q. You think it was Mr. Wadsworth?

A. I think it was Mr. Wadsworth, but it might have been Mr. Leslie.

Q. Do you recall the occasion for this information?

A. No, I don't recall the occasion. I have been trying to think here exactly what the occasion was, but I don't recall the specific occasion.

Q. Do you recall his saying something about the length of the offering period in connection with this problem?

A. No, I do not.

Q. Who were the people "making a market in those rights"?

A. I can't tell you who the specific people were.

Q. Describe them for me. What did Mr. Wadsworth or that somebody tell you?

A. I don't think he told me anything, other than to refer to them as the people making the market in the rights.

[3768] Q. Do you know of a very substantial number of rights that were "sold on the market" by the Dreyfus Fund?

A. No, I am not familiar with that.

Q. Do you identify that sale as marking the moment from which those rights began to drop in market price fairly rapidly?

A. I am not familiar with that, Mr. Davis.

Q. Did Mr. Wadsworth discuss with you the problem that is inherent when a very substantial amount of securities have to be disposed of in a relatively very short period of time?

A. Not in this connection.

Q. What do you recall about what was said to you apart from these conclusions that somebody told you that some people, unidentified, were making a market and were concerned?

Mr. Sonnett: I think this is obviously argumentative.

If he wants to know whether the witness recalls anything more than he has testified to he can ask it.

Mr. Davis: Mr. Special Master, may I point out that this complaint specifically alleges that [3769] the Tool Company interfered with the subordinated debenture offering.

The Special Master: I overrule the objection. He has a right to ask whatever he was told, what he can recall about it.

Mr. Sonnett: I have no problem with that, Mr. Rankin, but I thought the witness already testified to that once, or several times. It calls for a repetition of that. It would be the third time.

The Special Master: If there is anything further—

The Witness: There is nothing further that I recall at this time.

By Mr. Davis:

Q. Is that the entire testimony you care to give as a basis for your testimony that this had the effect of very, very seriously unsettling the market?

A. Yes.

I have testified, Mr. Davis, as fully as I can recall as to the circumstances relating to the unsettling of the subordinate debenture—

Q. In other words, what you have testified to is your complete testimony as to all the facts and [3770] circumstances which justify or support your testimony at the bottom of page 3669 and the top of 3670?

Mr. Sonnett: If that question is to be understood by its literal meaning, I have no objection to it.

If Mr. Davis is trying to exclude the witness' testimony as to all the prior history in this question, I do object. It is argumentative.

The Special Master: We have a right to assume the question shall be taken literally unless it is otherwise directed.

The Witness: Excuse me. Would you read back the page reference? I just want to be sure.

(The question was read.)

A. Yes, Mr. Davis, I have testified to everything that I can presently recall that bears on the statement contained or the statement referred to in your question.

[3771] Q. You testified, Mr. Tillinghast, that these rights opened strong?

A. Yes.

Q. And then weakened in price?

A. Yes.

Q. Fairly suddenly?

A. Well, rather steeply, as I recall it.

Q. You also testified that to your knowledge the Tool Company made no effort to sell any of those rights, is that correct?

A. That's correct.

Q. Is it also a fact, Mr. Tillinghast, that when those rights opened on the New York Stock Exchange the public statement to which you referred had already been made by the Tool Company?

A. That is not my recollection, Mr. Davis.

Q. Isn't it a fact, Mr. Tillinghast, that the New York Stock Exchange insisted on a statement by the Tool Company before they would admit the rights to trading? You testified to that a moment ago, didn't you?

A. Mr. Davis, I am just not sure of that. My recollection, and maybe I am wrong in my time, but my recollection is that it was somewhere in the—[3772] during the rights period that I, at least, became aware that the Tool Company had taken this position.

Q. You are quite right about during the period of the rights period, Mr. Tillinghast. We are talking about the trading, the market price of those rights, which is not the same period.

Isn't it a fact that there was a delay between the opening of the rights period and obtaining trading privileges on the New York Stock Exchange?

A. I just have to say I don't remember, Mr. Davis. The facts will show what the situation was.

Q. I am trying to establish the facts, Mr. Tillinghast.

Mr. Sonnett: The witness has said he doesn't remember. I think if counsel has a question he ought to put it.

The Special Master: Yes.

Mr. Davis: I am trying to save time, Mr. Special Master, because, to be sure, I can establish those facts in a lengthy, laborious manner, which would be simplified if the witness could be joggled memory-wise so as to admit a fact which admittedly is relatively easily provable, except I need it as a foundation.

[3773] The Special Master: I will let you exhaust his recollection, Mr. Davis, but when he says he doesn't recollect, unless you can give give him something to refresh his memory, then we reach the end of the road.

By Mr. Davis:

Q. Let me refer you to—

Mr. Bromley: It would help me a great deal, Mr. Special Master, if Mr. Davis will tell me whether the public statement by Toolco that he keeps referring to is Exhibit 60 or something else.

Mr. Davis: I am referring to the testimony of Mr. Tillinghast, Judge Bromley, which appears at the bottom of page 3669 of the transcript.

Mr. Bromley: You keep referring to Toolco's public statement. What is that?

Mr. Davis: That is what the witness testified to, and he has testified to a statement made by the Tool Company to the New York Stock Exchange. That is the testimony so far.

The Special Master: Is that clear, Judge?

Mr. Bromley: No.

The Special Master: Look at page 3669, [3774] the bottom of the page there.

Mr. Bromley: All I wanted to do was to get the Toolco public statement. I know what the witness said.

Mr. Davis: If you will look at the letter that I have marked for identification as Defendants' Exhibit 60, Judge Bromley—

Mr. Bromley: I have looked at it, Mister, and all I asked you was is that the public statement that you keep referring to.

Mr. Davis: I am referring to the public statement that the witness is referring to.

Mr. Bromley: Then you are not referring to Exhibit 60?

Mr. Davis: We are trying to establish what the witness is referring to.

Mr. Bromley: Exhibit 60 doesn't say anything like you say it does.

Mr. Davis: The witness has testified, as I recall it—I will establish it on the record again, if you please.

By Mr. Davis:

Q. At the bottom of page 3669, you testified to a public statement, and my question to you now, Mr. [3775] Tillinghast, is whether or not you were referring to the statement made by the Hughes Tool Company to the New York Stock Exchange, or are you referring to something else?

A. Well, I am referring, Mr. Davis, I think, to a statement that appeared—

Mr. Sonnett: Off the record.

(Discussion off the record.)

Mr. Davis: Where are we?

(The record was read.)

A. (Continuing)—in the wire services, and perhaps in the press, that was based on the statement made by the Hughes Tool Company to the New York Stock Exchange.

Q. Is it your understanding, Mr. Tillinghast, it was that statement to the New York Stock Exchange which appeared subsequently in the press which the Exchange required as a condition to permitting trading in the rights?

A. I am not altogether clear, Mr. Davis, whether or not this statement was a statement required by the New York Stock Exchange. I think it very likely was, but I am not sure.

Q. In any event, you were informed, were you [3776] not, that in order to permit the rights to be traded on the Exchange it was necessary for the Tool Company to make a statement of some kind to the Exchange?

A. I am not sure that I was advised of that. Very possibly I was, but I can't remember any specific advice at this point.

Q. Are you clear that the trading of those rights on the Exchange is an event which occurred after the beginning of the rights period?

A. I am not clear at this point as to these dates, Mr. Davis. They are very easily established, but I don't at this point have them in mind.

Mr. Sonnett: While we are waiting, Mr. Rankin, for Mr. Davis to commence his next question, may I inquire through you whether the Hughes Tool Company has produced in the production which commenced March 15th any and all copies of drafts and/

or actual press releases or statements to the press on the subject Mr. Davis is now examining about?

I see, for example, in one of these clippings, the Kansas City Star of June 2nd, a statement that the Hughes Tool Company, which [3777] will receive the stamped rights, has notified the Stock Exchange that it intends to sell the rights it received up to an amount which will depend on market conditions but in an amount not to exceed 85 per cent of its holdings.

I would like to know whether they have produced any statements they made to the press in this connection. We can save an awful lot of time if they have.

The Special Master: Mr. Davis, do you know whether that has been produced?

Mr. Davis: I am quite confident that there are no press releases with respect to the subject matter we are now discussing, because this was handled through my office, and I think I can satisfy the inquiry, really Judge Bromley's inquiry, by marking and producing at this time the letter by the Hughes Tool Company to the New York Stock Exchange which released the publicity. I can state on the record the Hughes Tool Company did not issue any publicity whatever with respect to its intentions as to these rights.

Mr. Sonnett: Did its public relations [3778] representatives do so?

Mr. Davis: No, no one.

Mr. Sonnett: I notice the press quotes a public relations representative who apparently was informing the press about Mr. Davis' views on various subjects.

Mr. Davis: You are making a statement which I do not believe is accurate.

Mr. Sonnett: You should read the newspapers—

Mr. Davis: I know, but I am not like Mr. Tillinghast, Mr. Sonnett.

Mr. Sonnett: Much to my regret, I suspect to many others, that you are not.

Mr. Davis: I deal in facts, Mr. Sonnett.

Mr. Sonnett: Good. Let's start.

Mr. Davis: Will you mark this as Defendants' Exhibit 61.

(Copy of letter dated May 31, 1961, to New York Stock Exchange, from Hughes Tool Company, marked Defendants' Exhibit 61 for identification, as of this date.)

Mr. Davis: If we may take the morning recess now, I may have both this exhibit and the [3779] other one reproduced, and we will—

The Special Master: All right. Let's take a short recess.

(Whereupon, a short recess was taken.)

Mr. Davis: While we are waiting for more reproduction to take place, Mr. Special Master, it is my recollection that yesterday Mr. Sonnett, in connecnection with the production of documents from Mr. Breech's files, also produced a list of documents which had been withdrawn on the ground that privilege was being asserted. As I understand it, it was a privilege being asserted by counsel for Mr. Breech.

The Special Master: That was my understanding.

Mr. Davis: We don't seem to be able to locate that document. I believe it was produced as one sheet and was to be reproduced by somebody.

Mr. Sonnett: I am sure we can get you another copy. Had Mr. Cox asked Mr. Ordover, you would have had it, and saved a page of the record.

Mr. Davis: It was marked, as I recall, as an exhibit, and I was wondering if perhaps [3780] the Special Master picked it up.

The Special Master: I could have.

Mr. Davis: Or perhaps Mr. Tillinghast.

The Witness: No, I did not.

Mr. Davis: Thank you. I have just been handed a photostatic copy.

The Special Master: I have these, but those don't seem to be what you are talking about (handing to counsel).

Mr. Davis: No (handing to Special Master).

Mr. Special Master, prior to the recess I made a statement on the record that the Hughes Tool Company had not issued any publicity with respect to its intentions as to the rights. That statement is correct, but requires additional explanation.

As previously indicated, the letter to the Exchange, dated May 31, 1961, which has been marked as Defendants' Exhibit 61, closed by saying that it "was authorized to release publicity to the above effect."

I was told, and as I recall, that the Exchange had communicated with Mr. Settles, who was then associated with me, and stated that the [3781] Exchange had no facilities for releasing the information to the press, that the information should be released to the public, and Mr. Sessel at that point—

The Witness: Mr. Settles.

Mr. Davis: (Continuing)—Mr. Settles at that point dictated a press release which is entitled

"Press Release from Chester C. Davis, Counsel for Hughes Tool Company," and I would like to make that explanation on the record. I would like to mark those for identification, and produce them at this time.

Mark them as Defendants' Exhibits 62A and 62B.

(Photostatic copy of press release from Chester C. Davis, counsel for Hughes Tool Company, as dictated May 31, 1961, marked Defendants' Exhibit 62A for identification, as of this date.)

(Photostatic copy of press release from Chester C. Davis, counsel for Hughes Tool Company as dictated May 31, 1961, marked Defendants' Exhibit 62B for identification, as of this date.)

Mr. Davis: At this point, Mr. Special Master, I have the necessary copies of Defendants' Exhibit 62, which I am making available to opposing [3782] counsel.

I also have at this time additional copies of Defendants' Exhibit 60, which I am making available to opposing counsel.

By Mr. Davis:

Q. Now, Mr. Tillinghast, let me hand you Defendants' Exhibit 61, which is a letter from the Hughes Tool Company to the New York Stock Exchange, and let me hand you Defendants' Exhibit 62A and B, which constitute the statements to the press pursuant to the arrangements made with the New York Stock Exchange, and let me ask you if those are the public statements by Hughes Tool Company which you had in mind and referred to in your testimony begin-

ning at the bottom of page 3669 and continuing to the top of page 3670 (handing to witness).

A. Yes, they are, Mr. Davis. If you had disclosed these before we would have saved an awful lot of time.

Mr. Davis: Mr. Special Master, I don't appreciate that remark by the witness. After all, he is the one who is testifying, and presumably who knows what is the factual basis for his wholly unwarranted assertions that the Hughes Tool Company was not acting in good faith.

[3783] Mr. Sonnett: Can we get on with the deposition, Mr. Rankin? I appreciate, in behalf of TWA, the production of these documents now.

May I ask, since Mr. Davis has seen fit to produce them now, that any other statements to the press put out by his office like these also be produced at their early convenience.

The Special Master: I assume that has been done in the production, so far as they are known.

With regard to the witness' remarks, the questions were inquiries as to his recollection, and there is no obligation on the part of counsel to furnish information to him to try to have him recall. Insofar as you can produce anything that may help his recollection, when we reach the end of his recollection, it does help us to advance the depositions. But you have a right to do that as you progress with your examination in your own manner.

Mr. Davis: May I point out also, Mr. Special Master, that these documents—I will withdraw the remark.

By Mr. Davis:

Q. Mr. Tillinghast, will you now please tell us [3784] when the material reflected by Defendants' Exhibits 61 and 62A and B first came to your attention?

A. I don't recall, Mr. Davis, that I have ever seen 62A and 62B before.

I believe I have seen or at least been aware of the existence of Exhibit 61. I am reasonably certain that the fact that such a letter had been written came to my attention within a day or two of the time it was written.

Q. In other words, you have a recollection that the letter by the Hughes Tool Company to the New York Stock Exchange came to your attention, or the substance of it?

A. The fact that the Hughes Tool Company had made the statement which is embodied in Exhibit 61 came to my attention very shortly after it was made.

Q. But referring to Defendants' Exhibit 62A and 62B, you never saw those before, did you?

A. I have no recollection of having seen them before, Mr. Davis.

Q. Now will you explain what were the public statements which you had in mind on June 10, 1961, which led you to conclude that those public statements justified a conclusion that the Tool Company was not [3785] acting in good faith?

A. Well, I am not sure, Mr. Davis, where the date June 10th comes from in your question. If your question refers to the period from June 12th, when I received your letter of June 10th, to June 16th, when I answered it, I would say the substance of May—of the letter of May 31, 1961, Defendants' Exhibit 61, and the publicity in the press and the wire services springing from that, were the circumstances which I had in mind.

Q. Will you identify, either by referring to Defendants' Exhibit 62A or 62B, or from the publicity which you recall having seen, the part or portions thereof which led you to conclude that those were public statements not made in good faith?

A. Well, I don't refer—strike that.

I don't come to the conclusion—to that conclusion just within the four corners of the document, Mr. Davis. The statement to which I refer is a statement that Hughes Tool Company intends to sell rights received by it up to an amount which under no circumstances will exceed 85 per cent of such rights.

Q. Yes?

[3786] A. That is the statement to which I refer. The fact that they weren't offered, and the other many facts to which I have already testified, were what led me to conclude that this was a statement not made in good faith.

Mr. Sonnett: If that is the end of the answer, and before there is another question, and in the interests of avoiding any confusion, may I ask, Mr. Davis, whether the reference in Exhibit 62A in the first two lines, reading, "The following is an excerpt of a letter to the New York Stock Exchange from the Hughes Tool Company," is a reference to the letter a copy of which is Exhibit 61, or is there some other letter?

Mr. Davis: My recollection of the events, Mr. Sonnett, if it will assist you in any way, is that Mr. Settles originally sent a letter to the New York Stock Exchange for the purpose of permitting the issuance by the Exchange of whatever publicity was required or they deemed desirable, and then he was informed they did not have the facilities, could not do it themselves, and expected that information to be [3787]

made available to the press directly, and that is what Mr. Settles did.

I do not know at the moment of any other letter to the Exchange by my office on this subject other than the ones which I have marked for identification.

Mr. Sonnett: May I invite to the attention of the Special Master, because I am loath to make such grave charges until the record is perfectly clear, that on the basis of the statement that counsel has just made the press release is a false release.

If the Special Master will look at the second and last sentence in the second paragraph of Exhibit 61, and look at what is represented in the press release to be a copy of that sentence, the Special Master will note a highly material change. So the statement in the press release that the following is an excerpt of a letter to the New York Stock Exchange from the Hughes Tool Company is false, and I think the record ought to reflect that fact here and now.

Mr. Davis: The statement of Mr. Sonnett, as usual is not completely accurate, but [3788] whenever it is the turn for Mr. Sonnett or TWA to establish any facts that they care to establish, I would have no objection to their doing so.

At the moment I do object, Mr. Special Master, to this continuous interference with my efforts to discover the facts that I wish to develop.

I have attempted to cooperate, primarily because of suggestions made by the Special Master, in furnishing information to TWA and its counsel out of turn. But it is perfectly apparent that counsel for TWA is either trying to establish precedence or a course of conduct which I consider as materially in-

terfering with the efforts of the Tool Company to conduct its discovery proceedings in an orderly manner.

[3789] The Special Master: Mr. Davis, I think the remarks at this point may be well taken in light of that language. I am not saying it was intentional, but it says Hughes Tool Company does, however, intend to make such an offering in the press release, and the letter says intends to consider the desirability. I think that is the point that is being raised.

Mr. Davis: The point I am raising, Mr. Special Master, let us assume for the purpose of this discussion that something very wrong has been done by the Hughes Tool Company, my point is that the time to develop those facts is not now. This is not the time where TWA is attempting to discover what took place or did not take place to support their contentions. This is the time when I am trying to discover the facts from TWA.

This is a contention which undoubtedly requires an explanation. But my point is that if every time TWA or its counsel feels that it is appropriate or helpful to whatever strategy he may be undertaking at a particular time to open up and inquire into what the Tool Company did or did not do it is interfering with my [3790] discovery proceedings.

I am not prepared at this time to develop the facts as to what the Tool Company in fact did, other than to develop the facts in the possession of TWA and of this witness with respect to what they did.

I was perfectly willing, in a gesture of cooperation, although I do not believe that I was required to, to identify on the record these documents at this time,

leaving aside for the moment the question as to the requirement of producing those documents to TWA for whatever use they wish to make of them when their turn comes.

The point that I am making now, Mr. Rankin, is that if I am going to be required to pursue this I am not pursuing my discovery proceedings.

The Special Master: I think your point is well taken, except for the problem, Mr. Davis, that counsel inquires as to whether there is any other letter that might explain the difference in light of the fact that these are being used to refresh the memory of the witness, insofar as they might refresh—

[3791] Mr. Davis: Mr. Rankin, again, these were not produced for that purpose.

The witness testified he had never seen them.

They did not come out of TWA's files. If they had been in TWA's files. they were producible, at least to the same extent they were producible out of mine.

Therefore, they are not documents which have been produced for the purpose of refreshing Mr. Tillinghast's memory with respect to what he had in mind at the time about which I was inquiring of him.

They were produced, again, primarily in the expectation that if I did I would no longer have Mr. Sonnett interfering with my deposition.

I thought that was the quick way of doing it.

Now it develops that having done so, he would like to pursue the matter further, and my point simply is that whether or not they were producible or not producible, I have no objection to producing

them, they can have them, and they can do with them what they want.

But I am seriously objecting to being [3792] required to pursue lines of inquiry which occur to Mr. Sonnett from time to time.

The Special Master: I recognize the soundness of your objection generally, but I think that the record shows that you did ask the witness if he had any recollection as to these particular documents, and he said he didn't, but you made such an inquiry as to 62A and B, as I recall the record—

Mr. Davis: That's correct.

The Special Master: (Continuing)—and as to 61, he had a recollection that he had actually received a copy, or at least it had been called to his attention, and presumably had a copy in his files. So to that extent you were inquiring into his memory and recollection, and whether or not those documents would refresh his recollection.

Whether or not you knew at the time that he never knew anything about 62A or B, I couldn't tell from the record until the answer was given, and just what approach you were making.

I don't intend to let an interference be made with the proper conduct of your examination. But I think the inquiry at this time as [3793] to whether or not there was some other letter was a reasonable one that would occur to any of us. You don't have to follow that up by supplying such at this time.

Mr. Davis: I have no particular objection to developing the facts, but it seems to me that either we are going to conduct discovery proceedings where each side takes its turn in developing the facts, or we are going to try to develop the facts jointly.

Mr. Sonnett: I would like to be heard, Mr. Rankin, on the question of the obligation of Hughes Tool Company and its counsel to produce from Mr. Davis' files any statements that he issued to the press or communications of this type.

You inquired yesterday about whether this was a Hughes Tool Company office or a Chester Davis office. We were in this matter of production of documents that might be located here.

I don't know that it is the proper function of counsel to be issuing press releases to the Daily Mirror and the other list of press [3794] associations appearing on Exhibit 62A. But counsel having done so, it seems to me that the documents in question are Hughes Tool documents that should have been produced.

It so happens that 62A and 61 taken together constitute, in my opinion, very significant evidence tending to establish in a very material way an important allegation of TWA's complaint. I should have had that evidence when they produced the documents of Hughes Tool Company, and Mr. Davis shouldn't feed it out piecemeal, whether he is trying to refresh the recollection of a witness or not.

One of two things is true here. Either they made a false statement to the Stock Exchange or they made a false statement to the press of the United States, and I intend to explore that very thoroughly, and I am entitled to have any press releases they put out.

The Special Master: You may proceed, Mr. Davis, with your examination of the witness.

By Mr. Davis:

Q. Mr. Tillinghast, do you know whether or not—

Mr. Bromley: Wait a minute. Before you [3795] proceed, I think the record ought to show right now, in connection with Mr. Sonnett's remarks, that neither Exhibit 62A nor 62B is a true and correct copy of Exhibit 61. They are quite different, and substantially different.

All you have to do is compare them to find out that the statement in 62A and B is not at all what is said in Exhibit 61.

The Special Master: It doesn't require your speech to establish that fact. Anybody can compare them.

Mr. Bromley: Nobody has compared them, and why should this record go on the assumption that they are accurate quotes when they aren't?

The Special Master: I have already compared them, and said in the record the difference.

Mr. Bromley: Said the difference?

The Special Master: Yes.

Mr. Bromley: You haven't at all, sir.

The Special Master: I am sorry. I beg your pardon. Look in the record.

Mr. Bromley: What?

The Special Master: You look in the record when you receive it.

[3796] Mr. Bromley: You mean you have pointed out the differences, in paragraphs 1 and 2, between 61 and 62A and B?

Mr. Sonnett: May I suggest that I called this to the attention of the Master because this was the

point that disturbed me. When I asked Mr. Davis whether there was another letter to the Stock Exchange referred to at the top of 62A other than Exhibit 61, and was informed by Mr. Davis that there was not, I then called attention to the fact that 62A was a false statement, and the Master did consider that, I believe, and disposed of it.

My application was that by reason thereof, and since these are Hughes Tool documents, I be supplied, on behalf of TWA, with any and all press releases issued from Chester Davis' office on behalf of Hughes Tool Company.

Mr. Bromley: Maybe I was asleep, but I thought your only point was in the heading.

The Special Master: The language was recited to the reporter right here. I don't know whether you are hearing what is going on or not, Judge Bromley, but it was recited in detail [3797] by Mr. Sonnett in his objection, and it was recited by me.

Mr. Sonnett: May I—

The Special Master: And I inquired directly to Mr. Davis about it.

Mr. Sonnett: May I, on behalf of TWA, apologize for the low level of my voice. It is true that I have had my back toward Judge Bromley. It is also true that because of fatigue my voice is low. So to the extent that I have contributed to the confusion, I apologize. The fact, however, is very clear, that one of two things is necessarily true. Either a false statement was made to the Stock Exchange on May 31st, or a false statement was made to the press on May 31st, and in any event, a false statement was made to the press on May 31st on a highly material

issue. That was my point, and I want all of the documents which constitute press releases from the office of Chester Davis as counsel for Hughes Tool Tool Company. I think I am entitled to have them.

Mr. Bromley: I must apologize to the Master and to you, because I did not hear either one of you point out the many discrepancies which [3798] occur both in paragraph 1 and paragraph 2.

Mr. Stewart: Mr. Special Master, I believe there are still other discrepancies between the various documents which I believe Mr. Sonnett did not point out. I have reviewed them with Judge Bromley briefly, and there are several inconsistencies between the various exhibits.

I believe Mr. Sonnett mentioned perhaps the principal one.

Mr. Sonnett: One at a time, I always believe in. I think the record is pretty clear.

Mr. Davis: Now, Mr. Special Master, may I say that all these statements on the record have taken a great deal of time.

I don't think they furthered the discovery of the facts from this witness.

Mr. Settles, who handled this matter, and who is not now associated with me, will be available at the appropriate time to explain to these interested gentlemen what actually happened, and when they find out what the facts are they will find that, as with their other general accusations, they are baseless.

Mr. Sonnett: I think on the basis of that [3799] statement we are entitled to know right now whether Mr. Davis did or did not approve the press release

which is Exhibit 62A and the statement which is 62B at the time.

The Special Master: I will overrule that. Let's proceed with the examination of the witness.

By Mr. Davis:

Q. Mr. Tillinghast, I hope that you haven't forgotten the testimony that you were giving prior to these colloquies from your counsel and others. Have you?

A. No.

Q. My question to you now, so the record may be entirely clear, is whether or not Defendants' Exhibits 62A and 62B came to your attention prior to today.

A. I have already testified to that, Mr. Davis.

Q. Would you mind repeating it, please?

A. Not that I recall.

Q. Would you recall it if it had?

A. Not necessarily.

Q. You say that Defendants' Exhibit 61 came to your attention, you remember that?

A. I said. Mr. Davis, that I either saw 61 or was advised of its contents. I am not absolutely sure [3800] that I have seen 61, but the substance of it is familiar to me.

Q. Do you recall who called it to your attention?

A. No. It may have been that I saw it, it may have been Mr. Leslie, it may have been Mr. Rowe, it possibly might have been Mr. Wadsworth.

Q. You have no recollection as to how a letter to the Exchange came to your attention which is not now included in your files?

A. I have—the only recollection I have is what I have already testified to.

Q. Will you identify, on the basis of what you knew in June 1961, the period June 10th to June 16th—what did you know at that time which is the basis for the testimony that you gave at the bottom of page 3669 and the top of page 3670?

A. Mr. Davis, I have testified to that as fully as my recollection permits.

Q. Based upon that testimony, is that the complete basis for your conclusion that that was a fact which you considered as indicating the lack of good faith in the offers made by the Tool Company by its letter of June 10th?

A. I have testified, Mr. Davis, as fully as I [3801] can as to the reasons why I felt this was not in good faith.

Q. I understand that, Mr. Tillinghast, but what I want you to tell me now is whether or not you have now fully disclosed all of the facts that you had in the period June 10th to June 16th to support the answer you gave at page 3669 of the transcript.

A. As far as I can presently recall them, I have.

Q. You believe that if you had some more time you could recall some more?

A. I have no specific reason to think so. I might.

Q. Is there anyone in particular with whom you would like to have an oportunity to discuss the matter so as to refresh your recollection?

Mr. Sonnett: Mr. Rankin, I think counsel ought to be directed to stop this sort of nonsense. He has gone through this exercise a hundred times. It is very naive, improper, and a waste of time. It is about time he stopped arguing with the witness or playing it up to a jury, or whatever he thinks he is doing, and put questions seeking information. This is completely wasteful of time.

He is worried about Hughes. Every time he [3802] puts another dollar's worth of this sort of stuff on the record it is costing his client. I think he says 78 cents. I think his client is getting gypped.

The Special Master: Answer the question if there is anyone that you know of that might help you recollect more.

A. Not specifically, Mr. Davis.

As you well know, when one sits down, particularly with a number of people who have been familiar with events, and goes through them, discusses them back and forth, one's recollection is inevitably refreshed, and if I sat down with all the people involved in these events and asked them their recollection, told them mine, perhaps other things would come to mind.

But I have no specific reason to think beyond that any particular person would refresh my recollection.

Q. I am interested in the persons with whom you discussed what you considered to be evidence of the bad faith on the part of the Tool Company with respect to its proposals of June 10th.

Mr. Sonnett: Other than counsel, I assume.

Mr. Davis: Yes, other than counsel.

[3803] Q. I believe, Mr. Tillinghast, being a lawyer, you understand I am not asking you to refer to advice that you received from counsel. You understand that, do you?

A. Well, I didn't understand that, Mr. Davis. But if you tell me so, I will try to remember that.

Q. You were aware, at least in connection with your testimony on the change of the meeting of the board of directors

from Chicago to New York, that you were free to protect the attorney-client privilege?

A. I recall that Mr. Sonnett asserted the attorney-client privilege.

Q. You understand that that is a privilege that can be waived by the client?

A. I do.

Mr. Sonnett: You should further understand, Mr. Davis, that Mr. Tillinghast doesn't have the power to waive it even if he were asked to waive it or wanted to waive it.

The power is vested in the Special Committee of the board of directors of TWA, of which Mr. Tillinghast is not a member, and which board has the entire authority of the board of directors with respect to this litigation. So let's get [3804] that settled.

Mr. Davis: But Mr. Special Master, I don't think that we need to have on the record Mr. Sonnett's legal conclusions, however sound or unsound they may be.

The Special Master: Do we have a question before the witness?

(The question was read.)

A. Well, other than counsel, I discussed it with Mr. Reed, I am sure with Mr. Breech, although that discussion doesn't stick particularly in my mind, with Mr. Leslie. Those are the only ones I recall specifically. It is very possible that I discussed it with Mr. Sessel. I think that would be about the sum total of the group.

Q. Mr. Reed is counsel for the voting trustees?

A. Mr. Reed is counsel for the voting trustees.

Q. When you discussed it with him you were discussing it with him as counsel for the voting trustees?

A. Yes.

Q. Do you recall the circumstances when you discussed that with him?

A. I have the feeling that I discussed it with him twice, Mr. Davis. The first time was shortly after the [3805] letter was received, and the second time was when the letter was finalized, I, in the interim, having prepared a draft and sent it to him and some others.

Q. Have you located that draft?

A. No, I haven't, Mr. Davis.

Q. Have you located letters of transmittal with respect to that draft?

A. No, and I am inclined to feel that I may have been wrong in recalling that I sent copies of the draft to all of the directors.

I think what I am thinking of is that I sent copies of the final letter to all of the directors, but I understand that there is no transmittal letter in our file, and I am quite sure that if I had in fact sent a draft of this to each of the directors that I would have had a copy—that there would be a copy in our files of the transmittal letter.

Q. Did you perhaps send it merely to a few selected directors?

A. I think that is quite possible.

Q. Will you identify those selected directors to whom you sent a draft of the letter?

A. Well, Mr. Davis, let me make it clear that I cannot say positively to whom I sent it. But I think [3806] I sent it to Mr. Leslie and Mr. Breech.

Q. That is all you can remember?

A. That is all that I can remember, and I don't want to be absolutely positive about that. But my best recollection is I sent it to Mr. Leslie and to Mr. Breech.

Q. Is it your recollection that the final copy of the letter was sent to all the directors?

A. Yes. The minutes of the June meeting so recite.

Q. Describe the meeting that you had with Mr. Reed shortly after this June 10th letter, Defendants' Exhibit 56, was received.

A. Well, I didn't say I had a meeting with Mr. Reed. I may have, or I may have talked with him on the telephone. I have a recollection that I talked with Mr. Reed merely about the fact that I was going to prepare a draft of reply, and that the letter seemed more designed to make a record and put the people to whom it was addressed on the spot than it was to achieve any constructive purpose.

Q. That is what you told Mr. Reed?

A. As I recall it, that is what I told Mr. Reed, and what Mr. Reed agreed was the case.

Q. Mr. Reed agreed with your statement?

[3807] A. Yes.

Q. Did he say why, did he give you any facts, any reasons?

A. No, not that I recall, and indeed, I would have thought it obvious enough to him that I wouldn't have asked him, "Why do you think that?"

Q. You thought what was obvious enough to him?

A. That this was a maneuver, a letter for the record, rather than a genuine attempt to achieve something.

Q. And Mr. Reed agreed with you with respect to that also?

A. Not "also." That is what I just testified to.

Q. Was that a long telephone conversation?

A. Mr. Davis, as I said before, I am not sure whether it was a telephone conversation or a meeting.

I just remember as much as I have testified to now.

[3808] Q. Identify the meeting or discussion that you had with Mr. Breech. I am still referring to your statement or conclusion, which was obvious to you, as I gather from your testimony, that the offers reflected by the letter of June 10th were obviously a maneuver, not in good faith?

A. Mr. Davis, I don't specifically recall the conversation that I had with Mr. Breech about this. I am quite sure I had a conversation. My certainty in that regard springs in part from the fact that I am quite sure that I wouldn't have dealt with this without having talked with him. But just what we talked about I don't have a distinct recollection of, and I would be very largely supposing.

Q. By referring to your calendar can you identify whether or not you had a meeting with Mr. Breech during this period?

A. My calendar indicates nothing in this regard, Mr. Davis, but I have a vague recollection of Mr. Breech having been in town at this time. I can't be certain whether I talked with him or whether I—whether I talked with him face-to-face or whether I talked with him on the telephone.

Q. Can you recall the substance of what Mr. Breech [3809] said to you?

A. No, I cannot, Mr. Davis. As I said before, I don't have a distinct recollection of a conversation with Mr. Breech about this, although I am quite confident I must have talked with him about it, and I have a vague recollection of his having been in New York and spoken to him about it in New York.

Q. What is it that you recall which makes you feel that you must have talked to Mr. Breech about it?

A. As I said before, I am quite sure I wouldn't have dealt with a letter of this sort without having talked with Mr. Breech, and I—this may have been a time when Mr. Breech and Mr. Olds had a meeting at 380 Madison Avenue with, as I recall it, Mr. McCone, who was in town, if it is the occasion I think of, and I talked with him, if that is the occasion, very briefly, and it may be that I mentioned—we discussed this very briefly at that meeting.

Q. Do you remember this meeting between Breech and Olds at 380 Madison Avenue?

A. I remember a meeting that Mr. Breech and Mr. Olds had at 380 Madison Avenue, during part of which, as I recall it, Mr. McCone dropped in, and I was busy with something else, and just went in and talked with [3810] them for a few minutes. I remember they were in Mr. Pierson's room.

Q. Do you know what the purpose of that meeting was?

A. Not at this point, other than to say that my recollection is that they were generally discussing TWA problems or voting trust problems.

Q. When you say you don't remember at this point, did you know at any time what was the purpose of the meeting?

A. I don't think I knew specifically. I knew that Mr. Breech and Mr. Olds were having a meeting. I presumed it was to discuss some of the recent occurrences, and if it was at the time—if I am correct in thinking it was about the 12th of June, I have no doubt that they were discussing all of these things that I have been testifying about.

Q. But you don't recall discussing it with either Mr. Breech or Mr. Olds?

A. Well, my recollection, Mr. Davis, is that—I am quite sure of this—that at that particular meeting I merely made an appearance, oh, for a short period of time, maybe 15

minutes, or something of that sort, I was not a participant in the meeting. I think if in fact this was more or less coincidental with the [3811] receipt of your June 10th letter that that is probably the time I discussed it with Mr. Breech.

Q. Assuming that that was probably the time that you discussed it, do you recall the discussion?

A. I don't, Mr. Davis, beyond the fact that I was the one to answer it.

Q. Was that decision that you were the one to answer it a decision arrived at by someone other than yourself alone?

A. Well, I am sure that that was in conversation or that I discussed that particular aspect of it with Mr. Reed and Mr. Rowe. I think probably, again, if I am correct as to this meeting between Mr. Breech and Mr. Olds having been held when I said, or having been held at about the time of the receipt of this letter—I think that is probably the time that I had my initial conversation with Mr. Reed about preparing a draft and circulating it to him on behalf of the voting trustees and some others, and entertaining his comments.

Q. What was the reason for discussing this strategy, or whatever you were discussing, with Mr. Reed? Was it because he was counsel for the voting trustees?

A. Yes.

Q. And also counsel for Mr. Breech individually?

[3812] A. No, I don't know that he was counsel for Mr. Breech individually.

Q. Did you consider that this letter of June 10th which you received was a matter that required discussion with the voting trustees or their counsel?

A. Yes, to the extent that this was addressed to a variety of people, including the voting trustees. It was my

view that TWA should answer it because it dealt primarily with questions relating to aircraft and management questions that were proper interests of TWA itself, alhough not all of the questions were in this category, and as I recall the situation, I said to Mr. Reed that I proposed to reply to it on behalf of TWA, dealing with it on the merits, even though I had the feeling that it wasn't written really to be dealt with on the merits, and he agreed that that was the thing to do.

Q. Do you recall your discussion with Mr. Leslie with respect to the facts that indicated to you or tended to indicate to you that this was not a letter to be dealt with on its merits?

A. I am afraid, Mr. Davis, that you have just reversed my testimony.

The Witness: Do you want to read that back?

[3813] (The question was read.)

A. I have just testified, Mr. Davis, that I felt that despite the fact that the letter was not written in good faith that we should deal with it on its merits.

Q. What I am inquiring into now, Mr. Tillinghast, are the facts which you had, which came to your attention, or which you discussed with anyone, tending to indicate that the letter was not in good faith.

A. If that is the question you ask, I don't recall anything with respect to Mr. Leslie, except that Mr. Leslie and I discussed the question of whether there was any realism in the condition that the voting trust be terminated, and he expressed the opinion that there wasn't any, in his opinion, serious possibility of that, and I asked him to please communicate with the financing institutions and obtain from them expressions as to whether or not, under the

circumstances proposed in this letter, they would consider a termination of the voting trust.

Q. But, Mr. Tillinghast, you keep slipping from the question I am directing to you. At the moment I am not inquiring into the consideration given as to the realism of any possibility or desirability of the basic [3814] terms. I am interested in your statement, in your testimony, to the effect that you believed that the offer made was not made in good faith, and I am asking you to identify the persons with whom you discussed that subject, the existence or lack of existence of good faith.

Mr. Sonnett: May I object to the form of the present question, and ask the Master to direct there be stricken the comment that the witness is slipping from the question.

The record makes perfectly plain that the witness was trying to find the question out of Mr. Davis' various passes at the point, and then said "If that is your question, this is my answer."

I don't think that the record ought to be cluttered with this kind of comment.

The Special Master: The statement the witness is slipping may go out. The rest of it, in which Mr. Davis is trying to make plain the nature of his inquiry, will stay in.

A. Mr. Davis, the only persons with whom I can recall having specifically discussed the question of good faith are Mr. Reed and Mr. Rowe.

Q. Not Mr. Breech?

[3815] A. I have no specific recollection of having discussed it with Mr. Breech, although I have to say to

you that it is entirely possible, entirely likely, that I did. But I don't have any specific recollection of it.

Q. With Mr. Leslie?

A. I may have with Mr. Leslie, but again, I have not a specific recollection of it, except as I have already testified, that I know I discussed with him this question of the voting trust and the realism of expecting a quick termination of it, and involved in that discussion, at least implicitly, I am sure was the matter of whether this was a genuine expectation or something being written for the record.

Q. You previously testified that one of the persons with whom you may have discussed this matter was Mr. Sessel?

A. That's correct.

Q. Will you now describe your discussions with Mr. Sessel on the same subject?

A. Well, the only thing, Mr. Davis, I specifically remember having discussed with Mr. Sessel was the matter of the position that the banks would take, and I recall that Mr. Sessel talked with me on the telephone [3816] about it, and said that the banks had taken a uniformly negative position, with the exception of the Bank of America, and he said they took a qualified position which in his view was really no, but he felt that in view of the dual relationship in which they found themselves as bankers for both Hughes Tool and TWA, that they were playing it carefully, and not taking an out-and-out position.

He further stated that in his opinion, if this ever got beyond the preliminary stage, that the Bank of America's position would turn out to be a negative position.

Q. Do you recall where this conversation took place?

A. My recollection is it was a telephone conversation.

Q. You recall that one fairly clearly, do you?

A. For some reason, that sticks in my mind.

Q. Did you discuss the probable good faith or lack of good faith in the making of the proposal?

A. I have no distinct recollection of it, Mr. Davis, but I would be quite sure that we did.

Q. You can't recall what he said to you in that regard or what you said to him in that regard?

[3817] A. Not specifically, no, Mr. Davis, but I am quite sure for some reason, and it is undoubtedly conversations that I have had with him, that Mr. Sessel thought that this was purely a maneuver, and he undoubtedly said so, and I undoubtedly agreed with him, but I cannot recall the specific conversation.

Q. Without trying to recall the specific conversation, do you recall any fact advanced or stated to you by Mr. Sessel to support this conclusion?

A. No, I do not, Mr. Davis.

Q. Do you have any recollection of asking him, in substance, "Well, I think the same thing also, but I am interested in knowing what makes you conclude that way"—nothing of the kind took place?

A. No, Mr. Davis, and I would volunteer the comment that I don't recall having asked anyone why he thought this, or having been asked by anyone why he thought this. I think the circumstances made it so apparent that no one labored the point or asked "Why do you think this?"

Q. You say that the persons, then, that you discussed this existence of good faith or lack of good faith with were Mr. Reed and Mr. Rowe?

A. That's correct.

Q. In your discussion with Mr. Rowe you were seeking [3818] legal advice from Mr. Rowe, or were you discussing it because of what knowledge he generally had with respect to the Tool Company?

A. I was seeking legal advice in the sense that I was discussing with him the matter of how this letter should be treated and how it should be replied to.

Q. I am referring now to the discussion as to the existence of facts which tend to support your conclusion that the Tool Company was not making these proposals in good faith.

Mr. Sonnett: I think the witness has already testified that he recalls no such discussion with anyone.

Mr. Davis: I believe the record is not to that effect, Mr. Special Master. I believe he said the only people he discussed that with were Mr. Reed and Mr. Rowe.

Mr. Sonnett: No, no. The witness testified a little while ago, when he said he would be bold enough to volunteer, that he recalled no discussion with anyone in which anybody said "My reasons for believing this are thus and so," or "What are your reasons for believing this?" The witness made that very plain.

[3819] So before you get down a false trail about a discussion with Mr. Rowe, I think the question has already been answered negatively.

The Special Master: That is my recollection of the record, Mr. Davis.

He has constantly been asked, and he said he did discuss with Mr. Reed and Mr. Rowe, but when you got down to any specifics he never recollected.

Mr. Davis: We can satisfy my problem, Mr. Special Master, by merely asking him now.

By Mr. Davis:

Q. In your discussions with Mr. Reed and Mr. Rowe did either of them—let's talk of Mr. Rowe alone; I have covered Mr. Reed.

Let me rephrase my question this way: In your discussion with Mr. Rowe did Mr. Rowe advert to any fact or circumstance which confirmed your conclusion that this offer by the Tool Company was not in good faith?

Mr. Sonnett: May I have a moment with Mr. Rowe?

The Special Master: Yes.

(Discussion off the record.)

Mr. Sonnett: Having conferred with Mr. Rowe, [3820] I will not assert, in behalf of TWA, any claim of privilege with respect to this conversation to which the witness refers.

The Special Master: You may answer the question.

A. Mr. Davis, I will repeat once again that I don't recall any specific review of facts and circumstances that led anyone to the conclusion that this was not written in good faith.

I do recall that I discussed with both Mr. Reed and Mr. Rowe the fact that this letter appeared to be written for the record and to put TWA on the spot to serve as a means of impeding the Boeing program, and my recollection is that we all agreed that this was the case, and I have no recollection that anyone went into detail and said "Now, you tell me why it is that you think this is the case."

Q. In your answer, Mr. Tillinghast, you said you don't recall any specific review of the facts and circumstances, and I would be satisfied if you could give me any statement

of facts and circumstances, whether or not you would regard it as a specific review.

A. I recall no statement of the facts and circumstances.

Q. Thank you.

[3821] Now you say that you did discuss with Mr. Rowe and Mr. Reed the fact that this letter appeared to "put TWA on the spot."

Will you describe what you said or they said indicating that this letter would put TWA on the spot?

A. Well, without at the moment distinguishing between Mr. Reed and Mr. Rowe, what I said, in substance, was that I felt this was written for the record, that it was an attempt to create a situation where TWA would seem to be put in the position of refusing to accept a proffer of a very substantial amount of equity unless it interrupted and interfered with its Boeing program, and that it seemed to me just another step in the Davis campaign which had then been going on for some period of time, and that it was not a genuine attempt to work out a basis of additional equity.

I also said, and they agreed, that we had to deal with it as if it were genuine, and had to keep the doors open and the means open by which, if in fact it did turn out to have substance, we would exhaust the matter on its merits.

Q. Did you understand that the only condition to the offer of proposal No. 1 was a termination of the voting trust?

[3822] A. That was a stated condition. There were obviously a good many other questions involved in it, Mr. Davis. This was not a situation where we just could say "I accept," and we suddenly had a $100 million of equity. You had inherent in this numerous questions of the form of the equity, the price of the equity, what the terms would be, a dozen things that weren't covered here, but the only

specific stated condition was the termination of the voting trust or—and the fact that it be acted upon within ten days or any agreed upon extension thereof.

Q. In this discussion you had with Mr. Rowe and Mr. Reed did they point out to you that if the proposal was acceptable to TWA, TWA would be free to supplement its jet fleet either with Boeing aircraft or Convair aircraft or any combination?

A. Well, they didn't, as I recall it, particularly point that out, Mr. Davis. The letter so states.

We were, however, I was, deeply conscious of the fact that you were at the time turning heaven and earth to try to prevent the Boeing deal, and very frankly, I just didn't believe what it said.

Q. Did you discuss in what way these proposals to TWA constituted or would constitute an interference with [3823] the Boeing program.

A. Well, it seemed to me perfectly obvious that if you got into a discussion of the termination of the voting trust, that one of the possibilities, very real possibilities, inherent in that was further delay of our Boeing financing, and my feeling was that this was an attempt, if you will, to drag a red herring across the path and get TWA into a position where it was discussing things that would interfere and delay—interfere with and delay consummation of its Boeing financing, and ultimately cause the abortion of the Boeing program.

Mr. Davis: Shall we take a luncheon recess at this point?

The Special Master: We will adjourn until 2 o'clock.

(Whereupon, a luncheon recess was taken.)

[3824] AFTERNOON SESSION

2:00 p.m.

(Thomas D. Barr, appeared for the afternoon session.)

CHARLES C. TILLINGHAST, JR., resumed the stand and testified further as follows:

Mr. Davis: Mr. Special Master, there are two matters I want to take up before resuming with Mr. Tillinghast. The first is that I just received a call from Los Angeles to the effect that equipment which we had to alert us in the event anybody should be trying to use x-ray equipment in taking pictures of these documents did alert us. As previously indicated, some of the documents we are producing are masked.

Apparently this gadget, whatever it is, went on today, and the men there double-checked it and believe at the moment, at any rate, that the equipment being used includes x-ray equipment, which presumably would only be designed to inquire into masked material. There is [3825] always a possibility that equipment malfunctioned, of course.

I have directed, therefore, that all photographing be stopped until an expert could be obtained to double-check the matter. I just wanted to report to you that I have given those instructions until I can satisfy myself as to what kind of activities are actually going on.

Mr. Sonnett: May I suggest, Mr. Rankin, that rather than Mr. Davis assuming the functions of the court, to direct that the order not be complied with, that he produce either here before you under oath the people involved or we will go to California, if you are agreeable, and take their testimony under oath on Monday.

I think it is highly presumptuous of Mr. Davis to issue any such directions without leave of the Court. I regard his action as contemptuous, without leave of the Court, and I think we are entitled to have the people put on the stand and examined under oath.

The Special Master: Mr. Barr, do you want to contribute any information?

[3826] Mr. Barr: I saw this machine. I wonder, Mr. Davis said it indicated that something was amiss, do you know how it indicated that?

Mr. Davis: I am not familiar with the equipment. I know that at the time that this photographing equipment was to be brought in a question was raised with me as to the possibility of that equipment taking pictures of material that is under mask, and someone suggested they could obtain equipment which I understand has a needle which is activated whenever x-ray equipment is in use.

It may be the needle may be activated for some other reason.

At the moment I am not suggesting that anything improper is going on. I just wanted to report to the Special Master that on the basis of the evidence that this protective equipment has been activated, whether or not it can be determined as to whether or not there is some x-ray equipment in use on the premises, I have advised the person in charge of production to stop photographing until I could report the matter to the Special Master [3827] and take appropriate steps for protecting the Hughes Tool Company.

Mr. Barr: Let me give you a little report on this machine. This has been there. It is like a little box. It appears to be a form of Geiger counter, as far as I could tell. We all picked it up and handled it, and it was a source of much amusement.

This machine, since the time we were there, the needle has been bouncing back and forth and the lights have been flashing on and off. If that is the kind of signal it is giving, it has been giving that signal since Saturday, to my knowledge.

I am not an expert on this sort of machine, but I am just telling you that that is what the machine had been doing all the time we were there.

The Special Master: Are you an expert on the question of whether any x-ray machines are being used?

Mr. Barr: Let me say, I am not. Our people are not in there. We left the premises on Wednesday. None of our people are in there [3828] at the present time. I certainly didn't see any x-ray machine or anything I thought was an x-ray machine while I was there.

Mr. Sonnett: I have a statement to make and an application, may it please the Special Master.

First, I apply for a direction that Hughes Tool Company produce here on Monday to the Special Master all masked documents.

Secondly, I apply for a direction by the Special Master that the microfilming of non-masked documents be resumed forthwith.

The Special Master: Mr. Davis, did your order apply to the non-masked documents as well as the others?

Mr. Davis: The instruction I merely gave was to stop photographing—I just got the call; that is one of the reasons why I was almost a minute late—until I could bring the matter up before you, sir.

As I say, there is someone now under way to the premises to determine whether or not this equipment is or is not the kind of equipment which could take pictures of masked material. I would assume, and I can confirm the fact,

[3829] that this should be ascertainable in a matter of an hour or two.

I understand, contrary to the statement just made by Mr. Barr, as reported to mé by the person who has been there in charge of the production of documents, that this is the first time that they noticed the protective device becoming activated.

At this point I merely wanted to report that we wanted to have an opportunity to double-check the equipment now being used for photographing our documents.

The Special Master: Is there any reason why they can't proceed with those documents which are not masked? Do you want to say anything about that request?

Mr. Davis: I have no objection to proceeding with documents which are not masked, no. I have no objection to that.

The Special Master: Your request that they proceed with the documents that are not masked will be granted.

Mr. Sonnett: As to the other matter, Mr. Rankin, it seems quite evident that we are [3830] running into a problem here which is going to create a good deal of difficulty about masked documents. I needn't, I suppose, say it, but I will, that if anybody has used any kind of contrivance to try and penetrate the masks, it is unauthorized by TWA, and they will be held fully accountable.

I think we are running into another one of the Hughes exercises. I think that the Court has the power and should direct that all masked documents be delivered here Monday morning. I think that the Special Master should examine that which has been masked, and keep the matter under the control of the Court so we won't be playing games of cops and robbers, and get the matter laid to rest.

I don't want to run into a situation like we ran into today

where Mr. Davis this morning wasn't aware that he put out a press release and found that he had.

The simple solution is to bring the masked documents in here before the Court. That is where they belong.

The Special Master: Mr. Sonnett, [3831] I accept your statement that any such action, if it is occurring, is without authority. I would assume that, unless it was established otherwise.

With regard to your application to produce the masked documents here, I will reserve ruling on that until 4 o'clock, with the thought that by that time we will have a report as to the accuracy of the machine.

Mr. Barr: May I make a suggestion, sir? I take it we are going to make some inquiries in California. I think it might be very well to find out whether any more machines have been brought in out there. If there haven't been any more brought in, then that machine, this little Geiger counter, has been in the room with all these other machines ever since we began, and if it is accurate and effective, presumably it would have picked up something days ago.

Mr. Davis: I have a call in now.

Mr. Sonnett: There is a simpler solution than that. I will deliver to the custody of the Special Master every microfilm that contains pictures of any document that has been [3832] masked. It is quite simple. The Master can look at them. If there is any hanky-panky, this red herring bit that Mr. Davis is dragging out, then any masking that has been penetrated surreptitiously the Master can deal with, and I can deal with whoever was responsible, if, indeed, it happened, and I doubt that it did.

Mr. Davis: Mr. Special Master, I want to make it clear that we are not claiming that anybody is doing anything improper. It may very well be that someone thinks it is amusing to have introduced in the room something that

would make this instrument activate itself to perhaps unduly alarm someone. The only request that I made at this point is for an opportunity to satisfy those who are on the scene charged with the production of documents, let them satisfy themselves that something improper is not going on.

At this point I have no intention of claiming or charging hanky-panky, as Mr. Sonnett would like to call it, by anyone.

The Special Master: I am not going to assume that anyone is using any devices to [3833] penetrate the masking until we have something than can be relied upon as far as a showing is concerned.

I am also not going to examine a lot of masked documents in microfilm form if I can avoid it on the assumption that something has been done improperly when I don't know that it has.

I think that Mr. Sonnett and Mr. Barr, in any way they want to arrange it, might find out from their people anything that they wish to report by 4 o'clock, and I hope that Mr. Davis will have his report by then, and then we will act on your request.

Mr. Barr: Let me make clear, sir, none of the additional defendants have any of the people in the building. They have not been there since Wednesday.

Mr. Davis: May I be excused for a moment to take the call that is coming in now?

The Special Master: Maybe this will answer it.

Mr. Sonnett: I assume that Mr. Cox will here represent him.

[3834] Let me say one other thing. We have hired Recordak, which is a highly reputable organization, to do the job. I have no reason to doubt that they are doing anything except doing the job, and I don't want to get drawn into one of these red herring games.

I don't give a continental what any alleged expert that they bring in says or doesn't say. In the first place, whatever he says, if he says anything contrary to what I believe, I will want to cross-examine him. So we are getting no place with that.

The substantive question, I think, is whether information which has been masked should be withheld properly from TWA. That is point 1, and on that we are going to have to have rulings by the Special Master anyway.

Point 2, if any of the microfilms penetrated the mask, and we are not entitled to that information, obviously it should be suppressed and taken away from us.

So that I think the only way to resolve it, without getting drawn into one of these diversionary moves again, is to have the masked [3835] documents brought back here, have a statement given to the Master as to why they were masked, and have rulings made.

We will, as I say, in the same breath, we will lock up the microfilms on masked documents until the Master has ruled. But this is calculated to produce another delay of a week or two weeks before we get at the documents. That is what I think it is calculated to do.

The Special Master: Mr. Sonnett, were you taking into account the possibility that the expert may say that there is nothing that happened so far as penetrating the mask?

Mr. Sonnett: He may or may not, but I don't really care much what he says, because if there was a penetration of the mask it is unintentional, and it is in violation, certainly, of any instructions given by TWA, and if there was an inadvertent violation, the microfilm can be suppressed, if it should be.

But I am saying that the whole exercise here is a diversionary move to delay the question of your ruling on

whether we can see what [3836] is masked out or not. I think we ought to have that resolved.

The Special Master: Maybe you have an answer.

Mr. Davis: Yes. The information is coming in.

They are apparently at the moment photographing non-masked documents, and the photographing is continuing. The expert on the machine was just arriving during the course of the conversation, and will examine the equipment to see if it is malfunctioning or what caused it to malfunction if it is malfunctioning.

Mr. Barr: The only point I wanted to make, sir, was if this machine is malfunctioning it has been malfunctioning since Saturday, before there were ever any machines brought in there. This light was flashing and this thing was going back and forth like crazy from the very beginning.

The Special Master: I accept your statement of that fact, Mr. Barr, but I don't have any basis for knowing how it is functioning now.

[3837] Mr. Barr: I understood Mr. Davis to say that that was what it was doing now.

Mr. Davis: I have never seen the machine.

We are taking an awful lot of time, Mr. Special Master, on an issue which, so far as I am concerned, does not require any more of the time of this witness.

The Special Master: I will reserve the question until 4 o'clock. Let's proceed to the witness.

Mr. Sonnett: May I respectfully suggest, not to delay the witness, but I think the simple solution to this is let's not play any games. I think you ought to have the masked documents put before you on Monday. You are going to have to rule on them sooner or later. We will suspend—and it is only TWA who is doing it—we will suspend any

microfilming of masked documents if there is some kind of a technical problem until you have ruled on the masked documents, and then you are going to tell us whether we can microfilm them or whether we can't.

I don't like to charge this, but I am [3837A] afraid we are running into at least that kind of confusion which has so characterized so much of what we have seen on the part of Hughes Tool Company on documents, and I don't want to run into delays.

Mr. Barr: Mr. Rankin, may I put in a little something?

[3838] The Special Master: One minute.

Mr. Barr: One minute is all I will take.

I think Mr. Sonnett is right, that you are going to have to look at these masked documents.

I can give you some examples. There are examples where letters have been produced. the whole letter is produced, but the addressee is masked out, for example.

These call sheets, there are great portions of those in the middle of conversations which are masked out. I have seen them.

You are obviously going to have to go over them at some point.

The Special Master: In regard to that, I am willing to go over them, but I am not going to be able to with the schedule I have until at least next Friday, which may delay you over what you would otherwise get if you wait.

Mr. Sonnett: It won't, sir. That is my point. His problem is that he doesn't want the Recordak people to microfilm documents with masks on.

Our problem is we want you to examine what is under the mask.

[3839] It seems to me that the simple thing to do, if this is creating some big problem, is to stop the microfilming of

masked documents, have them sent here, have you rule on them, and then whatever we are entitled to microfilm we will.

The Special Master: Is that any problem to you?

Mr. Davis: No, the production of the documents here is perfectly all right, Mr. Special Master, but I respectfully urge that we receive equal treatment from the Special Master, and that all documents and diaries that were masked by TWA be likewise produced for similar examination.

Mr. Sonnett: No objection to that. You identify them, and we will produce them.

I don't think we produced anything masked from TWA's files. I think you are thinking about Breech's files, and you will have to talk to his lawyer.

Mr. Davis: You seem to distinguish between Mr. Breech as an officer of TWA and TWA.

Mr. Sonnett: There is no objection to that. I wish Mr. Davis would stop stalling. His favorite technique, when he is caught with his [3840] pants down, is to say, "You are another." Let's have the documents in here. You are not going to hide them forever.

The Special Master: If you will produce by next Friday the masked documents of the Hughes Tool Company, I will go into the question of the masking, and I will direct that the same be done as to any TWA documents that were masked, and as soon as we have Mr. Breech before the Court, or I examine the question as to who can act for him, I will do the same as to Mr. Breech's documents.

Mr. Sonnett: I am sure there will be no problem there, Mr. Rankin.

Mr. Davis: Before the luncheon recess a question was asked of me by Mr. Sonnett, which I thought at that time and still think was out of order. The Special Master indicated some interest in the subject, and before resuming the

questioning of the witness I would be pleased to state the facts for the record and for your information, sir.

The Special Master: Excuse me. Off the record.

[3841] (Discussion off the record.)

Mr. Davis: This is with respect to what transpired in the so-called publicity release and letter to the New York Stock Exchange.

I had an opportunity to confirm the facts during the luncheon period.

They were vague in my mind at the time the inquiry was made by the Special Master, and that was really my underlying basis for objecting to interfering with my discovery proceeding.

The letter to the New York Stock Exchange was prepared by Mr. Cox, who is here with me.

I revised the letter. The letter that actually went to the Exchange was the letter as revised by me.

However, the carbon copies of the letter as drafted by Mr. Cox had not been all destroyed. When the Exchange called and asked that we undertake to release to the press the statement that had been made to the New York Stock Exchange Mr. Settles undertook to do that. He took excerpts from the letter that had been drafted by Mr. Cox rather than the copy of the letter that went to the Exchange.

[3842] That is the explanation of the difference between the statement that went to the press as an excerpt from the letter to the Exchange and the actual letter that did go to the Exchange.

That fact was called to my attention shortly after that occurred. I did not think that the difference was of sufficient materiality to require any further action on the part of the Tool Company.

The Special Master: Thank you.

Mr. Davis: I do not know of any other release of any kind that was prepared or issued by my office with this limited exception: In connection with applications that were made to the CAB, and relating to Northeast, or the acquisition of control of Northeast, which was withdrawn by either Atlas or Northeast, a statement came out by the CAB relating to that withdrawal which was not satisfactory to the Tool Company.

I communicated with the CAB and advised them that the Tool Company had no objection to making public the memorandum of understanding which had originally been filed with the CAB relating to the acquisition of Northeast, and that the request for confidential treatment which had [3843] been made by Atlas and Northeast was not a request made on behalf of Hughes Tool Company.

Following that discussion with the CAB the Tool Company decided to release to the press the memorandum of understanding which had been filed as a joint memorandum and which had been withdrawn.

I understand that a representative of Carl Byoir & Associates undertook to advise the press of the position taken by Hughes Tool Company and made available to them the memorandum of understanding.

If that was done in the form of a press release, it was done by Carl Byoir & Associates, I never saw it. But I do know that that took place.

So far as the production to TWA of any of such releases is concerned, my statement made several times on the record still holds good, that I believe that we have fully complied with the production called for.

I have not made any special or particular inquiry as to what or which releases, available or in existence, were in

fact included among the [3844] documents produced either at Houston or Romaine Street.

With the permission of the Special Master, I do believe that my position is proper and sound, that while the Tool Company is engaged in discovery proceedings, oral examination of TWA and of this witness, it should not be interrupted for the purpose of permitting TWA or the additional defendants to engage in what in effect amounts to an indirect oral examination or discovery proceeding.

The Special Master: I wish to allow Mr. Sonnett to comment, if he wants to, upon your statement, and then we will proceed.

Mr. Sonnett: I not only want to, but I feel obliged to, Mr. Rankin.

What counsel had just said, if I understand him, is that the document which he produced, and which has been marked Defendants' Exhibit 61, and which bears at the top the words "By hand," and next to it, in handwriting, "11:50 a.m.," is not in fact a copy of the communication sent to the New York Stock Exchange.

He now describes it, if I understand him, [3845] as a draft—

Mr. Davis: No, sir, you misunderstand me. Let me explain it to you again.

Mr. Cox originally prepared a letter for the New York Stock Exchange in final form with copies annexed.

He came to me with it before sending it. I changed it, and what went to the New York Stock Exchange is the letter as revised by me.

However, there was left in the office copies of the letter as prepared by Mr. Cox and before I revised it.

Mr. Sonnett: Therefore, I am quite correct. We do not have a copy of the letter as sent to the Stock Exchange.

Mr. Davis: Yes, sir. That is Defendants' Exhibit 61.

Mr. Sonnett: I am sorry, it isn't, from what you have just said. Where is the change that you made? I don't understand you at all.

Mr. Davis: Can you explain it to him, Mr. Special Master?

Mr. Sonnett: Why don't you? It was your handiwork.

[3846] The Special Master: The way I understand Mr. Davis' statement is that Mr. Cox made a draft—

Mr. Davis: It was a letter in final form, sir.

Mr. Sonnett: Where is it?

Mr. Davis: Destroyed.

Mr. Sonnett: It was destroyed?

Mr. Davis: It was destroyed at the time. It was never sent. I assume you never revise the work of your associates. I do.

Mr. Sonnett: So there is no copy of the document he started out with. That is my point.

Mr. Davis: Yes, there is, in excerpt form, because that is exactly what Mr. Settles sent to the press.

Mr. Settles made excerpts of the carbon copy of the letter as prepared by Mr. Cox. The letter that went to the Exchange was the letter prepared by Mr. Cox as revised by me.

If that isn't clear I will do it once more.

The Special Master: I understand it.

Is there any question about it, Mr. Sonnett?

Mr. Sonnett: Yes. Quite frankly, I may be [3847] stupid today.

The Special Master: Mr. Cox prepared a letter in a final form. Mr. Davis revised it. Exhibit 61 is the revision that was sent.

Mr. Settles took excerpts from Mr. Cox's draft and sent them as the press release. Mr. Davis thought there was

not sufficient change between the press release and the document, Exhibit 61, that he need to change the press release.

That is what he says.

Mr. Davis: That's right. The point is that Mr. Cox's letter was not in draft form, and therefore, when Mr. Settles found lying around a copy of a letter addressed to the Exchange that did not have "draft" on it he assumed that it was a carbon copy of the letter which in fact was sent to the Exchange.

Mr. Sonnett: Is Mr. Davis saying that at 6:00 p.m. on May 31, 1961—

Mr. Davis: 6:00 p.m.?

Mr. Sonnett: That is what it says on Exhibit 62A.

(Continuing)—that Mr. Settles dictated to [3848] the Daily Mirror, the Daily News, the Herald Tribune, The New York Journal American, The New York Times, The New York Post, The New York World-Telegram, Associated Press, United Press International and the Wall Street Journal a press release without Mr. Davis' approval?

Mr. Davis: That is correct, in this sense, Mr. Sonnett, that I had approved a letter to the New York Stock Exchange which was delivered to the Exchange at 11:50 a.m.

The Exchange called and asked that we send out to the newspapers the statement of the letter sent to them.

Mr. Settles undertook to do that.

He was instructed to send to the newspapers an excerpt of the letter as sent to the Exchange.

Mr. Settles, unfortunately, got ahold of a carbon copy of a letter in final form as prepared by Mr. Cox which had not been sent to the Exchange, and transmitted that as an excerpt of the letter to the Exchange.

That fact came to my attention several days later, and I didn't think that the difference between what Mr. Settles

sent to the newspapers and [3849] what I had approved as a letter to the Exchange required any further action by Hughes Tool Company.

Mr. Sonnett: Would Mr. Davis identify who in the Exchange asked them to issue this press release to the press?

The Special Master: I don't think we should go into that at this time, Mr. Sonnett.

When you get to your case I will give you all opportunity to go into those questions.

Mr. Sonnett: I have a variety of questions. In light of your ruling, I will not press them. But they are very interesting, indeed, on this subject matter, such as who made the decision reflected in the exhibit, whether Mr. Davis made it, Mr. Hughes made it, how it was made, and a series of interesting questions such as that.

If I understood correctly, on the question of production of documents, Mr. Davis said a little while ago that he had no idea whether the Carl Byoir press releases had been or had not been produced.

I am interested in the press releases they put out in their press campaign about the so-called [3850] counterclaims. They should be produced, including all drafts.

The Special Master: I understood Mr. Davis to represent that there had been a full production, including any such press releases, as they were called for by various motions and orders.

Mr. Sonnett: I may be in error, Mr. Rankin. I thought he just said that he did not know whether or not the press handouts of Carl Byoir had been produced.

The Special Master: What I understood was that he said he hadn't checked that as a particular item.

Will you enlighten us on that, Mr. Davis?

Mr. Davis: You are correct, Mr. Special Master.

The Special Master: Now we will proceed with the deposition of Mr. Tillinghast.

Examination (cont'd) by Mr. Davis:

Q. Before the luncheon recess, Mr. Tillinghast, I believe you were explaining how this offer by the Tool Company reflected by Defendants' Exhibit 56 had put TWA on the spot.

Do you recall your testimony along those lines?

[3851] A. Well, I wouldn't consider that an accurate characterization, Mr. Davis, but I recall what I was testifying about.

Q. Then you also testified to the effect that you considered this letter of June 10, 1961 as an interference with the Boeing program?

A. No, I didn't. As an attempted interference.

Q. And you were explaining how this proposal by the Tool Company constituted such an attempt at interference with the Boeing program.

Do you recall your testimony along those lines?

A. Broadly, yes.

Q. And I inquired from you if you understood from this proposal that it was not a condition of the proposal that TWA undertake to acquire either Boeing aircraft or Convair aircraft.

You recall your testimony—

A. I do.

Q. Will you explain further how the proposals, or any one of the proposals set forth in this letter of June 10, 1961, might constitute an attempt at interference with the Boeing program? You need not repeat any testimony that you have already given.

A. Well, Mr. Davis—

[3852] Q. You may to the extent you feel it is necessary in order to make a sensible answer.

Mr. Sonnett: You are not asking him for an argument, I take it. You seem to be.

Mr. Davis: Just looking for facts.

Mr. Sonnett: You are asking an argumentative question, in light of the record. This has been testified to at length. Mr. Davis is interested in arguing with the witness. He is not asking for discovery. He wants Mr. Tillinghast to behave as an advocate.

[3853] The Special Master: You don't have to be an advocate. Just tell the facts, Mr. Tillinghast.

A. Repeating, at least in part, what I have already testified to, Mr. Davis, this impressed me as an attempt to get us involved in a negotiation which would go on for an extended period of time, and which would raise questions which would have the effect of interfering with and postponing the consummation of the financing which was necessary to go ahead with the Boeing program.

Q. Did you understand that the proposals submitted by Defendants' Exhibit 56 could be accepted in a form so as to constitute a commitment on the part of the Tool Company without the delay that might take place with respect to an actual offering of equity securities to the public?

A. It was my understanding, Mr. Davis, that the so-called proposals involved in Defendants' Exhibit—what is the number?

Q. 56.

A. (Continuing) —were not such—

Q. Don't you have Defendants' Exhibit 56 before you?

A. No, I do not, Mr. Davis. I have a copy of it, [3854] but it doesn't have the exhibit number on it. I will write it on, and then we won't have any problem.

It was not my understanding, Mr. Davis, that the proposals contained in Plaintiff's Exhibit 56 were sufficiently complete with respect to the essential terms that they were subject to a simple acceptance by TWA. It seemed to me obvious that any one of the proposals, had it been "accepted," would have merely been a prelude to extended negotiations to settle the essential terms.

The Special Master: I don't think that is the question, Mr. Tillinghast.

The Witness: I am sorry.

The Special Master: The question was whether or not you thought that it could be accepted without the offering being made to the public. Wasn't that the question?

Mr. Davis: That's right.

The Witness: Well, yes. There was no public offering involved.

Was that your question? I am sorry.

Q. I don't know to what extent you understood either at the time or now the proposal. Let me refer you to page 2.

[3855] Mr. Sonnett: May I ask the Master—

The Special Master: You want the question read?

Mr. Sonnett: Yes, and I would like to have that comment stricken. I think that is unnecessary. The question was involved, and frankly I understood it as the witness did. Maybe we both were confused.

The Special Master: Read the question.

Mr. Davis: It was the answer which brought about the remark.

Mr. Sonnett: The witness has been trying to help you.

(The record was read.)

By Mr. Davis:

Q. Mr. Tillinghast, let me refer you to page 2 of the exhibit, under proposal No. 1, and you see the portion which reads "Hughes Tool Company will agree to subscribe to a pro rata share of any such new offering and will subscribe to any portion unsubscribed by the other stockholders of TWA up to a maximum amount of $100 million."

A. Yes, I see that, Mr. Davis. I was mistaken.

Q. At the time that you received this letter you [3856] understood it, did you not?

A. I think I understood it, and I will come back to your question before, and I think your question was in two parts, and that is, whether or not this could be accepted, and I say again that in a legal sense I don't think this proposal, or any of them, was capable of acceptance.

The Special Master: I say to you again, Mr. Tillinghast, that wasn't the question. The question was whether it could be accepted without the public offering.

The Witness: My answer, Mr. Special Master, it couldn't be accepted with or without the public offering.

It just wasn't capable of acceptance.

Q. Mr. Tillinghast, my question to you is whether or not you understood that proposal No. 1 could be developed

into a firm commitment by Hughes Tool Company without involving delays that might be attendant to a public offering.

A. If that is your question, Mr. Davis, the answer is yes.

Q. You understood that?

A. I didn't understand that. I understand your [3857] question now.

Q. My question to you is whether you understood that at the time that you were considering the June 10th letter.

A. At the time I was considering the June 10th letter I was very much impressed by the fact that this was nowhere near being a complete proposal, and that obviously to develop it into a complete proposal capable of acceptance would require a very considerable amount of negotiation and consequent delay.

Q. With respect to this delay that you are referring to, I am trying to establish the fact as to whether or not you understood that it would not be a delay occasioned by the necessity of a public offering.

A. That's correct.

Q. What delay did you contemplate with respect to the terms that would have to be negotiated or the problem of obtaining an adequate commitment of the Tool Company with respect to proposal No. 1?

A. Well, obviously, Mr. Davis, as you well know, the terms connected with any underwriting or guarantee of a public offering are many and varied. But I call your attention to the fact that the most essential ones, as to type of security and price, were not even touched [3858] on in this proposal.

Q. I understand that, but are you aware of the fact that the Tool Company, in connection with the December 1960 financing, committed itself to subscribe to a hundred million dollars worth of income debentures of TWA?

A. I am.

Q. And that commitment of the Tool Company did not describe in detail the nature or type or terms of the securities that TWA would offer, did it?

A. It did to some degree, as I recall it.

Q. In a general way?

A. In a general way.

Q. And the Tool Company firmly committed itself to not only subscribe to its proportionate share of any equity security which TWA might offer, but also undertook to subscribe to any portion which the other stockholders did not subscribe to—you understood that as the 1960 agreement, didn't you?

A. I don't recall that that involved an equity security, Mr. Davis.

Q. I understand you draw a distinction between equity security and these subordinated income debentures.

A. I do.

[3859] Q. Do you understand or did you understand proposal No. 1 as one whereby the Tool Company was offering to commit itself to subscribe to an offering of equity securities to be determined by TWA?

A. No, I did not, Mr. Davis. I did not understand this to be a commitment by the Tool Company to buy equity securities of any type or form which TWA might be disposed to offer.

Q. I understand that the letter of June 10th was not in that form. Did you understand that the proposal was to discuss and agree upon a form of commitment by the Tool Company?

A. I understood the proposal to be an invitation, if in good faith, to discuss and agree upon, yes.

Q. Did you understand from the paragraph on page 3 that if you were favorably disposed to an acceptance of this

proposal the matter could be indicated to Mr. Davis and then whatever details necessary discussed and worked out?

A. I read what it says, Mr. Davis.

Q. At this point I am interested in the understanding that you had at the time.

A. My understanding at the time, Mr. Davis, was that at best this was an invitation to become engaged [3860] in a lengthy negotiation.

Q. Is there any particular part of this Defendants' Exhibit 56 which to you means that it was an invitation to engage in extended negotiations?

A. Well, I think, Mr. Davis, the whole thing smacks of that.

Q. Is there any particular part of it to which you can refer as giving it that flavor?

Mr. Sonnett: I don't know, Mr. Rankin, whether this is producing anything. What it seems to be designed to do is to engage the witness in a debate about the meaning of words. He is not asking the witness whether he understood what was said in the letter, whether he didn't understand it. He keeps going back to the question repeatedly, which the witness has testified to at least a hundred times, about his basic evaluation of the letter.

If we start down a path here about whether this sentence or that sentence or the other sentence conveyed to the witness some meaning other than the words normally conveyed, we are getting into a debate. This is all Mr. Davis is trying to do. He is wasting, I think, a great deal of time.

[3861] The witness has made, I think, very clear his evaluation of the letter, of the proposals in it, the reasons why he had the views he had, and the

witness is certainly capable of reading and understanding the English language. We are at cross purposes here always.

The Special Master: I don't understand how there is any debate involved, Mr. Sonnett. It seems to me the witness can say "I understood the language" in whatever way he did at the time. The language may say something else to you or to me or Judge Bromley, and the English may be different. But it is what the witness understood and what he did about it that the question asks for.

It doesn't ask here for what he did about it, but it does ask what he understood about it. He drew certain conclusions from it, and he is asked to tell what parts of it he drew those conclusions from.

Mr. Sonnett: He has already testified from the entire letter, sir.

The Special Master: Now he is asked for particular parts.

[3862] Mr. Sonnett: He is being asked whether any particular part.

The Special Master: That's right.

Mr. Sonnett: And if so, what.

The Special Master: Yes.

Mr. Sonnett: The witness has said the entire letter. What are we getting into but a debate about particular sentences?

The Special Master: If he can't find anything except the general letter, he can say so.

Mr. Sonnett: I thought he had. That is the basis of my objection.

The Special Master: If he can't find any particular part that he can point to, he can say so. That is all the question asks for.

A. I don't think my feeling, Mr. Davis, was based upon particular parts of the letter. I think it was based upon the total letter.

Q. But you understood that the letter was divided into three separate proposals, did you not?

A. I did.

Q. Now we are addressing ourselves to proposal No. 1, and only proposal No. 1.

A. Yes.

[3863] Q. Did you understand that proposal No. 1 was open for only a period of ten days?

A. Subject to an extension.

Q. Subject to an extension of time only if you indicated that you were favorably disposed toward proposal No. 1, isn't that right?

A. That's correct.

Q. Isn't it a fact that under proposal No. 1 you had ten days within which to indicate whether or not TWA was favorably disposed toward proposal No. 1?

A. It so states.

Q. And it was up to TWA to act as quickly or slowly, within the ten-day period, as it wished, isn't that right?

A. It so states.

Q. That is what you understood?

A. To the extent that I accept this as being in good faith, that is what it says.

Q. But I understood you to say a moment ago that while you had these suspicions as a result of conferences with Mr. Rowe and Mr. Reed, you decided to treat the letter as though it were in good faith, isn't that right?

A. In a sense, yes.

[3864] Q. And in a sense no?

A. Well, no. I think—I guess I have to say the answer to that is yes, Mr. Davis. I proposed to deal with it as if

it were a good faith proposal to see what might conceivably come of it.

Q. Making that assumption, which was an assumption that you were making sometime between June 10th and June 16th—

A. June 12th and June 16th.

Q. June 12th and June 22nd?

A. June 16th.

Q. (Continuing)—you understood that you had ten days in which to indicate whether or not you were favorably disposed?

A. That's correct.

Q. Did you intend your letter of June 16, 1961 to indicate that you were favorably disposed toward proposal No. 1?

A. No, I didn't, Mr. Davis. I intended, in my letter of June 16th, so far as proposal No. 1 is concerned, to indicate certain serious questions associated with proposal No. 1, as to which I thought we needed answers from you.

Q. Is it a fact that TWA concluded that it was [3865] not favorably disposed toward proposal No. 1?

A. No. I think TWA's position on proposal No. 1 was that we were interested in equity financing if it could be arranged, but that the suggestion that had been made here contained an obviously impossible condition, and one probably recognized by you as being impossible.

Q. What condition did you recognize as being impossible?

A. The termination of the voting trust.

Q. What was the basis for your conclusion that this was an impossible condition?

A. That the Hughes Tool Company had turned heaven and earth during 1960 in an attempt to arrange financing

without a voting trust, and had not succeeded in doing

Q. Did you consider or discuss with anyone the fact t a hundred million dollars of additional equity capital mi give the lending institution such additional security t they might no longer be interested in the voting trust

A. Yes.

Q. With whom did you have such a discussion?

A. With Mr. Leslie, I believe.

Q. Anyone else?

[3866] A. I probably mentioned it to Mr. Rowe, a also to Mr. Reed. But my main discussion of that, so f as I can recall, was with Mr. Leslie.

Q. Will you describe the nature of the discussion whi you had with Mr. Leslie on this aspect?

A. Well, I remember asking Mr. Leslie whether thought the financial institutions would think this sufficie to do away with the voting trust, and he said he didn think there was any chance of it.

Q. Did he give you any reasons or facts to support th conclusion?

A. Well, I don't remember, Mr. Davis, exactly. It very hard for me to be sure that I associate things that have been told with specific conversations.

I was aware of the fact, and I think he touched on t fact, that the voting institutions were—I am sorry—t financial institutions were very concerned with the manag ment problem and with the discontinuity of manageme that had existed, that he didn't feel that with the Boei financing, which, by this time, had already been informal committed for, coming along, that the financial institutio would be willing to go ahead with the commitment and the same time accept a termination of the voting trust.

[3867] The Special Master: We will take a short recess.

(Whereupon, a short recess was taken.)

Mr. Davis: During the recess I received a report, but perhaps we can hold that until after Mr. Tillinghast is through. It is very simple. It might give everybody a chance to think about their position at the end by merely stating that the expert has been there, has found the battery has run down.

May we discuss the matter further at the close of the session, if it requires further discussion?

Mr. Sonnett: Mr. Davis, will you bring him in and see whether he can get you to run down? That would be even more helpful.

The Special Master: I am glad that is the end of it. You may proceed.

Mr. Sonnett: I still think, however, that we ought to have the documents produced. They have got to be ruled on sooner or later.

Mr. Special Master: I think that is the understanding.

Mr. Davis: That's correct.

[3868] By Mr. Davis:

Q. In connection with your discussions with Mr. Leslie, that you were testifying about before the recess, Mr. Tillinghast, you referred to the concern of the lending institutions as to the management of TWA. Do you remember discussing that aspect of it with Mr. Leslie?

A. As to the discontinuity of the management of TWA.

Q. At the time you were discussing this matter with Mr. Leslie did you or did he refer to the first sentence of paragraph (b) which appears at page 4, reading:

"If this proposal is accepted, it would not be the intention of Hughes Tool Company to change the present management of TWA"?

A. No, Mr. Davis, I can't remember whether we mentioned that at that time or not. I think we probably touched on it at least in part.

Q. Did Mr. Leslie have available to him a copy of the letter itself?

A. I believe so. I am under the impression, it is my recollection, that when the letter came in I had photostats made and gave them to Mr. Leslie and Mr. [3869] Cocke. He was familiar with the letter, I am quite sure.

Q. But you don't recall any particular discussion or consideration given to the meaning of what particular sentence?

A. Well, I think maybe, Mr. Davis, as I think about it, that we did discuss that. I have a feeling that these marginal notes, which say "Right to default whole loan,"—

Q. Are you referring to the marginal note which appears next to that paragraph in the letter?

A. Yes, I am. I am sure there is only one that reads substantially that way. What does yours say?

Q. There is the word "of" (handing to witness)?

A. No, there isn't, Mr. Davis. It says "Right to default whole loan."

Q. May I refer you to this (indicating)? Doesn't it look like "o-f"?

A. That, Mr. Davis, is a "T" at the end of "default," d-e-f-a-u-l-t.

The Witness: Would you pick me up, please?

Q. That is in your handwriting, isn't it?

A. That is in my handwriting. I can appreciate [3870] your difficulty in reading it.

(The answer was read.)

A. (Continuing)—were the consequence of a discussion with Mr. Leslie, and if I am correct in my recollection, Mr. Leslie pointed out that with a maintenance of management position—provision of the type referred to in subparagraph (b) on page 4, TWA would be in the position where if there was some change in management the outstanding indebtedness of TWA could be accelerated, and that leads me to think that the answer to the question you first asked is yes, I did discuss paragraph (b) with Mr. Leslie.

Q. Will you give us your present recollection, then, of the discussion that you had with Mr. Leslie in that regard?

A. Well, my recollection, Mr. Davis, is merely that I discussed with him, as I have several times testified, the question of whether or not the financial institutions would accept a termination of the voting trust, as to which he expressed a negative opinion, and discussed the possible acceptability of a maintenance—management provision, as to which he observed first that he doubted that the financial institutions would accept it, and secondly, that this [3871] might create a serious problem from TWA's standpoint in that it might accelerate all of TWA's indebtedness if there was a management change.

Q. Is that the entire substance of the discussion you had with Mr. Leslie with respect to the likelihood of the lending institutions—

A. Well, as I testified before, I asked Mr. Leslie to get in touch with the financial institutions and obtain from them such expression of views as he could as to whether they

would or would not give serious consideration to termination of the voting trust on the assumption that there was a equity investment of the sort referred to in the letter.

Q. I appreciate that, but at the moment I am interested in what was said by you and by Mr. Leslie before he went to see the lending institutions.

A. So far as I can recall it at this point, Mr. Davis, I have testified to all that was said.

Q. I understand your testimony as to the opinion, expressed by Mr. Leslie, as you recall it.

I am now trying to develop what you said or he said in support of that conclusion.

Was there any discussion as to why the lending institutions should be opposed or should not be opposed, whether [3872] a particular effort should be made by TWA to try to convince the lending institutions that it was to their interest to acquiesce in the condition?

A. Mr. Davis, I don't remember any discussion beyond that to which I have already testified.

Q. Are you testifying that in fact there was no discussion as to the reasons why the lending institutions would or would not approve other than the statement of his opinion that they would not be likely to acquiesce?

A. No, I am not so testifying.

Q. Was there a discussion as to the reasons that the lending institutions would have for not consenting or acquiescing in the condition?

A. Not that I can recall, Mr. Davis.

Q. Did you indicate to Mr. Leslie that when contacting the lending institutions he ought to make every possible effort to persuade them favorably?

A. No, I did not.

Q. What was the purpose of your discussion with Mr. Leslie?

A. The purpose of my discussion with Mr. Leslie, so far as I can recall it, was to obtain his opinion and to ask him to obtain the views of the lending [3873] institutions.

Q. Was it to get the views of the lending institutions on the assumption that TWA was favorably disposed toward the proposal, or from the point of view that TWA was not favorably disposed, or from the point of view that TWA didn't care one way or the other?

A. I would say, Mr. Davis, that I regarded this question of the voting trust as being one primarily between Hughes Tool Company and the financial institutions, which, as I said before, had been the subject of the most long and drawn out and strenuous negotiations just a few months before this.

I personally very much doubted that in the light of that there was any serious likelihood that the financial institutions, so quickly after they had succeeded in establishing the voting trust, would have a sudden change of heart.

Nevertheless, I felt that we should go to them and ask them, and I felt that so far as I was concerned I should ask Mr. Leslie whether he shared my views on the subject, or, more accurately, what his opinion was. His opinion happened to coincide with mine, and that being the case, I asked him to go and find [3874] out from the financial institutions whether that was in fact their state of mind.

Q. My question now is whether or not this conversation you had with Mr. Leslie could be construed as a direction or instruction to Mr. Leslie to approach the lending institutions on the basis that TWA was or was not favorably disposed to proposal No. 1, subject to whatever position they would insist upon.

A. Well, I must come back and say once again, Mr. Davis, that I am sure that our discussion was colored some

what by the feeling that I had that this was not a serious or genuine proposal.

I did not, as I recall it, give Mr. Leslie any instructions, either to urge the financial institutions to agree to this or urge them not to agree to it.

I had an opinion as to the position they probably would take. I wanted to find out from him whether he shared the opinion, and through him to find out whether or not in fact I was correct in the opinion I thought they would take on the subject.

Q. Did you discuss with Mr. Leslie your views that the receipt of this proposal by TWA was likely to interfere with the Boeing program?

[3875] A. Mr. Davis, I would have to say that what you say is not a quite accurate summation of my views. I think it highly probable, although I don't recall a specific discussion, that I at least mentioned to Mr. Leslie that I considered that this was another step in the series of attempts to upset and interfere with the Boeing program.

Q. My question is whether or not there was a discussion of that aspect of your views, whatever they were.

A. I tried to say that I have no recollection at the present of a specific discussion.

Q. Do you recall whether or not generally, if not specifically, you at the time told Mr. Leslie "This letter, of course, is nothing but an effort to interfere with the management of TWA or the Boeing program," or something of the like?

A. I think it is very likely that I said that to him, Mr. Davis, but I don't have a specific recollection.

Q. Do you have a recollection of saying that to anyone else other than Mr. Rowe and Mr. Reed?

A. No, I don't, although I would have said that to anyone with whom I was discussing the letter [3876] to whom such a statement might have been appropriate.

Q. You don't recall saying that to anyone?

A. I don't recall any specific discussions of it other than those to which I have testified.

Q. You are referring to your discussions with Mr. Rowe and Mr. Reed?

A. Yes.

Q. You are not referring to any discussion with Mr. Breech or Mr. Sessel?

A. Well, I don't recall specifically, but I would be very surprised if I hadn't stated that to both of those gentlemen.

Q. But you have no recollection of having done so?

A. I don't have a specific recollection, no, Mr. Davis.

Q. Going back to Exhibit 56, page 3, at the bottom of that page, I see another note with the figure 44,000, it appears to be. Do you see that?

A. I see that.

Q. You think that might have meant 44,000,000 instead of 44,000?

A. At the moment, Mr. Davis, I haven't the slightest idea what it refers to.

[3877] Q. Let me suggest to you that at that time you were contemplating the financing of approximately $148 million, more or less, and you see that that note is next to the paragraph which reads:

> "Hughes Tool Company would guarantee to TWA an additional $100 million of equity capital."

You think that the 44,000,000 or 44,000, as it appears in the note, might refer to the difference between $100 million and the amount needed for the Boeing program?

A. Well, if it were 42.5 instead of 44 it would have been the difference between $100 million and $147.5 million. But it isn't 42.5. Why it is 44, I just don't recall.

Q. It may have been just a rough figure, a notation that you made as you were reading along. Let me ask you this: Did you give consideration as to what the financing requirements of TWA would be if proposal No. 1 were to become a reality?

A. Yes, I did, Mr. Davis. It would have meant that our borrowings would have been a little over $200 million, about $210 million, over and above the $100 million of subordinate debentures, or [3878] $300-odd million including them.

Q. I don't understand the arithmetic you just did, Mr. Tillinghast.

When you say "borrowing," let us eliminate from the borrowing concept the income debentures that were issued to the public and to Hughes Tool Company, and let's think of those in terms of securities.

A. Well, Mr. Davis, it is as simple as this. I add to $165 million of the 1960 financing $42.5 million over and above the $100 million for the 1961 Boeing program, and I come, I guess, to $207,500,000, and one of the things that I was thinking about, and this may be the reason for this note here, is that even with the $100 million we would still be in a position where we would need extensive outside debt financing, even before we got to the stage 3 or short-range program.

Q. I understand there was always a problem of further and future additional requirements.

A. That's right.

Q. For the moment I am addressing myself to what was then immediate and contemplated by TWA.

A. So far as what was immediate and contemplated [3879] by TWA, I would have to say that whenever one talked about equity financing that brought to my mind the question of the third phase short-range program, and in connection with a $100 million of additional equity, I looked at that in terms not only of the 1960 program and the 1961 Boeing program, but also the short-range program that would have to come on beyond that, for which we would unquestionably need financing.

Q. In connection with your discussion with Mr. Leslie, did you attempt to compute the difference between the interest requirements of the program as then contemplated as against the payments which might have to be made, if earned, on equity securities or additional subordinated income debentures, or the like type of security?

A. We may well have, Mr. Davis. I don't recall it specifically at the moment, but it is very likely.

Q. Can you give me your best recollection as to what study or the conclusion of any such study—

A. Well, I am quite sure there was no study. The task of figuring the difference between interest on $100 million and the cost of $100 million of equity is a very simple problem that one can do very readily in his head—

[3880] Q. Would you mind doing it for me now?

Mr. Sonnett: The witness hadn't quite finished his answer.

Mr. Davis: I am sorry.

The Witness: Would you read back what I started to say?

(The answer was read.)

A. (Continuing)—and I don't recall that there was any specific study made or that there was anything beyond the stage of casual conversation.

Q. Would you give me now this computation that you say—

A. Obviously, Mr. Davis, if you have $100 million of debt at 6 per cent a year, that is $6 million a year, and if you assume that you save half of it by taxes, that is $3 million. So that the cost after taxes of $100 million of debt is $3 million, and if you don't have debt, but you have equity instead, the earnings of the company are $3 million higher than they otherwise would have been.

Q. You are assuming, of course, that with a debt you will be able to earn so as to have taxable income rather than a loss?

A. I said it is $6 million before taxes and $3 [3881] million after taxes. You make whatever assumption you want as to whether you have made profits and have paid taxes or not.

Q. What assumption did you make?

A. Mr. Davis, I don't think I made any assumption

Q. At that time were you expecting 1961 to be a profitable income taxable year for TWA?

A. If I recall the time correctly, that was becoming an increasingly dubious prospect.

Q. At that time, when you were considering this June 10th proposal, you did think it was rather dubious as to whether or not TWA, in 1961, would have any earnings

Q. Well, it was about this time that there seemed to be a pretty serious question about it, Mr. Davis. I can't recall exactly what the picture was on June 12th, but the signs were certainly beginning to appear by then.

[3882] Q. Do you recall whether that aspect of it was included in your discussion with Mr. Leslie, or possibly Mr. Breech, or Mr. Sessel?

A. No, I don't, Mr. Davis, and I have to come back and say again that my views as to the nature of this proposal limited the time and effort that I thought it prudent to spend on running down such things, and I also point out that you don't look at these things from the standpoint of one year alone, you look at them from the standpoint of an extended period of time.

Q. At this point, Mr. Tillinghast, I am trying to obtain as completely as possible from you the extent to which serious consideration was given to this proposal, on the assumption that it might have been proffered in good faith, contrary to your suspicions, perhaps, and it is in that connection that I am asking you what consideration was given or suggestions that you may have had.

A. Mr. Davis, there was no, I think, particular question in anyone's mind, certainly in my mind, that it would be desirable to add to TWA's equity base if possible. The problem wasn't the desirability or lack of desirability of adding to TWA's equity base. The problem was the realism or lack thereof of the proposal.

[3883] Q. Because of the condition relating to the voting trust?

A. And because of the question of whether it was in good faith or just another maneuver in a series in which you seemed to be engaged at the time.

Q. But if we assume that it was in good faith, then the only problem was whether or not the lending institutions could be persuaded to acquiesce in the voting trust condition?

A. Not the only problem, Mr. Davis, but the big threshold problem was the problem of whether there was any

reasonable—any realistic possibility whatever of securing a termination of the voting trust.

Q. You referred to the third stage financing requirements that you had in mind at that time. Did you consider obtaining a commitment for a hundred million dollars of equity capital was something which would further the interests of TWA or adversely affect those interests?

A. Mr. Davis, I have said I don't know how many times now that I thought in and of itself the addition of equity to TWA was a desirable thing, and I so stated in the letter which I wrote to Mr. Holliday.

Q. Was that aspect discussed out loud with these [3884] persons that you have identified as having discussed the matter?

A. I have no specific recollection of it at the moment, Mr. Davis. It very likely was.

Q. If you assume that the proposal was made in good faith, the terms of the proposal would not interfere with the business or objectives of TWA?

A. Well, that is hard to separate, Mr. Davis, from the condition that was placed on it.

I think you—if out of the question one of the most important parts of the proposal—it seemed to me that it was not a genuine, serious proposal, but rather it was a maneuver.

I said before, and I will say for about the tenth time, that additional equity in and of itself I considered good, and if it were just as simple as getting a hundred million dollars of additional equity capital, that was fine and good, and I was all for it.

Q. Is it fair to say, then, that the only part of this letter which disturbed you was your belief that it was not made in good faith?

A. Well, now, are you talking about the whole letter, or proposal No. 1, which we have been talking about?

[3885] Q. I am talking about proposal No. 1, and I am conscious of your prior testimony that you considered the receipt of this letter as a maneuver and effort to interfere with the affairs of TWA.

You recall your testimony, that you identified this letter as one of those letters?

A. Oh, yes, I do. You don't need to state that still another time, Mr. Davis.

Q. Now I am asking you if it is a fact that the only aspect of this proposal No. 1 which made you feel that it was an interference, an improper interference, with the affairs of TWA was because of your feelings, assumptions or conclusions that it was not made in good faith.

A. Well, Mr. Davis, I don't think that is quite so. I think I just have to refer you to my very lengthy prior testimony on the subject, and to point out that this contained what seemed to me the impossible condition about termination of the voting trust, it raised a question of CAB approval, it raised the question, about which I have testified, as to whether or not the company might get in a position where a management problem would accelerate its entire indebtedness.

But I think all these things are secondary to [3886] the main concern, which was that it was not a good faith proposal.

Q. I understand that, Mr. Tillinghast, but what I am trying to determine is what aspects of this proposal No. 1 were, in your view, an improper interference with the affairs of TWA, if you assume that it was made in good faith.

Mr. Sonnett: And excluding prior testimony, I take it.

Mr. Davis: Without repeating prior testimony.

A. I just have to repeat my prior testimony, Mr. Davis.

Q. You referred to CAB approval, and I note that on page 4, at the top of the page, this note appears: "CAB approval." That is also in your handwriting?

A. That's correct.

Q. What does that refer to?

A. That refers to the fact that any such arrangement of this sort would obviously require CAB approval.

Q. You note that this appears with respect to the part of the proposal which reads:

"Hughes Tool Company would guarantee to TWA an additional $100 million of equity capital which [3887] would not only further secure the lending institutions, but would enable TWA to undertake an aggressive program for acquiring additional jet aircraft which, according to our understanding of your position, are unquestionably desired by TWA."

Mr. Sonnett: That is not the complete paragraph.

Mr. Davis: That is the end of the sentence, the "CAB approval" note appears at the top of the page there, doesn't it?

Mr. Sonnett: That is what you left out of your question.

Q. The balance of it reads:

"Furthermore, with such additional equity capital TWA should be able to obtain without difficulty adequate financing from the present lending institutions or others for expanding its present jet aircraft fleet

with either Boeing aircraft or Convair aircraft or both as may be determined by the management of TWA."

With respect to that paragraph, you have a note, "CAB approval."

Mr. Sonnett: I think you ought to ask the [3888] witness whether the note relates to that paragraph or something else. That is my problem. I don't know what it relates to. The note is at the top of the page.

Mr. Davis: May I proceed?

Q. Does that note refer to the CAB approval which would be required with respect to a transaction between Hughes Tool Company and TWA?

A. It does.

Q. In other words, you were aware of the fact that any commitment by Hughes Tool Company to subscribe or enter into any transactions with TWA involving more than $200 was subject to CAB approval—that is what you were aware of, weren't you?

A. I believe I was aware of that at this time, Mr. Davis, but I don't think that that was specifically what I had in mind.

I had in mind the observation of the Civil Aeronautics Board in its opinion approving the voting trust that in the event of the termination of the voting trust there would have to be the most careful—I can't remember just what their words were—

Q. Searching inquiry.

A. (Continuing)—most searching inquiry as to [3889] whether or not this would serve the public interest.

Q. That was a statement that appeared in the ex part order of the CAB that was issued in connection with th 1960 financing?

A. Well, it was in the order that approved the settin up of the voting trust.

Q. When you say "the order which approved the settin up of the voting trust," you are referring to the order whic has been previously identified and which approved of th transaction between the Tool Company and TWA, are yo not, relating to the 1960 financing?

A. Let me say, Mr. Davis, it is the one that has been, believe, already marked in evidence, to which I ha referred before.

Q. Did you discuss with anyone what the attitude of t CAB was likely to be in approving or disapproving th further transaction between the Tool Company and TW if it were to become a reality?

A. As far as I can recall, Mr. Davis, the only thing th I did was, I believe in talking with Mr. Rowe, observe th obviously there was a question of what the CAB would with this if it got that far.

Q. What was the nature of that discussion?

[3890] A. Well, it was about, as I recall it, about pre-emptory as that, merely to note there was a ve obvious question.

Q. A very obvious question?

A. Right.

Q. But did anybody say anything to you indicating likelihood or unlikelihood of problems that might encountered with CAB?

A. Not that I recall, Mr. Davis.

Q. Did TWA make any effort to contact or communic with CAB as to their views or attitude, or what it might in connection with such a transaction?

A. Not so far as I can recall.

Q. Do you recall discussing that matter with Mr. Breech?

A. No, I don't.

Q. Do you recall that Mr. Breech at one time had indicated he had discussed with CAB the subject of his becoming a voting trustee?

Mr. Sonnett: I object to the question as repetitious, and as calculated to produce the further wastage of another hour or more in going over what has been gone into in great detail.

The Special Master: What purpose—

[3891] Mr. Davis: My question was intended solely to elicit whether or not he recalled his testimony in that regard.

Mr. Sonnett: I have no objection to that question.

Q. Do you recall your testimony in that regard?

The Witness: Would you read back exactly what he said my testimony was?

Mr. Sonnett: He is withdrawing his characterization of the testimony, as I understand it. He is just asking whether you recall the testimony.

The Witness: I am sorry. I lost the thought.

Mr. Sonnett: May we have a fresh question?

Q. Do you recall your testimony with respect to statements made by Mr. Breech as to his conversations with the staff of CAB at the time he became or contemplated becoming a director or voting trustee?

A. Well, Mr. Davis, I think I do recall my testimony, and I think I also recall that I said that I think I must have been mistaken in that particular testimony.

Q. The purpose of this line at this time is to try to refresh your recollection as to whether or not [3892] in any conversation you had with Mr. Breech Mr. Breech indicated that he might be helpful before CAB, or that he had some particular information as to the attitude of CAB.

A. No, Mr. Davis, I don't recall having discussed this aspect of this letter with Mr. Breech at all.

Q. I note that next to the portion of the paragraph that appears at the top of page 4, which reads, in part, "TWA should be able to obtain without difficulty adequate financing . . . ," et cetera, you have a double line to emphasize it.

Is there any particular significance to that? Does that indicate that you discussed this matter with anyone in particular?

A. No, I think that just indicates, Mr. Davis, that that raised a question which was really at the meat of the coconut, would such an arrangement as we were talking about here in fact put us in a position to obtain without difficulty adequate financing for expanding our jet fleet.

Q. That doesn't indicate that this portion of the proposal was one which you felt required particular exploration or discussion with anyone?

A. Well, let me state it this way, Mr. Davis, [3893] that I think I was emphasizing that because, assuming that this proposal was in good faith, this got really to the meat of the question, and that is, would this enable us to obtain adequate financing for fleet requirements.

Q. My question is whether or not that indicates, since it was the meat of the question, whether you discussed it with anyone.

A. I am sure I did.

Q. You are sure you did?

A. I am sure I did.

Q. Can you identify with whom you discussed this aspect?

A. Oh, I am sure that I discussed that with Mr. Leslie, very likely with Mr. Rowe, and possibly others, possibly Mr. Sessel.

Q. Do you recall the substance of the discussion that you had with Mr. Leslie and Mr. Sessel and Mr. Rowe relating to this aspect of the proposal which you accentuated?

A. Well, Mr. Davis, without now distinguishing between the particular individuals, I am sure that I stated to one or more of them that the real question, as I saw it, taking this proposal at face value, was [3894] whether or not it would make it easier or more difficult to obtain the financing necessary for jet fleet purposes for TWA.

Q. Now I am interested in what you said, what they said, or your recollection, would it make it easier or more difficult.

A. My recollection of the discussion was that this just got us back to the question of whether or not the financing institutions would (a) accept termination of the voting trust and (b), if they did, would they continue to lend money in the quantities that might be required for these purposes.

Q. This was really the meat of the question, wasn't it?

A. That's right.

Q. Did you personally discuss this with any representative of the leading institutions, proposal No. 1?

A. I may have, and I think it is probable that I discussed it with Mr. Sessel.

Q. Are you referring to that telephone conversation you mentioned previously?

A. No, I am not, because that came at the end of the discussion, in a sense, after he had talked with the financing

institutions. I have a recollection [3895] that some time before then I had talked with him and discussed the question of whether or not this would or wouldn't enhance TWA's ability to finance.

Q. Now I would like you to give us your total recollection with respect to that discussion or meeting.

A. Well, I can't identify it, Mr. Davis, as either a telephone discussion or a face-to-face meeting. I can't recall much more of what I said than I have already testified to.

As to what Mr. Sessel said, the only thing that sticks in my mind was that he doubted—he didn't believe that the financial institutions would have any interest whatever in financing TWA without the voting trust.

Q. Do you recall whether that was a discussion you had in private with Mr. Sessel, or was it a conversation which involved others?

A. My best recollection, but I wouldn't be positive of this, Mr. Davis, is that it was a telephone call.

Q. Was it a lengthy discussion, was it a very brief one, casual, serious?

A. My recollection, as best I can recall it, is [3896] that after this was received by Irving Trust Company Mr. Sessel called me up and asked me had I seen this, and I think, so far as I can remember, that it was in the course of that telephone conversation.

Q. Tell me what happened when Mr. Sessel called you up and asked you if you had seen this.

Mr. Sonnett: You mean anything that he hasn't already testified to, Mr. Davis?

[3897] Mr. Davis: I don't believe that we have covered this before.

Mr. Sonnett: The witness has testified as to his recollection of the conversation, and said he didn't

remember whether it was in person or by telephone. We are talking, apparently, about some conversation prior to the board meeting, at which this was discussed in great detail, at which Sessel and others were present.

But the witness has described his recollection, and he has now said his best recollection is it was probably a telephone call. He has already described what was said. I hope he is not being asked to repeat that again.

A. I really don't remember, Mr. Davis, anything beyond that.

Q. Beyond what?

A. Beyond what I just testified to.

Q. I didn't understand that you have testified yet as to what Mr. Sessel said to you or you said to him when he called you. I understand you to have testified that you believe you had a discussion with Mr. Sessel, the occasion being when Mr. Sessel called you to say "Have you seen this letter which I have received?"

[3898] Now I am asking you to tell me what took place in that conversation, by telephone or otherwise, when Mr. Sessel for the first time asked you if you had seen this letter of June 10th, a copy of which he had received, since one was addressed to the Irving Trust Company.

A. Mr. Davis, so far as I can recall it, and I don't want to just guess at what I suppose was said here, as far as I can recall it, Mr. Sessel called me up and asked me if I had received this letter. I undoubtedly told him that we had. We discussed it, as I recall it, very briefly, and I don't recall any specifics of the discussion beyond what I have already testified to.

Q. That is the sum total of the contact that you personally made with the lending institutions to discuss the meat of the problem?

Mr. Sonnett: Oh, Mr. Rankin, what contact did he make. He got a telephone call. Mr. Davis is just provoking argument.

The Special Master: The inquiry that Mr. Davis started out with was what contact Mr. Tillinghast made himself with the lending institutions.

[3899] Mr. Sonnett: The answer was he didn't recall any.

The Special Master: Oh, no. He said he thought that he had made contact with Mr. Sessel, and he was the only one, and that was through a telephone conversation.

Mr. Sonnett: Not that he made contact.

The Special Master: That he had a conversation.

Mr. Sonnett: That is why I am objecting to the form of the question. It just produces argument.

The Special Master: If that is not clear, the witness should say whether or not he ever made any effort to contact the lending institutions himself.

A. As I recall it, Mr. Davis, I had no discussion of this with the lending institutions other than conversations that I had with Mr. Sessel.

Q. But the question to you, Mr. Tillinghast, is whether or not you, as chief executive officer of TWA, made personally a contact or attempted to contact or communicate with any representative of the lending institutions with respect to proposal No. 1.

[3900] Mr. Sonnett: Directly or through someone else, Mr. Davis? We are going to go right back into that same exercise.

The Special Master: Leave it directly first, and let's get that answered.

A. Not that I recall.

Q. This is a matter you left entirely to Mr. Leslie?

A. As I recall it, I asked Mr. Leslie to get in touch with the financial institutions, and I did not do so myself.

Q. And you did not ask anyone else on behalf of TWA to approach the lending institutions with respect to this matter other than Mr. Leslie?

A. No, I am quite sure I didn't, because Mr. Leslie would have been the natural one to talk with them.

Q. But whether or not he would have been the natural one, the thing I would like to establish at this point is whether you asked anyone other than Mr. Leslie to communicate with the lending institutions with respect to this proposal No. 1, any problems that it might create, or anything else relating to that proposal.

A. I said no.

Q. Did you communicate with the financial advisers [3901] of TWA? I am referring to Dillon, Read primarily.

A. I don't recall having done that, Mr. Davis, and I doubt it. It is possible I did, but I have no recollection of it.

Q. You think it is possible that you may have?

A. It is possible, but I don't think so.

Q. Was there any particular reason for not discussing this matter with the financial advisers, Dillon, Read in particular?

A. Mr. Davis, there was one very compelling reason, and that was that—particularly at this time, and I guess it has been true ever since I have been at TWA—the greatest single problem that I have had is how I would apportion

my time, and while I appreciate that this particular matter was something to which you were privileged to spend practically—to devote practically all of your time, I had a thousand and one things that were pressing to be done, and I had constantly to make judgments as to what it was fruitful and profitable to spend my time on and what it wasn't, and as I recall the circumstances at the time, I did not consider that an exploration in depth of this subject with all of the people with whom it might have been explored was something to which I should devote my time and attention.

[3902] Q. You had been discussing with Dillon, Read the 1961 financing, had you not, during that period?

A. Well, it depends on what you mean by this period.

Q. I am referring to the period during which you were considering, on the assumption that it might have been in good faith, this letter of June 10th.

Mr. Sonnett: I object to the form of the question. It is an incorrect summary of the testimony. Mr. Davis ought to stop testifying.

We get into more wasting of time and money because he insists on trying to improve the record. If he would just refer to the subject matter the witness testified about, and let the record stand, we would do a lot better.

The Special Master: Could you rephrase the question?

Mr. Davis: What is the question as it now stands on the record?

(The question was read.)

Q. I am referring to the period between June 12th and June 22nd.

A. Well, Mr. Davis, let me point out I replied to this letter on June 16th. But anyway, taking the longer [3903] period from June 12th to June 22nd, I have no present recollection of having been in particular contact with Dillon, Read during that period.

Q. June 22nd was the date on which the ten days expired by reason of a subsequent letter you received stating that since the June 10th letter was not received by you until June 12th the offer would remain open until June 22nd, that is the reason for the period June 12th to June 22nd, and the question is whether or not it is not true that during that period of time you were actively concerning yourself with the general problem of the 1961 financing and the Boeing program.

A. That is not my recollection, Mr. Davis. My recollection is that—so far as my personally being concerned is involved—that I was quite concerned in the last week of May, and that after that crisis was over Mr. Leslie carried it along pretty much through the month of June.

Q. Wasn't it at or about that period that you had discussed with Mr. Leslie a fee of $200,000 for Dillon, Read?

A. It may have been, but I don't consider that being involved with Dillon, Read on the financing.

[3904] Q. Wasn't it during that period that you also had considered the $750,000 fee which had been paid to Dillon, Read in connection with the 1960 financing?

A. It possibly was. I just don't recall those dates, Mr. Davis. They are easily established.

Q. But you are quite certain that you did not discuss with a representative of Dillon, Read this proposal No. 1, or any of the problems which it created?

A. No, I am not quite certain, Mr. Davis. That is not my testimony. I said I had no recollection of it.

If in fact I had, during this period, some contact with someone from Dillon, Read, it would have been very natural to have discussed this, and I very likely did.

I am merely saying that I have no present recollection of having discussed this with someone from Dillon, Read.

Q. If there was any discussion, then, it was a rather casual discussion?

A. All I can say is I have no recollection of any discussion with someone from Dillon, Read.

Q. Do you know if anyone representing or purport- [3905] ing to represent TWA discussed this matter with Dillon, Read?

Mr. Sonnett: Mr. Davis, or Mr. Rankin—perhaps we will get at it faster—Mr. Davis' questions are often very blind as to time. I don't know whether the minutes of the board of directors meeting of TWA of June 21st, in which there is extensive discussion of this subject matter and resolutions of the board, have been marked or not, but if he has a blind question, as he has as to time, we are only getting a lot of confusion here.

The Special Master: Do you want to show the minutes to the witness so as to refresh his recollection?

Mr. Sonnett: If Mr. Davis is saying prior to the board meeting of the 21st, and if he proposes to show the minutes to the witness, all right. But this way I don't know what the record means, whether he is talking at any time, before, during or after the board meeting, when this matter was disposed of.

Mr. Davis: I have no objection to counsel for TWA refreshing the witness' recollection.

[3906] Mr. Sonnett: If the minutes haven't been marked, I suggest they be shown to the witness and marked, and let's get on with it. This way the record is meaningless.

The Special Master: If it will help to refresh his recollection, Mr. Davis has already said you could tell him—

Mr. Sonnett: I invite the attention of Mr. Davis and the witness and the Master to the minutes of June 21st, page 2, at which, under the heading, "Relations with Hughes Tool Company," there commences about four pages of discussion of this subject matter, discussion of Mr. Holliday's letter, discussion of Mr. Tillinghast's reply, the resolutions of the board. It is all set forth in detail. This is a very wasteful way of going about it.

The Special Master: I suggest that the witness look at that over the recess, and before the next session, and see if he refreshes his recollection in the meantime, and give us his recollection the next time we meet.

Mr. Sonnett: The difficulty is the question was blind as to time, and I didn't know whether he [3907] was seeking to elicit something that happened at the board meeting on the 21st of June, or sometime thereafter, or sometime before. That is the problem.

Mr. Davis: Mr. Special Master, I think the record is clear that I was not inquiring as to what happened at the board meeting on June 21st.

I was inquiring the extent to which, during the period of time when presumably consideration was being given to this proposal, this witness, or any other representative of TWA, discussed the matter with Dillon, Read.

Mr. Sonnett: We have just gone through a series of questions the terminal date of which was June 22nd, the day after the TWA board, as he knows, because he has the minutes, reviewed it in extenso, and took resolutions on the subject matter. That is the problem. It is perfectly blind as to time. We don't know what he is talking about, and it wastes an awful lot of time.

• • • • •

[5514] Q. Mr. Tillinghast, I would like to turn to a different subject.

Have you had an opportunity to fully refresh your recollection with respect to the minutes of the meeting of the board of directors which took place on June 21, 1962?

A. I refreshed my recollection as to a particular portion of them.

Q. In that connection did you also have occasion to view [5515] the notes of Mr. Duckworth?

A. No, I did not.

Q. To orient your thinking, I am going back to the events which occurred between the time that TWA received the letter of June 10th from the Tool Company, and the board meeting which took place on June 21st.

I would like you to refer now to what has been marked as Defendants' Exhibit 11-P.

You will note that Defendants' Exhibit 11-P—can you identify what Exhibit 11-P is? If you will recall your testimony is that is one of the documents you identified when you identified a number of documents which you felt constituted part of the Tool Company's interference with the affairs of TWA.

A. What is your question?

Q. Can you identify Defendants' Exhibit 11-P?

A. I believe that is a telegram that you sent to each of the directors of TWA on June 20, 1961.

Q. Defendants' Exhibit 11-P is a document which is entitled in parentheses, "(Telegram received by Irving Trust Company, New York City, 8:11 p.m., June 20, 1961—Telephone to Mr. Sessel at home)."

Then it appears to be addressed to Mr. Ben-Fleming Sessel and signed Raymond M. Holliday, Hughes [5516] Tool Company.

Do you see that?

A. Yes.

Q. First I would like to understand how this happened to be in the files of TWA?

A. That I don't know, Mr. Davis. Indeed I don't really know where this came from.

Q. Do you see that little number on the lower left-hand side—"98"?

A. If you say this came from our files, I will take your word for it.

Q. It was handed to us by your counsel as coming from your files, and it is one of the documents that you identified from the originals.

Do you remember when the files, certain files, of TWA were put before you and you identified those documents which you felt constituted part of this interference by the Tool Company?

A. Yes, I do.

Q. And each one of those exhibits were identified as Defendants' Exhibit 11 with an identifying letter after it?

A. I don't recall the particular letter, but if you say so, I will accept it.

[5517] Q. You have no information at all as to how this document happened to be in TWA's file?

A. No, I don't, Mr. Davis.

Q. Can you identify or explain in what respects this telegram is interference by the Tool Company?

Mr. Williams: I think that is a conclusion—a legal conclusion that he is asking the witness for, and I object to it.

He has produced the letter. The telegram speaks for itself.

Mr. Davis: Apparently Mr. Williams is not aware of the testimony given by this witness, which identifies this telegram as one, or part of the course of conduct by the Tool Company which he has described as malicious and willful interference in the affairs of TWA.

Mr. Williams: Does he have to argue with you as to why he thinks so?

Mr. Davis: No, I am asking him to point out what portion, if any, of this telegram he regards or considers to be an improper interference with the affairs of TWA.

Mr. Williams: He has said the whole telegram.

Mr. Davis: He has identified the document.

[5518] Maybe he would like to adopt your answer. I will take it if that is his answer.

Mr. Williams: Do you want to argue a legal point with the witness?

Mr. Davis: No.

Mr. Williams: Then I will object to the question.

The Special Master: I think the objection is good. If you want to ask him whether there is some portion that he considers an interference—

Mr. Davis: Perhaps my question was poorly worded. That is what I had in mind.

By Mr. Davis:

Q. What portion, if any, any particular portion of this telegram, do you consider to have had the effect of interfering with the affairs or the management of TWA?

Mr. Williams: You mean if not the whole, then what portion?

Mr. Davis: No.

Mr. Williams: I don't understand.

Mr. Davis: I am sure the witness understands, because he claims this telegram has constituted some kind of interference, and I am trying to find out how this telegram either had the effect of interfering, or [5519] what effect it had on anybody, how it interfered with the business.

Mr. Williams: That is a legal argument—what effect it had on anybody. It is a conclusion.

The Special Master: He can ask what they did as a result of the telegram.

Mr. Williams: I don't mind that.

By Mr. Davis:

Q. This is a telegram that was addressed to all the directors of TWA so far as you know, is that right, Mr. Tillinghast?

A. That's correct.

Q. This particular document was one which was addressed to Mr. Ben Fleming Sessel?

Mr. Williams: It says so. Yes, it says so. He doesn't have to answer that.

Go ahead.

Mr. Davis: I do not know that he even knows it is a telegram that Ben-Fleming Sessel received.

Mr. Williams: He found it in the files.

By Mr. Davis:

Q. Did someone telephone to you and inform you that Mr. Sessel had received this telegram?

A. Not that I can recall, Mr. Davis.

[5520] Q. Did you receive such a telegram?

A. I believe I did.

Q. How did you find out that all the directors had received similar telegrams?

A. I believe that enough of them told me that they had received such a telegram, that I got the impression that everyone had received one.

Q. Can you identify any portion of this telegram which had the effect of interfering with whatever TWA management was trying to do?

Mr. Williams: I object to the question on the grounds I already stated.

It is impossible to answer that question.

The Special Master: Sustained.

We will have a short recess.

(A short recess was taken.)

[5521] By Mr. Davis:

Q. Mr. Tillinghast, can you explain why TWA's files do not contain the telegram which you received?

A. No, I haven't the slightest idea, Mr. Davis.

Mr. Davis: May I request at this time that TWA through its counsel if need be advise us whether or not the telegram received by Mr. Tillinghast and others of TWA, exist in the files of TWA.

The Special Master: Can you include in that request the number it was identified by? Isn't that 11-P?

Mr. Davis: The telegram, or the original of the telegram of Defendants' Exhibit 11-P.

The Special Master: You may request it.

Mr. Williams: I will inquire into it.

By Mr. Davis

Q. Do you recall, Mr. Tillinghast, any conversation with Mr. Sessel with respect to Defendants' Exhibit 11-P?

A. Not specifically, no, Mr. Davis.

Q. Do you recall something generally?

A. I think unquestionably I had some words with Mr. Sessel and most of the other directors about the fact of the telegram having been sent, but I can't recall a specific conversation with Mr. Sessel.

[5522] Q. Do you recall a conversation on this subject with Mr. Breech?

A. No, I don't recall a conversation with any specific person, Mr. Davis, although I am sure that this was the subject of at lest a casual comment at the directors meeting.

Q. With that answer you include Mr. Rowe or Mr. Reed?

A. I don't know about Mr. Reed. It would include Mr. Rowe, I think.

Q. Does that mean that you recall a discussion with Mr. Reed?

A. I do not recall any discussion with Mr. Reed. Mr. Rowe was at the directors meeting, I believe, and undoubtedly participated in such discussion of it as took place there.

Mr. Davis: May I have marked for identification the minutes of the board meeting of June 21, 1961, as Defendants' Exhibit 76.

(Minutes of the board meeting of June 21, 1961, marked Defendants' Exhibit 76 for identification, as of this date.)

Mr. Davis: May I have marked as Defendants' Exhibit 77 for identification the Duckworth notes relating to that same board meeting?

(Duckworth notes relating to board meeting marked Defendants' Exhibit 77 for identification, as of this date.)

[5523] By Mr. Davis:

Q. Mr. Tillinghast, let me hand you what has been marked as Defendants' Exhibits 76 and 77. First I will ask you do the minutes of the board meeting of June 21st fairly and accurately reflect what took place at that meeting?

A. I believe they do.

Q. Who prepared those minutes?

A. I believe Mr. Duckworth did.

Q. Do you recall whether or not you had occasion to review and revise those particular minutes?

A. No, I don't recall that, Mr. Davis.

Q. Do you recall whether or not they were reviewed or revised by counsel for TWA?

A. I am sure they were submitted to counsel for TWA. They are in the regular course. What revisions counsel may have suggested in them I just would not recall at the moment.

Q. Will you look at Defendants' Exhibit 77? Can you identify those as notes in the handwriting of Mr. Duckworth, Secretary?

A. I believe they are.

Q. Do those notes reflect substantially the order in which matters were taken up at that meeting?

A. Mr. Davis, I presume they do. I have not seen these [5524] before, and so I could not be positive about that, but I would assume that they do reflect the order in which things were considered.

Mr. Williams: I wouldn't presume or assume anything.

By Mr. Davis:

Q. You were at the meeting?

A. Yes, I was at the meeting, but I don't believe at this point I could remember the order in which things were taken up.

Q. If you look at Defendants' Exhibit 76, which are the minutes themselves, you will see the first business referred to after the approval of the minutes of the prior meeting is the financial review, and a report made by Mr. Leslie, is that correct?

A. Yes.

Q. If you look at Defendants' Exhibit 77, you will see that these notes refer to a report made by Mr. Leslie relating to the 1961 financing, among other things.

A. Yes, I see that.

Q. Look at page 2 of Defendants' Exhibit 77, which refers to the financing by the Met and the Equitable and the banks, totaling $147 million. Do you see that?

A. Yes, I see that.

[5525] Q. And then the note is "Same general plan as described at May meeting." Do you see that?

A. Yes.

Q. Is it a fact that at this meeting of June 21, 1961, Mr. Leslie advised the board that negotiations with respect to the 1961 financing were proceeding in accordance with the plan outlined to the May meeting of the board. That is what took place?

A. I believe so, yes.

Q. So that these communications which had been received from the Tool Company had not interfered with the financing plans, because they were proceeding in accordance with the May plan, were they not?

Mr. Williams: I object.

By Mr. Davis:

Q. Had anything happened to interfere with the financing plan as developed or presented to the May meeting?

A. Yes, Mr. Davis, and I believe I have testified about that at considerable length already.

Q. Can you explain what the board of directors were told on June 21st by Mr. Leslie which is recorded in the minutes as "Mr. Leslie advised that negotiations with respect to the 1961 financing were proceeding in accordance with the plan outlined to the May meeting of the board."

[5526] In that connection I refer you to Mr. Duckworth's notes which read "Same general plan as described at May meeting."

My question to you is whether or not did the 1961 financing plan that had been described to the May meeting, whether it had changed in any material respect by June 21, 1961?

A. I will just have to refer you to my former very extensive testimony about the Prudential dropping out and all the things that happened at that time.

Q. I understand about the Prudential dropping out. My question now is whether it isn't a fact you, Mr. Leslie or the management of TWA, reported to the board at the meeting of June 1961, that the 1961 financing program was proceeding with the plan presented to the board at the May meeting?

A. With the exceptions noted, yes.

Q. The exceptions being that the Prudential was not to be included as a lender?

A. That was one of the exceptions, yes.

Q. What other exception of any material significance are you referring to?

A. I don't think there was any other major change other than that occasioned by the withdrawal of the Pru- [5527] dential.

Q. Now looking at Defendants' Exhibit 77, Mr. Duckworth's notes include the following:

"Except change in security requirements."

That thought does not appear in the minutes themselves. Will you tell us now what was said at this board meeting by Mr. Leslie or by you or anyone else, describing "Change in security requirements"?

A. I couldn't tell you that, Mr. Davis, without refreshing my recollection. My best recollection is that there were

some changes in the detail of the security requirements, but I cannot right offhand bring them to mind.

Q. You don't think they were material changes?

A. I don't think they were of major importance.

Q. In answering my prior question you said that you could not answer that without refreshing your recollection. What would you need to do in order to refresh your recollection, besides look at these documents?

A. Go back and find out just what the changes were, and see whether or not that refreshed my recollection as to any discussion of them at the board meeting.

Q. Who would be familiar with those changes of security requirements other than yourself?

A. Mr. Leslie, counsel.

[5528] Q. Dillon, Read?

A. Probably, yes.

Q. But you have no recollection of what was presented to the board on June 21st relating to a change of security requirements?

A. Not at this time.

Q. May I try to determine this then? Were those changes in security requirements related in any way to communications received from Hughes Tool Company or any of its representatives?

A. I don't know, Mr. Davis. Until I knew what they were, I don't believe I could answer that question.

Q. At the present time you are not aware of any change in security requirements that was the result of any letter sent by the Tool Company to TWA or to the lending institutions or the voting trustees or the SEC?

A. That is correct.

Q. Will you go to the third page of Defendants' Exhibit 77? You will note on the top of the page, it apparently relates to what appears to [be] the fourth paragraph; the

notes read: "Boeing progress payment $13 million, postponed from July 1st to August 1st at 5 per cent interest cost TWA has paid 7 million plus to date."

Will you first identify the progress payments which [5528A] were postponed from July 1st to August 1st?

A. As I am sure you know, there were progress payments due under the contract. There was a payment of $15 million due on July 1st which was postponed to August 1st, as I recall it, because of the incomplete nature of the negotiations relating to the contract.

[5529] Q. What caused this postponement of the progress payment?

A. I just said that as I recall it, the incomplete nature of the contractual negotiations.

Q. Between TWA and Boeing?

A. Between both TWA and Boeing, and TWA and the lenders, I believe. I am not absolutely sure of that, but I think that we were in a state of flux on both fronts.

Q. Can you describe the circumstances under which this five per cent interest was negotiated?

A. Well, it is a regular practice of Boeing to charge five per cent interest as a condition of the postponement of advance payment dates.

Q. In other words, there was no particular negotiation involved? It is a common practice which is generally recognized?

A. That is my understanding, yes.

Q. Who handled that part of the relationship with Boeing? Was that Mr. Leslie primarily?

A. I am not sure whether that was Mr. Leslie or Mr. Rummel. It might have been either of them.

Q. It was not a matter which was particularly taken up with you?

A. I was aware of it at the time, and discussed it at [5530] the time, but at this point I can't remember whether Mr. Rummel or Mr. Leslie actually talked with Boeing about it.

Q. The minutes themselves do not reflect the next statement which appears in Duckworth's notes, namely "TWA has paid $7 million plus to date."

What does that refer to?

A. Just what it says.

Q. I don't understand what it says. Does that mean TWA has paid $7 million plus interest to date to Boeing?

A. No, it paid $7 million on the contract.

Q. On account of a $13 million progress payment, you mean?

A. No. We had made progress payments of $7 million.

Q. When were those progress payments made?

A. The first one was made when the contract was signed, which was May 1st, and the next one was made about the 7th of June, if I recall correctly.

Q. Do you recall approximately the amount that was paid when the contract was signed in May, and the amount paid on or about the 7th of June?

A. I have a recollection that we paid $700,000 in signing the contract. My recollection is it was about $700,000. It was less than $1 million. I believe the balance of it was paid in the first part of June.

[5531] Q. In other words, something in excess of $6 million was paid by TWA to Boeing as a progress payment in the first part of June?

A. That's correct.

Q. Can you tell us whether that was paid before or after receiving that June 10th letter of the Tool Company?

A. It was before, Mr. Davis, and I think it was either the 8th or the 9th. I know it was approximately a week after your technical presentation.

Q. Are you referring to my presentation on June 2nd?

A. Yes.

Q. And it was well after the receipt of the letter that the Tool Company wrote to the SEC, and the subsequent letter of May 26th or thereabouts to the lenders?

A. It was in June.

Q. Do you recall whether or not that $6 million plus was paid to Boeing, whether that was paid in a routine manner, or was it the subject of a discussion or conference, either at TWA or with Boeing as to whether it should be paid or should not be paid?

A. As I recall it, Mr. Davis, that amount was originally due either on the 31st of May or the 1st of June, and it was postponed for about a week for the reason, at least in part, that you made your presentation on the 2nd of June, [5532] and we wanted Mr. Rummel and his people to review the situation in the light of what you had presented at that time, so that they could either confirm or withdraw their prior recommendation that we go ahead, or that we purchase the 26 planes from Boeing.

Q. Did you participate in the decisional process to pay this $6 million plus to Boeing?

A. I participated in the decision. I indeed made the decision to go ahead with the Boeing program. So far as the actual payment of the money was concerned, Mr. Leslie took care of that, and I did not, as I recall it, make the decision to send them the check.

Q. Can you tell me how soon after June 2nd you made that decision?

A. Well, as I recall it, it was the end of the next week, either Thursday or Friday of the next week.

Q. June 2nd was on a Friday?

A. Yes.

Q. Does that help you by referring to your calendar?

A. No, it doesn't help me, Mr. Davis. All I can say is that my recollection is that Mr. Rummel studied this matter with his people, and brought in a draft of a report on this subject. I remember because of the pressure of time, he brought his report in in draft form before it was [5533] finally completed. That, I think most likely, was Thursday of that week, and I discussed the matter with him, and decided to go ahead with the program.

Q. You notice on Wednesday, June 7th, you saw Mr. McCone at 9:30 in the morning?

A. I see that.

Q. And Cahill and others at 2:30 that afternoon?

A. I see that.

Q. Does that help you to identify as to when a decision was made? Do you think it was made on Thursday, the 8th?

A. Answering the first of your two questions, no, that does not help me with respect to when the decision was made. My best recollection is that it was either Thursday or Friday of that week that the decision was made.

Q. Look at the next page. At this time Mr. Duckworth is making notes relating to the presentation made by Mr. Cocke, which appears in the minutes under the heading "Operations Review." Under the heading "Domestic"—I am referring to the heading in Mr. Duckworth's notes. He has "New York-Chicago market penetration down 5 per cent. TWA up from 11 to 20 per cent."

Can you explain what that means?

A. I can tell you what the latter part means. That TWA's percentage had gone up from 11 to 20 per cent. At

[5534] about that time we substantially increased our jet service to Chicago, and as a consequence of that, the percentage went up from 11 to 20.

Q. That was the percentage of the entire market from New York to Chicago?

A. That's right. I don't understand what is meant by the prior note. It just doesn't make any sense to me.

Q. The minutes state that he, referring to Cocke, reported that "since the inauguration of Convair 880 aircraft schedules in the New York-Chicago market, the TWA share of the market had increased from 11 per cent to 20 per cent."

Can you tell us when the 880 aircraft schedule was inaugurated in the New York-Chicago market?

A. No, I can't, Mr. Davis.

Q. Can you explain the meaning of the note "San Francisco not so serious"?

A. Yes, the San Francisco traffic wasn't down to the extent that the Los Angeles traffic was down.

Q. That would be referring to New York-San Francisco versus New York-Los Angeles?

A. That's correct.

Q. Then we come to "Relations with Hughes Tool Company." If you turn the page, you will see Mr. Duckworth's notes. That was the report which you made to the board of [5535] directors?

A. That's correct,

Q. Look at Mr. Duckworth's notes, you will see he has a date of May 31st "Went ahead with Boeing plans. See executive committee minutes."

A. I see that.

Q. Those executive committee minutes are the ones we have already spent some time on in your prior testimony?

A. That's correct.

Q. And then you refer to the technical presentation which had taken place on June 2nd?

A. That's correct.

Q. If you turn the page you will see under date of June 9th "Second payment made to Boeing."

Does that confirm what we were looking for a moment ago, that it was on June 9th that decision was made to go ahead with this $6 million plus payment to Boeing?

A. If you will refer to the prior note here under the date of 6/8 which says "Rummel analysis and other data reviewed by equipment committee," it suggests to me that the decision may have been made on Thursday rather than Friday, although apparently the payment was actually made on Friday.

[5536] Q. Can you identify what is the other data that was reviewed by the equipment committee?

A. I can't be altogether positive, Mr. Davis. I think that the other data probably consisted mainly of the original equipment report. The only things that I can remember at this point that we had were, I believe, on the 8th—I may be wrong about this—a draft, an almost final draft of the Rummel report, plus the original equipment report.

Q. You see that Mr. Duckworth indicated that your report to the board—that on June 13th there had been a management policy committee meeting?

A. Yes, I have already testified about that, I believe.

Q. And that this management policy committee reviewed the program and agreed to proceed with the Boeing program?

A. That's correct.

Q. Where are the minutes of that management policy committee meeting—do you know?

A. I suppose with Mr. Duckworth.

Mr. Davis: Mr. Special Master, our records do not indicate that we have received the minutes of that meeting.

The Special Master: You can request them now.

Mr. Davis: I would like to request them now, with some explanation, if there is one, as to why they [5537] were not previously produced.

Mr. Williams: I will make inquiry.

A. It may be, Mr. Davis, that at this point in time no minutes were kept of the management policy committee meetings. This must have been either the first or second such meeting. It may be that we didn't actually start the practice of keeping minutes until a somewhat later date. I am not sure of that, but I think that is a possibility.

Q. I don't seem to be able to recall whether you covered that in your prior testimony or not, Mr. Tillinghast, but did you take up that June 10th letter at this management policy committee meeting of June 13th?

A. No, I am quite sure we didn't take up the June 10th letter as such.

Q. Without taking it up as such, did you discuss at that meeting the possible availability of four 880s, or thirteen 990s?

A. I just can't remember, Mr. Davis, whether we did or didn't. The matters set forth in there would not be matters which I would be disposed to take up with the management policy committee, except as it related to the question of equipment.

So far as the equipment side of it is concerned, it is entirely possible that I drew their attention to the so-[5538] called proposals that had been made, but I can't say that I have a specific recollection of having done so.

Q. Can you tell us who attended that meeting?

A. I can't be sure from memory as to who was there and who wasn't there, but so far as I can recall, it was the whole management policy committee.

Q. Every one of them?

A. So far as I can recall, but I wouldn't be sure of it.

Q. At that time you had not begun to draft your reply to the June 10th letter?

A. I think not.

Q. Will you look at the minutes of the meeting itself, Defendants' Exhibit 76. If you turn to page 3 you will see where the sentence which reads "He" referring to you "further stated that generally Mr. Rummel who was present at the meeting analyzed the various points raised by Mr. Davis, and submitted a report on the subject."

To whom did Mr. Rummel submit a report?

A. I believe it was to me. Possibly it was to the flight equipment committee, but my best recollection is that it was to me.

Q. Was it a written or oral report?

A. A written report.

Mr. Davis: May I have marked for identification [5539] this report dated June 8th.

(Report dated June 8, 1961, marked Defendants' Exhibit 78 for identification, as of this date.)

By Mr. Davis:

Q. Let me hand you what has been marked as Defendants' Exhibit 78. It has a fly sheet dated June 8, 1961 which appears to be addressed to you from Mr. Rummel, with copies to Cocke, Hall, Leslie, Pierson, Rook and Rowe, and with the word "comments?" on it. Is this the written

report you received from Mr. Rummel which is referred to in the minutes of the board meeting of June 21st?

A. I believe this is the final draft of this report, which was changed, as I recall it, just slightly in the final.

Q. I notice there is some handwriting on the fly leaf. Can you identify whose handwriting that is?

A. No, I cannot.

Q. Who wrote the word "Confidential" on it?

A. No, I can't identify that.

Q. I notice it is marked "Final Draft." There were prior drafts of this report, were there not?

A. I don't know, Mr. Davis. If I am correct in what this is, this is the first and only draft of it that I saw.

Mr. Davis: Mr. Special Master, we have not [5540] received, so far as we know, prior drafts of this document. May I request whether or not prior drafts have been produced to the extent which they may exist?

The Special Master: You may.

Mr. Williams: I will inquire into that.

By Mr. Davis:

Q. You see the persons to whom copies were sent of this report?

A. Yes, I do.

Q. They were at that time the members of which committee?

A. The equipment committee.

Q. Not the management policy committee?

A. That's correct.

Q. On the final draft I see Mr. Rowe's name does not appear, but the fly sheet includes Mr. Rowe. Was Mr. Rowe a member of that committee?

A. No, he was not.

Q. Is this the report which formed the basis for the decision that was arrived at at the management policy committee meeting of June 13th?

A. This report in its final form was one of the things considered by the management policy committee. I should point out, Mr. Davis, that the management policy committee in one sense at least did not make a decision, because that is [5541] an advisory group rather than a group having decisional authority.

But the conclusion to which they came was based in part on this report.

Q. What else was it based upon so far as the relevant material?

A. The discussion of the members of the committee who were present.

Q. Looking at the fly leaf of Defendants' Exhibit 78, in the upper right-hand corner, you see "BAC" and then a number. Does that refer to a Boeing contract number?

A. No. It looks to me like airplane numbers.

Q. 131-B, 331-B and 720?

A. It looks very much like that.

Q. You don't know what the significance of it is?

A. Those are models of airplanes to which this refers.

Q. What does the word "negotiations" refer to—do you know?

A. No.

Q. Then continuing with Mr. Duckworth's notes, Defendants' Exhibit 77, does that indicate to you that you presented to the board a letter you received from Mr. Holliday under date of June 10th?

A. It does.

[5542] Q. This date of June 12th, Mr. Duckworth's notes indicate the date on which you received that letter, isn't that right?

A. I guess that is what he had in mind.

Q. Did you also present to the board your reply of June 16th?

A. Yes.

Q. Will you describe what took place at that point. Did you undertake to describe at the meeting these three proposals that were contained in that letter of June 10th, or were all the directors already familiar with that?

A. Again, Mr. Davis, I have to point out that you have asked me several questions. Which do you want me to answer?

Q. I want you to describe what took place at the board meeting at this juncture when you referred to the letter of Mr. Holliday and your reply of June 16th.

A. I reviewed the letter which had been received. I summarized its contents. I advised them that I had replied to it. I advised them that no response had been received to my letter by the time of the meeting.

I then went on, apparently, to discuss the virtues and shortcomings of the proposals, and pointed out that a substantial increase in equity would be attractive, but that it appeared to me that the offer might be merely for the [5543] record.

I discussed or pointed out the fact that in addition to $100 million of equity, we would need broadly $200 million of other financing.

I believe, Mr. Davis, recalling it the best I can at this time, I said to the board that I didn't think that any of these proposals provided something on the basis of which we should take affirmative action, but that we should con-

tinue to keep the door open on the equity proposal to see whether anything developed that might be of interest to TWA.

Q. All the directors had received your reply of June 16th, had they not?

A. I believe that's correct.

[5544] Q. In connection with forwarding your reply of June 16th, you had not sent to all the directors a copy of the letter of June 10th?

A. No, and I would have to refresh my recollection as to whether you sent a copy of the letter of June 10th either. I am sure either you had sent it or else I sent it along with my reply.

I am sure I didn't send them a reply without the letter to which it referred.

Q. Now, I would like to have you describe what was said by any of the directors there present in connection with the remarks or presentation that you had made?

A. Before I say that, Mr. Davis, I should say one other thing that I said, and that was that I thought it would be a serious mistake were we to interrupt consummation of the Boeing program for the purpose of chasing what probably would turn out to be a will-o'-wisp so far as these so-called proposals of the Tool Company were concerned.

At this point I have some difficulty in recalling who said what, but I remember that Mr. Leslie discussed and described the inquiries that he had made of the financial institutions and Dillon, Read relative to the ability to obtain financing in the event of the termination [5545] of the voting trust, and read the letters that had been received.

Q. In your answer I think you said that you advised the directors that in your opinion it would not be advisable to interrupt or interfere with the Boeing program in order to chase a will-o'-the wisp, or something.

Were you referring to the proposals contained in the June 10th letter?

A. Yes, I am.

Q. You understood at the time that proposal No. 1 did not require TWA to change its mind with respect to the Boeing program?

A. Yes, I am quite aware of that, Mr. D[illegible], and I am equally aware of the fact that had we set out to negotiate something of that magnitude, it would have held up for a matter of months consummation of the Boeing financing, and unless and until we had something a lot more tangible than we had at that point, I wasn't about to recommend to the board that we interrupt and further jeopardize our Boeing financing at least so soon after having gone through the experience that we went through when the Prudential pulled out.

Q. Do you recall what comments or statements Mr. Breech made?

[5546] Q. My recollection is refreshed by a reference in Mr. Duckworth's notes here, to the effect that he felt it was in the best interest of TWA to continue the present course until the Tool Company presents a complete financing program.

Q. What do you mean by "continuing the present course"?

A. Of proceeding with the Boeing procurement. I believe, if I recall correctly, that Mr. Breech pointed out that he had had a number of discussions, one with Mr. Odlum, and other discussions with other people whose identity I can't recall at the moment, suggesting that Mr. Hughes was prepared to do this or Mr. Hughes was prepared to do that, and in each case nothing came of it.

I believe he made the point if we interrupt the program we are on now, we wouldn't know whether we really have

a new and different program, or don't, and he thought it would be a great mistake until we had—even to spend a great deal of time and effort on the matter—until we had a complete program which we could accept or reject.

Q. Do you recall what Mr. Sessel said on the subject?

A. No, at the moment, Mr. Davis, I have no recollection of Mr. Sessel having said anything. Yes, I do. I am mistaken. I believe Mr. Sessel repeated what he had told me over the telephone about the Bank of America, in response [5547] to his inquiring, having said that under certain conditions they might be willing to lend money without the voting trust, but that it was his opinion that in fact it wouldn't be possible actually to find a basis for doing this, and that he thought that the answer of the Bank of America was understandably influenced by the fact that they were the bankers for the Tool Company as well as for TWA.

Q. Do you recall whether either Mr. Sessel or Mr. Breech referred to the meeting they had, or to a meeting on June 16th, that they had with Mr. Hagerty and the insurance company lawyers?

A. Not that I recall, Mr. Davis, because I had no recollection of such a meeting until the other day here when I saw the memo that referred to it.

Q. Do you think you could state with some certainty that neither Mr. Sessel nor Mr. Breech described to the board the meeting or a meeting with Mr. Hagerty in connection with this June 10th letter?

A. I can only say, Mr. Davis, that I have no recollection of it whatsoever.

Q. If you look at the minutes themselves, page 3 of Defendants' Exhibit 76, it states that you pointed out in connection with proposal No. 1 that "An extremely impor-

tant fact was the effect that the acceptance of such proposal, [5548] including the condition that the present voting trust be terminated, would have on the ability of the corporation to obtain additional needed financing, particularly additional debt financing."

Do you recall what you said to the meeting that is reflected by that portion of the minutes?

A. As far as I can recall, Mr. Davis, I pointed out that the $100 million would not be sufficient to relieve us of the necessity of institution financing, not only for the present program, but for any short-range jet program that might be coming along.

I thought it vital in considering this thing to look at the totality of TWA's financial needs, and the possibilities of satisfying those needs if we went the route being proposed by the Tool Company.

Q. As I recall your prior testimony, you personally had not had any communication with the lending institutions in connection with this proposal No. 1, isn't that right?

A. Except as I have already testified.

Q. As I recall your prior testimony, you had this report from Mr. Leslie but you had not personally communicated with any representative of any lending institution?

A. I don't think that is correct, Mr. Davis.

[5549] Q. But you adverted to your understanding as to the attitude that the lending institutions were taking in connection with proposal No. 1?

A. I am not sure I adverted to it at this particular point, but from the first time that I read the June 10th letter up to and including the present time, it has seemed to me obvious that in appraising the desirability from TWA's standpoint of this proposal, one had to look at the totality of TWA's probable financial needs, and possible means of satisfying them, and that until and unless one did that, he

couldn't possibly form a considered judgment on this so-called proposal.

Q. In connection with the remarks that you made, neither Mr. Breech nor Mr. Sessel supplemented those remarks by whatever experience they had had in any discussions which they may have had with the lending institutions, is that correct?

Mr. Williams: You mean they didn't speak at the board meeting?

Mr. Davis: Yes.

Mr. Williams: Did they speak at the board meeting after you had made these remarks?

The Witness: Yes, I am sure that both of them spoke, and as I testified just a moment ago, I recall [5550] Mr. Sessel having spoken about the position of the Bank of America.

By Mr. Davis:

Q. I am referring now to the position of the insurance companies. He didn't refer to that?

A. Mr. Sessel?

Q. Yes.

A. I have no recollection of his having referred to the position of the insurance companies, but possibly he did.

Q. How about Mr. Breech?

A. I don't recall either Mr. Breech having referred to the position of the insurance companies or the banks, except I have a faint recollection that after Mr. Leslie had summarized the communications with the financial institutions, Mr. Breech remarked that in view of the position they were taking, it looked as if we are a long way from having anything that we could really deal with.

Q. Still referring to this page 3 of the minutes of the meeting, Defendants' Exhibit 76, in that same paragraph you notice the sentence which reads, "He", referring to you, "said that you had asked Mr. Leslie whether or not the corporation could arrange additional needed debt financing if the voting trust were terminated, as proposed in the [5551] letter of June 10, 1961, and that Mr. Leslie had reported that in his opinion this would not be possible under the circumstances."

Are you referring now to the June 19th report that you received from Mr. Leslie, which we have previously covered?

A. Yes, and my oral discussions with him.

• • • • •

[5559] *Examination by Mr. Davis*:

Q. Mr. Tillinghast, will you refer to the minutes of the meeting of June 21st, which has been marked Defendants' Exhibit 76, and also to the handwritten notes of Mr. Duckworth relating to that meeting, which have been marked as Defendants' Exhibit 77?

A. Yes.

Q. Did you present to that board meeting the report of Mr. Leslie dated June 19th?

A. What report of Mr. Leslie dated June 19th?

Q. In your prior testimony we identified a so-called [5560] report from Mr. Leslie to you, which was dated June 19th. On page 3 of Defendants' Exhibit 76 the minutes state that you indicated that Mr. Leslie had reported that in his opinion this would not be possible under the circumstances.

Mr. Zeller: Are you quoting, or are you summarizing, and if so, where are you quoting from, or what are you summarizing?

Mr. Davis: If you look at the last paragraph on page 3, the minutes indicate that Mr. Tillinghast pointed out something. That is the first sentence.

The next sentence, the minutes reflect that he, referring to Mr. Tillinghast, said that he had asked Mr. Leslie whether or not the corporation could arrange additional needed debt financing if the voting trust were terminated as proposed in the letter of June 10, 1961, and that Mr. Leslie had reported that in his opinion, et cetera.

By Mr. Davis:

Q. I show you Defendants' Exhibit 69, Mr. Tillinghast, which is a memorandum from Mr. Leslie to you, dated June 19, 1961. My question to you is whether or not at the board meeting you presented Defendants' Exhibit 69.

A. That would depend a little bit, I think, Mr. Davis, on what you mean by presented. To the best of my [5561] recollection at the present time, this was not read in its entirety. My recollection is that I had it with me, I referred to it, but I don't recall that it was read in its entirety, although I could be wrong about that.

Q. Were the letters received from the lending institutions presented to the meeting?

A. Well, again you get into the question of what you mean by presented. If I recall correctly, Mr. Leslie had all those letters and referred to them. I cannot recall offhand whether he read each of them. I note from Mr. Duckworth's notes that Mr. Leslie read the Dillon, Read letter, and that would be in accordance with my recollection.

My best recollection is that the other letters were referred to and were stated to be in the hand, but were not read in their entireties.

Q. Did any of the directors, or Mr. Breech, make any comments, or say anything with reference to this Dillon, Read letter, Defendants' Exhibit 75, which you recall was read to the meeting?

A. I don't remember any specific comment addressed to that.

Q. Do you remember any comment with respect to Mr. Leslie's report or your description of his report reflected [5562] by the minutes of the meeting, which appear in the last paragraph on page 3?

A. I don't understand your question. Would you repeat the question, please?

(The question was read.)

Mr. Zeller: I am confused too, Mr. Davis. Do you mean a discussion with respect to the report itself?

Mr. Davis: No. I am particularly referring to what apparently was presented to the meeting, namely, that if the corporation were to accept the $100 million of additional equity, in his opinion, or in Mr. Leslie's opinion, or in Dillon, Read's opinion, it would not be possible to arrange additional needed debt financing.

My inquiry is whether any of the directors there present questioned or remarked or commented on the presentation of that information.

Mr. Zeller: And in particular, the presentation of the Leslie report, is that right?

Mr. Davis: That's correct.

A. Mr. Davis, I find it difficult or impossible to recall specific comments by specific people, but my recollection is that the consensus was that obviously this [5563] proposal

of equity financing of $100 million had to be looked at in terms of the total needs of the company and its ability to obtain debt financing in the event of termination of the voting trust.

It is also my recollection that the consensus was this so-called proposal was more for the record than real.

Q. When you say "the consensus was," I don't understand what you mean. I appreciate you not being able to identify the words used by the various directors, but can you identify what the directors as a group said, what Mr. Breech said, what Mr. Sessel said? Was it put to a vote?

A. Mr. Davis—

Mr. Zeller: There are a number of questions there, Mr. Davis. I suggest we take them one at a time.

Mr. Davis: I would like to have the witness give us his total recollection as to what in fact transpired in connection with the presentation to the board of this report, as to the ability of TWA to obtain the needed financing, [illegible] financing, in the event Proposal No. 1 were to be accepted.

Mr. Zeller: I take it that is precisely what the witness has just done in his last answer. If you have a specific question, why don't you ask him?

[5564] Mr. Davis: My question is, I do not understand what he means by saying "it was the consensus."

Mr. Zeller: Are you asking him to explain what he means when he says "it was the consensus"?

Mr. Davis: Yes.

A. I mean merely, Mr. Davis, as best as I can recall it, not being able to recall specific statements by specific

people, the general opinion or attitude was as I have testified.

Q. But you have no recollection of any statement made by any particular director on that question?

A. I believe that Mr. Breech made some statement to the effect that the purpose of this was to put us on the spot, and to divert us from going ahead with the Boeing program. Somebody, and I think it was Mr. Breech, said that if Toolco was serious about this they ought to bring in a complete financing package that took care of the debt side of it as well as the equity side of it.

I believe Mr. Leslie said something to the effect that only the Tool Company could make the necessary arrangements to provide other and different debt financing, and it was idle for TWA people to try to figure out what could be done if Hughes were prepared to do certain things, such as pledging certain assets, and so forth and so on.

[5564A] Beyond that I have great difficulty in associating any particular statements with particular people.

[5565] Q. You do not recall any statements made by Mr. Seasel with respect to the attitude of the lending institutions towards Proposal No. 1.

A. Not beyond that to which I have already testified.

Q. As I recall your prior testimony, you said that Mr. Breech did not refer to or describe a meeting with Mr. Hagerty, which presumably had taken place a few days before?

A. I have no recollection of any such statement.

Q. Referring to Defendants' Exhibit 77, the Duckworth notes, the page which is marked 756 in the lower left-hand corner, you will notice at the top of that page the statement "Any substantial increase in equity is attractive," and then it goes on.

Who said that—do you know?

A. I believe I did.

Q. The next item in Mr. Duckworth's notes reads "In addition to $100 million TWA would require additional $200 million other financing."

A. Yes.

Q. Is that something else that you said?

A. I believe so.

Q. Would you explain this additional $200 million of other financing that TWA would require?

[5566] Mr. Zeller: You mean you are asking him what he had in mind at the time he said that, is that right?

Mr. Davis: I am not so sure of that. It's what explanation he gave, if any.

A. I don't recall, Mr. Davis, that I gave any particular explanation of that. You will recall, I am sure, that we were talking about $165 million on the 1960 jet program, and we were talking about $147 million on the 1961 jet program, and together those add up to something over $300 million, and if you subtract $100 million, you get approximately $200 million.

Q. In other words, you are assuming, or the statement that you were making was to the effect that if Proposal No. 1 were accepted, and the Tool Company put $100 million of additional equity money in, this debt financing would not be available to TWA?

A. No, Mr. Davis.

Mr. Zeller: I object to that.

By Mr. Davis:

Q. You already had arranged the $165 million and $147 million?

A. We were just in the process of finalizing the $147 million. Both of those were conditioned upon the voting trust. Your $100 million was conditioned upon the [5567] termination of the voting trust. We were told that these funds would not be available if the voting trust were terminated, and we had the question of what about that other $200 million.

Q. Is it fair to say that what you explained to the board was that if Proposal No. 1 was accepted, based upon what you have already described as the attitude of the lending institutions, TWA would have to find another $200 million?

A. Whatever the attitude of the financial institutions was, if we received another $100 million from the Tool Company, that left $200 million that we had to find somewhere else, and which had to be obtained by debt financing.

Q. The telegram from Mr. McCone, was that presented to the meeting?

A. My recollection is that it was read to the meeting.

Q. It was read to the meeting?

A. Yes.

Q. Was there any comment made by any of the directors present to the substance of the remarks of Mr. McCone as reflected by that telegram?

A. Could I see the telegram to refresh my recollection, Mr. Davis, please?

Mr. Davis: Let the record show I am handing the witness Defendants' Exhibit 21.

[5568] A. I don't recall any particular discussion about the telegram, Mr. Davis, except that I believe that I

commented on the last portion having to do with the possible obligation on the part of TWA to take the 880s and 990s, and I believe stated with respect to that, that I had made several very thorough investigations as to the possible existence of liability, and I convinced myself that there was no such obligation, and I believe Mr. Rowe who was at the meeting confirmed that point of view. Beyond that I don't recall any particular discussion of the telegram as such, most of its contents having been the subject matter of the prior discussion about the Toolco proposal.

Q. Do you recall whether or not that telegram was read or presented to the meeting before or after these investigations that you have described as consensus of opinion as to the purpose of the June 10th proposal?

A. My recollection, Mr. Davis, is that this came rather towards the end of those expressions.

Q. These notes of Mr. Duckworth's reflect what took place at the meeting in the order in which it took place, do they not?

A. So far as I know, Mr. Davis, that's correct, yes.

Q. And you see at the bottom of the page which has 758 at the lower left-hand corner, there is reference to [5569] remarks by Mr. Breech?

A. Yes.

Q. Are those the remarks that you previously attributed to Mr. Breech, or do you have a recollection of Mr. Breech's remarks other than as appear here?

A. I could not say, Mr. Davis.

Q. You notice on that same page there is a reference to remarks by Mr. Slack. Do you recall Mr. Slack's comments?

A. My best recollection of Mr. Slack's comments are that he very much doubted that this proposal was made in good faith, but that he felt that whether or not it was,

we should carefuly consider and examine the proposal as if they were in complete good faith.

Q. Will you turn to the preceding page of Mr. Duckworth's notes, that has the number 757. You will see that page is headed "Possible Proposed Action."

A. I do.

Q. Who outlined "Possible Proposed Action"?

A. I am not absolutely sure, Mr. Davis. I have been trying to remember that. It may have been Mr. Breech, but I would not be positive about that. As I recall the meeting, there was a statement by somebody—I think Mr. Breech—of proposed action that the board should take, and just about the time that the proposed action was stated, the [5570] discussion drifted on and off into other matters, and that proposed action got lost in the shuffle and was never acted upon.

Q. You note that Mr. Duckworth's notes under the heading "Possible Proposed Action" indicate notes as to action by Toolco, action by TWA, action by CAB?

A. Yes.

Q. Next to proposed action by Toolco, the following appears "Can possibly arrange financing." Will you describe what that refers to?

A. I think the thrust of that, Mr. Davis, was that TWA didn't feel under the circumstances that it could possibly arrange the needed debt financing under the proposed circumstances, and that therefore we should go back to the Tool Company and say in effect that it would be necessary for them, if this was to be entertained, to arrange a complete package that would include the debt financing as well as the additional equity.

Q. Was it Mr. Leslie's remarks that possibly the Tool Company could arrange this additional financing?

A. As I recall what Mr. Leslie said, it was to the effect that only the Tool Company could work out the necessary arrangements, and possibly they could if they really wanted to, but that was something that only they could [5571] determine and not TWA.

Q. The next item under possible proposed action by TWA "Should TWA take time to attempt to develop program to support Toolco proposal."

Then there is an additional note "or support Toolco in getting CAB."

Will you describe who described the possible action by TWA raising the question? What does this note refer to?

A. I am not sure that I can be altogether precise about that, Mr. Davis, but I believe that someone, and probably Mr. Breech, was raising the question of whether TWA could justify the taking of the time and going to the efforts to go to the financial community to explore further the development of a program of debt financing which would support the Tool Company proposal.

As I remember the purport of what he said, it was to the effect that this was something that Toolco should do, and it wasn't something that TWA ought to spend a great deal of time and effort on in view of the circumstances that existed.

Q. Do you recall what the other directors said, if anything, in connection with this suggestion?

A. Not beyond what I have already testified to, Mr. Davis.

[5572] Q. The third item is "Possible Proposed Action By CAB," and there the note reads "Possibility CAB would raise public interest question if Toolco should force cancellation of trust agreement."

Do you recall what that note referred to?

A. That refers to the same thing I referred to in my letter, I believe, Mr. Davis, and that is the obvious question of whether in the event all of this could be achieved, which appeared doubtful, the Civil Aeronautics Board would, in view of the statements in its last order, approve it.

Q. Does this note again refer to remarks made by Mr. Breech primarily?

A. If I am correct that Mr. Breech was the one who was posing these questions, yes. My recollection is that he started by suggesting that he would take a try at proposing appropriate action, and it then drifted into a discussion rather than really a proposal of action.

Q. Do you recall your saying anything to the directors as to this area, as to the possibility of what the CAB might do if the Tool Company should force cancellation of the trust agreement?

A. Of course, Mr. Davis, this was in my letter, a copy of which I had sent to each of the directors. I have [5573] no independent recollection of having raised the point at the meeting, but I may well have. I just don't recall.

Q. Do you recall what was said either by Mr. Breech or anyone else that Mr. Duckworth is describing as "If Toolco should force cancellation of trust agreement"? I am particularly referring to the use of the word force."

A. No, I have no recollection of the word "force cancellation of the trust agreement" being used. Maybe it was. I just have no recollection of it.

Q. Look at page 4 of the minutes of the meeting, Defendants' Exhibit 76. I call your attention to the paragraph which starts "The meeting was advised that Mr. Chester Davis," et cetera. The next sentence reads "After discussion the directors concluded that in view of Mr. Davis' numerous and lengthy prior communications to the Board

and the management, no purpose would be served by granting Mr. Davis' request."

I believe you previously testified that these minutes were prepared by Mr. Duckworth?

A. I believe that's correct.

Q. You don't recall having revised them?

A. No, I do not, Mr. Davis.

[5574] Q. Can you identify the "numerous and lengthy prior communications to the board" referred to in that portion of the minutes?

A. I might say that this refers to numerous and lengthy prior communications to the board and the management. I think they need to be dealt with together. The first lengthy communication was that at the May meeting of the board, at which time you appeared and spoke at some length.

You had prior to this time sent, I don't know how many letters and telegrams.

Q. Excuse me for interrupting you at this point.

Are you referring to any letters or telegrams other than those that you have already identified?

A. I believe not. You had had numerous conversations with Mr. Reed and Mr. Rowe. We had had the meeting of June 2nd, at which you held forth at considerable length, as I recall it, for approximately two hours.

I think that is principally what we had in mind, Mr. Davis.

Q. Your last reference is to the June 2nd presentation relating to the 990s?

A. That's right.

Q. In these communications with Mr. Reed and Mr. Rowe, can you identify the conversations to which you are having [5575] reference?

A. I may not be able to identify them specifically, Mr. Davis, but my recollection is that at the May meeting of the

board of directors, after you left, Mr. Reed and Mr. Rowe left to go into session with you, and that from then through the period which when you were seeking to block the effectiveness of our registration of the subordinate debentures, and after that, through the period we have been discussing here, up until July 21st, that you were in conversation with Mr. Reed or Mr. Rowe at least several times a week, and perhaps daily.

Q. You notice there is a resolution, or at least at the bottom of that page 4 there is a statement as to the sense of the meeting.

Refer to the minutes, Mr. Tillinghast. Is it your understanding that this was also prepared by Mr. Duckworth?

A. I am not altogether sure, Mr. Davis. My guess would be that Mr. Duckworth and Mr. Rowe collaborated on this, although I could not at this point tell who prepared the first draft.

Q. Was it the sense of the meeting that this letter of June 10th and the proposal contained was an interference with the affairs of TWA?

Mr. Zeller: Which paragraph are you referring [5576] to, Mr. Davis?

Mr. Davis: I am asking the question.

A. I think the consensus was, Mr. Davis, that this was a step in the Tool Company's efforts to prevent the Boeing transaction from going through.

Q. But there was no resolution to that effect, or statement made that it be recorded as the sense of the meeting?

A. I believe that's correct.

Q. Looking at paragraph 1 at the bottom of page 4 of the minutes, it reads:

"The corporation could not at this time accept proposal No. 1."

I am emphasizing the words "at this time." Was it the sense of the meeting that it could accept proposal No. 1 at some other time?

A. Only if certain other conditions were satisfied, which had not been satisfied at this time.

Q. You are now referring to what you previously testified about the need for $200 million?

A. Yes.

Q. You will notice at the bottom of page 759 of Mr. Duckworth's notes, Defendants' Exhibit 77, the photocopy has some of the words at the bottom of that page chopped off. [5577] I believe the original reads:

"Counsel to confer with Davis for the purpose of developing a written proposal to present to board."

I find no reference in the minutes of the meeting itself to any decision that counsel for TWA was to confer with Davis for the purpose of developing written proposals to present to the board.

I am asking you if you can explain why the minutes of the meeting do not reflect that decision or action.

A. Well, I believe, Mr. Davis, that it is covered in the minutes on page 4 in the middle paragraph where, in the third sentence, it reads:

"However, Mr. Rowe was requested to talk to Mr. Davis to determine whether he had any specific additional information or proposals that he wished to submit to the board."

Q. That refers to Mr. Rowe being asked to leave the meeting to speak to Mr. Davis who was waiting outside, in order to answer questions if anyone had any questions? Is that what is referred to?

A. That's correct.

Q. Am I to understand from your testimony that the directors there present expected Mr. Rowe to go out and [5578] come back with some written proposals?

A. The directors asked Mr. Rowe—I believe it was the chairman who asked Mr. Rowe to go out and talk with Mr. Davis and to find out whether he had any new information or new proposals, and if he did, to please put it in writing so we would know exactly what they were and we could consider them.

Q. The minutes as written up on page 4 read as they read, but I read those, Mr. Tillinghast, that Mr. Rowe reported back merely that Mr. Davis did not have any writings to submit to the board at that time.

Mr. Duckworth's notes, if read literally, read that counsel for TWA was to confer with Mr. Davis for the purpose of developing written proposals to present to the board.

A. I don't believe, Mr. Davis, that Mr. Duckworth's notes are in that regard anything but rough and hastily written notes.

Q. The thing I am trying to establish, Mr. Tillinghast, is simply this: Did, so far as you know, TWA make an effort with any representative of the Tool Company to develop written proposals for submission to the board, or to present to the board?

A. Yes, Mr. Davis. In my letter of the 16th, I believe [5579] I suggested that you let us have any proposals you might have, and Mr. Rowe, when he was sent out to confer with you, was asked to see whether you had any additional

information or proposals as requested in my letter, and to please have them put in writing.

Q. Subsequent to this meeting on June 21st, so far as you know, did TWA or any of its representatives or counsel make an effort to develop written proposals for submission to the board?

A. Not so far as I know. I believe they talked with you several times, and made it clear that we would entertain with seriousness any proposals that you might find it possible to submit, that might meet the problems that we had outlined.

Q. You are referring now to the conversation that Mr. Rowe had during the course of the meeting, which he reported to the board when he returned, as reflected on page 4?

A. No. I am referring to various conversations which they had with you subsequent to the meeting of June 21st.

Q. When you say "they," who are you referring to?

A. Mr. Rowe and Mr. Reed.

Q. Will you identify your information as to such conversations relating to the development of proposals to present to the board relating to the June 10th letter?

A. I know nothing about the development of proposals [5580] as such. We repeatedly tried to make it clear, and it is my understanding that they so stated to you, that we were prepared to give serious consideration to any proposal which you might wish to develop that would meet our problems.

As I recall it, we did not direct them to try to develop proposals, but rather to make it clear to you that if you had a proposal that you thought might be acceptable by TWA, that we would give it the most serious consideration.

Q. Now, turning the page of Mr. Duckworth's notes—the page should be page 760—you see the heading, "Back to 6-A"?

A. Yes, I do.

Q. That refers back to the item on the agenda of action?

A. Yes.

Q. You see the notes read:

"Reported Rowe discussion with Davis, and he will put his comments to board in writing."

A. That's correct.

Q. Did he put his comments to the board in writing?

A. You should know.

Q. I am referring to Mr. Rowe.

A. You are "he."

Q. Let me see if we understand Mr. Duckworth's notes the same way, Mr. Tillinghast.

On that day Mr. Davis did not make any comments [5581] to the board, did he?

A. No. I believe what happened was that Mr. Rowe returned. He reported his discussion with you and said that you would put your comments to the board in writing.

Mr. Zeller: Let me invite your attention, Mr. Davis, to the fact that the minutes seem to me very clearly so to state on page 4.

Mr. Davis: I do not want to argue this out, Mr. Zeller.

Mr. Zeller: I did not mean to argue; I thought you were looking for a fact.

Mr. Davis: I am quite familiar with what transpired at that board meeting. As the testimony has already developed, or one of the letters that has not

yet been marked but will be marked in a moment—I was outside the board meeting, and information was given to the board that I was prepared to comment to the board or answer questions with respect to this June 10th letter proposal, et cetera.

During the course of the meeting Mr. Rowe came to me and asked me if I had anything in writing to submit to the board, and I said no, but I was prepared to talk to them.

Then he advised me that the board did not have [5582] any interest or any questions to ask me orally.

The minutes reflect exactly what took place—that Mr. Rowe left and came back and returned and reported that.

That seems to me to be quite different from a suggestion which so far as I know the Tool Company never received, that the Tool Company was to develop any more proposals to submit to the board.

Mr. Zeller: Mr. Davis, you and I do not read the English language the same way because what I am looking at:

> "Mr. Rowe stated that upon being requested to advise him of anything Mr. Davis wished to transmit to the board, Mr. Davis declined to do so, but indicated that he would put what he had to say in writing and submit it in that form."

Mr. Davis: That is quite clear to me. What is not clear to me is the action of the board, if it was action, that proposals were to be developed.

However, I am clear on what the facts are. I want to be sure I understand what took place.

(Whereupon, a short recess was taken)

[5583] Q. Continuing with Mr. Duckworth's notes, Mr. Tillinghast, which are Defendants' Exhibit 77, you see the notes that he has on the resolution?

A. Yes, I do.

Q. Numbered 1, 2 and 3. No. 1 would seem to refer to Proposal No. 1, is that correct?

A. I am not sure that deals entirely with Proposal No. 1. Let me take a look.

Q. The note is "Give consideration to any sound program to increase capitalization subject to compatibility with overall financing program."

That refers to Proposal No. 1 of the June 10th letter?

A. I believe it does.

Q. The next item is "Refer advice of financial advisers."

That refers to the Dillon, Read letter that was presented at the meeting, does it not?

A. I presume so, yes.

Q. And then the next note is "Without interfering with orderly program"?

A. Yes.

Q. What is "Without interfering with orderly program"?

A. I believe that refers to the avoidance of interference with the orderly progress of the jet equipment [5584] program.

Q. The notes on the resolution are now reflected in the minutes, Defendants' Exhibit 76, on page 4, under Item 1, at the bottom of the page, isn't that right?

A. I believe so, yes.

Q. You see next to Item 2 the notes of Mr. Duckworth are "Motion to support management position on 2 and turn down offer." That indicates that someone made a motion to support the management position on Proposal No. 2, and turn down Proposal No. 2, isn't that correct?

A. That's correct.

Q. You stated the position of the management, or did Mr. Breech?

A. I believe I have already testified to that, Mr. Davis.

Q. You were the one at that meeting who stated the position of management?

A. Yes.

Q. And that was to turn down Proposal No. 2, isn't that right?

A. That's correct.

Q. And that management position, for the reasons that you have already described?

A. Yes.

[5585] Q. None others?

A. I would have to go back and refresh my recollection as to whether I have described all of the reasons. I believe I have adequately described them, but I am not absolutely sure.

Q. Can you, without repeating what you have already testified to, at least identify the major or principal or basic reasons for the management position to turn down Proposal No. 2?

Mr. Zeller: I object to this, your Honor. I think it has already been testified to. I think the only proper thing would be whether the witness has anything else in mind to add to that.

Mr. Davis: I did ask him that.

Mr. Zeller: He said he didn't have anything else in mind at this time.

Mr. Davis: I thought he said he would have to read it.

Mr. Zeller: I understood him to say that he didn't have now clearly in mind what he had testified to earlier. I submit that is no reason to take him back

to what he testified to earlier, Mr. Special Master. I think the proper thing to do is instead of rehashing all that testimony, ask him whether he [5586] has anything else in mind, and if he hasn't, let us go on to something else.

Mr. Davis: I am not asking him to rehash any testimony or anything he previously testified to. I am asking him, if he can now, to identify the major bases for the position of management for turning down Proposal No. 2.

By Mr. Davis:

Q. Can you identify them and say what the principal ones were, if there was more than one?

A. The principal reason, Mr. Davis, was that we did not want model 990 aircraft.

Q. This was without any reference to the possibility of acquiring four 880s?

A. Quite apart from the 880 question, we had come to the conclusion that it would not be in the interest of TWA to acquire 990 aircraft.

Q. With respect to Proposal No. 3, the motion made, according to Mr. Duckworth's notes, was "To support management. That door opened, but without more details cannot consider."

What was the management position that this refers to?

A. I think the position stated in my letter of June [5587] 16th.

Q. The minutes of the meeting on page 5 refer to what is entitled "Acquisition of Boeing flight simulator, additional funds for construction at Kansas City," and under that a motion was adopted to acquire Boeing flight simulators at a cost of $1,386,100. Was this flight simulator an item relating to the 1961 Boeing program?

A. Yes. It was an item relating to the 1961 program, but not exclusively.

Q. Not exclusively?

A. That's correct.

Q. Can you explain what this item is that the directors acted upon after giving consideration to the June 10th letter?

A. This is just what its name implies—a Boeing flight simulator, to be used in Kansas City for training purposes, with respect to all Boeing aircraft.

Q. TWA did not have one before that?

A. Yes, we had one, but wanted another.

Q. Was this needed because of the progress that had been made or the plans of TWA relating to the acquisition of additional Boeings?

A. In part, but as I recall it, it wasn't exclusively for that reason.

[5588] Q. Now will you refer to page 10 of the minutes of the meeting? Part of the report of the president—there is an item which appears under "A"—"Jet aircraft program. The status of the Boeing long-range aircraft program was reviewed."

You reviewed that to the board, did you not?

A. I did.

Q. What was the status of the Boeing long-range program which you described to the board? What did you report to them with respect to that Boeing long-range program?

A. I believe that I just reviewed the status of it, where we were. If I recall correctly, between the prior meeting of the board and this meeting of the board I had been to Seattle, where I had looked at the 727 mock-up of Boeings, and had talked with them about the 727 program.

Q. You were referring to what has been described as the 1961 Boeing program?

A. I was talking about two things here, I think. One, the status of the long-range program, and where we stood on that. The second was—

Q. You mean long-range program or long-range aircraft?

A. Long-range aircraft program. I also talked about the requirements for short-range jet aircraft.

[5589] Q. And the substance of that report was that it was progressing satisfactorily, or can you identify the substance of your report on the status of the long-range aircraft program and the short-range aircraft program, if there was one?

A. I believe that this has been partly summarized earlier in the meeting, and I did not repeat here what I had already covered. My recollection is, Mr. Davis, that this was pretty summary so far as the long-range program was concerned, and dealt more with the short-range problem than the long-range problem.

Q. What was the nature of your report then on the short-range aircraft program?

A. As best I recall it today, I stated that I had been to Seattle and talked with the Boeing people. I had seen the mock-up of the Boeing 727. That this was one of the planes to which serious consideration needed to be given with respect to the short-range jet program of TWA. That unless and until we had the long-range program all wrapped up and out of the way, it was too early to talk definitively about a short-range program, what the obvious financing problems involved, but that we were beginning to make preliminary studies as to the relative virtues of different planes, and that I would at a later meeting of the board

[5590] bring some more definitive statement to them as to what I felt we should do about the short-range program.

I believe, partly refreshed by the minutes here, that I also discussed the fact that we had an option under the Boeing purchase agreement to obtaining—we had an option for ten additional 707 aircraft, with a protected delivery position. We were supposed to act on that, it says here, by the end of October, although my recollection is that it was earlier than that. In any event I recall that we discussed obtaining an extension of the option period. It was my recommendation that we do this even though I was doubtful that we would want in fact to exercise the option for the additional ten.

Q. I am particularly interested in that portion of the minutes which state "And that in view of the current financing situation, the possibilities of leasing this type of aircraft were being investigated."

First, will you identify the current financing situation to which you apparently referred?

A. I think by the current financing situation I was referring to the fact that we probably had as much debt incurred or committed for as would be wise, and that in all probability further debt financing would require some increase in equity, and that it was doubtful that we [5591] could just go out and borrow money for further jet programs of any magnitude.

Q. You were not referring to the anticipated losses in operations?

A. Not particularly, Mr. Davis, I think.

Q. What leasing arrangements were being investigated?

A. I think probably, Mr. Davis, that at this time the leasing possibilities with respect to the Caravelles had become the subject of some discussion, and if I recall cor-

rectly, we were feeling out Boeing at this time as to the possibility of leasing 727s.

Q. Had you discussed that to the point where terms were being discussed?

A. No, I don't think so. I think this was in the very preliminary stage in June.

Q. Refer to Mr. Duckworth's notes, Mr. Tillinghast, at the page marked 762, which appears to cover what you have been describing—under the heading "Report of President, Jet Aircraft Program," he has first "Short-range problem"?

A. Yes.

Q. What was the short-range problem?

A. I have testified to that at great length, Mr. Davis.

Q. You are referring now to the short-range problem?

[5592] A. The problem of short-range jets—the need for short-range jets.

Q. The next item is "Financing problems prohibited purchase"?

A. Yes.

Q. This is what you just identified a moment ago that in view of the amount of debt, or difficulties in debt financing, TWA was not in a position to consider purchase of aircraft?

A. Yes. You will recall, Mr. Davis, from my prior testimony that at the end of May, when the Prudential pulled out of our financing program, and I was successful in arranging for greater commitments from the Equitable and the Metropolitan, that Mr. Keehn of the Equitable made it clear that that was the bottom of the barrel so far as they were concerned. It seemed to me clear in view of the Prudential's withdrawal, what Mr. Keehn had said, our unsuccessful efforts to find other insurance companies to participate in such a financing, that we were substantially at

the end of the road so far as debt financing was concerned.

Q. And therefore in order to be in a position to acquire short-range jets, it would be necessary to either lease or do some equity financing?

[5593] A. That's correct.

Q. Did you discuss at that time in connection with current financing situation, the possibility of doing some equity financing?

A. I don't think in this point of time, Mr. Davis, we got even down to any real discussion of the possiblities of equity financing. That came along later.

Q. The next item is that you reported on investigating the leasing possibilites. Did you describe that as a desirable approach from TWA's point of view, of leasing aircraft rather than developing a program through equity financing, or otherwise, of purchasing aircraft?

A. I think we described it merely as one of the possibilities that we were investigating.

Q. The point I am trying to get at is whether or not at that meeting you indicated to the board that from TWA's point of view it would be desirable to be able to lease.

A. No, I don't think so.

[5594] Q. What does "July report" mean in the last line?

A. I don't know, Mr. Davis. Perhaps it means I was going to report on it again at the July meeting, but I really don't know what it means.

Q. Was it supposed to be a report on the leasing possibilities, or was it a general report that was to be made in July?

A. I am not sure what it means, but if it does refer to reporting on the subject in July, it was a general report as

to the short-range program rather than any specific report as to leasing.

Q. Do you recall making a July report?

A. I am sure that I did. I am sure I have discussed equipment programs at substantially every meeting of the board, at least through this period of time.

Q. It was not a written report?

A. No.

• • • • •

[5622] Q. Mr. Tillinghast, you have identified Defendants' Exhibit 11Q as an instance of an interference by the Tool Company in the affairs of TWA. Will you identify or describe the portions of Defendants' Exhibit 11Q which you claim constitute or constituted interference in the affairs?

A. Mr. Davis, there are no particular parts. As I have said several times before, this was, as I saw it, one in a series of communications aimed at preventing and [5623] interfering with our going ahead with the Boeing program.

Q. There is no particular part of this letter which you feel constituted a particular interference?

A. No part more than any other part.

Mr. Davis: May I have marked for identification as Defendants' Exhibit 79 this letter from Mr. Rowe addressed to Mr. Davis, dated June 22, 1961.

(Letter from Mr. Rowe to Mr. Davis, dated June 22, 1961, marked Defendants' Exhibit 79 for identification, as of this date.)

By Mr. Davis:

Q. I hand you what has been marked Defendants' Exhibit 79. Can you identify that as a letter from Mr. Rowe to Mr. Davis?

A. That appears to be, yes, Mr. Davis.

Q. Was this communication discussed with you at all?

A. I believe it was.

Q. Do you know of any other communication for or on behalf of TWA to the Hughes Tool Company, or any of its representatives, advising them of the action taken by the board at its meeting of June 21st?

A. I would have to check the file to be certain, Mr. Davis, but offhand I can't recall any written communication other than Defendants' Exhibit 79.

[5624] Q. Can you think of any oral communication relating to advising the Tool Company of the action taken by the board?

A. As I have said several times before, I know that Mr. Rowe and Mr. Reed were having conversations with you from time to time, and I believe that the action of the board was a subject of discussion between you and Mr. Rowe. Perhaps I am wrong, but I think that is the case.

Q. You referred to this more than once, Mr. Tillinghast. May I ask you what your understanding of what the subject of discussion was between Mr. Rowe and Mr. Reed and Mr. Davis?

A. The controversy between Hughes Tool Company and TWA.

Q. But no more than there were discussions relating to the controversy?

A. What more could there be?

Q. You keep referring to your being informed that advice or information was communicated to the Tool Company by reason of conversations taking place between counsel for TWA and counsel for the Tool Company. What I am asking you now is, can you identify or are you aware of or have you been informed of any particular communication,

or is it your understanding that any particular advice relating to the proposals covered by the June 10th letter, was conveyed [5625] by either Mr. Rowe or Mr. Reed to the Tool Company?

Mr. Zeller: Your Honor, I think there are about three questions wrapped up in there. If he is asking just a simple question, whether the witness now has any specific recollection of any communication other than this, I have no objection to it.

Mr. Davis: If your Honor please, I asked him if he was aware of any. He said none other than conversations. I asked him what conversation, and he said conversation as to the controversy. Now I am asking him in one question, if I may, whether or not he is aware of any communication.

The Special Master: Why don't you ask him to describe any communication, whatever it was, that he knows about?

Mr. Davis: That is what I was trying to elicit from the witness.

By Mr. Davis:

Q. Will you describe whatever communication you were aware of, which took place between anyone, Mr. Rowe or Mr. Reed representing TWA, to anyone representing the Tool Company, with respect to the proposals of the June 10th letter, or the action taken by the board?

A. I recall merely, Mr. Davis, that Mr. Rowe and Mr. [5626] Reed were in frequent conversation with you at that time, and that Mr. Rowe, I believe I recall, had talks with you about the action of the board, and explained to you the board's position.

I recall that Mr. Rowe and you had an argument over extending the date on the closing of the subordinate debentures and over the interest that was payable on the subordinated debentures.

It is my impression today, as I say, these conversations with you were practically daily, and that both Mr. Reed and Mr. Rowe were explaining to you and discussing with you the position of TWA.

Exactly what they said, I am not sure that I can recall at this moment to the extent that I may have known, but I am sure they were discussing these things with you, and advising you of TWA's position.

Q. You are not aware of any communication relating to the action taken by the board other than Defendants' Exhibit 79?

A. I believe I recall Mr. Rowe telling me he discussed it with you and explained it to you.

Q. Do you recall what Mr. Rowe told you?

A. Not beyond what I just said.

Mr. Davis: May I have marked for identification [5627] copies of a letter dated June 26, 1961, addressed to Mr. Holliday, from Mr. Tillinghast.

(Copies of a letter dated June 26, 1961, to Mr. Holliday from Mr. Tillinghast, marked Defendants' Exhibit 80 for identification, as of this date.)

Q. Can you identify Defendants' Exhibit 80 as being in fact a letter which you sent on June 26th to Mr. Holliday?

A. It appears to be.

Q. And copies were sent to each of the directors?

A. I believe so.

Mr. Davis: Again, Mr. Special Master, I note we have only been furnished a copy of this letter. Pre-

sumably copies of this letter should be in TWA's files or the files of Mr. Cocke, Mr. Leslie, Mr. Hall.

Mr. Zeller: We will investigate and advise you, Mr. Davis.

Mr. Davis: In that connection, Mr. Rankin, I would like to inquire whether or not the files of counsel for TWA, particularly of the Chadbourne firm, have also been examined for the possible existence of documents in their files which normally would be in the files of TWA.

[5628] The Special Master: I think you should make some statement about that, Mr. Zeller, or Mr. Sonnett when he returns, so as to clarify whether a search has been made in those files, not as to any confidential documents, I assume.

Mr. Davis is not asking that. But all documents that would otherwise be responsive to the subpoena, if they were not in the files of the attorneys.

Mr. Zeller: Very well, sir. I will be glad to.

y Mr. Davis:

Q. Mr. Tillinghast, I notice that a blind copy of this tter was sent to Mr. Reed and Mr. Olds. Was there a rticular reason for sending them copies of this letter?

Mr. Zeller: You mean blind copies.

Mr. Davis: Copies of the letter.

A. Because I thought they would be interested in the bject matter.

Q. Did anyone participate with you in the drafting or paration of this letter?

A. It's very possible that Mr. Rowe looked this over, although at the moment I have no distinct recollection of it.

Q. Did you discuss the contents or the substance of the reply with Mr. Breech?

[5629] A. I rather doubt it.

Q. With Mr. Reed?

A. Possibly. I just don't recall for some reason the preparation of this letter, Mr. Davis, and I am not sure whether I did this all myself, or whether I prepared a draft and submitted it to Mr. Rowe and/or Mr. Reed, and obtained their comments.

Mr. Davis: Mr. Rankin, may I request at this time that a search be made for the existence of any drafts which may have been sent to Mr. Rowe or Mr. Reed?

The Special Master: You may.

Mr. Zeller: Again, I don't know the answer to that, but I will advise you, Mr. Davis.

By Mr. Davis:

Q. I call your attention to page 2, the third full paragraph, and the sentence reads "We find ourselves faced by widespread refusal by the present holders of our senior debt, either to consent to a termination of the voting trust or to lend additional monies except on the condition that the voting trust continue."

My question is, what were you referring to, or were you referring to merely what you have described in your prior testimony?

[5630] A. I am referring to what I have already testified to several times.

Q. By that time, June 26th, you had not made any contact or communicated with the lending institutions other than the extent to which you have already described it?

A. I believe that is the case.

Q. So far as you know, no one on behalf of TWA had communicated or contacted lending institutions except to the extent you have already described it?

A. That's correct.

Q. By that time you had not had any discussion with Mr. Breech or Mr. Reed relating to any meetings that Mr. Breech or Mr. Reed may have had with either counsel for or the lending institutions themselves?

A. Not except as I have already testified.

Q. Now let me refer you to page 3 of Defendants' Exhibit 80, and particularly the last sentence of that paragraph which reads, "Obviously the resolutions which you suggest for adoption cannot be dealt with until that time, except that as you will be happy to hear the steps suggested at the bottom of page 5 and the top of page 6 already have been taken."

Your reference to the bottom of page 5 and the top of page 6 refers to the bottom of page 5 and top of page 6 [5631] of Defendants' Exhibit 11-Q, does it not? This is your reply to Mr. Holliday's letter of June 21st?

A. Yes.

Q. Looking at the bottom of page 5 and the top of page 6 of Defendants' Exhibit 11-Q, you will note that Mr. Holliday was—will you identify the steps suggested to which you were referring in that paragraph of your letter, which you say had already been taken.

A. A step of contacting the financial institutions to make inquiry as to whether in the event of termination of the voting trust and the subscription to additional equity in the

sum of $100 million, they would be prepared to continue present loans and to make future loans to TWA.

Q. If you look at Defendants' Exhibit 11-Q, at the bottom of page 5, you will see that Mr. Holliday was referring first to resolutions to be adopted by the board of directors. You weren't referring to that as a step which had already been taken, were you?

A. I think not.

Q. Then at the very bottom of the page "The president and chairman of the board of the company be directed to communicate with appropriate representatives of the lending institutions," et cetera.

The president was you and the chairman of the [5632] board was Mr. Breech?

A. That's correct.

Q. Had you or Mr. Breech communicated with appropriate representatives of the lending institutions by June 26th?

A. Not directly, Mr. Davis. Through Mr. Leslie we had.

Q. You mean that your letter of June 26th, when it stated that the step suggested by Mr. Holliday had already taken place, you were referring only to what you have already described in your testimony?

A. Yes, Mr. Davis.

Q. Was it your understanding that Mr. Leslie had communicated with these lending institutions on behalf of Mr. Breech and on your behalf?

A. On behalf of TWA, Mr. Davis. I don't think I considered it particularly important that the president and the chairman of the board do it. To my mind the substance of what Mr. Holliday was suggesting was that we obtain, or that we communicate with the lending institutions for the purpose of obtaining certain information.

Q. You will recall, Mr. Tillinghast, that I called to your attention some notes of Mr. Wadsworth, I believe, of Dillon, Read, indicating that Mr. Breech and his lawyers had met with Mr. Hagerty and his lawyers?

[5633] A. Yes, I remember that.

Q. I want you to try to refresh your recollection as to whether or not this letter was not drafted by Mr. Reed for you?

A. Which letter?

Q. Your letter of June 26th, which has been marked Defendants' Exhibit 80?

A. I am quite sure it wasn't, Mr. Davis. This reads very much like my own composition, and I am quite confident that I drafted that myself.

Q. Therefore by the sentence which I read to you from Defendants' Exhibit 80, you were referring to the contacts made with the lending institutions that you have already identified and described, is that correct?

A. That's correct.

Q. Turning again to Defendants' Exhibit 11-Q, page 6, the suggestion at the top of page 6 was "The president and chairman of the board be requested to submit a report in writing to the directors of the company with respect to the efforts made with such lending institutions. The result of such efforts, and the position or attitude taken by such lending institutions, together with their recommendation with respect to Proposal No. 1, and the basis for such recommendation."

[5634] Q. Was that done?

A. I have already testified, Mr. Davis, with respect to that, and I don't think I can add to what I have already said.

Q. Are you referring to what took place at the directors meeting of June 21st?

A. I am.

Q. Do you know of any report in writing by either the president or the chairman of the board?

A. No, there wasn't a report in writing by the president or the chairman of the board. However, we did, as I have already testified, present to the board and describe to the board and in part read to the board the communications to and from the lending institutions. To my mind we had complied with at least the substance of what Mr. Holliday was talking about.

Q. In any event, that is what you had reference to by your sentence in your letter?

A. That's correct.

Q. Now we look at the last paragraph on page 3, which refers to Mr. Rowe being in communication with Mr. Davis, et cetera.

Mr. Zeller: Page 3 of Defendants' Exhibit 80?

Mr. Davis: Yes.

[5635] Q. Can you identify more than you already have your understanding of any communication between Mr. Rowe and Mr. Davis with respect to any extension of time?

A. No, I don't think I can add to what I have already testified to.

Q. Did you get any report from Mr. Rowe indicating that TWA could have or could not have an extension of time to consider Proposal No. 1?

A. I believe there was one communication. I can't remember the precise identification of it for the moment. I am wrong. What I am thinking of is an extension to the 22nd of June, rather than an extension—I do not recall that you did anything in the way of extending the time, Mr. Davis.

Q. Did Mr. Rowe report to you that he had requested an extension of time which had been rejected?

A. No. My letter of the 16th and this letter of the 26th, I think, made it quite clear that we would be happy to receive any extension of time that you were prepared to make available to us, and my recollection is that none other than the extension to the 22nd was made available.

Q. Am I correct in understanding your testimony to be that your letter of June 16th and this letter of June 26th reflect whatever effort TWA made to obtain an extension [5636] of time?

A. That's correct.

Q. Let me hand you what has been marked as Defendants' Exhibit 11-F, being a letter dated May 26, 1961, from Mr. Davis to the lending institutions, the board of directors and the voting trustees. Will you describe what you did or what took place upon your receipt of this letter?

A. Mr. Davis, I don't remember what I did with this at the time it was received.

Mr. Davis: From the production, it indicates it comes from the president's office. May I request that copies of this letter sent to other directors of TWA, or officers or employees of TWA, be produced if they have not been destroyed?

The Special Master: You may.

Mr. Zeller: Off the record.

(Discussion off the record.)

Mr. Zeller: I will investigate that and advise you, Mr. Davis.

By Mr. Davis:

Q. Upon receipt of this letter of May 26th, Defendants' Exhibit 11-F, did you discuss it with anyone?

A. Yes, I think I discussed it with Mr. Reed and Mr. Rowe, I believe.

[5637] Q. Anyone else?

A. I think I also discussed it with Mr. Leslie and Mr. Cocke.

Q. Not Mr. Breech?

A. It may have been that I discussed it with Mr. Breech by telephone, although I don't specifically recall it.

Q. You don't recall if you had any discussion over the telephone that was a serious discussion of the letter, or did you have a serious discussion over the telephone with Mr. Breech.

A. I don't recall, Mr. Davis. I think it is very likely that I did discuss it with him, but I have no specific recollection of the discussion.

Q. How about Mr. Sessel?

A. Not that I recall, although again it is possible that I discussed it with him.

Q. You notice that the letter was also addressed to the Irving Trust as agent?

A. I see that.

Q. That does not refresh your recollection as to whether you discussed it, or did you discuss it with someone else representing the Irving Trust, other than Mr. Sessel?

A. No. If I discussed it with anyone, it was with Mr. [5638] Sessel, I am quite sure.

Q. Your recollection is that you didn't discuss it with anyone at the Irving?

A. It's not my recollection that I did not discuss it with anyone at the Irving. I have no recollection of having discussed it.

Q. It is also addressed to the Equitable. Did you discuss it with anyone representing or associated with the Equitable?

A. Not that I recall.

Q. I notice the letter is also addressed to the Metropolitan. Did you discuss it with anyone associated with or connected with the Metropolitan?

A. I do not believe so.

Q. Did you discuss it with Mr. Olds? It is addressed to the voting trustees.

A. I do not believe I discussed it with Mr. Olds.

Q. Give me your best recollection as to your discussions which you had with Mr. Reed?

A. I remember, Mr. Davis, one small thing relative to my discussion with Mr. Reed, which comes to mind, and that is I happen to remember remarking to him appreciating the generous statements you made about me at the bottom of page 8.

[5639] I believe I discussed with Mr. Reed, as well as Mr. Rowe, the question of whether this required a reply, or what should be done about it.

I remember expressing the view with which both of them concurred, that this was another Davis blast, and didn't really contain anything new.

I remember discussing with them the desirability of having any general town meeting of all these different people to discuss this matter, and concluding that no worthwhile purpose would be served by such a meeting.

I recall having expressed the view that this seemed to be aimed mainly at our Boeing deal, and that that was a management matter which ought to be dealt with by the management as such, and that we would be happy to discuss this with any representatives the Tool Company wanted to discuss it, but I doubted the wisdom of discussing what

was largely a technical problem in some sort of a large meeting with diverse interests.

That is about as much as I can remember at the present time, Mr. Davis.

[5640] Q. You referred to Mr. Reed and Mr. Rowe together. Was this a meeting or conference with Mr. Reed and Mr. Rowe?

A. Not that I recall, Mr. Davis. My best recollection is that it was two separate telephone conversations.

Q. In other words, you had a telephone conversation with Mr. Reed and you had a telephone conversation with Mr. Rowe?

A. That is my best recollection, although I wouldn't want to be positive of that, because I had a variety of discussions with them during this period of time relative to this controversy, and most of the time I had separate telephone conversations with them, but I know there were at least a number of times when we met in my office and discussed some of these things.

Q. In essence, but independently both Mr. Reed and Mr. Rowe reached the same conclusion that you have described?

A. That is my recollection.

Q. In those independent telephone conversations, both Mr. Reed and Mr. Rowe agreed with you that the letter did not require a reply, is that correct?

A. I believe so, Mr. Davis, although I must say that is a little hazy in my mind, but I think that's right.

[5641] Q. Is it fair to say that you did not pay much attention to the letter?

A. No, I don't think it would be fair to say that, although I did have the distinct feeling there wasn't anything new in the letter, and that this was just more of the same.

Q. By "more of the same," you are referring to the May 19th letter?

A. I am referring to the whole campaign that had been going on since your first letter.

Q. Wasn't the May 19th letter the first letter?

A. Perhaps. I don't recall offhand, but if that was the first letter, that's correct.

Q. Do you recall whether it was in your conversation with Mr. Rowe or Mr. Reed that you discussed the desirability or lack of desirability of having a meeting with these diverse interests?

A. My recollection is that I discussed it with both of them.

Q. But I recall your prior testimony to be that the conclusion was reached that no useful purpose would be served in having a town hall meeting?

A. A town meeting.

Q. A town meeting?

[5642] A. That's correct.

Q. I am asking you if you recall whether that was something discussed in your telephone conversation with Mr. Reed or Mr. Rowe?

A. I believe I discussed it with both.

Q. You previously indicated that you also discussed or may have discussed it with Mr. Leslie and Mr. Cocke. Will you describe what took place in connection with any discussion you may have had with those gentlemen?

A. Well, I have a recollection of Mr. Cocke having come into my office with his copy of this, having made some semi-facetious remark about Davis being quite a letter writer, or something to that general effect, and my having said something to the general effect, "I guess we will have to get used to reading all this material."

So far as Mr. Cocke is concerned, I don't remember much beyond that.

Q. You did not discuss with him the desirability of meetings with these diverse interests?

A. I don't recall any such discussion.

Q. What was the nature or substance of any discussion with Mr. Leslie?

A. I really don't remember offhand, Mr. Davis, just what is the substance of the discussion was with Mr. Leslie, al- [5643] though I am quite sure I talked with him about the letter, but just what was said I can't recall at this moment.

Q. Do you recall anything being said by any of these gentlemen with whom you discussed this letter as to the effect that it might have on TWA or its management or its operations?

A. I would hesitate to say, Mr. Davis, because it just isn't clear enough in my mind. I have the feeling that a remark was made by someone about this being part of the war of nerves, but I can't tell you with certainty who it was.

Q. Do you have any recollection of discussing it with any of the other directors of TWA—with Mr. Slack?

A. No, I don't believe I discussed it with Mr. Slack, because so far as I recall, he wasn't around at that time. The more I think about it, the more I think I discussed it with Mr. Sessel, and my recollecton is that Mr. Sessel called me up after he had gotten it, and asked me if I had received a copy of it, and what did I think of it.

Q. And then what happened?

A. I believe I told him that I thought it was just part of your campaign to block the Boeing purchase, and beyond that I don't recall what the conversation was.

Q. Let me direct your attention to the paragraph which [5644] begins at the bottom of the first page of the letter, which reads:

"It is the desire of Toolco to confer with you or your representative as soon as possible with the objective of working out an amicable solution wherever there may be a difference of opinion."

Do you recall discussing with anyone the desirability of arranging for such a conference?

A. I believe I discussed that with Mr. Reed and probably with Mr. Rowe, although I don't recall the conversation with Mr. Rowe particularly relating to this.

I believe Mr. Reed took the position that we should be prepared to sit down and discuss the matter if representatives of the Tool Company wished to do so, and I believe I told him that we would be happy to do so at any time if there was any real desire on the other part to sit down with us.

Indeed, as I recall it, it was later that week that we did sit down with you in connection with the 990 question.

Q. Are you referring to the June 2nd presentation relating to the 990s?

A. That's correct, yes. I believe that it was in connection with that discussion that we discussed the desirability of having sort of a town meeting discussion, and con-
[5645] cluded that with as many people and as many diverse interests involved, in all probability it would lead to no fruitful result.

Q. Did you decide to reply to that letter of May 26th?

A. No, I don't think I did. As I recall it, and as I look at my calendar here, this is the day—the day I received this was the day on which I was very busy trying to arrange to replace the Prudential part of our proposed financing program.

The next day was Memorial Day. Unless I am mistaken, by Wednesday or Thursday we already had some more

communications from you. We were receiving communications, as I recall it, faster than we were answering them, and then it was either Wednesday or Thursday that arrangements were made for a meeting on Friday.

If my recollection is correct, this letter was never really answered, and we just seemed to bounce from one communication and one discussion to another.

Q. When you refer to communications, insofar as written communications are concerned, are you referring to anything other than what you have already identified?

A. No.

Q. And in your reference to oral communications, are you referring only to those which related to the arrange-
[5646] ment for the presentation to be made relating to the 990s, which took place on June 2nd?

A. No.

The Witness: Read that question back.

(The question was read)

A. As I testified several times before, Mr. Davis, I think Mr. Reed and Mr. Rowe were talking with you rather frequently, perhaps daily, during this period. I am referring to all of those communications.

Q. You are unable to identify those communications any more than you have already done?

A. That's correct, yes.

Q. Do you know if any of the other addressees of this letter communicated with the Tool Company or any of its representatives with respect to any of its contents, or this objective stated in the paragraph beginning at the bottom of page 1?

A. I think the voting trustees communicated with you, at least orally, through Mr. Reed. I don't recall if I knew

the extent to which the financial institutions communicated with you.

Q. You never heard that they did or did not?

A. I have no present recollection of knowing whether they did or did not.

[5647] Q. And your reference to Mr. Reed having communicated on behalf of the voting trustees, can you refer to anything more specific than you have already identified?

A. No, I can't, Mr. Davis.

Q. Referring to page 5 of that communication, you will see among the specific areas identified on behalf of Toolco, are the following:

First, the arrangement with Boeing for the acquisition of additional Boeing aircraft.

With respect to that, were there any discussions involving that subject matter with the Tool Company, other than the June 2nd presentation relating to the desirability of 990s?

A. I know again, Mr. Davis, that Mr. Reed had a number of conversations with you, at least he so stated to me, to the general effect that the TWA people believed that the proposed Boeing program was in the best interests of TWA, and proposed to proceed with it.

Q. But again, you cannot identify these alleged conversations by Mr. Reed other than the extent to which you have?

A. That's correct.

Q. You see the paragraph beginning on page 6, of the financing program contemplated between TWA and the lending [5648] institutions constitute self-dealing, and Toolco objects to any such arrangement without its consent.

Do you know of any meeting, conference or communication relating to that subject, with the Tool Company or any of its representatives?

A. Again I know that is a subject Mr. Reed was discussing with you at the time.

Q. You are not any more familiar with the nature of any such discussion than you have already identified?

A. I cannot testify in more detail than I have already.

Q. Is it your understanding that Mr. Reed had discussed with a representative of the Tool Company this subject of self-dealing?

A. I believe, Mr. Davis, that he had discussed with you the views that you were putting forth that this constituted self-dealing. I believe that he was taking the position that it was not that.

Q. I refer you to page 7, the paragraph beginning at the bottom of the page, which reads:

> "Toolco hereby requests that you immediately advise the undersigned as to the status of the program described in the current prospectus relating to the purchase of Boeing equipment . . ." et cetera, and "the current negotiations with the lending institutions," [5649] et cetera.

Did, so far as you know, TWA advise the Tool Company or any of its representatives as requested by the portion I just read to you?

A. I believe that the Tool Company was advised, or had been kept advised up to this point as to the general status of the program, and that during the course of the week of May 29th was advised that TWA was continuing with the program.

Q. I am at the moment referring particularly to the furnishing of information as requested by that paragraph.

Mr. Zeller: What is the question?

The Special Master: I do not think there is a question.

Mr. Zeller: I don't think there is.

Mr. Davis: I asked him if he knows to what extent, if any, TWA furnished any of the information requested by that paragraph.

He answered by saying that he understood that during the week of May 29th the Tool Company was advised that TWA was proceeding.

My question is whether you have any information, or is it your understanding that the information requested was furnished?

[5650] A. As I understand the letter you request information as to the status of the program, and I believe you were advised that the status of the program was that it was proceeding in the normal course.

Q. Was any detailed information as to the program itself furnished to the Tool Company?

A. May I finish my answer?

Q. I thought you were finished.

A. I believe, I would have to refresh my recollection, that Mr. Rowe somewhere along the line here, sometime during this week, wrote you to that effect, although perhaps I am wrong.

As to the current negotiations with the lending institutions, I believe that you were merely advised that they were proceeding.

So far as reviewing the papers, I believe that we took the position that in view of the antagonistic position being taken by the Tool Company, that we did not think it appropriate to advise them of the details of the negotiations.

Mr. Zeller: May we have five minutes?

The Special Master: Let us take a five-minute recess.

(Whereupon, a short recess was taken)

[5651] By Mr. Davis:

Q. In your prior answer, Mr. Tillinghast, you said that it was your understanding that the Tool Company had been kept advised of the general status of the program. What was the basis for your statement that it was your understanding that the Tool Company had been kept advised of the general status of that program?

A. Mr. Holliday got copies of all the directors' minutes, and indeed at the early stages he was at one of the directors meetings at which this program was discussed. It is my recollection, more particularly at the time we are talking about, at the end of May, the first part of June, that you were advised by Mr. Reed and/or Mr. Rowe, and were aware that we were moving ahead as planned with the program.

Q. So far as Mr. Holliday was concerned, and apart from any discussion between counsel, you are referring to what is disclosed by the minutes of the meeting of the board of directors?

A. Yes. I think the memorandum relative to financing that had been distributed to the directors, which you have already identified.

Mr. Davis: May I have marked for identification a letter from Mr. Rowe to Mr. Davis, dated June 8, 1961.

[5652] (Letter from Mr. Rowe to Mr. Davis, dated June 8, 1961, marked Defendants' Exhibit 81 for identification, as of this date.)

Q. Do you have what has been marked as Defendants' Exhibit 81 before you, Mr. Tillinghast?

A. Yes, I do.

Q. Can you identify that as a letter by Mr. Rowe on behalf of TWA?

A. Yes.

Q. Do you recall any discussion with Mr. Rowe as to what was to be said in this letter?

A. I recall, Mr. Davis, discussing the last paragraph with Mr. Rowe.

Q. Are you referring to the paragraph which states in part "I believe it would be inappropriate for me to furnish at this time with all the 'detailed terms of the financing currently being negotiated by TWA with certain lending institutions' "?

A. That's correct.

Q. And you adverted to that as the position of TWA in your prior testimony?

A. That's correct.

Q. Did you discuss it with anyone other than Mr. Rowe, by that I mean anyone else related to or associated with TWA?

A. Not that I recall.

[5653] Q. The portion of it which read "In view of the recent statement and attitude of Hughes Tool Company," that refers to the letters and communications that you previously had identified?

A. To the campaign which in my mind you were carrying on as evidenced in part by the letters and telegrams.

Q. When you say "evidence in part," you do not have in mind any other communication between the Tool Company or any of its representatives with TWA or any of its representatives, as part of that campaign which you have not already identified?

A. That's correct.

Q. Let me refer you to Defendants' Exhibit 39 for identification, which is a letter dated May 29th, to Mr. Holliday from you, with a copy to Mr. Davis. This was a letter from you to Mr. Holliday referring to Defendants' Exhibit 11F?

A. That's correct.

Q. And that is a May 29th letter which is referred to by Mr. Rowe in his letter, which has been marked as Defendants' Exhibit 81?

A. Yes.

Mr. Zeller: Let me hand this document to the Special Master because I think this illustrates [5654] a problem that has been occurring to me as we have gone through this.

As your Honor will see, that letter refers—that is a letter to Mr. Holliday as a representative of Tool Company, expressing Mr. Tillinghast's willingness to sit down with a representative of the Tool Company, obviously occasioned by Mr. Davis' letter of May 26th, which he was questioning Mr. Tillinghast about just before the recess.

The witness obviously didn't have that in mind. I don't see how he could keep in mind all of these documents.

Mr. Davis: It is not necessary. His answers have always been other than as previously identified. This was already identified in the record.

Mr. Zeller: As long as the record clearly so shows, because my point is a limited one. It is simply that as we get these more or less omnibus questions, and I am not suggesting there is a better way to do it, I just don't know how we can avoid getting a record

which is necessarily misleading if you look at just the four corners of the record.

Mr. Davis: I appreciate that. The problem is this. We have marked something for identification [5655] before. We have an understanding that to save time I was requested before that we never have to repeat anything previously identified or marked. I am not calling to his attention something previously identified and marked. My point is that I am trying to discover whether there is anything else which exists in the witness' mind other than what he has already testified to, which relates to this contention that these letters were part of an effort to interfere with the affairs of TWA.

Mr. Zeller: As long as we are clearly agreed on that. There won't be any quotations in the brief from the record on the failure to identify a particular document at a particular point in the deposition, that that indicates there wasn't anything else.

Mr. Davis: You can brief how you want to from the record. My only point is that I took the time and trouble to be sure that we have not overlooked anything in fairness to the witness for that very reason. But I am entitled to know from the chief executive officer of TWA what it is that he claims constitutes this conduct with which we are charged. I have tried to be fair about identifying all the [5656] documents which have been called to our attention and furnished to us. I won't guarantee that I won't overlook any.

You will have an opportunity, if you care to do so, at this time or later on to produce whatever you want to produce.

The Special Master: Are you making an objection, Mr. Zeller?

Mr. Zeller: No, sir, I am not. I wanted to call this to your attention and counsel's attention as a problem that we are faced with because of the magnitude of the documents primarily.

Mr. Davis: That is one of the reasons why it takes so much time. Your partners think I ought to do it in two days.

Mr. Zeller: I agree with him.

By Mr. Davis:

Q. The second area specifically mentioned on behalf of Toolco in Exhibit 11F appears on page 8, which refers to "Independently of the outcome of the Boeing purchase, another matter which requires discussion is the seventeen Convair jet aircraft."

By the seventeen Convair jet aircraft, you understood it to refer to the thirteen 990s and the four 880s?

[5657] A. That's right.

Q. And it was that matter which was the subject of a presentation on June 2nd? We have identified the minutes of that conference on June 2nd.

A. Without conceding the accuracy of your characterization, yes.

Q. The next item specifically referred to is the question of your employment contract. It is referred to in paragraph 3?

A. That's correct.

Q. You previously said that you recalled that there was some discussion of that with Mr. Reed?

A. No, I don't think I did so testify.

Q. Or Mr. Reed made a passing reference to it?

A. I think I made a passing reference to it. I might say when I say "it," not to the employment contract, but to the kind words of the first sentence of paragraph 3.

Q. Was paragraph 3, as you view it, any part of the alleged interference by the Tool Company with the affairs of TWA?

A. I just think this whole thing was part of a war of nerves, a campaign to put pressure on TWA to get TWA to forego the Boeing program.

Q. In other words, when you identified this letter [5658] which has been marked Exhibit 11F, as part of the interference into the affairs of TWA, you do not have in mind any particular part of the letter, it is the letter in its entirety, is that correct?

A. Yes, I think the letter in its entirety was a calculated pressure move to bring about the interruption of the Boeing program.

SIMPSON THACHER & BARTLETT
120 BROADWAY
NEW YORK 5, N. Y.

Commerce Building
1700 K Street, N.W.
Washington 6, D. C.

May 16, 1961

The Board of Directors
Trans World Airlines, Inc.
New York, N. Y.

Dear Sirs:

We have been retained to advise Hughes Tool Company in connection with matters pertaining to its beneficial ownership of approximately 78% of the outstanding common stock of Trans World Airlines, Inc. (TWA), and in connection with its acquisition and possible distribution of debentures to be acquired by it from TWA, pursuant to the offering described in a registration statement filed with the Securities and Exchange Commission (File No. 2-17847).

Based on a limited investigation to date, we are concerned that said registration statement may be deficient in certain material respects, and that our client may be subjected to liabilities under the Securities Act of 1933, even though it has not participated in the preparation of said registration statement and has not been consulted with respect to its contents.

In the circumstances, we must request an opportunity to present to the persons constituting the Board of Directors of TWA various matters which require consideration [19143] before the contemplated registration statement becomes effective. Some of these matters are based upon

the position of our client with respect to action taken by the management of TWA since the establishment of a Voting Trust at the insistence of certain lending institutions presently controlling the Voting Trustees, and with respect to the fiduciary duties and obligations which said lending institutions, the Voting Trustees and the Board of Directors elected by the Voting Trustees, owe to our client as the beneficial owner of more than 78% of the presently outstanding common stock of TWA.

We have been requested by our client to make every effort to resolve in an amicable manner any difference of opinion which may exist, and we would welcome an opportunity to discuss these matters with such persons as you may designate. Please communicate with Mr. Chester C. Davis in connection with this matter.

Very truly yours,

SIMPSON THACHER & BARTLETT

Defendant's Exhibit 11-B.

[19144]

May 19, 1961

Re Registration Statement of Trans
World Airlines, Inc.
(Registration No. 2-17847)

Trans World Airlines, Inc.
380 Madison Avenue
New York, N. Y.

Attention: Mr. Charles C. Tillinghast, Jr., President

Securities and Exchange Commission
Washington 25, D. C.

Attention: Mr. Ralph C. Hocker

Gentlemen:

At the hearing held before the Securities and Exchange Commission on Thursday, May 18th, relating to the request of Trans World Airlines, Inc. (TWA) that the effective date of the above Registration Statement (Registration Statement) be accelerated so as to become effective on May 18, 1961 and the objection made by Hughes Tool Company (Toolco) to the entry of an order granting such request, this firm was directed by the Commission to confirm to TWA and to the Commission in writing today certain undertakings made by this firm at such hearing on behalf of Toolco, and was further directed to provide TWA with a detailed statement as to the respects in which [19145] the Registration Statement may be deficient. This letter is being delivered in response to and, to the best of our ability and knowledge at the present time, in compliance with such direction.

Defendant's Exhibit 11-B.

Mr. Chester C. Davis, a member of this firm, was retained on Monday, May 15, 1961 to advise Toolco in connection with matters pertaining to its beneficial ownership of 78% of the outstanding Common Stock of TWA and in connection with its acquisition and possible distribution of that portion of the 6-½% Subordinated Income Debentures (Debentures) with Common Stock Purchase Warrants (Warrants) attached to be offered by TWA to its stockholders as set forth in the Registration Statement which Toolco is obligated or entitled to acquire pursuant to existing agreements with TWA. Up to the present time Mr. Davis is the only person associated with this firm authorized by Toolco to commit Toolco with respect to any of the matters hereinafter set forth. This firm had not been previously retained by Toolco for any purpose. On Monday, May 15, 1961, this office undertook an examination of the extensive documentary material relating to the rights and relationships between Toolco and TWA and the information contained in the Registration Statement filed by TWA with the Commission. At that time the only Registration Statement available for examination by this firm and to other representatives of Toolco available in New York City were the Registration Statement originally filed with the Commission on or about [19146] March 30, 1961, Amendment No. 1 filed May 11, 1961 and Amendment No. 2 filed May 12, 1961. On the following day we requested and received from counsel for TWA copies of exhibits to the Registration Statement.

On this same day, Mr. Davis met with Mr. Forrester, an officer of Merrill Lynch, Pierce, Fenner & Smith, Incorporated (Merrill Lynch) and two members of the firm of Shearman & Sterling, who were acting as counsel for Merrill Lynch, to consider a proposal contemplating the formation of an underwriting syndicate by Merrill Lynch to purchase from Toolco and distribute to the public Deben-

tures and Warrants to be acquired by Toolco from TWA pursuant to the agreements referred to above.

We are informed and believe that Toolco on Wednesday, May 10, 1961 for the first time decided to make a public distribution of the securities being offered by TWA to its common stockholders, and immediately thereafter negotiations were undertaken on behalf of Toolco with Merrill Lynch. At that time Merrill Lynch advised Toolco that it was prepared to undertake to form an underwriting syndicate for such a public distribution, provided that TWA would delay the effective date of its Registration Statement for one week, and with certain commitments by Toolco in satisfactory form. We are further informed and believe that Merrill Lynch discussed its proposal with Mr. Tillinghast, President of TWA, [19147] on Friday, May 12, 1961, with a request for the necessary postponement, after having discussed this matter with counsel for TWA, counsel for the Voting Trustees and Mr. Leslie, Financial Vice President of TWA, on the preceding day, Thursday, May 11, 1961. At that time Merrill Lynch was proposing to form an underwriting syndicate for a firm underwriting which would insure the receipt by TWA of more than $11,000,000 of new money at no cost to TWA, such cost to be borne entirely by Toolco.

On Monday, May 15, 1961, we were advised by Merrill Lynch that action on its proposal, including a possible postponement of the effective date of the Registration Statement, would be considered at a meeting of the Board of Directors of TWA to be held on Wednesday, May 17, 1961, and that any action on our part or any communication on our part to TWA or its counsel relating to possible deficiencies as to the Registration Statement then on file with the Commission would jeopardize favorable consideration by the Board of TWA. Mr. Forrester stated to representatives of Toolco, including Mr. Howard Hughes, the sole

owner of Toolco, that in its judgment, based in part on conversations with TWA or its representatives, this firm should not take a position or communicate with TWA or its counsel with respect to the adequacy of the Registration Statement until the Board of Directors of TWA, at a meeting to be held on Wednesday, May 17, had had an [19148] opportunity to consider and act upon the proposal and request of Merrill Lynch. At the same time Mr. Davis was requested by Merrill Lynch and its counsel to take appropriate steps to obtain the necessary corporate authority of Toolco so as to enable Mr. Holliday, a Vice President of Toolco, to enter into an appropriate firm commitment between Toolco and Merrill Lynch with respect to the public distribution desired by Toolco. The requirements of Merrill Lynch in this regard occupied Mr. Davis and others associated with this firm until approximately 1 A.M. Tuesday, May 16, 1961. In the meantime, another member of this firm and several other associates began to review the Registration Statement then available to this firm. There are attached as Exhibits A and B hereto certified copies of the excerpts of the minutes of the Board of Directors of Toolco adopted on Monday, May 15, 1961, and letter dated May 16, 1961 executed by Mr. Holliday and delivered to Merrill Lynch the evening of May 16, 1961.

We are informed and believe that copies of Exhibits A and B were delivered to TWA or its president advised of their existence on or before the meeting of the Board of Directors of TWA on May 17th. In the evening of Monday, May 15th, Merrill Lynch advised Toolco and Mr. Davis that it had made arrangements to meet with responsible representatives of TWA in the morning of Tuesday, May 16th, for the purpose of discussing further the merits of their proposal, its advantages [19149] to TWA, and their opinion that there could be no disadvantage to TWA in consenting to the requested postponement of the effective

date of the contemplated Registration Statement and offering. In order to eliminate a problem presented by Merrill Lynch to Toolco which had been discussed by Merrill Lynch with TWA or its counsel or counsel for the Voting Trustees, with respect to an assurance that the interest coupons on the proposed Debentures would be paid on June 1, 1962, Mr. Davis with other representatives of Toolco undertook to commit Toolco to provide the necessary funds in cash, in trust, to be available to Merrill Lynch, to assure such payment. The corporate action taken by Toolco in that regard is reflected by Exhibits A and B.

On Tuesday noon of May 16, 1961, Mr. Forrester of Merrill Lynch informed Mr. Davis that instead of meeting with representatives of TWA he desired a further meeting and conference with Mr. Davis and other representatives of Toolco to be held at 2 o'clock of that afternoon. Such a meeting, which lasted until after 4:30 of that afternoon, was held and attended by Mr. Davis. In that conference, Merrill Lynch expressed confidence that TWA would favorably consider the proposal submitted to it by Merrill Lynch. At the same time, Merrill Lynch and its counsel advised Toolco that any assertions by it with regard to deficiencies in the Registration Statement or in connection with possible [19150] claims arising out of the relationship between TWA and Toolco would seriously jeopardize the prospects for favorable consideration of the Merrill Lynch proposal by the Board of Directors of TWA. Merrill Lynch assured Mr. Davis and other representatives of Toolco that it was convinced that the Merrill Lynch proposal would receive full and fair consideration by the Board of Directors of TWA at the meeting to be held on Wednesday, May 17. Believing that TWA, having everything to gain and nothing to lose, would postpone the effective date of the Registration Statement and accept the Merrill Lynch proposal, Toolco instructed this firm to defer presentation of matters

of concern to us until after action by the Board of Directors of TWA, in the expectation that there would be adequate opportunity at such time to suggest revisions of the Registration Statement and permit consideration by TWA and Toolco of their respective positions upon various aspects of their prior relationship.

Some time after 6:00 P.M. of the evening of Tuesday, May 16, 1961, Mr. Forrester advised representatives of Toolco that a meeting had been had with Mr. Breech, Chairman of the Board, and Mr. Tillinghast, President of TWA, and that TWA had received a further presentation by Merrill Lynch. It now appears as a matter of record before the Commission that on Tuesday, May 16, 1961, there [19151] was filed Amendment No. 3 (hereinafter referred to as the Prospectus) to the Registration Statement, containing the statements appearing on page 4 thereof that a request for postponement of the contemplated offering had been received on May 11, 1961 and that TWA "has not agreed to such a postponement".

This firm on the morning of May 18, 1961 received a copy of the preliminary prospectus dated May 16, 1961. This Prospectus was the latest information available to this firm at the time of the hearing before the Commission on the evening of May 18th. This firm knew that there had been filed Amendment No. 4. A request to counsel for TWA was made for a copy of said Amendment No. 4 which was rejected or, at least, not complied with prior to said hearing. During the course of May 18th this firm was informed that on that day TWA had also filed Amendment No. 5. All statements and positions taken by or on behalf of Toolco at the hearing and in this letter were and are based upon what appears in the Prospectus.

Up until 7 P.M. on May 19th, Mr. Davis had been continuously occupied on urgent matters on behalf of Toolco, including efforts relative to arrangements for an under-

writing syndicate to participate in a public distribution of Toolco's share of the TWA offering and, being the only individual of this firm familiar with all the [19152] facts, was not able to commence consideration of the statements appearing in this letter and to correct drafts prepared by his partners and associates until that time. This firm has not had an adequate opportunity to inquire into or investigate the facts set forth in the Prospectus or any omission to state material facts therein.

Prior to the hearing, Toolco's representative stated to Mr. Reed of Hughes, Hubbard, Blair & Reed, representing the Voting Trustees, that Toolco was prepared to offer to TWA to reimburse it for any expenses incurred by TWA caused by the postponement requested by Merrill Lynch, such as the reprinting of Warrants or other documents containing a date which would have to be changed. At the hearing before the Commission Mr. Davis, with authority from Toolco and Mr. Hughes, restated such offer. The offer was not accepted by TWA and instead counsel for TWA vigorously resisted the efforts of Toolco for a reasonable delay. It is not clear to this firm whether the ruling or decision by the Commission in refusing to grant the request of TWA for acceleration of its Registration Statement was conditioned upon the payment by Toolco to TWA of such expenses or whether Toolco is obligated to continue its offer for a particular period of time. In order to avoid [19153] any misunderstanding, Toolco hereby renews until 10 A.M. E.D.S.T. Monday, May 22, 1961, its offer to pay such expenses. Toolco will in any event pay such expense if the payment thereof is a requirement of the Commission. This firm as counsel for Toolco does not, however, recognize that the imposition of such a condition by the Commission would be proper. In that connection, Toolco hereby notifies TWA that it questions the reasonableness of the estimated $600,000 for expenses set forth in Part II of the Registration Statement.

Defendant's Exhibit 11-B.

This firm will use its best efforts to furnish TWA and the Commission all information available to it which it considers pertinent to the preparation of a corrective amendment to the Registraiton Statement. When a corrective amendment has been filed which in our opinion complies with the requirements of the Securities Act of 1933 and regulations promulgated thereunder by the Commission, we will advise our client Toolco to join in a request for acceleration, provided that by so doing Toolco's legal and equitable rights are not prejudiced. This firm reserves an unqualified right to advise its client to refuse to acquiesce in, or to object to, any [19154] Registration Statement filed by TWA which has not received the prior affirmative consent in writing of Toolco.

Mr. Davis, who is approving this letter, states that based upon every fact known to him to date, including conversations had with Mr. Howard Hughes and other representatives of Toolco, the position being taken by Toolco is not a device or an effort on the part of Toolco to interfere with the offering contemplated by TWA to its common stockholders. The positions being taken by Toolco in that regard are the direct result of advice given by Mr. Davis of this firm to Toolco since Monday, May 15th. Mr. Davis was authorized by Toolco to make each and every representation made by him at the aforesaid hearing. Each statement of fact made by Mr. Davis at the said hearing was true to the best of his knowledge and belief.

As previously indicated, Toolco is the owner of 78% of the outstanding common stock of TWA and this stock is currently in a voting trust. This firm is currently investigating the circumstances in which Toolco was required, coerced, compelled or induced to place this stock in such voting trust. We have tentatively reached the [19155] conclusion that this voting trust was required, in circumstances not yet fully determined, by certain lending insti-

tutions and that, notwithstanding the legal power to act vested in the voting trustees, such voting trustees are under a fiduciary obligation to the common stockholders, including Toolco as the beneficial owner of common stock, to carry out the purposes of said voting trust within its lawful scope. Based upon information available to us which is admittedly incomplete, it is a tentative conclusion of this firm that said voting trust, if lawful, was entered into for the limited purpose of securing or protecting the lending institutions. In that connection, it is our understanding of the provisions of the voting trust agreement and related documents that the lending institutions have the absolute right to remove two of the three voting trustees for any reason whatsoever, the third voting trustee being designated by Toolco.

Contractual commitments entered into between TWA and Toolco in the so-called 1960 financing obligate TWA to make the contemplated offering on or before May 31, 1961. Toolco obligated itself to subscribe to this offering, including any amount unsubscribed for by the public, up to $100,000,000, and retained the right to subscribe to the remaining $11,000,000 or thereabouts. It will be noted that [19156] the obligation of TWA to make this offering on or before May 31 is, as we understand it, pursuant to a contractual obligation between TWA and Toolco. It should be further noted that Toolco has the right and option to subscribe to this offering by tendering 6½% interim notes heretofore issued by TWA and presently owned by Toolco. It is the present belief of this firm that in the circumstances here present Toolco is not covered by the Commission's Rule 142. It is also the present belief of this firm that Toolco may be exposed to possible liabilities under the Securities Act of 1933 by reason of the provisions of Section 15 and Section 2(11) of said Act. It will be noted that TWA has not given and refuses to give Toolco any indem-

nification agreement against liability by reason of the statements or omissions in the Registration Statement.

Although legal representatives of TWA or of the voting trustees have indicated to Mr. Davis in a general way that TWA would cooperate with Toolco in the preparation of a registration statement in the future should Toolco delay its present plans to make a public distribution of the securities it is entitled to obtain under the contemplated offering by TWA to its common stockholders, it is out understanding that no contractual obligation exists in this regard. It was also indicated by such [19157] representatives that, in connection with the preparation by TWA of any such future registration statement for use in an offering of securities to be made by Toolco, an agreement of indemnity and indemnity bond would be required by TWA.

In order that TWA may commence promptly the necessary steps to correct what we believe to be material deficiencies in the Prospectus, we confirm the comments heretofore made to TWA and which were stated to the Commission on May 18. All interested parties must understand, however, that these comments do not purport to be complete. They represent all the comments which this firm is in a position to make within the time limitations imposed by the Commission based upon all the facts currently available to this firm.

Toolco, on advice of this firm, has not acquiesced to the request for acceleration of the effective date of the Registration Statement filed by TWA on May 17 or May 18. Counsel for TWA argued before the Comfnission that Toolco had deliberately delayed in presenting its objections to the Prospectus. Such an argument is, we believe, unwarranted. The preliminary Registration Statement filed by TWA on March 30, 1961 did not contain any reference to the purchase of Boeing aircraft or to a credit arrangement involving some $147,000,000. At that time Toolco had no

intention to [19158] make a public distribution of any securities of TWA. Moreover, Toolco was without counsel experienced in matters of this kind until this firm was retained on Monday, May 15, 1961.

In the circumstances hereinabove described, we reserve the right to modify, correct or supplement any of the statements of fact hereinafter set forth relating to existing deficiencies. Each and every statement of fact herein appearing is, however, in accord with the knowledge and information available to Mr. Davis of this firm after as much inquiry and investigation as to those facts as time would permit.

1. At page 22, under the heading "Voting Trust", the identity of the lending institutions which appointed and have the unlimited power to remove Mr. Breech and Mr. Olds as voting trustees should be disclosed, since such lending institutions are in control of said voting trustees who constitute a majority of the voting trustees. Moreover, at page 14, under the heading "Introduction of Jet Aircraft", the lending institutions negotiating with TWA with respect to the financing of approximately $147,000,000 should be identified. We understand that those lending institutions are identical with those controlling the voting trustees, with the exception of the addition of one insurance company which we believe to be [19159] The Prudential Insurance Company of America. It is our view that (a) the lending institutions controlling the voting trustees should be described as controlling persons or "parents" of TWA and (b) that current negotiations with respect to this financing of $147,000,000, believed to be in the form of a private placement, constitute self-dealing. In that connection Toolco is informed and believes that said lending institutions propose to include as a condition in said financing a provision that in the event the voting trust is termi-

nated, even in accordance with its terms, the repayment of said $147,000,000 will be accelerated and immediately become due and payable.

2. It is the position of Toolco that the Board of Directors of TWA are subservient to the majority voting trustees who are controlled by the lending institutions. It is the further contention of Toolco that the lending institutions are primarily interested in the repayment of an existing loan to TWA in the amount of approximately $165,000,000. It is the further position of Toolco that the lending institutions, the majority voting trustees, and a controlling majority of the present Board of Directors of TWA are disregarding the best interest of the owners of the beneficial interest in the Common Stock of TWA. The position of Toolco with respect to the above is currently under investigation by this firm. It is the [19160] belief of this firm that those presently in control of TWA may have conflicting interests in relation to the management of the affairs of TWA or that from time to time such conflicting interests may develop. We believe that the Prospectus should disclose the understanding of the majority Voting Trustees with respect to the nature and extent of their duties to the lending institutions having the power to remove them from office, and to the beneficial owners of TWA; and that it should disclose the basis of that understanding, and all pertinent instructions by the lending institutions to the majority Voting Trustees or by the Voting Trustees to the members of the Board of Directors controlled by the majority Voting Trustees.

3. Under the heading "Voting Trust" at page 22 of the Prospectus, the statement relating to the circumstances in which the Voting Trust terminates is inadequate in that it does not describe the right of Toolco to repay the lending

institutions and thereby to cause a termination of the Voting Trust.

4. At page 23 of the Prospectus there appears an excerpt from a statement by the Civil Aeronautics Board. This firm is not fully familiar with the proceeding in which such statement was made, except that we understand that it was in connection with the arrangements commonly described as the 1960 financing, nor have we had an [19161] opportunity to study the adequacy of the disclosure reflected by the excerpt of the statement of the Board. Apparently the excerpt quoted in the Prospectus is designed to indicate that the Board, under the Federal Aviation Act of 1958, would have to take appropriate action under that Act in connection with any reassumption of control by Toolco over TWA by reason of its stock ownership. The quoted excerpt from an opinion of the Board is made without any statement as to the position of the present management of TWA or of its counsel as to their opinion, if any, with respect to the right of Toolco to reacquire the right to vote the shares of Common Stock it beneficially owns.

If it is the view of TWA or of the Commission that it is material to disclose to the public the possibility or probability that the Voting Trust may terminate and Toolco reacquire the right to vote the shares of stock it beneficially owns, then a more complete statement of the facts and circumstances with respect to the creation of the Voting Trust would be appropriate. It is the position of Toolco that it was compelled to enter into the Voting Trust under conditions which would warrant a termination of the Voting Trust otherwise than in accordance with the terms of the arrangements under which it was created. This position of Toolco is presently under in- [19162] vestigation by this firm. The information available to this firm in that regard is presently considered to be inadequate for the expression of an opinion. It is noted, however, that the lending insti-

tutions involved required that Toolco pay a penalty of 22% should Toolco choose to avail itself of the right to repay the full amount of the principal and interest due to the lenders. This circumstance leads us to believe that the contention of Toolco warrants careful consideration.

5. At page 14 of the Prospectus a statement appears which fairly implies, if it does not specifically state, that TWA during 1960 obtained from jet operations the same percentage of operating revenue as did its competitors. At page 20 of the Prospectus, however, a statement appears to the effect that, during 1960 and in the first quarter of 1961, TWA's share of domestic passenger traffic declined solely by reason of an alleged delay in the delivery to TWA of Convair 880 jet aircraft. It is the opinion of Toolco, which seems to us to be justified, that the statement appearing at page 20 of the Prospectus is misleading in that it fails to recognize that there were factors responsible for the traffic decline there mentioned other than delays in the delivery of Convair 880's. If in fact this decline was due solely to delays in the delivery of Convair 880's, the public could be led to believe that [19163] the condition would be non-recurring. If, on the other hand, this decline were caused by other factors which could be recurring, the true nature of the factors causing a passenger traffic decline during 1960 and the first quarter of 1961 should be disclosed. The information with respect to the responsible factors is peculiarly within the possession of TWA.

6. Referring to paragraph 5 above, the nature and extent of the delays in delivery of aircraft referred to at pages 20 and 22 of the Prospectus should be disclosed. If the delays referred to therein did in fact cause a substantial passenger traffic decline, the investing public should be advised of the detailed facts so that it may evaluate the

possibility or probability of delays in delivery of the Boeing aircraft which the present management of TWA proposes to commit the Company to purchase, as described on page 14 of the Prospectus. Furthermore, as will be hereinafter indicated, the availability to TWA of Convair 990's and 880's through Toolco at dates earlier than deliveries of any Boeing aircraft is a material fact which should be disclosed.

7. Since a substantial number of Convair jet aircraft are available to TWA by reason of the efforts and commitments heretofore made by Toolco, the Prospectus [19164] should contain appropriate statements covering: (a) whether the present management of TWA intends to avail itself of the opportunity to acquire such Convair equipment; (b) whether the Boeing equipment to be acquired is in addition to or in lieu of the Convair equipment; (c) the probable delivery schedules of Convair equipment as compared with Boeing equipment. Information with respect to the above should be provided particularly in view of the statements now appearing in the Prospectus as to the materiality and effect of delays in the delivery of jet aircraft.

8. Mr. Holliday, a Voting Trustee and Director, and the representative of Toolco, refused to subscribe to the Registration Statement and withdrew the power of attorney given by him to the Chairman of the Board of TWA. This fact should be disclosed, together with the facts and circumstances relating to such withdrawal. We are informed that at the meeting of the Board of Directors of May 17, 1961 Mr. Holliday stated that on advice of counsel he would not assume responsibility and liability as a director for the statements and omissions in the Prospectus. It seems to us that the action of Mr. Holliday, a representative of Toolco, is a material fact to be disclosed.

Defendant's Exhibit 11-B.

9. Under the caption "Summary of Consolidated Operations" at pages 8-10, footnote J states that the [19165] maximum annual interest requirements on the Debentures will be $7,230,333.50. This footnote would convey the impression that the interest requirements of the Debentures together with other interest requirements on long term debt, which are shown as $4,000,000 in 1960 in the table on page 9, are substantially exceeded by operating revenues. It is the understanding of Toolco that the annual interest requirements on indebtedness senior to the Debentures, which is described in the capitalization table, aggregates in excess of $10,000,000 and that the aggregate interest requirements upon such indebtedness together with the contemplated Debentures will be approximately equal to or somewhat in excess of the operating profits for the year 1960. In that connection, it seems to us that it would be desirable, if not necessary, to indicate the probable interest obligation which may develop by reason of the financing program of approximately $147,000,000 now underway with the lending institutions in control of TWA relating to the Boeing purchase program.

10. Under the heading "Agreement with Hughes Tool Company Concerning $50,000,000 Revolving Credit", appearing at page 24 of the Prospectus, reference is made to an obligation of Toolco to provide TWA with a revolving [19166] credit of $50,000,000 through the last day of the month next following the month in which TWA takes delivery of and pays for the last of the 20 Convair 880's theretofore mentioned in the Prospectus. We do not find any statement disclosing the date or estimated date when this obligation is likely to terminate. We are advised by Toolco that it believes that its obligation under that revolving credit agreement is likely to terminate on or

before September, 1961. This termination date is dependent upon a delivery schedule best known to Convair. Toolco does not know what inquiry, if any, has been made by TWA of Convair with respect to such schedule. In view of the inportance of this matter by reason of the amount involved, it seems to us that TWA should determine and disclose the probable termination date of this revolving credit.

11. Under the heading "Remuneration" the Prospectus discloses an employment contract with Mr. Tillinghast. Toolco objects to the terms of that employment contract and hereby notifies TWA that it has requested us to consider the possibility of action with respect to it. Toolco questions the necessity for entering into such a long-term contract in order to obtain the services of an adequate chief executive, and questions the propriety of action by the lending institutions, the majority Voting Trustees and the controlling [19167] members of the Board of Directors, elected by the majority Voting Trustees, to impose upon TWA such long-term obligations surviving the termination of the voting trust. We have not had an opportunity to consider the merits of these matters. Toolco further believes, and we concur, that the Prospectus should disclose any relationships or business dealings which may have previously existed between Mr. Tillinghast and any of the lending institutions or the majority Voting Trustees or corporations controlled by either of them.

12. With respect to the heading "Litigation" appearing on page 38 of the Prospectus, Toolco hereby notifies TWA that it is contemplating, and that this firm is investigating, the possibility of commencing an action, as the beneficial owner of approximately 78% of the Common Stock of TWA, against (a) the lending institutions controlling TWA, (b)

the majority Voting Trustees, and (c) the individual directors controlled by the majority Voting Trustees. Toolco is also contemplating, and this firm is investigating, the commencement of an action against the lending institutions relating to the terms and conditions imposed upon TWA and Toolco in connection with the 1960 financing and other matters which may affect the validity of the existing voting trust. Toolco has also requested [19168] this firm to investigate the possibility of enjoining the consummation of the Boeing purchase transaction described at page 14 of the Prospectus, or of taking action on behalf of TWA against the persons responsible for any commitments incurred or damage suffered by TWA in connection with such program, on the ground that such program (a) is contrary to the best interest of the stockholders of TWA, (b) has been promoted for the benefit of certain lending institutions, and (c) has been promoted for the purpose of interfering with the ability of TWA to discharge the indebtedness incurred in connection with the 1960 financing program and thereby to terminate the voting trust pursuant to its terms. This firm is not in a position at this time to disclose the information it has obtained to date. It is our view, however, that the very existence of such claims is of sufficient materiality to be required to be disclosed in the Prospectus.

In view of the limited period of time allowed to counsel for Toolco in the preparation of this letter, the above may not be assumed to be a full or complete description of the nature of the claims which Toolco may assert. The above is stated primarily for the purpose of advising the interested parties as well as the Commission that Toolco has disclosed to us within the past few days material information which justifies careful consideration by this firm as to the existence of meritorious claims of the nature indicated.

[19169] 13. Throughout the relationship between Toolco and TWA prior to the establishment of the voting trust it

was the practice of Toolco to investigate the need of TWA for and place orders for modern types of equipment for the ultimate use and benefit of TWA. At the present time, Toolco has on order 17 Convair jet aircraft, of which 13 are Convair 990's to be delivered on schedules comparable to scheduled deliveries to American Airlines, Inc., one of TWA's major competitors. Negotiations are in progress between TWA and Toolco for the acquisition by TWA of four Convair 880's on order by Toolco, but such negotiations are not disclosed in the Prospectus. With respect to the Convair 990's Toolco believes that these aircraft will be superior in speed and adaptibility to other available jet aircraft, including Boeing equipment proposed to be purchased by TWA, and will therefore be better suited to the needs and requirements of TWA than such Boeing equipment. Furthermore, the Convair equipment could be delivered to TWA and placed in service and effective utilization ahead of such Boeing equipment. Based upon information made available to us by Toolco, it appears that there may be a basis upon which TWA may assert an equitable right to the Convair equipment on order by Toolco; information made available to us by Toolco in this regard may not be disclosed at this time to the extent requested by the Commission, because a disclosure at this time of the [19170] information made available to us, without further investigation on our part, could be prejudicial to the interests of our client. The existence of such a right would be a material fact because of the definite advantage which would flow to TWA should TWA request and receive such equipment from Toolco. It also appears that the Convair equipment was ordered by Toolco with full knowledge on the part of operating personnel of TWA. Accordingly, TWA should state in the Registration Statement whether or not it claims such a right and whether or not it intends to ask Toolco to make such equipment available to it. Toolco

is satisfied that TWA has known for some time that the Convair equipment was available to it and hereby confirms to TWA that all or part of such equipment is available to it to the extent that the same may be needed by TWA. An unresolved question exists whether TWA is obligated to purchase such Convair equipment from Toolco at approximately its cost plus interest on invested funds. Toolco has requested this firm to review the pertinent facts and to advise as to the existence of such an obligation. We have not had an opportunity to commence the investigation so requested. The aggregate ultimate cost of the Convair equipment on order by Toolco is in excess of $75,000,000, and it is the position of Toolco that the possible existence of such an obligation on TWA should be disclosed in any registration statement to which Toolco [19171] may acquiesce. In addition, it should be stated in the Registration Statement whether or not the Boeing equipment recently ordered by TWA would be required or could be effectively utilized in the event that TWA is found to be obligated to purchase from Toolco the Convair equipment on order by it.

Very truly yours,

SIMPSON THACHER & BARTLETT

Attention of Ronald Duckworth, Secretary

Trans World Airlines, Inc.,
380 Madison Avenue,
New York 17, N. Y.

Dear Sirs:

In connection with our investigation of the matters set forth in the letter to you and the Securities and Exchange Commission dated May 19, 1961, we wish to obtain from you the following documents:

1. A copy of the Company's Certificate of Incorporation;
2. A copy of the Company's By-Laws;
3. A copy of all Minutes of all meetings of the Board of Directors since the institution of the Voting Trust Agreement;
4. Copies of all reports presented to the Directors or circulated at meetings of the Board.

Very truly yours,

CHESTER C. DAVIS

Re: Registration Statement of Trans World Airlines, Inc. (Registration No. 2-17847)

Attention of Mr. Ralph C. Hocker

Securities and Exchange Commission
Washington 25, D. C.

Dear Sirs:

This will confirm my telephone conversation with Mr. Hocker yesterday afternoon with respect to the above Registration Statement of Trans World Airlines, Inc.

As I told Mr. Hocker, my client, Hughes Tool Company, disclaims any liability or responsibility with respect to said Registration Statement or any statements which appear therein, or omissions therefrom. Said Registration Statement was prepared without consultation with or approval by Hughes Tool Company or its counsel. Furthermore, Hughes Tool Company has not acquiesced in, nor does it acquiesce in, the acceleration of the effective date of said Registration Statement. However, based upon a limited review of Amendment No. 6 thereto, and Amendment No. 7 which was received by me late yesterday afternoon, Hughes Tool Company has no desire to delay appropriate action by the Securities and Exchange Commission, in the [19175] circumstances, making said Registration Statement effective. At the time I called Mr. Hocker, I had no information that the Commission had either already acted or was about to act with respect to said Registration Statement.

I also pointed out to Mr. Hocker that the statement appearing on page 25 of Amendment No. 6 to the effect that the delivery of the last of the Convair 880s was presently expected to occur by late summer of 1961, was substantially in accord with the latest information available to me from Hughes Tool Company as to its understanding, and was in accord with the information set forth in the letter of May 19, 1961. This information, however, and the understanding of Hughes Tool Company in that regard, is not based on recent information received from Convair. I advised Mr. Hocker that it should be understood by all concerned that although Hughes Tool Company does not question the accuracy of the statement made by Trans World Airlines, Inc. in that regard, such statement may not be based properly on anything stated in the May 19 letter.

I also pointed out to Mr. Hocker that the material appearing under the caption "Voting Trust" may not completely reveal the extent to which the two insurance companies named have been, and presumably continue to be, in control of the [19176] voting trustees, because the facts necessary for an intelligent application of the provisions of paragraph 3 of the Noteholders' Agreement dated as of December 1, 1960 are not, I believe, disclosed. I also stated to Mr. Hocker that the above comments were only for the guidance of the Commission and its staff. At the conclusion of our telephone conversation, I inquired if it was appropriate to be informed as to the current status of the Registration Statement, because I had received no information from TWA with respect thereto. Mr. Hocker then informed me that the Registration Statement either had become effective or was about to become effective at 5:30 p.m. of that day, May 24, 1961.

I am sending a copy of this letter to Trans World Airlines, Inc. attention of Mr. Charles C. Tillinghast, Jr., President, and to its counsel, Messrs. Chadbourne, Parke, White-

side & Wolff, and to Messrs. Hughes, Hubbard, Blair & Reed, counsel for the Voting Trustees, for their respective information.

Very truly yours,

CHESTER C. DAVIS

Attention of Mr. Charles C. Tillinghast, Jr.
President

Dear Sirs:

On behalf of the Hughes Tool Company, we request that there be made available to us, not later than the close of business on Friday, May 26, 1961, all papers relating to the proposed additional financing by Trans World Airlines, Inc., in the amount of $147 million referred to on page 14 of its Prospectus. We particularly request drafts of any loan agreements or other documents relating to this financing.

Very truly yours,

CHESTER C. DAVIS

Attention of Mr. Charles C. Tillinghast, Jr.
President

Trans World Airlines, Inc.,
380 Madison Avenue,
New York 17, New York.

Dear Sirs:

On behalf of the Hughes Tool Company, we request that the following information with respect to the proposed purchase of Boeing aircraft by Trans World Airlines, Inc. (TWA), as described at page 11 of TWA's Prospectus, be furnished to us immediately by telephone or telegraph:

1. Has TWA received from Boeing Airplane Company an extension of the time within which to make arrangements for the financing of the purchase of such aircraft?

2. Has TWA requested any such extension of time and, if so, what response, if any, has been received from Boeing Aircraft Company?

3. Does TWA presently intend to request such an extension of time prior to May 31, 1961?

Very truly yours,

CHESTER C. DAVIS

To: Irving Trust Company as Agent for the Holders of the Equipment Notes of Trans World Airlines, Inc.

The Equitable Life Assurance Society of the United States

Attention: James F. Oates, Jr., Chairman and President

Metropolitan Life Insurance Company

Attention: Frederic W. Ecker, Chairman

The Board of Directors of Trans World Airlines, Inc.

Mr. Ernest R. Breech
Mr. Irving S. Olds
Mr. Raymond M. Holliday,
Voting Trustees.

Dear Sirs:

This letter is to confirm and supplement certain positions stated on behalf of Hughes Tool Company ("Toolco") in the letter of May 19, 1961 to Trans World

Airlines, Inc. ("TWA"), a copy of which is enclosed herewith.

It is the desire of Toolco to confer with you or your representative as soon as possible with the objective of working out an amicable solution wherever [19180] there may be a difference of opinion.

At the outset it is the position of Toolco that its title record of ownership of more than 78% of the outstanding common stock of TWA was put in a voting trust at the insistence of certain lending institutions and with the acquiescence of Toolco in order to assist the financing program of TWA and for the limited purpose of assuring the lending institutions the repayment in accordance with their terms of certain notes of TWA to be acquired by such lending institutions.

It is therefore the position of Toolco that the voting trust and related agreements are proper and lawful only when construed within the limits hereinabove described. It was not the purpose or intention of Toolco in placing its stock in a voting trust to confer upon others the unrestricted right to deal with the property interests of Toolco represented by its ownership of TWA.

Under paragraph 3 of the Noteholders' Agreement, the lending institutions holding the majority of said notes have the absolute right for any reason whatsoever to remove two of the three voting trustees and to select their successors, and thus have absolute control over such voting trustees and TWA. It is my understanding that at the present time two insurance companies, namely, Metropolitan Life Insurance Company and Equitable Life [19181] Assurance Society of the United States, own a majority of said notes and that they therefore have such absolute control. It would seem obvious that the lending institutions represent an interest different from, and at times adverse to, the interest of the owners.

Defendant's Exhibit 11-F.

The voting trustees, as I understand it, have elected a majority of the present directors of TWA who are removable without cause under the by-laws of TWA at the will of a majority of the stockholders of TWA. In the circumstances here present, therefore, the present Board of Directors is biddable and subservient to the voting trustees who, in turn, are biddable and subservient to the lending institutions and to the direction of Irving Trust Company as the agent of the lending institutions.

It is the position of Toolco that the present directors of TWA are confronted with the necessity of attempting to serve two masters, namely, the owners of TWA and the interest of the lending institutions; and that, in fact, since the voting trust has been established, the Board of Directors has ignored the interest of the owners and has been entirely subservient to the will and wishes of the voting trustees. It is the further position of Toolco that the normal concept that a Board of Directors may act in accordance with its independent [19182] judgment is not applicable to preclude the need for consultation in the instant situation and that the concept must be applied in such way as to do equity among the interested parties.

Toolco recognizes that the present Board of Directors of TWA has a duty or obligation to the lending institutions with respect to matters which may have an effect on the repayment of the notes held by them; at the same time, it is the position of Toolco that the lending institutions, the voting trustees, and the directors, also have a fiduciary duty and obligation to be responsive to the interests of the owners of TWA, including Toolco which continues to be the owner of more than 78% of TWA. In the circumstances here present, Toolco, in equity, would seem to be entitled to be consulted on business decisions which vitally affect its ownership interest in TWA because normally the directors would be responsive to its ownership interest. Toolco,

is of course also mindful of the minority ownership which has interests, similar to those of Toolco, also requiring protection. In this connection, Toolco believes that with respect to any matter which involves any dealings between TWA and the lending institutions, the directors and voting trustees have a duty and obligation to consult with [19183] and obtain the approval of the owners.

Based upon facts presently known to me, it would seem that the lending institutions, the voting trustees and the directors of TWA, have followed a course of conduct not in accordance with the principles above stated. This is particularly troublesome when decisions are made which are likely to impose on TWA obligations beyond the term of the voting trust. For the purposes of this letter, the term of the voting trust means any time when the voting trust may terminate in accordance with its terms.

In connection with the request for an opportunity to confer with appropriate representatives of the lending institutions, the voting trustees and the individual directors of TWA, you may assume that the representative of Toolco participating in such discussion will be duly authorized and empowered to work out a settlement of the particular problems hereinafter outlined.

Among the specific areas as to which Toolco is primarily concerned at this time, and which it would like to discuss with you or your representatives, are the following:

1. The arrangement with Boeing Airplane Company ("Boeing") for the acquisition by TWA of twenty Boeing 707-131B and six 707-331B jet aircraft. Toolco [19184] strenuously objects to any such commitment by TWA for several reasons, all of which may not be set forth in this letter. Basically, Toolco does not believe that such equipment is best suited to the needs of TWA, particularly when TWA may acquire jet aircraft from Convair pursuant to arrangements heretofore made by Toolco for the benefit of

TWA. Toolco does not understand how the Board of Directors may justify saddling TWA with long-term obligations or equipment contrary to the wishes of the owners of TWA, particularly when such equipment and obligations undoubtedly will extend beyond the terms of the Voting Trust.

The financing program contemplated between TWA and the lending institutions constitutes self-dealing and Toolco objects to the consummation of any such arrangement without its consent. Furthermore, it would seem that the financing program contemplated by TWA would adversely affect the ability of TWA to repay at the earliest possible date the aforementioned notes and thereby terminate the voting trust arrangement. Toolco believes that the equipment available to TWA from Convair is not only more suitable to the needs of TWA than the proposed Boeing equipment but would be more competitive with the equipment to be used by its principal competitors, [19185] and that the Convair equipment would be available to TWA at an earlier date than the Boeing equipment. The current Prospectus of TWA emphasizes the economic advantages of having jet equipment available to it at the earliest possible date.

Toolco has not been consulted with respect to the proposed Boeing commitment and does not appear to have information at this time as to the current plans of TWA. One of the purposes of this letter is to put all of you on notice that Toolco intends to take all action available to it to avoid the irreparable injury which would be caused by consummation of the program disclosed in the current Prospectus relating to the purchase of Boeing equipment and that Toolco, if such program is consummated, will have no alternative but to seek to hold responsible all persons, individual or corporate, who have participated in or controlled the course of conduct followed by TWA.

Toolco hereby requests that you immediately advise the

undersigned as to the status of the program described in the current Prospectus relating to the purchase of Boeing equipment and as to the current negotiations with the lending institutions so that Toolco may have an adequate opportunity to review the same [19186] before they are consummated. In that connection, Toolco hereby requests that the undersigned be furnished with copies of all pertinent documents.

Toolco understands that if the Boeing transaction is not consummated, TWA may lose as a penalty the sum of $850,000 heretofore paid by TWA to Boeing. Even though Toolco was not consulted prior to any commitment between TWA and Boeing, the undersigned or another representative of Toolco, in any discussion which may be held pursuant to the suggestion hereinabove made, will be authorized to discuss the proper allocation of any expense incurred, including any penalty which TWA may incur by reason of the termination of the proposed Boeing commitment.

2. Independently of the outcome of the proposed Boeing purchase, another matter which requires discussion is the 17 Convair jet aircraft which Toolco has contracted to purchase and the rights or obligations of Toolco and TWA with respect thereto.

3. Toolco does not question the background, personal integrity or ability of Mr. Charles Tillinghast, who has been employed as President of TWA under a long-term contract. Toolco, nevertheless, objects to any arrangement which has the effect of imposing on TWA an [19187] obligation which extends beyond the term of the voting trust, including an arrangement for the services of a chief executive who is not acceptable to Toolco as the owner of more than 78% of the common stock of TWA. Toolco recognises that in the discharge of their obligations to the lending institutions, the voting trustees and the directors have the responsibility for obtaining the services of a competent chief

executive. The position of Toolco is simply that the lending institutions, the voting trustees and the Board of Directors do not have the right to impose the long-term obligation, reflected by the employment contract with Mr. Tillinghast, without the approval or consent of the owners of TWA.

4. The failure of the Board of Directors of TWA to submit to the stockholders of TWA the merger negotiated between TWA and Northeast Airlines, Inc. (hereinafter "Northeast") is another matter of concern to Toolco. Prior to the creation of the voting trust, the management of TWA, with the approval of the majority of the owners of TWA, considered such a merger to be in the best interests of TWA. The lending institutions, the voting trustees and the Board of Directors permitted this agreement of merger to lapse without submitting the matter to the owners of TWA and without consulting Toolco. [19188] It is difficult to see how the lending institutions would have been adversely affected by such a merger since the notes held by them constitute a senior indebtedness of TWA. Toolco recognizes that the new Board of Directors and a new chief executive of TWA may not have the same business judgment as the prior management of TWA. Since the present Board of Directors of TWA is responsible to two masters who may have different interests, it would seem that the proper course of action would have been to submit the matter for appropriate action or direction by the owners of TWA. Toolco understands that unless immediate action is taken the opportunity to merge with Northeast may be lost forever. You are, therefore, requested to take immediate action to reinstitute discussions with Northeast looking toward such a merger, so as to minimize the possible irreparable injury which will be suffered by TWA should this opportunity be lost.

In the event that it is the position of the lending institu-

tions or the voting trustees or the Board of Directors that a merger with Northeast would impose a financial burden upon TWA, adversely affecting the position of the lending institutions, it is the position of Toolco that it is prepared to discuss the possibility of assuming any such financial risk.

[19189] The letter of May 19, 1961, addressed to TWA and the Securities and Exchange Commission is enclosed for your further information with respect to other positions taken by Toolco which are not mentioned herein but which are hereby reconfirmed. A letter was delivered by hand this morning, Friday, May 26, to TWA and its counsel Messrs. Chadbourne, Parke, Whiteside & Wolff, and to the voting trustees at the office of TWA, and to their counsel Messrs. Hughes, Hubbard, Blair & Reed, requesting information as to whether TWA has received from Boeing an extension of time within which to make arrangements for the financing of the contemplated purchase of equipment from it; whether TWA has requested any such extension of time, and if so, what response, if any, has been received from Boeing and whether TWA intends to request such an extension of time prior to May 31, 1961. It is respectfully requested that the undersigned be advised with respect to the queries set forth in said letter as soon as possible and not later than Monday noon, May 29.

The undersigned, together with other representatives of Toolco, will hold themselves available to meet with you at all convenient times.

[19190] A copy of this letter is being forwarded to Messrs. Chadbourne, Parke, Whiteside & Wolff, counsel for TWA, and to Messrs. Hughes, Hubbard, Blair & Reed, counsel for the voting trustees, for their respective information.

Very truly yours,

CHESTER C. DAVIS

and
BOEING COMPANY
45 ROCKEFELLER PLAZA, NEW YORK

REFERRING TO LETTER DATED MAY 25 ON BEHALF OF HUGHES TOOL COMPANY, THIS IS TO NOTIFY YOU THAT AS BENEFICIAL OWNER OF MORE THAN 78% OF THE OUTSTANDING COMMON STOCK OF TWA HUGHES TOOL COMPANY DISPUTES THE POWER AND AUTHORITY OF THE BOARD OF DIRECTORS OR THE MANAGEMENT OF TWA TO ENTER INTO, COMMIT ITSELF FOR OR CONSUMMATE THE PURCHASE OF JET AIRCRAFT FROM YOU PURSUANT TO THE AGREEMENTS DATED APRIL 30, 1961 OR OTHERWISE, OR TO ENTER INTO, COMMIT ITSELF FOR OR CONSUMMATE THE FINANCING ARRANGEMENTS CONTEMPLATED BY SAID AGREEMENTS. THE PRESENT BOARD OF DIRECTORS OF TWA AND MANAGEMENT OF TWA ARE CURRENTLY UNDER THE DIRECTION AND CONTROL AND ARE SUBSERVIENT TO CERTAIN LENDING INSTITUTIONS AND THEIR INTEREST, AND TO VOTING TRUSTEES SUBJECT TO CONTROL BY SAID LENDING INSTITUTIONS. SAID BOARD OF DIRECTORS AND MANAGEMENT OF TWA ARE NOT RESPONSIVE TO THE WISHES AND DESIRES OF THE OWNERS OF TWA AND ARE NOT CONCERNED SOLELY WITH THE BEST INTERESTS OF TWA. THE VOTING TRUST AGREEMENT IS SUBJECT TO TERMINATION PURSUANT TO ITS TERMS AT ANY TIME THAT NOTES HELD BY SAID LENDING INSTITUTIONS ARE PAID IN FULL, AT WHICH TIME TWA WILL REVERT TO THE CONTROL OF THE OWNERS OF TWA. THE AGREEMENTS AND FINANCING ABOVE MENTIONED WOULD IMPOSE OBLIGATIONS ON TWA BEYOND THE TERM OF SAID VOTING TRUST AND WOULD TEND TO PREVENT OR DELAY THE TERMINATION OF SAID VOTING TRUST, ADVERSELY AFFECTING THE OWNERS OF TWA. YOU ARE HEREBY NOTIFIED [19192] THAT ANY CONTRACT OR COMMITMENT FOR THE PURCHASE OF JET EQUIPMENT FROM YOU BY TWA SHOULD NOT BE CONSUMMATED OR IMPLEMENTED WITHOUT APPROVAL BY THE OWNERS OF TWA AND THAT YOU WILL BE PROCEEDING AT YOUR OWN RISK IF YOU PARTICIPATE IN IM-

Defendant's Exhibit 11-G.

POSING THE OBLIGATIONS CONTEMPLATED BY SAID AGREEMENTS AND RELATED FINANCING ON TWA. THE CURRENTLY PROPOSED FINANCING BY TWA INVOLVES UNJUSTIFIABLE SELF DEALING BY THE LENDING INSTITUTIONS NOW CONTROLLING TWA. YOU ARE HEREBY FURTHER REQUESTED NOT TO APPROVE, RATIFY OR CONSENT TO ANY PROPOSED FINANCING ARRANGEMENT WITH THE LENDING INSTITUTIONS CURRENTLY HAVING THE POWER TO CONTROL TWA OR ANY OTHER FINANCING WHICH INVOLVES, DIRECTLY OR INDIRECTLY, SELF DEALING, WITHOUT THE CONSENT OF THE OWNERS OF TWA. AS A SUBORDINATED CREDITOR OF TWA, HUGHES TOOL COMPANY ALSO OBJECTS TO THE IMPOSITION OF SENIOR INDEBTEDNESS AS CONTEMPLATED BY THE PROPOSED FINANCING RELATING TO SAID AGREEMENTS. WE ARE ADVISED BY TWA THAT NO AGREEMENT CONCERNING THE PROPOSED FINANCING HAS YET BEEN EXECUTED AND THAT TWA HAS NOT YET DETERMINED WHETHER OR NOT TO REQUEST AN EXTENSION OF CERTAIN DATES CONTAINED IN THE SAID AGREEMENTS. YOU ARE HEREBY REQUESTED TO NOTIFY CHESTER C. DAVIS OF 120 BROADWAY, NEW YORK, OUR COUNSEL, BEFORE YOU APPROVE OF ANY FINANCING ARRANGEMENT SUBMITTED TO YOU BY TWA PURSUANT TO THE PROVISIONS OF SAID AGREEMENTS SO THAT HE MAY TAKE APPROPRIATE ACTION TO PROTECT OUR INTERESTS.

Charles C. Tillinghast, Jr., Esq., President,
Trans World Airlines, Inc.,
380 Madison Avenue,
New York, New York.

Dear Sir:

This will confirm our telegram sent early this afternoon in response to your night letter telegram of May 29th and your letter of the same date which we received this morning. As we stated in our telegram we do have information, some of which has been recently developed, of which you have not been informed and which should be considered by the Board of Directors of TWA, in the interest of all the stockholders of TWA and others interested in its best management, concerning the relative superiority of the Convair aircraft for the operating needs of TWA and the advantages, including advantages with respect to financing, which would result from its acquisition of available Convair aircraft, based upon information and proposals to be presented to you.

Immediately upon the receipt of your letter we took steps to have the information which you requested for-

warded to us in New York. Much of that information is in the several [19194] offices of Hughes Tool Company, including the California office. Moreover, until we have received the material requested in our telegram we will not be in a position to present all relevant information as we have no way of knowing what information you have already received. Accordingly your suggestion of today that this information be delivered to you this afternoon was completely unreasonable and your insistence in that regard can only be interpreted as an indication that your letter of May 29th was not written in good faith.

We expect to present relevant information to you not later than Friday June 2nd and will be in touch with you to arrange for an appropriate meeting, assuming of course that you are still willing to carry out the intentions expressed in your letter to me dated May 29, 1961.

Very truly yours,

RAYMOND M. HOLLIDAY

Re Hughes Tool Company—TWA

Carl Rowe, Esq.
Chadbourne, Parke, Whiteside & Wolff
25 Broadway
New York, N. Y.

Dear Mr. Rowe:

There are enclosed two copies of transcription of notes taken on my behalf of the conference which we had Friday afternoon, which I have hastily reviewed and which seem to me fairly present the substance of the material I presented at such conference. Undoubtedly, some of the items identified by me in that conference deserve further consideration. I must emphasize that I have been able to present only the material which could be assembled in a very short period of time following Mr. Tillinghast's letter of May 29. I am asking other officers of Hughes Tool Company to review the enclosed notes of our conference. I am prepared to obtain such facts or data as you may need to

confirm the statements made by me on behalf of Hughes Tool Company relating to the desirability of Convair equipment for the needs of TWA.

[19198] Notwithstanding your statement that TWA has not exercised its right to an "out" from the Boeing commitment, I understood Mr. Tillinghast to say that consideration could still be given to Convair equipment, including the thirteen 990s on order by Hughes Tool Company, provided that certain conditions were promptly met. I am considerably disturbed at the suggestion of a penalty bond, because I understand that it is a most unusual request. It seems to me that we should be able to satisfy TWA and ourselves as to the delivery schedules of Convair equipment based upon a firm commitment by Convair as to its ability to meet a particular delivery schedule. It seems to me, therefore, that we should promptly arrange for a meeting with qualified representatives of Convair to discuss this matter.

Insofar as the terms on which the thirteen 990s on order by Hughes Tool Company are available to TWA, it is relatively easy to prepare such a tender in writing insofar as it relates to the overall price of such equipment, and progress payments, heretofore made or payable in the future, pursuant to the terms of the contract between Hughes Tool Company and Convair. It may be, however, that Mr. Tillinghast had in mind a proposal relating to a financing program by TWA. As previously indicated, I assume that the lending institutions with which TWA has been dealing in connection with the financing of the Boeing equipment would be [19199] equally available to TWA for the financing of the Convair equipment. It would be most disturbing indeed if it were otherwise. At the same time, as previously indicated to you and others, Hughes Tool Company by reason of its investment in TWA and its interest in the voting trust which it entered into in 1960 so as to enable

Defendant's Exhibit 11-K.

TWA to obtain financing at that time, has a substantial interest to protect in connection with any proposed financing program by TWA. Therefore, in order to expedite matters as much as possible, you are hereby requested to submit to me or to Mr. Holliday immediately the detailed terms of the financing currently being negotiated by TWA with certain lending institutions.

I am sending a copy of this letter and enclosures to Mr. Reed of Hughes, Hubbard, Blair & Reed, counsel for the voting trustees, so that he and his clients may likewise consider the above, as well as the subjects of the conference held Friday afternoon.

Very truly yours,

CHESTER C. DAVIS

COPY

[LETTERHEAD OF]

CHESTER C. DAVIS
ROOM 3113
120 BROADWAY
NEW YORK 5

June 4, 1961

BY HAND

Irving S. Olds, Esq.
14 Wall Street
New York 5, N. Y.

Dear Mr. Olds:

This refers to your letter to me of June 2, 1961. The views and objections of Hughes Tool Company relating to the Boeing purchases program by TWA go beyond a mere comparison of the types of aircraft manufactured by Boeing and Convair, and the preference of Hughes Tool Company for Convair jet equipment. The transactions described in the current prospectus of TWA, if consummated, would have serious long term economic consequences to TWA and to Hughes Tool Company. Notwithstanding an immediate response to the May 29 letter of Mr. Tillinghast, there appeared a public announcement on Thursday, June 1, attributed to Mr. Tillinghast, indicating that a decision had been made by the management of TWA committing it to the Boeing purchases program. For that reason, I requested on behalf of Hughes Tool Company, an

opportunity to present our views to you and Mr. Breech as voting trustees, so that you could consider exercising the legal rights vested in you as voting trustees for the protection of the beneficial interest of Hughes Tool Company.

[19201] At the present time, Hughes Tool Company, having put its ownership interest in TWA in a voting trust for the purpose of assisting TWA to consummate the 1960 financing, is dependent upon action by the voting trustees and the exercise of their legal powers as voting trustees for the protection of its ownership interest in TWA.

You may consider this letter as a request by Hughes Tool Company for a meeting at the earliest possible moment with you and Mr. Breech, so that you may consider the request of Hughes Tool Company that the voting trustees take appropriate action and exercise the powers vested in them for the protection of Hughes Tool Company. In that connection I would suggest that the management of TWA be notified, on behalf of the voting trustees, to maintain or restore the ability of TWA to reject the Boeing purchases at least until after such a meeting.

I am sending a copy of this letter to Mr. Reed of Hughes, Hubbard, Blair & Reed, counsel for the voting trustees. At the moment, the whereabouts of Mr. Breech are not known to us.

Very truly yours,

/s/ Chester C. Davis

Mr. Ernest R. Breech
12723 Telegraph Road
Detroit 39, Michigan

Dear Mr. Breech:

Referring to your letter of June 6, 1961, I was not aware that Mr. Settles on my behalf had submitted a request for information directly to you. We have not yet received all of the information requested of TWA.

At the moment, I am particularly concerned as to the terms of the proposed financing which Mr. Tillinghast has described as progressing satisfactorily. I appreciate the importance of such financing to all parties concerned and, therefore, I hope that this matter will be discussed with me as a representative of Hughes Tool Company at the earliest possible moment so that any proposed arrangement may be reviewed from the point of view of Hughes Tool Company.

I also hope that you have no personal objection to the position which I am taking on behalf of Hughes Tool Company to the effect that the Voting Trustees, having the

legal power to control the Board of Directors and therefore the management of TWA, are proper persons to whom Hughes Tool [19203] Company may appeal for assistance or protective action consistent with the duties and obligations arising under the Voting Trust, which I am sure are recognized by all the Voting Trustees.

I am sending a copy of this letter to Mr. Reed of Hughes, Hubbard, Blair & Reed, counsel for the Voting Trustees, for his information.

Sincerely,

CHESTER C. DAVIS

[19204]

HUGHES TOOL COMPANY
EXECUTIVE OFFICES
TWENTY-SECOND FLOOR GULF BUILDING
HOUSTON 2, TEXAS

Raymond M. Holliday
Vice President

June 9, 1961

Trans World Airlines, Inc.
380 Madison Avenue
New York 17, N. Y.

Attention: Mr. Charles C. Tillinghast, Jr.
President

Dear Sirs:

Referring to the representations made by Mr. Chester C. Davis on behalf of the Hughes Tool Company at a conference held the afternoon of June 2, 1961, this will confirm that Hughes Tool Company has currently on order from General Dynamics Corporation thirteen (13) Model 880 (formerly Model 600) aircraft which are available to Trans World Airlines, (TWA). Hughes Tool Company claims that TWA is obligated to acquire said aircraft in accordance with past practices. Said 13 aircraft are being manufactured by General Dynamics Corporation under a Purchase Agreement dated November 10, 1960, as amended February 22, 1961 (said Agreement as so amended being hereafter referred to as the "Purchase Agreement"). The Purchase Agreement provides for the delivery of the first of said aircraft in December, 1961 and of the remaining aircraft at the rate of 3 per month thereafter through April, 1962. You should note, however, that such delivery schedule is contingent upon certain [19205] customer equipment being furnished to General Dynamics Corporation by a

specified date, and that in order to maintain said delivery schedule immediate action is required by TWA. Hughes Tool Company assumes that you are fully familiar with said Purchase Agreement. If you do not have a copy thereof, you may inspect same at the offices of Chester C. Davis, 120 Broadway, Room 3113, New York, New York, or upon request a duplicate copy will be furnished to you.

Hughes Tool Company hereby reaffirms that it is prepared to assign to TWA all of its rights to acquire said aircraft pursuant to the Purchase Agreement, in accordance with past practices, namely, in consideration of an agreement by TWA to pay:

(1) The balance of the purchase price of said aircraft;

(2) All amounts hereafter payable for customer-furnished equipment installed or to be installed in said aircraft; and

(3) The undepreciated cost of said aircraft to Hughes Tool Company.

As in the past, the phrase "the undepreciated cost to Hughes Tool Company" means the sum of:

(a) All amounts Hughes Tool Company shall have paid the vendors (in cash or with notes) with respect [19206] to said aircraft including amounts paid vendors of customer-furnished equipment;

(b) All other costs, including expenses in connection with the aircraft or other related property; and

(c) An amount representing interest on items (a) and (b) at the rate of 5½% per annum, computed on the average amount of the outstanding payments applicable to such aircraft and by considering the payments made as outstanding from the

respective dates such payments were made and until repayment thereof to Hughes Tool Company.

With respect to the suggestion made by Mr. Tillinghast at the abovementioned conference concerning adequate assurances as to the delivery dates of such aircraft, Hughes Tool Company believes that this is a matter which should be discussed between TWA and General Dynamics Corporation. Hughes Tool Company is prepared to participate in any such discussions and to assist TWA to the extent possible in obtaining appropriate assurances from General Dynamics Corporation. In this connection TWA should recognize that, in accordance with past practices and prior to the change in management of TWA, it was customary for qualified personnel of TWA to be made available to General Dynamics Corporation as a contract representative or otherwise [19207] for the purpose of complying with the requirements of any purchase agreement and to assist in and expedite the ultimate delivery of the aircraft covered by such purchase agreement.

As to the terms of payments or payment dates to be made or met by TWA to Hughes Tool Company upon the assumption by TWA of the Purchase Agreement, Hughes Tool Company is prepared to discuss same with TWA at any time. Hughes Tool Company is also willing to furnish to TWA any further information available to Hughes Tool Company which TWA requires with respect to said aircraft and with respect to the advantages which Hughes Tool Company believes would inure to the benefit of TWA from the acquisition of said aircraft by TWA. Hughes Tool Company understands that General Dynamics Corporation is prepared to join in or otherwise cooperate in the assignment of the Purchase Agreement to TWA.

In addition to the above, Hughes Tool Company reaffirms its willingness to make available or to cause to be made available to TWA, on comparable terms, 4 Convair

880's which, according to General Dynamics Corporation, would be available for delivery to TWA as follows:

One in August, 1961
One in September, 1961
Two in October, 1961

The said 4 Convair 880's are in the process of completion with the configuration designed by TWA.

[19208] Furthermore, upon the assumption by TWA of the Purchase Agreement Hughes Tool Company would use its best efforts to cause General Dynamics Corporation to make available to TWA an additional 4 Convair 880 M's for delivery at approximately the same time as the 4 Convair 880's hereinabove mentioned.

The availability to TWA of the above mentioned aircraft depends upon immediate action by TWA.

In order to avoid any further delay in making available to TWA the 13 Model 990 aircraft and in order to insure the availability thereof to TWA, will you please indicate your willingness to accept an assignment of the Purchase Agreement by having a duly authorized officer of TWA execute in the space hereinbelow provided a duplicate of this letter enclosed for that purpose and return same to the undersigned or to Chester C. Davis, 120 Broadway, Room 3113, New York, New York.

Very truly yours,

HUGHES TOOL COMPANY

Defendant's Exhibit 11-O.

Gentlemen:

Referring to previous correspondence and conferences relating to the need of Trans World Airlines, Inc. (TWA), for additional jet aircraft, the financing thereof, the interests of Hughes Tool Company and its positions relating thereto, and in an [19210] effort to arrive at a solution of the various questions involved, Hughes Tool Company hereby submits three separate and distinct proposals. You may accept any one or any two or all three of said proposals. This is also to advise you that Mr. Chester C. Davis is authorized to discuss with you said proposals and is fully empowered by Hughes Tool Company to commit Hughes Tool Company with respect to any or all of said proposals.

PROPOSAL NUMBER ONE

Hughes Tool Company hereby offers to guarantee subscription by the stockholders of TWA to an offering of 100 million dollars of additional common stock of TWA (or such other equity security or securities as may be mutually agreed upon), such guarantee to be comparable to the one agreed upon in the Hughes Financing and Subordination Agreement of December, 1960, in that Hughes Tool Company will agree to subscribe to a pro rata share of any such new offering and will subscribe to any portion unsubscribed by the other stockholders of TWA up to a maximum amount of 100 million dollars.

Should you question the ability of Hughes Tool Company to perform or its good faith in submitting the offer represented by this proposal, Hughes Tool Company is prepared [19211] to place in escrow securities of a value commensurate with such undertaking which would be forfeited in the event that Hughes Tool Company fails to perform in accordance with any obligation it undertakes pursuant to this proposal.

Defendant's Exhibit 11-O.

The foregoing proposal is open for consideration by you for a period of ten days from the date hereof. If, at the end of that period, you are favorably disposed to an acceptance of this proposal, but desire additional time for a definitive acceptance thereof, and so indicate in writing, Hughes Tool Company would give careful consideration to a reasonable request for an extension of time of the offer represented by this proposal.

It is not a condition of this proposal that TWA acquire, to supplement its fleet of jet aircraft, either Boeing aircraft or Convair aircraft or any combination thereof or any other type of aircraft. The foregoing offer, however, is conditioned upon termination of the existing voting trust with respect to the shares of common stock of TWA owned by Hughes Tool Company and the transfer and return of all of said shares to Hughes Tool Company.

In connection with your consideration of this proposal, Hughes Tool Company points out the following:

(a) Hughes Tool Company would guarantee to TWA an additional 100 million dollars of equity capital which would [19212] not only further secure the lending institutions, but would enable TWA to undertake an aggressive program for acquiring additional jet aircraft which, according to our understanding of your position, are unquestionably desired by TWA. Furthermore, with such additional equity capital, TWA should be able to obtain without difficulty adequate financing from the present lending institutions or others for expanding its present jet aircraft fleet with either Boeing aircraft or Convair aircraft or both as may be determined by the management of TWA.

(b) If this proposal is accepted, it would not be the intention of Hughes Tool Company to change the present management of TWA. The Mortgage Indenture of December 1960, securing the notes held by the lending institutions,

contains provisions which, upon termination of the voting trust, adequately protect the noteholders with respect to the management of the Company. If this proposal is accepted, Hughes Tool Company will agree to the continuance of these provisions, which are sometimes called "the management clause", without change.

PROPOSAL NUMBER TWO

Hughes Tool Company, in addition to its having guaranteed the purchase from TWA of 100 million dollars of subordinated income debentures currently offered to the stockholders of TWA, hereby offers to subscribe to an additional $11,235,900 principal amount of such debentures with warrants attached at the offering price thereof, payable in cash at the closing to be held Tuesday, June 13, 1961, provided that TWA will commit itself to acquire, and to apply said sum to [19213] amounts heretofore paid by Hughes Tool Company or now due and payable by it to General Dynamics Corporation with respect to, 13 Model 990 (formerly Model 600) jet aircraft which were heretofore ordered by Hughes Tool Company from General Dynamics Corporation for the benefit of TWA and which are available to TWA, pursuant to that commitment by Hughes Tool Company, upon terms and conditions similar to the terms and conditions under which Hughes Tool Company has heretofore made aircraft available to TWA. Said terms and conditions are more fully described under Proposal Number Three.

PROPOSAL NUMBER THREE

Hughes Tool Company hereby reaffirms that it is prepared to assign to TWA, at Hughes Tool Company's cost in accordance with past practices of Hughes Tool Company, all rights to acquire from General Dynamics Corporation 13 Model 990 (formerly Model 600) aircraft under a

purchase agreement dated November 10, 1960 as amended February 22, 1961 between Hughes Tool Company and General Dynamic Corporation. In addition, Hughes Tool Company reaffirms its willingness to make available or to cause to be made available to TWA on comparable terms four Convair Model 880's which, according to General Dynamics Corporation, will be available for delivery to TWA as follows: one in August, 1961; one in September, 1961 and two in October, 1961. [19214] Said four Convair 880's are in the process of completion by General Dynamic Corporation with the configuration designed by TWA. Upon the acceptance of this proposal Hughes Tool Company will use its best efforts to cause General Dynamics Corporation to make available, if TWA wishes to have them, an additional four Convair 880 M's for delivery at approximately the same time as the four Convair 880's. There is attached hereto, as a separate letter dated June 9, 1961, a more complete statement of this proposal.

You will notice that favorable consideration of Proposal Number Two hereinabove set forth requires action on your part on or before June 13, 1961, because Hughes Tool Company is informed that the availability of the debentures may expire on that date. If you feel that you need additional time to consider Proposal Number Two, Hughes Tool Company is prepared to discuss with you the feasibility of extending such time and to take such action as may be appropriate toward that end.

In order to expedite favorable consideration by you of the above, copies hereof are being delivered to Francis Reed, Esq., of Messrs. Hughes, Hubbard, Blair & Reed, counsel for the voting trustees and to Messrs. Cladbourne, Parke, Whiteside & Wolff, counsel for TWA. Mr. Reed has also been requested to communicate to appropriate individuals, by telephone or otherwise, as promptly as possible the substance of [19215] the above.

Defendant's Exhibit 11-O.

Mr. Chester C. Davis, who is empowered to discuss all or any of the above proposals and to take whatever action is necessary to commit Hughes Tool Company with respect thereto, will be continually available to you during the next ten days.

Very truly yours,

HUGHES TOOL COMPANY

[19217]

HUGHES TOOL COMPANY

EXECUTIVE OFFICES
TWENTY-SECOND FLOOR GULF BUILDING
HOUSTON 2, TEXAS

Raymond M. Holliday
Vice President

June 21, 1961

To the Board of Directors
of Trans World Airlines, Inc.

Dear Sirs:

I sincerely regret that due to ill health I was unable to attend today's meeting of the Board, as I had planned. As soon as I was able to do so, I sent a message to Mr. Tillinghast informing him that I would be unable to attend the meeting, that Mr. Davis, however, was available and waiting outside the Board room. I asked that Mr. Davis be given an opportunity to appear before the Board to discuss the proposals of Hughes Tool Company set forth in its letter of June 10, 1961 and present pertinent information with respect thereto. I understand that this request was not granted and that Mr. Davis was not given an opportunity to appear at the meeting.

The primary purpose of this letter is to present to you some of my views as a director of TWA.

At the outset, I should point out that Mr. Tillinghast's letter of June 16, 1961 addressed to me at Houston, [19218] Texas, should have been addressed to Mr. Davis, because the June 10 letter of Hughes Tool Company makes it clear that Mr. Davis is the one who is authorized to discuss the proposals made therein and to commit Hughes Tool Company with respect thereto. The approach taken by Mr.

Tillinghast in his letter, together with the fact that no one on behalf of TWA has communicated with Mr. Davis with respect to the proposals, indicates to me that an effort is being made to create a record to justify their rejection, rather than a bona fide effort to explore the advantages to TWA of the acceptance of one or more of those proposals and in particular the many important advantages to TWA in accepting Proposal Number One.

Mr. Tillinghast states in his letter that "TWA has suffered greatly from its under-capitalization of the past and we would wish to take every reasonable step to achieve an improvement in our debt-equity ratio." It seems to me, therefore, that immediate steps should be taken to indicate a desire on the part of TWA to accept Proposal Number One so that a reasonable extension of time may be sought from Mr. Davis for working out the implementation of that proposal. Mr. Tillinghast appears to be concerned that such implementation "would require approval by the Civil Aeronautics Board". It is my understanding, confirmed to me by Mr. Davis, that [19219] Proposal Number One is not conditioned upon any approval by the Civil Aeronautics Board. In other words, should Proposal Number One be accepted by TWA and should the parties to the voting trust arrangement consent to its termination, Hughes Tool Company would become committed to its guarantee to TWA of one hundred million dollars of additional equity capital pursuant to the terms of Proposal Number One, whether or not the Civil Aeronautics Board approved of such a termination of the Voting Trust or permitted a transfer of voting securities to Hughes Tool Company. Mr. Davis confirms to me that Hughes Tool Company is prepared to accept complete responsibility for obtaining whatever action may be necessary by the Civil Aeronautics Board in connection with the termination of the Voting Trust.

Defendant's Exhibit 11-Q.

Mr. Tillinghast, in his letter to me, does not appear to be adequately informed as to the circumstances which caused the lending institutions to require the Voting Trust in connection with the 1960 financing. The lending institutions were prepared to advance credit to TWA without a voting trust, based upon a management clause comparable to that in the Indenture of Mortgage, at a time when Mr. Thomas was the chief executive officer of TWA. It was only after Mr. Thomas resigned as President, leaving TWA without a chief executive, that the lending institutions insisted upon a [19220] voting trust. At a time when TWA was without a president, the management clause, obviously, did not afford adequate protection to the lending institutions because the management clause protected the lending institutions only against a change in management adverse to their interests. At present, TWA has a President and Chairman of the Board who are presumably satisfactory to the lending institutions. Thus, there would seem to be no justification for assuming that the lending institutions would unreasonably refuse to consider a termination of the Voting Trust under circumstances in which both they and TWA would have a great deal more to gain by an acceptance of Proposal Number One than by a continuation of the Voting Trust. In this connection, it should be noted also that the Indenture of Mortgage itself recognizes the possibility of the termination of the Voting Trust by providing that the management clause is to come into effect automatically when the Voting Trust terminates.

Mr. Tillinghast points out, "Present indications are that substantial financing will be needed in the next few years, additional to the equity proposed to be added." In addition to the many advantages which one hundred million dollars of additional equity capital would provide to TWA and to the lending institutions, a termination of the Voting Trust would bring about definite advantages with respect

to [19221] any needed additional debt financing. At the present time, a majority of the note holders have the absolute power to control a majority of the voting trustees, who in turn have the absolute power to control the Board of Directors. This situation unquestionably makes it difficult for the lending institutions now interested in TWA to negotiate the terms of additional debt financing without being subjected to the risks of self-dealing. A termination of the Voting Trust would eliminate that problem.

It is difficult for me as a director to understand what objection there may be from the point of view of TWA to an acceptance of Proposal Number One. I would appreciate, and even request, that each director give me whatever reasons he may have for opposing the acceptance of Proposal Number One. It seems to me that the Board of Directors in the discharge of its duties and obligations should adopt resolutions to the effect that it would be desirable for the Company to obtain on appropriate terms one hundred million dollars of additional equity capital without the payment of any underwriting fees or commissions; that from the point of view of the Company it would be desirable to accept Proposal Number One as submitted by Hughes Tool Company as set forth in its letter of June 10, 1961; that the President and Chairman of the Board of the Company be directed to communicate with [19222] appropriate representatives of the lending institutions presently holding the serial and sinking fund notes covered by the Indenture of Mortgage dated as of December 1, 1960 for the purpose of determining whether such lending institutions would consent to a termination of the Voting Trust in the event that the Company obtains a satisfactory guaranty of an additional one hundred million dollars of equity capital from its stockholders; and that the President and the Chairman of the Board be requested to submit a report in writing to the directors of the Company with

respect to the efforts made with such lending institutions, the results of such efforts and the position or attitude taken by such lending institutions, together with their recommendation with respect to Proposal Number One and the basis for such recommendation.

Mr. Tillinghast also appears not to have been adequately informed with respect to what has transpired concerning the Convair 880's, which are available to TWA. I definitely advised Mr. Leslie, Senior Vice President—Finance and Treasurer, that TWA could obtain those 880's on the basis of Hughes Tool Company's costs determined in accordance with past practice and defined in the letter of June 9 by Hughes Tool Company to TWA. My discussions with Mr. Leslie specifically informed him of the price to TWA for said aircraft. There can be no question but that TWA formally advised Hughes [19223] Tool Company that it desired said aircraft and there is no basis whatever for any implication by Mr. Tillinghast that TWA is uninformed as to the price or basis on which those planes have been available to TWA. It is true that at one time Mr. Ben Sessel, at a Board meeting, suggested that an effort should be made to obtain those planes at a distress price. Such a suggestion was, of course, rejected by Hughes Tool Company.

It seems to me that it is of extreme importance that TWA advise Mr. Davis immediately that it is favorably disposed to an acceptance of Proposal Number One, and perhaps also of the other proposals, and that the President or other responsible officer of TWA take the necessary steps to obtain from him a reasonable extension of time of the offers contained in the letter of June 10 by Hughes Tool Company.

Very truly yours,

RAYMOND M. HOLLIDAY

PHONE WORTH 2-5220

June 21, 1961

Carl S. Rowe, Esq.
Messrs. Chadbourne, Parke,
Whiteside & Wolff
25 Broadway
New York 4, N. Y.

Dear Mr. Rowe:

This refers to your letter of June 20, 1961. You are in error if you are implying that I was suggesting an extension of time within which Hughes Tool Company could exercise its option to purchase the additional $11,235,900 principal amount of debentures. I made it perfectly clear to you and to Mr. Mathers that the Hughes Tool Company was not seeking any extension of time. I was merely trying to discuss with you and Mr. Mathers mechanics which would not involve the granting of time to Hughes Tool Company but which would, nevertheless, give additional time to TWA if TWA felt that it needed additional time in order to consider Proposal Number Two. The record is quite clear in that respect. The suggestion of an escrow arrangement would have required the Hughes Tool Company to exercise its option to purchase the additional $11,235,900 of deben-

tures and thereafter TWA at its option, not at the option of Hughes Tool Company, would have decided to accept or reject Proposal Number Two and concurrently received the money or cancelled the debentures issued depending on the decision of [19225] TWA with respect to Proposal Number Two.

At the closing, Mr. Mathers stated that a decision had been made by TWA. The closing proceeded, as the transcript of the closing shows, on the basis that TWA either had rejected Proposal Number Two or was unwilling to give itself additional time to consider the proposal.

I agree with you, however, that there would seem to be little purpose in continuing to correspond on the subject matter of your letter.

I am likewise sending copies of this letter to all those who received copies of prior correspondence on this subject.

Very truly yours,

CHESTER C. DAVIS

Dear Mr. Duckworth:

I have received your letter of June 23, 1961 and the materials enclosed therewith. In your letter you state:

> "In supplying you with the enclosed documents we do not intend to indicate that we believe we are obligated to furnish this information to you or to Hughes Tool Company.
>
> We do not believe that under all the circumstances Hughes Tool Company is entitled to receive all reports presented to the Board of Directors of TWA and we are, therefore, not enclosing such reports."

Whether or not Hughes Tool Company is entitled to receive all reports presented to the Board of Directors of TWA, Mr. Raymond M. Holliday, a director of TWA, is entitled to receive such reports. In this connection, I am requesting on behalf of Mr. Raymond M. Holliday, in his

capacity as a director of TWA, the following documents in addition to those sent by you on June 23, 1961:

(1) Copies of minutes of meetings of the Board of Directors of TWA held during 1960.

[19227] (2) Copies of minutes of meetings of the Executive Committee of the Board of Directors of TWA held during 1960.

(3) Copies of all reports presented to the directors or circulated at meetings of the Board during 1960 and 1961.

Very truly yours,

CHESTER C. DAVIS

Re TWA Voting Trust

Francis C. Reed, Esq.
Messrs. Hughes, Hubbard, Blair & Reed
One Wall Street
New York 5, N. Y.

Dear Mr. Reed:

This letter is addressed to you as counsel for Mr. Breech and Mr. Olds as Voting Trustees, pursuant to their request that any matter which should be brought to their attention as Voting Trustees should be done through you as their counsel.

1. The management of TWA installed by the Voting Trustees appears to have developed a serious antagonism toward Hughes Tool Company and its owner, Mr. Howard Hughes. You appreciate, of course, the ownership interest of TWA is held by Hughes Tool Company, a Delaware corporation, and that there is no possible justification why such ownership interest should be ignored or adversely affected by reason of any personal antagonism which may exist on the part of any director or directors of TWA or any of its operating personnel toward Mr. Howard Hughes.

This antagonism becomes particularly serious when it reflects itself in a course of conduct obviously designed to oppose or frustrate any proposal, [19229] suggestion or request which is made by anyone on behalf of Hughes Tool Company. The recent course of conduct by TWA would seem to indicate that its management is primarily interested in creating a record to justify the rejection of any proposal or suggestion made by Hughes Tool Company, rather than making an effort to consider the matter in good faith on the merits. Under such circumstances, Hughes Tool Company can look only to the Voting Trustees to protect its interest in TWA, and hereby requests that the Voting Trustees inquire into the existence of any personal antagonism toward Mr. Hughes or the Hughes Tool Company by any director or individual in the management of TWA.

2. Hughes Tool Company has repeatedly requested, directly and through Mr. Holliday, information from TWA as to matters which vitally affect its ownership interest in TWA, and TWA has repeatedly refused to furnish pertinent information with respect to such matters.

For example, on May 25, 1961, requests were made to TWA, the Voting Trustees and their respective counsel for relevant papers, and particularly drafts of proposed agreements, relating to proposed additional financing by TWA referred to in the current Registration Statement of TWA. On May 29, 1961, I received a letter from TWA's counsel which advised me that no agreement concerning this proposed financing had yet been executed. [19230] This letter, however, completely ignored the request for drafts of documents which was made so that Hughes Tool Company could inform itself as to what was being proposed.

Similarly, on June 1, 1961, Mr. Holliday requested by telegram that he be advised of the exact status of the

proposed financing. Mr. Holliday informs me that he has not received such advice, and that no details with respect to this proposed financing have ever been furnished to him. In this connection you ought to note that the proposed minutes of the meeting of the Board of Directors of TWA held on May 17, 1961 state:

> "Inasmuch as Mr. Raymond M. Holliday was not present, the Senior Vice President—Finance and Treasurer was requested to apprise Mr. Holliday of the details of the financing plan."

I am informed that neither the Senior Vice President—Finance and Treasurer nor any other representative of TWA has ever apprised Mr. Holliday of the details of the financing plan.

On June 4, 1961, I again requested TWA's counsel to submit to me or to Mr. Holliday the detailed terms of the proposed financing. On June 8, 1961 I was informed by counsel for TWA that it would be inappropriate for him to furniah to me the detailed terms of said financing. It is certainly known to TWA and its counsel that I am not only counsel for Hughes Tool Company but that I am also a vice president of the Company. It is likewise well known that Mr. Holliday is not only a director of TWA but also an officer of Hughes Tool Company.

On May 24, 1961, I requested certain documents from Mr. Duckworth, the secretary of TWA, including copies of all [19231] reports presented to the directors or circulated at meetings of the Board. On June 23, I received a reply from Mr. Duckworth stating:

> "We do not believe that under all the circumstances Hughes Tool Company is entitled to receive all reports presented to the Board of Directors of TWA and we are, therefore, not enclosing such reports."

I do not know what circumstances Mr. Duckworth has in mind.

It is quite apparent that if Hughes Tool Company did not have its ownership interest in TWA in a voting trust, it would be able to obtain all the information which it seeks. The Voting Trustees holding the legal title to the beneficial interest of Hughes Tool Company in TWA have the power to bring about a responsiveness to the legitimate interest of Hughes Tool Company in TWA. The Voting Trustees, therefore, are hereby requested to take appropriate action to this end as well as to see to it that Hughes Tool Company and its authorized representatives obtain all information requested of TWA pertinent to the affairs of TWA.

3. TWA has violated the terms of the Hughes Financing and Subordination Agreement which is an integral part of the arrangement resulting in the creation of the Voting Trust. It is clear that under the terms of said Agreement Hughes Tool Company was entitled to have its $100 million interim note of TWA [19232] refunded at the principal amount thereof plus accrued interest to the date of refunding. The closing with respect to the refunding of said interim note was to be held within three business days after the expiration of the subscription offer to stockholders of subordinated debentures. The closing was held in accordance with said Agreement on June 13, 1961. The fact that said refunding was to be accomplished with cash and with debentures does not change the obligation of TWA to Hughes Tool Company under Section 1.4 of said Agreement. The agreement by Hughes Tool Company to accept said debentures at the same price as offered to the public does not permit TWA to claim that Hughes Tool Company is obligated to accept said debentures at the offering price plus accrued interest. Said debentures are income debentures and do not carry a fixed interest obligation. It was

TWA and not Hughes Tool Company which elected to have the conditional interest on said debentures run from June 8, 1961. The amount of interest which TWA has failed to pay to Hughes Tool Company in accordance with said Agreement amounts to $72,089.55. This matter was brought to the attention of the President of TWA and the claim has been rejected by counsel for TWA. It is the position of Hughes Tool Company that this rejection amounts to a deliberate violation by TWA of the terms of said Agreement. The Voting Trustees are hereby requested to take appropriate [19233] action to correct this default and violation of said Agreement and the arrangement relative to the creation of the Voting Trust.

4. By letter dated June 10, 1961, hand delivered June 12, 1961, Hughes Tool Company submitted three separate and distinct proposals to TWA, the Voting Trustees and the lending institutions having an interest in TWA. Two of these proposals by their terms have now expired. As stated in said letter, I was the representative of Hughes Tool Company authorized and empowered to discuss said proposals and to commit Hughes Tool Company with respect thereto. I remained continuously available for such discussions but no one communicated with me with respect to such proposals. I waited in the offices of TWA for an opportunity to appear before the Board of Directors of TWA, in the absence of Mr. Holliday who unexpectedly became ill and was unable to attend, and I was refused such an opportunity.

On June 16, 1961, the president of TWA wrote a letter to Mr. Holliday which was clearly intended to create a record to justify a refusal by TWA to accept any of the proposals set forth in the letter of June 10. I received a copy of said letter when Mr. Holliday telegraphed TWA requesting that a copy be made available to me. Certain

aspects of the letter by Mr. Tillinghast were commented upon by Mr. Holliday in his letter [19234] of June 21, 1961 to the Board of Directors of TWA, a copy of which was forwarded to you as counsel for the Voting Trustees by letter dated June 21, 1961. The statement by Mr. Tillinghast that Hughes Tool Company had not advised TWA of the purchase price of the 13 Convair Model 990 aircraft, which were ordered by Hughes Tool Company from General Dynamics Corporation, and the implication that therefore TWA was not in a position to consider Proposal Number Three, is incredible.

I do not understand how TWA could have made an intelligent business decision to commit itself for additional Boeing aircraft without having obtained all available information as to the price of other available aircraft. If Mr. Tillinghast intended to imply that TWA did not know at what price Hughes Tool Company would make such aircraft available to TWA, such an implication cannot be justified even if it is assumed that Mr. Tillinghast has not had an opportunity to familiarize himself with respect to matters which occurred prior to his taking office. Proposal Number Three sets forth quite clearly the formula for determining the price for said 13 aircraft. Furthermore, at the request of counsel for TWA, Hughes Tool Company on June 19, 1961 furnished TWA with a copy of the purchase contract it has with Convair which sets forth the basic price for said aircraft. It is difficult to understand why it would be helpful to the president of [19235] TWA for us to make a dollars and cents computation which, of course, would change every day. It is inconceivable that the president of TWA is not aware that Mr. Bew, a TWA representative, is stationed at the Convair plant on a full time basis and that complete information as to the price of Convair aircraft and as to the payments made by Hughes Tool Company on account of said aircraft was available to TWA if,

in fact, the management of TWA was interested in the information.

With respect to Proposal Number Two, I realized that since the letter of June 10, 1961 was not delivered to the addressees until the morning of June 12, 1961, the management of TWA might find it difficult to make a decision on that proposal before the closing to be held on Tuesday, June 13, 1961. I refer you to my letter of June 13, 1961 as a partial indication of the effort made by Hughes Tool Company to discuss with TWA a procedure designed to give TWA additional time in which to consider the desirability of Proposal Number Two. I made a further effort at the closing held on Tuesday, June 13, 1961. TWA and its counsel reacted to those efforts by asserting that Hughes Tool Company was seeking to delay the closing and that TWA had no authority to delay the closing. The fact is, however, that the suggestions being made on behalf of Hughes Tool Company were not to delay any closing but rather to give TWA additional time, if the management [19236] of TWA felt that additional time was needed, for the purpose of considering Proposal Number Two.

It may be suggested by the management of TWA that the failure to react favorably to Proposal Number One is based upon an evaluation of the attitude which the lending institutions may have had toward that proposal. It is submitted that a management which in good faith desired to pursue the merits of Proposal Number One would have communicated with me and would have joined Hughes Tool Company in any communication with the lending institutions for the purpose of pointing out to them the many advantages to TWA as well as the lending institutions which the acceptance of the Proposal Number One would have had. I have never received a request for an extension of time for Proposal Number One. Presumably this is because the letter of June 10 clearly stated that any such re-

quest would have to be based upon a statement of a favorable attitude toward acceptance of the proposal.

5. Hughes Tool Company submits that immediate action by the Voting Trustees is required to protect its ownership interest in TWA. It further submits that the existence of the Voting Trust is not an indication or agreement on the part of Hughes Tool Company that its views on all matters affecting TWA are to be ignored, if not actively opposed. Hughes Tool Company [19237] is presently in a position of having to rely on the Voting Trustees for the protection of its equitable interests. The undersigned has been instructed by Hughes Tool Company to remain available to discuss the above and related matters with the Voting Trustes either with or without representatives of TWA and representatives of the lending institutions, if they will permit such a discussion.

Very truly yours,

CHESTER C. DAVIS

CAB Opinion and Order No. 3210, decided October 17, 1944

[The following document, which is not part of the Record in this case, has been printed in this Appendix at the instance of defendants.]

[CAPTION]

OPINION

BY THE BOARD:

Hughes Tool Company by application duly filed seeks approval by the Board "if such approval is deemed necessary" under section 408 of the Civil Aeronautics Act of 1938, as amended, of the acquisition by it of control through stock ownership of Transcontinental & Western Air, Inc., hereinafter called TWA, an air carrier within the meaning of section 1(2) of the Act.[1] After notice, hearing was held and briefs have been filed. The Department of Justice was permitted to intervene. An examiner's report was issued recommending approval subject to the conditions that commercial transactions between TWA and Hughes Tool, or between TWA and any subsidiary or affiliate of Hughes Tool, be limited to aircraft parts or accessories, the item price of which complete does not exceed $25, and to a total annual expenditure of $10,000. Provision for fulfillment of certain existing contracts concerning the purchase of Lockheed aircraft and for further action in this proceeding when necessary also was recommended. The only exceptions filed were those of public counsel directed to the substance of the conditions. Oral argument was waived by all parties.

[1] TWA holds certificates of public convenience and necessity under which it is authorized to perform air transportation over routes Nos. 2, 36, 37, 38, 44, 58, 61, and 67.

Under section 408 (a) (5) it is unlawful, unless approved by the Board, for any air carrier or person controlling an air carrier, any other common carrier, or any person engaged in any other phase of aeronautics, to acquire control of any air carrier in any manner whatsoever. By the language of section 408(b) the Board is required to grant such approval subject to such reasonable terms and conditions as are required in the circumstances unless it is found that the acquisition will not be consistent with the public interest. By the language of the application an issue as to our jurisdiction is raised; under the language of the Act the fundamental issue is whether the control sought to be held is or will be adverse to the public interest.

Hughes Tool is a Delaware Corporation, all the stock of which is owned by Howard R. Hughes. Its principal business, located at Houston, Tex., is and has been the manufacture of rock bits, tool joints, and high pressure valves for the oil-well-drilling industry. The company is a family enterprise, founded by the father of the present owner who was engaged in the oil industry. In its own field Hughes Tool has been and is highly successful. As of November 30, 1943, its capital and earned surplus aggregated nearly $21,500,000. Its current assets aggregated more than $22,000,000 against current liabilities of approximately $10,770,000.

Howard R. Hughes is a well known aviator and aeronautical engineer. As a pilot he has been the winner of various trophies and is the holder of various speed records. As an aeronautical engineer he has designed or collaborated in the design and alteration of aircraft for speed tests and more lately for air transport.

Hughes Tool first became interested in TWA in 1939 at the solicitation of the president of TWA, a personal friend of Howard R. Hughes. From time to time thereafter, either by purchase through brokers in the securities market or directly from the treasury of TWA, Hughes Tool acquired additional common stock of the air carrier until at the end of 1942 it was the owner of 440,050 shares, or 45.6 percent of the total shares outstanding. The total investment of Hughes Tool in the stock of TWA at the time of hearing in this proceeding exceeded $5,505,000.

For the purpose of this proceeding applicant concedes that the stock now owned constitutes control of the carrier. There is very little room to doubt that for all practical purposes such control has existed since the end of 1940 at least when 42.1 percent was owned. Ownership of so great a proportion of outstanding stock, the remainder of which is dispersed among many owners, represents such a dominating influence in the affairs of the corporation that, in the absence of circumstances indicating the contrary, control, either affirmative or negative, must follow. Much smaller interests have been found so to result.[2]

No individual holds or has held office in both Hughes Tool and TWA except for the employment in an advisory capacity by Hughes Tool of the president of TWA, Mr. Jack Frye.

Prior to 1939 the only activity of Hughes or of Hughes Tool associated with any phase of aviation was experimental and developmental work upon the privately owned and operated equipment of Mr. Hughes or the company.

---

[2] *Rochester Telephone Corporation* v. *United States*, 307 U.S. 125, 146 (1939).

No activities of any character in commercial aviation existed. The first participation of Mr. Hughes in any phase of commercial aeronautics followed the acquisition of an interest in TWA. In the late spring and early summer of 1939, Messrs. Hughes and Frye collaborated in the preparation of specifications for a 4-motored airplane to be developed for use by TWA in commercial air transportation. They began negotiations with several aircraft manufacturing concerns regarding construction which resulted in an agreement between Hughes Tool and Lockheed Aircraft Corporation on June 30, 1939, before control of TWA by Hughes Tool was obtained. The contract called for the construction and delivery of five airplanes to be known as "Excalibur-A." The name later was changed to Constellation.

After various changes and modifications as to priorities, deliveries, and the number of aircraft to be purchased, this contract with the approval of Lockheed was assigned to TWA in 1942, Hughes Tool reserving an option to purchase through TWA 25 of the aircraft built under the Constellation specifications. The contract restricts the sale of such aircraft for use in domestic air transportation except by TWA during a certain future period. The aircraft are in process of manufacture and, by appropriate arrangement, are being sold and delivered at present as completed for military use, subject to an option by TWA and by Hughes Tool through TWA to reacquire 40 of them. The Constellation agreements were originally made by Hughes Tool with Lockheed for the benefit, and at the request, of TWA, and to evidence TWA's interest it was given the opportunity to be substituted for Hughes Tool as a direct contracting party. The obvious, if not the expressed, purpose of these arrangements was to give TWA the benefit of the

credit and financial standing of Hughes Tool in a transaction involving substantial financial responsibility. As to the 25 airplanes subject to the option of Hughes Tool, the record indicates that these, if the option is exercised, will be held for resale and for experimental use.

Since the Constellation contracts were made, Hughes Tool, directly or through subsidiaries or affiliates created for that purpose, has expanded and diversified its industrial production by manufacture of military aircraft parts and accessories in furtherance of the war effort. There is no evidence of an intention to continue such activities after the war, or to engage in any phase of supply for commercial aviation. There is evidence to indicate only that Hughes Tool may continue developmental and experimental work in aviation.

The jurisdiction of the Board in the proceeding is questioned by the application when it asks approval "if such approval is deemed necessary". Under the section of the Act involved, there are three elements of jurisdiction: (1) there must be an acquisition of control; (2) the party sought to be controlled must be an air carrier; and (3) the acquirer must be engaged in a phase of aeronautics. As to the first two there is no doubt. There has been an acquisition of control, and TWA is an air carrier. As to none of the elements was any serious objection to the Board's jurisdiction interposed during the course of the proceeding subsequent to the filing of the application. The pertinent question is whether at the time that Hughes Tool acquired control of TWA it was engaged in a phase of aeronautics as contemplated by section 408 of the Act. Particularly significant in this regard is the fact that at that time Hughes Tool was obligated, and at the present time still holds valuable rights, to purchase a substantial fleet of aircraft,

at least a part of which may be held for resale for commercial airline operation. It may under its contracts, if it has not already, become a dealer in such equipment and thus engage in a phase of aeronautics, which renders unlawful the acquisition of control of the air carrier without the consent of the Board. While some basis for a reasonable doubt in the mind of the applicant as to jurisdiction may have existed at the time control of TWA was obtained, we have none in view of the present plans of the applicant. Consummation of these plans is not essential to this conclusion.[8]

Under the present and contemplated operations of Hughes Tool no adverse effect upon the public interest can be foreseen. Applicant is not now engaged in, and has no plans contemplating, production of aircraft, aircraft parts, or facilities for use in commercial air transportation. So far as concerns the possibility of TWA's acquiring from the applicant aircraft which the applicant may purchase under existing agreements, the likelihood that TWA might be forced, through the control exercised by Hughes Tool, to purchase more than the economic operations of TWA require is remote, in view of what might be referred to as the paternalistic attitude which Hughes Tool has exhibited up to the present time. We find that the continuation of this relationship between the applicant and the air carrier would not be inconsistent with the public interest. Nevertheless because of the possibilities resting therein, it is proper that in observing the obligations imposed upon us by the Act we insure against any temptation which may later come to the applicant to take advantage of the rela-

[8] *Pan American Airways Co.* v. *Civil Aeronautics Board*, 121 F. (2d) 810 (1941).

tionship to its own profit and to the detriment of the public interest. This may be accomplished by granting approval subject to such reasonable conditions as will adequately protect the public interest in the future.

The Department of Justice urges that the restraint which has been placed upon the sale of Constellation type of aircraft for use in domestic air service, together with other facts in the case, be especially considered by the Board in determining the nature and scope of any order which may be entered. It urges further that the Board's approval, if granted, be based upon the fact that Hughes Tool is not now engaged in the manufacture of aircraft or aircraft parts for commercial use, and suggests that the Board reserve jurisdiction in the proceeding for the purpose of reconsideration in the event that this condition changes in the future.

Public counsel, while not opposing approval of the application herein, recommends the adoption of more stringent conditions. In summary, the conditions proposed by him would operate to forfeit the Board's approval of the acquisition of control in the event Hughes Tool or Hughes should engage in the manufacture, production, or disposition of aircraft or aircraft parts for use in interstate, overseas, or foreign air transportation, or in the event that Hughes should attempt to influence TWA with regard to the purchase, acceptance, or use by it of any aircraft or aircraft parts in the development or design of which he himself may have participated to a substantial degree.

Applicant opposes both the proposals of the Department of Justice and the conditions suggested by public counsel as harshly restrictive of its freedom of action and more burdensome than is necessary to satisfy the objectives of

section 408. Applicant suggests that any conditions attached by the Board to its approval provide that if Hughes Tool should commence manufacturing aircraft or aircraft parts suitable for commercial use and that if TWA should desire to acquire such aircraft or aircraft parts, then TWA and Hughes Tool should be required to return to the Board for further hearing upon continuation of the relations between TWA and Hughes Tool.

The conditions proposed by public counsel are complicated and seem to be somewhat indefinite and difficult of enforcement. The object of any condition to the continued control of TWA by Hughes Tool inserted at this time in the authority granted by the Board should be to protect the public interest from any improper coercion of the air carrier by a controlling company on account of any interest which that controlling company may have in some other phase of aeronautics. This can be accomplished by a reasonable limit upon commercial transactions between the acquirer and the acquired which may be had without further consideration in this proceeding by the Board.

We are not concerned herein with questions revolving about the inhibition of section 408(b) of the Act against the creation of monopolies contrary to the public interest by the acquisition of control. Hughes Tool has no present interest in any other operating air carrier or any other enterprise having to do with any phase of aeronautics except as already stated.

On the basis of the foregoing considerations and all of the facts of record, we find that acquisition of control of TWA by Hughes Tool through the purchase and ownership of a stock interest therein will not be inconsistent with the public interest so long as commercial transactions be-

tween them or between TWA and any affiliate or subsidiary of Hughes Tool are limited to transactions involving complete items of property, the price of which does not exceed $200 each, with the further limitation that the total annual expenditure involved in such commercial transactions by either party shall not exceed $10,000. As a further condition of our approval herein TWA should furnish with its annual report each year, so long as Hughes Tool retains the control herein approved, a statement showing the total cash price of all commercial transactions between it and Hughes Tool and/or any affiliate or subsidiary thereof, the maximum and minimum item price, the number of such transactions, and the general nature of commodities involved. These restrictions and requirements, however, will not be made to affect or apply to the existing contractual right of the applicant to reacquire Constellation aircraft through TWA.

An appropriate order will be entered.

Pogue, Chairman, Warner, Branch, Ryan, and Lee, Members of the Board, concurred in the above opinion.

Order

Hughes Tool Company, an industrial corporation, having filed an application requesting that the Board approve the acquisition of control, by the purchase of common stock, of Transcontinental & Western Air, Inc., under section 408 of the Civil Aeronautics Act of 1938, as amended, and a full public hearing having been held thereon, and the Board, upon consideration of the record in this proceeding, having issued its opinion containing its findings, conclusions and decision, which is attached hereto and made a part hereof,

CAB Opinion and Order, October 17, 1944

IT IS ORDERED, That the application of Hughes Tool Company be and it is hereby approved, subject to the following conditions:

1. That said approval shall be effective so long as commercial transactions between TWA and Hughes Tool Company and between TWA and any affiliate or subsidiary of Hughes Tool Company are limited to transactions involving complete items of property, the price of which does not exceed $200 each, with the further limitation that the total annual expenditure involved in such commercial transactions by either party shall not exceed $10,000;

2. That TWA shall furnish with its annual report to the Board a supplement thereto showing the total of all cash transactions between TWA and Hughes Tool Company and/or any affiliate or subsidiary thereof, the number of such transactions, the maximum and minimum price of items of property, and the general nature of the commodities involved; and

3. That nothing herein shall restrict or affect the right of purchase by Hughes Tool Company through TWA of aircraft, the purchase of which is provided for in existing agreements between them.

Order Modifying Order Approving Acquisition of Control

[3910]

Orders
Serial Number 4437

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.,
on the 26th day of January, 1946

[CAPTION] Docket No. 1182

ORDER MODIFYING ORDER APPROVING ACQUISITION OF CONTROL

A petition in the form of a letter dated November 14, 1945, having been filed on behalf of Hughes Tool Company, an industrial corporation, for modification of the Board's Order, Serial No. 3210, issued October 17, 1944, in Docket No. 1182, in respect of the conditions attached to the Board's approval of the acquision of control by Hughes Tool Company of Transcontinental and Western Air, Inc.; and

The Board, acting pursuant to the powers vested in it by the Civil Aeronautics Act of 1938, as amended, particularly sections 205(a), 408 and 1005(d) thereof, and finding that the modification of the aforesaid Order in the manner requested would be consistent with the public interest;

IT IS ORDERED That the Board's Order, Serial No. 3210, issued October 17, 1944, in Docket No. 1182, be and it is hereby modified by striking paragraph numbered "3" of said Order and substituting therefor the following:

"3. That the terms of this order shall not restrict or affect the right of purchase by Hughes Tool Company through TWA of

(a) aircraft, the purchase of which is provided for in existing agreements between them; [3911] (b) transportation from TWA at regularly published rates;

(c) aviation fuel from TWA at prices charged by TWA to other purchasers;

(d) repairs, modifications, maintenance and overhaul service, including parts and materials necessary therewith, from TWA at prices charged by TWA to other purchasers."

CAB Opinion and Order No. E-1735, decided June 30, 1948

[The following document, which is not part of the Record of this case, has been printed in this Appendix at the instance of defendants.]

[CAPTION]

OPINION

BY THE BOARD:

This proceeding arises out of an order of the Board[1] instituting an investigation into a letter agreement between Hughes Tool Company (Toolco) and Transcontinental & Western Air, Inc. (TWA), dated January 8, 1947, and accepted by the board of directors of TWA on January 9, 1947. The letter agreement provides, among other things, for certain loans by Toolco to TWA, in exchange for the latter's 2¾-percent notes, convertible at Toolco's option into common stock of TWA, and for the reconstitution, upon the occurrence of certain events, of the board of directors of TWA. We instituted this proceeding to determine whether the letter agreement or any arrangement or action related thereto, or any change in the activities of Toolco in the field of aeronautics since October 17, 1944,[2] has resulted

[1] Order serial No. E-289, dated February 7, 1947.

[2] This is the date of the Board's approval of the original acquisition of control by Hughes Tool Company of TWA under section 408 of the Act, Docket No. 1182, *Transcontinental & W. A., Control by Hughes Tool*, 6 C. A. B. 153. The Board, however, placed several terms and conditions in its order of approval which in effect limit the right of Toolco to engage with TWA in commercial transactions involving aeronautical property. Certain clarifications were later made in this order of approval.

or will result in an acquisition of control of TWA for which its approval is required pursuant to section 408 of the Civil Aeronautics Act of 1938, as amended; to determine whether such acquisition of control, if any, is consistent with the public interest and fulfills the conditions of said section 408; and for the purpose of entering any such order or taking such further action as may be appropriate pursuant to the provisions of the Act.

Under section 408 (a) (5) of the Act, it is unlawful, unless approved by the Board, for any air carrier or person controlling an air carrier, any other common carrier, or any person engaged in any other phase of aeronautics, to acquire control of an air carrier in any manner whatsoever. By the provisions of section 408 (b) of the Act the Board is required to grant such approval upon such terms and conditions as it finds just and reasonable where that acquisition is found not to be inconsistent with the public interest, or not to violate other conditions laid down in that section.

On May 15, 1947, respondents Toolco and TWA filed a joint motion for an order to hear and determine separately the jurisdictional issue under section 408 (a) (5) of the Act before hearing and determining the issues under section 408 (b). Except for denying that portion of the motion of respondents with respect to their request for a limitation of the evidence to be adduced at the preliminary hearing, the motion was granted by order of the Board.[3] Hearings were held, pursuant to this latter order, before Examiner Edward T. Stodola in Los Angeles, Calif., on September 10 and 11, 1947.

---

[3] Order serial No. E-657, dated June 18, 1947.

CAB Opinion and Order, June 30, 1948

In a report served on January 30, 1948, the examiner concluded that there has been no change in the aeronautical activities of Toolco since the date of our original approval of control in Docket No. 1182 for which further approval is required, but recommended that we find that the transactions evidenced by the letter agreement have resulted in a further acquisition of control by Toolco over TWA, requiring our approval under section 408 of the Act. He further recommended that a second hearing be held to determine whether such further or additional acquisition of control meets the requirements of section 408 (b) of the Act. Exceptions to said report and briefs in support thereof have been filed by respondents Toolco and TWA and oral argument has been heard by the Board.

We first address ourselves to the problem whether any change in the activities of Toolco in the field of aeronautics since October 17, 1944, has affected or altered the character of the control approved in Docket No. 1182. It is clear that a substantial change in the activities of Toolco in the field of aeronautics would result in a transaction subject to the Board's jurisdiction under section 408 by reason of the fact that the character and propriety of control originally approved might be altered or changed as a result thereof.

The Aircraft Division of Toolco, which is located in Culver City, Calif., is described in the record as "a large scale experimental plant." Its principal activity at the present time consists of experimental work on aircraft accessories and armament for the Army and Navy. Some of these experiments might result in the development of products which could be dedicated to commercial airline operations. The Aircraft Division of Toolco has also developed a device which works on the radar principle and is capable of warn-

ing an aircraft pilot of his proximity to any obstruction. These devices are now being sold by Toolco on a nonprofit basis to all commercial airlines that wish them. The sale of the radar device will also be made to TWA at cost. Purchase orders from that carrier have been received by Toolco, which recite that the purchases would be made subject to the terms and conditions of the Board's order approving control by Toolco as amended in Docket No. 1182.[4] Further aeronautical activities of Toolco consist of conversion work on the 14 C–47 aircraft, which represent Army surplus equipment acquired by Toolco for resale since January 1947.

The present aeronautical activities of Toolco clearly establish it as a person engaged in a "phase of aeronautics" within the meaning of section 408 (a) (5) of the Act. However, the record shows that there has been no substantial change in Toolco's operations in the field of aeronautics since the original order of approval of October 17, 1944, which would require our further consideration under section 408 of Toolco's control of TWA.

There is also before us, however, the question whether the transactions evidenced by the letter agreement of January 8, 1947, have resulted or will result in an acquisition of control of the carrier for which Board approval is required pursuant to the provisions of section 408 of the Act.

Toolco has never held more than 46.1 percent of the outstanding stock of TWA. The application for the original approval of control in Docket No. 1182 recited that Toolco owned 45.6 percent of 965,083 shares of TWA stock then

[4] On October 29, 1947, the Board, by order serial No. E-922, further modified the order approving the acquisition in Docket No. 1182 so as to permit Toolco to sell the radar warning units to TWA.

outstanding. At the time of the hearing herein it held 452,100 of the 985,984 shares of TWA stock issued and outstanding, again representing approximately a 45-percent stock interest in the carrier. The remaining stock holdings in the carrier are widely dispersed.

The letter agreement had its genesis in the failure of TWA and its principal stockholder, Toolco, to agree on a program of financing the carrier's capital needs after the termination of the war. As early as January 1945 there were some preliminary discussions between the management of TWA and the executive vice president of Toolco with respect to financing for the carrier. Both TWA and Toolco then recognized that any program of large-scale financing for the carrier ought to include a substantial measure of equity financing. Efforts directed toward agreement on a plan for additional financing, however, reflected a gradual but ever widening rift between the TWA management and Toolco with respect to operating plans and policies for the carrier.

Meanwhile, during November 1945 a program of debt financing was entered into with the Equitable Life Assurance Society of the United States, whereby Equitable purchased an issue of 3-percent sinking-fund debentures from the carrier in the principal amount of 30 million dollars. Then, in May 1946, Equitable purchased an issue of 2¼-percent sinking fund debentures in the amount of 10 million dollars from TWA. Sinking-fund payments of 4 million dollars annually were required under the two series of debenture loans. The Equitable loan was an equipment loan in that 80 percent of the proceeds thereof were to be used for the purchase of equipment.

There is nothing in the record to indicate that a successful flotation of stock in large volume could not have been

accomplished at any time during 1945 and during the greater part of 1946. Several plans for financing were explored during this period, but differences of opinion between the management of the carrier and its principal stockholder delayed favorable action on a definite program. In the end nothing was done until an alleged unfavorable turn in the security market about September 1946 made any large-scale equity financing difficult of promotion.

Toward the end of 1946 TWA's financial condition had become critical. Efforts at additional financing had failed. The record shows that in the closing months of 1946 the carrier could not attract any capital and was facing bankruptcy. The record further shows that Toolco was willing to be of financial assistance but was unwilling to furnish additional money to save the carrier unless it had further control of the spending thereof. The letter agreement of January 8 finally became the means chosen to reorganize the carrier and to save it from bankruptcy.

The agreement provides, among other things, for (1) a loan by Toolco to TWA in the amount of 10 million dollars and the issuance to Toolco of 2¾-percent notes due June 2, 1956, for such loan with an option to convert said notes into common stock of TWA; (2) diligent endeavor on the part of Toolco to arrange a 40-million-dollar loan of credit with the Reconstruction Finance Corporation;[5] (3) a rearrangement of the Equitable financing under the 40-million-dollar debenture loan; (4) a reconstitution of the

[5] The loan contemplated was also to be an equipment loan and was not being pressed immediately after the acceptance of the letter agreement because it was then concluded that the carrier did not need additional equipment. However, attempts were being made about the time of the hearing herein to secure a general credit from the RFC in the reduced amount of 10 million dollars.

board of directors of TWA so that the majority thereof will be nominees of Toolco;[4] and (5) a requirement that no change be made in the bylaws of the carrier without the written consent of Toolco until all the changes contemplated by the foregoing provisions have been made.

The notes may be converted by Toolco at any time prior to maturity into common stock of TWA at a price per share which shall be the average of the prices at which the last sale of such stock was made on the New York Stock Exchange on each of the last 10 business days preceding receipt by the carrier of notice of exercise of the option to convert, unless such average shall be less than $5 per share (the par value of the stock), in which event the conversion price shall be $5. TWA, however, may require Toolco to convert, at a price per share to be calculated by the same method, by notifying Toolco to this effect on January 1, 1950.

To provide for the possible conversion, 2,000,000 shares of TWA common stock at $5 par value have been authorized. Thus, if Toolco were to acquire the entire 2,000,000 shares authorized at the minimum conversion price, it would then be owner of about 80 percent of the common

---

[4] Prior to January 8, 1947, all directors of the carrier were nominees of Mr. Jack Frye, then president of TWA. Immediately after the consummation of the letter agreement, the board of directors of TWA was reconstituted and 13 directors were added to the original 11 then on the board. The directors added were all nominees of Toolco. The regular annual stockholders' meeting of the carrier was held on April 24, 1947. The TWA board was then reduced from 24 to 14. The present board is dominated by Toolco nominees and there exists little probability of conflict over Toolco's policy for TWA. Moreover, the bylaws of the carrier were amended at said annual stockholders' meeting to make the new board more responsive to the stockholders' wishes.

stock of TWA issued and outstanding.[1] It should be noted that stock in TWA carries with it no preemptive rights, so that upon the issuance of additional shares present stockholders, other than Toolco, may not require that they be permitted to subscribe to shares proportionate to their present holdings in the carrier. Accordingly, the letter agreement gives Toolco an inalienable right to acquire up to a possible 80 percent of the stock in TWA. It should also be noted that the convertible notes given under the letter agreement further provide that TWA may not make payments on Toolco's loan before payment in full is made on the 40-million-dollar debenture loan held by Equitable, and any advances made to the carrier by the RFC.

On December 26, 1947, Toolco, in further agreement with TWA, waived all its rights to require payment of the aforementioned notes in money or in any form other than stock in the carrier in accordance with the conversion provisions of such notes. It was specified, among other things, that such waiver does not constitute an election by Toolco to convert said notes into stock as of the date of waiver. In consideration of this waiver, TWA agreed that it would enter into no final contract with the Lockheed Aircraft Corporation pursuant to negotiations then pending for the purchase of a number of Constellation Model 749 aircraft and spare parts, unless Toolco should have approved such contract of purchase in full. Such approval was subsequently given by Toolco on the condition that Lockheed Aviation Corporation enter into an agreement with TWA

[1] If Toolco converted at $15, the closing price of TWA stock on June 18, 1948, the date of the writing of this opinion, it would then own approximately 67 percent of all TWA stock outstanding.

requiring performance by Lockheed of certain modification work without cost to TWA. Toolco consented to subordinate the repayment due it in money under the convertible notes in order to assist the carrier in financing the purchase of the Lockheed equipment through a group of 14 lending banks. Under the circumstances, however, eventual conversion of the notes into stock cannot be avoided, save by bankruptcy of the carrier.

Under the section of the Civil Aeronautics Act involved, we are directed to assert jurisdiction over the acquisition, to the extent made necessary by the facts of record, by any person engaged in a phase of aeronautics of the control of an air carrier through the purchase of the latter's stock, or in any other manner whatsoever. Once the necessary jurisdictional elements are present, our action under the Act is mandatory. That TWA is an air carrier and that Toolco is a person engaged in a phase of aeronautics within the meaning of section 408 are not questioned. Since we have previously approved the acquisition of control of TWA by Toolco, the issue we face here is whether there has been a further or additional acquisition of control over the carrier within the meaning of the statute.

This question is a relatively simple one. It turns upon two basic problems. First we must decide whether, in view of our ratification of the relationship between Toolco and TWA on October 17, 1944, there can be another or additional acquisition of control as a matter of law; the second problem to be determined is whether, as a matter of fact, an additional acquisition of control is present in this proceeding.

That there can be more than one acquisition of control of an air carrier, as a matter of law, appears to be beyond

doubt. We have not heretofore had occasion to render decision upon the question whether, once an acquisition of control of an air carrier has been approved pursuant to section 408, subsequent transactions can result in a new or additional acquisition of control which must also be approved under that section. However, in the *Northeast* case[8] we took the position that the existence of control of an air carrier would not prevent us from asserting jurisdiction in a case where the extent or effectiveness of control was later increased.

The Interstate Commerce Commission has likewise, under an almost identical statute,[9] rendered decisions on the issue of the Commission's jurisdiction in cases where varying degrees of control already existed, and where further control was sought to be established.[10] It has consistently taken the position that the creation of a substantive measure of additional control, through stock purchase or otherwise, in

[8] *Railroad Control of Northeast Airlines*, 4 C. A. B. 379 (1943).

[9] Section 408 of the Civil Aeronautics Act was borrowed, almost word for word, from section 213 of the Motor Carrier Act of 1935 (49 Stat. 555). Section 213 on the other hand, was patterned after paragraphs (4) and (5) of the Interstate Commerce Act, of which the Motor Carrier Act became Part II. Section 213 was repealed by the Transportation Act of 1940 (54 Stat. 905). This latter Act amended section 5 to add substantially the provisions of the repealed section 213.

[10] Accordingly, persuasive weight may be given herein to decisions of the Commission construing the word "control" and dealing with the concept of acquisition of control or changes in the extent or effectiveness thereof in relationships comparable to that before us in the instant proceeding. *Acquisition of Marquette by TWA—Supplemental Opinion*, 2 C. A. B. 409 (1940); *American President Lines et al., Petition*, 7 C. A. B. 799, 811 (1947); Cf. *U. S. Nav. Co. v. Cunard S. S. Co.*, 284 U. S. 474, 480–481 (1932).

an acquiring stockholder, whose preexisting control of a carrier was for one reason or another legally incomplete, represents an acquisition subject to the approval of the Commission under the Interstate Commerce Act.[11]

Section 408 of the Act does not define the "control" to be approved thereunder, nor does the statute specify the completeness of the acquisition over which we may assume jurisdiction. We have consistently held that the term "control" is not an absolute or unqualified concept, but rather one which may import various meanings and apply to and cover a variety of situations.[12] On the part of the person exercising control, the term implies the existence of a right or power to direct or dominate, whether actually exercised or existing in potential use. As the right or power to direct or dominate the affairs of a corporation, control cannot be held to constitute a unitary concept, which, once approved, covers every degree of direction or domination of the controlled carrier. Obviously the Act confers no jurisdiction where what is sought to be approved constitutes less than control. But it is just as obvious that there are many de-

grees of control, and that approval may be granted under the statute to an acquisition under which the controlling person may direct or dominate many but not all of the affairs of the controlled corporation. In the case of control acquired through the purchase of stock, the extent of control existing, absenting other relationships indicating influence on the part of the acquirer over the controlled company, will depend upon the specific quantum of stock interest held by the acquirer and the rights and privileges that attach thereto. In brief, a controlling person owning a substantial portion of the controlled carrier's stock may have acquired an actual or *de facto* control but not the full and complete legal control which flows from ownership of all, or substantially all, of the issued and outstanding stock of the carrier.

Full legal control of a corporation obviously implies power to dictate the complete corporate activities of the corporation. Both Toolco and TWA are Delaware corporations. Section 26 of the Delaware Corporation Law[13] provides that a corporation may amend its certificate of incorporation by adding to or decreasing its corporate powers, or by substituting certain powers and purposes in place of those already present therein, or by increasing or decreasing its authorized capital stock or reclassifying it, or by making any other change or alteration in its certificate that may be desired. Every such amendment, however, requires the affirmative vote of a majority of the stock of that corporation entitled to vote on such amendment. Under

[13] Revised Code of Delaware 1935, chap. 65, art. 1, par. 2058, sec. 26.

section 39 of the Delaware Corporation Law,[14] proceedings for dissolution of a corporation must be approved by two-thirds of the voting stock of said corporation, and under section 59 of that law[15] an agreement of merger between a Delaware corporation and another such corporation, or a corporation of any State, must, at least insofar as the Delaware corporation is concerned, have the approval of two-thirds of the total number of shares of its capital stock.

Toolco's 45-percent stock interest in TWA has given it sufficient power to determine many but not all of the corporate activities of the carrier. It now has sufficient power and influence to control the board of directors of TWA and thereby to manage and direct the usual day-to-day business and financial affairs of the airline. But unless assisted by other stockholders in the carrier, Toolco would, as the recital of the applicable Delaware law indicates, need at least a numerical majority to satisfy the provisions of the Delaware law with respect to amending the certificate of incorporation of the carrier, and at least a two-thirds stock interest in the carrier to take action with respect to such vital matters as merger, consolidation, or dissolution of TWA.

The Board's jurisdiction is challenged by respondents on the ground that the transactions represented by the letter agreement have not resulted, and could not result, in an

---

[14] Revised Code of Delaware 1945, chap. 65, art. 1, par. 2071, sec. 39, as amended by 45 Laws of Delaware (1945) chap. 157, sec. 3, pp. 596–598.

[15] Revised Code of Delaware 1935, chap. 65, art. 1, par. 2091, sec. 59, as amended by 43 Laws of Delaware (1941) chap. 132, sec. 12, pp. 458–461.

additional or further acquisition of control either as a matter of law or as a matter of fact.

Respondents argue that the Board, in October 1944, in Docket No. 1182, approved the highest possible degree of control and that our decision in the original control proceeding is a complete and definitive answer to the question before us here. They point to the Board's final order in that proceeding, approving "the acquisition of control, by the purchase of common stock, of Transcontinental & Western Air, Inc.," and contend that the effect of the Board's order was to permit Toolco to acquire TWA stock without any limitation as to the amount of stock, time of purchase, or any other factor. In other words, it is argued that the Board's order in Docket No. 1182 originally approving control contemplates and covers the very type of transactions represented by the letter agreement of January 8, 1947. Accordingly, it is urged that the language of the Board's order in Docket No. 1182, approved full and complete control of TWA by Toolco and thus forecloses the present issue as a matter of law.

Perhaps an essential approach to an interpretation of the effect of the order in Docket No. 1182 is a recognition of the fact that our decisions in previous control proceedings, whether with respect to the issue of our jurisdiction, or the question of the consistency of the control acquired with the public interest, clearly relate to the quantum of control represented by the extent of ownership of stock in the controlled company at the time of the application.[16]

---

[16] See, for example, *Railroad Control of Northeast Airlines, supra; Pan Am. Airways, Inc., Aerovias de Guatemala, supra; Pan Am. Airways, Inc., Aeronaves de Mexico, supra; Western A. L., Acquisition of Inland A. L.*, 4 C. A. B. 654 (1944); *Pan Am.*

In general, the important issue of jurisdiction presented for our determination in acquisition proceedings is whether or not the extent of ownership and influence established to exist in the acquirer has resulted or will result in "control" of the air carrier involved. In cases where the record has supported our assertion of jurisdiction, our decisions indicate whether the degree of domination or influence shown to exist in the acquirer was consistent with the public interest and met the requirements of section 408 (b).

To determine the precise scope of the approval we granted in Docket No. 1182, however, it is necessary to reexamine our final order therein and to interpret its purpose. It is elementary, of course, that in interpreting an administrative order it is necessary to read and construe the order and the accompanying opinion as a whole.

The opinion upon which the order is based was clearly couched in terms of factors then present and our order in that proceeding is based upon findings relating to the degree of control represented by the extent of the stock interest existing in the control carrier at the time of the Board's original order of approval. Our opinion in Docket No. 1182 recites that "control" for the purpose of that proceeding was stipulated, and the principal issue facing the Board for decision was whether Toolco, the acquirer, was a person engaged in a phase of aeronautics, within the meaning of section 408 (a) (5) of the Act. Finding that to be the fact, and together with the facts that the controlled corporation was an air carrier and that "control" was stip-

---

Airways, Acquisition of China National, supra; American Air., Control of American Export Air., 6 C. A. B. 371 (1945); *National-Caribbean-Atlantic Control Case*, 6 C. A. B. 671 (1946); and *American Air., Control of Mid-Continent Air.*, 7 C. A. B. 365 (1946).

ulated, we approved the relationship subject to certain limitations relating to commercial transactions between Toolco and TWA. It is evident that in passing upon Toolco's original application for approval of its acquisition of control of the carrier we did not concern ourselves with more than the specific degree of control involved in the record before us. We stated:

> For the purpose of this proceeding applicant (Toolco) concedes that the stock *now owned* constitutes control of the carrier. There is very little room to doubt that for all practical purposes such control has existed since the end of 1940 at least when 42.1 percent was owned. Ownership of so great a proportion of outstanding stock, the remainder of which is dispersed among many owners, represents such a dominating influence in the affairs of the corporation that, in the absence of circumstances indicating the contrary, control, either affirmative or negative, must follow. Much smaller interests have been found so to result (*supra*, p. 154; emphasis supplied).

Our opinion also set forth Toolco's history of stock ownership in TWA from 1939 to the date of the opinion, when Toolco owned about 45 percent of TWA's shares then outstanding. Under the provisions of section 408, we were then directed to determine whether Toolco's control of TWA, stemming from the stock interest it then had in the carrier, was consistent with the public interest. On that question we then found as follows:

> • • • we find that acquisition of control of TWA by Hughes Tool through the purchase and ownership of

a stock interest therein will not be inconsistent with the public interest * * * (*supra*, p. 157; emphasis supplied).

It should be clear from the foregoing that we did not intend to, and did not, grant a blanket, unlimited, *in futuro* approval of the relationship between Toolco and TWA. All parties to the original proceeding concerned themselves with the control relationship then present. In construing our own order here, we have searched the contentions made by the parties to the original control proceeding in an effort to discover matters which would demonstrate a possible intent on our part to make the approval granted in Docket No. 1182 an unlimited one. But the record in that proceeding is clear to the effect that issue of a blanket *in futuro* approval was not raised or urged upon the Board. While the Board could have approved, upon an appropriate finding, more than that degree of control submitted by the applicant in the original control proceeding, such an unlimited approval would have been made in clear, unmistakable language. A reading of our opinion and order, in the light of the facts of record in that proceeding, definitely fails to show that such approval was either contemplated or granted. Indeed, it would be unreasonable to assume that our approval then of Toolco's 45-percent stock interest in TWA would forever constitute an unlimited ratification of any and all future acquisitions of ownership interest in the carrier.

In view of the foregoing, we do not believe that our order in Docket No. 1182 approved more than the specific quantum and degree of control represented by the 45-percent stock interest then owned by Toolco. That order shows

quite plainly that the Board was then dealing in terms of the then existing situation. In other words, the Board there approved a preexisting control relationship on a record which neither proposed nor showed prospects of a further acquisition of ownership interest in the carrier on the part of the acquirer.

Respondents insist that the mere existence of the words in our order approving "the acquisition of control, by the purchase of common stock" is sufficient to dispose of the issue of the type of approval we granted. But the words "by the purchase of stock" cannot be held to be words of art, importing a blanket, technical meaning and covering in umbrella-like fashion all subsequent transactions under which the acquirer may have obtained an additional substantive interest in the carrier. Rather the words "by the purchase of stock" may well be regarded, without impropriety, particularly when read in the light of the opinion supporting their use, as mere words of description, setting forth the manner in which control was acquired. It bears repeating that there is no support in either the record or the opinion for the contention that the words in question were intended as an expression of blanket approval of the relationship under consideration.[17]

Respondents further contend that, even if the letter agreement could result in a further acquisition as a matter

---

[17] The Interstate Commerce Commission in the *Louisiana & Missouri* control case, *supra*, approved "further control" by one railway carrier over another as a jurisdictional acquisition within the meaning of section 5 (2) of the Interstate Commerce Act after it had previously permitted the acquirer to acquire "control through stock ownership", a phrase almost identical to that used in Docket No. 1182, which respondents claim approves control without limitation.

of law, the record in this proceeding fails to establish an additional acquisition as a matter of fact because (1) Toolco has not yet exercised its option under the letter agreement to acquire any greater stock interest in the carrier, and (2) Toolco at all times has exercised, and without converting the notes into stock can continue to exercise, complete legal control of the carrier.

We find that the right on the part of Toolco to acquire the additional TWA stock represented by the conversion feature of the notes has resulted in an increased measure of substantive control over the carrier and its corporate affairs. It would not appear that the actual exercise of the conversion privilege by Toolco is necessary to establish our jurisdiction. The existence of the nondefeasible conversion right, under agreements whereby TWA can accelerate but not avoid the conversion, substantially increases Toolco's power over the carrier and this power is of such a nature as to require our approval. Under Delaware law Toolco, with a majority stock ownership in TWA, alone and on its own initiative, can perform such important corporate acts as amending TWA's certificate of incorporation by adding to or decreasing its corporate powers, or by substituting certain powers and purposes in place of those already present therein, or by increasing its authorized capital stock or reclassifying it, or by making other changes or alterations in said certificate. Moreover, a two-thirds common-stock interest in TWA would enable Toolco, for the first time and using its sole voting power, to satisfy the provisions of Delaware law with respect to such important matters as merger, consolidation, or dissolution of the carrier.

The further basis for respondent's argument that Toolco's control over TWA has not increased and cannot increase as a matter of fact may be very briefly set at rest. It turns upon the claim that Toolco, by controlling management proxies since October 17, 1944, has, together with such proxies, had the power to take any corporate action necessary with respect to the carrier in compliance with Delaware law. An answer to this claim rests upon the distinction between having the required voting power under Delaware law upon the vote of Toolco alone, as against having such power dependent upon the use of proxies to vote stock owned by others, who may not always acquiesce. Further, while Toolco has been able to secure proxies sufficient to enable it to control the day-to-day affairs of the carrier, it may not be able to obtain that acquiescence in matters such as merger, consolidation, or dissolution of the carrier. But, even if it be assumed that Toolco could at all times obtain sufficient votes to put in effect any desired corporate action, the fact remains that the letter agreement, through the retirement of the indebtedness therein created by conversion to stock, makes unnecessary any dependence upon other stock interests in TWA. Certainly, therefore, a control relationship has been established where the controlled company, which formerly responded to orders from one person with assistance from others by proxies, or otherwise, now responds or may respond to one person at its sole instance.[18]

---

[18] Significant also is the fact that under the supplementary agreement of December 26, 1947, modifying the letter agreement, TWA was required to come to Toolco to obtain consent of the latter before purchasing additional equipment. Certainly this transaction also represents an element of new and increased control arising out of the letter agreement.

On the basis of the foregoing considerations and all facts of record, we find that the transactions evidenced by the letter agreement between Toolco and TWA, dated January 8, 1947, and accepted by the board of directors of TWA on January 9, 1947, have resulted in a further acquisition of control by Toolco over TWA within the meaning of section 408 of the Act. Accordingly, we are ordering that a hearing be held on the merits of the substantive case in accordance with the provisions of paragraphs (2) and (3) of our order of investigation of February 7, 1947, serial No. E-289.

An appropriate order will be entered.

O'Connell, Chairman, Ryan, Lee, and Jones, Members of the Board, concurred in the above opinion. Adams, Member, did not take part in the decision.

ORDER

The Board, by order serial No. E-289, adopted February 7, 1947, having instituted an investigation in the above-entitled proceeding for the purpose of (1) determining whether a certain letter agreement dated January 8, 1947, between Hughes Tool Company and Transcontinental & Western Air, Inc., (hereinafter called TWA), accepted by the board of directors of TWA on January 9, 1947, or any arrangement or action related thereto, or any change in the activities of Hughes Tool Company in the field of aeronautics since October 17, 1944, has resulted or will result in an acquisition of control of TWA for which Board approval is required pursuant to section 408 of the Civil Aeronautics Act of 1938, as amended; (2) determining whether such acquisition of control, if any, is consistent

with the public interest and fulfills the conditions of s
section 408; and (3) entering any such order or taking
such further action herein as may be appropriate pursu
to the provisions of the Civil Aeronautics Act of 1938,
amended; and

The Board, by order Serial No. E-657, adopted June
1947, having ordered, *inter alia*, that a hearing first be h
to determine whether the transactions referred to in pa
graph (1) above have resulted or will result in an acqui
tion of control of TWA for which Board approval
required pursuant to section 408 of the Civil Aeronaut
Act of 1938, as amended, and that the hearing on the oth
issues raised by its order of February 7, 1947, be defer
pending the Board's decision on the aforesaid issue; and

The Board, after a public hearing and oral argume
with respect to the matters referred to in paragraph (
hereof, having issued its opinion containing its findin
conclusions, and decision which is attached hereto and ma
a part hereof,

It is Ordered, That a hearing be held with respect to t
issues contained in paragraphs (2) and (3) of the Boar
order of investigation of February 7, 1947, referred
above.

CAB Opinion and Order No. E-4701, decided October 6, 1950

[The following document, which is not part of the Record of this case, has been printed in this Appendix at the instance of defendants.]

[CAPTION]

Opinion

By the Board:

In a prior opinion and order, 9 C. A. B. 381, we held that the transactions evidenced by a letter agreement dated January 8, 1947, between the Hughes Tool Company and Trans World Airlines, Inc., (formerly Transcontinental & Western Air, Inc.) and accepted by the board of directors of TWA on January 9, 1947, resulted in further control of TWA by the Tool Company, for which Board approval is required under the provisions of section 408 (a) of the Civil Aeronautics Act.[1] We thereupon ordered further hearings on the merits, in accordance with provisions of paragraphs (2) and (3) of our order of investigation of February 7, 1947, serial No. E–289. The fundamental issue here is whether the further control sought to be held is consistent with the public interest under the language of section 408 (b) of the Act.

[1] In *Transcontinental & W. A., Control by Hughes Tool*, 6 C. A. B. 153 (1944) under Docket No. 1182 we approved an acquisition of control of TWA by the Hughes Tool Company at a time when the latter held approximately a 45-percent stock interest in the carrier. Pursuant to the transactions evidenced by aforesaid letter agreement, the Tool Company increased its stock interest in the carrier to approximately 73 percent.

After appropriate notice, public hearings were held before Examiner Edward T. Stodola in Los Angeles, Calif., from October 3 through October 7, 1949. Following briefs to him by all parties, the examiner issued his report, attached hereto, recommending that the Board approve the further acquisition of control of TWA by the Hughes Tool Company, subject to the same conditions imposed by the Board in Docket No. 1182. Public counsel filed exceptions to the report of the examiner and a brief in support thereof. No party has requested oral argument.

Public counsel argued that the control of TWA exercised by the Hughes Tool Company and Mr. Hughes, particularly during the period from October 17, 1944, to January 7, 1947, has been detrimental to the interest of the carrier and the public interest. However, he concluded that disapproval of the additional stock acquisition would not adequately remedy or mitigate the existing situation. He further argued that the Board does not have adequate power to deal with the situation, and was left no alternative than to approve such additional stock acquisition.

The record in this proceeding does not permit us to reach any other conclusion than that reached by the examiner, viz., that the further acquisition of control should be approved as being consistent with the public interest and the requirements of the Act. Accordingly, after consideration of the entire record and the examiner's report, together with the contentions of each party in briefs filed in this proceeding, we agree with and adopt the findings, conclusions, and recommended decision of the examiner.

In view of the foregoing and all facts of record, we find—

1. That the acquisition of further control of TWA by the Hughes Tool Company as a result of the transactions

evidenced by the letter agreement of January 8, 1947, should be approved as being consistent with the public interest and the requirements of the Act; *provided,* however, that any control exercised by the Hughes Tool Company over TWA pursuant to our approval herein shall be subject to the terms and conditions imposed in our order of October 17, 1944, Docket No. 1182, as amended.

2. That the proceeding instituted by our order, serial No. E-289, dated February 7, 1947, should be terminated.

An appropriate order will be entered.

Lee, Jones, and Adams, Members of the Board, concurred in the above opinion. Rentzel, Chairman, and Ryan, Vice Chairman, did not take part in the decision.

ORDER

A full public hearing having been held in the above-entitled proceeding, and the Board, upon consideration of the record, having issued its opinion containing its findings, conclusions, and decision, which is attached hereto and made a part hereof;

IT IS ORDERED, 1. That the additional acquisition of control of Trans World Airlines, Inc., (TWA) by Hughes Tool Company (Toolco), found to exist by the Board's opinion and order of June 30, 1948, (9 C. A. B. 381) be and it hereby is approved, *provided,* that such additional control shall be exercised in accordance with the terms and conditions of the Board's opinion and order, 6 C. A. B. 153, as amended, approving the original acquisition of control of TWA by Toolco.

2. That the investigation instituted by order serial No. E-289, dated February 7, 1947, be and it hereby is terminated.

REPORT OF EXAMINER EDWARD T. STODOLA

Recommended that the Board approve the further acquisition of control of Trans World Airlines, Inc., (formerly Transcontinental & Western Air, Inc.) which resulted from the transactions evidenced by the letter agreement, dated January 8, 1947, between the Hughes Tool Company and TWA, subject to the same conditions imposed by the Board in its approval of October 17, 1944, of the Hughes Tool Company-TWA relationship under Docket No. 1182 (6 C. A. B. 153, 158).

Recommended that the proceeding instituted by the Board by order serial No. E-289, dated February 7, 1947, be terminated.

APPEARANCES:

Thomas A. Slack (Andrews, Kurth, Campbell & Bradley) for Hughes Tool Company.

Gerald B. Brophy (Chadbourne, Wallace, Parke & Whiteside) for Trans World Airlines, Inc.

Harold Morgan and *James L. Highsaw, Jr.*, Public Counsel.

PRELIMINARY STATEMENT

On October 17, 1944, in Docket No. 1182, the Civil Aeronautics Board approved an acquisition of control by the Hughes Tool Company (hereinafter referred to as Toolco) of Transcontinental & Western Air, Inc., (now operating under the corporate name of Trans World Airlines, Inc.,

and hereinafter referred to as TWA) under section 408 of the Civil Aeronautics Act of 1938, as amended, subject to certain conditions.[1] In an opinion and order dated June 30, 1948, the Board found that the transactions evidenced by a letter agreement, dated January 8, 1947, between Toolco and TWA, and accepted by the board of directors of TWA on January 9, 1947, have resulted in a further acquisition of control by Toolco over TWA for which approval is required under said section 408 of the Act.[2] The Board thereupon ordered additional hearings to determine whether the new or further acquisition of control found to exist is in the public interest and fulfills the conditions of section 408, and whether any further order or action by the Board may be appropriate pursuant to the provisions of the Act.

After appropriate notice, public hearings were held at Los Angeles from October 3 to October 7, inclusive, 1949.[3] Briefs were filed with the examiner by all parties on February 14, 1950.[4]

THE ISSUES

Since TWA is an air carrier and Toolco is a "person engaged in any other phase of aeronautics,"[5] the further

---

[1] *Transcontinental & W. A., Control by Hughes Tool,* 6 C. A. B. 153 (1944).

[2] *Transcontinental & W. A., Control by Hughes Tool,* 9 C. A. B. 381 (1948).

[3] A part of the evidence received at the hearings has been withheld from public disclosure until further order of the Board. See order serial No. E-3380, dated September 27, 1949.

[4] Throughout the preliminary procedural steps in the second phase of this proceeding, respondents Toolco and TWA made known their desire to reserve all rights to contest the Board's opinion and order of June 30, 1948, in the event the Board's decision on the merits of the substantive case is adverse. See Report of Prehearing Conference served February 11, 1949, page 8: transcript of hearing herein, page 3.

[5] See findings at pages 198 and 199, *infra.*

acquisition of control of the former by the latter falls within the provisions of section 408 (a) (5) of the Act, which makes such an acquisition unlawful unless approved by order of the Board. Section 408 (b) of the Act provides that the acquisition shall be approved, upon such terms and conditions as the Board shall find to be just and reasonable and with such modifications as the Board may prescribe, unless the Board finds that the acquisition of control "will not be consistent with the public interest," or that certain conditions specified in that section of the Act will not be fulfilled.

While all parties agreed that the ordering part of the Board's order of June 30, 1948, disposing of the jurisdictional phase of this proceeding, would govern as the issues in this second phase of the case, there was deep disagreement as to the precise scope of the inquiry ordered by the Board. On the question whether the further acquisition of control over TWA should be approved, the aforesaid part of the Board's order of June 30, 1948, ordered hearings with respect to the issues contained in paragraphs (2) and (3) of the Board's order originally instituting these proceedings.[4] Paragraph (2) of the latter order merely restates the tests of approval provided for in section 408 (b) of the Act, which, once jurisdiction has been established, are enjoined upon the Board in any event. Paragraph (3) of the same order provides for taking any such other action (presumably other than approval or disapproval of the further acquisition of control) as may be appropriate pursuant to the provisions of the Act. Accordingly, in determining whether the further acquisition should be approved

[4] Order serial No. E-289, dated February 7, 1947.

the primary question to be resolved is whether the transaction here under scrutiny is, or is not, consistent with the public interest.

Respondents Toolco and TWA both take the position that an inquiry as to whether or not the new or further acquisition of control which resulted from the letter agreement meets the public interest test of section 408 (b) of the Act must necessarily be limited to an examination of possible conflict between the aeronautical activities of Toolco and the increased measure of its control over TWA as an air carrier. In other words, it is their view that the Board in this second phase of the proceeding can look only to such conflict with the public interest as may exist, if any, between the aeronautical activities of the controlling company and the well-being of TWA as a certificated air carrier. Under this view, the hearings which are the subject of this report would have been limited to an inquiry into Toolco's plans, present and contemplated, for its aircraft division, and the propriety of approving the further acquisition would be tested only by the conflict of interest, if any, between Toolco's aeronautical pursuits and its control over the carrier. Public counsel, on the other hand, took the position that the inquiry must necessarily be a broader one; that in a control case of the type here under consideration the question as to whether the further acquisition of control is or is not in the public interest depends upon the application of the criteria set forth in section 2 of the Act to the facts and circumstances respecting Toolco's actions and policies with regard to TWA in the matters of financing, management, and related activities; and that in order to determine whether Toolco's increased measure of control is in the public interest it is pertinent to examine the

manner of the general exercise of Toolco's control since the date of the Board's original approval thereof.

The examiner was compelled to reject respondents' view.[7] There is nothing in the Act, however the problem of the true intent of Congress is approached,[8] which would have

---

[7] Both at prehearing conference held February 4, 1949, as reflected in the Report of Prehearing Conference served February 11, 1949, pages 3 and 4, inclusive, and at the preliminary stages of the hearing herein, transcript pages 2 to 5, inclusive.

[8] Apparently upon the assumption that the meaning and significance of the phrase "public interest" were well understood, its purported function in the statute received little consideration from Congress, either at committee hearings or in debates on the floor. This phrase offers splendid illustration of the fact that critical words or phrases of statutes are rarely, if ever, entirely unambiguous or susceptible of precise definition or plain meaning. As is common with terms of this nature, their definition more often than not depends upon the interests of the party or person attempting to clothe the phrase with meaning.

It is, of course, elementary that a statute must be interpreted as a whole. Accordingly, it is necessary that the public-interest criteria set forth in the declaration of policy contained in section 2 of the Act be applied to the facts when determining whether a transaction arising under section 408 is consistent with the provisions thereof. It will, however, be observed that by virtue of the express language of section 2 the factors listed therein are not to be treated as exclusive.

Moreover, it will be remembered that under the Air Mail Act of 1934 (48 Stat. 933, Ch. 466) it was unlawful for any corporation engaged in any phase of aeronautics to acquire or hold any stock interest in a corporation holding an air mail contract. The Civil Aeronautics Act of 1938, which repealed the above-mentioned provisions of the Air Mail Act of 1934, provides that the Board may approve the acquisition of control of an air carrier by a corporation engaged in any other phase of aeronautics. But in clothing the Board with this authority, it is clear that Congress intended that it have very extensive powers over acquisitions of air carriers. See Report of Federal Aviation Commission, pp. 69-71 (1935); Hearings before Committee on Interstate and Foreign Commerce, House of Representatives, H. R. 5234, 75th Cong., 1st Session, pp. 265-266, 341-344; Hearings before Senate Subcommittee on Interstate Commerce, U. S. Seenate, S. 2, 75th Congress, 1st Session, pp. 414-415;

given the examiner the authority to proscribe the inquiry in this second phase of the proceeding to the limited question urged upon him by the respondents. On the contrary, it appears clear that, once jurisdiction over an acquirer of an air carrier is found to exist, the testing of the propriety of approving the acquisition requires a rather broad inquiry into the relationships between the controlling and the controlled companies.

An examination of the additional control relationship here involved in the light of the standards set forth in section 2 of the Act, which the Board has repeatedly found to be necessary in similar cases,[9] requires inquiry into the actions and policies of the controlling company with respect to TWA for the period during which the prior-approved control existed. Aside from any undesirable influence on an air carrier which might arise because of the acquirer's interest in a given phase of aeronautics, an acquirer of an air carrier is not without responsibility in other respects for an air carrier's general capacity to perform its public responsibilities. For inevitably the controlling company, by virtue of its investment in the acquired carrier, will endeavor to make itself accountable—as indeed the acquirer here under scrutiny had—for the managerial efficiency, the operating economy, and the financial integrity of the controlled carrier. Accordingly, in determining whether or not

---

and Hearings before Committee on Interstate and Foreign Commerce, House of Representatives, H. R. 9738, 75th Congress, 3rd Session, pp. 44-45.

[9] *Western A. L., Acquisition of Inland A. L.*, 4 C. A. B. 654, 656 (1944); *National-Caribbean-Atlantic Control Case*, 6 C. A. B. 671, 676 (1946); *American Air., Control of Mid-Continent Air.*, 7 C. A. B. 365, 372-373 (1946); and *Central Air., Control Case*, 10 C. A. B. 538, 546-547 (1949).

a particular acquisition should be approved, it is necessary to consider the over-all impact of the acquirer's plans and policies with respect to the controlled carrier.

It must, however, be remembered that in the instant proceeding we are dealing with a relationship which in principal part has the sanction of the Board. Since October 1944 Toolco has exercised control under a 45-percent stock interest in TWA pursuant to Board approval. The specific question now to be resolved is whether the additional degree of control resulting from the letter agreement of January 8, 1947, is in the public interest. As a result of the letter agreement Toolco acquired a 73-percent stock interest in the carrier.[10] The presence of the additional 28-percent control, together with the prior existence of a 45-percent control on the part of the same acquirer, appear to make plain the specific problems to which the examiner must address himself in the second phase of this proceeding.

Complete actual and legal control has been made certain under the additional acquisition. This new complete control, by virtue of the 28-percent additional ownership, vests in not a new controller, but in the same company exercising the 45-percent control. It would therefore appear entirely proper to test what this same controller may do with complete, unqualified control with what it did under a 45-percent ownership of the carrier. If we are not to use this reasonable approach, we are left merely with the acquirer's prognostications and plans with respect to its future policies for the carrier. Accordingly, an examination of the additional control relationship here under consideration

[10] The details concerning the acquisition of the additional stock interest are set forth at pages 206 and 207, *infra*.

requires an examination of the activities of Toolco with respect to TWA for the period during which the prior approved control existed. Such an examination, it must be clear, cannot be made for any other purpose at this time but to indicate the kind and character of control which for the past years has been, and which may in the future continue to be, exercised by the same controller exercising the additional degree of control arising from the transactions evidenced by the letter agreement of January 8, 1947.

It should be clear from the definition of issues outlined above, with respect to which each party submitted considerable proof, that the examiner proposes no broader scrutiny of the transactions here under consideration than that dictated by law, which he is obliged to follow. The manner in which this proceeding has arisen, the law under which the Board acquired jurisdiction, and the situation of fact in which this proceeding is set may be novel under section 408 of the Act, but the principles applicable to the disposition of the primary issues before the examiner are familiar rules of law and policy long followed by other agencies and by the Board.[11] Under the circumstances, the

[11] See footnote 9 for C. A. B. precedents. Provisions of the Civil Aeronautics Act relating to consolidation, merger, and acquisition of control were modeled after similar provisions of the Interstate Commerce Act and amendments thereto. Although the Interstate Commerce Act does not have a provision analogous to section 408 (a) (5), under which the Board acquired jurisdiction herein, the merits of proposed acquisitions under the Interstate Commerce Act are tested by the identical standard of public interest. I. C. C. decisions on the control of one company by another in the case of both railroads and motor carriers indicate the Commission's concern with a wide variety of controlling factors as bearing upon the public interest, including, among others, specific benefits to the public or the lack thereof, the availability of newer equipment, and the propriety of contemplated financial arrangements. See,

nature and scope of the investigation ordered by the Board make it necessary that Toolco's past actions and policies with respect to TWA in matters of financing, management, and related activities be examined to determine the net effect of the additional acquisition upon the public interest.

THE FACTS

All of the outstanding stock of Toolco is owned by Howard R. Hughes, a well-known industrialist, movie producer, aviator, and aeronautical engineer. Mr. Hughes is president and a member of the board of directors of Toolco. The various Hughes enterprises are all operated either

C. 750 (1927); *Acquisition of Control by Panhandle & S. F. Ry. Co.*, 154 I. C. C. 342 (1929); *Richmond Greyhound Lines, Inc.—Control—Peninsula*, 5 M. C. C. 394 (1938); and *Wheeling & L. E. Ry. Co. Control*, 267 I. C. C. 163 (1946).

In administering the public-interest tests of sections 221 and 310 of the Communications Act of 1934 (the former concerned with consolidations, purchases, and acquisitions of control of one telephone company by another; the latter covering the transfer of licenses issued to radio broadcasting stations) the Federal Communications Commission has likewise relied upon a wide variety of public-interest factors in granting or withholding its approval. See, for example, *Lancaster Broadcasting Service, Inc., et al.*, 2 F. C. C. 164 (1935); *Parmer et al.*, 2 F. C. C. 172 (1935); *Crown Point Telephone Co., et al.*, 3 F. C. C. 152 (1936); and *Schield, Smithson, and Lewis et al.*, 7 F. C. C. 186 (1939).

Similarly, the Federal Power Commission, in exercising its authority to approve or disapprove leases or dispositions of property, mergers, or consolidations of facilities and purchases of securities, under the public-interest standard of section 203 of the Federal Power Act, has taken the position that the test of public interest is necessarily a broad and comprehensive standard embracing consideration of all the statutory purposes which that Act was designed to accomplish. See, for example, *Public Service Electric and Gas Co. of Newark*, 1 F. P. C. 546 (1938); *Pennsylvania Electric Company*, 3 F. P. C. 544 (1943); and *Southwestern Public Service Company*, 5 F. P. C. 703 (1946).

directly or as divisions under the corporate organization of Toolco. Closely associated with Mr. Hughes is Noah Dietrich, executive vice president of Toolco, who is responsible for the day-to-day business direction of the company.

Prior to Board approval of its original acquisition of control of TWA, Toolco had been interested in the development of the Constellation-type aircraft, and originally contracted with the Lockheed Aircraft Corporation for the manufacture of such aircraft, partly for the benefit of TWA. In 1942 Toolco assigned all of its rights to such contracts to TWA in consideration of TWA's assumption of Toolco's obligations thereunder. Apart from its interest in the development of the Constellation plane and its acquisition of control of TWA, Toolco has been engaged in certain other phases of aeronautics through a division operated under the name of Hughes Aircraft Company at Culver City, Calif. The present record, however, shows that there has been no appreciable change in Toolco's operations in the field of aeronautics since the Board's order of October 17, 1944, originally approving Toolco's control of TWA. The principal activities at present of the aircraft division of Toolco consist primarily of experimental work on aircraft armament and accessories for the armed services. Except for the manufacture by its aircraft division of an airplane warning device known as the Hughes Airline Radar,[12] Toolco has no plans at present to develop or produce either aircraft or aircraft equipment which might be

[12] The warning device is an instrument which works on the radar principle, and is capable of warning a pilot of his proximity to any obstruction. On October 29, 1947, the Board, by order serial No. [illegible], modified the original order approving acquisition of control under Docket No. 1182 so as to permit Toolco to sell the aforesaid radar units to TWA.

used in commercial aviation and sold to TWA or other air carriers.[18]

When the Board approved Toolco's control of TWA in 1944, TWA was already one of our largest domestic air carriers, operating from coast to coast and authorized to serve 7,743 route miles. At the time of that approval, Jack Frye, E. Lee Talman, and T. B. Wilson served as president, executive vice president, and chairman of the board of directors, respectively, of TWA. These men continued in their respective capacities until their resignation during the managerial reorganization of the carrier in the early months of 1947, except that the late Paul E. Richter returned to his duties as executive vice president in 1945 after service with the armed forces, and Mr. Talman thereafter served as senior vice president. John M. Lockhart served as treasurer of TWA during the foregoing period except for a leave of absence from the carrier for approximately a year, during which time that position was held by John B. Thurston. C. W. Perelle, once a vice president of Toolco, was in charge of the aircraft division of the company during a part of the period here under review.

In the years between 1944 and 1947 the Board authorized very substantial additions to the TWA system, including 21,108 miles of route in overocean or foreign air transportation and 3,365 additional miles of route in domestic service. TWA is one of four domestic airlines selected to operate on a major scale in the international field after the recent war. Of the four, TWA was awarded the most route

[18] A plywood flying boat, HK-1, which Toolco developed and built under a government contract, has commercial cargo possibilities; however, it was not intended to be used for anything but military purposes, and Toolco has no plans to build others like it.

miles.[14] At present, TWA is authorized to serve 11,582 miles in domestic air routes and 23,317 miles in international air routes, or a total of 34,899 miles.[15]

To accomplish the extraordinary expansion made necessary by the additional routes thus acquired, and to meet its ordinary reconversion needs for the postwar period, TWA began planning and providing, well before the war ended, for additional flying equipment, for stocks of spare parts, for new overhaul bases, ticket offices, communications facilities, and more trained personnel. The Frye management developed a new organization structure for the company, which, among other things, regionalized control over the carrier's traffic activities; it added a number of high-salaried executives to top-level positions; and it set up administrative offices in Washington at considerable expense.

At the end of 1944 TWA had only 38 planes in service, all of the DC–3 type. A number of DC–3 planes and the five Boeing Stratoliners delivered to the armed services early in the war were returned to the carrier while the war was still in progress, and were reconverted to commercial passenger use. As the war approached its end, TWA endeavored to obtain, through either purchase or lease, more of the planes being turned over by the Government to the airlines. The carrier, moreover, had an option on 40 of the Constellations originally assigned to the armed services, and a preferred delivery position on new versions of the same aircraft. By the end of 1945 TWA had a fleet

[14] *Northeast Air. et al., North Atlantic Routes*, 6 C. A. B. 319. The decision in this case was rendered on July 5, 1945.

[15] The above mileage figures include mileage served under exemptions as well as certificated mileage.

of 93 aircraft, of which 67 were owned and 26 were leased from the Government. Of the aircraft then on hand, 18 were Constellations and 8 were of the DC–4 type. In addition, 18 Constellations were expected for delivery in 1946.

At the end of 1944 TWA had only 4,987 employees engaged in its commercial services.[18] By the end of 1945, the number of employees in its commercial services had risen to 9,960, or an increase of approximately 100 percent. By the end of 1946 almost 4,000 additional employees had been hired.

During 1945 two large hangars and associated buildings, which were formerly a part of the North American Aviation Bomber Plant at Kansas City, Kans., were leased by TWA for an overhaul base; during the same year temporary maintenance and overhaul facilities for international operations were acquired at the Newark (N. J.) Municipal Airport; and a large-scale program of increasing and improving ticket and reservations offices and other facilities was begun in 1945. During the same year the Frye management developed plans for aircraft purchases at an estimated cost of approximately 125 million dollars.

Under Frye's leadership, TWA pioneered in the development of new types of aircraft and operating procedures. TWA was the first scheduled carrier to purchase and operate the Douglas DC-2 type aircraft, the forerunner of the widely used DC-3. In July 1940 TWA put into operation five Boeing 307's (Stratoliners), four-engine transports with pressurized cabins. TWA was the first carrier to use aircraft of this type in service within the continental United

[18] Approximately 1,800 others, however, were engaged in the carrier's war-contract services.

States. In 1939 the carrier had become interested in the development of a new four-engine aircraft (the Constellation already referred to) which was to be larger and faster than the Boeing 307. The carrier has also pioneered new operating standards, including safety devices made possible through technological improvements.

When Toolco began buying into TWA in 1939, Frye welcomed the interest and cooperation of Mr. Hughes, whom he considered one of the industry's ablest technicians.[17] They collaborated in the design and development of the Constellation-type air transport. They collaborated closely in other respects in the operation and management of TWA, notably in purchase of necessary equipment, such financing as was necessary before the end of the war, and the prosecution of TWA's announced intention of 1943 to seek certain international routes.[18]

---

[17] Mr. Frye testified in part as follows in response to a question relative to the contributions of Mr. Hughes to the progress and welfare of TWA: "• • • One thing about Mr. Hughes that interested me, and I enjoyed—caused me to enjoy working with him over a period of years, is that he did have an understanding of the airplane. In fact, the airplane is not a developed field air transportation as yet. It has many years yet to go before it will be there, and in the meantime if it was attempted to be treated by either the Government or the airlines, or a combination of them, as any other fully developed business is, it will be very, very slow in ever attaining its growth and development. Air transportation may be a great business some day, as, if and when it can be operated safely and dependably, and on schedule, but until it gets there a great deal of money has to be spent and people who have understanding of the technical problems involved will have to devote time and effort to solving those problems.

"Now, Mr. Hughes is one of the few people in the industry that has any of that kind of understanding • • •" (Tr. pp. 373–374).

[18] In response to questions on matters of TWA policy which needed to be cleared with the controlling stockholder, Mr. Frye testified in part as follows: "Well, through the years I have been

There developed, however, a gradual but ever-widening rift between the Frye management and officials of Toolco, including Mr. Hughes, with respect to the management plans and operating policies for the carrier. In principal part, this breach was due to a growing dissatisfaction with the Frye management and developing differences over means of meeting the financial needs of the carrier, although the situation was not without its interplay of personalities and such clash of personal ambitions and views as often arise between the officials of a controlling corporation and the management of an affiliate.[19]

Tested by the property then owned, the volume of traffic carried, and the company's earning power, TWA appeared to be sufficiently capitalized during the war period. Thus, as of December 31, 1944, the carrier had a net worth in excess of 16 million dollars. It then had no long-term debt,

---

in the airline business I have had a number of controlling stockholders such as General Motors and Pennsylvania Railroad and banking interests such as Lehman Brothers, and it was generally the practice of management to consult those groups when important decisions were to be made concerning expansion of the company, financing, purchases of equipment, and so forth * * *" (Tr. p. 365).

[19] Mr. Frye testified in part as follows concerning his relations with Mr. Hughes and Mr. Dietrich: "* * * Since his (Mr. Hughes') views paralleled mine * * * I was interested in helping bring about his acquisition of control of TWA. However, his people in Houston, headed by Mr. Dietrich, had entirely different views as to policies concerning the operation of an airline. They looked at the results as a business man would, right along with the result of other airlines who were not engaged in the type of pioneering and development and expansion that TWA was, and they compared the results critically. TWA, I think, was the first interest that Mr. Hughes had had in many years in which he didn't turn over the direction of to his Houston group. Those people naturally resented not being included in that picture * * *" (Tr. pp. 371-372).

a capital stock base of approximately 5 million dollars,[20] paid-in capital surplus of 4 million dollars, and earned surplus in excess of 7 million dollars. TWA's management, however, was acutely aware that substantial financing would be necessary to meet the carrier's postwar needs. The reason for their concern is obvious. TWA, like every other large certificated carrier, was suffering from a deficiency in air transport equipment before the war ended. Indeed, TWA had a substantial quantity of new-type planes on order even before this country entered the war. Moreover, the certification of TWA of extensive international routes in July 1945 made it imperative that the carrier take immediate steps to obtain capital sufficient to discharge its added responsibilities.

From February 1944 until the close of 1946 the management of TWA made repeated requests of Toolco for approval of plans to finance the carrier's expansion in routes and equipment. There were repeated discussions relative to financing within TWA's staff, between TWA's officers and the management of Toolco, and between officers of both Toolco and TWA on the one hand and various financial institutions and underwriting groups on the other. The principal officers of the carrier, particularly Messrs. Frye, Talman, Lockhart, and Thurston, were of one mind in contending that TWA's financial position needed to be strong enough to permit it to purchase equipment on a competitive basis with other airlines. To raise the necessary capital, they were convinced that the sale of equity securities in

[20] The carrier at that time had an authorized capitalization of 1,000,000 shares of common stock of the par value of $5 per share, of which 975,586 shares were then issued and outstanding.

substantial volume was decidedly preferable to reliance upon large borrowings. They took the further position that if a substantial proportion of TWA's total capital was to be represented by equity rather than by fixed obligations, it was necessary that the carrier perform its financing well in advance of actual expenditures. Moreover, they feared that the freezing of the common stock to the number of shares then existing would eventually affect the amount of senior financing (preferred stock and debt) which could be promoted and which, in turn, would keep TWA from having enough capital to meet its needs. Finally, they warned against the dangers of excessive debt and urged that the carrier take advantage of the strong capital market conditions before unfavorable factors set in to impair the popularity of airline securities.

Before additional common stock in any considerable amount could be sold, it was necessary that the agreement and act of consolidation, forming the certificate of incorporation or charter of TWA, be amended so as to increase the authorized shares of capital stock. The carrier is a Delaware corporation, and under Delaware law such an amendment, to be effective, had to be approved by the holders of the majority of the outstanding common stock of the company. Since Toolco held approximately 45 percent of the outstanding stock and the rest of the shares in the carrier were widely scattered, the consent of Toolco as the principal stockholder was, as a practical matter, required before the certificate of incorporation could be amended to increase the authorized common stock of the carrier. Accordingly, before any plan of financing the expansion of operations of the carrier by the sale of common stock could be effectuated by the TWA management, the charter of

the carrier required change to authorize the issuance of additional stock.[21]

There is no evidence that at any time during the long period of effort on the part of the carrier to get Toolco committed to some specific plan for financing, either Mr. Hughes or Mr. Dietrich disagreed with the management's basic position that substantial additional financing would be necessary, or that they denied TWA's representatives a hearing with respect thereto. However, Mr. Dietrich made it clear to Mr. Talman that the TWA management was not to make any commitments regarding financing without first clearing with him, and Mr. Frye had a specific understanding with Mr. Hughes that no common stock was to be issued without the approval of Mr. Hughes.

But in spite of numerous preliminary discussions and repeated efforts on the part of the Frye management to arrive at a mutual understanding with respect to a program for large-scale financing, TWA officials were not able to sit down with officials of Toolco to work out a detailed financing program agreeable to both until July 17, 1945, when Mr. Talman and Mr. Thurston met with Mr. Dietrich and Mr. Perelle at Houston, Tex. Mr. Dietrich then recognized that TWA's capital needs could not be financed without increasing the carrier's common-stock base. Mr. Dietrich stated he was willing to commit Toolco to vote its stock to permit a liberal amendment of a carrier's certificate

[21] Although the individual consent of Mr. Hughes was not technically required to amend the charter, Toolco and Mr. Hughes are used interchangeably herein as the principal stockholders of TWA for the purpose of consent to such amendment. It was conceded at the hearing that where, as in the instant case, a wholly owned corporation acts as a stockholder, its sole owner may be considered *in pari passu* with itself.

of incorporation to increase the carrier's authorized capital stock. However, Mr. Dietrich further informed Mr. Talman that final decision in the matter was up to Mr. Hughes, but indicated that he would do all he could to assist in obtaining Mr. Hughes' approval. It was tentatively agreed that TWA would need new financing to the extent of approximately 100 million dollars, and a financial plan was formulated whereby a substantial portion of such funds would be raised through the sale of common and preferred stock. Then, during the early days of August 1945, Mr. Frye, as president of the carrier, and Mr. Hughes had discussions during which Mr. Frye submitted plans to raise approximately 130 million dollars in new capital funds. Mr. Hughes, however, wanted further time to consider the plans and agreed to meet with Mr. Frye soon again for final agreement thereon. Thereafter, in mid-September 1945 Mr. Frye sent Mr. Hughes a strongly worded appeal urging immediate action with respect to financing for the carrier. Nothing, however, came of these efforts.

Toolco's reluctance to participate in any of the plans submitted by the Frye management, each of which proposed substantial equity financing, needs some specification at this point. Toolco's principal officers, including Mr. Hughes and Mr. Dietrich, feared that Mr. Frye's chief objective appeared to be expansion without regard to profit making. It was Mr. Dietrich's view that, in the years prior to 1947, TWA's management exercised less control over budgets and expenses than did the managements of such competitors as United and American. He attacked certain expenditures made in the immediate postwar period as being improvident. He complained that TWA had been carrying more than its proportionate share of the cost of pioneering for

the air transport industry. Both Mr. Hughes and Mr. Dietrich felt that Frye's recommended program for aircraft purchases was far too ambitious and would have seriously overequipped the carrier.[21]

As the financial overseer of the Hughes enterprises, Mr. Dietrich personally lacked confidence in the management of TWA for several years prior to 1947; gradually, he and his associates in the Houston offices of Toolco were successful in convincing Mr. Hughes that certain operating economies were absolutely necessary to the life and welfare of TWA, and that the existing management was not disposed to effectuate them. After the war ended, Mr. Dietrich's previously expressed desire for substantial equity financing for the carrier was somewhat modified by his lack of faith in the Frye management and by fears that the funds contemplated would not be wisely spent. Attempts at arriving at a financing program acceptable to Toolco were therefore impeded by the lack of faith on the part of Toolco officials in the Frye management.

Following the foregoing failures of TWA's management and Toolco to agree on a program to finance TWA's postwar needs, a number of other proposals to raise the required capital were considered.

---

[21] Indeed, in his testimony at the hearing (September 11, 1947) on the first phase of this proceeding, Mr. Dietrich stated that TWA did not need additional equipment, and that in his opinion all the major airlines were then rapidly becoming overequipped. He contended then that the increase in available seats as the result of postwar equipment acquisitions of the major carriers was outstripping available traffic volumes and causing unprofitable operations. He also contended that the airlines should have limited their acquisitions to DC-4's after the close of the war, which were then available in large numbers as army surplus, and that the armed services should have borne the cost of developing new transports and thereafter leased them to the airlines.

CAB Opinion and Order, October 6, 1950

On October 3, 1945, TWA addressed a letter to the Export-Import Bank requesting a line of credit to the carrier of $150,000,000, to be provided jointly by the Export-Import Bank and the Reconstruction Finance Corporation.[33] Conversations were had from time to time with representatives of both institutions with respect to TWA's financing program. Meanwhile, in November 1945 a program of debt financing was entered into with the Equitable Life Assurance Society of the United States, whereby Equitable purchased an issue of 3-percent sinking-fund debentures from the carrier in the principal amount of $30,000,000.[34] On December 19, 1945, in a letter to the Reconstruction Finance Corporation, the carrier referred to previous conversations with the RFC and the Export-Import Bank concerning TWA's financial needs. The letter proposed a program covering $100,000,000 of general credit to TWA junior to the Equitable loan of $30,000,000, and secured by the equipment assets to be acquired through the use of this credit. The proposal was rejected.

When the anticipated loans from the Export-Import Bank and the RFC did not materialize, principally because the carrier had failed to establish that private financing was unavailable, both TWA and Toolco continued to search for major means of raising additional funds. On May 10, 1946, Equitable purchased an issue of 2¼-percent sinking-fund

---

[33] TWA was about to inaugurate service on its international routes, and these operations were expected to require very substantial capital expenditures, including a large number of four-engine aircraft.

[34] The debentures were issued pursuant to a purchase agreement dated November 30, 1945, and in accordance with the provisions of a trust indenture dated December 1, 1945.

debentures in the amount of $10,000,000[25] from TWA. TWA next considered a financing proposal by the Bankers Trust Company of New York. This financing plan, which came into being shortly after the second Equitable loan, involved a proposed bank credit of $80,000,000, contingent upon the company's doing an added $20,000,000 in equity financing, presumably through the sale of common stock. Preliminary discussions on this proposal were had by Mr. Lockhart, TWA's treasurer, in company with Mr. Chauncey Dodds of the RFC, who was present because of TWA's prior negotiations for RFC credit. The Bankers Trust Company agreed to head the banking group providing the loan funds. It expected to be regarded as TWA's principal bank, and agreed to take $10,000,000 of the total loan. Nothing conclusive developed from these discussions, principally because Mr. Frye was unable to obtain a firm commitment from Mr. Hughes for the equity financing involved, although Toolco was in a position to take up a pro rata share of the contemplated stock offering.

There followed in June 1946 further negotiations and further discussions in attempt to arrive at a definite plan for financing the carrier. Representatives of several eastern financial institutions, including the Bankers Trust Company of New York, the Union Trust Company of Pittsburgh, and the First of Boston Corporation, were invited to meet with Mr. Hughes and Mr. Dietrich in Los Angeles for this purpose. Neither Mr. Frye nor Mr. Talman attended this meeting.

[25] This second series of debentures was issued under the trust indenture of December 1, 1945, as amended by a supplemental indenture dated June 1, 1946.

On October 3, 1945, TWA addressed a letter to the Export-Import Bank requesting a line of credit to the carrier of $150,000,000, to be provided jointly by the Export-Import Bank and the Reconstruction Finance Corporation.[33] Conversations were had from time to time with representatives of both institutions with respect to TWA's financing program. Meanwhile, in November 1945 a program of debt financing was entered into with the Equitable Life Assurance Society of the United States, whereby Equitable purchased an issue of 3-percent sinking-fund debentures from the carrier in the principal amount of $30,000,000.[34] On December 19, 1945, in a letter to the Reconstruction Finance Corporation, the carrier referred to previous conversations with the RFC and the Export-Import Bank concerning TWA's financial needs. The letter proposed a program covering $100,000,000 of general credit to TWA junior to the Equitable loan of $30,000,000, and secured by the equipment assets to be acquired through the use of this credit. The proposal was rejected.

When the anticipated loans from the Export-Import Bank and the RFC did not materialize, principally because the carrier had failed to establish that private financing was unavailable, both TWA and Toolco continued to search for major means of raising additional funds. [22] This second series of debentures was issued under the trust indenture of December 1, 1945, as amended by a supplemental indenture dated June 1, 1946.

The discussions of June 1946 led to further meetings in Los Angeles in the month of August of the same year. TWA was represented at these meetings by Mr. Talman. These discussions led to a proposal for large-scale financing through a group of banks headed by the Union Trust Company of Pittsburgh, now the Mellon National Bank and Trust Company. A complete plan was evolved which would have raised considerable capital. The underwriting was to be done by the First of Boston Corporation. This program embraced total financing of approximately 100 to 110 million, including the continuance or refunding of the Equitable loans. In the event Equitable stayed in the picture, the plan including a 35-million-dollar sale of stock by the carrier, 25 million dollars in direct credit from the banks, and an additional 10 million to be furnished by Toolco. The plan for the sale of equity securities was to be a flexible one, but it contemplated an offering of straight preferred stock in considerable volume. The amount of capital to be furnished by Toolco was all to be raised through the purchase of common stock from the carrier.

There was delay on the part of the parties concerned in reducing the various tentative lending and underwriting arrangements into formal agreements, even though Mr. Hughes had agreed to the substantial equity financing involved in the over-all plan. The bankers were apparently wary of a possible change in general market conditions which might make it difficult for the underwriters to carry out their part of the transaction. Moreover, the proposed financing was conditioned upon (a) a change in the management of TWA, (b) the security market's maintaining its relatively favorable mid-1946 level.

To meet its obligation in the proposed financing, Toolco, in a letter dated August 28, 1946, offered to purchase

222,222 shares of common stock from TWA at a price of $45 a share. However, a letter from Mr. Dietrich to Mr. Talman dated September 3, 1946, withdrew any previous offer of Toolco to purchase stock in the carrier since (a) Toolco's purchase of common stock, the public offering of stock securities, and the bank credit arrangements were to be concluded simultaneously, (b) neither the underwriters nor the bankers would make final commitments until the common-stock financing was accomplished, and (c) he, Dietrich, had been instructed by his company to withdraw the previous offer.

From its terms and from the testimony adduced with respect thereto, the apparent sense of the September 3 letter is that Toolco would not go through with the offer, since neither the underwriters nor the bankers would commit themselves on the entire program, and the bankers presumably would negotiate on the credit involved only after the equity financing had been completed. In the end the unresolved differences between Toolco and the management of TWA, plus Toolco's withdrawal of its proposed purchase of 222,222 shares of the carrier's common stock and a definite unfavorable turn in the security markets in September 1946, resulted in a complete abandonment of the so-called Union Trust plan.

TWA's financial condition deteriorated rapidly during the year 1946. In the months of November and December 1945, and during the first part of 1946, the previous months of relatively stable operations of the carrier were turned into severe losses, resulting primarily from the heavy expenses attending the inauguration of the international routes. The corner appeared turned in June 1946, when a slight profit was shown. In June and July, however, the

entire industry began suffering a decline in earnings as a result of a series of unfortunate accidents in May through July of that year. Immediately thereafter came two special developments, the pilots' strike and the grounding of the Constellations, which for the last half of 1946 resulted in the operation of only a skeleton service by TWA. In 18 months the stockholders' equity had been reduced from $18,665,483 at June 30, 1945, to $4,177,518 at December 31, 1946, a reduction of almost $14,500,000. Short-term debt amounted to $4,340,000, and long-term debt to $38,947,124. For the calendar year 1946, the carrier showed a net loss of approximately 14½ million dollars.

Toward the end of 1946 TWA's financial condition became most critical. All efforts of refinancing had failed. The record shows that in the closing months of 1946 TWA could not attract any capital, and was facing bankruptcy.[36] The record further shows that Toolco was willing to be of further financial assistance, but was unwilling to advance additional money to save the carrier without assurance that the management of the carrier would be replaced and the carrier reorganized and run in agreement with the wishes of the principal stockholder and/or its representatives.

---

[36] The years 1946 and 1947 were a time of crisis not only for TWA but for most of the air transport industry. A number of carriers were in serious financial difficulties and nearly all suffered severe operating losses. Conditions became so alarming that in July of the latter year President Truman appointed the President's Air Policy Commission, and that was followed soon thereafter with action by Congress in setting up the Congressional Aviation Policy Board. Both investigating groups made inquiry into the causes of the industry's financial plight.

CAB Opinion and Order, October 6, 1950

On January 9, 1947, the TWA board of directors accepted a proposal of Toolco dated January 8, 1947, herein known as the letter agreement, under which Toolco agreed to lend TWA $10,000,000, and the board of directors would be reconstituted so that a majority of the directors of the carrier would be nominees of Toolco. On January 9, 1947, the board of directors was so reconstituted. Pursuant to the above-mentioned agreement between Toolco and TWA, Toolco lent TWA $10,000,000, in the period from January 9, 1947, through May 29, 1947, the loans being evidenced by TWA's subordinate convertible 2¾-percent notes due June 2, 1956.[17] These notes were convertible by the holder at any time before maturity into TWA's common stock at the par value thereof ($5), or at the average of the prices at which the last sale of such stock was made on the New York stock exchange on each of the last 10 business days preceding receipt by TWA of notice of exercise of the right to convert, whichever was greater. TWA could require the holder to convert on January 1, 1950, and on that day only, at a price calculated by the same method, by mailing to the holder notice of its election so to do.

On December 26, 1947, Toolco, in a further agreement with TWA, waived its right to require payments of these

---

[17] The trust indenture under which TWA sold its debentures to Equitable contained certain restrictions against the creation of additional debt by the carrier. On January 31, 1947, Toolco, TWA, and Equitable entered into a so-called three-party agreement which provided, among other things, for Equitable's waiver of the covenants of the trust indenture to the extent necessary to permit TWA to incur the indebtedness evidenced by the convertible notes. Equitable has also waived compliance by TWA with other covenants of the trust indenture, as from time to time amended, on a number of occasions.

notes, or interest thereon, in money or in any form other than stock. On June 15, 1948, TWA's board of directors authorized an offer to Toolco to convert the $10,000,000 principal amount of the notes and interest accrued thereon to June 18, 1948, into TWA's common stock at a price of $10 per share. The offer was accepted by Toolco on June 8, 1948. The resulting agreement was approved by TWA's stockholders (including the holders of a majority of the common stock not owned by Toolco) on August 10, 1948.[28] The agreement was consummated on or about August 24, 1949, and 1,034,423 shares of common stock were issued upon surrender of the notes for retirement. Had TWA had the right to require conversion on June 18, 1948, the date of acceptance by Toolco of the proposal, the conversion price would have been $15.80 per share, and Toolco would have received 654,699 shares.[29]

As a result of the letter agreement, Toolco acquired an indefeasible right to a substantial additional stock interest

---

[28] On the same day TWA's stockholders also voted to increase the total number of authorized shares of common stock of the carrier from 3,000,000 to 4,000,000 shares. The authority to issue common stock up to 3,000,000 shares had been voted the previous year.

[29] In recommending TWA's offer to convert at $10 per share to its stockholders, the board of directors of the carrier were of the opinion that the successful sale of equity securities in the future would be impaired so long as doubt existed as to the time of conversion of the 2¾-percent notes, or the price at which they may have been converted into common stock. The board of directors urged that conversion would eliminate doubt as to the time and price of conversion over the years pending the maturity of the notes, and that conversion was in the interest of the carrier. Efforts by a minority stockholder to enjoin the proposed conversion were denied by the U. S. District Court for the District of Delaware. *Sneider* v. *Transcontinental & Western Air.*, 79 Fed. Supp. 339 (1948).

in TWA.[20] After the conversion arrangements were consummated in August 1948, Toolco's ownership interest in the carrier rose from 45 to approximately 73 percent, thereby obtaining, as a result of the transactions evidenced by the letter agreement, complete legal control of the carrier. However, even before the conversion, and as a direct result of the letter agreement, Toolco had acquired complete management control of the carrier. Prior to January 9, 1947, all of the directors of TWA were nominees of Mr. Frye. Reconstitution of the TWA board of directors, pursuant to the letter agreement, made certain that the management of the carrier on and after January 9, 1947, was in agreement with the wishes of the principal stockholder and/or its representatives.

Drastic management changes followed the reconstitution of the board of directors. Frye, Wilson, Talman, and Richter resigned. A number of top-salaried executives were released. The new management instituted a vigorous program of economy by installing a rigid system of expenditure control and dismissing thousands of the carrier's employees. Further changes consisted of a revision of the management structure of TWA[21] and a critical review of the carrier's equipment program.

As a part of Toolco's program of retrenchment, TWA, after acquiring 4 Model 049 Constellations in March 1947, canceled its commitments for the Model 649 equipment program. But before that year was over, it became evident

[21] Primarily in the change from the regionalized to a so-called straight-line type of organization.

that the carrier would need substantial additions to its aircraft fleet. However, TWA's heavy burden of debt seriously impaired its ability to finance on its own the necessary purchases of equipment. As of June 30, 1947, the carrier's short-term debt stood at more than $1,400,000 and its long-term debt amounted to approximately $53,800,000. As of September 30, 1948, the carrier had short-term debt outstanding in the excess of $4,000,000, and its long-term indebtedness amounted to $51,461,600. In spite of this heavy debt structure and the debt service on its fixed obligations,[22] TWA, with Toolco's aid, continued to expand its fleet of aircraft. The principal additions to its fleet in the years 1947 through 1949 were made possible through special credit arrangements with aircraft manufacturers and through borrowings from various banks.

The record shows that this equipment could not have been obtained without the financial assistance of Toolco. Of 6 Constellations acquired in 1947, 4 were financed largely from funds advanced by Toolco under the terms of the letter agreement of January 8 of that year. During 1948 previous outstanding purchase money obligations covering 9 Constellation airplanes were consolidated, with the aid of Toolco, with the financing of 12 new Constellations into a new chattel mortgage. In February 1949 TWA en-

[22] This service divides between interest payments and principal maturities approximately as follows:

Calendar year	Principal maturities	Interest	Total
1947	$ 674,000	$1,501,121	$2,175,121
1948	2,968,040	1,712,301	4,680,341
1949	6,806,980	1,669,071	8,476,051
1950 (est.)	7,168,400	1,384,190	8,552,590

tered into a conditional sales agreement with Toolco for 2 Constellations.[24] In August 1949 TWA entered into a bank credit agreement to assist in financing 20 more Constellations. As a part of this latter agreement, Toolco agreed to guarantee that the net worth of the carrier would not be less than $20,000,000 as of December 31, 1949. By agreement dated February 2, 1950, TWA purchased 6 more Constellations under a conditional sales agreement with Toolco.[25] The arrangements for the purchase of the airplanes covered by this sales agreement were entered into directly by Toolco to assist TWA in acquiring such airplanes. It is impossible now for TWA to acquire aircraft without obtaining prior consent or waivers under various financial agreements it has entered into in the past, including the trust indenture covering the debentures held by Equitable.[26]

Although TWA continued to lose money during the years 1947 through 1948, its over-all financial condition has shown considerable improvement. On December 31, 1945, the carrier's net worth was approximately $18,500,000; by the end of 1946 it had fallen to about $4,200,000; and by the end

---

[24] Approved by order serial No. E-2404 in compliance with the conditions set forth in the Board's order under Docket No. 1182.

[25] This latter sales agreement was approved by order serial No. E-4160 to comply with the conditions set forth in the Board's order under Docket No. 1182.

[26] Since the date of the hearing herein, TWA has arranged to lease 12 Martin 202's (beginning July, 1950) and the carrier has very recently agreed to purchase 30 Martin 404's, the first to be delivered by April 30, 1951. The Martin 202's would replace the carrier's DC-3's serving on domestic routes, and will presumably be returned when the 404's are delivered. The financing details of the foregoing leasing and purchase agreements are not of record.

of 1947 the carrier had a negative net worth of about $3,210,000. Contrasted with this cumulative deterioration of the financial condition of the carrier is the marked improvement of its financial structure as shown by the return of the net worth to about $8,500,000 on December 31, 1948, and to approximately $21,000,000 on December 31, 1949.

This recovery in the carrier's financial position is due in substantial part to additional equity capital brought into the company during 1948 and 1949. As already noted, the 10 million dollars in convertible notes held by Toolco, with interest accrued thereon, was converted into TWA stock in August of 1948; in February 1949 the carrier offered 404,112 shares of stock to stockholders, 375,036 shares of which were sold pro rata to TWA stockholders at $10 per share, including 297,304 shares purchased by Toolco. The remaining unsubscribed shares were underwritten by a group of investment bankers.

Improved operating results between the years 1947 and 1949 also helped strengthen the carrier's financial position. The year 1947 had been one of consolidation and readjustment for the carrier; it concentrated on shaking down the carrier's expanded organization,[58] on reducing costs, and

[58] The record made in the public hearings shows that, before it was replaced, the Frye management had engaged Robert Heller and Associates, a firm of industrial consultants, for the purpose of improving the organization structure of the carrier. That firm's studies were still unfinished in January 1947, although they had submitted two preliminary reports to Mr. Frye prior to that date. None of the principal recommendations of the Heller surveys had been placed into effect by the Frye management. The record made in the public hearings also shows that, as part of the negotiations for substantial credit for the carrier during 1946, the bankers involved had been studying the carrier's operating record and its management structure. In principal part, the record made in the confidential session of the hearings concerns the details of the Heller reports and the survey of one of the negotiating banks,

on exploiting the traffic potential of its routes. The company's net loss for 1947 was approximately 8 million as compared with the previous year's loss of approximately 14½ million. The carrier's net loss was reduced to $452,000 in 1948. The company's better earning position in 1948 resulted principally from a substantial increase in gross revenues with a considerable decrease in over-all costs. The increased gross revenues were accounted for by increased traffic, higher passenger fares, and higher rates for the transportation of mail. For the calendar year 1949 the carrier showed a net profit after taxes of approximately $3,700,000.

Strong efforts were made after January 1947 toward the reduction of expenses. Significant yardsticks for measuring economy of operation in air transportation are costs per available ton-mile or per revenue ton-mile. Attached hereto as appendix No. 1 is a comparison of TWA's operating expenses with those of the other three of the so-called Big Four carriers (American, Eastern, and United) in terms of the foregoing yardsticks. Without attempting to assess the reasonableness of particular expenditures, the aforesaid tabulation shows that TWA's over-all costs for its domestic operations have improved considerably since the managerial reorganization of the carrier in 1947, and are generally in line at present with the costs of the other carriers.

---

both of which were made for private use of TWA. Some evidence with respect to each of the foregoing is also contained in the public record. The examiner has considered the entire record made in aforesaid confidential session, and none of the matters contained in that part of the record can change or disturb the findings made in this report.

TWA's costs for its transocean operations over the Atlantic have likewise been considerably improved during the past 3 years and compare favorably on an over-all basis with the other two American-flag carriers, Pan American Airways and American Overseas Airlines, in that service. TWA's relative position is shown by the tabulation attached hereto as appendix No. 2.

Aside from the increased mail-pay support it has received, TWA's improvement in both earnings and financial structure since January 1947 can be attributed in large part to the direct assistance it has received from Toolco and Mr. Hughes. As already noted, Toolco took a hand in the early months of 1947 in initiating certain management changes, including a reduction in the working force and the installation of a rigid system of expenditure control. Moreover, it is clear that the carrier could not have survived the financial crisis it faced in the closing months of 1946 without the help of Toolco and Mr. Hughes. A substantial portion of the savings in TWA's operations were made possible by the addition to its service of new modern aircraft and consequent reduction of the carrier's seat-mile cost. Since January 1947 TWA has added, or will have added as soon as it obtains delivery, 44 Constellation aircraft.

In addition to saving the carrier from bankruptcy or reorganization, Toolco's purchase of the $10,000,000 in convertible notes under the letter agreement made it possible, as already noted, for TWA to use a part of said funds for the purchase of additional aircraft. Toolco helped further to improve the financial structure of the carrier by voluntarily agreeing in December 1947 to waive all right to obtain repayment of the debt evidenced by the letter

agreement of January 8 of that year, except through the issuance of stock in accordance with the terms of the convertible notes, and by effecting a conversion of the notes thereafter into common stock of $10 per share, notwithstanding the fact that conversion could not have been required by TWA until January 1, 1950. Further, Toolco's advanced commitment to take up its pro rata portion of the carrier's offering of 404,112 shares of stock in February 1949 made it possible for the carrier to undertake that financing at that time. In connection with a recent commitment by the carrier for 20 new Constellation aircraft, Toolco made the financing of this purchase by the banks possible by entering into a commitment with the banks that, if, as of December 31, 1949, the net worth of TWA had not been increased to $20,000,000, Toolco would undertake to provide the amount of the deficiency. This commitment was made by Toolco without any profit to itself. Finally, TWA has not only been a substantial beneficiary of the financial aid to the carrier by Toolco but the initiative and support of Mr. Hughes and Mr. Dietrich have been of constant help to the management and to the various operations departments of the carrier. It is also the judgment of the present management of the carrier, that Mr. Hughes has contributed enormously to the technical proficiency of TWA.

In reciting the foregoing facts with respect to Toolco's policies toward TWA since the date of the approval of the original acquisition of the carrier, greater stress was necessarily laid upon evidence relating to plans for financing the carrier than upon matters of management, attempts to acquire additional routes, and related activities, because in their dealings and relations with each other during the

period under review, Toolco and TWA were primarily concerned with ways and means of providing the necessary capital requirements for TWA. The greater part of the record in this investigation therefore reflects their preoccupation with efforts to finance the carrier. However, in fairness to respondents, and in order to set forth their position in the context of industry conditions, it is necessary to view briefly the experience of other air carriers and the air transport industry as a whole in planning for the capital requirements necessary in the immediate postwar period, and to examine respondents' stated reasons for resorting to so much debt financing to provide TWA's capital needs.

As the war ended, airline capital structures were almost entirely free of debt. Only two domestic carriers, Mid-Continent and Western, had long-term debt outstanding,[37] and those debts totaled only about $500,000. One carrier, United, had outstanding $10,400,000 of preferred stock. Of the long-term investment of approximately $143,000,000 in the 16 domestic trunk-line carriers, about $132,000,000 represented common-stock equity.

The industry's postwar expansion necessitated an extraordinary increase in capital funds. In the 3 years from the close of 1944 to the end of 1947 the 16 domestic trunk-line carriers alone acquired about 217 million dollars in new capital funds. Substantial amounts of new capital were also raised by the international carriers and the so-called feeder operators. However, despite the advantages of a

[37] Exclusive of advances from affiliates.

very favorable market,[35] the industry made only small use of common-stock financing in raising the capital necessary for postwar growth.

Thus, in the year 1945, notwithstanding the very favorable market, only 2 of the domestic trunk-line carriers, Delta and Northwest, marketed any appreciable amount of common stock.[36] In July of that year Pan American raised approximately $43,000,000, by the sale of common stock. In the year 1946, 5 of the domestic trunk-line carriers, Chicago and Southern, Colonial, National, Northwest, and Western marketed issues of common stock. In the same year American Overseas sold common stock in the amount of 12½ million dollars to its stockholders. In the year 1947 Colonial, Delta, and Northwest sold common stock. But 9 carriers, American, Mid-Continent, Braniff, Northeast, Continental, Capital, United, Eastern, and TWA failed to utilize common-stock issues to provide funds for postwar needs during the years 1945 to 1947.

The larger domestic carriers have financed their postwar expansion for the most part by the sale of preferred stock

---

[35] Throughout the latter part of the war and in the early postwar period the market for airline stocks was excellent. Before the stock-market break in mid-1946, the appreciation in airline stocks was considerably greater than that for stocks generally. Between the year 1942 and early 1946, industrial stock prices doubled, while airline stock prices increased on the average more than five-fold. However, the break in stock prices in 1946 was much more severe in the case of airline stocks than in the case of stocks generally.

[36] As a matter of fact, the market for airline stocks was quite receptive during most of the calendar year 1944, but only two domestic carriers, National and Northwest, floated common-stock issues during that year.

and by borrowings. American sold $40,000,000 worth of sinking-fund debentures in the summer of 1946 and a like amount of preferred stock.[40] Earlier in that year this carrier had obtained a short-term bank loan of $25,000,000 as interim financing. In February 1948 American arranged for a stand-by credit of $7,500,000. Eastern made stand-by credit arrangements in December 1946 in the amount of $20,000,000. Along with its sale of common stock in October 1946, Northwest arranged for a $10,000,000 stand-by credit. This credit was replaced by an $18,000,000 credit in April 1947, and more than $9,000,000 was raised through the sale of preferred stock. TWA's heavy reliance on debt financing has already been noted. United made no financial provision for its large expansion program until early in 1947, when some $49,000,000 was raised—$12,000,000 by sale of debentures to two insurance companies, $28,000,000 by arrangements for a stand-by credit from a group of banks, and $9,000,000 by the sale of preferred stock. In August 1948 United sold 184,809 shares of common stock, netting the company nearly $2,000,000. At June 30, 1948, three large domestic carriers, American, Northwest, and United, had preferred stock outstanding to the extent of 42, 35, and 12 percent of their capitalizations, respectively.

The relative importance of long-term debt in the capital structures of the domestic carriers is shown by the com-

---

[40] The underwriters experienced considerable difficulty in marketing this large issue of preferred stock. There was an offering earlier in the same year of 200,000 some shares of common, but the offering did not represent company financing; the shares were sold by the Aviation Corporation in compliance with a Board order to reduce its holdings in the carrier to not more than 4 percent.

[a] As of September 30, 1949, in the case of Northwest.

TWA and Capital have, since the year 1946, had the highest ratio of debt to total capitalization. Like TWA, Capital ran into serious financial difficulties in the years 1946 and 1947, which were followed by major changes in management, large personnel lay-offs, and drastic cutbacks in prospective equipment purchases.

Except for TWA, the extent to which the various carriers relied on debt financing as a matter of deliberate choice does not appear of record. In the case of TWA, neither the Frye management nor Toolco nor its principal officers had a completely consistent philosophy with respect to the approximate amount of debt the carrier should carry. In the various proposals advanced by the Frye

management the ratio of debt to equity varied, although Mr. Frye and Mr. Talman continued to stress the desirability of financing a substantial portion of the carrier's capital needs through the sale of common stock. It was only after their failure to obtain the continuing support of Mr. Dietrich and the consent of Mr. Hughes for any one of its several early proposals to finance that the Frye management made overtures for large loans from the RFC and the Export-Import Bank.

In the long discussions and negotiations between the Frye management and Toolco, as represented by Mr. Dietrich and/or Mr. Hughes, neither of the latter ever definitely foreclosed the possibility of raising a substantial amount of the necessary capital needs of TWA through the sale of common stock. However, in defending the large borrowings of TWA since the war, Mr. Hughes stated that he was definitely in favor of debt financing as a matter of policy under the circumstances existing since the end of the war.[41] Mr. Dietrich stated that he likewise held out

[41] In addition to Toolco's expressed fears of providing large capital funds to what it considered to be an improvident management, Mr. Hughes' specific grounds for such a policy are hereinafter recited. Whether Mr. Hughes was motivated by other considerations the record does not show. Conceivably Mr. Hughes might have considered using Toolco's limited common-stock investment in the carrier as a leverage to magnify Toolco's potential profits on stock held, since the expected return on the carrier's over-all investment would be, normally, substantially higher than the cost of borrowed funds, thereby accomplishing what is known as "trading on equity." There is no evidence, however, that this motivated Mr. Hughes' reluctance to agree to any one of the several of Mr. Frye's proposals for substantial equity financing; nor does the record show that Mr. Hughes wished to avoid possible dilution of Toolco's control of the carrier, since he consistently stood ready to have Toolco take up its pro rata share of any common stock to be offered. Certainly the record will not support public counsel's charge of sheer arbitrariness on the part of Mr. Hughes in dealing with the various plans of the Frye management for large-scale financing.

for as much debt financing as might be available. Similarly, the present chairman of the board of directors of TWA, Warren Lee Pierson, indicated his preference for debt financing for air carriers.

Mr. Hughes stressed the low rates of interest at which debt financing could be accomplished and the tax advantage of financing by debt rather than the sale of capital stock.[48] Mr. Dietrich's preference for debt stemmed from his feeling that until TWA could have assessed its postwar capital needs fairly accurately it should not have attempted to raise a lot of money through the sale of common stock simply because the market was favorable, although he recognized that if a need for a substantial amount of new capital could have been satisfactorily demonstrated, the carrier's stock base of $5,000,000 of $5-par-value common stock during the years 1944–46 was far too low, and that the financing of all of the carrier's capital needs through debt would have resulted in an unbalanced capital structure. Mr. Pierson doubts the wisdom of selling the equity securities to finance the purchase of airplanes whose useful life is of such short duration. He stated in unequivocal language his preference for debt securities for

[48] The following testimony summarizes his defense of debt financing as a matter of policy during the years 1945-46: "* * * my position was that at that time debt financing was very attractive. Interest rates were low, and interest could be paid out of basic earnings before taxation. Equity financing, to leave a satisfied stockholder, probably should have returned something between seven and ten percent, and that would have been required to be paid out of earnings after taxation. So I think my position at this particular time was that I had to be convinced; or let me say I was not fully convinced that equity financing was desirable. In other words, if that financing could be obtained on proper terms, I was not fully convinced that debt financing might not be more desirable." (Tr. p. 116.)

this type of financing,[43] emphasizing that he felt that credit arrangements of the equipment-trust type, so widely used in the purchase of railroad equipment, should be utilized for the purchase of air transport equipment.[44] Both Toolco and TWA have taken the position that the sale of air carrier common stock to the general public at the high market prices which prevailed during 1945 and a portion of 1946 would be contrary to the policy, expressed in the Securities Act of 1933 and later the Securities Exchange Act of 1934, to protect the purchaser of securities against the vicissitudes of rising and falling financial markets. In other words, it is their contention that had TWA gone into the equity market at the time the market was most favorable and sold a substantial amount of common stock, that part of the public which purchased it would have suffered severe losses when the market for airline securities broke.[45] It is their further contention that the Board has an obligation to protect the investor in airline securities as part of its responsibility to the public interest.

---

[43] "My testimony would be, Mr. Examiner, that as a matter of judgment, we did not go into the equity market." (Tr. pp. 61-62.)

[44] The use of the equipment trust to finance air carrier equipment was endorsed by both the President's Air Policy Commission and the Congressional Aviation Policy Board. See *Survival in the Air Age*, the report by the President's Air Policy Commission, issued January 1, 1948, pp. 116-118; and *National Aviation Policy*, 80th Congress, 2nd Session, Senate Report No. 949, pp. 25-26.

[45] "There seem to be feelings that at times it would have been a fine time for the aviation industry to have unloaded a lot of stock at high prices. I don't agree with that. I think it would have been unfortunate to have done so as far as TWA is concerned * * * It is a shocking conception to unload securities on the widows and orphans simply to give a temporary aid to a company, and then have to live with it the rest of your life * * *" (Testimony of Mr. Pierson, Tr. p. 66.)

Respondents contend that on the question of debt against equity financing under the conditions which prevailed in the industry during the period here under review there should be no criticism of anyone who, as a matter of policy, decided to follow one route or the other. They pointed to the fact that TWA had successfully weathered its postwar difficulties; that it has been able to meet its debt service obligations; and that both its financial structures and earnings position have been improved.

Respondents also take considerable comfort from the fact that not only the air transport industry but American industry generally relied heavily upon debt financing in the period following the war. To demonstrate the extent to which American business has been financing recent expenditures in ways other than through the sale of stock and the reasons therefor, respondents submitted for the record the so-called McCabe report.[46] This report discusses in scholarly fashion the question of debt and equity financing, and points out that stock financing by business corporations generally has been particularly low since the fall of 1946. The report states that new common-stock issues have averaged only about 10 percent of total new corporate security issues since that time. It goes on to state that since the fall of 1946 businesses had obtained funds for capital outlays primarily from bank and insurance company loans, and new bond issues and retained earnings, rather than from sales of stock on the market. Among other things, this report enumerates the various induce-

[46] *The Equity Capital Situation*, a personal statement by Thomas B. McCabe, Chairman of the Board of Governors of the Federal Reserve System, prepared at the request of a Subcommittee of the Committee on Banking and Currency of the U. S. Senate. Submitted August 5, 1949.

ments for business enterprises to finance their capital needs by means other than stock sales, including the high cost of equity capital, the low cost of debt, the availability of retained earnings, and the tax advantages of debt financing. The report also discusses the reasons for the failure of individual investors to buy more equity shares in American business, and expresses concern over the fact that the American people have shown a reluctance to buy stock, and that, as a result, the capital structures of corporate enterprises have in recent years been unduly expanded by means other than the issuance of equity capital. However, the report makes clear that in the interests of economic stability it is always better if both large and small enterprises finance more of their investment expenditures with equity and less with borrowed capital.

CONCLUSIONS

The basic question to be resolved in the present phase of this proceeding is whether the additional acquisition resulting from the letter agreement of January 8, 1947, is in the public interest. This controlling question of the public interest cannot be judged by any one single factor. Rather, it must be determined by the weighing of all the principal considerations disclosed by the evidence relating to the purposes and requirements of the Act. As indicated in the statement of issues in the forepart of this report, those considerations were framed during the prehearing conference as specific tests of the propriety of granting approval of the further acquisition. Evidence was adduced at the hearing with respect to those considerations by both respondents and by public counsel.

There is not, however, in issue in the present phase of this proceeding any question relating to Toolco's 45-percent stock interest in the carrier previously approved by the Board, except insofar as the record may warrant a recommendation that further action with respect thereto be taken in further proceedings. Moreover, Toolco's plans and policies for the carrier between the time of the Board's original order of approval and the date of the letter agreement are relevant only insofar as the record of Toolco's past control properly indicates what action should be taken with respect to the substantive public-interest issue presently before us.

Respondents' brief discusses the principal events relating to Toolco's relationship with TWA both before and after the date of the letter agreement, and respondents contend that each of the several considerations analyzed therein is sufficient to support the affirmative conclusion that the additional acquisition should be approved as being in the public interest. The brief argues that collectively those considerations offer overwhelming compulsion to that conclusion.

Public counsel's brief likewise reviews the evidence of record in terms of several considerations bearing upon the propriety of approving the additional acquisition, but he concludes that the record herein raises serious doubt whether the further acquisition should be approved, and whether any control by Toolco over TWA should be permitted to continue. His brief raises three possible alternatives as an answer to the ultimate question raised by this proceeding. As a first possible alternative, he appears to suggest that Toolco should not be permitted to solidify its control over the carrier as a result of the additional acquisition, but that some limitation be imposed on the exercise

of the rights flowing from the additional stock which Toolco has acquired in the carrier as a result of, and since, the letter agreement. The import of this proposed alternative is not entirely clear but presumably it contemplates a trusteeing of such stock for Toolco's benefit, subject to some condition that such stock remains nonvoting so long as it is in the hands of a trustee. Public counsel, however, dismisses this suggested alternative as being generally impractical and, for various reasons, undesirable. As a second possible alternative, public counsel suggests the possibility of rejecting approval of the additional acquisition, and reopening the proceeding under Docket No. 1182 for the purpose of determining whether or not all control of TWA by Toolco should be terminated. But public counsel appears to entertain serious doubt as to the Board's power to terminate a control previously approved.[47] As a third possible alternative, he suggests that the additional acquisition be approved but that Toolco's relationship with TWA, as portrayed by the record in this proceeding, be used by the Board as a case history for the purpose of demonstrating to Congress the need for public control of security issues by air carriers. Public counsel urges the examiner to recommend that the Board adopt this third suggested solution to the basic question posed by this proceeding.

Public counsel's condemnation of the manner of Toolco's control of TWA rests upon his contentions that Toolco

[47] The examiner's disposition of the ultimate issue raised by this proceeding, as hereinafter set forth, makes it unnecessary to rule on the question of the Board's authority to reopen the proceeding under Docket No. 1182. It is to be noted, however, that both counsel for TWA in the proceeding under Docket No. 1182 and counsel for Toolco in the present proceeding have, in effect, conceded that the Board has jurisdiction to reopen.

was directly and principally responsible for the carrier's present unbalanced capital structure, for its heavy burden of debt, and for such major financial disabilities as the carrier has experienced since the close of the war. These weaknesses in the carrier's financial structure are all alleged to have stemmed from the reluctance of Toolco to permit TWA to utilize equity financing when equity financing was feasible and advantageous.

Nowhere in public counsel's brief is there an affirmative recognition of any benefits which have accrued to the carrier as the result of having Toolco as its principal owner. That there have been such benefits, and that these benefits have been real and substantial, the record admits of no doubt. Nor will the record permit findings that Toolco alone is accountable for TWA's postwar difficulties, nor that its course of action with reference to the problem of financing the carrier was in all major respects inconsistent with the public interest.

In any candid accounting of Toolco's stewardship of the carrier since the Board's original approval of the control relationship, certain significant considerations affecting the public interest must be placed on the credit side of the ledger. At the outset, the record makes clear that there is no conflict of interest between Toolco's present or contemplated aeronautical activities and its control of an air carrier. On the contrary, the public interest favors Toolco's continued engagement in certain phases of aeronautics. It is of course a truism to state that any activities of benefit to the public are in the public interest. The contributions of Toolco's aircraft division and Mr. Hughes to the science of aeronautics, including their endeavors with respect to aircraft design instrumentation, aids to navigation, and

their developmental activities in behalf of both the armed services and civil aviation, have been and no doubt will continue to be of considerable general benefit to the entire industry. Additionally, and of specific importance to TWA, have been the contributions of Toolco and Mr. Hughes in the way of financial support to the carrier, in the selection and purchase of its equipment, and their advice and guidance to the engineering and operations departments of the carrier.

Even before TWA's financial crisis of late 1946, the financial resources of Toolco were used to provide credit for the carrier. For example, the credit arrangements provided by Toolco made possible the placing of the original order for the Constellation airplane with the Lockheed Aircraft Corporation. There is little doubt that the Constellation would not have been developed as early as it had without the aid of Mr. Hughes and his company. In addition to the technical assistance from Mr. Hughes and his engineers in Toolco, the financial commitment which was necessary to undertake and continue the project could never have been made and met by TWA. Moreover, the Lockheed Aircraft Corporation has been a substantial beneficiary of those efforts. Thus, in addition to the development of air transportation which has been achieved through these efforts, the aircraft manufacturing industry has been developed and encouraged as well. However, the responsibility of Mr. Hughes and his company for the development of the Constellation did not end with the development of the specifications and financing of the original contract with Lockheed. The subsequent acquisition by TWA of practically every Constellation aircraft in the TWA fleet now and those on order has been accomplished directly or

indirectly with the financial and technical assistance of Mr. Hughes and his company.

Among other contributions of Toolco and/or Mr. Hughes to the welfare and well-being of TWA, perhaps the most important have been the efforts at maintaining or improving the carrier's financial position following the war. Soon after the war ended Toolco obtained the commitment of Equitable for a loan of $30,000,000, shortly thereafter raised to $40,000,000, upon favorable interest terms, to finance the purchase of equipment and for other corporate purposes. While the examiner feels that the choice of this type of financing was unwise at that time, the formulation of a long-range postwar financial plan for TWA was complicated by serious differences between the carrier and its principal stockholder over the carrier's operating plans and policies. And, rightly or wrongly, Mr. Hughes had come to the conclusion that substantial debt financing was definitely to TWA's advantage. Barring unforeseen developments and the later need for considerably more capital than realized under the loans from Equitable, TWA's general financial condition appeared satisfactory at the time of the negotiations for the Equitable loans, and both Mr. Hughes and Mr. Dietrich were confident that the carrier could carry that much additional debt. It was not until November and December 1945 and the first part of 1946 that TWA ran into really serious losses, resulting primarily from the heavy expenses attending the inauguration of its international routes; except for a small profit in June of 1946, those losses continued and in fact became, for reasons already enumerated, even more aggravated during the remainder of that year.

The letter agreement of January 8, 1947, under which Toolco agreed to purchase $10,000,000 of the carrier's convertible notes saved TWA from utter financial failure in the darkest hour of its history. Thereafter, in December of 1947, in order to further improve the financial structure of the carrier, Toolco voluntarily agreed to waive all right to obtain repayment of this debt except through the issuance of stock in accordance with the terms of the notes. Then, in August of 1948, Toolco and Mr. Hughes further aided the financial structure of the company by effecting a conversion of the notes into stock at $10 per share, notwithstanding the fact that conversion could not have been required by TWA until January 1, 1950.

Aside from the question of whether TWA should have done more equity financing, and should have had Toolco's cooperation in planning for it at a much earlier date, Toolco and Mr. Hughes were of assistance to the carrier in still other respects. As already noted, without the participation of Toolco, TWA would not have been able to secure an underwriting of the common stock it sold in February 1949. In August 1949, as previously explained, Toolco made the financing of the purchase of 20 new Constellations possible by entering into a commitment with the banks that, if as of December 31, 1949, the net worth of TWA had not been increased to $20,000,000, Toolco would undertake to provide the amount of the deficiency. Since the close of the hearing herein, Toolco has aided TWA in purchase of other equipment. Moreover, Toolco's officers, particularly Mr. Hughes and Mr. Dietrich, have been generous in lending their services, time, and ability to the management of the carrier. Finally, TWA's improved operating results since the reorganization of the carrier in

the early months of 1947 are in considerable part due to Toolco's leadership.

The foregoing is a summary of the assistance of Toolco and Mr. Hughes to TWA without regard to the question of whether substantially more equity financing could or should have been accomplished by TWA before or shortly after the close of the war. Certain of the assistance here examined, such as the development of the Constellation, the engineering and managerial help to the carrier, and much of the financial aid during that period, has been of unquestionable benefit to TWA. On the other hand, if Toolco and its principal officers can be held wholly accountable for the manner in which TWA was financed during the immediate postwar period, as urged by public counsel, then our appraisal here of Toolco's control of the carrier must be debited with what is an obvious detriment to the public interest. It is manifest that the carrier's present capitalization, in spite of its considerable recent improvement, is neither reasonable nor sound. Its proportion of debt to total capitalization is far too large. Its burden of both long-term loans and short-term obligations has affected, and very likely will continue to affect, its capacity to acquire new capital. It is impossible now for TWA to acquire through additional debt more aircraft without obtaining prior consents or waivers under various financial agreements it has entered into in the past. Indeed, TWA's recent acquisition of the six used Constellations under arrangements whereby they were initially acquired by Toolco and resold to TWA on a conditional sales basis was necessary because the carrier could not have purchased them directly without the specific consent of its principal creditors. This transaction is illustrative of the

embarrassment which a debt-heavy capital structure can visit upon an air carrier.[48]

The examiner does not purport infallibly to hold that under all circumstances equity financing should be undertaken in preference to debt financing. Obviously, there may be occasion for borrowings on the part of air carriers. The condition of capital markets may at times make debt financing an unavoidable necessity; moreover, certain corporate needs, such as the acquisition of current assets or emergency equipment, may often be more advantageously financed through borrowings. However, the excessive use of debt and other senior securities is clearly undesirable. At the present stage of the industry's development, a sound and reasonable capitalization of an air carrier requires a heavy preponderance of common stock.

Local public-utility enterprises, such as electric power, telephone, and transit companies, as well as railroads, have historically relied heavily upon the issuance of debt to raise capital funds. But the financing of airlines raises special problems. It is, of course, elementary economics that the dependability and regularity of earnings is a prime consideration in determining the extent to which a public utility may issue debt securities. As in the case of other corporate enterprises, an air carrier's net earnings are the measure of its ability to meet fixed charges and earn a profit. Air-carrier operations, however, are char-

[48] TWA is perhaps more fortunate than another carrier driven to similar circumstances would be, since TWA's principal owner is one with substantial resources which have been consistently available to provide credit for the carrier. On the other hand, if public counsel's assessment of Toolco's responsibility for the TWA's failure properly to finance were taken as correct, it could be argued that Toolco had a bounden duty to come to the financial rescue of the carrier in the closing months of 1946 and thereafter.

acterized by typically high operating ratios,[40] leaving a relatively small margin for nonoperating expenses (including capital charges) and for profits. As a result, unless fluctuations in operating revenues are accompanied by proportionate trends in costs, small reductions in gross revenues may produce serious declines in net earnings. Although airline managements are demonstrating increasing control over costs, air-carrier costs are not always susceptible to easy or rapid adjustment in the event of drastic declines in traffic volumes. On the other hand, air traffic volumes have been unusually sensitive to fluctuation: bad weather, a series of accidents, technical difficulties with new aircraft, and cyclical changes in the business, are capable of creating substantial but unpredictable declines in demand for air transportation. An air carrier's capacity to meet expenses in the face of receding revenues is made much more difficult, of course, if heavy fixed charges in the form of interest and amortization payments on outstanding loans must also be met. Moreover, the rapid obsolescence of equipment deprives the industry of that more permanent and constant property base so characteristic of power, transit, and telephone utilities. And the dangers of financing equipment purchases through debentures, or other forms of debt whose maturities may outlast the life of the assets thereby acquired, are obvious.

---

[40] Ratio of operating expenses to operating revenues. For the calendar years 1947, 1948, and 1949, the domestic trunk lines' operating expenses were 105.9, 99.5, and 94.6 percent, respectively, of their operating revenues. TWA's operating ratios for the same years were 109.6, 98.9, and 95.9 percent, respectively. In each case, the percentage of operating expenses to operating revenues is inclusive of revenues derived from mail pay.

There is no doubt that the air transport industry should have made more extensive use of equity financing in raising new capital for postwar needs. Indeed, it may reasonably be asserted that a sound capitalization for air transport companies at the present stage of the industry's development is one composed almost exclusively of equity stock. Because of the uncertainty of the continued net-revenue-producing power of an air carrier's assets, a substantial burden of debt is likely to cause financial embarrassment. Adversity in a carrier's earning position, either for the lack of sufficient gross revenues or ready ability to reduce operating expenses, may force the danger of failure to meet fixed charges and/or debt maturities. TWA found itself precisely in that predicament since the close of the war. Improvement in its revenue-producing capacity, achieved through better control over costs, larger traffic volumes, and some increased mail compensation, and a considerable restoration in its investment position, achieved largely through the assistance of Toolco has, however, enabled TWA to meet all its obligations.

A conservative capitalization for an enterprise operating under as narrow a profit margin as an airline, and subject to what have historically been the air transport industry's changing fortunes, requires the capital cushion provided by an adequate common-stock equity. The assets represented by common stock shares provide a margin of safety for a corporation's earnings and for such assets as may be represented by a corporation's senior obligations.[30]

---

[30] For a more complete exposition of the common-stock cushion principle, see Barnes, *The Economics of Public Utility Regulation*, pp. 728-729, and the S. E. C. cases therein cited.

Obviously, the larger the common-stock investment in a carrier's capital structure, the greater the margin of financial safety and the less the risk of financial failure in the event of a serious recession in business.

The foregoing considerations cannot be brushed aside as delicate distinctions of financing theory. They are matters of substantial practical importance to both the industry and the Board. As already noted, the certificated trunk-line carriers emerged from the war period with relatively sound capital structures. The high earnings of the war years enabled most of them to retire outstanding indebtedness. Several of the carriers were able to garner considerable cash reserves. The war ended with a very favorable market for airline stocks. Yet the history of airline financing since the end of the war shows unwarranted reliance on borrowings as means of financing capital needs. The crisis in airline finance during the years 1946 and 1947 was unquestionably aggravated by service charges and repayment requirements on extensive borrowings.

This is not to imply that all of the trunk-line carriers failed to utilize equity financing to acquire capital funds for postwar needs. As previously noted, eight of the trunk-line carriers marketed common stock in years from 1944 through 1947, inclusive,[51] although for the most part in inadequate amounts. However, it is significant that the carriers which found themselves in most serious financial difficulties during the 1946-47 crisis in civil aviation, such as Capital and TWA, were among the carriers which failed to do any equity financing at all during that period.

It will no doubt be contended that a more liberal mail-pay policy on the part of the Board during and imme-

[51] Excluding Capital's sale of common stock in May 1944, involving the conversion of the outstanding preferred stock.

diately following the war would have helped to avoid the industry's postwar difficulties. On the other hand, it can be reasonably asserted that but for the subsidy provisions of the Civil Aeronautics Act individual carriers would have developed more conservative capital structures. It is certainly doubtful whether the lending institutions which obliged the carriers with credit arrangements in recent years would have been willing to risk the substantial funds lent in the absence of the so-called "need" mail-pay provisions of the Act.

The examiner intends no implication that the financial support to the industry required by the Act has been, or is, unwise or unnecessary. But the industry's capacity to maintain its credit and raise new capital depends upon more than a fair and adequate mail-pay policy. It depends to a major extent upon the promise of present and prospective nonmail earnings and the maintenance of reasonable capitalizations. The use of excessive debt will inevitably impair a carrier's capacity to meet current and continuing capital needs, or to obtain such needs at reasonable cost, thereby depriving it of the very means necessary to serve economically and efficiently new and expanding markets. As a result, the carrier may find itself in the straight jacket of excessive debt and faced with the alternative of postponing desirable new investments or issuing even more debt. Except for the financial assistance it has received from Toolco and Mr. Hughes, and increased temporary mail payments, TWA would, in all probability, have been forced to the wall in the early months of 1947.[83]

---

[83] Whether a sounder and more simplified corporate structure would have been followed had the carrier been left to receivership and reorganization is, of course, a matter of speculation.

However, the extent to which Toolco and its principal officers can be held directly or principally responsible for TWA's present capital structure poses a most difficult problem. Rarely, if ever, are the principal owners of an enterprise entirely free to formulate a financial plan. Numerous factors, including, among others, the probable amount of new funds needed, the state of the securities' market, the time and cost involved in floating publicly or privately offered issues, and the necessary cooperation between a corporation's management and its proprietors, all operate to complicate and often delay agreement on a financial plan. In the situation under review here, though the general amount of TWA's capital requirements for its domestic operations was ascertainable before the war ended, the carrier could not have been expected to have raised the new capital needed for its international services until after it received notification of the Board's award thereof in July 1945. Moreover, Toolco was working with a management which it inherited when it bought into TWA, and with which it was at odds on matters of high operating policy for the carrier. And while the market was very favorable to equity financing near (and immediately after) the close of the war, the air transport industry, with industry generally, was faced with the practical problem of weighing the advantages of financing through means other than the sale of common stock. In addition to such inducements as continuing tax advantages of debt financing, and the higher cost of equity capital, both in terms of promotion and expected yields on the part of investors, it was necessary to decide whether, in spite of the high favor in which airline stocks were then held, the market would absorb the very substantial offerings required to

raise all needed capital requirements through common-stock sales, whether the market would continue favorable through the considerable period of time required by large-scale underwriting, and whether, if common-stock financing was to be used exclusively, it might not be wiser to wait for an even greater appreciation in common-stock prices.

The record shows that since the close of the war American business has financed new capital outlays largely through debt and the retention of past earnings. In spite of continuing high earnings and substantial inflationary pressures, the market for industrial stocks has been relatively dull and erratic. While the market for airline stocks has been very favorable during a considerable part of the period under review here, both in terms of dividends and earnings, and particularly so relative to book values, the years of 1944 and 1945 were years of war, with war's attendant uncertainties. Following the war's end, the air transport industry had less than a year in which to undertake equity financing before the market break in mid-1946 put a damper on the sale of airline stocks.

Nevertheless, a number of the carriers were successful in raising equity capital before the break in the market for airline stocks, notably Pan American's 43-million-dollar stock issue just before the war ended, although most of the capital necessary for the industry's postwar needs was raised through borrowings. Had the Frye management and Toolco's officials, including Mr. Hughes, been able to agree on a financing plan before the war ended, there is nothing in the record to indicate that TWA could not have successfully marketed common stock in substantial volume before the market broke about mid-1946.

It is true that during the entire period following the Board's original approval of the Toolco-TWA relationship, and up to the time of TWA's financial difficulties in late 1946, there were constant negotiations between the officials of Toolco and the management of TWA in an effort to accomplish a substantial measure of permanent financing. These negotiations finally bore fruit in the tentative agreements arrived at in Los Angeles meetings in June and August 1946, which would have raised approximately 100 million dollars in capital funds. These proposals failed of consummation primarily because the bankers apparently feared the market would not absorb the large offering of common stock involved. That their fears were not unjustified is evidenced by the fact that American's offering of 40 million in preferred stock was marketed only with considerable difficulty as early as June 1946, when the market for airline stocks began weakening.

But whatever were TWA's problems in promoting equity financing to meet its postwar capital needs, the insistence of Mr. Hughes and Mr. Dietrich on debt as a matter of deliberate policy to meet TWA's capital requirements right after the war ended must be condemned. Had such an attitude persisted, there would have been small hope of improving the carrier's faulty capitalization. Fortunately, both Mr. Hughes and Mr. Dietrich have been aware of the dangers of operating a carrier that may eventually need as much as 100 million dollars or more in invested capital with the relatively small common-stock capital base that TWA had at the time of its financial troubles in late 1946. They stood ready to commit Toolco to the substantial amount of equity financing involved in the program tentatively agreed upon at Los Angeles in the summer of

1946. Moreover, Toolco's recent agreement to convert the $10,000,000 loan evidenced by the letter agreement of January 8, 1947, into common stock, and its commitment to take up its pro rata portion of the large amount of common stock offered for sale by TWA in February 1949, have contributed considerably to the restoration of the carrier to a sounder capital structure.

Respondents' concern about the investors who may have purchased common stock in an air carrier at the time when the market for airline stocks was bullish, and who may have suffered losses when the market broke, hardly requires comment. Their solicitude for the "widows and orphans" who may have then bought airline stocks after the war is touching, to say the least; but they furnish no figures on the extent to which airline shares were then sold to that part of the investing public. The fact remains that the purchaser of common stock is the ultimate risk taker; in other words, the stock buyer is the real entrepreneur who, under our system of enterprise, stands either to gain or lose, depending upon the fortunes of the business he chooses to invest in. It would appear that respondents should show equal or—perhaps even greater—concern for those investors who, having already bought into an air carrier, stand to lose all should the carrier's excessive debt result in financial failure.

The measure of Toolco's responsibility on the single and narrow issue of equity vs. debt financing for TWA must be weighed against the contributions and value of Mr. Hughes and his company to the carrier. On balance, it must be concluded that the increased interest in TWA by Toolco is in the public interest, and that the further acquisition of control resulting from the letter agreement

of January 8, 1947, should be approved. Testing the propriety of approving the additional acquisition by weighing the net effect of Toolco's actions and policies with respect to TWA for the period since October 1944, the record requires a finding that Toolco's 45-percent control of TWA has been of substantial advantage not only to that carrier but to the industry as a whole. The beneficial nature of Toolco's control is demonstrated by the numerous instances of material and managerial assistance to TWA by Toolco and Mr. Hughes, particularly the manner in which Mr. Hughes and his company rallied to the support of the carrier during the financial crisis of late 1946 and early 1947.

At the time the Board first considered the application of Toolco for approval of control of the carrier under Docket No. 1182, it was the opinion of Mr. Frye, who was then president of TWA, that the interest of commercial air transportation as a whole, as well as the interest of TWA in particular, would be furthered by the association of Mr. Hughes with the carrier, since through such an association a portion of Mr. Hughes' time and his unusual talents in the field of aeronautics would be available for the development of airline equipment and the improvement of airline operations. Except for his differences with Mr. Hughes over the manner in which the carrier should have accomplished its financing for the postwar period, Mr. Frye is still of the opinion that the relationship of Mr. Hughes and his company to TWA is one of substantial public benefit to both the carrier and the industry.

While the examiner is of the conviction that Toolco officials, including Mr. Hughes, erred in not doing more to come to terms with the Frye management for the purpose

of promoting a substantial measure of equity financing before or immediately after the end of the late war, the record will not support a finding that failure of Mr. Hughes and his company in that regard alone makes Toolco's control of TWA inconsistent with the public interest. The policy followed by Toolco and Mr. Hughes was part of the general pattern of financing followed by most of the airline industry and, indeed, of American business generally. Moreover, the many instances of Toolco's assistance to the carrier have been of undoubted public benefit. It is also to be noted that no question has been raised during this proceeding concerning TWA's capacity to serve adequately all of its existing routes or its ability to extend its services to meet the requirements of the traveling public. Finally, TWA occupies a very important place in this country's domestic and international air transportation system. It is in the public interest to make and keep it a strong carrier to the end that it can continue effectively to serve the traveling public and effectively maintain its competitive position among our large carriers. TWA's failure to finance properly was part of industry's failure to do likewise, and that failure was but one of several failures of foresight which almost laid the industry low in the period of readjustment after the war. With Toolco's help, TWA's earnings position has recovered and its investment position is on the way to recovery. The continued interest of Toolco in TWA appears essential to the best interests of the carrier and the public. Accordingly, in the light of the record in this case and in recognition of the meaning of public interest as set forth in section 2 of the Act, the examiner finds that the additional control acquired by Toolco as a result of the letter agreement of January 8, 1947, is consistent with the public interest.

As hereinbefore noted, public counsel requests the examiner to recommend to the Board that this proceeding be used as a case history to show the need for Board control over the capital financing of air carriers. The examiner is convinced of the urgent need of public control of airline security issues to assure sounder airline financing. The principal objective of regulatory control over airline capital structures is the maintenance of sound airline credit. Unless a number of airline capitalizations are improved and maintained on a more conservative basis, with greater proportionality in junior securities, the industry will continue to be plagued with difficulties in financing the full development of air transportation. Further, for reasons which hardly need amplification here, the Board's efforts at effective regulation of the industry, particularly the promotion of economically sufficient air carriers, are seriously handicapped by the lack of Board authority to prevent unsound airline financing and the uneconomic consequences thereof. However, the Board is already on record with the Congress with respect to the problem and the purposes of effective public-security regulation. In its annual report for the year 1942, the Board recommended an amendment of the Act granting it control over the security issues and the capital structures of air carriers. The Board urged that the effective discharge of its powers to regulate the economic phases of air transportation required surveillance of airline financing to prevent the development of unusual capital structures.[28] Public counsel's request that the history of finan-

[28] "The Act should be amended to require the Board's approval of the issuance of securities or the assumption of obligations or liabilities by air carriers. No effective control over this subject is now authorized by law. Such lack of control constitutes a marked

cial difficulties of TWA as they developed during the postwar period be used as a case history by the Board in underscoring the need for regulatory supervision of airline security issues and capitalizations would be manifestly unfair to that carrier. Other carriers followed a similar financial policy during the postwar period, and several suffered financial disabilities almost as serious as those experienced by TWA. Under the circumstances, the Board ought to use the experience of the entire industry in support of its recommendations to the Congress on this matter.

In view of the foregoing, and upon the basis of all evidence of record, the examiner finds that Toolco's further acquisition of control over TWA resulting from the letter agreement of January 8, 1947, is in the public interest, and otherwise meets the requirements of section 408 (b) of the Act.[84] It is therefore recommended that—

---

departure from other statutes regulating public utilities and common carriers where the need for Government control of security issues is almost universally recognized. The effective discharge of the Board's powers to regulate the economic phases of air transportation, which require the prevention of economically unsound capital structures, clearly requires that the Board be given power and responsibility to supervise, in the public interest, the development of the capital structures of the air carriers." *Annual Report of the Civil Aeronautics Board, 1942*, p. 14. The Board has renewed its recommendation for authority from Congress to control the issuance of securities by air carriers in its annual reports for the years 1943, 1944, 1945, 1946, 1947, 1948, and 1949, at pages 6, 9, 16, 21, 29, 38, and 43, respectively, of said annual reports.

[84] There is no occasion to be concerned here with the provision of section 408 (b) against the creation of monopolies contrary to the public interest by an acquisition of control of an air carrier. Toolco does not control any other air carrier. Its interest in aeronautics is limited to the activities hereinbefore described.

1. The Board approve the further acquisition of control which resulted from the transactions evidenced by aforesaid letter agreement of January 8, 1947, subject to the same conditions imposed by the Board in its approval of October 17, 1944, of the Toolco-TWA relationship under Docket No. 1182. (6 C. A. B. 153, 158.)

2. That the proceeding instituted by the Board by order serial No. E-289, dated February 7, 1947, be terminated.

[3949]

Order No E-16195

Adopted by the Civil Aeronautics Board
at its office in Washington, D. C.
on the 29th day of December, 1960

[CAPTION] Docket 1182
Docket 2796

ORDER GRANTING EXEMPTION AND APPROVING INTERLOCKING RELATIONSHIP

By motion filed December 23, 1960, Trans World Airlines, Inc. (TWA), to the extent legally necessary, requests modification of Order 3210,[1] as amended and modified by subsequent orders, which restricts commercial [3950] transactions between TWA and Hughes Tool Co. (Toolco) and between TWA and any subsidiary or affiliate of Toolco to a maximum of $200 each and an aggregate annual expenditure in such transactions of $10,000. Approval, under section 408, is also requested, if necessary, for the transactions contemplated under the financing plan. Similarly sought is

[1] 6 CAB 153 (Docket 1182).

approval, to the extent necessary, under section 409 of the Act, of the interlocking relationships arising out of the designation of Raymond M. Holliday, as a representative of Toolco, and of Ernest R. Breech and Irving S. Olds as representatives of the banks and institutional investors, to serve as Voting Trustees under a Voting Trust set up for the Toolco-TWA stock.

The TWA motion herein is the culmination of a series of previously considered motions[2] designed to facilitate the refinancing of TWA's obligations and to provide for its acquisition of jet aircraft[3] and related engines and parts. The prior motions were granted by the Board in Order E-15430, June 23, 1960 and Order E-15561, July 21, 1960 which, among other things, gave general approval, under section 408 of the Act and in accordance with the provisions of Order 3210, to a refinancing plan for TWA of approximately $260,000,000 involving the participation of banks, insurance companies and Toolco. The present application presents a recasting of the original plan, which in its present form, accomplishes a significant modification of Toolco control of TWA.

The plan designed to finance the cost of the "Jet Flight Equipment Program" of TWA provides for (a) the delivery of $72,200,000 principal amount of 6% Equipment Mortgage Serial Notes of TWA, maturing serially on December 31, 1961, and quarterly thereafter through December 31, 1964;[4] (b) the issuance of $92,800,000 principal amount of 6½% Equipment Mortgage Sinking Fund Notes of TWA, due December 31, 1972;[5] and (c) the issuance of

---

[2] The motions were filed April 1, 1960, April 14, 1960, May 6, 1960 (considered in Order E-15430, June 23, 1960), and July 1, 1960 (considered in Order E-15561, July 21, 1960).

[3] Boeing 707's and Convair 880's.

[4] The "December 1960 Loan Agreement" with Banks.

[5] The "Note Purchase Agreements" with Insurance Companies.

$100,000,000 principal amount of interim subordinated promissory notes of TWA to Toolco in payment *pro tanto* of the amounts owing by TWA to Toolco at an interest rate not exceeding 7% to mature not earlier than June 30, 1973.

In conjunction with the plan, TWA and Toolco provide for a "Final Accounting and Debenture Purchase Agreement." Under its terms Toolco will transfer title to aircraft, engines and parts to TWA and assign its rights in contracts to acquire such jet flight equipment. Upon the settlement of account of obligations to Toolco, TWA will pay Toolco cash in the amount of $54,892,499.35; $100,000,000 in Interim Subordinated Notes with interest at 6½%; and an additonal cash payment of $1,068,356.52, representing accrued interest on subordinated obligations. In addition, TWA agrees to [3951] make a subscription offer[6] to holders of common stock for an aggregate of not less than $100,000,000 and not more than $112,000,000 subordinated debentures with detachable warrant rights for the acquisition of common stock.[7] Under the "Hughes Financing and Subordination Agreement",[8] Toolco will acquire all the subordinated debentures not subscribed to by the remaining stockholders.[9] The issuance of the Subordinated Debentures will provide TWA the means for refunding the Interim Subordinated Notes in the sum of $100,000,000 issued to Toolco by the resulting cash proceeds or by exchange of

[6] On or before May 31, 1961.

[7] The terms of the debentures and of any stock warrants attached thereto will conform to the recommendations of a special committee appointed for that purpose by and from TWA's investment banking firms. For each $100 of subordinated debentures, the holder shall receive the right to purchase not more than 4 shares of TWA common. The maturity of the debentures may be as late as June 30, 1978.

[8] This agreement is among TWA, Toolco, Irving Trust Company (as Bank Agent), the Institutional Investors, and the Chemical Bank New York Trust Company, as Trustee under the Indenture of Mortgage.

[9] Toolco may not be called upon to purchase more than $100,000,000 worth.

Subordinated Debentures for Interim Subordinated Notes held by Toolco. As a result, the stock interest of Toolco in TWA, now 78%, may be increased.

Under the terms of the "Hughes Financing and Subordination Agreement," Toolco will provide a revolving credit of $50,000,000 in favor of TWA for the period expiring upon the acquisition of the last of 20 Convair 880's which TWA has the right to acquire under the Jet Flight Equipment Program. In addition, Toolco is obligated to lend TWA any sum necessary to insure a net working capital of $10,000,000 until acquisition of the last of the Convair 880's.[10]

Most significantly the financing plan provides measures of assurance regarding the management policies of TWA during the period the securities are outstanding. This is accomplished by a "Voting Trust Agreement,"[11] an "Option Agreement,"[12] and the "Noteholder's Agreement."[13] These agreements provide for a voting trust in respect of TWA stock now held by [3952] Toolco,[14] or thereafter acquired during the life of the trust. The Voting Trust will remain in effect until December 15, 1970, unless previously terminated or extended as provided therein. Toolco, under its right to designate one of the three Voting Trustees has appointed Raymond M. Holliday, a director of TWA. The Notes Agent, acting for the investors, designated the other

[10] TWA will issue subordinated notes for this obligation. Toolco's obligation to provide the net working capital shall cease if the outstanding subordinated notes equals $50,000,000. Repayment of the subordinated notes, during the period specified, is to be made out of any excess over the required working capital.

[11] This agreement is among TWA, the Voting Trustees and Toolco.

[12] This agreement is among Irving Trust Company (as Bank Agent), The Equitable Life Assurance Society of the United States and Metropolitan Life Insurance Company (the Institutional Investors) and Toolco.

[13] This agreement is among Irving Trust Company (as Bank Agent), the Institutional Investors and Irving Trust Company (as Note Agent).

[14] Now amounting to 5,221,301 shares of TWA stock.

two Voting Trustees. The Voting Trustees, acting by majority vote, are empowered to exercise their sole and absolute discretion in respect of the TWA stock deposited with them and will accordingly be in control over TWA management and policies. The Voting Trustees, under the trust, may also act as directors or officers of TWA and may engage in transactions with TWA.[18] Compensation for the services of the Voting Trustees is to be paid by Toolco.

Under the terms of the Option Agreement, Toolco is granted the non-transferable right and option, at any time after December 31, 1961, to purchase any outstanding Serial Notes by payment in full, and by payment in full of the outstanding Sinking Fund Notes plus a premium of 22% until March 31, 1962. The amount of the premium is thereafter reduced at the rate of ½ of 1% for each elapsed quarterly period of three months.

Upon the Board's grant of the requested modification of the limitations of Order 3210, and the consummation of the refinancing plan, a significant and fundamental change will have been accomplished in the control of TWA by Toolco. Upon the execution of the Voting Trust, the Toolco control of TWA will change drastically in both form and substance. No longer will the directors of Toolco be free to enforce their dictates or those of Toolco's controlling shareholder on TWA. Only one of the three voting trustees will represent directly these interests. Two of the voting trustees, selected by the financial institutions, will be independent of Toolco and of Mr. Hughes.

The voting trustees will not be restricted in their power to approve further financing for TWA, nor in their ability to sell, lease, transfer, hypothecate or otherwise dispose of, or manage TWA's assets. In short, their power to control

[18] Any approval herein of the plan of financing shall not, unless specifically so provided, be construed as an approval of any personal transactions between the Individual Trustees and TWA assuming such approval by the Board should be required under the Act.

TWA is as plenary as that of Toolco and its controlling shareholder.

We are advised that it was the insistence of the financial institutions upon the establishment and terms of the voting trust and of the conditions for its dissolution which have been the major stumbling block in recent weeks to the consummation of TWA's initial jet financing program.[10] We [3953] have not been told officially of the reasons which motivated the decision of the insurance companies and banks to seek this protection. However, we have not been unaware of TWA's problems.

For example, it is a matter of public record that TWA's major competitors arranged the financing for their jet fleets at a significantly earlier date than did TWA. The impact of this fact may be indeed far-reaching. This may have meant that those carriers obtained their financing at a time when funds could be raised on relatively more attractive terms. In any event, it is clear that TWA will pay substantially higher interest rates for its funds than its major competitors. The fact that this disparity in debt burden can play a significant part in the competitive picture is certainly clear.

Moreover, it is probable that the delay in arranging financing has also prevented TWA from securing delivery of a substantially large portion of the jet fleet which was ordered on its behalf. Thus, TWA was unable to take delivery of the twenty Convair 880's, most of which have been available for the past several months It appears that the failure to receive this equipment as planned may have played a substantial part in TWA's recent inability to maintain its traffic position relative to its principal competitors. Thus, we note, for example, that the carrier's preliminary

---

[10] TWA has arranged for the acquisition of 47 jet aircraft. Comparable carriers have acquired, or are in process of acquiring, jet fleets in the neighborhood of twice this size.

traffic reports for the month of November 1960 show that TWA's share of the Big Four domestic passenger market has declined from 23.0 to 20.2 per cent. By way of contrast, United, which was behind TWA, has caught and passed it, increasing its share from 21.3 per cent to 29.0 per cent.[17] It appears to be significant that TWA's major competitors have already taken delivery of much larger jet fleets than TWA is operating and have firm orders for delivery of more.[18]

[3954] Under these circumstances, we think it clear that Board action to facilitate TWA's acquisition of jet equipment is in the public interest. At the same time, however, it is evident that Toolco's control of TWA, as exercised through Hughes, has presented substantial problems requiring the Board's attention.

In short, and without further description of these problems, the Board wishes to make clear the fact that it would anticipate the proper filing of an application under section 408 of the Act and the obtaining of the approval of the Board before Toolco would attempt to reassume control over TWA.[19] It is clear that such approval would not be

---

[17] American suffered a much less severe decline from 32.0 to 30.5 per cent.

[18] Apart from the impact on relative traffic position, there are other respects in which TWA may have been adversely affected by the delays in financing and in the delivery of the Convairs. Thus, the delay may have created increased cost of jet crew qualification both in terms of retraining expense and in keeping such crews available pending delivery. (Such crews cannot be used interchangeably in piston equipment; therefore, the crews which have been qualified in Convairs have presumably not been employed in TWA's revenue service.) At least one of the aircraft has suffered from exposure. The cost of restoring the aircraft to operable condition may be sought to be imposed on TWA.

[19] The Option Agreement requires Toolco, in exercising the option, to provide a satisfactory opinion of counsel that the exercise of the option, by purchase of the notes, does not require governmental or regulatory approval or that such approval has been granted and is in force. No such provision could, of course, preclude dissolution of the voting trust after the ten-year term has expired. Nonetheless, it is clear that Toolco should not resume direct control at that time unless prior approval of the Board is sought and obtained.

forthcoming without a searching inquiry into the public interest factors affecting this control.[20]

We turn now to a consideration of the specific transactions and relationships upon which we must act. The applicants seek either a disclaimer of our jurisdiction or our approval of these transactions. Their need is for a prompt and definitive action by the Board in order that they might consummate the transactions by the December 29th date, set for the complicated closing arrangements. The application has necessarily been brief in its statement of these problems and the short period of time between the date of filing and the date by which our action has been sought has prevented our giving to these matters the study and consideration which would be warranted to resolve satisfactorily the question of jurisdiction. In circumstances such as these when we do not find the transactions contrary to the public interest, and where the parties do not contest our jurisdiction, it is certainly better to assume jurisdiction and to act promptly so that the parties might proceed to a satisfactory resolution of the business situation.

[3955] The basic terms of the financing, including the portion involving transactions directly between Toolco and TWA, are essentially the same as these heretofore approved by Orders E-15561, dated July 21, 1960, and E-15430, dated June 23, 1960. And we find that, as modified, they are in the public interest and should be approved under the terms of Order 3210 and by exemption under section 416 of the Act from the requirements of section 408.

---

[20] *See Trans World Airlines, Inc., Further Control by Hughes Tool Company*, 12 C.A.B. 192, 196 (1950), Docket 2796. "Aside from any undesirable influence on an air carrier which might arise because of the acquirer's interest in a given phase of aeronautics, an acquirer of an air carrier is not without responsibility in other respects for an air carrier's general capacity to perform its public responsibilities. For inevitably the controlling company, by virtue of its investment in the acquired carrier, will endeavor to make itself accountable — as indeed the acquirer here under scrutiny had — for the managerial efficiency, the operating economy, and the financial integrity of the controlled carrier. Accordingly, in determining whether or not a particular acquisition should be approved, it is necessary to consider the over-all impact of the acquirer's plans and policies with respect to the controlled carrier."

To the extent that the Voting Trustees shall be considered as officers or directors of TWA and nominees of the directors of Toolco, the interlocking relationships between TWA and Toolco should be found in the public interest and approved.

Raymond M. Holliday, Vice President, Assistant Treasurer and Assistant Secretary of Toolco, is a member of TWA's Board of Directors. By Order E-14251, July 22, 1959, the Board approved the holding by Mr. Holliday of any directorships and offices within the system of affiliated and subsidiary companies composed of Toolco and TWA. In view of the previous approval of Mr. Holliday's interlocking relationships, his serving in addition as a Voting Trustee by Toolco nomination will not adversely affect the public interest. Accordingly, approval to the extent required under section 409(a) of the Act is granted herein.

Ernest R. Breech is Chairman of the Board of Directors of Aeronutronic Systems, Inc., a Ford subsidiary which is apparently engaged in research related to space vehicles and related matters chiefly for military purposes. This is his only association which appears to be an aeronautical enterprise.[21] Since it is not engaged in the sale of products to civil air carriers, it is consistent with our practice to approve this relationship.

ACCORDINGLY, IT IS ORDERED:

1. That the restrictions imposed on transactions between Toolco and TWA by Order 3210, as modified by Order E-15561, July 21, 1960, and by Order E-15430, June 23, 1960, are further modified herein to permit TWA to consummate the transactions described in the motion filed herein;

[21] Mr. Breech has offered and will be asked to submit in detail the full information required by Part 251 of the Economic Regulations. Should the information reveal any additional relationships, the Board would be free to act at that time.

[3956] 2. That TWA be and it hereby is, exempted pursuant to section 416, from the requirement of section 408 to the extent necessary to enable it to consummate the jet aircraft equipment purchases described and set forth in the motion herein;

3. That this order shall not be deemed a determination for rate-making purposes of the reasonableness of any of the transactions specified herein;

4. That to the extent required under section 409(a) of the Act, approval is granted of the relationships which will be created by Raymond M. Holliday, Ernest R. Breech, and Irving S. Olds, serving as Voting Trustees of the controlling stock interest of Toolco, in TWA, under a Voting Trust Agreement;

5. That this Order may be amended or revoked at any time in the discretion of the Board without hearing.

By the Civil Aeronautics Board:

/s/ Robert C. Lester

Robert C. Lester
Secretary

UNITED STATES DISTRICT COURT

SOUTHERN DISTRICT OF NEW YORK

TRANS WORLD AIRLINES, INC., Plaintiff, -against- HOWARD R. HUGHES, HUGHES TOOL COMPANY and RAYMOND M. HOLLIDAY, Defendants.	STATEMENT OF ROBERT WILAND RUMMEL 61 Civ. 2324

Robert Wiland Rummel, Vice President, Planning and Research, Trans World Airlines, Inc. ("TWA"), respectfully states as follows:

QUALIFICATIONS

I was born in Dakota, Illinois, on August 4, 1915, and graduated from Curtiss-Wright Technical Institute, Glendale, California, in 1936. I am a member of the Aerospace Council of the Society of Automotive Engineers and an Associate Fellow of the American Institute of Aeronautics and Astronautics. I have participated in technical activities of the Air Transport Association since 1942 and in technical activities of the International Air Transport Association since 1949. I am a member of the National Aeronautics and Space Administration Research Advisory Committee on Aircraft Operating Problems.

In 1935, I served as Stress Analyst for the Hughes Aircraft Company in Burbank, California, and performed the stress analysis of the landing gear, wing skin and other

aspects of the Hughes [illegible], the aircraft with which Howard Hughes established the world's land plane speed record in 1935. Thereafter, I undertook a special research study of the efficiency of fuselage structures at the Curtiss-Wright Technical Institute.

In 1936, I assisted in the development of the Model 12 transport as a stress analyst for Lockheed Aircraft Corporation.

After the Lockheed project was completed, I was employed by Aero Engineering Corporation, Long Beach, California, as a detail designer and draftsman and assisted in the development of an all-metal commercial airplane.

After the Aero project was completed, I laid out basic designs for the fuselage, wing panels, center section and tail surfaces of a proposed United States Army trainer to be produced by National Aircraft Company of Alhambra, California.

Beginning in October 1937, I was employed by Rearwin Airplanes, Kansas City, Kansas, and designed two new series of aircraft, seven distinct models of which were certificated by the CAA and produced in quantity by the company. I also designed and was responsible for developing substantial improvements in aircraft models which had been produced previously. I was in charge of engineering, flight testing, aircraft inspection and installation of new facilities. In addition to serving Rearwin as Chief Engineer, I also served as Chief Engineer of the Ken Royce Engine Co. after its acquisition by Rearwin in 1938. As such, I redesigned two aircraft engine models. These were used by Rearwin and four other aircraft manufacturers. In 1941, I was elected to the Board of Directors of the successor of the two Rearwin

companies, Rearwin Aircraft and Engines, which I continued to serve as Chief Engineer. This company was succeeded by the Commonwealth Aircraft Corporation which I served as Chief Research Engineer.

On June 21, 1943, I joined TWA as Senior Engineer in charge of new aircraft studies and future fleet planning. I became Chief Engineer of TWA on August 10, 1949 and held that position until March 24, 1956, when I was elected Vice President, Engineering.

In 1958, I became Chairman of the TWA Jet Planning Committee and served in this capacity as well as Vice President, Engineering. The Jet Planning Committee was composed of vice presidents and major department heads and was responsible for planning for the introduction and efficient use of jet aircraft by TWA.

On April 27, 1959, I was elected to my present position of Vice President, Planning and Research.

From 1956 through 1960, when I was serving as Vice President, Engineering, and later Vice President, Planning and Research, of TWA, I was also employed by the Hughes Tool Company ("Toolco") as a consultant and special representative in connection with the acquisition of jet aircraft from the Boeing Company and General Dynamics Corporation (Convair Division) and the acquisition of jet engines from the Pratt & Whitney Aircraft Corporation and the General Electric Company. As Toolco's special representative during that period, I reported directly to Howard Hughes. I had authority to commit funds under Toolco's contracts, and the Toolco factory representatives at Boeing and Convair reported to me as

special representati[illegible] Toolco responsible for the technical administration of the Toolco contracts with such manufacturers.

Although my title has changed from time to time, my primary duty during most of the period of my employment by TWA has been to recommend what size and what type fleets to procure for TWA. I and members of my department consulted extensively with those departments of TWA which would either use or be affected by the procurement of the aircraft, and I consulted extensively with Mr. Hughes personally during the period from 1954 until 1961.

Since 1943, I have been actively engaged in all of TWA's major aircraft procurement programs and have been intimately concerned both with aircraft actually acquired through Toolco and also with aircraft which TWA considered for procurement, including the aircraft listed in Annex A. My activities included negotiations with aircraft manufacturers with respect to technical specifications, performance characteristics, provisioning and spare parts, delivery schedules, acceptance tests and other matters.

EARLY JET DEVELOPMENTS

As part of our responsibility for planning and research activities in connection with the acquisition of new aircraft for TWA, I and members of my department kept in close contact with manufacturers of aircraft and engines in order to keep abreast of significant new developments in the commercial aviation field. As early as 1946, I was aware of the probability that in due course jet transports would be feasible for commercial purposes. In this connection, I investigated numerous designs for commercial jet transports throughout the post-war years.

In 1951, I completed a report to John A. Collings, Vice President, Operations, of TWA with respect to TWA's equipment position vis-a-vis our major competitors. This was followed by reports in 1952 and 1953 that evaluated progress being made in turbine-powered transport developments. Copies of those reports are attached as Annex B(1)-B(4). A substantial portion of those reports was devoted to important developments in the field of jet transports and their potential impact upon TWA and the commercial aviation industry. At that time, British manufacturers were significantly further advanced in the commercial turbo-jet aircraft field than were United States manufacturers because of the early American emphasis on using jet aircraft strictly for military purposes. I stated in my reports, however, that United States developments would eventually surpass the British programs when sufficient interest was aroused here to provide financial support for American research and development in the commercial jet aviation field.

Those early reports also contained a detailed discussion of the operational aspects of turbine-powered aircraft and developments in power plants for turbo-prop and turbo-jet aircraft. I concluded that TWA should by-pass the British manufactured DeHavilland Comet and await the availability of United States jet equipment.

Subsequent to my reports, TWA continued its strong interest in jet air frame and engine developments. My staff and I continued to follow developments by all United States manufacturers and were particularly interested in the rapid progress being made by the Boeing Company.

By early 1954, Boeing was promoting its basic 707 designs and was very interested in developing airline interest

in its jet transport proposals. Boeing supplied TWA with the latest performance data derived from the use of a prototype 707 which was first flown during the summer of 1954. This contact was made through me because my department was responsible for reviewing manufacturers' proposals for various jet designs and also because of my known association with Mr. Hughes. At about the same time, Boeing was also discussing its jet aircraft with Pan American World Airways, Inc., and probably other carriers as well.

We engaged in numerous discussions with Boeing representatives throughout 1954 and thereafter. Among those participating in the negotiations in addition to myself were Mr. Hughes and numerous TWA employees, including Mr. Ralph Damon, then TWA President, and numerous Boeing employees.

In 1955, TWA and Toolco recognized that in order for TWA to maintain its competitive position, it would require a fleet of jet-powered aircraft substantially as soon as its principal competitors and that orders for such equipment should not be delayed. In the fall of 1955, the development of jet aircraft reached the point at which TWA should have made definite commitments for a fleet of medium to long range jet aircraft which would be sufficient to meet TWA's initial needs for its domestic and international routes. I recommended to Mr. Hughes at that time that TWA should place orders for jet aircraft so that it would have the aircraft available at or before the time its competitors did.

In addition to such aircraft as the Boeing 707 then under consideration, it was then appropriate for TWA to contemplate the need for aircraft of somewhat smaller size and perhaps shorter range. However, in the fall of 1955, the Convair 880

jet aircraft had not yet been developed and TWA was not aware that it would ultimately acquire that particular aircraft. (TWA also did not at that time foresee that it would acquire in 1957 and 1958 four Lockheed 1049H piston aircraft and four Lockheed 1649A aircraft.)

One of my responsibilities as Vice President of Engineering of TWA was to keep TWA's senior management currently informed with respect to the number and types of aircraft ordered by TWA's principal competitors, the anticipated delivery dates for such aircraft and the anticipated effect of such acquisitions upon TWA's competitive position. By the fall of 1955, various air carriers had submitted firm orders for the acquisition of medium to long range jet aircraft and the anticipated effect upon TWA's competitive position made it important for TWA to do likewise. A list of aircraft ordered by TWA's competitors on or before December 9, 1955 was transmitted to Mr. Collings, Mr. Damon and others, including representatives of Toolco, on or about that date and a copy is attached as Annex C. That list shows that by December 9, 1955, various air carriers had placed the following firm orders for a total of 186 jet aircraft, including 95 Douglas and 59 Boeing jet aircraft:

Airline	Manufacturer and Type	Quantity
Pan American	Douglas DC-8	25
Pan American	Boeing 707	20
United	Douglas DC-8	30
National	Douglas DC-8	6
Eastern	Douglas DC-8	26
BOAC	Comet IV	20
American	Boeing 707	30
Braniff	Boeing 707	5
Air France	Caravelle	12
KLM	Douglas DC-8	8
Continental	Boeing 707	4

ORDERS FOR JET AIRCRAFT PLACED BY HUGHES TOOL COMPANY

In 1956 and 1957, Toolco entered into agreements providing for the purchase by Toolco of a fleet of 63 jet aircraft: 15 Boeing 707-131 jet aircraft, 18 Boeing 707-331 jet aircraft, and 30 Convair 880 jet aircraft.

These agreements were as follows:

(1) Purchase of 15 Boeing 707-131 jet aircraft. On March 2, 1956, Hughes Tool Company, by F. W. Ayers, and Boeing Airplane Co., by J. B. Connelly, entered into a contract known as Agreement No. 7.(1) That contract originally provided for the purchase by Toolco of 8 Boeing 707-131 jet aircraft. The number of 707-131 jet aircraft to be purchased was increased to 9 (Supplemental Agreement No. 1, dated March 19, 1956), and then to 12 (Supplemental Agreement No. 2, dated September 28, 1956), and finally to 15 jet aircraft (Supplemental Agreement No. 3, dated January 10, 1957). The Boeing 707-131 jet aircraft (which has a shorter effective range than the 707-331 jet aircraft) was part of the Boeing 707-120 Series and was suitable for use on TWA's domestic routes.

(2) Purchase of 18 Boeing 707-331 jet aircraft. On March 19, 1956, Toolco, by C. H. Price, and Boeing, by J. B. Connelly, entered into a contract known as Agreement No. 9, which provided for the purchase by Toolco of 18 Boeing 707-331 jet aircraft.(2) The

(1) Plaintiff TWA's Exhibit No. R-1.

(2) Plaintiff TWA's Exhibit No. R-2.

Boeing 707-331 jet aircraft was part of the Boeing 707-320 Series and was suitable for use on TWA's international routes.

(3) Purchase of 30 Convair 880 jet aircraft. By agreements dated June 7, 1956 and September 10, 1956, Toolco, by Raymond Hollfday, and General Dynamics Corporation (Convair), by J. V. Naish, entered into a contract providing for the purchase by Toolco of 30 Convair Model 880 (22) jet aircraft.(1)

TWA did not receive this 63-plane fleet. On March 5, 1959, I was informed by Leonard Schwartz and Raymond Cook of Toolco that the number of jet aircraft TWA was to receive had been reduced. TWA ultimately received the 15 Boeing 707-131 jet aircraft ordered by Toolco. However, it received only 12 Boeing 707-331 jet aircraft, not 18; the remaining 6 Boeing 707-331 jet aircraft were diverted to Pan American and were not replaced until 5 Boeing 707-331B jet aircraft were leased in 1962-1963. It would not have been necessary for TWA to lease these aircraft if it had received the 6 Boeing 707-331 jet aircraft diverted to Pan American. Instead of 30 Convair 880 jet aircraft, TWA received only 20. The remaining 10 Convair 880 jet aircraft were disposed of as follows: 6 aircraft, 3 of which had been previously assigned by Toolco to TWA, were delivered to Northeast Airlines through an arrangement between Toolco and Convair entered into in November 1960 and were ultimately

---

(1) Plaintiff TWA's Exhibit Nos. R-3 and R-4.

acquired by TWA from Convair in 1963; 4 aircraft were retained by Toolco and are currently being operated by Northeast Airlines under lease or other arrangement with Toolco.(1)

By the end of 1960, TWA's jet fleet totaled only 28 aircraft, not 63. That 28-plane fleet was grossly inadequate for TWA's needs. Moreover, even if all 47 jet aircraft ultimately received by TWA from Toolco had been received by TWA by the end of 1960, TWA's jet fleet would not have been adequate to meet TWA's needs at that time. In my opinion, the 63-plane fleet, in the numbers and types ordered by Toolco, had it been ordered and delivered on a timely basis, would have been adequate to meet the needs of TWA for jet aircraft through 1960.

BOEING 707 - REALLOCATION OF DELIVERY DATES TO REFLECT EQUALIZATION OF DELIVERY POSITIONS AMONG TWA, PAN AMERICAN AND AMERICAN

If orders for jet aircraft for TWA had been placed at least as early as TWA's competitors placed their orders, the initial order would have been placed in about October 1955. In order to meet TWA's initial domestic and international needs, 15 Boeing 707-131 jet aircraft and 18 Boeing 707-331 aircraft should have been ordered at that time.

The study which is attached as Annex D shows the effect which such timely placement of orders would have had in accelerating deliveries of jet aircraft to TWA if TWA had received equal treatment with Pan American and American Airlines, its major competitors, in accordance with prevailing practices in the

(1) Plaintiff TWA's Exhibit Nos. R-5, R-6 and R-7.

industry and the specific procedures followed by the Boeing Company. The reallocation referred to in the study has been prepared on the basis of the following assumptions, each of which reflects prevailing industry practices and Boeing's production and sales policies as I know them to have been during the period under consideration:

(1) Pan American, American and TWA ordered Boeing 707 jet aircraft in the quantities actually ordered in 1955 and 1956 by Pan American, American and Hughes Tool Company, respectively, and TWA ordered at about the same time as Pan American and American.

(2) Pan American, TWA and American all sought as early delivery positions as Boeing would provide.

(3) Pan American obtained the first three delivery positions of the 120 Series, such aircraft to be used in the Boeing certification program.

(4) Boeing's deliveries to American of the 120 Series would have reflected Boeing's efforts at least to equalize early delivery positions as between TWA and American.

(5) TWA obtained the first three delivery positions of the 320 (330) Series, such aircraft to be used in the Boeing certification program.

(6) Boeing would have delivered the remaining aircraft of the 320 (330) Series on a basis which would have provided Pan American and TWA with substantially equivalent numbers of 320 (330) aircraft by the end of

the first six months after the delivery of the first aircraft to TWA, with deliveries to Pan American and TWA made on a substantially equivalent basis per month.

The reallocation of delivery dates of Boeing 707-320 (330) Series jet aircraft has been prepared on the further assumption that if Pan American had not received the 6 Boeing 707-331 jet aircraft ordered by Toolco, the earliest delivery dates for six 707-320 jet aircraft which Pan American could have obtained from Boeing upon ordering 6 such jet aircraft in July 1959 (the date of its arrangements with Toolco for delivery of such 6 aircraft) would have been the dates indicated in a letter addressed by Boeing to me dated July 27, 1959, which reflects my determination of the best delivery schedule obtainable from Boeing at such time. A copy of this letter is attached as Annex E.

For purposes of the study, actual delivery dates of aircraft are taken from FAA Registration Certificates(1) and the "ready for delivery" dates for 2 Boeing 707-331 jet aircraft actually delivered to TWA on April 1 and April 5, 1960 are taken from Boeing invoices.(2)

My conclusion is that if TWA had ordered its Boeing jet aircraft at about the time Pan American and American did so, TWA would have received 15 Boeing 707-131 and 18 Boeing 707-331 jet aircraft in accordance with the following schedules:

---

(1) Plaintiff TWA's Exhibit No. R-8.

(2) Plaintiff TWA's Exhibit No. R-9.

REALLOCATED DATES OF DELIVERY TO TWA OF 15 BOEING 707-131 JET AIRCRAFT

November 30, 1958	May 10, 1959
December 31, 1958	May 13, 1959

February 27, 1959	May 28, 1959
March 30, 1959	June 13, 1959
April 3, 1959	June 29, 1959
April 18, 1959	July 10, 1959
	July 27, 1959

REALLOCATED DATES OF DELIVERY TO TWA OF 18 BOEING 707-331 JET AIRCRAFT

July 19, 1959	December 30, 1959
August 22, 1959	January 18, 1960
August 28, 1959	February 29, 1960
September 22, 1959	March 23, 1960
October 6, 1959	April 26, 1960
October 27, 1959	April 29, 1960
November 5, 1959	May 9, 1960
November 10, 1959	June 8, 1960
December 15, 1959	July 1, 1960

CONVAIR 880 - ACCELERATION OF SCHEDULED SERVICE TO REFLECT TIMELY DELIVERIES OF 30 AIRCRAFT TO TWA

In 1954, 1955 and 1956, I participated in discussions and negotiations between Howard Hughes and Convair which preceded Convair's agreement to proceed with a development program for a somewhat shorter range jet aircraft ultimately designated as Convair's Model 880 (22). Convair was unwilling to undertake the program until it had firm commitments for the purchase of 40 aircraft.

On June 7, 1956, Toolco entered into an agreement with General Dynamics Corporation (Convair) for the purchase of 30 Convair Model 880 (22) jet aircraft.(1) The agreement contemplated that an additional 10 such jet aircraft would be purchased by Delta. It was my opinion then and it is still my opinion that all 30 Convair 880 jet aircraft ordered by Toolco were required by TWA in order to supplement the 15 Boeing 707-131 jet aircraft and 18 Boeing 707-331 jet aircraft previously ordered by Toolco and to meet TWA's needs for jet aircraft through 1960.

Article 2 of the Toolco-Convair agreement provided for deliveries of all 40 aircraft on the following schedule:

Month of Delivery	Number of Aircraft
November 1959	1
December	1
January 1960	2
February	2
March	3
April	4
May	4
June	5
July	6
August	6
September	6

This delivery schedule was incorporated by reference in Article 2 of the subsequent purchase agreement of September 10, 1956 between Toolco and Convair.(2) The allocation of deliveries between Toolco and Delta was subject to an agreement between Toolco and Delta which was to be incorporated in the Toolco and Delta purchase contracts with Convair.

The allocation of deliveries between Toolco and Delta was the subject of discussions and correspondence among

---

(1) Plaintiff TWA's Exhibit No. R-3.

(2) Plaintiff TWA's Exhibit No. R-4.

Convair, Toolco and Delta for an extended period following the execution of the purchase contracts. In the fall of 1958, the production of Convair 880 jet aircraft reached a point at which it became essential to allocate particular aircraft between Toolco and Delta so that aircraft would proceed through the production line in the sequence in which they were to be delivered. At that time, Convair allocated deliveries between Toolco and Delta.

On November 18, 1958, Delta confirmed the Convair allocation and executed "Amendment No. 3" to its purchase agreement with Convair.(1) This Amendment provided for delivery schedules to Delta as follows:

DELTA DELIVERIES
As Per Amendment No. 3
November 18, 1958

Month of Delivery	Number of Aircraft
January 1960	1
February	0
March	1
April	1
May	1
June	1
July	1
August	1
September	3
	10

At approximately the same time, Convair informed Toolco that Convair was proceeding with production of the 30 aircraft ordered by Toolco on the basis of a delivery schedule complementary to the Delta schedule. I actively participated in the preparations made by Toolco and TWA for the receipt and utilization of these aircraft. Such preparations were based upon the following schedule:

---

(1) Plaintiff TWA's Exhibit No. R-10.

SCHEDULED DELIVERIES OF CONVAIR 880 AIRCRAFT TO TOOLCO AND TWA

Month of Delivery	Number of Aircraft
November 1959	1
December	1
January 1960	1
February	2
March	2
April	3
May	3
June	4
July	5
August	5
September	3
	30

This schedule appears in a document entitled "Hughes Tool Company Airplane Program Delivery Schedule", dated November 18, 1958(1) (the same date that Delta executed its own delivery schedule)(2) and in TWA Jet Plans and Premises - Aircraft Availability - Convair 880 Delivery - March 24, 1959.(3)

The delivery schedules of both Delta and Toolco, dated November 18, 1958(4) are completely consistent with the delivery schedule for 40 aircraft contained in the Toolco-Convair agreement of June 7, 1956, as shown in the following table:

Month of Delivery	June 7, 1956 Contract	Toolco Schedule Nov.18,1958	Delta Am. No. 3 Nov.18,1958
November 1959	1	1	0
December	1	1	0
January 1960	2	1	1
February	2	2	0
March	3	2	1
April	4	3	1
May	4	3	1
June	5	4	1
July	6	5	1
August	6	5	1
September	6	3	3
	40	30	10

(1) Plaintiff TWA's Exhibit No. R-11.
(2) Plaintiff TWA's Exhibit No. R-10.
(3) Plaintiff TWA's Exhibit No. R-12.
(4) Plaintiff TWA's Exhibits Nos. R-10 and R-11.

TWA's plans for the integration of Convair 880 jet aircraft were made by jet planning groups under my supervision. With the knowledge of Toolco, these plans had, since the purchase contract was executed in 1956, been premised on the assumption that all 30 aircraft on order by Toolco would be assigned to TWA pursuant to the terms of the Toolco-Convair contract.(1)

After March 5, 1959, when I was informed by Leonard Schwartz and Raymond Cook of Toolco that TWA would receive only 20 of the 30 Convair 880 jet aircraft on order by Toolco, TWA's planning estimates were revised to reflect the reduction from 30 to 20.(2) Deliveries of the 30 aircraft were allocated between Toolco and TWA on the basis of the following schedule, which is set forth in "Hughes Tool Company Airplane Program Delivery Schedule", dated September 4, 1959:(3)

Month of Delivery	TWA	Toolco
November 1959	1	0
December	0	1
January 1960	1	0
February	1	1
March	2	0
April	2	1
May	2	1
June	2	2
July	4	1
August	3	2
September	2	1
	20	10

The foregoing delivery schedule is consistent with the original contract delivery dates set forth in the Toolco-Convair agreement of June 7, 1956.(4) The following table reflects a composite delivery schedule for the 40 aircraft ordered by Toolco and Delta:

---

(1) Plaintiff TWA's Exhibit No. R-3, Art. 6; Plaintiff TWA's Exhibit No. R-4, Art. 16.

(2) Plaintiff TWA's Exhibit No. R-13.

(3) Plaintiff TWA's Exhibit No. R-14.

(4) Plaintiff TWA's Exhibit No. R-3.

Month of Delivery	TWA	Toolco	Delta	Contracts
November 1959	1	0	0	1
December	0	1	0	1
January 1960	1	0	1	2
February	1	1	0	2
March	2	0	1	3
April	2	1	1	4
May	2	1	1	4
June	2	2	1	5
July	4	1	1	6

September	2	1	3	6
	20	10	10	40

The Toolco-Convair contract provided for FAA certification of the Convair 880 jet aircraft no later than May 1, 1960.(1) TWA planning, based upon such a certification date, envisioned the commencement of scheduled operations in May 1960.(2) Early in 1959, however, TWA believed that Convair would be able to complete certification requirements in February 1960. TWA planning estimates reflected a planning date for start of service of March 15, 1960, based upon the anticipated February 1960 certification date(3) and deliveries of 20 aircraft to TWA in accordance with the table set forth above.

Convair did not meet the February certification date, but did fulfill its contractual commitments with regard to certification by completing the requirements on May 1, 1960.(4)

TWA received only one Convair 880 jet aircraft in all of 1960.(5) On December 30, 1960, Toolco finally assigned

(2) Plaintiff TWA's Exhibit No. R-15.
(3) Plaintiff TWA's Exhibit No. R-16.
(4) Plaintiff TWA's Exhibit No. R-17.
(5) Plaintiff TWA's Exhibit No. R-18.

to TWA rights with respect to 19 Convair 880 jet aircraft. Within the next few days, Convair commenced deliveries to TWA and in January 1961, TWA commenced scheduled service utilizing these aircraft.

The following table lists the actual delivery dates of 36 Convair 880 jet aircraft in the order in which these aircraft were actually delivered to Delta, TWA and Northeast as shown in official FAA documents:(1)

DELIVERIES OF CONVAIR 880 JET AIRCRAFT

Date of Delivery	Delivered to
January 31, 1960	Delta
May 4, 1960	Delta
May 6, 1960	Delta
May 18, 1960	TWA
June 2, 1960	Delta
July 4, 1960	Delta
August 4, 1960	Delta
October 1, 1960	Delta
October 23, 1960	Delta
November 21, 1960	Delta
November 30, 1960	Northeast
December 5, 1960	Northeast
December 8, 1960	Northeast
December 12, 1960	Delta
December 14, 1960	Northeast
January 1, 1961	TWA
January 5, 1961	TWA
January 6, 1961	TWA
January 8, 1961	TWA

(1) Plaintiff TWA's Exhibits Nos. R-7, R-18 and R-19.

Date of Delivery	Delivered to
January 12, 1961	TWA
January 21, 1961	TWA
January 21, 1961	Northeast
January 30, 1961	Northeast
February 2, 1961	TWA
February 15, 1961	TWA
March 15, 1961	TWA
March 18, 1961	TWA
March 20, 1961	TWA
April 26, 1961	TWA
May 6, 1961	TWA
May 25, 1961	TWA
June 9, 1961	TWA
July 9, 1961	TWA
August 10, 1961	TWA
September 2, 1961	TWA
October 13, 1961	TWA

The 6 aircraft delivered to Northeast Airlines, as indicated in the foregoing table, were originally ordered by Toolco and delivered to Northeast Airlines pursuant to an agreement between Toolco and Convair dated November 10, 1960 and an agreement between Convair and Northeast Airlines dated November 17, 1960.(1) Subsequently, these 6 aircraft were repossessed by Convair and sold to TWA. Two of these aircraft were delivered to TWA in July 1963, one in August 1963 and three in September 1963.(2)

---

(1) Plaintiff TWA's Exhibit Nos. R-6 and R-7.

(2) Plaintiff TWA's Exhibit Nos. R-6, R-7 and R-20.

The tables below compare the contract delivery dates for both Delta and TWA with the dates upon which delivery was actually made. The monthly delay is calculated for each airline and the results shown.

DELIVERIES OF CONVAIR 880 JET AIRCRAFT TO DELTA

Contract	Actual	Mo. Delay
January 1960	January 1960	0
March 1960	May 1960	2
April 1960	May 1960	1
May 1960	June 1960	1
June 1960	July 1960	1
July 1960	August 1960	1
August 1960	October 1960	2
September 1960	October 1960	1
September 1960	November 1960	2
September 1960	December 1960	3

Delay 14 months for 10 aircraft or average delay of 1.4 months per aircraft.

DELIVERIES OF CONVAIR 880 JET AIRCRAFT TO TWA

Twenty-Plane Fleet

Scheduled	Actual	Mo. Delay
November 1959	May 1960	6
January 1960	January 1961	12
February 1960	January 1961	11
March 1960	January 1961	10
March 1960	January 1961	10
April 1960	January 1961	9
April 1960	January 1961	9
May 1960	February 1961	9
May 1960	February 1961	9
June 1960	March 1961	9
June 1960	March 1961	9
July 1960	March 1961	8
July 1960	April 1961	9
July 1960	May 1961	10
July 1960	May 1961	10
August 1960	June 1961	10
August 1960	July 1961	11
August 1960	August 1961	12
September 1960	September 1961	12
September 1960	October 1961	13

Delay 198 months for 20 aircraft or average delay of 9.9 months per aircraft.

As the purchaser of the Convair 880 jet aircraft, Toolco assumed responsibility for all matters pertaining to deliveries of the aircraft and I was instructed by Toolco that no TWA employee was to become involved in such matters. If TWA, rather than Toolco, had been the purchaser of the Convair 880 jet aircraft, it is my opinion that Convair would have made deliveries of the planes in advance of the dates upon which deliveries actually occurred and that TWA's overall delivery experience would have closely approximated that of Delta. It is my further opinion that TWA would have commenced scheduled service with its Convair 880 fleet at least as early as May 15, 1960 and would have accepted deliveries of aircraft in advance of this date for the purpose of training of flight and ground personnel in the belief that Convair would better its actual certification date of May 1, 1960.

In addition, if TWA, rather than Toolco, had been the purchaser of the Convair 880 jet aircraft, it is my opinion that by the end of 1960, TWA's fleet would have consisted of all 30 Convair 880 aircraft instead of the 20 aircraft referred to in the previous table. The reduction of the size of this fleet was effected by Toolco over my opposition. I have consistently maintained that TWA required all 30 aircraft to fulfill its needs through 1960.

PISTON AIRCRAFT - ACCELERATION OF TWA'S RETIREMENT PROGRAM

Earlier deliveries of Boeing jet aircraft and Convair jet aircraft would have enabled TWA to retire much of its

outmoded piston equipment far earlier than it was actually able to do so and at least as early as TWA's competitors did so. When TWA's jet aircraft were actually delivered, TWA moved quickly to dispose of its obsolescent piston aircraft and it is my opinion that TWA would have done so on the same basis if deliveries of jet aircraft to TWA had come earlier.

I have reconstructed the dates on which TWA would have retired its piston equipment if deliveries of Boeing jet aircraft had been made on the reallocated dates of delivery to TWA of 15 Boeing 707-131 jet aircraft and 18 Boeing 707-331 jet aircraft, set forth at page 13 above, and if deliveries of 30 Convair 880 jet aircraft had been made to TWA on the dates shown in the Toolco Schedule of November 18, 1958(1) referred to on page 16 above. In making the reconstruction, I have followed the same procedure which TWA followed in retiring piston aircraft on the basis of actual deliveries of jet aircraft. An illustration of the method used in computing the reconstructed piston retirement dates is as follows:

> The actual retirement date of 4 Martin 202A piston aircraft is December 31, 1958 and is timed to the actual delivery of a Boeing 707-131 jet aircraft on January 29, 1959. The timely delivery date for that Boeing jet is November 30, 1958 or a gain of 60 days over the actual schedule. The 60-day gain is then applied to the actual retirement date of the 4 Martins, giving a reconstructed retirement date for the 4 Martin aircraft of November 1, 1958.

---

(1) Plaintiff TWA's Exhibit No. R-11.

For purposes of this reconstruction, the dates of actual deliveries of jet aircraft are taken from official FAA Registration Certificates.(1) The dates of actual retirement of piston aircraft are the dates on which TWA considered the aircraft sold and are taken from reports by TWA to the Civil Aeronautics Board on Form 41, Schedule B-8, attached as annexes to the report of R. Dixon-Speas.(2)

The reconstruction of retirement dates of piston aircraft has been made on the basis of a 63-jet plane fleet (the full fleet ordered by Toolco). A total of 103 piston aircraft which were actually retired in connection with the receipt by TWA of its first 63 jet aircraft are used in the calculations. I have calculated reconstructed retirement dates for each of these aircraft using the method outlined above. My calculations are set forth in the chart attached as Annex F.

Current and Aircraft on Order

Reference: Letter, R. W. Rummel to J. A. Collings, May 11, 1955, same subject

We are providing herewith as attachment "A" a list of current and aircraft on order by our main competitive airlines, which revises and supersedes our previous listing transmitted by the reference letter. Attachment "B", which provides a comprehensive list of current and aircraft on order of all the airlines of the world, has also been revised and supersedes the previous issue.

There is another listing preceding attachments "A" and "B" which will be of considerable interest, as it provides a ready reference "box score" of turbine powered aircraft purchases as of this date, and also includes other possible purchases.

Changes in attachments "A" and "B" reflect equipment received and to the best of our knowledge, the latest information on anticipated deliveries.

Annex D
to Statement of
R. W. Rummel

TWA'S STATEMENT OF IMPROVEMENT OF DELIVERY POSITIONS

To measure the improvement in delivery dates which TWA would have obtained over the actual delivery dates of aircraft it received had TWA ordered jet aircraft from Boeing at about the same time as Pan American and American and in comparable numbers, the actual delivery dates of Boeing jet aircraft to Pan American, TWA and American are reallocated among those three customers.

Since a substantial production effort of Boeing would have been directed to serving Pan American, TWA and American, as was the fact, and without changing the delivery positions Boeing in fact reserved and used for other customers, this Statement uses such actual delivery dates of aircraft to these three customers as the best available indication of when Boeing could have delivered such aircraft to Pan American, TWA and American. Actual delivery dates are used rather than contract delivery dates since, to the extent there may have been variations or improvements by Boeing over contract dates, as was the fact, the actual delivery dates are the most reliable.

The reallocation reflects the following assumptions:

(1) Pan American, American and TWA ordered Boeing 707 jet aircraft in the quantities actually ordered in 1955 and 1956 by Pan American, American and Hughes Tool Company respectively, and TWA ordered at about the same time as Pan American and American.

(2) Pan American, TWA and American all sought as early delivery positions as Boeing would provide.

(3) Pan American obtained the first three delivery positions of the 120 series, such aircraft to be used in the Boeing certification program.

(4) Boeing's deliveries to American of the 120 series would have reflected Boeing's efforts at least to equalize early delivery positions as between TWA and American.

(5) TWA obtained the first three delivery positions of the 320 (330) series, such aircraft to be used in the Boeing certification program.

(6) Boeing would have delivered the remaining aircraft of the 320 (330) series on a basis which would have provided Pan American and TWA with substantially equivalent numbers of 320 (330) aircraft by the end of the first six months after the delivery of the first aircraft to TWA, with deliveries to Pan American and TWA made on a substantially equivalent basis per month.

707-120 Series

The following sets forth the actual delivery dates of aircraft of the Boeing 707-120 Series to Pan American, American and TWA:

TWA	PAA	AAL
	8/15/58	
	9/29/58	
	10/16/58	10/23/58
	10/30/58	
	11/30/58.	
	12/19/58	12/31/58
1/29/59		1/23/59
		1/31/59
		2/13/59
		2/27/59
3/17/59		3/27/59
3/30/59		
4/3/59		4/9/59
4/18/59		4/23/59
4/29/59		
5/10/59		5/4/59
5/13/59		5/12/59
5/24/59		5/21/59
5/28/59		5/28/59
6/13/59		6/5/59
		6/24/59
		6/29/59
7/1/59		7/27/59
7/10/59		7/31/59
7/14/59		
8/1/59		8/12/59
		8/24/59
		9/15/59
		10/5/59
		10/14/59
		10/28/59
		11/20/59

Reallocation

The following sets forth a delivery pattern using actual delivery dates reallocated among Pan American, American and TWA. It is posited that Pan American was selected by Boeing as the first customer rather than TWA and therefore received the first three 120 aircraft, and further, that American received the fourth such aircraft (which was the fact).

REALLOCATION

T - TWA)

P - PAA) As Originally Delivered

A - AA)

707-320 Series

The following sets forth the actual delivery dates on which aircraft of the Boeing 707-320 Series were delivered to Pan American and TWA. The aircraft designated "H" were those ordered by Toolco but in fact delivered to Pan American.

The aircraft delivered to TWA on April 1, 1960 was in fact ready for delivery February 29, 1960 and not delivered then because Toolco did not present payment. The aircraft delivered to TWA on April 5, 1960 was ready for delivery on March 3, 1960 and similarly was not delivered then because Toolco did not present payment. Accordingly, with respect to these two aircraft the "ready for delivery" date is set forth as well as the actual delivery date and the "ready for delivery" date will be used in reallocation.

	TWA	PAA
		7/19/59
		8/22/59
		8/28/59
		9/ 1/59
		9/22/59
		10/ 2/59
		10/ 6/59
		10/19/59
		10/27/59
		10/29/59
	11/ 5/59 (H)	
	11/10/59	
	11/10/59	
	11/25/59	
	12/15/59 (H)	12/ 8/59
	12/23/59	12/13/59
	12/30/59 (H)	
	1/18/60	1/13/60
		1/28/60
	3/23/60 (H)	3/ 5/60

	4/ 5/60	4/28/60
	4/14/60	
	4/29/60 (H)	
	5/ 9/60	
	5/25/60	
	6/ 8/60 (H)	
	7/ 1/60	
	7/ 1/60	

Reallocation

The following sets forth the delivery dates of the 707-320 Series to TWA and Pan American had TWA been selected as the first customer for the 320 Series and therefore received the first three such aircraft.

The six aircraft ordered by Toolco which were ultimately delivered to Pan American (identified by "H") are included in this reallocation. This reallocation assumes that had Pan American not received the six 707-331 jet aircraft ordered by Toolco, the earliest delivery dates for six 707-320 jet aircraft which Pan American could have obtained from Boeing upon ordering six such jet aircraft in July, 1959 (the date of its arrangements with Toolco for delivery of the six aircraft), would have been one aircraft in February, 1961, two aircraft in March, 1961, two aircraft in April, 1961 and one aircraft in May, 1961. These, if ordered, would have been received subsequent to the period covered by this reallocation:

ALLOCATION

	Boeing Production (PAA & TWA) Available for Month	TWA	PAA

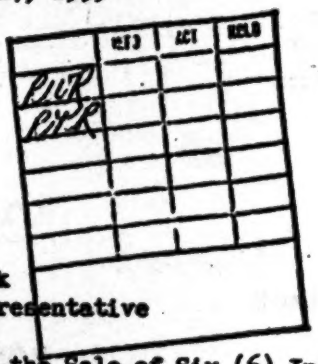
BOEING AIRPLANE COMPANY
TRANSPORT DIVISION
RENTON, WASHINGTON

July 27, 1959



TELEPHONE BROADWAY 2121
IN REPLY REFER TO
6-1100-60-137

Mr. R. W. Rummel
10 Richards Road
Kansas City, Missouri

Through: Mr. Edwin Zak
Resident Representative

Subject: Proposal for the Sale of Six (6) Increased Gross Weight Model 707-331 Aircraft to Hughes Tool Company

Gentlemen:

We wish to amend and supplement letter proposal 6-1100-2-591 to reflect delivery schedules of the six (6) Boeing Model 707-331 aircraft.

Please be advised that the present paragraph III, "Delivery Schedule" of letter proposal 6-1100-2-591 is stricken in its entirety and the following is hereby substituted in lieu thereof:

"III. Delivery

The six (6) Model 707-331 aircraft will be delivered according to the following schedules:

If a firm commitment is made by Hughes Tool Company by August 1, 1959

Month of Delivery	Quantity
February 1961	1
March 1961	2
April 1961	2
May 1961	1

If a firm commitment is made by Hughes Tool Company by September 1, 1959

Month of Delivery	Quantity
March 1961	1
April 1961	2
May 1961	2

BOEING AIRPLANE COMPANY
TRANSPORT DIVISION
RENTON, WASHINGTON

If a firm commitment is made by Hughes Tool Company by October 1, 1959

Month of Delivery	Quantity
April 1961	1
May 1961	2
June 1961	2
July 1961	1"

All other provisions of the letter proposal 6-1100-2-591 remain unchanged.

Very truly yours,

BOEING AIRPLANE COMPANY
Transport Division

T. L. Spalding, Manager
Contract Administration

Gentlemen:

Pursuant to discussions with your company and at your request, we hereby agree to amend the Agreement between our companies for the purchase and sale of thirty (30) Model 22 (Skylark 600) Aircraft, and the same is hereby amended, as follows:

By striking Article 4 (a) of said Agreement and inserting in lieu thereof the following: "(a) Except for Buyer's obligation to reimburse a portion of CONVAIR's costs as expressly provided below, this contract shall be and become null and void and of no force and effect unless (1) within fifteen (15) days from the date hereof (or such longer period as Buyer and CONVAIR may mutually agree upon in writing) the Agreement between CONVAIR and Delta has been executed as contemplated by Article 8 (d) hereof, and unless (2) within a period of sixty (60) days from the date hereof (or such longer period as Buyer and CONVAIR may mutually agree upon in writing) Buyer and CONVAIR complete and execute a mutually satisfactory definitive purchase agreement and detail specification. In the event of termination on account of the failure of the first condition set out in the preceding sentence, all liabilities and obligations of every kind between the parties will thereby be discharged. In the event of termination on account of the failure of the second of the said two conditions, all liabilities and obligations of every kind between the parties will thereby be discharged except that Buyer shall pay one-half of CONVAIR's costs expended on the Model 22 program from the date of this Agreement to the date of termination but not to exceed $100,000."

Hughes Tool Company -2- 4 June 1956

We would appreciate the return to us of two copies of this letter, executed by an appropriate official of your company, simultaneously with the return of the aforesaid Agreement similarly executed.

Very truly yours,

GENERAL DYNAMICS CORPORATION

By _____
Executive Vice President
Convair Division

Accepted and agreed to this
7th day of June, 1956

HUGHES TOOL COMPANY

By Raymond W. Holliday

Title Vice President

THIS AMENDMENT (hereinafter called the "Agreement") entered into as of this 7th day of June, 1956, by and between: GENERAL DYNAMICS CORPORATION, a Delaware corporation, having an office (Convair Division) at San Diego, California (hereinafter called "CONVAIR"), and HUGHES TOOL COMPANY, with its offices at Houston, Texas (hereinafter called "Buyer");

WITNESSETH:

WHEREAS, Buyer desires to purchase aircraft of the type hereinafter described and CONVAIR desires to manufacture and sell the same to Buyer; and

WHEREAS, CONVAIR anticipates entering into a similar agreement with Delta Air Lines, Inc., hereinafter called "Delta" relating to the manufacture and sale of not less than ten (10) Convair Model 22 (Skylark 600) aircraft, containing the same provisions as to price as hereinafter set out, and

WHEREAS, CONVAIR is unwilling to enter into a program of manufacturing said aircraft unless and until it has firm agreements covering the manufacture and sale of a substantial number of such aircraft, or unless Buyer herein and Delta will participate in CONVAIR's losses in the event it fails to sell thirty (30) Model 22 commercial aircraft in addition to the aircraft sold to Buyer and Delta as hereinafter set out, and

WHEREAS, Buyer desires CONVAIR to initiate such program and is therefore willing to participate in CONVAIR's losses in the event CONVAIR fails to [illegible] thirty (30) of such aircraft in addition to the aircraft sold to Buyer and Delta as herein set out, to the extent and in the manner hereinafter provided; and

NOW, THEREFORE, in consideration of the mutual covenants herein

ARTICLE A.

Subject Matter of Sale

CONVAIR shall manufacture and sell and deliver to Buyer, and Buyer shall purchase from CONVAIR the following:

(a) Thirty (30) Convair Model 22 (Skylark 600) Aircraft (hereinafter called "Aircraft") to be manufactured by CONVAIR in accordance with the terms of this Agreement.

Delivery of Aircraft

(a) Delivery Schedule

(1) CONVAIR shall manufacture aircraft for delivery on the following schedule:

Month of Delivery		Number of Aircraft
November	1959	1
December	1959	1
January	1960	2
February	1960	2
March	1960	3
April	1960	4
May	1960	4
June	1960	5
July	1960	8
August	1960	6
September	1960	6

X The above schedule represents the first forty (40) Model 22 aircraft to be manufactured and delivered by CONVAIR, thirty (30) of which shall be delivered to Buyer subject to (b) below, ready for flight. Prior to execution of the definitive purchase agreement referred to in Article 4 hereof, Buyer shall designate the Aircraft by manufacturing number to be delivered to Buyer with due regard to delivery positions desired by Delta Air Lines as an initial purchaser of Model 22 aircraft with Buyer. X

(2) CONVAIR recognizes the importance to Buyer of early deliveries

of the Aircraft hereunder and agrees to use its best efforts to better the above delivery schedule.

(3) Upon delivery to Buyer of each Aircraft in accordance with the terms hereof, title to and risks in connection with such Aircraft shall pass from CONVAIR to Buyer.

(4) In the event any Aircraft is ready for delivery and CONVAIR so notifies Buyer of this fact but delivery of any such Aircraft is delayed by Buyer (whether or not such delay is out of Buyer's control) Buyer shall promptly reimburse CONVAIR for all cost or expense, including, but not limited to, reasonable compensation for storage, insurance and all taxes of every nature whatsoever, incurred by CONVAIR during, or paid or incurred as a result of any such delay in excess of one (1) week. The provisions of this paragraph (a)(4) shall not apply to delays in delivery, if any, referred to in paragraph (b) of this Article, occurring prior to final certification.

(b) Certification

(1) The schedule of CONVAIR's performance hereunder provides for completion of all ground and flight tests required by the Civil Aeronautics Administration to obtain final airworthiness and type certificates by 1 May 1960. Because of the importance to Buyer of early issuance of the airworthiness and type certificate, CONVAIR agrees to use its best efforts to better the above date.

(2) Prior to receipt of final certificates as defined in sub-paragraph (1) above, CONVAIR will have employed each of the Air-

craft ready for delivery in all respects except for such final certificates, and CONVAIR will tender delivery to Buyer of all such Aircraft and Buyer will accept delivery from CONVAIR of such completed Aircraft to the extent that they can be used by Buyer for pilot training and/or other purposes, but conditioned upon and subject to CONVAIR's obtaining final certificates at a later date. CONVAIR may require return of such delivered Aircraft for purposes of obtaining such final certificates and Buyer agrees to make them available for this purpose, upon reasonable notice, in such manner as CONVAIR may direct. Subject to the provisions of the following sub-paragraphs (3) and (4), all costs, if any, in connection with obtaining such final certificates shall be borne by CONVAIR.

C

(3) If any law, directive, order, proclamation, regulation or ruling of the United States Government or any agency thereof, becomes effective after the date of this Agreement which requires any change, addition or modification to any Aircraft delivered in order to obtain an Airworthiness Certificate from the United States Civil Aeronautics Administration, such change, addition or modification shall be made and evidenced by a Change Order specifying the effect, if any, of such change on design, performance, weight, balance and time of delivery. The cost of making any such change, addition or modification shall be borne equally by CONVAIR and Buyer; subject, however, to negotiation of definitive purchase agreement provisions that CONVAIR bear such costs solely for its own account in event the parties mutually agree upon an appropriate price increase in consideration thereof.

2.1.2

(4) " If any law, directive, order, proclamation, regulation or ruling of the United States Government or any agency thereof, other than one required to obtain certification of an Aircraft as set forth in the preceding paragraph becomes effective after the date of this agreement, which requires any change, addition or modification to any Aircraft in order that Buyer may operate any of said Aircraft as it requires, such change, addition or modification shall be offered to Buyer as a Change Order specifying the effect, if any, of such change on price, design, performance, weight, balance and time of delivery. The cost of making such change, addition or modification shall be borne by Buyer; subject, however, to negotiation of definitive purchase agreement provisions that CONVAIR bear such costs solely for its own account in event the parties mutually agree upon an appropriate price increase in consideration thereof. "

ARTICLE 2

Price of and Payment for Aircraft

(a) Price. The total Base Price of the Aircraft purchased hereunder shall be $112,500,000.00, computed on a unit Base Price of $3,750,000.00 per unit delivered in accordance with Article 2 hereof, subject to adjustments as set forth in Exhibit A hereto attached and made a part hereof.

(b) Payments. The total Base Price of the Aircraft purchased hereunder shall be paid as follows:

(1) $16,250,000.00 upon execution of the definitive purchase agreement referred to in Article 4 hereof, representing $675,000.00 per aircraft for each of the thirty (30) Aircraft, and

(2) The balance of the unit Base Price upon delivery of each of the Aircraft.

"Definitive Purchase Agreement and Detail Specification

(a) The parties shall, commencing immediately following execution of this Agreement, define the terms and conditions of a mutually satisfactory definitive purchase agreement and detail specification, and it is hereby agreed that both parties will, in good faith, use their best efforts to complete and execute such definitive purchase agreement and detail specification within sixty (60) days from date hereof, and failure to so complete and execute shall operate to terminate this Agreement except that said sixty (60) day period may be extended by mutual written agreement of the parties hereto. In the event of such termination, Buyer shall pay one-half of CONVAIR's costs expended on the Model 22 program from the date of this Agreement to the date of termination, but not to exceed $100,000.

(b) Said definitive purchase agreement will include other terms and conditions usually incorporated in contracts for the manufacture of commercial transport aircraft, including but not limited to, warranties, considerations of spare parts, changes, indemnity against patent infringement, taxes, customer furnished equipment, data and handbooks, Buyer's representatives and inspection, demonstration and test flights, and excusable delays.

(c) In developing the definitive purchase agreement and detail specification, CONVAIR shall give due and proper consideration to Buyer's desires. CONVAIR shall make such further reasonable changes in the detail specification agreed upon at the time of

execution of the definitive purchase agreement, prior to and during aircraft manufacture, as Buyer desires, subject to Buyer's acceptance of reasonable price increase or decrease and reasonable and normally related delivery and specification effects. It is the mutual desire of the parties that Buyer shall fully disclose, and CONVAIR shall fully take into account, specific existing operating experience and needs as known to Buyer, to the end that the Aircraft shall have excellent characteristics of performance, versatility, growth possibilities, passenger comfort and appeal, and operating and maintenance utility and economy; with the detail specification so reflecting in a manner no less qualified or restricted than is normal among aircraft manufacturers. The parties shall fully cooperate in implementation of the foregoing, and full mutual consideration shall be given to all feasible alternatives known or foreseeable concerning such matters as cockpit and cabin interior arrangements and furnishings, and choice of engines and aircraft equipment and systems. The warranties applicable to the engines shall be satisfactory to Buyer.

ARTICLE 5

Warranties

(a) Subject to the provisions of Article 2(b), CONVAIR warrants that the Aircraft delivered under or pursuant to this Agreement will be certificated by the United States Civil Aeronautics Administration with an appropriate airworthiness and type certificate in the transport category within the meaning of the Civil Air Regulations issued by the Civil Aeronautics Board, and that such certificate will permit the operation of such Aircraft in scheduled passenger service.

(b) CONVAIR's warranties with respect to design, workmanship, and materials will be set forth in the definitive purchase agreement referred to in Article 4 hereof.

Assignments

(a) This Agreement shall inure to the benefit of and be binding upon each of the parties hereto and their respective successors and assigns, but it may not be voluntarily assigned, in whole or in part, by either party without the prior written consent of the other party, except that either party's interest shall be assignable through merger, consolidation or reorganization which includes voluntary sale or transfer of substantially all of its assets, provided, however, that CONVAIR may assign any of its fixed or contingent rights to receive money hereunder, and Buyer may assign any of its contingent rights to the Aircraft or any of them for the purpose of securing any obligation for the repayment of monies loaned or advanced by any financial institution to finance in whole or in part the purchase of the Aircraft. Notwithstanding the foregoing, Buyer shall have the right to assign this Contract in whole or in part without such consent to TRANS WORLD AIRLINES, INC., and upon such assignment and full notice thereof to CONVAIR, TRANS WORLD AIRLINES, INC. shall succeed to such of the rights and obligations of the Buyer hereunder as are so assigned and the Buyer shall cease to have or be subject to such rights or obligations so assigned; provided, that Buyer shall, in the event of the assignment to TRANS WORLD AIRLINES, INC., of Buyer's payment obligations under this Contract, guarantee the due and punctual payment of such obligations by said assignee.

ARTICLE 7

Contracts with Other Purchasers

(a) If subsequent to the date of this Agreement CONVAIR shall contract to sell to any other commercial purchaser any of the first one thousand (1,000) aircraft of the same basic model at a price less than (i) $1,500,000 each or (ii) the then adjusted Unit Base Price to be paid by Buyer in accordance with Exhibit A hereof, whichever is lower, plus or minus appropriate adjustments for labor and material escalation and for variations in specifications and equipment, or on other terms and conditions materially more favorable than those incorporated in the definitive purchase agreement mentioned in Article 4 hereof, except in respect to financing requirements, the purchase price of all Aircraft to be delivered hereunder shall be reduced to the lowest price to be paid by any such other purchaser and such other more favorable terms and conditions shall by appropriate amendment be offered to Buyer.

ARTICLE 8

Miscellaneous

(a) Each party hereto shall, within sixty (60) days after the execution of this Agreement, deliver to the other party a certified copy of a resolution of its Board of Directors, or Executive Committee thereof, duly adopted at a meeting thereof duly held, evidencing the authority of the officer or officers executing this Agreement to execute same in the name of or in behalf of said party or ratifying the execution of same by such officer or officers.

(b) The terms "Civil Aeronautics Administration" and "Civil Aeronautics Board" as used in this Agreement shall be deemed to include any other authority that shall be designated to perform the duties corresponding to the duties now performed by said Administration or by said Board.

(c) This Agreement shall not be varied in its terms by any oral agreement or representation or otherwise than by an instrument in writing of even or subsequent date hereto, executed by both parties by their officers thereunto duly authorized.

(d) This Agreement shall terminate fifteen (15) days from the date hereof unless the agreement referred to in the Second Whereas clause hereof has been executed by CONVAIR and Delta; and CONVAIR shall immediately execute such agreement and tender same to Delta for execution. CONVAIR shall notify Buyer in writing immediately upon the execution of such agreement by Delta and CONVAIR. CONVAIR will strive diligently to

effect as many additional sales as possible and to enhance a profitable position for the Model 22 program.

Executed in quadruplicate as of the day and year first above written.

1. The Unit Base Price of $3,750,000 stated in Article 3(a) of this Agreement shall be reduced, without regard to the proviso in paragraph 2 below, at the rate of $8,333.33 per Aircraft for each commercial sale of Model 22 Aircraft from No. 41 through No. 70 for a total reduction of $250,000 per Aircraft.

2. The Unit Base Price shall be further adjusted as additional commercial sales of Model 22 Aircraft are made beyond the forty (40) Aircraft covered by this Agreement and the agreement with Delta referred to in the Second Whereas Clause hereof, as follows:

(i) A reduction of $5,000 per Aircraft for each commercial sale from No. 41 through No. 100, resulting in an adjusted Unit Base Price of $3,200,000 at such 100th sale.

(ii) A reduction of $5,000 per Aircraft for each commercial sale from No. 101 through No. 150, resulting in an adjusted Unit Base Price of $2,900,000 at such 150th sale.

(iii) A reduction of $3,400 per Aircraft for each commercial sale from No. 151 through No. 200, resulting in an adjusted Unit Base Price of $2,730,000 at such 200th sale.

(iv) A reduction of $1,600 per Aircraft for each commercial sale from No. 201 through No. 250, resulting in an adjusted Unit Base Price of $2,650,000 at such 250th sale.

(v) An appropriate reduction per Aircraft for each commercial sale from No. 251 through No. 1,000, consistent with reasonable accounting procedures on a basis of computation consistent with the principles followed in computing reductions as set out in (i) through (iv) above resulting in an Adjusted Unit Base Price of $2,500,000 at such 1,000th sale;

provided, however:

(a) that each of the Adjusted Unit Base Prices listed in sub-paragraphs (i) through (iv) shall in no event become finally effective, nor shall CONVAIR be required to give final effect thereto, if any such Adjusted Unit Base Price would operate to reduce the combined total price of all the Model 22 commercial aircraft then sold below the actual cost of such aircraft to CONVAIR as charged or to be charged against the Model 22 commercial program under CONVAIR's usual accounting procedures which shall be in accordance with sound accounting practice; and,

(b) that each of the Adjusted Unit Base Prices listed in sub-paragraph (v) above shall in no event become finally effective, nor shall CONVAIR be required to give final effect thereto, if any such Adjusted Unit Base Price would operate to reduce CONVAIR's overall gross profit on all the Model 22 commercial aircraft then sold below six per cent (6%) of the actual cost of such aircraft to CONVAIR as charged or to be charged against the Model 22 commercial program under CONVAIR's usual accounting procedures which shall be in accordance with sound accounting practice; and,

(c) that the foregoing provisos shall be applied, insofar as the abatement of reductions is provided for therein, only pro tanto to the extent and during the period required to avoid violation of the terms of such provisos.

3. It is recognized by the parties hereto that CONVAIR may invoke the proviso in paragraph 2 above before or after payment for the Aircraft or a portion thereof by Buyer in accordance with Article 3(b) of this Agreement. In

such event, and upon the establishment of facts required to bring such proviso into operation, Buyer shall promptly pay such additional sums for the Aircraft as are determined necessary to give effect to such proviso, but such additional sums shall in no event be payable with respect to any particular Aircraft prior to delivery thereof.

4. The Unit Base Price reductions shown above are without effect on other price elements; i.e., the total purchase price of each of the 30 Aircraft covered by the contract with HUGHES TOOL COMPANY shall consist of the adjusted Unit Base Price increased or decreased as the case may be by specification changes, and other price elements expressly provided by the contract.

5. The term "commercial sales" means any arrangement, firm by ordinary standards prevailing in the aircraft manufacturing industry, under which CONVAIR agrees to deliver Aircraft for commercial use to any other person, firm, corporation or other entity, whether passage of title be involved or pursuant to conditional sale, chattel mortgage, lease, or otherwise; and, subject to the other provisions of this Exhibit A and definitive administrative provisions to be contained in the definitive purchase agreement referred to in Article 4 hereof, the Unit Base Price reductions provided hereby shall become initially effective upon CONVAIR entering into any such arrangement.

the price adjustments contemplated by this Exhibit A have been computed without reference to the possibility of sales of Model 22 type aircraft to the United States Military Forces. The effect of any such sales as a possible element of price adjustment has been the subject of preliminary discussions between the parties and it is mutually agreed that the matter shall be further analyzed and resolved incidental to development of the definitive purchase agreement and appropriate provisions recording such resolution shall be contained therein. CONVAIR shall promptly notify Buyer of any Model number change which, because of fundamental dissimilarity of the new model from prior production, in CONVAIR's opinion would operate to exclude aircraft of the new Model from the price adjustment provisions contained in Article 3 and Exhibit A hereof, and CONVAIR and Buyer shall promptly negotiate the effect of such model change upon such price adjustment provisions. Failure of CONVAIR to notify Buyer of any such Model number change within fifteen (15) days after the effective date of such change shall constitute a waiver by CONVAIR of the effect thereof on the aforesaid price adjustment provisions.

7. Notwithstanding any provisions to the contrary elsewhere contained, the final adjusted Unit Base Price of each Aircraft shall in no event exceed the applicable Unit Base Price set out below, in event CONVAIR's total sales, including the forty (40) Aircraft covered by this Agreement and the Agreement with Delta referred to in the second WHEREAS clause hereof, become 150 or greater;

Applicable Unit Base Price	Total Sales
$3,075,000	150
$2,805,000	200
$2,725,000	250

The applicable Unit Base Price for total sales between the total sales numbers above specified shall be computed on an equal, straight line basis; for example, the applicable Unit Base Price in event of total sales of 151 is $3,069,600; in event of total sales of 152 is $3,064,200; in event of total sales of 201 is $2,803,400; etc. The provisions of this paragraph 7 are independent of the provisions of paragraphs 1 and 2 of this Exhibit A and vice versa; i.e., no reduction is applicable pursuant to this paragraph 7 in event total sales are less than 150 nor on account of total sales in excess of 250; and the provisos of paragraph 2 and all matters relating to such provisos have no application to this paragraph 7.

8. Each payment by Buyer, at the time of delivery of an Aircraft and as part of the purchase price thereof, of any sum to whose return Buyer subsequently becomes entitled as representing a reduction in Unit Base Price pursuant to any of the provisions of this Exhibit A shall bear interest at the rate of three and one-half per cent (3-1/2%) per annum computed on the basis of a year of 365 days, for the period from the date of such payment to the date of such return. Interest due to Buyer pursuant to this paragraph shall be paid by CONVAIR to Buyer, or credited to Buyer's account, quarterly, as long as it accrues.

Attention: Mr. A. V. Leslie

Re: Purchase of Boeing Model 707-131 and 707-331 Jet Aircraft and Convair Model 880 Jet Aircraft

Dear Sirs:

If accepted by you this proposal will state our agreement and understanding concerning the conditions under which Trans World Airlines, Inc. (hereinafter called "TWA") may acquire from Hughes Tool Company (hereinafter called "Hughes") Hughes' interest in Boeing Model 707-131 and Boeing Model 707-331 jet aircraft, Convair Model 880 jet aircraft and spare parts, equipment and provisioning therefor.

1. Hughes hereby agrees to sell to TWA and, subject to the provisions of paragraph 9(c) hereof, TWA agrees to purchase from Hughes two Boeing Model 707-131 jet aircraft, Manufacturer's Serial Nos. 17671 and 17672, FAA Nos. N744TW and N745TW respectively, manufactured by Boeing Airplane Company and one Boeing Model 707-331 jet aircraft, Manufacturer's Serial No. 17679, FAA No. N765TW, manufactured by Boeing Airplane Company under Purchase Agreement No. 9 dated March 19, 1956, as amended, between Boeing Airplane Company and Hughes (hereinafter called the "331 Purchase Agreement").

Upon notice from TWA prior to June 30, 1960, Hughes shall transfer good title to such three aircraft to TWA free

and clear of all liens and encumbrances. TWA shall pay to Hughes Hughes' net book value of aircraft FAA Nos. N744TW and N745TW on the date title thereto is transferred from Hughes to TWA. As to aircraft FAA No. N765TW, TWA shall pay Hughes Hughes' undepreciated cost with respect to such aircraft.

Upon the acquisition of title thereto by TWA rental under the existing lease from Hughes of aircraft FAA No. N765TW will be cancelled from the beginning. The existing leases on aircraft FAA Nos. N744TW and N745TW and on the aircraft described in Exhibit 2 will be cancelled as of the acquisition of title by TWA. The provisions in paragraph 10(b) of such leases for payments by one party to the other to reflect differences in time since last overhaul of engines shall be inapplicable to all aircraft purchased by TWA hereunder.

As used herein and elsewhere in this agreement Hughes' net book value with respect to any aircraft shall mean the sum of

(i) The amounts Hughes shall have paid Boeing Airplane Company for such aircraft;

(ii) The amounts Hughes shall have paid vendors of customer-furnished equipment thereon;

(iii) All other costs of Hughes, including expenses, in connection with such aircraft, and

(iv) An amount representing interest on items (i), (ii) and (iii), at a rate per annum to be negotiated between the parties prior to the closing of TWA's long-term financing plan (computed on the average amount of the outstanding payments applicable to such aircraft by considering the payments made as outstanding from the respective dates such payments were made and until delivery of such aircraft to TWA under the respective day-to-day leases of such aircraft from Hughes to TWA);

such cost to Hughes to be depreciated (a) as to airframes, over a 10-year life with a 10% residual value, (b) as to JT-3 engines, over a 5-year life with a 10% residual value and (c) as to JT-4 engines, over a 7-year life with a 10% residual value.

As used herein and elsewhere in this agreement Hughes' undepreciated cost with respect to any aircraft, equipment, spare parts or provisioning shall mean the sum of

(i) The amounts Hughes shall have paid the vendors with respect thereto (including the amounts paid the vendors of customer-furnished equipment with respect to an aircraft);

(ii) All other costs, including expenses, in connection with the aircraft or other property, and

(iii) An amount representing interest on items (i) and (ii) at a rate per annum to be negotiated between the parties prior to the closing of TWA's long-term financing plan (computed on the average amount of the outstanding payments applicable to such aircraft or other property by considering the payments made as outstanding from the respective dates such payments were made and until the acquisition of such aircraft or property by TWA under this agreement).

2. Hughes hereby assigns to TWA the rights of Hughes to acquire from Boeing Airplane Company 2 Boeing Model 707-331 jet aircraft (Manufacturer's Serial Numbers 17685 and 17690) currently being manufactured by Boeing Airplane Company under the 331 Purchase Agreement. Subject to the provisions of paragraph 9(c) hereof, TWA agrees to purchase from the manufacturer pursuant to the 331 Purchase Agreement each such aircraft when manufactured in accordance with the terms of the 331 Purchase Agreement and tendered for delivery pursuant thereto. In exercising such rights to acquire each aircraft TWA shall pay Boeing Airplane Company the balance of the purchase price of said aircraft and shall agree to pay to the

vendors involved the balance due for customer-furnished equipment installed on such aircraft. In addition, TWA shall pay Hughes Hughes' undepreciated cost with respect to such aircraft.

3. Hughes hereby assigns to TWA the rights of Hughes to acquire from General Dynamics Corporation 20 Convair Model 880 jet aircraft currently being manufactured by General Dynamics Corporation under Purchase Agreement, dated as of September 10, 1956, as amended, between General Dynamics Corporation and Hughes (hereinafter called the "880 Purchase Agreement"). The 20 Convair Model 880 jet aircraft covered by such assignment are more specifically described in Exhibit 1 hereto.

Subject to the provisions of paragraph 9(c) hereof, TWA agrees to purchase from the manufacturer pursuant to the 880 Purchase Agreement each such aircraft when manufactured in accordance with the terms of the 880 Purchase Agreement and tendered for delivery pursuant thereto. In exercising such rights to acquire each aircraft TWA shall pay General Dynamics Corporation the balance of the purchase price of said aircraft and shall agree to pay to the vendors involved the balance due for customer-furnished equipment installed on such aircraft. In addition, TWA shall pay Hughes Hughes' undepreciated cost with respect to such aircraft.

4. Hughes hereby confirms that TWA has the exclusive right and privilege to acquire from Hughes the 13 Boeing Model 707-131 jet aircraft and 4 Boeing Model 707-331 jet aircraft heretofore leased to TWA on a day-to-day basis and not covered by paragraph 1 hereof, said aircraft being more specifically described in Exhibit 2 attached hereto. Subject to the provisions of paragraph 9(c) hereof, Hughes will sell and TWA will purchase such 17 aircraft upon the terms and

H.H.H.

conditions outlined in paragraph 5 hereof.

5. TWA may purchase the aircraft referred to in paragraph 4 hereof by at least two days' notice to Hughes given on or prior to June 30, 1960 and upon payment to Hughes of Hughes' net book value thereof. Hughes agrees that upon such payment by TWA it will transfer to TWA good title to such aircraft, free and clear of all liens and encumbrances.

6. Hughes hereby confirms that TWA has the exclusive right and privilege to acquire from Hughes Hughes' right to acquire from the manufacturers, or Hughes' interest in, as the case may be, the spare engines for the Boeing 331 and Convair 880 jet aircraft, more specifically described in Exhibit 3, and all other spare parts, equipment and provisioning owned or on order by Hughes for the Boeing or Convair jet aircraft (such engines, spare parts, equipment and provisioning hereinafter referred to as the "Spares").

7. Subject to the provisions of paragraph 9(c) hereof, TWA agrees to purchase the Spares from time to time, from the vendors or Hughes, as the case may be, (a) as to Spares of which title has vested in Hughes upon payment to Hughes of Hughes' undepreciated cost and (b) as to the remainder, upon payment of Hughes' undepreciated cost and TWA's agreement to assume all liabilities and obligations of Hughes to the manufacturers applicable to the Spares acquired by TWA, including the payment of any balance of the purchase price. Upon notice from TWA to Hughes, specifying such Spares, Hughes will transfer to TWA good title, free and clear of all liens and encumbrances, to such Spares that are owned by Hughes and all Hughes' rights as to other Spares specified in such notice.

8. Payments from TWA to Hughes pursuant to this agreement up to a total of $100,000,000 (less the principal amount of $5,811,000 on TWA's note, due December 1, 1960,

L.L.S

Rec'd

held by Hughes, plus interest thereon) may be made by means of subordinated debentures of TWA in the form that such subordinated debentures may be offered to all stockholders of TWA in connection with the proposed financing plan of TWA. Pending the issuance of subordinated debentures in connection with such financing plan, payments from TWA to Hughes pursuant to this agreement shall be made by delivery to Hughes of subordinated notes, on which interest is payable only if earned and on which no principal payment will be made so long as any senior debt is outstanding except out of the proceeds of the sale of subordinated obligations issued under the definitive financing program or of the sale of capital stock. The interest rate on such subordinated notes, and on the subordinated obligations issuable by TWA to Hughes pursuant to agreements between TWA and Hughes dated April 1, 1960 and April 14, 1960, respectively, shall be the same as that agreed upon by TWA and the lending banks for the temporary loans to TWA pending completion of the proposed definitive financing program for TWA.

9. Notwithstanding any of the above provisions it is further agreed that:

(a) This agreement is entered into subject to approval of the Civil Aeronautics Board and until an order has been entered by the Civil Aeronautics Board permitting the transaction covered by this agreement no sums shall be payable by TWA to Hughes hereunder.

(b) This agreement is subject to the necessary consents of the holders of obligations issued by TWA under its outstanding indentures, chattel mortgages and loan agreements. TWA will diligently endeavor to secure such consents, but in the absence of such consents no sums shall be payable by TWA to Hughes hereunder.

G.S.B. Rust

(c) TWA's obligation to make any payment, deliver any subordinated obligations or assume any liabilities or other obligations with respect to the purchase of any aircraft or other property hereunder is in each case subject to completion of financing arrangements (either temporary or definitive) relating thereto completely satisfactory to TWA.

If the foregoing is acceptable to TWA please so wledge by executing and returning the enclosed copy of this letter.

Very truly yours,
HUGHES TOOL COMPANY

Gentlemen:

Transmitted herewith are the below listed documents in connection with the purchase and registration of Boeing 707-331 airplane Serial No. 17688, Registration No. N771TW.

1. Form ACA 500, Part A - original and duplicate
2. Form ACA 500, Part B - original
3. Form ACA 500, Part C - original
4. Power of Attorney, Boeing Airplane Company
5. Power of Attorney, Trans World Airlines, Inc.
6. Check payable to the Federal Aviation Agency in the amount of $4.00 to pay for the registration and recordation fee.

The $10.00 fee for registration number reservation has been previously paid.

You are requested to mail the registration certificate to the following address:

Mr. R. M. Dunn
Vice President - Technical Services
Trans World Airlines, Inc.
Mid-Continent International Airport
Kansas City 8, Missouri

Yours very truly,

Edwin Zak

STATEMENT OF J.B. CONNELLY

61 Civ. 2324

STATE OF WASHINGTON)
: ss.:
COUNTY OF KING)

J.B. Connelly being duly sworn, deposes and says:

I am Vice President - Assistant General Manager of The Boeing Company, Airplane Division, and am familiar with the development, production, sales and deliveries of commercial jet aircraft by The Boeing Company during the period 1954 to 1961 and, in particular, the jet aircraft known as the Boeing 707-120 Series and the Boeing 707-320 Series.

I participated in or was generally familiar with the negotiations between Boeing and Pan American World Airways in 1955 and thereafter concerning the sale to Pan American of Boeing 707-120 and Boeing 707-320 jet aircraft. I also participated in or was generally familiar with the negotiations between Boeing and American Airlines in 1955 and thereafter respecting the sale to American of Boeing 707-120 jet aircraft.

I am familiar with the policies followed by Boeing concerning the sale of commercial jet aircraft to commercial air carriers throughout the period 1955 to 1961 and with Boeing's reasons for entering into the agreements with Pan American and American providing for the delivery of jet aircraft to such customers starting in 1958.

I also participated in or was generally familiar with negotiations between Boeing and other air carriers in 1955 and thereafter respecting the sale of Boeing jet aircraft to such customers.

Based upon my knowledge of the foregoing, it would be my testimony that:

1. In 1955, Boeing wished to sell substantial numbers of 707 jet aircraft to TWA. In accordance with its policies, Boeing would have afforded TWA substantially as early delivery positions as those afforded to other customers of comparable interest to Boeing:

(a) Had TWA commenced negotiations and ordered jet aircraft comparable in number to those ordered by Pan American and American, respectively, at about the same time as such other customers ordered jet aircraft from Boeing, Boeing would have afforded TWA substantial equality in early delivery positions with Pan American and American. Boeing would have sought to provide substantial equality of early delivery positions as between Pan American and TWA

with respect to jet aircraft useful primarily on international routes and substantial equality of early delivery positions as between American and TWA with respect to jet aircraft useful primarily on domestic routes;

(b) Boeing would have agreed, assuming that TWA had placed such orders, to deliver and would have delivered to TWA Boeing 707-120 and Boeing 707-320 jet aircraft earlier than such aircraft were in fact delivered under the Boeing agreements with Hughes Tool Company, the first of which agreements was not made until after Pan American and American had contracted for delivery of substantial numbers of Boeing 707 jet aircraft;

(c) If there were major differences in configuration and equipment between such customers, such as in the past existed between Pan American, American and TWA, the Boeing and FAA certification flight test programs would limit Boeing's ability to certify more than one configuration of aircraft at a time and this factor would require that some minimum number of aircraft of each type, probably three, would be delivered to one customer before the next received any;

(d) Since Pan American, TWA and American would all have been seeking early delivery positions of the 120 series, Boeing might have

FORWARD THIS COPY TO WASHINGTON — Retain Duplicate Copy.

selected TWA as the first customer but most probably would have selected Pan American as the first customer for the 120 series, affording Pan American the first three delivery positions. TWA and American would have been afforded substantial equality in early deliveries thereafter, particularly in light of the usefulness of the 120 series over domestic routes. American might have been afforded some preference in light of the reconstruction supplied in paragraph (e) below;

(e) TWA would most probably have been selected as the first customer for the 320 series, particularly in light of Boeing's selection of Pan American as the first customer for the 120 series. TWA would have, in that case, received delivery of the first three 320's and, thereafter, TWA and Pan American would have received substantial equality in early delivery positions.

(f) If TWA would not have compromised delivery positions contemplated in paragraph (e) in order to gain non-essential specific detailed configurations, then the extent of configuration variance that existed between Boeing's standard specification aircraft and the first Pan American 320 actually produced would not have been exceeded by TWA with respect to the cumulative gross effect on production or certification of the 320 (330) series.

2. The equality of early delivery positions described above would most probably have been provided as follows:

(a) With respect to the 120 series, under the agreements which Boeing probably would have made with Pan American, American and TWA, Boeing would have delivered to Pan American, TWA and American substantially the same number of aircraft approximately by the end of the first six months with substantially equivalent deliveries per month thereafter to American and TWA;

(b) With respect to the 320 series, under the agreements which Boeing probably would have made with Pan American and TWA, Boeing would have delivered to Pan American and TWA substantially the same number of aircraft by the end of the first six month period. The actual deliveries would not have been in exact rotation but would probably have been made on a substantially equal number per month basis.

3. I have examined TWA's Statement of Improvement of Delivery Positions* which reflects a reallocation of certain actual delivery dates of Boeing 707-120 and 707-320 aircraft. The Statement is a reasonable estimate of the improvement in delivery positions which TWA would have obtained, based upon the foregoing. The exact delivery dates which Pan American, TWA and American would have received can, of course, only be estimated. The necessities of Boeing's production line would

* A copy of such Statement is attached as Exhibit A.

not have permitted Boeing to agree that aircraft would come off the line and be delivered to such customers in an inflexible pari passu sequence, nor would such have been practicable. Rather, deliveries to such customers would have tended over the period of the deliveries to have afforded TWA early delivery positions at least as advantageous as those afforded Pan American and American.

4. With reference to the six Boeing 707-331 jet aircraft which were originally ordered by Toolco, and delivered to Pan American under Pan American's arrangements with Toolco, the earliest delivery positions Pan American could have obtained from Boeing for six 707-331 jet aircraft if such had been ordered in July 1959 from Boeing, in light of the lead time then required, were: one in February, 1961, two in March, 1961, two in April, 1961, and one in May, 1961. These are the same delivery positions as those which, in fact, Boeing offered to TWA at that time.

I have read the foregoing statement and it is true to the best of my knowledge, information and belief.

J. B. CONNELLY

Dear Sirs:

You have asked us to calculate the extent to which the operating profits earned by Trans World Airlines, Inc. ("TWA") during the years 1959-1963, inclusive, fell short of the profit TWA would have attained had its profits for those years been on the same level, vis-a-vis other air carriers, as the profits earned by it during the years 1964 and 1965.

In response to that request, we made a series of computations to determine how TWA's profits during the base years 1964 and 1965 compared with profits during those years of the other air carriers which, in our opinion, are most nearly comparable in operations to TWA. We then calculated the profits TWA would have earned for the years 1959 through 1963 if the ratio of its profits to those of such comparable air carriers had been the same as the ratio of its profits to those of the other carriers during the base years. Having made these computations, we can inform you that, had TWA achieved during the years 1959 through 1963 the profits vis-a-vis comparable air carriers which it reached in 1964 and 1965, its total operating profits during that five-year period would have been greater by approximately $170 million.

In making our comparisons between TWA and other airlines for purposes of this study, we note that TWA's 1959-1963 route structure was not materially different from what it was in 1964 and 1965, and that the route structures of the airlines we selected for comparison with TWA were also not materially different in 1959-1963 from what they were in 1964-1965.

TWA is unique among airlines in holding certificates of public convenience and necessity which authorize it both to provide international air transportation including transatlantic service and to provide U. S. domestic air transportation including transcontinental service. In order to select other air carriers with operations most nearly comparable to TWA, it is necessary to select both the most comparable air carrier competing with TWA internationally and the most comparable air carrier competing with TWA domestically.

In our opinion, this calculation of operating profit for TWA's International Division must be made on the basis of a comparison with the Atlantic Division of Pan American World Airways, Inc. ("PAA-Atl."). A map showing the routes operated by TWA's International Division and by the Atlantic Division of Pan American World Airways, Inc., and their comparability, is annexed hereto as Exhibit A. The Atlantic Division of Pan American provides the only other scheduled transatlantic air transportation of passengers by a United States flag air carrier.

It is also our opinion that this calculation of operating profit for TWA's Domestic Division operation, in 1964 and 1965 as compared with the period 1959-1963, should rest upon a comparison with American Airlines, Inc. ("American") which we consider to be the air carrier with domestic operation most comparable to TWA's Domestic Division operation. A map showing domestic routes operated by TWA and American and their comparability is annexed hereto as Exhibit B.

The operating profits during the base years 1964 and 1965 of TWA's Domestic and International Divisions and of the air carriers selected by us for purposes of comparison were as follows:

	1964	1965	Average
	(Millions)		
TWA International	$34.6	$47.6	$41.1
TWA Domestic	50.9	49.8	50.3
PAA-Atlantic	26.1	33.7	29.9
American (Domestic)	61.2	70.9	66.1

The ratios of TWA's operating profits to those of the air carriers selected for comparison in 1964 and 1965 were as follows:

	1964-1965 Average Operating Profit (Millions)	Ratio, TWA to Other
TWA International	$41.1	1.37
PAA-Atlantic	29.9	
TWA Domestic	$50.3	.76
American (Domestic)	66.1	

The operating profits (losses) in each of the years 1959 through 1963 of TWA and the selected air carriers were as follows:

	1959	1960	1961	1962	1963	Total
	(Millions)					
PAA-Atlantic	$17.5	$16.6	$ 4.5	$12.5	$33.3	$ 84.4
American (Domestic)	24.5	24.7	19.1	19.3	43.9	131.5
TWA International	(-7.8)	17.1	(-13.5)	15.3	23.3	34.4
TWA Domestic	26.3	(-0.9)	(-24.2)	(-7.4)	17.5	11.3

Application of the TWA profit ratios determined for the base years 1964 and 1965 to the total 1959-1963 profits of the selected air carriers, establishes that TWA's profits would have been as set out below if TWA had attained a profit level comparable to that reached by TWA in 1964 and 1965:

TWA Ex. 4(b), page 4
(C. & C. Report-Comparative Profit Study)

1959-1963 Profits		1964-1965 Profit Ratio, TWA to Other	Calculated 1959-1963 TWA Profits
	(Millions)		(Millions)
PAA-Atlantic	$ 84.4	1.37	$115.6
American (Domestic)	131.5	.76	99.9

The difference between the profits calculated by this method and TWA's actual profits are as follows:

Comparison Airline	Calculated 1959-1963 TWA Profits	Actual TWA Profits		Difference
	(Millions)		(Millions)	
PAA-Atlantic	$115.6	TWA International	$34.4	$ 81.2
American (Domestic)	99.9	TWA Domestic	11.3	88.6
				$169.8

The operating profits earned by TWA's International Division in the period 1959 through 1963 were about $81 million less than they would have been if that Division's profit, as compared with PAA-Atl., had been as high as in the years 1964 and 1965. The operating profits earned by TWA's Domestic Division in the period 1959 through 1963 were about $89 million less than they would have been if that Division's profit, as compared with American, had been as high as in the years 1964 and 1965. These figures are graphically illustrated in Exhibit C hereto.

Respectfully submitted,

Corridden & Colpitts

Consulting Engineers

May 2, 1966

Cahill, Gordon, Reindel & Ohl
80 Pine Street
New York 5, New York

Dear Sirs:

In accordance with your request we have estimated changes that would have occurred in the annual financial gain or loss from operations for Trans World Airlines, Inc., (TWA) for each of the years 1959 through 1963 if the air line had:

I - Owned the Boeing B-131 and B-331 jet aircraft that were leased in 1959 and 1960.

II - Received six additional Boeing B-331 aircraft that were, in fact, delivered to Pan American World Airways, Inc. (PAA) in 1959 and 1960.

III - Received Boeing B-131 and B-331 aircraft on certain earlier dates in 1958-1960.

IV - Received the fleet of twenty Convair 880 aircraft on the 1959-1960 delivery dates provided in the purchase contract.

V - Received a fleet of thirty (rather than twenty) Convair 880 aircraft on the 1959-1960 delivery dates provided in the purchase contract.

JET AIRCRAFT AND DATES

In the years 1959-1963, TWA received jet aircraft of the following numbers and general characteristics, on the dates listed in the following table, for passenger service. Certain cargo-only jet aircraft that TWA received are not included in this list or in analyses that follow because the numbers and receipt dates of cargo-only jet aircraft are unchanged by the conditions for the estimates in this report.

Actual Number of Jet Aircraft and Receipt Dates

Number of Aircraft	Model	Cruising Speed(a)	Range(a) (Miles)	Seats(b)	Dates Received(c)
15	B-131	585 mph	3,300	119	Jan. 1959 to Aug. 1959
12	B-331	600 mph	5,700	142	Nov. 1959 to July 1960
20	CV 880	615 mph	2,994	94	May 1960 to Oct. 1961
4(d)	B-720B	622 mph	4,100	111	July 1961 to Sept. 1961
18	B-131B	622 mph	4,200	119	Mar. 1962 to Oct. 1962
5	B-331B	600 mph	6,000	142	Nov. 1962 to Mar. 1963
6	CV 880	615 mph	2,994	94	July 1963 to Sept. 1963
76+4(d)					

(a) From the August 1964 Official Airline Guide, World Wide Edition, Typical Performance Section, Page C-1002.
(b) Normal seating capacity as shown in TWA Passenger Capacities Bulletins numbers 63-502 and 63-102 dated May 29, 1963. Normal seating capacity for B-720B from TWA Sales Management Control Bulletin number 62-107 dated June 28, 1962.
(c) From TWA Schedules 3-66M.
(d) These four B-720B aircraft were leased in 1961 and returned in the latter part of 1962.

The above-listed aircraft model numbers that begin with a "B" are model 707 jet aircraft manufactured by the Boeing Airplane Company (Boeing). The final B indicates aircraft equipped with fan-jet engines that have lower fuel consumption and certain other advantages. "CV" identifies aircraft manufactured by the Convair Division of General Dynamics Corporation (Convair).

Only the B-331 and B-331B jet aircraft have sufficient range to be well-suited for TWA's International Division transatlantic flights. These aircraft can perform non-stop scheduled service between New York and Rome, and they also have the speed and range to be good competitive aircraft for non-stop U. S. transcontinental service. The B-720B and B-131B aircraft also are well-suited for non-stop U. S. transcontinental service. The B-131 aircraft were used for non-stop transcontinental service, but their slower speed resulted in a competitive disadvantage. For normal operating conditions, the CV 880 is practically limited to less-than-transcontinental flights without stops. The

flights TWA operated with these jet aircraft and with various piston aircra
are shown in detail by the Employees' Timetables for the years 1959-1963, w
are Exhibit A, Volumes II and III of this report.

Additional Jet Aircraft and Earlier Dates

You gave us assumptions as to additional jet aircraft and earlier
receipt dates whereby TWA would have had the following jet aircraft fleets.

Number of Aircraft	Model	Cruising Speed	Range (Miles)	Seats	Dates Received
Revised Numbers of Aircraft and/or Receipt Dates(a)					
15	B-131	585 mph	3,300	119	Nov. 1958 to July 195
18	B-331	600 mph	5,700	142	July 1959 to July 196
30	CV 880	615 mph	2,994	94	Nov. 1959 to Sept. 196
Unchanged Numbers and Dates					
4(b)	B-720B	622 mph	4,100	111	July 1961 to Sept. 196
18	B-131B	622 mph	4,200	119	Mar. 1962 to Sept. 196
81+4(b)					

(a) Given to us by Cahill, Gordon, Reindel & Ohl.
(b) These four B-720B aircraft were leased in 1961 and returned in 1962.

Note:
Performance characteristics and normal seating capacities as shown in the preceding table.

These additional aircraft and earlier dates would have revised the numbers an
types of jet aircraft TWA would have recieved by the end of each year through
1963, as follows:

Year	TWA Jet Aircraft Received by the End of Each Year							
	Very Long-Range, Transatlantic and Transcontinental B-331 and B-331B		Non-Stop Transcontinental				Shorter-Range, CV 880	
			Well-Suited, B-720B and B-131B		Usable, B-131			
	Actual	Revised	Actual	Revised	Actual	Revised	Actual	Revised
1958	-	-	-	-	-	2	-	-
1959	4	10	-	-	15	15	-	2
1960	12	18	-	-	15	15	1	30
1961	12	18	4	4	15	15	20	30
1962	14	18	18	18	15	15	20	30
1963	17	18	18	18	15	15	26	30

The total numbers of jet aircraft on hand at the end of each year, actual and revised are:

Year	Jet Aircraft on Hand at the End of Each Year		
	Actual	Revised	Increase
1958	-	2	2
1959	19	27	8
1960	28	63	35
1961	51	67	16
1962	67	81	14
1963	76	81	7

By the end of 1963 there is a relatively small difference between actual and revised numbers of jet aircraft on hand.

Average Number of Jet Aircraft

The average number of jet aircraft available for commercial service is calculated by TWA each month for each type of aircraft. We used these monthly average numbers of aircraft to calculate the annual averages shown in the upper half of the table on the following page and in Exhibit B, Volume IV.

Using revised numbers of jet aircraft and receipt dates as listed on the previous page, we calculated revised monthly and annual average number of jet aircraft TWA would have had available for commercial service. These calculations are shown in Exhibit C. The revised annual average numbers are

(C. & C. Report-Financial Results from Reconstructed Jet Fleet

Year	TWA's Annual Average Number of Jet Aircraft Available for Commercial Service						
	Very Long-Range, Transatlantic and Transcontinental		Non-Stop Transcontinental			Shorter-Range	Total
			Well-Suited		Usable		
	B-331	B-331B	B-720B	B-131B	B-131	CV 880	
	Actual						
1959	0.3	-	-	-	8.9	-	9.2
1960	8.8	-	-	-	15.0	-	23.8
1961	11.7	-	1.4	-	14.8	14.6	42.5
1962	12.0	0.2	3.1	8.2	15.0	20.0	58.5
1963	12.0	4.6	-	18.0	15.0	22.1	71.7
(See Exhibit B for details.)							
	Revised						
1959	2.0	-	-	-	10.3	-	12.3
1960	15.1	-	-	-	15.0	15.4	45.5
1961	17.6	-	1.4	-	14.8	29.7	63.5
1962	18.0	-	3.1	8.2	15.0	30.0	74.3
1963	18.0	-	-	18.0	15.0	30.0	81.0
(See Exhibit C for details.)							

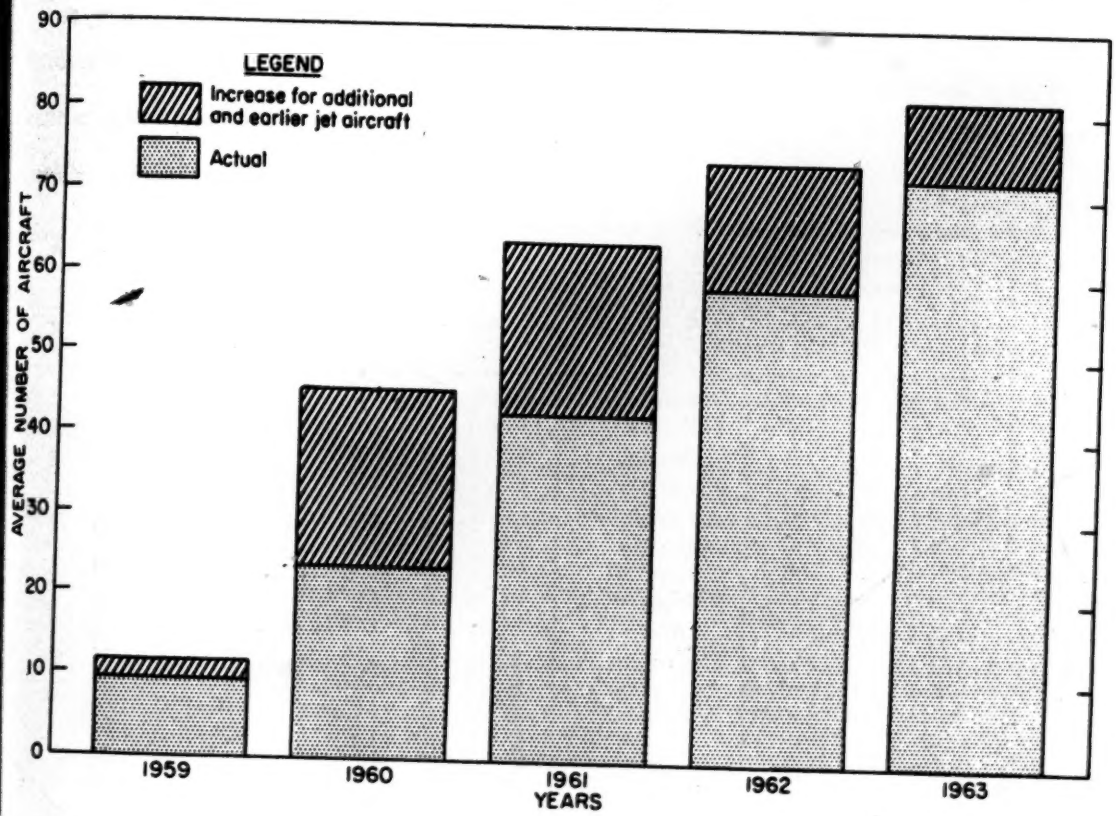
The additional jet aircraft and earlier receipt dates would have giv

TWA the following increases in annual average number available.

Year	Annual Average Number of Jet Aircraft Available for Commercial Service			
	Actual (a)	Revised (a)	Increase	
			Number (b)	Percent (b)
1959	9.2	12.3	3.1	34%
1960	23.8	45.5	21.7	91
1961	42.5	63.5	21.0	49
1962	58.5	74.3	15.8	27
1963	71.7	81.0	9.3	13

(a) From total columns in preceding table.
(b) By subtraction and calculation.

Average Number of Jet Aircraft Available for Commercial Service



As shown by the table at the bottom of the previous page and the chart above, the additional and earlier jet aircraft would have given TWA quite substantial increases in the average number of jet aircraft available in the years 1960-1962, and especially in 1960.

LIMIT ON ESTIMATES

With your approval we will limit to the years 1959 through 1963 our estimates of change in financial gain or loss from operations for the additional B-331 and CV 880 aircraft (Chapters II and V that follow) because by the end of 1963 the difference between actual and revised numbers of these types of aircraft is relatively small. Our estimates for aircraft ownership and earlier receipt

dates (Chapters I, III and IV that follow) will be limited to the years in wh
those changes would have had the principal effect. Accordingly, the years fo
which estimates are prepared are:

	1959	1960	1961	1962	19
I - Ownership of B-131s and B-331s	X	X			
II - Six additional B-331s	X	X	X	X	
III - Earlier receipt of B-131s and B-331s	X	X			
IV - Earlier receipt of twenty CV 880s		X	X		
V - Receipt of thirty CV 880s		X	X	X	

CHAPTER I

OWNERSHIP OF B-131 AND B-331 AIRCRAFT

This Chapter outlines the development of our estimates of changes in financial results from operations that would have occurred if TWA had owned rather than leased B-131 and B-331 jet aircraft in 1959 and 1960. The receipt dates, leasing and ownership of these aircraft were:

Fleet of Fifteen B-131 Jet Aircraft			
Registration Certificate Number	Receipt Date	Leased or Owned on Receipt	Ownership Date
N 731TW	Jan. 29, 1959	Leased	Dec. 30, 1960
N 732TW	Mar. 17, 1959	Leased	Dec. 30, 1960
N 733TW	Mar. 30, 1959	Leased	Dec. 30, 1960
N 734TW	Apr. 3, 1959	Leased	Dec. 30, 1960
N 735TW	Apr. 18, 1959	Leased	Dec. 30, 1960
N 736TW	Apr. 29, 1959	Leased	Dec. 30, 1960
N 737TW	May 10, 1959	Leased	Dec. 30, 1960
N 738TW	May 13, 1959	Leased	Dec. 30, 1960
N 740TW	May 24, 1959	Leased	Dec. 30, 1960
N 739TW	May 28, 1959	Leased	Dec. 30, 1960
N 741TW	June 13, 1959	Leased	Dec. 30, 1960
N 742TW	July 1, 1959	Leased	Dec. 30, 1960
N 743TW	July 10, 1959	Leased	Dec. 30, 1960
N 744TW	July 14, 1959	Leased	May 18, 1960
N 745TW	Aug. 1, 1959	Leased	May 18, 1960
Source: TWA Official List of Aircraft, Schedule 3-66M, issues of July 31, 1959 and August 31, 1959.			
Fleet of Twelve B-331 Jet Aircraft			
N 761TW	Nov. 10, 1959	Leased	Dec. 30, 1960
N 762TW	Nov. 10, 1959	Leased	Dec. 30, 1960
N 763TW	Nov. 25, 1959	Leased	Dec. 30, 1960
N 764TW	Dec. 23, 1959	Leased	Dec. 30, 1960
N 765TW	Jan. 18, 1960	Owned	Jan. 18, 1960
N 766TW	Apr. 1, 1960	Owned	Apr. 1, 1960
N 767TW	Apr. 5, 1960	Owned	Apr. 5, 1960
N 768TW	Apr. 14, 1960	Owned	Apr. 14, 1960
N 769TW	May 9, 1960	Owned	May 9, 1960
N 770TW	May 25, 1960	Owned	May 25, 1960
N 771TW	July 1, 1960	Owned	July 1, 1960
N 772TW	July 1, 1960	Owned	July 1, 1960
Source: TWA Official List of Aircraft, Schedule 3-66M, January 31, 1961.			

The change from lease to ownership of these aircraft would have eliminated rentals expense in the years 1959 and 1960. Such expense for B-131 and B-331 aircraft is shown on Civil Aeronautics Board (CAB) Form 41 reports, Schedule P-5.2, as follows:

Year	Rentals Expense		
	Domestic Division (B-131)	International Division (B-331)	Total
	(Millions)		
1959	$ 7.6	$0.2	$ 7.8
1960	12.5	3.9	16.4

Price Waterhouse & Co. advised us that, based on their study of Depreciation and Amortization Expense, the change from leasing to ownership for the fifteen B-131 and twelve B-331 jet aircraft would have altered such non-cash charges in 1959 and 1960 as follows:

Year	Change In Depreciation and Amortization Expense		
	Domestic Division	International Division	System Total
	(Millions)		
1959	$+4.2	$+0.2	$+4.4
1960	+6.4	+2.1	+8.5

GAIN OR LOSS FROM OPERATIONS

The changes in Gain or Loss from Operations we calculate for ownership rather than leasing B-131 and B-331 jet aircraft in 1959 and 1960 are summations of the expense changes described above, as follows:

Year	Changes In		Total Improvement In Gain from Operations
	Rentals Expense	Depreciation and Amortization	
	(Millions)		
1959	$ -7.8	$+4.4	$3.4
1960	-16.4	+8.5	7.9

CHAPTER II

SIX ADDITIONAL B-331 JET AIRCRAFT

This Chapter outlines the development of our estimates of changes in financial results of operations that would have resulted from TWA having the six additional B-331 jet aircraft that, in fact, were delivered to PAA between November 1959 and June 1960. This would have given TWA eighteen B-331 very long-range jet aircraft as follows:

TWA's Fleet of Twelve B-331 Aircraft and Actual Receipt Dates	
Registration Certificate Number	Date Received(a)
N 761TW	November 10, 1959
N 762TW	November 10, 1959
N 763TW	November 25, 1959
N 764TW	December 23, 1959
N 765TW	January 18, 1960
N 766TW	April 1, 1960
N 767TW	April 5, 1960
N 768TW	April 14, 1960
N 769TW	May 9, 1960
N 770TW	May 25, 1960
N 771TW	July 1, 1960
N 772TW	July 1, 1960

Additional Six B-331 Aircraft, and PAA's Receipt Dates Which are Assumed to be Those for TWA	
Registration Certificate Number	Date Received(b)
N 701	November 5, 1959
N 702	December 15, 1959
N 703	December 30, 1959
N 704	March 23, 1960
N 705	April 29, 1960
N 706	June 8, 1960

(a) From TWA Official List of Aircraft, Schedule 3-66M dated July 31, 1960.
(b) From CAB Form 41 Report, Schedules B-7, for quarters ending December 31, 1959, March 31, 1960 and June 30, 1960, submitted by PAA.

USE OF B-331 AIRCRAFT

TWA used its twelve B-331 aircraft for commercial service on both International and Domestic Division flights. The International Division flights were primarily transatlantic and the Domestic Division flights generally were U. S. transcontinental as shown in the Employees' Timetables of Exhibit A. The usage of B-331 aircraft for service in each Division in the period 1959-1963 is

shown by the annual average number of aircraft available for commercial service for each Division, as follows:

Year	Annual Average Number of B-331 Aircraft Available for Commercial Service(a)		
	International Division	Domestic Division	Total
1959	0.3	-	0.3
1960	6.1	2.7	8.8
1961	7.3	4.4	11.7
1962	9.8	2.2	12.0
1963	9.9	2.1	12.0

(a) From Exhibit B.

Northeast Airlines' Lease

In addition to the above-listed usage of the B-331 aircraft by TWA, commencing in December 1959 and continuing through April 1961 TWA leased time equivalent to about one-half an aircraft to Northeast Airlines, Inc. Northeast flew the aircraft from New York to Miami and return during the time between TWA's New York-Europe flights. For the estimates of this Chapter, we will assume Northeast would have continued to lease only this same amount of aircraft time although additional time might have been available.

Northeast paid TWA for the use of the aircraft and TWA credited against this income the applicable operating expense. The net amount of lease receipts less expense was recorded as Incidental Revenues in TWA's monthly Financial Report.

B-131B Aircraft

TWA's usage of B-331 aircraft changed in 1962 when TWA received and put into operation a fleet of eighteen B-131B aircraft. The B-131B aircraft, like the B-331 aircraft, is well-suited for non-stop U. S. transcontinental service. Reference to the table above shows that in 1962 there was a significant shift of B-331 aircraft from Domestic to International Division service,

as the B-131B aircraft became available to cover Domestic Division flights. For the estimates in this Chapter, we will assume this 1962 shift of B-331 aircraft from Domestic to International Division service occurred at the same time and in the same proportion as the expanded B-331 fleet.

B-331B Aircraft

In December 1962 TWA commenced operating a new fleet of leased B-331B aircraft which are very long-range like the B-331 aircraft (but are equipped with fan-jet engines). The five aircraft of this B-331B fleet were all in service by April 1963. Average usage for each Division was:

Year	Annual Average Number of B-331B Aircraft Available for Commercial Service(a)		
	International Division	Domestic Division	Total
1962	0.1	0.1	0.2
1963	4.3	0.3	4.6

(a) From Exhibit B.

We believe it is reasonable to assume TWA would not have ordered these five B-331B aircraft for delivery in 1962-1963 if TWA had purchased and received the six additional B-331 aircraft in 1959-1960. Accordingly, the service actually operated with B-331B aircraft would have been performed by the additional B-331s.

Additional Number Available

We calculated the additional average number of B-331 aircraft that would have been available for commercial service for the six additional B-331s. This calculation, shown in Exhibit D, was made in accordance with TWA's procedure. The results are:

Year	Additional Annual Average Number of Aircraft Available, for the Six Additional B-331s
1959	0.2
1960	5.0
1961	5.9
1962	6.0 (Including aircraft assigned
1963	6.0 to cover B-331B service)

We apportioned these additional numbers of aircraft to International and Domestic Division service in accordance with the actual usage of B-331 and B-331B aircraft each year. For 1960 and 1961 the apportionment was adjusted to reflect Northeast Airlines' leasing of aircraft time between International Division flights. Details of these calculations are shown in Exhibit D. The resulting apportionment of the six additional B-331s between Divisions is as follows:

Year	Annual Average Number of B-331 Aircraft Available for Commercial Service, for the Six Additional B-331s		
	International Division	Domestic Division	Total
1959	0.2	-	0.2
1960	3.6	1.4	5.0
1961	3.7	2.2	5.9
1962	4.9	1.1	6.0
1963	5.2	0.8	6.0

If the number of B-331B aircraft available in 1962 and 1963 is deducted from the figures above, the following is the net increase in number of very long-range aircraft available for commercial service, resulting from having the six additional B-331s.

1962	4.8	1.0	5.8
1963	0.9	0.5	1.4

In summary, our estimates of these changes in TWA's number of very long-range jet aircraft are:

TWA Ex. 4(c)(1), page -14-
(C. & C. Report-Financial Results from Reconstructed Jet Fleet)

Year	Annual Average Number of B-331 and B-331B Aircraft Available for Commercial Service					
	Actual (B-331 and B-331B)			Revised (B-331 Only)		
	International Division	Domestic Division	Total	International Division	Domestic Division	Total
1959	0.3	-	0.3	0.5	-	0.5
1960	6.1	2.7	8.8	9.7	4.1	13.8
1961	7.3	4.4	11.7	11.0	6.6	17.6
1962	9.9	2.3	12.2	14.7	3.3	18.0
1963	14.2	2.4	16.6	15.1	2.9	18.0

Source:
Actual figures are from table on page 11. For 1962 and 1963 the actual figures in table on page 11 are combined with figures shown in table on page 12 to reflect the inclusion of B-331B aircraft available for commercial service. Revised figures are a combination of figures shown in tables on pages 11, 12 and 13.

INTERNATIONAL DIVISION

Most of TWA's operation with the very long-range B-331 and B-331B aircraft, as shown above, was and would have been on International Division service. International Division operations with both jet and piston aircraft in the years 1959-1963 produced the "passenger revenue plane-miles" listed in the table that follows. These are miles an aircraft is flown carrying paying passengers on scheduled flights, extra sections and charter flights. This definition excludes ferry, non-revenue and all-cargo flights. We will use the abbreviated term "plane-miles" in the text and tables that follow.

Year	Plane-Miles, International Division		
	Jet	Piston	Total
	(Millions)		
1959	0.3	21.5	21.8
1960	10.7	7.0	17.7
1961	13.0	2.7	15.7
1962	17.4	0.3	17.7
1963	24.4	0.3	24.7

Source:
TWA's December Financial Reports, Schedule 3-2M; the Schedules 3-71M and the October-December 1963 3-453M Reports.

The International Division plane-miles per jet aircraft available were low during the first month of B-331 service, in December 1959, and then were reasonably uniform during the years 1960-1963 as shown in the table that follows. This table shows jet plane-miles for only B-331 and B-331B aircraft (deleting a miscellaneous 0.1 million plane-miles flown in 1959 with B-131 aircraft on International Division charter flights).

Year	International Division		
	Plane-Miles, Jet(a)	Average Number of Jet Aircraft Available B-331 and B-331B(b)	Ratio, Plane-Miles Per Aircraft(c)
	(Millions)		
1959	0.2	0.3	0.67
1960	10.7	6.1	1.75
1961	13.0	7.3	1.78
1962	17.4	9.9	1.76
1963	24.4	14.2	1.72

(a) From table on preceding page, adjusted to only B-331 and B-331B plane-miles.
(b) From Exhibit B and table on page 14.
(c) By calculation.

At these actual ratios of plane-miles per aircraft, TWA would have operated the following additional International Division plane-miles with the additional jet aircraft.

Year	International Division		
	Additional Jet Aircraft Available(a)	Ratio(b)	Additional Jet Plane-Miles(c)
			(Millions)
1959	0.2	0.67	0.1
1960	3.6	1.75	6.3
1961	3.7	1.78	6.6
1962	4.8	1.76	8.4
1963	0.9	1.72	1.5

(a) From Exhibit D and tables on page 13.
(b) From table above.
(c) By calculation.

Reduced Piston Operation

Reference to the table on page 14 shows that in the 1960-1963 period while jet aircraft plane-miles were increasing, International Division piston aircraft plane-miles were reduced to the minimal annual amount of 0.3 million by 1962. With the additional B-331 aircraft to operate more jet aircraft plane-miles in 1960 and 1961, TWA would have reduced piston aircraft operations earlier.

There was in 1960 and for a part of 1961 a special situation whereby TWA operated piston flights in North Africa and at Colombo, Ceylon because it was not feasible to operate jet aircraft at these locations. This service to Colombo (and thence to Bangkok) was terminated in July 1961 and service to North Africa was terminated in October 1961. For this study we assume TWA would have operated weekly piston aircraft flights to Colombo and Bangkok and to North Africa through July and October 1961, respectively, and a connecting weekly piston transatlantic round trip between New York and Rome via Madrid through October 1961, although there would have been enough jet aircraft available to cover this transatlantic flight. Our calculations for this special situation reflect:

(a) The weekly round trip from New York to Rome via North Africa points and from Rome to Colombo and Bangkok would average approximately 100,000 plane-miles per month.

(b) The weekly round trip from New York to Rome via North Africa would average about 45,000 plane-miles per month.

Source:
Calculated from TWA Schedule 3-15P showing CAB airport to airport mileages.

There was another special situation in 1960 whereby TWA operated a number of transatlantic charter flights with L-1049H (Lockheed Constellation) aircraft with high-density seating for approximately 100 persons. We will

assume this special service would have been operated with L-1049H aircraft in 1960 although additional B-331 aircraft were available. In 1960 the International Division recorded:

L-1049H plane-miles 0.4 million

Source:
From Annual Summary of plane-miles shown in Schedules 3-71M.

For this study we will assume the minimal 0.3 million piston plane-miles that were operated in the years 1962 and 1963 would have been operated then and also in 1960 and 1961 although additional jet aircraft would have been available.

Our estimates of the reductions of piston aircraft plane-miles that would have taken place in 1959-1963 as the result of TWA receiving the additional B-331s are as follows:

Year	Jet Plane-Miles			Piston Plane-Miles			
	Actual (a)	Additional Available (b)	Total (c)	Actual (a)	Special (d)	Required (e)	Estimated Reduction, with Additional Jets (f)
	(Millions)						
1959	0.3	0.1	0.4	21.5	-	21.4	0.1
1960	10.7	6.3	17.0	7.0	1.6	0.3	5.1
1961	13.0	6.6	19.6	2.7	0.8	0.3	1.6
1962	17.4	8.4	25.8	0.3	-	0.3	-
1963	24.4	1.5	25.9	0.3	-	0.3	-

(a) From table on page 14.
(b) From table on page 15.
(c) Sum of (a) and (b) under jet plane-miles.
(d) As discussed above for North Africa, Colombo and L-1049H charter flights.
(e) For regular and minimal service.
(f) Actual piston plane-miles minus Special and Required amounts.

These reductions in piston aircraft plane-miles would have been Lockheed L-1649A plane-miles because, as shown by Employees' Timetables in Exhibit A, nearly all International Division piston aircraft scheduled service from December 1959 through 1961 was operated with L-1649A aircraft.

In summary, our estimates of changes in International Division plane-miles are:

Year	Plane-Miles, International Division Operation						
	Actual			Revised			Net Increase
	Jet	Piston	Total	Jet	Piston	Total	
	(Millions)						
1959	0.3	21.5	21.8	0.4	21.4	21.8	-
1960	10.7	7.0	17.7	17.0	1.9	18.9	1.2
1961	13.0	2.7	15.7	19.6	1.1	20.7	5.0
1962	17.4	0.3	17.7	25.8	0.3	26.1	8.4
1963	24.4	0.3	24.7	25.9	0.3	26.2	1.5

Source:
The jet and piston columns above are from prior tables; the total and net increase columns are calculated.

Transatlantic Flights

In the period 1960-1963, as TWA operated substantial and increasing amounts of jet aircraft plane-miles on International Division service, the ratio of the number of transatlantic flights to millions of plane-miles was relatively uniform as follows:

Year	Transatlantic Flights (a)	Plane-Miles (b)	Ratio, Flights/ Plane-Miles (c)
		(Millions)	
1960	3,347	17.7	189
1961	3,104	15.7	197
1962	3,775	17.7	213
1963	5,094	24.7	206

(a) Summaries of IATA monthly statistics.
(b) From table above.
(c) By calculation.

A proportionate increase of transatlantic flights for the net increase in International Division plane-miles given in the preceding table would have been:

Year	Plane-Miles, International Division			Number of Transatlantic Flights		
	Actual (a)	Revised (a)	Percent Increase (b)	Actual (c)	Increase, At Percent Increase of Plane-Miles (b)	Revised (b)
	(Millions)					
1959	21.8	21.8	-	3,399	-	3,399
1960	17.7	18.9	6.8%	3,347	228	3,575
1961	15.7	20.7	31.8	3,104	987	4,091
1962	17.7	26.1	47.5	3,775	1,793	5,568
1963	24.7	26.2	6.1	5,094	311	5,405

(a) From table at top of page 18.
(b) By calculation.
(c) Summaries of IATA monthly statistics.

These additional flights would have produced the following additional transatlantic seats for sale by TWA.

Year	Additional Flights(a)	Seats Per B-331 Aircraft(b)	Additional Seats(c)
			(Thousands)
1959	-	-	-
1960	228	130.5	29.8
1961	987	136.2	134.4
1962	1,793	140.0	251.0
1963	311	141.4	44.0

(a) From table above.
(b) Annual average number of seats per B-331 aircraft calculated from TWA statistics shown in Schedule 3-71M.
(c) By calculation.

There would have been a further increase in TWA's transatlantic seats when jet aircraft replaced piston aircraft because there are more seats in the jet aircraft. The table that follows shows our calculation of this increase in number of seats. (The number of flights for which jet aircraft would have replaced piston aircraft is calculated using a plane-miles ratio.)

(C. & C. Report-Financial Results from Reconstructed Jet Fleet)

Year	Actual Flights	Ratio of Plane-Miles for Jets Replacing Pistons, to Total Actual Plane-Miles(a)	Jet Flights Replacing Piston Flights (Actual Flights x Ratio)	Additional Seats In the Jet Aircraft (b)	Additional Seats(c)
					(Thousands)
1959	3,399	0.1/21.8	16	68.7	1.1
1960	3,347	5.1/17.7	964	61.5	59.3
1961	3,104	1.6/15.7	317	62.9	19.9

(a) From tables on pages 17 and 18.
(b) Additional annual average number of seats per aircraft (B-331 minus L-1649A) calculated from TWA statistics shown in Schedule 3-71M.
(c) By calculation.

In summary, the additional transatlantic seats TWA would have had available are:

Year	Additional Seats		
	From Additional Flights With Jets	From Jets Replacing Piston Flights	Total
	(T h o u s a n d s)		
1959	-	1.1	1.1
1960	29.8	59.3	89.1
1961	134.4	19.9	154.3
1962	251.0	-	251.0
1963	44.0	-	44.0

From preceding tables.

IATA Flights and Passengers

We analyzed data on transatlantic flights and passengers for TWA, PAA and the foreign flag carriers that are members of the International Air Transport Association (IATA). We limited this analysis to flights between the U.S.A. and Europe. The number of such transatlantic flights operated each year between the U. S. A. and Europe by TWA, PAA and the foreign flag carriers that are members of IATA, and TWA's percentage of this IATA total are:

Year	Transatlantic Flights				TWA's Percent
	TWA	PAA	Foreign	Total	
1958	4,145	6,787	15,120	26,052	15.9%
1959	3,399	4,810	16,522	24,731	13.7
1960	3,347	4,825	15,226	23,398	14.3
1961	3,104	6,373	16,778	26,255	11.8
1962	3,775	7,394	19,098	30,267	12.5
1963	5,094	8,364	20,006	33,464	15.2

Source:
Summaries of IATA monthly statistics.
TWA's percent by calculation.

(The table above and those that follow from IATA data on transatlantic service cover only scheduled passenger flights and extra sections. IATA statistics are not available for charter flights for 1958-1962.)

The transatlantic passengers carried each year by TWA, PAA and the foreign flag air lines, and TWA's percentage of this IATA total are:

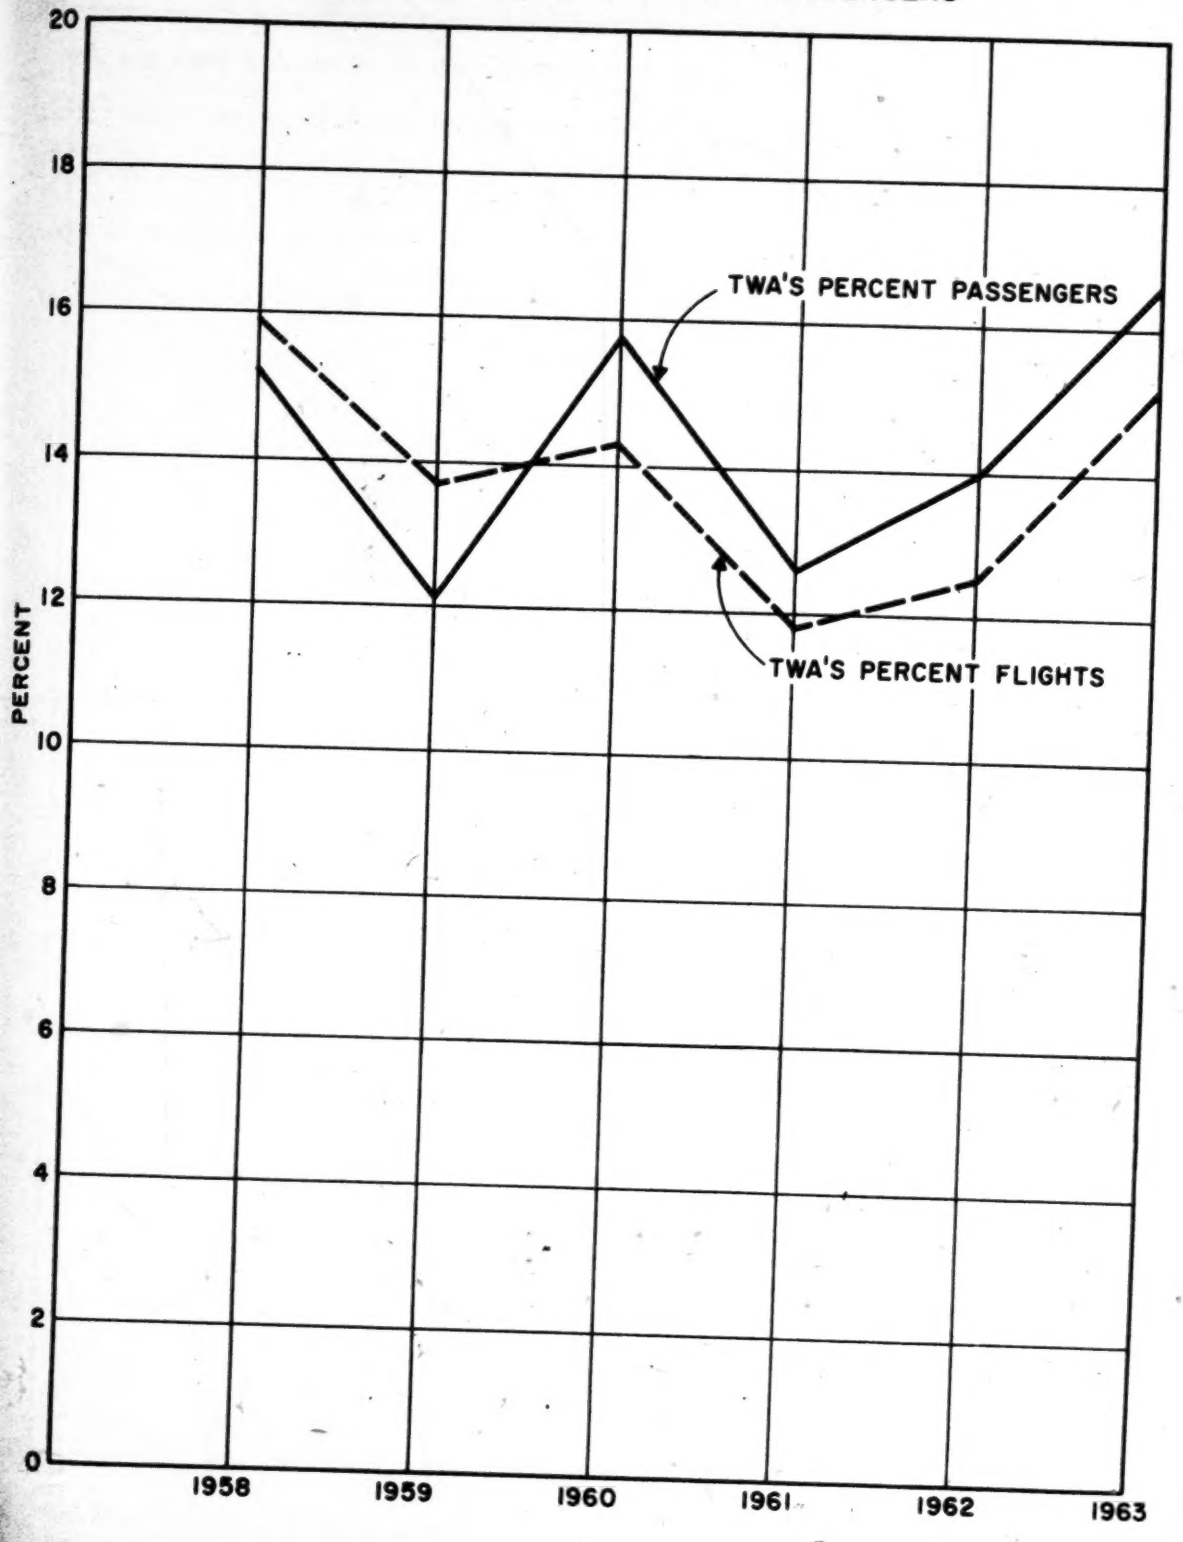
Year	Transatlantic Passengers				TWA's Percent
	TWA	PAA	Foreign	Total	
	(Thousands)				
1958	160	278	617	1,055	15.2%
1959	146	336	722	1,204	12.1
1960	243	368	923	1,534	15.8
1961	208	404	1,042	1,654	12.6
1962	277	449	1,255	1,981	14.0
1963	359	539	1,267	2,165	16.6

Source:
Summaries of IATA monthly statistics.
TWA's percent by calculation.

The chart that follows shows that TWA's percentage of IATA passengers varied generally with TWA's percentage of IATA transatlantic flights.

(C. & C. Report-Financial Results from Reconstructed Jet Fleet)

TRANSATLANTIC FLIGHTS AND PASSENGERS



The 1958 and 1959 data points shown on the chart on the preceding page are for essentially an all-piston fleet operation by TWA, although principal competitors were operating jets. Commencing in 1960 TWA's transatlantic operations were primarily with jet aircraft, and from 1960 through 1963 TWA's percentage of transatlantic passengers was slightly higher than its percentage of flights.

Transatlantic Seats

The seats available each year on transatlantic flights by TWA and the other carriers, and TWA's percentages of the IATA totals are:

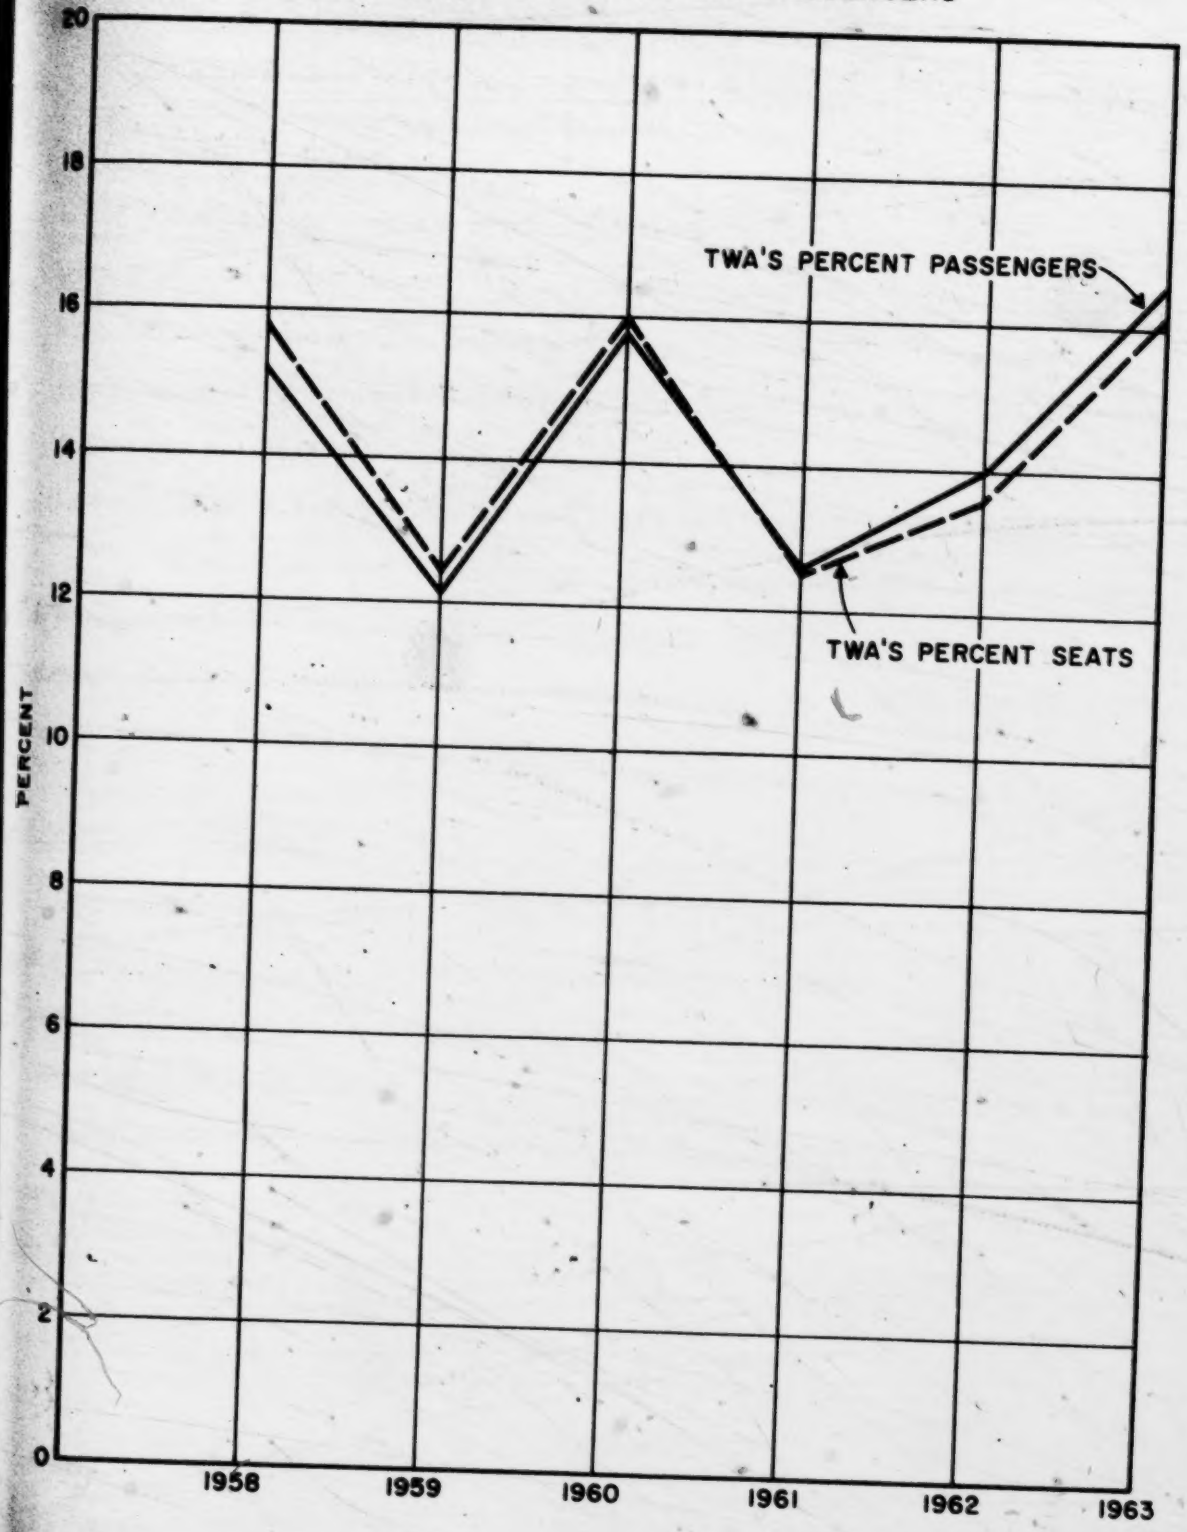
Year	Transatlantic Seats Available				TWA's Percent
	TWA	PAA	Foreign	Total	
	(Thousands)				
1958	276	443	1,024	1,743	15.8%
1959	226	427	1,170	1,823	12.4
1960	386	537	1,490	2,413	16.0
1961	412	759	2,115	3,286	12.5
1962	529	906	2,456	3,891	13.6
1963	720	1,071	2,666	4,457	16.2

Source:
Summaries of IATA monthly statistics.
TWA's percent by calculation.

These TWA percentages of IATA seats correlate well with TWA percentages of passengers, as illustrated by the following chart.

(C. & C. Report-Financial Results from Reconstructed Jet Fleet)

TRANSATLANTIC SEATS AND PASSENGERS



As shown by the preceding chart, TWA's percentage of the IATA air lines' passengers is nearly the same as TWA's percentage of the seats available.

Additional Passengers

The foregoing historical evidence for a six-year period is the basis for our calculations that follow for TWA's additional transatlantic passengers in accordance with the additional seats available by operating the additional B-331 aircraft. The jet flights replacing piston flights would have increased the "quality" of TWA's available transatlantic seats. The seats in additional (not replacement) jet flights would have been in aircraft fully competitive with those flown by other transatlantic air lines.
